SMALL AIRCRAFT PRODUCTION--Chandigarh, December 21 (UNI): India intends to go in for the production of small transport aircraft. A proposal to this effect was being considered by the government, minister of state for tourism and civil aviation, Mr. Chandulal Chandrakat, said while inaugurating the annual general meeting of the Aeronautical Society of India here today. The need for indigenous production of small transport aircraft, he said, had assumed importance following the government's acceptance of the concept of a third level airline for more intensive coverage of selected areas. It had already been decided to provide supplementary air services to the north-east region through such an airline, he added. [Text] [Bombay THE TIMES OF INDIA in English 22 Dec 80 p 13]

CONGRESS(I) ELECTION PLANS--Ahmedabad, December 21 (PTI): Organisationel elections to the Congress (I) would be held in May next year, the AICC (I) secretary, Mr. S. S. Mahapatra, said yesterday. [as published] Orgranisational elections at the pradesh and the district levels would be over by March next year, he told newsmen.

Mr. Mahapatra arrived here yesterday on a day's visit mainly in connection with the coming panchayat elections in the state. He said the present appointments of the party office-bearers were purely on ad hoc basis. Barring some inevitable exceptions, no minister would be allowed to hold party positions, he said. Regarding the selection of the new president for the GPCC (I), Mr. Mahapatra said the high command would announce its choice by the end of next week. EXPORTS TO KENYA--Nairobi: In an essentially European dominated market of engineering goods in Kenya, India has come on top in the import list in respect of electrical wire fittings, tea machinery and cycle parts. India's annual export of these three items alone to this East African country amounts to nearly Rs. 117 lakhs. The official figures available here show that India has not only emerged as the largest exporting country in these items but has also made considerable headway in case of wheel barrows, sack trucks and hand trolleys. Their export is estimated to be nearly 30 per cent of the import of these items made here.--PTI. [Text] [Madras THE HINDU in English 15 Dec 80 p 5]

SIKKIM PARTY DISSENSION--Gangtok, Dec. 14. Sikkim's largest Opposition party, the 14-month old Sikkim Congress (Revolutionary) was on Friday plunged in a deep crisis following the resignation of two of its top leaders from party posts. The two leaders, Messrs. Bhim Bahadur Gurung Sor, Legislative Party leader and Jagat Bandhu Pradhan, General Secretary, however told newsmen that they had resigned only from their party posts and not from the party. The resignations are attributed to inner party squabbles. Top leaders who had been to New Delhi recently quarrelled among themselves over the question of the presidentship of the proposed Congress (I) unit in the State. One section of the party wanted to leave the choice to the High Command, while the other group insisted that the presidentship should go to Mr. Ram Chandra Poudyal. The ruling Sikkim Parishad has been working as an affiliate of the Congress (I). PTI reports: According to party sources, Mr. Gurung's resignation had come in the wake of demands for his removal from the leadership of the legislative wing. [Text] [Madras THE HINDU in English 15 Dec 80 p 7]

SCANNING ELECTRON MICROSCOPE--New Delhi, Dec. 14. A salable model of scanning electron microscope (SEM) is now nearing completion at the Central Electronics Ltd., a public sector undertaking in Sahibabad near here. This is the outcome of a four-year-old research project, with a number of institutions participating in it. According to official sources, the Central Scientific Instruments Organisation, Chandigarh, the National Physical Laboratory, New Delhi, the Central Electronics Engineering Research Institute, Pilani, the Banaras Hindu University and the Central Electronics Ltd. had successfully developed the different sub-systems of SEM and these were finally integrated in CSIO to make up the first prototype. The first pictures of this completely integrated system were shown in 1978 and, based on this accomplishment, the engineering development of a salable model was undertaken by CEL with the assistance of the Indian Institute of Technology, New Delhi and the Bhabha Atomic Research Centre, Bombay. This continuing project is meant

to encourage advanced research and development work in the frontier area of electron optics. Efforts are now in progress to develop more advanced technologies and accessories of SEM for different applications. [Text] [Madras THE HINDU in English 15 Dec 80 p 9]

LEH-DELHI AIR LINK--New Delhi, Dec. 13. Leh, capital of Ladakh district, located at an altitude of 10,400 ft. will be air-linked to Delhi and Chandigarh from December 15. Indian Airlines will be operating Boeing 737s, every Monday between Delhi and Leh via Chandigarh. [Text] [Madras THE HINDU in English 15 Dec 80 p 16]

SOVIET HELICOPTERS ARRIVE--India has received a new batch of MI-8 tactical support helicopters from the Soviet Union, which have been despatched to their stations, reports UNI. The MI-8 agreement, signed with the Soviet Union over 10 years ago, had envisaged its continued supplies to the Indian Air Force. The first MI-8 had arrived in India in 1971 by ship. Since then, it has successfully been used in the mountainous regions of the country, particularly in the north-east. [Text] [New Delhi PATRIOT in English 19 Dec 80 p 1]

ARMY TRAINING DIRECTORATE--New Delhi, December 15: The government of India has decided to set up a special examination research and reform cell in the military training directorate in order to evolve an objective system for promotions and competitive examinations. This was disclosed here on Saturday by Dr. R. G. Mishra, head of the measurement and evaluation department, National Council of Educational Research and training (NCERT), at the concluding function of the 12-week training course in examination reform and research conducted by the NCERT. The four brigadiers and 21 lieutenant-colonels, who attended this course, will now train a number of examiners in the army, prepare examination handbooks and familiarise candidates with the new system of examinations. They will also be required to man this new cell and formulate the objectives of the promotion and competitive examinations conducted by the directorate. [Text] [Bombay THE TIMES OF INDIA in English 16 Dec 80 p 18]

RICE TO RUSSIA--Karnal, December 16. India will export four lakh tonnes of rice worth over Rs. 100 crores to the Soviet Union, the Union agriculture minister, Mr. Rao Birendra Singh, told a rally in Unjha village near here. Addressing the rally, he said the Centre would spend Rs. 1250 crores on agriculture during 1980-81. The government had also earmarked Rs. 1,500 crores in the fifth plan for the rural development programme, which would cover 1,500-lakh people. Potable water facilities would also be extended to two-lakh problem villages over the next five years, he said.--UNI. [Text] [Bombay THE TIMES OF INDIA in English 17 Dec 80 p 9]

URDU IN BIHAR--Patna, December 16 (UNI): The Bihar assembly today adopted the government's official language (amandment) bill according the status of the second official language to Urdu by a voice vote. [Text] [Bombay THE TIMES OF INDIA in English 17 Dec 80 p 6]

RAO CONDEMNS GANDHI--Contrary to the hopes entertained by supporters of Mr. S. A. Dange, the CPI has not taken a soft line towards Mrs. Indira Gandhi following the party leaders' meeting last week with the Soviet President, Mr. Leonid Brezhnev. On the contrary, NEW AGE, the official organ of the Communist Party of India, in its latest issue, has strongly come out against Mrs. Gandhi's government and the deliberations at the recent AICC(I) session. In a front-page article, Mr. C. Rajeswara Rao, general secretary of the party, has condemned the allegedly retrograde economic policies of the Congress (I) and its government. Mr. Rao says that at the reception to Mr. Brezhnev, Mrs. Gandhi even went to the extent of calling the left parties as the "so-called left" which were allegedly obstructing her efforts to end economic inequality. [Text] [Bombay THE TIMES OF INDIA in English 17 Dec 80 p 6]

MANIPUR CABINET SHUFFLE--Imphal, December 16 (PTI): The chief minister of Manipur, Mr. Reishing Keishing will hold home, general administration, food and civil supplies, and panning under a reallocation of portfolios announced by him today. [as published] Mr. Keishing will also hold labour, cabinet and personnel departments. The distribution of portfolios among other ministers is as follows: Mr. Ngurdienglem--agriculture, irrigation, flood control and tribal wefare; Mr. I. Tompok Singh--education, finance and revenue; Mr. T. H. Chauba Singh--industries; Mr. Sosho Larho--medical and electricity; Mr. Helaluddin--forest and co-operation; and Mr. R. K. Radhabinod Singh--local self-government and public health engineering department. [as published] [Text] [Bombay THE TIMES OF INDIA in English 17 Dec 80 p 13]

EFFORTS TO INCREASE FOOD PRODUCTION

Jakarta KOMPAS in Indonesia 5 Nov 80 p 12

[Excerpts] President Suharto has requested that the interests of farm workers be safeguarded in an attempt to increase food production in the future, or else they could have no zest to produce food.

Thus said Vice Minister for Food Affairs Achmad Affandi last Tuesday after meeting with President Suharto at Bina Graha together with Wardojo, director general of food plants; Surjono, director general of irrigation; Sudjanadi, director general of cooperatives; Sukrya Atmadja, deputy chief of Logistics Board; Permadi SE, director in chief of People's bank of Indonesia. "We will do our utmost to implement the protection of farm workers," declared Affandi.

In reply to questions, he said that efforts will be made to oversee the implementation of the Profit Sharing Law.

He could not say how many farm workers there are in Indonesia because of their variety--100 percent farm workers, 75 percent farm workers and even 50 percent farm workers.

He divulged that President Suharto brought up the idea of enlisting students to participate in food production. Consequently, students' practicum would be conducted to coincide with the planting season.

The Vice Minister for Food Affairs said he reported to the President on the summary and resolutions of the 1980 National Congress on Food Production held recently. According to the President, the key still lies in its intensification.

The role of Village Unit Cooperatives, which has been slack in alloting production resources, will be intensified, for which purpose 4,000 kiosks and 999 barns will be constructed by the cooperatives during 1980-81, Affandi said.

The People's Bank of Indonesia will set up 5,000 more village-unit branches in an effort to grant more credit to farmers, besides the Village Unit Cooperatives which, as the bank's clients, have been distributing credit, Affandi added.

He continued to say that the President would like the general public to understand that the decrease in Bimas [government-supported agricultural production project] arable land area does not mean the decline of intensification of food plants. The

government has no intention of expanding the Bimas arable land without limit, but to further intensify the food production.

Without mentioning the shrinkage of Bimas arable land area, Affandi opined that this is probably because the farmers concerned no longer need credit and are capable of intensifying food production without taking part in Bimas anymore.

He admitted that some farmers refuse to join Bimas because they still owe Bimas some old credit, but apparently some farmers can carry out intensification by themselves, although they have not paid back the credit they borrowed from Bimas before, the vice minister for food affairs concluded.

ECONOMIC GROWTH RATE MAY REACH 7 PERCENT

Jakarta KOMPAS in Indonesian 7 Nov 80 pp 1, 12

[Excerpts] During 1979-80 Indonesia's economic growth rate was up, although the level of growth in Indonesia's neighboring countries showed a decline in general. One of the reasons for the increase in the growth rate in Indonesia was the hike in food production which was much enjoyed by the farming group.

Indonesia's economic growth rate in 1979 reached 4.9 percent only, but it can reach 7 percent in 1980. Her foreign exchange reserves will also register an improvement from $6.7 billion to about $8 billion by the second semester of 1980.

These figures were given by Minister of Finance Ali Wardhana during a work conference with House National Budget Commission last Thursday.

The Minister explained that due to worldwide recession, the economic growth rate of various countries in 1979 was generally lower. Industrial countries which reached a growth level of 3.4 percent in 1979 will probably get a growth rate of 1.1 percent in 1980 and 1.2 percent in 1981.

During the same period under review, oil exporting countries may reach a growth rate of 2.5 percent in 1979, but only 0.3 percent in 1980 and, hopefully, it will go up again to reach 3 percent in 1981. Developing countries which do not export oil could get an economic growth rate of 4.8 percent in 1979 and again in 1980, while in 1981 it can go up to become 5.1 percent.

As a comparison, according to Ali Wardhana, it is estimated that Singapore, which enjoyed a growth rate of 9.3 percent in 1979, will get only 8 percent in 1980; Thailand's growth will drop from 5.8 percent to 5.5 percent; the Philippines from 5.3 percent to 3.8 percent; Malaysia from 8.3 percent to 7.9 percent; South Korea from 6.4 percent to -2 percent in 1980. "Even so, Indonesia must not rejoice yet, because our level of growth is still below Singapore and Malaysia," said the Minister.

In reply to questions concerning inflation in Indonesia, Ali Wardhana said it is still difficult to calculate its rate because of various factors, including the flexible changes in price increases. What we can say at present is that the level of inflation, based on the April-October (7 months) budget for the fiscal year 1980-81, has reached 10.6 percent.

This represented a decrease, as compared with the inflation rate for the corresponding period in 1979-80, which at the time reached 14.8 percent. For the January-October, 1980 period, the inflation level was 13.49 percent, whereas the figure stood at 20.2 percent for the corresponding period in 1979. "This means that the inflation can be controlled," the Minister of Finance assessed.

In connection with Indonesia's success in improving her economic growth rate, in controlling inflation and augmenting her foreign exchange reserves to reach about $8 billion by the end of the second semester of 1980, certain foreign circles have appraised that Indonesia should no longer be granted "soft" loans and credit. It appears therefore that offers of "soft" credit to Indonesia will decline in number.

Nevertheless, the Minister of Finance explained, this does not mean a narrowing of opportunities for Indonesia to obtain foreign credit for her national development, for creditors still see the necessity for Indonesia to acquire larger funds. It is still possible to obtain credit from foreign countries, except that the terms are no longer "soft" as before.

FOREIGN EXCHANGE RESERVES REACH $7.2 BILLION

Jakarta KOMPAS in Indonesian 12 Nov 80 pp 1, 12

[Excerpts] Indonesia continues to carry out her development endeavors calmly and confidently, although the world is still suffering economic uncertainties. The reason is that her foreign exchange reserves in custody of Bank Indonesia total $7.2 billion at present, explained Rahmat Saleh, governor of the Central Bank/Bank Indonesia, before House VII Commission yesterday.

Rahmat Saleh expressed calm confidence in facing development work because, he said, current foreign exchange reserves are equal to Indonesia's expenditures for imports during an 8-month period. In the first six months of the 1980-81 fiscal year Indonesia's imports reached $5.4 billion or $900 million per month.

The imports are not only consumer goods but cover capital goods for national development as well, thus representing Indonesia's total imports, Rahmat Saleh added.

With the "strength" of the foreign exchange reserves comparable to the total value of Indonesia's imports for eight months, "we can breathe with relief now, compared with the situation two or three years ago," he said. At that time, our foreign exchange reserves were sufficient to cover imports for five months only, and that's why we can now carry on with our development projects with a sense of relief.

At the start of the New Order, Indonesia had no foreign exchange reserves at all. "Our reserves were zero," declared Rahmat Saleh in early December, 1979.

The situation improved gradually then, but during the Pertamina crisis several years ago, the foreign exchange reserves dwindled to about $500 million, because the government was compelled to earmark certain amounts to repay Pertamina's short-term loans.

However, the situation subsequently turned for the better and by the end of November, 1979 the foreign exchange reserves rose to $4.1 billion from the figure of $3.2 billion three months previously.

The rapid increase was attributed to abundant revenues accruing from oil and non-oil exports. "Practically all export commodities registered a price increase

and I believe this was the result of our November 15, 1978 Decision," Rahmat Saleh said in early December, 1979.

With the approach of the first anniversary of that government decision, Widjojo Nitisastro, minister of economic, financial and industrial affairs, said last September that Indonesia's foreign exchange reserves had reached $6.7 billion. The increase was also due to the rise in export revenues.

Now, in early November, 1980, the foreign exchange reserves have again reached the high level of $7.2 billion. Rahmat Saleh explained that this steep increase was due to payments in late October by oil contractors to the Indonesian government, a periodic obligation to the said oil enterprises.

DEVELOPMENT OF OIL REFINERIES TO BE SPEEDED UP

Jakarta KOMPAS in Indonesia 13 Nov 80 pp 1, 9

[Excerpts] President Suharto has instructed Minister of Mines and Energy Subroto to urgently complete the hydrocracker project in Dumai and oil refineries in Cilacap and Balikpapan by 1983. Likewise, the implementation of other projects are to be speeded up, such as the polyvinyl project in Aceh, methanol in East Kalimantan, aromatic center in Plaju and the carbon black project likely to be erected in Cilegon.

Completion of these projects needs to be speeded up, because they not only represent sources of foreign exchange for the state, but also will produce the direly-needed industrial materials for Indonesia's burgeoning industries.

The Chief of State also requested that domestic products and services be utilized to the fullest extent for the development of the said projects, according to Minister Subroto who added that capabilities of many domestic enterprises have been investigated and that some of them have even been invited to take part in project execution.

Minister Subroto explained that negotiations for the Dumai hydrocracker project have been held and would be continued with respect to its funding and construction. The funds will be acquired from export credit and commercial credit, the negotiations for which will be conducted by the Department of Finance and Bank Indonesia. Negotiations concerning construction will be initiated forthwith by Pertamina assisted by a Presidential Directive 10 team of experts on the one hand and contractors on the other.

Contractors for the Cilacap and Balikpapan oil refineries have been officially appointed and terms for the agreement are being prepared. "Fluor" has been picked to build the Cilacap project, and "Bechtel" the Balikpapan project.

Besides the three abovementioned projects, the President has also instructed a study of the feasibility of a fourth refinery, according to Minister Subroto. Originally, he added, it was planned to build it in Sorong, Irian Jaya, but this plan needs further investigation, and its construction will be expedited.

Thus, during the 1983-84 period, the capacity of refineries in Indonesia will be doubled from the present production of 400,000 barrels per day to 800,000 barrels per day.

As regards the Aceh polyvinyl project to make plastic products, the minister divulged that tenders have been received from three enterprises, one French and two American. The government is studying as to which enterprise will be invited to collaborate in the project construction in the form of a joint venture.

The methanol project in the northern part of East Kalimantan will be entirely funded by the government and constructed by Pertamina. Likewise, the government will also be fully responsible for the construction of the aromatic center in Plaju to make synthetic fiber for textile industry in order to better guarantee its completion. The carbon black project for automobile tires, likely to be set up in Cilegon, will take the form of a joint venture between Pertamina and an enterprise from Australia.

DEVELOPMENT OF EXPANSION PROGRAM PROMOTES FOOD PRODUCTION

Jakarta KOMPAS in Indonesian 14 Nov 80 pp 1, 12

[Excerpts] Ir Wardoyo, director general of Food Plantation Agriculture, is convinced that with the implementation of special intensification of proper paddy planting, the increase in food production, particularly rice, will exceed the population growth rate. Consequently, it is hoped that food self-support will be attained by the end of the Third Five-Year Plan (Pelita III).

Director General Wardoyo told this newspaper that per capita rice consumption in Indonesia has been steadily increasing from 114.24 kgs in 1975, to 116.24 kgs in 1976, to 120.85 kgs in 1977, to 123.35 kgs in 1978 and to 130 kgs in 1979. The average rate of increase in rice consumption per head becomes 1.2 percent per year, while the population growth rate has been 2.3 percent per year. Therefore, the increase in rice supply requirement in the period under review is 3.5 percent per year.

On the other hand, the increase in rice production during the First Five-Year Plan reached 4.7 percent per year, which dropped to 3.78 percent during the Second Five-Year Plan. During the first and second years of the Third Five-Year Plan, rice production registered a big leap, with an average yield of 20.24 quintals per hectare. Higher yields are still to be expected, because special intensification of rice planting will be extended to more arable land.

Therefore, Director General Wardoyo expressed his conviction that rice requirements for the people can be fulfilled by domestic production, as long as the development of the increase in rice demand and of rice production follows the existing pattern. He is convinced that domestic production will be able to provide enough food for the people.

He admitted, however, that by "enough," he does not include stock of food reserves, explaining that food reserves keep changing in quantity and category. Rather, he based his understanding of "enough" on the "food balance sheet," that is, the figure for food stock at year's end, plus food produced during the year concerned, minus rice seedling requirement (about 5 percent of the rice production), minus again spoiled and lost rice, and minus again for livestock feed requirements. The rice component in this food balance sheet still exceeds the increase of the rice requirements of the population.

Increase in production, said Ir Wardoyo, may be attained through improvement in that quality of intensification and expansion of arable land area. He added that there is still room for improving the quality of intensification up to a certain point, besides extending the area for the special intensification and utilizing a special fertilizer.

There are three ways of expansion of arable land, according to Ir Wardoyo, that is, by gradual agricultural expansion related to transmigration, by creating a new field and by a People's Nucleus Food Plantation.

Regarding the transmigration-geared gradual expansion, he said that this would depend on the transmigration program, capabilities of the farmers and other factors.

The irrigation system must also be improved for expansion of the field. It is planned to create 350,000 hectares of field during Pelita III. The government will make all the necessary arrangements in connection with ownership and tilling of the land in order to forestall any obstacles. The system of funding has been revised through advance payment earmarked from the budget of the Directorate General of Food Plantation Agriculture, before bank credit is available. This way it is hoped the question of financing will run smoothly.

MOZAMBIQUE AGENCY GIVES TRACTORS TO REVOLUTIONARIES

Maputo NOTICIAS in Portuguese 12 Dec 80 p 1

[Text] The Mozambican Caritas (Catholic Church agency) gave the FRETILIN--Revolutionary Front for East Timor Independence--representatives in Mozambique two tractors and four pieces of agricultural equipment to help in the opening of the future farm of that Timorese group in the zone of Umbeluzi, Maputo Province.

That gift, the first of that type seen up to now, was personally delivered to the foreign relations secretary of the FRETILIN Central Committee, Mari Alkatiri, by the archbishop of Maputo.

Speaking at the time of the delivery of the aforementioned agricultural implements, the archbishop began by praising the government for the way in which it welcomes and provides the conditions for the FRETILIN representatives to establish themselves in Mozambique to live from their own work, developing the cultural values of their own people, who fight for peace and freedom.

The FRETILIN Central Committee secretary, after expressing his thanks for the gift, said: "We are certain that with this type of help the people of East Timor will be able to turn Umbeluzi into a true production center so that in the future, after our country is freed, we shall be able to take something from here we raised through our own efforts."

STATUS OF ROAD CONSTRUCTION REVIEWED

Vientiane SIANG PASASON in Lao 11 Dec 80 p 2

[Text] In the last 5 years, the land communications network has been expanded. Along with that, some important sections have been repaired, enlarged and upgraded to guarantee communications from the center to the localities and from inside the country out to the sea. Of these, the national highways are:

Route 9: It is 246 kilometers long of which 35 kilometers has been paved (from Savannakhet to Seno). By the end of 1980, work on enlarging this will have been completed on 24 kilometers. Large bridges have been built to replace old bridges in 69 places with a total length of 1,813 meters. Preparations have also been made to organize road- and large-scale bridge construction units in five places to join with the assistance and cooperation of fraternal socialist countries like Bulgaria, Hungary, Czechoslovakia and Poland. This route can be considered to guarantee communications in both seasons.

Route 13: This route is 1,245 kilometers long (from Luang Prabang to the Lao-Kampuchean border). It is paved from Vientiane to Phon Hong 70 kilometers away. There has also been regular maintenance work. Aside from that, old bridges in disrepair have been replaced in 33 locations.

Route 13: (From Nam Bac to Luang Prabang), 110 kilometers have been broken through to join with Route 1.

Routes 1, 2 and 3 in the north: Some sections of these have been repaired, primarily the parts that had collapsed or eroded. Approximately 48,000 cubic meters have been excavated.

Route 8: This is 144 kilometers long. By the end of 1980, approximately 20 kilometers of the road's surface had been built. Planning, checking and calculations have been completed.

Bridges: Some 511 bridges with a combined length of 13,408 meters have been restored and repaired. These are located on Routes 1, 7, 8, 9 and 13.

Over the past 5 years, the large bridges on which construction has been completed are: the bridge at the Nam Neun River on Route 6, the Nam Mat, Nam Tian (Route 7), the Dong Hene Bridge, the Phalan Bridge, the Se Tamouak Bridge, the Kong Kam Bridge (on Route 9). Another 18 bridges with combined length of 425 meters were rebuilt.

Provincial Highways

Route 42: This route is 64 kilometers long (from Khoua District to Tai Chang). Some 24 kilometers have been paved and some parts have been repaired.

Route 10: This has been restored to a normal condition.

The Nam Neun-Meuang Hiam Route: This is 67 kilometers long and some parts have been repaired for transport in the dry season.

Route 217: This is 65 kilometers long (Meuang Liat Na Naeo) and some deteriorated sections have been repaired.

Route 23: This is 118 kilometers long (Phin District-Saravane) and bridges have been restored and some parts are guaranteed for transport in the dry season. (From Tha Teng to Saravane, a distance of 50 kilometers is guaranteed for transport in both seasons.)

Route 18: This is 194 kilometers long (from Route 13 to the Lao-Vietnamese border) and has been broken through on the portion from Attopeu to the Vietnamese border.

Route 16: This is 150 kilometers long and is guaranteed for transport all year long from Paksong to Pakthon, or 95 kilometers.

The Nong Te-Kampuchean Border Route: This is 102 kilometers long and can only be guaranteed for transport in the dry season.

The Thathom-Chomthong Route: This is 98 kilometers long. It has been restored and can be guaranteed for transport in the dry season.

Aside from this, in the localities, new roads have been opened up. These are:

--The Pak Nam Noi-Meuang Gno route, of which 10 kilometers has been done.

--The route from Route 13 North (Hin Heup) to Ban Don Sanakham which is 760 kilometers long.

--Route 13 to Ban Houai Meun (Savannakhet) has been opened up to a length of 35 kilometers.

--The road from Khok Van to Na Tan (40 kilometers long) has been opened up and is guaranteed for travel for 34 kilometers.

Along with restoration and construction of land communications routes, there has also been an upgrading of riverine transport along the Mekong River from Luang Prabang to Savannakhet. Primarily this has meant the installation of 90 permanent river sign-posts and 236 temporary sign-posts. It has guaranteed barge crossings in all locations, especially at the Tha Na Leng Dock.

Moreover, retaining walls have been built at Thakhek and work has begun on the Keng Kabao Port. Some 30 percent has been completed. Installation has been made

of a system to measure water levels at Houai Khweng and the Km 19 Riverine Transportation School has been built along with four warehouses and residences for workers in the training of the first class.

These successes have done a good job of facilitating the distribution and circulation of goods and travel and is a condition for bringing the new culture to the rural areas.

KHANTHABOULI DISTRICT STATISTICS, ECONOMIC DEVELOPMENT NOTED

Vientiane SIANG PASASON in Lao 12 Dec 80 p 2

[Excerpts] Khanthabouli District is located in the center of Savannakhet Province's provincial municipality and lies along the Mekong River. Routes 9 and 13 pass through the center of the district. This district is the focal point of political, economic, cultural and social activity. It has 13 cantons, 124 villages, 13,922 families with a population of 77,992 of whom 41,161 are female.

Agriculture: In 1975 the annual wet rice acreage was 6,786 hectares with 1,166 hectares of upland fields, and over 20 hectares of dry-season rice fields. But in the past 5 years, with deep awareness of the new directions of production and construction in agriculture, believing firmly in the party and state direction and leadership, Khanthabouli District has expanded its annual wet rice crop acreage by 40 percent when compared to that of 1975. Aside from that, so as to protect the forests, Khanthabouli District has reduced the shifting cultivation acreage of 1975 by 70 percent. Along with the single crop of wet rice of the last 5 years, they have increased the planting of wet rice to two crops per year. In the last 5 years, when compared to 1978, [as published] the dry season rice has increased from 20 hectares to nearly 10 times that. Thus, the crops reflect this and gradually meet the needs and are raising the living standards of the people of Khanthabouli District. In the last 5 years, the entire district has taken part in payment of taxes to the state amounting to 1,505.5 tons. Along with doing a good job in agriculture, the entire district has also planted starchy crops. In the last 5 years they planted 76,856 tons of corn seed, 216,561 hills of taro, 375,126 hills of sweet potatoes, 123,217 hills of manioc and 27.2 tons of peanuts and mung beans.

Being aware of the party and state's directive on expanding livestock raising, in the last 5 years this activity has been greatly expanded. In 1975, there were 14,798 buffaloes, by 1980 there had been a 20 percent increase. In 1975 there were 13,385 head of cattle. By 1980 there had been a 15 percent increase.

Banking: Aside from doing a good job in guaranteeing the income and expenditures, in the last 5 years, soldiers, cadres and people have deposited 11, 196 kip of their savings in the state bank.

Trade: In order to guarantee the circulation and distribution of goods between the state and the people who live in remote areas throughout the district, Khanthabouli has further expanded the stores which now number 22. Of those, 11 are canton cooperative and production base stores.

ORGANIZATION, PRODUCTIVITY OF STATE FARM NOTED

Vientiane SIANG PASASON in Lao 17 Dec 80 p 2

[Article by H. Phomvilaivong: "Results of Army Settlement 23, Southern Region"]

[Excerpt] Army Settlement 23, Southern Region is a settlement that is famous throughout Champassak Province and throughout the Southern Region. This settlement is located on Kong Toun Hill about 67 kilometers away from Pakse District. Initially, it was established as Production Battalion 401 with seven companies. Production was only on a self-sufficiency basis among the production units. Not very much crop land was opened up until 1977 when the party committee and the regional command, with the approval of the Central Party Military Committee changed the name to Settlement 23. From then until 1978 to 1980, the fame of this settlement gradually emerged. From the step-by-step transformation and construction, the settlement gained the praise and approval of all classes of people as it moved from small-scale production to large-scale collective production as described to me by the responsible comrade:

"From the time it was established to the date it was named Settlement 23, things were not easy at all. In 1977 we divided the production work as follows: There were eight production companies of which 2 were wet rice companies primarily. There was one livestock-raising company and 5 upland field rice companies. There were only 88 hectares of upland fields and 36 hectares of wet rice fields. The harvest was 352 tons. This year there were 17 hectares of corn that yielded 8,646 kilograms. In 1978, a great deal of crop land was opened up for planting. There were 57,800 hectares of wet rice land and 21,118 kilograms of seed was used. The harvest was 55 tons. Sixty-one hectares of corn were planted using 1,364 kilograms of seed. The harvest was 22,600 kilograms. Some 152 hectares of upland field rice were planted using 6,113 kilograms of seed. The harvest was 211 tons. They also planted 9 hectares of manioc in 211 hills. They also planted 15 hectares of sweet potatoes and 8 hectares of man sakhou [translation unknown] using 800 kilograms of seed.

"By 1979, the wet rice area had been increased to 215 hectares and 25,600 kilograms of seed were used. The upland field rice area was 417 hectares and the harvest for both wet- and upland rice was 1,000 tons. Some 80 hectares of corn were planted using 4,080 kilograms of seed resulting in a harvest of 85 tons. They planted 40 hectares of manioc, 18 hectares of sweet potatoes, 10 hectares of potatoes using 12,600 kilograms of seed and got a harvest of 166 tons. They planted 500 hectares in coffee, an increased planting of 300 hectares and harvested 47 tons."

Coming to 1980, an additional 162 hectares in [wet-rice] fields and another 306 hectares of upland field rice were planted, along with 281 hectares planted in tobacco and coffee, 295 for corn, 249 in chili, 3 for pineapple, 20 for potatoes, 10 hectares for old and new tea, and 10 hectares for peanuts and soybeans. The harvest this year will certainly not be disappointing. In terms of overall production, they have increased and expanded things in accordance with the demands of the nation and are constantly forging ahead.

OPEN MARKET, STATE GOODS--Bouaphet, one of several members [as published] of VIENTIANE MAI has written a letter asking the following: The problem of female market vendors with baskets getting into buying goods around state stores and then selling them in the markets... [Answer] As a matter of fact, in the circulation of goods from the people to the state and from the state to the people, we feel that the basket-holders in the markets are still friends of the farmers, so why do you say such things? There is nothing odd about this because at a time when we have still not expanded the trade sector to serve the people and do as good a job of meeting their needs as we should, the problem of the middle-man vendor is likely to arise, as you have pointed out. However, that is only for a while...Resolution 7 of the Party Central Committee clearly states that "in turning private trade into the collective, private trade will be utilized step by step as appropriate to the situation in each phase"...This speaks to the heart of the matter. For the details, you should reread Resolution 7, especially concerning trade matters. [Excerpts] [Vientiane VIENTIANE MAI in Lao 17 Dec 80 p 2]

MAJOR CHANGES IN CONSTITUTION ANNOUNCED

Bombay THE TIMES OF INDIA in English 16 Dec 80 p 1

[Article by Mavin Kurve]

[Text] Kathmandu, December 15.

Major changes have been made in Nepal's constitution in a royal proclamation made by King Birendra today.

The long-awaited reforms have given constitutional sanctity to assurances given by the Kng a year ago (before the referendum) that whichever side wins the mandate the statute would be changed to incorporate three major democratic attributes. [as published]

These are adult franchise for all future elections to partyless panchayat bodies, election of premier by elected representatives and accountability of council of ministers to national legislature.

A provision has been made for a council of co-ordination to achieve better rapport among the government's executive, legislative and judicial wings "to unite all countrymen and preserve national independence and sovereignty." At a public rally, the King noted that checks and balances were necessary for democracy between constitutional organs and legislatures, if democracy is not to degenarate into despotism. [as published]

Until new election and new legislature, the Thapa ministry and Rashtriya Panchayat are to continue.

The King, under the new provisions, is empowered to suspend certain articles of constitution relating to the appointment of council of ministers etc. following death, resignation or vacation of office for any other reason by the prime minister "for a period not exceeding three months." Under special circumstances, the King may constitute a council of ministers or "make any arrangement". These powers are over and above the emergency powers of the King already in the constitution.

It appears that the original draft of the constitution has been considerably changed to give verbal and legal sanctity to royal assurances to the people. Also some of the disabilities proposed for those contesting election but not subscribing to the partyless system have been deleted.

As matters stand, the official explanation was that anybody could stand for an election provided he gave a pledge to uphold the constitution and belonged to any of the six class organisations which so far have no specific admission rules.

Multi-party leaders seemed to be willing to consider the new phase in post referendum politics. The banned Nepali Congress partymen are meeting tomorrow to consider the situation arising, according to the acting chairman, Mr. K. P. Bhattarai.

The left Communist leader, Man Moham Adhikari, said his partymen would meet later this week to formulate its plans in the wake of the reforms. The rival Subarna group of the banned Nepali Congress has not yet made up its mind. Its leader, Mr. S. P. Upadhva, said "no comments."

Indian and Foreign brides marrying Nepalese citizens will become Nepalese nationals on renunciation of their original citizenship under the new dispensation.

King Birendra's remark that the third amendment makes "all Nepalese panchas and all panchas Nepalese" at a public rally and his statement that every Nepali national may contribute freely to the overall development are taken as tokens of generous gesture to the dissidents.

ENERGY PROGRAM GIVEN PRIORITY

Manila DAILY EXPRESS in English 7 Jan 81 pp 1, 6

[Article by Miguel Genovea]

[Text]

PRESIDENT MARCOS said yesterday that the energy development program will be given top priority by the government this year.

Disclosing his projections for 1981, the President said that energy development is still the main concern of the government because of the escalating prices of crude oil.

After energy, the other projects to be pursued by the government are the 11 industrial projects costing some P6 billion, labor-intensive projects and short-gestation, productive enterprises.

To stimulate economic development in the various regions, the President said the government will determine the appropriate industries to be set up in each region.

• • •

IN THE depressed areas of Leyte and Samar, for example, studies will be made on what other industries are suitable besides coconut and cattle-raising.

"The general idea is to start new economic activities that are labor-intensive and have already been proven profitable in experiments," the President said.

• • •

THE ASEAN industrial project for the Philippines, possibly copper fabrication, will also be pursued this year, the President said.

The government will seek the assistance of Japan and European countries for the ASEAN project, he said.

The establishment of this project is one of the points to be taken up by President Marcos and Japanese Prime Minister Zenko Suzuki when the latter arrives here tomorrow for a three-day state visit.

Construction and tree-farming projects will also be undertaken this year to generate more jobs, the President said.

• • •

THE COUNTRY'S energy development program was compressed from 10 to five years last year because of the rising cost of crude oil.

"We have reached that point in our development where we cannot afford even a moment's hesitation," the President said.

Besides oil exploration, the government has stepped up geothermal, alcohol and coal production, and set up numerous mini-hydroelectric and dendrothermal plants.

This year the Philippine National Oil Company Exploration Corp., the exploration arm of the government-owned PNOC, will drill three wells under an 18-well program until 1985.

The wells will be drilled in the Cagayan basin where encouraging signs of gas deposits were earlier encountered by explorers.

The industrial projects to be undertaken by the government to boost the country's industrial base are copper smelter, phosphate fertilizer, aluminum smelter, diesel engine, manufacturing, cement industry expansion, coconut industry rationalization, integrated pulp and paper, a petrochemical complex, heavy engineering industries, integrated steel mill and alcogas.

CADLAO OIL FIELD PRODUCTION TO START IN JUNE

Manila DAILY EXPRESS in English 9 Jan 81 p 9

[Article by Samuel V. Senoren]

[Text] CADLAO field off Northwest Palawan will be put into commercial production in June this year at an initial rate of 9,000 barrels per day, Energy Minister Geronimo Z. Velasco disclosed yesterday.

Velasco said that Amoco which is the service contractor in the Cadlao area is about to complete installation of production facilities in Cadlao.

Amoco will use the subsea development system. Under this method, Amoco will pump oil from Cadlao-1 and Cadlao-3 wells into a storage tanker.

* * *

CADLAO was discovered in 1977 and oil in the area has been graded at 47.7 degrees API.

Amoco had programmed the two wells to produce at least 14,000 barrels per day.

But the experience of Cities Service in the Nido field prompted Amoco to scale down production output.

Amoco officials fear that by going for 14,000 barrels per day production difficulties could arise as was the case with Nido when water seeped into system.

Oil experts say the unwanted water mix isn't really unusual for oil extraction from reefal structures.

In the case of Nido, Velasco said "the reserves are there but we can't pump them out as fast as anticipated."

* * *

AFTER Amoco, the Cities Service group will also put the Matinloc field on stream late this year at an initial rate of about 11,000 barrels per day. The production target at Matinloc is less than the original expected output of 18,000 barrels per day also for similar reasons.

Velasco said that Nido will continue producing at the rate of 3,500 to 4,500 barrels per day. Both the Nido and Cadlao output is expected to fill in about five percent of the country's energy requirements this year.

As of end 1980, Nido produced 12.2 million barrels since production started in February 1979.

On the exploration front, Velasco said that the pace last year is expected to be kept for the rest of 1981.

* * *

LAST YEAR, a total of 21 wells were drilled of which three were oil discoveries and one a gas discovery.

"For 1981, we have forecast drilling of 27 wells of which seven are onshore and 20 are offshore. The increase in drilling this year can be attributed to the aggressive seismic activities conducted in 1980," the energy minister said.

RP COTTON SECTOR GETS ADB AID

Manila DAILY EXPRESS in English 5 Jan 81 p 10

[Text]

THE Asian Development Bank (ADB) has extended to the Philippines a technical grant to help the country determine the feasibility of developing the local cotton industry.

Under the technical assistance, the bank will provide a team of experts to conduct the feasibility study.

ADB said, once the study show that the cotton industry should be developed, a project will be formulated to raise financing for the industry.

• • •

THE project will include: (a) the provision of support to smallholders, including provision of farm machinery and equipment, credit and input supply; (b) strengthening of cotton research and extension; (c) the provision of product processing facilities; and (d) the provision of consultant services and overseas training.

The executing agency for the technical assistance will be the Philippine Cotton Corp. (PCC), which will call on the Cotton Research and Development Institute (CRDI), the University of the Philippines Los Banos, and other agencies concerned, to assist in the implementation of the technical assistance study.

JAYEWARDENE SPEAKS TO 26TH ANNUAL PARTY SESSION

Bombay THE TIMES OF INDIA in English 22 Dec 80 p 9

[Text] Colombo, December 21.

President Jayewardene yesterday warned opponents of his right-wing United National Party government that if they resorted to unlawful means to topple the government, he would follow methods "not normally resorted to by democracies."

Addressing the 26th annual party session at the Sugathadasa Stadium here, the President said the opposition should realise that the government had received an overwhelming mandate from the people in the 1977 election to implement its policies and programme. "We will implement them, what may come," he added.

Mr. Jayewardene called upon his party to launch its campaign for the 1983 general election now itself, with leading members going from village to village to keep alive the flames of freedom kindled after the 1977 UNP victory.

He said his government was committed to establishing a just and free society in Sri Lanka by protecting all rights, including freedom of speech, expression and publication. It was important for the opposition not to exploit these freedoms or disrupt the government's work through strikes and other means.

India Cited

He said the economy, which was "ruined by the previous regime" was now well on the road to recovery despite problems created by inflation throughout the world and the oil price hike. He cited the example of India where, he said, Rs. 5,000 million more had to be spent on oil imports as a result of the recent price hike.

Observers noted that for the second year running, Mr. Jayewardene's confidante, Mr. N. G. P. Panditharatna, was appointed UNP chairman, thus checkmating sections within it demanding on amendment to the constitution to enable the holding of election of office-bearers. [as published]

When Mr. Jayewardene, who held this post, gave it up on becoming President in 1978, most observers expected the new Premier, Mr. R. Premadasa, to succeed him as chairman. But this did not happen revealing a deep-seated power struggle within the party with an eye on the next presidential election in 1984.

FIRST HIGH TECHNOLOGY EXPORT ZONE TO OPEN 15 DECEMBER

OW150403 Taipei CNA in English 0254 GMT 15 Dec 80

[Text] Taipei, 15 Dec (CNA)--The Hsinchu science-based industrial park will be formally opened Monday in Hsinchu in Northern Taiwan. The Republic of China Economic Affairs Minister Chang Kwang-shih and other dignitaries have been invited to address the opening ceremony. The industrial park, the nation's first high-technology export processing zone, was established under the direction of President Chiang Ching-kuo and through the cooperation of the National Science Council, the Ministry of Economic Affairs and the Ministry of Education. Construction of the industrial complex started in 1976. With the establishment of the park, which is considered a milestone in the history of the Republic of China's endeavor to upgrade its technological level, the industrial and technological level here is expected to change rapidly.

Some 14 firms have been approved to move into the park. They include: Wang Computer and Sigma Delta Ltd, specializing in the production of computer systems; Micro Tek International, makers of micro computer systems; General Micro System Corporation and Union Microelectronics Corp, makers of integrated circuits; Sino-American Silicon Products Inc and Advanced Device Technology Inc, makers of semiconductor materials and components; Teco Corp, makers of terminal communication systems; Kuang Yi Co, makers of laser components and laser and optical lenses; Quartz Frequency Technology, makers of quartz filters; and Flow Far East Corp, makers of flow waterknife systems.

U.S. ASYLUM SOUGHT FOR ILLEGAL HONG KONG IMMIGRANT

OW151015 Hong Kong AFP in English 0651 GMT 15 Dec 80

[Text] Hong Kong, Dec 1 (AFP)--A group of protesters held the U.S. consulate-general here responsible for whatever might happen to an illegal immigrant whose request for political asylum was turned down by the consulate last Friday.

They made the stand after petitioning the American consulate today on behalf of the refugee.

Lau Fat-sung, 35, attempted suicide by banging his head against a wall inside the consulate after hearing the consulate's refusal, and the tragedy was stopped short only by the marine guards on the spot last Friday.

Earlier Lau had reached Hong Kong by train from Inner Mongolia.

Lau was escorted (?away by) the police pending a decision by the immigration department on whether to repatriate him to China.

After the Friday incident, a group of 280 former illegal immigrants gathered together to raise protests on the grounds that Lau is not an ordinary illegal who came to Hong Kong merely to seek a life of comfort.

"He was classified as a landlord in China and experienced a political purge," said a spokesman for the group.

"All his family died during the land reform movement [words indistinct] to wander across China to avoid being killed. If he is sent back to China, he will surely get into a very difficult situation," the group's spokesman said.

The group would write to President Jimmy Carter to protest against the policy of the American consulate.

Meanwhile Taiwan's human rights association has appealed to the United Nations in a bid to prevent the Hong Kong authorities from repatriating Lau.

The group of protesters and the Free China Relief Association have both urged the American consulate here to change its decision and grant Lau political asylum.

INFORMATION INDUSTRY DEVELOPMENT PLANNED

OW170317 Taipei CNA in English 0238 GMT 17 Dec 80

[Text] Taipei, Dec. 17 (CNA)--The Government of the Republic of China may take a series of measures including tax exemption and tariff reduction to help stimulate the fast development of the information industry of this nation, K. T. Li, minister without portfolio, said Tuesday.

Addressing an opening ceremony of the 1980 international computer symposium in Taipei, Minister Li said the government will spare no effort to promote the application of modern technology, especially in the information field, so as to enable people of this nation to meet new challenges.

As development of information industry of this nation has lagged behind that of Hong Kong and other nations, the government is planning to take some concrete measures to encourage development of the industries concerned, Minister Li said, adding, these incentives will be incorporated in the ten-year development plan which is to become effective next fiscal year.

Minister Li said the incentives include tax exemption and tariff reduction. The government will reduce duty on some imported spare parts of the information machinery, and raise tax for those imported which can be produced locally.

Minister Li expressed his confidence in the future development of the information industry of this nation under the joint efforts of the government and enterprises.

The international symposium, sponsored by the National Chiaotung University, was opened at the Chiaokuang Hall with hundreds of experts at home and from abroad participating.

Education Minister Chu Hui-sen also made a speech at the opening ceremony which was presided over by Kubdanan-Huang, president of NCU.

Minsiter Chu reported to the participants the current development policies of the information industry and of this nation.

Participants will read more than 100 papers at the meeting which is scheduled to end Dec. 18.

They are from the United States, Britain, France, West Germany, South Korea, Japan, New Zealand, Australia, Brazil, Thailand, India, Hong Kong and the host Republic of China.

BRIEFS

TONGA FISHERY AGREEMENT--Taipei, 15 Dec (CNA)--Governments of the Republic of China and the Kingdom of Tonga have signed a fishery agreement. According to the agreement, Chinese fishing boats are allowed to operate in the 200-nautical mile economic zone announced by Tonga in 1978. Representing the governments of the two nations, Kao Cheng, Chinese ambassador to the Kingdom of Tonga, and Tu'ipelehake, minister of foreign affairs and defense, signed the pact early this month at Nuku'alofa, capital of the kingdom. In order to safeguard the development of this nation's deep sea fishing in the South Pacific area, similar agreements are being negotiated between the Republic of China and those island countries in that region. SOUTH AFRICAN POLICE MINISTER--Taipei, 10 Dec (CNA)--Minister of Police L. le Grange and Chief Police Commissioner M. C. Geldenhuys of the Republic of South Africa visited Ho En-ting, director general of the National Police Administration of the Republic of China Wednesday morning. During the visit, they exchanged views on the police affairs of the two countries. The police leaders of South Africa praised the Chinese police for their high efficiency. The South African officials arrived here Monday for a 5-day visit at the invitation of the Chinese Government. [Text] [OW170621 Taipei CNA in English 1405 GMT 10 Dec 80 OW]

LOAN RATES--Taipei, 16 Dec (CNA)--Despite foreign wire reports on rising international prime rates, the Central Bank of China has decided not to consider readjusting bank lending rates in the Republic of China. At a regular meeting of local banking representatives held recently in Taipei, a Central Bank spokesman said the ceiling of loan rates will be maintained at 16.2 percent annually. The Central Bank's decision meant that domestic banks may charge borrowers for annual rates up to 16.2 percent or under, depending on customers' credit standing, and that loan rates should not exceed that level for the time being. [Text] [OW170643 Taipei CNA in English 0246 GMT 16 Dec 80 OW]

FOREIGN INVESTMENT PROGRAMS--Taipei, 15 Dec (CNA)--The investment commission of the Ministry of Economic Affairs Monday approved a number of applications by foreign and overseas Chinese enterpreneurs for making investments of about U.S. dollars 1.3 million in the Republic of China. Investments will be made

for the production of electronic guns for use in b/w and color TV tubes, precision machinery, diamond saws and other diamond cutting tools, and other products. The commission also approved to applications by foreign manufacturers for technical cooperation with local enterprises for producing chemicals and pharmaceutical raw materials. [Text] [Taipei CNA in English 1412 GMT 15 Dec 80 OW]

ANIMAL FEED FACTORY--Taipei, 16 Dec (CNA)--An l-lycine factory invested by Taiwan Sugar Corp. (Tai-sugar) will be completed and begin operating early next year. The factory should help improve the production of animal feed and reduce the island's dependence on soybean imports. L-lycine is a protein substitute used in animal feed. Japan and South Korean reportedly developed the technology to cultivate l-lycine, but were unwilling to divulge the process. After completion, the plant will have an annual production capacity of 400 metric tons. Tai-sugar invested about NT dollars 200 million in setting up the factory. Tan Hsiang-sun, president of Taisugar, reported that if the plant succeeds in production, the American Cyanamid Co. will consider purchasing the technical know-how. Meanwhile, Taisugar has decided to invest in other ventures, including: --a large-scale meat processing factory; --production of alcohol with molasses for use as a fuel source and; new equipment for its Pingtung Bagasse Pulp Factory to boost production to 300 tons per day. [Text] [Taipei CNA in English 0243 GMT 16 Dec 80 OW]

OFFICIAL TO RIYADH MEETING--Taipei, Dec. 20 (CNA)--The Sino-Saudi cultural and educational relations are expected to be further strengthened in the future, political vice minister Li Mo of the Education Ministry said Saturday. Li made the statement at the Chiang Kai-shek International Airport before departing for Saudi Arabia to attend the third Sino-Saudi Cultural Cooperation Standing Committee conference to be held in Riyadh Dec 22-24. Besides reviewing the implementation of resolutions reached at the previous two sessions, the two sides will also discuss ways on the promotion of university education cooperation, interflow of scholars and students, and holding shows of books and cultural products, Li added. [Text] [OW201459 Taipei CNA in English 1448 GMT 20 Dec 80]

MARKET STABILITY--Taipei, Dec. 19 (CNA)--Premier Sun Yun-hsuan Thursday instructed the Ministry of Economic Affairs and other government agencies concerned to control the factors affecting commodity prices so as to maintain the market stability. Premier Sun gave the instructions after hearing a report on economic situation by Economics Minister Chang Kwang-shih. Minister Chang said that the hike of commodity prices has been affected by the upward trend of prices of imported goods, labor wages, oil, and real estate, and the higher loan interest rate in the black market. However, Minister Chang said, the increase rate of commodity prices in this country is lower than that in Korea, Thailand, the Philippines and Indonesia, although the same as that in Singapore and Japan. [Text] [OW190305 Taipei CNA in English 0243 GMT 19 Dec 80]

HUA RESIGNATION--Tokyo, Dec 17 (CNA)--Chinese communists have accepted resignation of Hua Guofeng and at the same time decided to demote him to a vice chairman of the party, Central News Agency learned exclusively Wednesday. Hua tendered his resignation voluntarily in late November to take responsibility for "failures in carrying out economic and particularly energy policies." He also admitted blunders in following "an extremely leftist course" by strongly advocating "up the proletarians and down the capitalists." Hua in his resignation held himself responsible for the huge budgetary deficits of the Peiping regime in the past 3 years as well as the fast worsening inflation as a result of his administrative failures. [Text] [OW171035 Taipei CNA in English 1022 GMT 17 Dec 80]

TONGA OFFICIAL TO TAIWAN--Crown Prince Tu'ipelehake, minister of foreign affairs and defense of the Kingdom of Tonga Saturday ended his 7-day visit to the Republic of China. Upon Crown Prince Tu'ipelehake's departure, Chu Fu-sung, foreign minister of the Republic of China, saw him off with a military parade at the armed forces airport at Sungshan in Taipei. [Text] [OW141110 Taipei International Service in English 0100 GMT 14 Dec 80]

AUDIT MINISTER'S REAPPOINTMENT--Taipei, 9 Dec (CNA)--Legislative Yuan Tuesday approved the nomination of Chang Tao-ming by President Chiang Chin-kuo as minister of audit for another year. In accordance with the 104th clause of the Constitution of the Republic of China, extension of Minister Chang's tenure of office needs confirmation by the Legislative Yuan. Of the 260 legislators present at a meeting Tuesday, 238 voted for Minister Chang's reappointment. Minister Chang, 72, a native of Hupeh Province, graduated from Wuchang Chunghua University and he had also done research at London University. He served as director-general of the directorate general of budget, accounting and statistics before his present position. [Text] [OW101155 Taipei CNA in English 1335 GMT 9 Dec 80 OW]

LONG-TERM COAL PURCHASES--Taipei, 9 Dec (CNA)--The state-run Taiwan Power Company (Taipower) recently disclosed that it will purchase the fossil fuel from overseas by signing long-term supply contracts rather than on the spot market to ensure an adequate supply of coal. This year, Taipower has already signed contracts with South Africa for 2 million tons of coal, and 6 contracts with the United States for 20 million tons. A contract for an undisclosed volume has also been initialed with Australia. In addition, Taipower has invested in one South African mine, one Australian mine and two American ones. Discussion of joint exploration of two Canadian mines is also underway. Taipower hopes that installed capacity of coal-fueled thermal power plants will account for 36 percent of electricity needs by the 1990s, up from the current 12 percent. The island's demand for coal is expected to jump from this year's 3 million tons to 50 million tons by the end of the century. [Text] [Taipei CNA in English 0244 GMT 9 Dec 80 OW]

DEVELOPMENT GROWTH--Taichung, Central Taiwan, Dec. 15 (CNA)--Unless the island's family planning program becomes more successful, the Republic of China's population growth, currently maintaining at the annual rate of 1.9 percent, will be an obvious deterrent to social and economic development.

Taiwan's population density, recorded at 485 persons per square meters, is the second highest in the world, next only to Bangladesh, according to Sun Teh-hsiung, director of the Taiwan Provincial Family Planning Research Institute. In a recent report, Sun said that an estimated 1.9 percent increase in population means Taiwan will have an additional 340,000 persons each year, adding that the population growth must be controlled under a level on a par with the advanced countries. Sun cited the population growth rates in advanced countries--the United States 0.7 percent, Japan 0.9 percent, France 0.04 percent. [Text] [OW150330 Taipei CNA in English 0252 GMT 15 Dec 80]

LAMPANG GOVERNOR CONCERNED OVER CPT ACTIVITY

Bangkok BAN MUANG in Thai 14 Dec 80 pp 1, 2

[Text] Lampang communist terrorists "show their mettle," expand territory to become "liberated zone" from Sermngam to Chao Hom and to Hang Chat districts. They have gone there to control tin mining and clandestine cutting of trees to the point where officials dare not exercise their authority. The governor admits that these problems are forcing the government agencies directly responsible to take action to correct the problems.

News reports from Lampang Province yesterday (13 December) state that the Mae Liang Mine in Sermkhwa Subdistrict, Sermngam District is another tin mine in the north which has become a liberated zone. Government officials, whether police or administrators, cannot go there to take care of things as they used to because the villagers who had gone there to dig the ore have joined the communists, creating a tense atmosphere in the mines. The miners have organized watch shifts to prevent attacks by officials and are ready for combat at all times.

News reports stated that prior to the villagers' cooperation with the other side, the communists had infiltrated. This began after the 6 October 1976 bloodshed. They have made all-out attempts to persuade villagers in nearby areas and miners to join a united front. Regardless of what the villagers do, the communists will render all-round aid, while at the same time disseminating their doctrine. It appears that there are some villagers who become followers of the communists, but there are also quite a few who know what is going on and try to distance themselves, but they are threatened by the communists to the point where they have to flee. There is evidence that dozens of households in Ban Pong Pa Pi in Sermngam District have abandoned their village to flee to safety, leaving the village empty.

Reports state that after they met with failure in their propaganda, the communists began a new plan to create violence. On 25 November a communist armed force attacked a suppression police task force house whose higher headquarters had sent them to investigate the clandestine cutting of wood which was destroying the forests in the area of the Mae Liang mine. The result was that Pol MSgt Chalerm Keopinchai and two villagers were shot and killed. Aside from this another two policemen, MSgt Sombat Sutawong

and Private Suthep Duangkeo were seriously wounded. The communists burned the bodies of the dead and seized government weapons including M-16's, NATO .05's and .357 pistols from the victims.

These events made the villagers who went there to mine ore turn to the communists indirectly because they were accused of killing the police officers. When they withdrew, their lives were threatened. Left with no choice, the villagers had to cooperate with the communists. As a result of the assassinations of police and villagers, the communists have been even more active and have been expanding their zone of operations to many places. There are also reports that they are operating in Chae Hom District and Hang Chat District.

It has reached the point of combat with officials in Chae Hom District. In Hang Chat District, they are gathering supplies because this is the harvest time. There are reports that a communist supply cache was discovered accidentally by a worker of the Thawi Phon Construction Corporation of Mae Mo, a government contractor building high-tension concrete electric power poles from Ban Thung Kwian, Wiang Tan Subdistrict, Hang Chat District to Chieng Mai. The worker was using a tractor to plow land near a creek only 200 meters from Km 34 on the Kampang-Chieng Mae highway. Buried there were 18 20-liter plastic containers filled with milled rice. Each container was tightly sealed to prevent moisture. Following the discovery, instead of reporting it to officials, the worker reburied the goods, giving the reason that he was afraid of the communists' influence. Not many days later, the communists moved those supplies to be hidden elsewhere.

BAN MUANG reporters met with Mr Samruay Phungprasit, Kampang governor to discuss these issues and their solution in the morning of 11 December. He said that the Mae Liang mine situation had been known for some time prior to his taking up his duties. It is possible for things to be that way because it borders on Thung Hua Chang Branch District of Lamphun Province where the communists are operating.

The Lampang governor further pointed out that in terms of preventive and corrective measures, Headquarters 371 with Pol Col Wirun Pheunsaen, deputy commander for direction of the 3rd BChPh [?3rd Army Region] as the chief of the unit directly responsible is working on the problem with the close coordination of the provincial authorities.

CPT FORCE HITS CHUMPHON OUTPOST

Bangkok DAO SIAM in Thai 15 Dec 80 pp 7, 8

[Text] At 0400 hours on 8 December 1980 Pol MSgt Erp Kertnet, of the Ban Khuam Subdistrict Police Station, Lang Suan District, Chumphon Province reported to Pol Sub Lt Udom Chaimongkholrat, the duty officer at the Lang Suan District, Chumphon Provincial Police Station that at slightly after 0200 hours approximately 100 communists staged an armed attack on the subdistrict police station and the police houses. He returned the fire but thought that the police were outgunned and so tried to find a way to flee so as to report the incident and ask for immediate assistance.

Pol Sub Lt Udom received the report and passed it on to Pol Maj Chalin Wichaidit, the chief inspector of the Lang Suan District Police Station and radioed to the command to inform Pol Col Chayan Chumwisut, the police superintendent of Chumphon.

When Pol Maj Chilin Wichaidit [as published] received the report, he alerted a number of policemen who traveled by motor vehicle to the scene of the incident. However, when they reached the Phetkasem intersection to enter the police barracks at Ban Khuan, the roadway was partially concealed in places by dense forest and travel was difficult. They feared it would be dangerous and so left their vehicle with the villagers. The police then walked approximately 6 to 8 km until nearly dawn at which time they reached the clearing around the area of the barracks. They discovered that one of the barracks buildings, the residence of the subdistrict police chief, and 10 police residences were burned to the ground by the communists. They then discovered the bodies of Pol MSgt Neuang Buachakeo, Pol MSgt Kanok Laisanthat, a boy named Wanna (em) Keonapho, age 1, the son of Pol Sgt Suthon Keonapho. Sgt Suphan was seriously wounded by the communists as was Mrs Noo Laisanthat, the wife of Pol MSgt Kanok. Aside from that, Pol Pvt Phisan Rengrabam and another officer were wounded but not seriously.

Pol Maj Chalin ordered the wounded policemen sent to the Chumphon hospital and sent the bodies by pick-up truck to await the families' funeral arrangements at the Wat Prasatnikon in Lang Suan District.

From investigation by police and those living close to the barracks it was learned that during the day of 8 December, two young women had come to sell barbecued chicken at the Ban Khuan intersection at the police barracks and residences. The women had said that they had come from the Lamae District market. This made the police and villagers suspicious that they might be communist agents. Boonleuan Daoreuang, the subdistrict police chief ordered the police to go on the alert and he himself did not sleep in the barracks, but went on the alert underneath it. At a little after 0210 hours he heard a dog barking and at that same moment the sounds of the communists firing. They fired many different kinds of weapons and hundreds of rounds at the barracks and residences in a deafening blast. Boonleuan then ordered his subordinates to fight to the end. They fought for about 30 minutes before giving up in the face of the communists' superior force and weaponry as his subordinates were cut down by communist fire before his eyes. When Boonleuan announced the surrender, it was not known where additional gunfire was coming from. This made the communists think that the officers were firing at them and the communists fired another two bursts and the cries of surrender from the officers made the communists cease firing. When they saw that police resistance had ended, the communists entered the barracks to collect radios and government weapons. They then rounded up the policemen, keeping them in the residence of Pol Sgt Seri Chuayphikul who pleaded with the communists to allow his wife to remove just a few possessions from the home. The communists then poured oil they had prepared and burned the buildings to the ground. They fired weapons to scare the police and then withdrew in the direction of Lamae District. In the morning of 9 December, the police checked the area of the barracks and found one carbine belonging to the communists, serial number 5553354 and one 30-round magazine. There were many blood trails leading to the back of the barracks and to a rubber plantation. It is thought that at least four or five of them were killed by the police. They also found hundreds of shell casings.

EX-SOCIALIST PARTY CHIEF CALLS FOR ECONOMIC REFORMS

Bangkok BAN MUANG in Thai 15 Dec 80 pp 1, 16

[Text] Yesterday at the Royal Hotel, the Social Democratic Party arranged a discussion on "Problems of the Economy and Their Solutions." The party leader of the Social Democratic Party, Col Somkhit Srisangkhom; Sunthon Thaisai, Nakhon Ratchasima MP in the Social Action Party; Sutham Saengprathum, former secretary-general of the National Students' Center of Thailand, and Khomsan Phonsutham participated in the discussion. A fair number of people were in attendance.

Colonel Somkhit Srisangkhom said that economic problems are long-standing issues because economic development is based on freedom. Material wealth is in the hands of the minority. He said the important factors in people's lives such as agriculture, industry and money and banking lies in the hands of a small number of families. In agriculture, aside from farmers being taken advantage of by capitalists, they must make their livings catch-as-catch can. Although it can be said that they are the backbone of the nation, it is a backbone that is disintegrating by the day. In comparison with other countries, the government gives them very little assistance. A survey of farmers' living conditions of 40 years ago and one of today reveals very little difference. There is only increasing indebtedness. The reason for this is because the farmers must depend on the middle-man who mercilessly exploits them. Farmers sell their crops without getting the full benefit and the profits fall into the hands of middle-men from the local merchant to the few exporters who get rich. They then take the money abroad. The government's rice price supports are an after-the-fact solution.

Colonel Somkhit also said that the sugar and oil industries have also fallen into the hands of just a few people. No one knows how the figures are manipulated because the properties are in the hands of those individuals. Financial and banking matters are a most important factor. If things are bad there, it is difficult to develop the economy. The circulating money of the people in the hundreds of thousands of baht are used by the merchants and bankers for manipulative purchases of goods which are hoarded and then sold at exploitative prices. Even the prime minister himself has appealed to the merchants and bankers to have pity on the poor people. This is certainly a big fraud because in this world, no one does this. The merchants have a big laugh when they hear this.

Colonel Samkhit put forth a suggestion for a solution saying that the important thing is that the framework is [based on] freedom, because the means of production in all sectors of the economy are in the hands of a few. Therefore, the social structure should be changed. The government should take over in whatever has an impact on the lives of the people, such as the matter of oil.

Sunthon Thasai, the MP from Nakhon Ratchasima said that the economic problems Thailand confronts now, in particular, the high prices of goods, in all probability comes from two sources: first of all because the resources and abundance of cereals are decreasing while the population is increasing. Another reason is that economic system is not arranged properly. From the Petroleum Authority of Thailand's figures, Thailand pays 6 trillion baht per year for oil, but the entire country's agricultural product is sold for only 43 trillion baht. Next year, it will be necessary to increase purchases to 7 trillion baht which is more than one-half of the entire national budget of 140 trillion baht. This is taking the money earned by the sweat of the farmers and using it for the pleasures for only one group.

Sunthon also said that our economy is dropping because we are following the behinds of the Americans. When OPEC punishes the United States, we get clobbered also. Another problem is the unfair distribution of income. The more the nation develops, the richer the minority gets. The majority who are farmers, get poorer. The construction of roads into the rural areas looks as if it were done to give the capitalists a chance to depress prices and exploit the farmers with even more facility because the farmers are unable to set the prices for their own products.

Khomsan Phonsutham said that several years ago the Statistical Institute reported that the lowest income of the population of Srisaket Province was 1,800 baht per person per year. After the economic team came in to fix things, the people's income dropped to 1,000 baht per person per year. It is not known how these people can live on an average daily income of only 2.70 baht. They must be the most patient people in the world. The [Boonchu] economic team has said that it would solve the economic problems within 6 months. Now that the time is up, they have taken off their clothes to cover their face.

MUSLIM STUDENTS HOLD DEBATE ON ISLAMIC AFFAIRS

Bangkok TAWAN SIAM in Thai 12 Dec 80 pp 1, 16

[Text] Thammasat University Muslim students organized a debate on "The Situation in the Muslim World." They forecast that before long, Saudi Arabia will have events like Iran because it has many resources given them by God which must be distributed throughout the world, and not just be kept for the upper levels of the ruling classes, making them richer and richer.

Yesterday afternoon (11 December) the Thammasat University Muslim Students organized a debate on the topic "The Situation in the Muslim World" on the occasion of the "10 December Thammasat Experts" in the A.T. room. Taking part in the debate were Mr Ong-at Khlamphaiboon, Mr Kamol Khemthong, Mr Aphinan Buranaphong, Mr Kulit Chalermthai, Mr Yuthaphum Sakkitticha and Mr Sanan Santiya.

Aphinan started things off by saying that Islam is a way of life given by Allah to mankind which governed all aspects of life whether political, economic or social. The world is divided into two large camps: communist and free, but Muslims only hold to the Islamic way. It seems as though Muslims are in conflict with both great powers. The original cause of that is the loss of Muslim military power under the dictates of imperialism, but the Muslim people still hold to their beliefs and will never follow any leader of either major power. The reason for this is because they hold firmly to the belief of separating religion from politics. Although there are constant conflicts, Islam holds to the thought given it by Allah. When another belief comes along Islam rejects it, whether free or communist. Therefore, in viewing events in the Muslim world, it is necessary to view them as a Muslim would. Problems in the Muslim world must only be given to those who live in the Muslim way of life to solve.

Kamol Khemthong stated that there are two major Islamic sects which has caused conflict in the Middle East between Iran and Iraq. Khomeyni, the Iranian leader who is a Shiite, says that the Iraqi leadership of another sect are infidels. He is trying to draw the Iraqi people, mostly Shiites into Middle Eastern chaos. This is a result of the great power Soviet Russia

wanting to have influence while the United States is striving to safeguard its interests: oil. There is also a struggle in an effort to provoke the Muslim nations into fighting each other so that they will be weak and then they will intervene. The Libyan leader submitted a letter of protest to Saudi Arabia which allowed U.S. spy planes to be based there. This tarnished Mecca's reputation. The Saudi king responded that Libya is a tool of Israel that will destroy the Arabs.

Mr Ong-at Khlamphaiboon, the foreign news editor of the CHAO THAI [THAI PEOPLE] newspaper said that aside from the internal conflicts of the sects, there are other matters that bear watching. For example, after the United States lost its power in Iran, it tried to change its role again, because it had once been successful: following the overthrow of the Shah's regime, it brought the Shah back to rule for a long time. The United States and its lackeys are short of oil, so they must make the effort. However, in some of the events, the Soviets are likely to have had a part, because the Russians want to come into Iran to use the Strait of Hormuz to keep in touch with Africanistan [as published]. As for the events in Iran, Iran is the first nation to promulgate Islamic law, which if successful, will awaken Muslims in other nations and the great powers will intervene.

EDITORIAL SUPPORTS OPENING OF EMBASSY IN IRAQ

Bangkok SIAM RAT in Thai 12 Dec 80 p 5

[Editorial: "Something That Must Be Done Quickly"]

[Text] A SIAM RAT news item in the 11 December issue reported that Sa'dun Hammadi, Iraqi minister of foreign affairs would be visiting Thailand between 15-19 December. If true, it would be a very good occasion, although these reports have not yet been confirmed by the Ministry of Foreign Affairs.

The reason we say it would be a very good occasion is because there can be discussions, in particular concerning the problems of Thais working in Iraq who are stuck there. There are reports that they are in great difficulty: They are unable to return to Thailand because no one will take responsibility.

There are reports that there are a total of approximately 5,000 Thais who have gone to work in Iraq. But when the war started there, some of the Thais tried to find ways to flee. Some have fled to Turkey. As of now, there are about 3,700 Thai workers who cannot return to Thailand: in the first place because the contractual agreements with the companies have not been completed and because of outstanding obligations to the employment agencies. Therefore, it should come as no great surprise that these people are stranded there, threatened by war. Some Thais have already lost their lives in the war between Iraq and Iran.

From reports by "Tun Sirikulphiphat" in the story "Treading on Arab Lands" in the newspaper THAI RAT, it is known that most of the Thai workers going to Iraq did not pass through the examination process of the Labor Department. These workers have been badly taken advantage of by employers: Wages are insufficient, with no fringe benefits or else they do not get overtime pay in accordance with generally applied international labor laws.

There are only a few who have gone through the Labor Department who are in good shape. Those people go abroad after they have been approved by the Labor Department.

It would be easy to solve problems with Thais in Iraq if Thailand were to open an embassy in the Iraqi capital.

At present the only place where there are Thai officials with responsibility for Thais in the Middle East is Riyadh, Saudi Arabia. This embassy does have a labor attache, who is overwhelmed with work in having to take care of Thais who have gone to work in various countries of this region and it appears that this oversight responsibility is not being done thoroughly. This has made the problem one in which we should ask why the government is paying so little attention. These [workers] send home a lot of money every year.

During the Iraqi foreign minister's visit, we take this opportunity to suggest to the Thai Government that in open discussions,in the first place to urgently find ways to help hardship-stricken Thais return home. In the second place, Thailand must find a way to open an embassy in Iraq right away to safeguard the interests of the Thais, because the [Arab] side opened an embassy in Bangkok about 2 weeks ago.

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

OPPOSITION PARTIES HOLD JOINT CONFERENCE

Dacca THE BANGLADESH OBSERVER in English 8 Dec 80 pp 1, 12

[Text] The two-day National Democratic Convention (Jatiyo Ganotantrik Convention) of four opposition political parties began in Dacca at the Ramna Green on Sunday with a declaration that they would forge unity to form a single party which would take the final shape at the convention.

The components of the convention are: NAP (Mirza Zahid), JAGMUI, Gano Front and a faction of the UPP which is in favour of the merger.

Addressing the inaugural session the speakers pledged to forge greater unity among the patriotic and democratic forces to establish democracy and exploitation-free society in the country. They also called upon the people to resist the local agents of the "imperialist and expansionist forces" to consolidate national independence and sovereignty.

Mr Nurul Huda Mirza, Convenor of the convention presided over the function and Haji Mohamed Danesh inaugurated it. Mr. Sirajul Hussain Khan Mr. Mohammad Toaho MP of Bangladesher Shaymabadi Dal, Mr Tajul Islam of Bangladesh Chhatra League (Prodhan) Mr Bimal Biswas and Mr Iqbal Hussain Vice-President of the student front of the Jatiyo Ganotantrik Convention addressed the meeting.

Haji Danesh called upon the patriotic forces of the country to foil the evil design of those conspirators who are trying to foil the country's independence and sovereignty.

Mr Nurul Huda Mirza said that the main aim of the Jatiyo Ganotantrik Convention was to resist and remove the bureaucratic, feudal and comprador forces of the country. The changes of governments during the last ten years did not change the fate of the people of the country, he said.

Mr Sirajul Hussain Khan explaining the purpose of the convention said that four political parties had been united together to give its political programmes.

The delegates who came from different areas of the country later brought out a big procession which paraded some of the city streets.

The inaugural session was followed by a cultural function.

TEXT OF FOREIGN MINISTER'S SPEECH ON PALESTINE

Dacca THE BANGLADESH OBSERVER in English 8 Dec 80 pp 5, 6

[Speech by Professor M. Shamsul Huq, minister for Foreign Affairs, Government of the People's Republic of Bangladesh, at the Institute of Law and International Affairs 6 Dec 80]

[Text] It is indeed a matter of great personal satisfaction for me to have the opportunity of addressing this distinguished gathering on one of the crucial problems of the contemporary world, namely the Problem of the Palestinians. My sincere thanks go to the members of the Bangladesh Institute of Law and International Affairs for organizing the meeting. We are today passing through a most critical juncture in the history of the world, in particular of the Islamic World. We cannot help recalling with deep dismay and anguish that the fundamental values and human rights which form the basis of the very existence of our civilized planet stand in jeopardy. The flagrant injustice and naked aggression committed by the Zionist entity against a whole race, the Palestinians, constitute a gross violation of human rights international law and the resolutions of the United Nations, the Non-aligned Movement and the Islamic Conference. The Zionist aggression is an affront to all humanity and a threat to world peace and security. The Palestinians are, indeed, the victims of a grim tragedy surpassing even the tragedy the Zionists suffered at the hands of the Nazis. Forcibly evicted from their own homeland they have been subjected to brutal atrocities aimed at their annihilation as a national entity.

The problem of the Middle East is no doubt most complex and the events in the region tend to move with an often bewildering swiftness. During the last sixty years, a series of development, such as the now infamous Balfour Declaration, the subsequent creation of a Jewisrh state in spite of the protestations of the entire Arab World and the hurried withdrawal from Palestine of the British mandate authorities, the 1967 war and the October war of 1973, constitute the main episodes in the making of the tragic and chequered history of the Middle East. [as published]

It would perhaps be appropriate to recapitulate briefly the events leading to the tragic eviction of the Palestinians from their ancestral homes. The Near East was for centuries under the Ottoman rule which ended with the collapse of the Ottoman Empire after the First World War. The Anglo-French Declraration of 1918 guaranteed the establishment of national governments and administrations of their own choice by the peoples of this region. [as published] To the utter surprise and shock of these native populations, the two colonial powers divided this region

and placed it under their colonial mandate. The origin of the Palestine problem as an international issue thus lies in events occurring during and after the First World War. The Mandate was meant to be of a transitory nature until Palestine attained the status of a fully independent state. But, in fact, the mandate's historical evolution did not result in the emergence of Palestine as an independent nation. Britain, as the administrator of the mandate over Palestine, endorsed in 1917 the Zionist aim of a Jewish national home (the Balfour Declaration). As a result, a non-Arab and non-Mulsim community gradually established itself in the heart of the Arab world. The Palestinians, whose forefathers had inhabited this land for virtually the two preceding millenia were forced into exile and eventually the Zionist state was created in clear violation of the natural and inalienable national rights of the indigenous people of Palestine.

Three decades ago, the Palestinian people belonged to one country with its distinctive geographical, political and cultural identity. During the subsequent years, the Zionist regime perpetrated new acts of aggression through annexation, by force, of additional Arab territories and unleashed a reign of terror, death and destruction. There are today about 4 million Palestinians the majority of whom are living in exile., More than 650,000 Palestinians live in squalid overcrowded camps scattered across the Middle East. This gifted race is blessed with a wide array of talents and has produced eminent artists, poets, doctors engineers and scholars. Their industry and zeal for learning has earned them both fame and respect in intellectual and academic circles the world over. It is indeed most heart-rending that the vibrant Palestinian people are today deprived of their basic human rights.

There have been various attempts to bring about a solution of the complex problem of the Middle East. The United Nations has been engaged in a continuing search for a solution to this problem which is potentially a major threat to world peace. In the course of this search, a large majority of the member states of the United Nations have recognized that the Palestine issue continues to lie at the heart of the Middle East problem and constitutes the most serious challenge to the fulfilment of the charter obligations of the UN for the preservation of international peace and security.

Involvement of the United Nations: Britain referred the problem of Palestine to the United Nations in 1947. The UN General Assembly created the U.N. Special Committee on Palestine (UNSCOP) in May 1947 which produced a very complicated partition plan for Palestine--three Arab and three Jewish segments linked in a sort of economic union with Jerusalem under international trusteeship. This partition plan was accepted by the Jews but naturally rejected by the Arabs, as it deprived the Palestinians of their right to fully exercise self-determination on the whole of their national soil. Fighting therefore started and in the October war of 1948 Israel occupied further Arab lands. By the end of 1948, the war was virtually over. Palestine and Jerusalem itself had been partitioned by the verdict of arms and during the first half of 1949, armistice were effected between Israel and four Arab states--Egypt, Lebanon, Syria and Jordan. By 1949, the Zionists had secured their sovereign state by force and started consolidating their gains. The Arabs including the Palestinians launched an all out boycott of the illegally established Jewish entity in the heart of the Arab land.

In 1967 Israel launched a full-scale aggression against Egypt Syria, Jordan the West Bank and the Gaza strip and occupied the whole of Palestine including

Jerusalem and parts of Egypt and Syria. The Zionist forces however did not rest after occupation of the Arab land forcibly; they started taking measures to change the physical demographic and cultural character of the Holy city of Jerusalem and establishing illegal Jewish settlements in the occupied territories with a view of judaization of the illegally occupied Arab territories.

The Security Council called for the withdrawal of Israeli forces from the occupied territories and a just settlement of the "refugee" problem, but unfortunately failed to deal with the Palestine question directly (resolution 242 of November, 1967). On May 21, 1968 the Security Council adopted resolution 252 affirming that all legislative and administrative measures and actions taken by Israel including expropriation of land and properties thereon, which tended to change the legal status of Jerusalem were invalid. The Council also called upon Israel to rescind all measures already taken and to desist forthwith from taking any further action which tended to change the status of Jerusalem. The Security Council reiterated this call in subsequent resolutions.

The Palestinian Liberation struggle entered a new era in 1970 when a resolution was adopted for the first time by the General Assembly providing for the right of the Palestinian people to self-determination. In resolution 2628--(XXV) adopted on November 4, 1970, the General Assembly recognized that respect for the rights of the Palestinians was an indispensable element in the establishment of a just and durable peace in the Middle East.

The Palestine problem entered a new phase in 1974 when the UN General Assembly adopted a resolution agreeing for the first time to deal with the question in its totality: not only in its humanitarian manifestations but also in its juridical and political contexts.

The General Assembly went further by recognizing the Palestinian Liberation Organization as the sole and legitimate representative of the Palestinian people. In October 1974, the General Assembly, considering that the Palestinian people were the principal party to the question of Palestine decided by its resolution 3210 (XXIX) to invite the PLO, the representative of the Palestinian people, to participate in the deliberations of the General Assembly on the question of Palestine. In the same year, the General Assembly reaffirmed the inalienable rights of the Palestinian people in Palestine including (i) the right to self-determination without external interference, (ii) the right to national independence and sovereignty and (iii) the right to return to their homes and property from which they had been displaced and uprooted. It also granted the PLO the status an observer and the right to participate in its deliberations in that capacity. [as published]

We however note with great regret and disappointment that despite U.N. resolutions both in the Security Council and the General Assembly, Israel has continued to flout with impunity international opinion and move ahead with its illegal policy of judaization through building settlements in occupied Arab territories. This systematic disregard of the international low and opinion was put into the focus of world attention with the submission of a report in February, 1980 by the Commission of the Security Council established under resolution 446 (1979) to examine the situation relating to settlements in the Arab territories occupied since 1967 including Jerusalem. [as published] On March 1, 1980 the Security Council adopted unanimously Resolution 465, the operative paragraphs of which stipulated that all

measures taken by Israel to change the physical character demographic composition, institutional structure or status of the Palestinian and other Arab territories occupied since 1967, including Jerusalem have no legal validity and that the Israeli policy and practices of setting parts of its population and new immigrants in those territories constituted a liargrant violation of the Forth Geneva Convention and a serious obstruction to achieving a comprehensive, just and lasting peace in the Middle East. In its Resolution 478 of August 20, 1980 the Security Council censured Israel in the strongest terms for her enactment of the so-called "basic law" on Jerusalem which has altered or purported to alter the character and status of the Holy city and declared the "basic law" as null and void.

This sinister Israeli move to make Jerusalem as her "eternal and undivided" capital under the cover of an illegal law is not only outargeous and preposterous it is also an affront to the sentiments of Muslims and Christians alike all over the World. [as published] This insolent and impetuous act on the part of Israel has awakened the Islamic world to a new sense of urgency for concrete action and determination.

Palestine Problem and OIC: As you are aware, the idea of the Islamic Conference was born out of the Jerusalem issue at the First Islamic Summit Conference in Rabat in September 1969 convened following the desecration of the Holy Al-Aqsa mosque in August 1969 by the evil Zionist forces. Though the organization of the Islamic Conference has since grown and encompasses a whole gamut of socio-economic political and cultural matters, the Jerusalem and Palestine problem still continue to remain at the centre of its attention. [as published]

The concern of the members of the OIC over the Palestine problem in general and the continued occupation of Jerusalem by Israel has led to certain concrete steps by them. At the 6th Islamic Foreign Minister's Conference of OIC held in Jeddah in 1975, a Permanent Committee on Jerusalem was created to coordinate efforts of the Islamic countries for the solution of the Palestinian problem including the restoration of the Holy city of Jerusalem to its Islamic and Arab sovereignty. Bangladesh was elected a member of the Jeruslaem Committee at the 9th Islamic Foreign Minister's Conference in Dakar. This Committee was upgraded to the Ministerial level with the King of Morocco as its Chairman at the 10th annual meeting of the Islamic Foreign Ministers' held Fez in 1979 at the instance of king khaled. [as published] As a further important step in this direction the Extraordinary Session of the Jerusalem Committee held in Casablanca in August 1980 set up a 3-member Committee of Head of States consisting of the King of Morocco and the Presidents of Bangladesh and Guinea to evolve a new strategy to liberate Al-Quds Al Sharif and to restore to the Palestinians their inalienable national rights.

The first meeting of the Summit Committee was held in Rabat on November 6-8, 1980. The President of Bangladesh who has all alrong taken a keen personal interest in the Palestine problem presented a concrete action-plan for the solution of this problem. [as published] The Committee is scheduled to meet again shortly to finalize its strategy.

Middle East Problem and the Non-aligned Movement; The Non-aligned Group also played an important role in efforts to find a just and durable solution of the Middle East problem. The Algiers meeting in 1974 included a comprehensive Declaration on

the Middle East demanding the unconditional withdrawal of Israel from all occupied Arab territories and restoration of the Palestinian people's national rights including their right to self-determination as indispensible pre-reffuisites for durable peace in the Middle East. [as published]

The Colombo Meeting of 1976 stressed for the first time the Non-aligned countries' support for the preservation of the national, religious and spiritual values of Jerusalem and regarded all annexation measures taken by Israel as null and void. The Havana Summit of 1979 also reffirmed that no just and durable peace can be achieved in the Middle East unless the Palestinian question is considered as the crux of the problem. [as published] It reaffirmed the right of the Arab countries and the PLO to continue their just struggle in all forms to achieve the liberation of their occupied territories and the realization of the inalienable rights of the Palestinian people and to take all steps to oppose all compromise solutions which ignore those rights.

We are happy to note that there has been a very marked shift in the West European opinion towards the Palestinian issue in recent months. The European States now appear to be inclined to recognize the Palestinian right to self-determination. France has formally endorsed the participation of the PLO in the peace talks and the Palestinian people's right to self-determination and so has Belgium. The EEC also recently underlined the importance of the PLOs participation in any talks involving the Middle East issue.

The position of Bangladesh on the Palestine issue has been clear and unambiguous. She has always expressed her complete solidarity with her Palestinian and Arab brethren in their struggle and lent her full support to their just cause of regaining from Israel all illegally occupied Arab territories including Jerusalem and the restoration of the inalienable national rights of the Palestinians including their right to a State of their own. This principled position has consistently been reflected in the Security Council the U.N. General Assembly, the Non-Aligned meetings, the Islamic Conference, and in our statements on various occasions. Bangladesh has been observing 21 August each year in a befitting manner as the Day of Jerusalem and Solidarity with the Palestinian people. This year, Bangladesh also issued a commemorative stamp on this occasion. The Hon'ble President of Bangladesh sent a special message to His Excellency Chairman Yasser Arafat reiterating Bangladesh's solidarity with her Palestinian brethren. [as published] A similar message was sent by the Bangladesh Foreign Minister to Mr. Farouk Kadhumi Head of the Political Department of the Executive Committee of PLO.

We have time and again, underscored in no unmistakable terms the paramount importance of the immediate vacation of Israel from all illegally occupied Arab lands including Palestine Jerusalem that is Al-Quds Al-Sharif as a pre-requisite for a lasting and durable peace in the Middle East.

Today, the need for closer cooperation among the members of the Islamic 'Ummah, politically and economically, has assumed a new urgency. The success of the efforts of the world in general and the Islamic nations in particular for a comprehensive and just peace in the Middle East depends on our united efforts and determined will.

I am confident that the day is not far off when the cause of justice will triumph, our Arab and Palestinian brethren will regain their lost lands and the legitimate rights of the Palestinian people will be fully restored to them.

May Allah help and guide us along the path of victory, long live Bangladesh and Palestine friendship.

SCIENCE MINISTER CALLS ENERGY PROBLEM 'ACUTE'

Dacca THE BANGLADESH OBSERVER in English 8 Dec 80 pp 1, 12

[Text] Dr R A Ghani State Minister for Science and Technology, said in Dacca on Sunday that the energy problem in the country was too acute and "we are stepping into a crisis level" soon reports BSS.

He said this was due to noncommissioning of any new power generating plants during the last ten years.

The Minister was speaking as the chief guest at a seminar on "utilisation of solar energy" held at the Chemistry Lecture Gallery at the Curzon Hall premises. The seminar was jointly sponsored by the Department of Applied Physics and Electronics and the Bose Centre for Advance Study and Research Dacca University. [as published]

Prof M. S. Huq of Applied Physics Department was the key note speaker while Prof Fazlul Halim Chowdhury Vice Chancellor Dacca University was in the chair. Other speakers at the seminar were Prof S Z Haider Dr Sultan Ahmed Dr A Hasnat Prof A K M Siddiq Port Muhtasham Hossain and Prof A R Khan participated in the discussions. [as published]

Dr Ghani said that Bangladesh was in a take off state in research and development of solution of the energy problems depended on utilisation of solar energy and the future solar energy which is also pollution free.

The Minister called for starting immediately a pilot project in the Physics Department Dacca University to develop and fabricate solar cells for conversion of solar radiation directly into mechanical and electri- ent aspects of solar energy utiancial assistance to revitalise the Bose Centre for advance study and research. [as published]

Prof M. S. Huq presented a detailed paper on the different spects of solar energy utilisation. [as published]

Prof S. Z. Haider explained how solar energy could be converted for utilisation through inorganic complexes.

Dr Sultan Ahmed briefly discussed on the gradual development of solar cells in different countries and techniques and materials involved in it. He said that a project was being taken up by the Physics Department in collaboration with the Atomic Energy Commission for developing solar cells.

PARLIAMENT PASSES DOWRY PROHIBITION LAW

Dacca THE BANGLADESH TIMES in English 13 Dec 80 pp 1, 8

[Text] The Jatiya Sangsad on Friday passed the Bangaldesh Anti-Joutuk Bill, 1979 to make provision for "protection and preservation of rights and dignity of women."

It was the first private member's bill, moved by Mrs Daulaton Nessa Khatun, a BNP member, passed by the second Parliament unanimously.

The bill makes payment or receipt of dowry--different in meaning from 'mohrana'--by any party punishable by imprisonment of one year and with or without fine of Taka five thousand.

Speaking on the bill, Leader of the House Prime Minister Shah Azizur Rahman said that the passage of the Bangladesh Dowry Prohibition Bill by the Parliament would be written in the history as a red letter day.

He said that no law was permanent and there could be no stagnation in the legislation. Laws were amended to suit the changing need of the society.

He said that the Dowry Prohibition Bill was just the beginning of a war against the social malice. We shall make necessary amendments if necessary in due course according to the needs and requirements. "Let us consider the bill as a sheeb-anchor" of women's right, he said.

The Prime Minister said that the bill would act as a moral booster to fight against the social menace.

The Prime Minsiter said, "morality cannot be legislated. It can only be motivated."

Asaduzzaman

Leader of the Opposition Asaduzzaman Khan hailed the bill and said that those who had introduced the bill at the Parliament had good intentions. "I have my blessing for the bill," he said.

He, however, said that steps should be taken for effective implementation of the bill.

Mr Khan thought that he did never oppose the Bill but thought that it should have been better framed.

Moving her Bill Mrs Daulaton Nessa Khatun asked the Opposition members to withdraw their amendments as they did not reflect the people's aspiration.

In the statement of objects and reasons for introducing the Bill, the member in charge said that the demand for 'Joutuk' at the time of marriage has become so rampant and so extensive in nature that it has emerged as a national problem of immense dimension. This system has been of late widely criticised and there has been a popular public demand for its abolition. It is a social evil which cuts at the root of an affectionate and loving relationship between the husband and the wife after marriage and has played a very vital role for breach of relation between them.

Victims of this abhorable system are numerous and its effect is excessively extensive in nature and dimension that many families have ruined themselves under its cruel clutches.

The Bill prohibited any citizen from demanding 'joutuk' at the time of marriage or before or after marriage.

Any body may lodge a complaint with the family law tribunal against any person recieving or paying 'joutuk' affixing a court fee of Taka one only. [as published]

Opposition Members

Four Opposition members proposed that the Bill be circulated eliciting public opinion while five lady members of the Treasury Bench opposed the motion and said that the people were against the dowry system and this had been proved through various mass media.

Mr Imazuddin Pramanik of Awami League (Malek) hailed the Bill but said that it could be made better if public opinion was sought.

Mr Abdul Latif Mirza of JSD withdrew his motion saying that his party had full support for the Bill.

Mrs Ayesha Sarder of BNP said that the Bill would safeguard the interest of the commonman who had been suffering for ages at the time of marriage of their daughters.

Mrs Gul Badan Begum of BNP suggested that a bill regarding food control at the time of marriage ceremonies be also considered by the House.

Mr A B M Taleb Ali of Awami League (Malek) said that the legislation would be effective if the anti-dowry attitude could be developed among the people. Mr Sudhangsu Sekhar Halder said that after the passage of the Bill, he would not able to give presentation during the marriage of his only daughter whom he loved much.

Whip Mrs Farida Rahman said that presentation and dowry were two separate things. "In case of dowry coercion is used", she said.

She said that the bill was not be passed hastily since it was introduced to the House in 1979. [as published] Meanwhile, he said they had received thousands of

letters congratulating the Bill and none opposed it. [as published] She thanked the Opposition for supporting the Bill.

Mr M A Matin of Muslim League said that the punishment for the violation of the law should have been severer.

Mrs Hosne Ara Khan and Mrs Fatema Rabbani of BNP and Syeda Begum Razia Faiz also spoke over the Bill.

MINISTER REPORTS ON CIVIL AVIATION, TOURISM

Airline Operations Described

Dacca THE BANGLADESH TIMES in English 5 Dec 80 p 12

[Text] The Bangladesh Biman carried a total of 2.62 lakh passengers in international routes during the year 1979-80.

Replying to a question by Shah Md Abu Zfar at Jatiya Sangsad on Thursday, Civil Aviation and Tourism Minister K. M. Obaidur Rahman said that during the year Biman was able to maintain 80 per cent regularity in international flights.

During the year Biman flew a total of 5,038 international flights with a total cargo carrying capacity of 8000 tons.

H said that Biman earned profits in its international flights but incurred loss in the domestic flights. [as published]

Replying to another question he said that the income of Bangladesh Biman increased by 16 per cent per flight on an average after enhancement of fares.

The Minister said that Biman did not treat passengers of domestic flights with snacks and a sum of Taka 73.27 lakh was saved by September this year due to this.

He said that the government had a plan to purchase two F-23-4000 aircrafts and spare parts worth Taka 49.23 crore during the Second Five Year Plan period. The government was also considering the purchase of other aircrafts during the period.

Turning on another question from Sheikh Selim the Minister said Biman faced a total of seven accidents since the independence of the country. Four of those were major accidents.

Five crew of Bangladesh Biman including two pilots and three cadet pilots died in accidents so far. No Biman passenger died in any of the accidents, he said.

The Minister said that the losses suffered by Bangladesh in all accidents since the independence of the country have been realised from the concerned insurance companies.

Replying to another question he said that Bangladesh Biman had 155 motor vehicles which burnt 58.48 thousand gallons of petrol, 21.36 thousand gallons of octane 12.13 thousand gallons of diesel during the year 1979-80.

Tourism Statistics Given

Dacca THE BANGLADESH TIMES in English 5 Dec 80 p 12

[Text] A total of 41,998 tourists visited Bangladesh upto the month of August of the current calendar year as against 57,282 during the preceding year. [as published]

Replying to a question at the Jatiya Sangsad, Civil Aviation and Tourism Minister K. J. Obaidur Rahman said the number of tourists visits in Bangladesh were 34,680, 63,647 and 50,228 in 1972; 1975 and 1978 respectively.

He said that the government had already implemented a number of projects for making tourism facilities more attractive. These included arrangement of boarding, dinning, transport and recreation facilities for tourists at Dacca; Sylhet; Khulna; Cox's Bazar; Kartai; Rangamati; Chittagong; Bogra; Rajshahi; Nagarbari and Daudkandi. [as published]

He said that the government had also introduced training for Parjatan personnel to make optimum utilization of the labour force. Arrangement have also been made to make tourism in Bangladesh more attractive through regional and international tourism organisations. [as published]

The Minister said that quite a good number of development projects in tourism are likely to be implemented during the Second Five Year Plan period. The government was now considering a 10-year big development plan (1980-90) in this regard.

CSO: 4220

PETROBANGLA CHIEF ON OIL, GAS EXPLORATION

Dacca THE BANGLADESH OBSERVER in English 7 Dec 80 p 7

[Article by M A Maroof Khaii, Director (Exploration): "Oil and Gas Exploration in Bangladesh"]

[Text]

THE development of the resources of the earth is a basic necessity for economic development of the country and an important pre-requisite for development of such resources is the adequate geological know ledge of the country. The geological outline of the country needs to be clearly known for identification of the most promising areas for petroleum exploration. Geological mapping in relation to stratigraphy, structure sedimentation and depositional environments of sedimentary rocks help to understand process of origin, migration and accumulation of hydrocarbons in sedimentary rocks.

The first geological mapping was carried out by Burmah Oil Company (B.O.C.) in 1908 in the Sitakund areas in Chittagong District. Geological investigations of the same area were done by White Hall Petroleum Corporation during 1922—23.

Further geological mapping was carried out by B. O. C. in selected areas of Sylhet, Chittagong and Chittagong Hill Tracts during the years 1923-48. The other foreign oil companies like Pakistan Shell Oil Company (P. S. O. C.) and Pakistan Petroleum Limited (P.P.L.) also carried out geological investigations over the selected structures of the hilly areas of the eastern part of the country between 1947 and 1959.

In 1961, the Government of Pakistan took specific steps for the exploration of oil and gas by creating the Oil and Gas Development Corporation (O.G.D.C.) with Soviet Technical Assistance. The O.G.D.C. mapped many promising structures in Sylhet, Chittagong and Chittagong Hill Tracts. After the emergence of Bangladesh, O.G.D.C. was absorbed in Petrobangla in 1974. Since independence, its geological party has mapped an area of about 4435 square kilometers (2545 L/Km) on 1:50,000 scale in the districts of Sylhet, Chittagong and Chittagong Hill Tracts.

Petrobangla geologists in cooperation with the geologists of the German Geological Advisory Group carried out geological investigations on 1:50,000 Scale from 1977 for sedimentological studies of rock sections between Ranirhat and Rangamati and between Chandraghona and Kaptai in Chittagong Hill Tracts.

A geological reconnaissance was done between Taktanala and close to the Indian border in Chittagong Hill Tracts and also in areas near Cox's Bazar, Sitakund and Sandwip with the aim of obtaining specific information on unconformities and/or thrust faults in the areas studied in order to better understand the regional geologic and tectonic features of the south-eastern part of the country. Another geologic traverse was made in the Chittagong Hill Tracts from Myani Khal in the west to Sazal Lui in the east which borders India in relation to palynology, sedimentology and tectonics followed by yet another geological field work in the Bandarban and Sitakund anticlines and also near Cox's Bazar and at the mouth of the Meghna River near Raipur of Noakhali District in relation to sedimentology.

About 160 line kilometers so far have been covered geologically. Systematic collection of samples was done for palynologic and petrographic laboratory tests for age determination and correlation of exposures from place to place. The study of heavy minerals will make possible to determine the provenance environment of deposition and directions of sediment transport.

Carbon-isotope (13C/12C) analyses on gas samples from all producing onshore gas fields and from natural gas seepages elsewhere have been carried out in the laboratories of the Federal Institute for Geosciences in HANNOVER, F.R.G. The results indicate that all these natural gases are derived from marine organic substances and not from coal or humic organic matter and are generated under conditions obtaining in the so-called oil-window (oil kitchen) of hydrocarbons formations and maturation. They are neither immature biogenic swamp gases nor over mature (over-cooked) dry gas; though they consist mainly of methane. Especially the gases of the Chhatak and Sylhet gas fields point to migration distances of gas between 2 and 5 kilometers. These gases may well have been generated together with oil but were subsequently separated from it during migration. If that was indeed the case, there must be a good chance to find also oil in this seemingly highly gas-prone country.

Petrobangla have established geological laboratory where intensive laboratory investigations relating particularly to palynologic, micropaleontologic sedimentologic petrographic and geochemical studies will considerably support the oil and gas exploration activities.

GEOPHYSICAL ACTIVITIES

Seismic Survey: The purpose of seismic survey is to evaluate subsurface structural conditions. In Bangladesh, Standard Vacuum Oil Company (S.V.O.C.) first conducted the seismic survey in 1956 mostly in the north-western part of the country.

Pakistan Shell Oil Company (P.S.O.C.) Pakistan Petroleum Limited (P.P.L.) and G.S.L. as contracter of S.V.O.C. P.P.L. and P.S.O.C. carried out seismic reflection survey from 1950 to 1964 covering selected areas of north-western, middle and eastern region of the the country. Seismic Survey was also carried out by O.G.D.C. (now Petrobangla) from 1963 till date in a few areas of the districts of Rangpur, Dinajpur Mymensingh. Tangail Dacca Comilla, Sylhet Noakhali, Barisal Chittagong and Chittagong Hill Tracts and have covered 6069 line kilometers. Except the hilly areas of the northern and the eastern part of the country, conditions for the rest of the areas are very favourable for short-hole drilling and good reflection horizons are easily mapped. The Eocene Sylhet Limestone is the excellent reflector in the shelf areas. Gentle anticlinal structures are found in the Surma Basin and also at the eastern part of the frontal fold belt where the subsurface structure is relatively more simple. In absence of seismic survey in the Chittagong Hill Tracts, the structural style at depth is now known. Under the Production Sharing Agreement, six foreign oil companies started seismic survey in the Bay of Bengal in 1974--76 and covered 31979 line kilometers and quite a good number of structures were located.

Under the Technical Aid Agreement with the Government of the Federal Republic of Germany, the Prakla-Seismos, a German Geophysical Contractor is engaged in digital seismic exploration surveys in co-operation with Petrobangla in the Raishahi-Pabna-Bogra-Faridpur, Sitakund and Sylhet areas and it has covered a total of 1024 linear kilometers. The results of this seismic survey in the Hinge-Zone area have yielded important new information for exploration targets. Thick sedimentary rocks occur below the Sylhet Limestone. The Hinge-Zone Area covered by PK--1 represents the transition zone between the Paleocene Eocene

basin facies in the south-east and shelf facies in the north west. Such areas with an interfingering of sediments exhibiting a good source rock (shale) and reservoir rock potential (sandstone) are of great interest for exploration of oil and gas (see figure—1). This survey in the Hinge-Zone area has also proved the presence of a drillable structure (Singra) with a direct indications for the presence of hydrocarbons. Other positive geological trap situations were also indetified.

The seismic survey carried out so far over the Sitakund Structure does not give any clear picture of the crestal part of the Structure because it seems to be heavily tectonised. The first processed digital seismic section of Prakla-Seismos also fails to reveal the subsurface geology of the crestal part of the Sitakund anticline. The processed results of the Surma Basin are excellent. Seismic correlation of the gas bearing reservoir rocks from Chhatak to Sylhet through Kailas Tila have been eventually become possible.

Gravity And Magnetic Survey. Aeromagnetic and gravity surveys have found a wide application for the location and definition of geological structures of interest to hydrocarbon exploration. Both methods provide a rapid and comparatively inexpensive approach to regional geologic problems. The aeromagnetic survey helps in establishing the depth and topography of the basement surface and thus allow estimates of the thickness of the overlying non-magnetic sediments. It always helps in selecting the priority areas for further investigations.

A reconnaissance aeromagnetic survey was carried out over the whole of Bangladesh by S.V.O.C. and O.G.D.C. in 1952 and 1953—64 respectively. G.S.I. as a contractor for P.P.L. and P.S.O.C. continued gravity survey from 1955 to 1958. Exploration Department of Petrobangla (former O.G.D.C.) started gravity survey in 1963—64 in different parts of the country and continuing till date. This survey has aided to recognize the shallow basement in the shelf areas and deep troughs in Faridpur Hathia and Sylhet areas.

DRILLING ACTIVITIES

Three exploratory shallow wells were drilled near Sitakund on the Sitakund Structure between 1910 and 1914 by the Indian Petroleum Prospecting Company. The Burmah Oil Company drilled the first exploratory shallow well in 1914 on the same structure. But all these wells were abandoned as dry holes. Subsequently between 1923 and 1933, the B.O.C. drilled two shallow wells on Patharia Structure. Though indications of oil were found but no commercial production was established. Sue to the second world war and the partition of India, no drilling was done in this part of the world during 1934--50. The exploration activities entered into a new phase after 1951 and in subsequent years, most part of the country was geophysically surveyed. During 1951--64 the Pakistan Petroleum Ltd. (P.P.L.) drilled 13 wells at Patharia, Patya, Sylhet, Lalmai Chhatak and Fenchuganj. This time Perseverance paid dividends and P.P.L. discovered commercial quantity of gas in Sylhet--3 near Haripur in 1957 and at Chhatak in 1959. Between 1960 and 69 the Pakistan Shell Oil Company (P.S.O.C.) drilled 11 wells, 10 onshore and one in the Bay. It is remarkable that Shell Oil Company discovered gas in all the wells except that of Lalmai and Cox's Bazar. The Stanvac drilled one well each at Kuchma Bogra and Hazipur during 1959--60 but all the three wells proved to be dry.

Former O.G.D.C. started its first drilling in November 1964 at Jaldi with the help of Soviet built drilling rig. Till January 1971, 3 exploratory 4 apprisal and 3 geological information bore holes were drilled in Jaldi and Semutang in the Chittagong Hill Tracts. Among 5 wells in Semutang, only two wells were reported to be gas producer. Though there was gas shows in Jaldi--2 but the well was depleted after two months. Testing in Jaldi--3 were carried out in 1974--75 but there was no indication of any commercial flow of gas and hence the hole was abandoned.

Petrobangla started drilling at Hijla-Muladi-1 on May 31, 1975 and reached a total depth of 4732m on December 16, 1976. On the basis of gas shows, six zones were selected for production testing at the following depth from bottom: 4704m-4631m-4615m 4586m-4565, 4524m-4508m, 4458m-4447m and 3644m-3634m. The bottom two zones were tested with drill stem by Halliburton but there was no flow. The third zone had to be plugged due to technical reasons The other horizones finally could not be tested due to stuck of pipes.

Begumganj Well No. 1 spudded on January 19, 1976 and reached the total depth of 3656m on January 27 1977. Eight zones were selected for testing from bottom to top: 3644m-3642m, 3626m-3621m and 3588m-3585m, 3547m-3542m, 3532m-3528m, 3479m-3475m, 3441m3426 m- 3012m-2995m and 2903m-2887m. The zone 3012-2996m was tested in March-April. 1980 and a commercial flow of gas is established. The lower zones could not be tested due to some unavoidable circumstances.

Begumganj Well No. 2 was located at about 4 5 km. along the anticlinal axis towards NW from Begumganj Well No. 1 The well was spudden on March 11, 1978 and reached a total depth of 3577.6 meters on August 28, 1978. A total of six zones was selected for production testing from bottom to top: 3436m-3428m. 3382m-3374m, 3148m-3140m, 3032m-3026m, 2887-m2878m and 2815m-2807m. The tested horizons could not show any flow of gas. How ever retesting of his well has been planned.

Hijla-Muladi Well No. 2 was spudded on February 23, 1979 and reached a total depth of 4556m on July 23, 1980 After logging 3 zones are selected for production testing. The drilling at Singra and Feni is under progress.

It may be mentioned here that the regional office of the former O.G.D.C. was established at Chittagong in 1967 just to look after the survey par ties but all the geological geo. physical and drilling reports including maps and illustrations were deposited in the Head Office at Karachi without keeping any documents in the re. gional office Thus all the infor. mation and reports prior to 1971 are in the Head Office at Karachi So is the case of all the foreign companies e.g. B.O. C. P.P.L., S.V.O.C. and P.S. O.C who carried out exploration before Liberation of the country. Only a few reports of P.P.L. and P.S.O.C are avail. able

The search for oil and gas entered into a new interesting phase in 1974 when 6 foreign oil companies entered into the agreement under the Produc. tion Sharing Contract for oil exploration in the offshore areas of Bangladesh After comple. tion of seismic surveys the Ben gal Oil Development Corpora. tion (BODC) started drilling in 1976 followed by Atlantic Richfield (ARCO) Ina-Naftaplin (BINA) and Union Oil Company (UNION) BODC drilled three holes BINA and Union drilled 2 holes each and only one hole was drilled by ARCO between 1975 and 78 The maxi. mum drilling depth reached in BODC—1 was 4,598m. Except Kutubdia Well No. 1, all other holes were found dry The Ku. tubdia well flowed at a rate of 17.9 M M C F D from a 30 feet interval between 8760—3739 ft. through a 8 inch choke The exploration activities in the Bay has stopped at the mo ment due to withdrawal of foreign oil companies Exploration activities so far have been carried out in our country in relation to geology geophysics and drilling are shown in table —1. During the last 70 years 29 exploration wells have been drilled onshore resulting in 9 discoveries a success ratio of 3.2 This is considerably higher than world average. In addition 14 appraisal and six geological information wells have also been drilled Offshore the suc. cess ratio is lower being 1 in 9 since the nine offshore wells have resulted in only 1 disco. very the Kutubdia field.

Manpower requirement : Well trained and experienced staff are pre-requisite for any suc. cessful exploration. The lack of experienced staff in the field of geology geophysics and drilling are severely felt. Due to equilization in pay and in ab. sence of adequate financial terms coupled with opportuni. ty for employment abroad with better salary it is difficult to attract the promising profes. sional. However, there are qua lified professional (148 officers and 375 staff) to support the exploration effort. Petrobangla is in a position to support the operation of three rigs and can raise five seismic one gravity and two geological parties.

Tranning programme : Training is a continuous process. It is equally good both for the experienced and fresh profes. sional. It is always considered flexible and tailored to the spe cific requirements of each person in the context of his previous experiences. Petrobangla is puting emphasis to practical training on the job.

MANPOWER MINISTER REPORTS ON LABOR EXPORT

Dacca THE BANGLADESH TIMES in English 4 Dec 80 pp 1, 8

[Text] The Government was formulating a fullfledged principle regarding manpower export, the guidelines for which had already been placed before the Cabinet by its committee on manpower and foreign employment.

This was stated in the Jatiya Sangsad on Wednesday by Mr Atauddin Khan, State Minister for Manpower Development and Social Welfare during the question hour.

He told leader of the Opposition Mr Asaduzzaman Khan that persons going abroad with jobs were being selected on the basis of some principles The Government was now formulating a permanent set of principles.

Replying to a question of Mr Farhad Ahmed Kanchan (BNP) Mr Atauddin Khan disclosed that a total of 94,311 persons have gone abroad with jobs during the period between mid-1975 till now.

He told Professor Mofijul Islam (BJL) that according to statistics available from the Bangladesh Bank, Bangladeshis working abroad have remitted a total of Taka 573.02 crore during the period between 1979 and August 1980.

Of the total number of persons who went aboard with employments 29,652 persons were sent by the Ministry while 12,338 had gone abroad through manpower recruiting agencies. The remaining 52,321 had gone abroad on the basis of [an] objection certificate (NOC), the Minister said.

Mr Atauddin Khan told Md Mohsin that there are 307 Government recognised recruiting agencies for manpower export. The Minister further told Mr A S M Solaiman (GF) that licences of 12 recruiting agencies were cancelled on charges of malpractices regarding sending of Bangladeshis abroad with jobs. Besides licences of agencies were held up for renewal pending enquiry into allegations against them, he said.

The Minister told another questioner that 33 doctors and 284 engineers went abroad with employment from January this year.

BRIEFS

INDONESIAN JUTE PURCHASE--Indonesia will import 40,000 tons of raw jute from Bangladesh, it was officially stated in Dacca on Thursday, reports BSS. A letter of intent was signed on Wednesday in Jakarta between the visiting Bangladesh jute delegation and Indonesian Gunny Bags Producers' Association according to an official source, Bangladesh has also signed another letter of intent to sell two million pieces of gunny bags to Indonesia. [as published] The delegation led by Mr. Afazuddin Fakir, MP, Chairman Bangladesh Jute Association also held meetings with Indonesian Trade Minister, Mr. Radius Prawiro and Junior Minister for Cooperatives Mr. Bustanil Arrifin. [Text] [Dacca THE BANGLADESH OBSERVER in English 5 Dec 80 p 1]

TRADE WITH ROK--Bangladesh and South Korea on Thursday agreed on "frequent" exchange of trade teams at both public and private sector levels for promoting bilateral trade relations says BSS. Visiting South Korean Vice Minister for Commerce and Industry Dr Sun Kil Kim held a meeting with State Minister for Commerce, Chowdhury Tanvir Ahmed Siddiky at his office on Thursday and agreed that there was a lot of scope to expand areas of cooperation in the trade and economic fields between the two countries. The Ministers also discussed propects of setting up joint ventures in export oriented and ship building industries. [as published] Mr Siddiky urged the visiting Minister who is leading a five member delegation in connection with the Solidarity Meeting of the Industry Ministers of Developing countries now being held in Dacca, to cooperate in the increasing volume of South Korean imports from Bangladesh. [Text] [Dacca THE BANGLADESH OBSERVER in English 5 Dec 80 p 12]

SAUDI DONATION--The Government of Saudi Arabia has donated 4 (four) million US dollars towards President's Relief and Welfare Fund, reports BSS. A cheque for the amount was handed over by Saudi Ambassador in Bangladesh Sheikh Fouad Abdul Hameed-al Khateeb to Vice-President Justice Mr Abdus Sattar at the later's Secretariat chamber in Dacca on Wednesday morning. While receiving the cheque, the Vice-President thanked the Ambassador and through him to the Government of Saudi Arabia for the donation. The Saudi Ambassador expressed his deep concern at the loss of life and property during recent floods and prayed for the protection and well-being of the brotherly people of Bangladesh. ALL-INDIA COMMUNIST PARTY PLANS MEETING

Calcutta THE SUNDAY STATESMAN in English 14 Dec 80 p 9

[Text] The first party congress of the newly-formed All-India Communist Party will be held in Delhi at the end of January. The party's central unit will be set up then. At present it is run by an All India Consultative Committee, whose secretary if Mrs Roga Deshpande.

An AICP leader, Mr Ananta Majhi, said in Calcutta on Saturday that the party has not been able to set up units in all the States. Its largest unit was in Uttar Pradesh where it claimed to have about 13,000 members. A membership drive was going on in other States, including West Bengal. Mr Majhi said the party was being strict in admiting new members.

A newsweekly, sympathetic to the party's political line, is being published from Bombay. Its editor is Mr Bani Deshpande of the Congress (I). In its first issue, it alleged that the police and the CPI have been jointly harassing the AICP workers in Andhra Pradesh, the home-State of the CPI general secretary, Mr Rajeshwara Rao.

Referring to the meeting between the Soviet President, Mr Leonid Brezhnev and the CPI leaders in Delhi, Mr Majhi said the Communist Party of Soviet Union was bound to tell the CPI that it was following a wrong line by opposing Mrs Gandhi, who represented the anti-imperialist national bourgeoisie in India and who was the "only friend" of the Soviet Union in South Asia.

PUBLIC ACCOUNTS OFFICE REPORTS ON FOREIGN EXPERTS

New Delhi PATRIOT in English 19 Dec 80 p 5

[Text] The Public Accounts Committee has criticised the lack of a set policy 'at any stage' in respect of engagement of foreign technicians in India, reports PTI.

It has suggested that Government should find out complete details connected with the employment of foreign technicians and the availability of Indian expertise so as to formulate such a policy and the tax concessions to be given to them.

The committee made the remarks in its twenty-sixth report presented to the Lok Sabha on Thursday. The report followed that of the comptroller and auditor general relating to assessment of foreign technicians.

Employed in India which disclosed erroneous exemptions and loss of tax revenue of several lakhs of rupees in test checks.

Among the instances of such irregularities pointed out by the audit report, for 1976-77 were:

A test check conducted in Andhra Pradesh, Maharashtra, Tamilnadu and West Bengal revealed 46 cases of foreign technicians where tax exemption was granted though the approval of the Central Government was not obtained within the prescribed time. The loss of tax revenue in 43 cases amounted to Rs 28.2 lakhs exclusive of interest that could be levied under the Act.

In another test check in Assam Madhya Pradesh and West Bengal, exemption was allowed in the case of 10 foreign technicians under the provision which was not admissible for those in the employment of foreign enterprises. The loss of revenue was Rs 9.38 lakhs.

The committee was also 'deeply distressed' that concerned ministries failed to maintain appropriate records of the particulars of the contracts of service of the foreign technicians who came to serve in India.

The PAC in its 30th report has told the Government that the money in the agricultural produce cess-fund should be strictly utilised for research work and not spent on construction of office buildings hostel and staff quarters.

KARNATAKA LEADER APPOINTS SEVEN NEW MINISTERS

Madras THE HINDU in English 13 Dec 80 p 1

[Text]

BANGALORE, Dec. 12.

Seven new Minis s were inducted into the .1-month-old Gundu Rao Ministry here this morning, taking its strength to 26—18 Cabinet rank and eight Ministers of State.

The new Ministers were sworn-in by the Karnataka Governor, Mr. Govind Narain, at Raj Bhavan. They are: Mr. H. C. Srikantiah, Mr. Mallikarjuna Kharge, Mr. G. Made Gowda, Mr. Manik Rao Shamarao Patil, (all Cabinet rank), Mr. K. Gangadhar, Mr. B. B. Chimmankatti and Mrs. Nagamma Keshava Murthy (Ministers of State). This is the third expansion of the Ministry.

Mrs. Renuka Rajendran, who was Minister of State for Sericulture, has been elevated to Cabinet rank and has also been given additional charge of Small-scale Industries. She was also sworn in today.

In a reshuffle, the Revenue and Agriculture Minister and No. 2 in the Cabinet, Mr. S. Bangarappa, considered the centre of dissident politics, has been stripped of the Revenue portfolio and left with Agriculture.

Similarly, Mr. C. M. Ibrahim, who had been relieved of his Food portfolio in the last reshuffle, has again been divested of the Labour portfolio and has now been put in charge of Planning and Wakfs.

Despite his earlier indications that he was likely to drop some Ministers, the Chief Minister has kept all of them intact except for a shake-up in some of the portfolios.

Resolution of Controversy

A feature of the latest expansion is the resolution of the major in-party controversy over accommodating "defectors"—the erstwhile supporters of Mr. Devaraj Urs who switched their allegiance to Mr. Gundu Rao, enabling him to form the Congress(I) Government on January 12.

More than 80 MLAs, led by Mr. Srikantiah, opted for Mr. Gundu Rao's leadership, within hours of Mr. Urs bowing out of office, in the wake of the Congress (U)'s rout in the Lok Sabha mid-term poll.

Mr. Srikantaiah, who was Municipal Administration Minister in the Urs Cabinet has now been assigned Cooperation.

Mr. Mallikarjuna Kharge, who was previously Rural Development Minister has been given the Revenue portfolios. Mr. Made Gowda gets Forests, Mines, and Geology. Mr. Manik Rao Shamarao Patil who was the Chief Whip in the Assembly, has been put in charge of Food and Civil Supplies held by Mr. Kagodu Thimmappa who has been shifted to Public Works.

The change of portfolios was announced to newsmen by the Chief Minister after a brief meeting of his expanded Council of Ministers.

He indicated that the Ministry had been more or less fully constituted and that he might induct a few more in course of time.

Education Portfolio Split

The portfolios of the three new Ministers of State are: Mrs. Nagamma Keshava Murthy: Primary and Secondary Education: Mr. K. Gangadhar: Independent charge of Information and Youth Services; and Mr. B. B. Chimmankatti, Major and Medium Irrigation, attached to the Chief Minister.

There is no change in the portfolios of the existing Ministers of State—Mrs. Manorama Madhwaraj (Women and Child Welfare), Mr. D. B. Pawar, (Fisheries and Ports), Mr. Sudhindra Rao Kasbe (Museum), Mr. Aswath Reddy (Electricity) and Mr. K. Yenkatappa, (Horticulture). However, the additional charge of Primary Education, held by Mrs. Madhwaraj, has been transferred.

The Education portfolios has been split. Mr. G. B. Shankar Rao will retain Higher Education and parts with Primary and Secondary Education going to Mrs. Keshava Murthy.

Following the reshuffle, the Planning portfolio which was with the Finance Minister, Mr. Veerappa Molly, has been assigned to Mr. Ibrahim. The Cooperation Minister, Mr. A. B. Jakanur, is now put in charge of Labour.

The Cabinet Ministers who retain their portfolios are: Mr. Y. Ramakrishna (Minister for Law and Parliamentary Affairs), Mr. A. K. A. Samad (Health), Mr. P. Ramaiah (Rural Development), Mr. M. Sadiyojatha (Transport), Mr. P. Venkataramana (Social Welfare and Backward Classes) and Mr. Dharam Singh (Urban Development).

Mr Gundu Rac said representation to the various communities and districts was the feature of the Cabinet expansion. Tumkur and North Kanara are the two districts yet to be represented.

The Chief Minister replied in the negative to a query if the party's high command had advised him against dropping any Minister.

LOK DAL PRESIDENT SUSPENDS SENIOR LEADER

Madras THE HINDU in English 20 Dec 80 p 1

[Text]

NEW DELHI, Dec. 19.

Mr. Chandrajit Yadav, senior Lok Dal leader, was today suspended from the party by its President, Mr. Charan Singh.

The suspension follows a show-cause notice served on him on December 15, accusing him of hobnobbing with the Congress (I).

Mr. Charan Singh, in a letter to Mr. Yadav today, said he was left with no alternative but to suspend him from the party membership with immediate effect since he had not replied to the notice and instead issued a statement to the press on the issue.

Mr. Charan Singh, in a statement issued later, warned the party rank and file "to beware of the attempts being made by Mr. Chandrajit Yadav to give an ideological colour to his anti-mass struggle and pro-Congress (I) activities".

Giving reasons for the suspension of Mr. Yadav, Mr. Charan Singh said "instead of giving a satisfactory explanation of his pro-Indira Congress activties", he was "continuing his work of disruption".

Mr. Devi Lal, former Chief Minister of Haryana and Moulana Hashmi, a Lok Dal member of the Rajya Sabha, and also a member of the national executive, who were present at the press conference described Mr. Charan Singh's action as "most undemocratic".

Mr. Yadav released to the press today a four-page reply written in Hindi to Mr. Charan Singh. In his letter Mr. Yadav explained how "baseless and concocted the charges levelled against him are".

Mr. Yadav said he had met the Prime Minister thrice: first at her invitation to discuss the Assam issue, then after returning with a delegation from Kampuchea, and the last time after returning with a delegation from Sofia. "I had to inform her of certain things, because she is the Prime Minister of a country and I happened to be a member of the delegations".

BHARATIYA JANATA ISSUES 'POLICY DOCUMENT'

Bombay THE TIMES OF INDIA in English 15 Dec 80 p 1

[Text] NEW DELHI, December 14 (UNI).

IN a major policy change, the Bharatiya Janata Party (BJP) has accepted "Gandhian socialism" as its political ideology.

Formed out of the erstwhile Jana Sangh for which socialism had been an anathema since its inception in the early fifties, the BJP's Gandhian socialism aims at "ultimately replacing both capitalism and statism by principles of a cooperative trusteeship in all fields of economic activity."

A 33-page "policy document" titled "our five commitments", prepared for the BJP's first plenary session in Bombay beginning on December 28, pledges itself to the observance of five principles on the basis of which it says a national consensus can be created.

These five principles are: nationalism and national integration, democracy, positive secularism, Gandhian socialism and value-based politics.

Elaborating its concept of "Gandhian socialism", the party says bread, freedom and employment are the first Gandhian principles. The BJP will make these principles the core of development strategy and try to build a national consensus around them.

It warns against the danger of concentration of economic power either in the hands of the state or individuals. It invariably leads to corruption of power.

The BJP favours gradual transformation of society towards trusteeship and cooperative commonwealth through non-violent means.

Explaining the first principle — nationalism and national integration — the policy paper explains that India is one nation and Indians are one people, constituting and mutually accommodating plurality of religious faths, ideologes, languages and interests.

The BJP believes that people of different faiths and different ideologies should be able to co-exist in peace and harmony with one another.

It says national consensus will be possible when the development of one social group leads to the development of other social groups. Those who have external or extra-territorial loyalties or are engaged in anti-socialist objectives cannot be by definition expected to contribute to national consensus and, therefore, will have to be kept out.

A fundamental plank of the Jayaprakash Narayan's movement and so also of he BJP approach has been commitment to democracy, it says adding: it will be the endeavour of the BJP to defend democratic institutions and norms and fight ceaselessly against emerging fascist trends.

The BJP will cooperate with other democratic parties for the defence of democracy and fundamental rights.

Describing Congress secularism as "totally immoral and opportunistic and a fraud played on the people", the BJP policy document says the party will ensure full protection to the life and property of the minorities.

The policy paper commits the BJP to the building up of a "value-based politics" and thus seeks to cleanse the filth abounding in public today."

With the overall ideological framework of these five commitments, the BJP will take a flexible stand on other issues.

Other items listed in the policy document include electoral reforms, a planning and industrial policy to end concentration economic power be it in industry, business or agriculture,

INDO-UAE JOINT COMMISSION DECISIONS TOLD

Bombay THE TIMES OF INDIA in English 21 Dec 80 p 9

[Text]

NEW DELHI, December 20.

DECKS have been cleared for major investments by the United Arab Emirates in oil refining and hotels and hospitals in India. The two countries are expected to collaborate in a sponge iron plant in the UAE, based on Indian iron-ore and indigenous gas.

A proposal for a 12-million tonne refinery envisages equal financial participation and production sharing by the two countries. The UAE has agreed to raise its crude supplies from one million tonnes to 1.5 million tonnes next year and also to consider long-term arrangements for additional crude supplies.

A breakthrough in economic collaboration between the two countries was made during the meeting of the Indo-UAE joint commission held here today.

The minister of state for foreign affairs of the UAE, Mr. Rashid Abdullah Al-Noaimi, and the external affairs minister, Mr. P. V. Narasimha Rao, led the two delegations. The Indian team included Mr. Romesh Bhandari, secretary in the ministry of external affairs.

It was decided to set up an Indo-UAE investment corporation. Talks would begin soon for quick implementation of projects and joint ventures. The UAE would send a team of the Abu Dhabi fund for Arab economic development to India for discussion.

The next meeting of the joint commission will be held in Abu Dhabi next year and both the leaders hoped considerable progress would have been made by them in further strengthening the economic ties.

Mr. Rashid Abdulla, who is leading a 19-member delegation, called on the Prime Minister, Mrs. Indira Gandhi, yesterday and had a separate meeting with the external affairs minister. The Iran-Iraq conflict figured in the discussions of the two foreign ministers.

KERALA BJP LEADER SAYS MARXISTS ABUSE LAW

Bombay THE TIMES OF INDIA in English 21 Dec 80 p 12

[Text]

TRIVANDRUM, December 20.

THE Kerala chairman of the Bharatiya Janata Party, Mr. C. Rajagopal, today accused the CPM of using the criminal procedure code and the police to suppress the opposion.

He told a news conference that already 104 people — either the BJP workers or the RSS men—had been arrested and harassed according to section 151 of the criminal procedure code throughout Kerala.

This section empowered the police to arrest a person as a preventive measure. In effect, it was as bad as the national security ordinance of the Congress (I), he said.

His claim was that while the Congress (I) was resorting to the national security act, the CPM was misusing existing laws for the same purpose. The CPM chief minister, Mr. E. K. Nayanar's claim that Kerala would not use the national security act was only meant to deceive the gullible people, he added.

Mr. Rajagopal said after the CPM-led coalition came to power in Kerala 11 months ago 45 people had been murdered in political clashes.

Kozhikode, Malappuram, Quilon and Wynad were the only districts free from political murders, according to him. He listed the names of victims and organisations involved in the clashes.

Cannanore, the hotbed of political clashes chiefly between the Marxists and the RSS or the BJP workers, claimed 15 lives, Trichur nine, Trivandrum six, Palghat three, Idukki and Kottayam and Alleppey two each and Ernakulam one.

Among the murdered were 18 Marxists, 13 BJP and RSS, six Congress (I), Bharatiya Hind Mazdoor, Janata, NDP, CPI, Congress (U) and independent one each.

He said the local Marxist leaders and the police under their orders were responsible for the deterioration in the law and order situation in Kerala. Where the police remained above the Marxist influence there would be no violence. Where justice was denied to the non-Marxists violence spread under Marxist instigation, he said.

Mr. Rajagopal said the Marxists were choosing the line of political violence out of frustration. The frustration arose from the fact that many of the ideological Marxists were joining the Naxalite movement and others were joining the RSS.

The BJP leader met the Marxist chief minister, Mr. E. K. Nayanar, yesterday and conveyed the party's anxiety over the worsening law and order situation. He requested compensation for the families of the murdered people.

BJP GENERAL SECRETARY TALKS TO PRESS

Bombay THE TIMES OF INDIA in English 15 Dec 80 p 5

[Text]

BOMBAY, December 14.

THE general secretary of the Bharatiya Janata Party, Mr. L. K. Advani, today termed the Maharashtra chief minister, Mr. A. R. Antulay's advocacy of a presidential form of government for the country as a command performance and said all democratic parties should ensure that "this design of the ruling party is frustrated."

He was addressing a news conference here in connection with the plenary session of the BJP, to be held at the Bandra reclamation grounds for three days from December 28.

Mr. Advani said Mr. Antulay's "unceasing campaign against the present constitutional set up" could not be regarded as merely the expression of an individual's views," as the (Union) law minister seemed to suggest the other day."

He looked upon it as a command performance, part of a deliberate design to undermine the faith of people in democracy and to supplant the present system by an autocratic rule for the present and dynastic rule for the future, he said.

Mr. Advani added that Mr. Antulay had shown his hand clearly when he said at the AICC session that the Prime Minister, Mrs. Indira Gandhi, should be named President for life.

HURDLES IN W/AY

The BJP leader listed two hurdles in the way of a change-over — the Keshavanand Bharathi judgment which made a change impossible and the fact that the ruling party did not have a two-thirds majority in the Rajya Sabha.

Mr. Advani said it would be the endeavour of the ruling party to see by 1982 that both these hurdles were overcome. It should be regarded as the duty of all democratic parties to ensure that this design was frustrated.

The plenary session was likely to discuss the political situation in the country in general and the party's organisational strategy for the future and look back upon the performance of the ruling party in one year.

There could be a separate resolution on Afghanistan. The omission of Afghanistan in the Indo-Soviet joint communique was an ominous sign, he said. Both parties were guilty in that one intervened (in Afghanistan) and the other acquiesced in it, he said.

In this context, Mr. Advani said the credibility built up with neighbours had been impaired. The country's credibility in the international field had been weakened.

It would be for the subjects committee to decide on the topics and the number of resolutions to be adopted. A statement on economic policy would be made at the session. Final shape was being given to it by a sub-committee which had discussions with economists and former members of the planning commission.

The people were disillusioned with the present situation and the ruling party and were groping for "an alternative focus of faith." It would be the BJP's earnest endeavour to provide this 'focus of faith' and restore the confidence of the people in the political system.

Asked about Mr. Morarji Desai's statement that the USSR had asked him to launch an attack on Pakistan, Mr. Advani said he was not aware of the position, but would only say that Mr. Desai would not tell an untruth.

LAWYERS' CONVENTION

A "national convention of lawyers for democracy" would be held at Bandra (at National College) on the eve of the BJP session on December 27 and the lawyer-delegates attending the plenary session would be requested to come one day earlier and participate in the convention. Mr. Advani said. Mr. Ram Jethmalani would preside over the convention.

Arrangements for the three-day session were on and the city unit of the party was well set to give a fitting reception to more than 25,000 delegates expected to participate. Of them, nearly 8,000 delegates would come from the four southern states.

A township, "Samatanagar", was being constructed at the venue. The national executive of the party would meet at the venue for two days on December 26 and 27. A presidential procession from the venue to Shivaji Park would precede the plenary session and a public meeting at Chowpatty would mark the conclusion. A women's conference would be held on the second day of the session.

CSO: 4220

CPI(M) LEADER REPORTS ON KERALA CONFERENCE

New Delhi PATRIOT in English 14 Dec 80 p 4

[Text]

CALCUTTA, Dec. 13.

MR Benoy Chowdhury, president of CP-M-led kisan sabha and the Minister of Land Reforms, on his return from the all-India conference of his organisation held in Kerala, has made a major announcement.

Mr Chowdhury told a press conference here that in the Kerala conference they have decided to strive for the broadest possible alliance of peasant organisations to defend and further the interests of the rural proletariat and small and medium farmers all over the country.

The endeavour of his kisan sabha, Mr Chowdhury explained, would not only be to forge understanding with the left-led kisan organisations and their allies, but also simultaneously attempt to bring into their struggle the Cong-I-led peasant bodies. After all the rural poor and small and medium farmers, irrespective of political persuasions, as a class, suffer from the same disadvantages stemming from imbalance of trade between manufactured produce and those of agriculture, in addition, this is compounded by the rapacious role of the grain traders and various other middlemen.

For instance, Mr Chowdhury added, within a year alone the price of a manufactured direct input for agriculture, namely fertiliser, has gone up by 37 per cent, while the prices of other essential consumer items like fuel, cloth, edible oil etc are also sky-rocketing daily.

KISAN MARCH

Purely on these considerations, Mr Chowdhury informed, his organisation supported the struggle of Nasik kisan and is a part of the six-party kisan march in Maharashtra. Even Cong-I peasants are sympathetic to it.

Mr Chowdhury, however, stressed that his organisation along with its partners and prospective allies would launch movements in order to ensure that the genuine discontent of rural poor and working peasants is not headed by the rural rich. In the present situation, this tend happens wherever the left is weak and the Cong-I is either clandestinely helping the kulaks or is inactive.

From what Mr Chowdhury said it was obvious that the organised peasant bodies are still largely in the formative stage, excepting partly in West Bengal and Kerala. The total strength of the Marxist-led kisan sabha, Mr Chowdhury informed, is 45 lakhs, out of which West Bengal alone accounts for 32 lakhs, followed by Kerala and then at a much lower level, States like Andhra, Punjab, Tamilnadu etc.

This organisational weakness evidently often allows the rural rich the option to disorient the discontent of actual sufferer in the villages for their own narrow purposes.

CPI(M) POLITBURO COMMENTS ON BREZHNEV VISIT

Calcutta THE SUNDAY STATESMAN in English 14 Dec 80 pp 1, 9

[Text]

NEW DELHI, Dec 13.—The CPI (M) Politbureau has welcomed Mr Leonid Brezhnev's recent visit to India in relation to what it perceives "a rapidly deteriorating international situation following the aggressive reversion to cold war policies of the USA, a military threat to India via Pakistan and the U.S. presence in the Indian Ocean".

The Marxist Communist leadership says that the joint declaration signed at the conclusion of Mr Brezhnev's talks with the Government of India is a "positive factor" in favour of peace forces in the world and "a big rebuff to the U.S. warmongers and their supporters, including those in our own country".

The CPI(M), which has come closer to Russia in recent months, has, however, avoided to equate China with the USA, as the pro-Moscow CPI has done in its welcome reaction to Mr Brezhnev's visit. The CPI leadership had said yesterday that the Soviet troops in Afghanistan would leave that country and a political settlement reached "the moment intervention through the armed gangs (Afghan rebels) is stopped by the U.S., Chinese and Pakistani axis".

The CPI(M) Politbureau also points out that the visit of the Russian leader took place in the midst of "serious accumulation" of rams across the border, including preparations for the production of atomic weapons and open conspiracies against the integrity and sovereignty of India.

The party leadership also says various elements in India, not excluding some in the ruling Congress (I), also had been making efforts to get India to change its position, especially on Afghanistan. The Politbureau seems happy because the efforts of such elements to make the Government of India condemn the military presence of Russia in Afghanistan have not succeeded. The CPI(M) Politbureau statement says that this is clear from the Indo-Soviet joint declaration.

The CPI(M) agrees with the statement made by Mr Brezhnev that once the activities of intervention against Afghanistan are ended, prerequisites will emerge for the full political normalization of the situation, including withdrawal of Soviet troops.

The Marxist Communists are also happy because Mr Brezhnev's visit has strengthened the Indo-Soviet friendship treaty. Significantly, the CPI(M) Politburo is silent over the effects the Brezhnev visit will have on efforts to normalize relations between India and China.

The statement contains a line on the South-East Asia region. It, however, only quotes the joint declaration calling for "a normalizing situation in that area for making it a region of durable peace and stability".

The CPI(M) leadership has described as "very important" Mr Brezhnev's five-point plan for the Gulf States and hopes that it will find support from all those who have been concerned with the U.S. military build-up in the region.

PTI adds: The highest party and State organs of the USSR, the Politburo of the Soviet Communist Party Central Committee and the Council of Ministers, yesterday approved the Indo-Soviet joint declaration signed in New Delhi on conclusion of Mr Brezhnev's visit. They proclaimed that friendship between the two countries was not directed against any other country.

The Politburo described Mr Brezhnev's visit as an important historic milestone in consolidating friendship between the two countries, whose durable foundation, it said, was the treaty of peace, friendship and cooperation.

The Chinese Deputy Foreign Minister, Mr Han Nianlong, today termed as "hypocritical" the Soviet President, Mr Brezhnev's invitation to China, America, Japan and others to join Moscow in a network of guarantees against foreign military bases, development of nuclear weapons and use of force in the Gulf.

MONGOLIAN DELEGATION CALLS ON PRESIDENT

New Delhi PATRIOT in English 14 Dec 80 p 10

[Text]

A five-member Mongolian parliamentary delegation headed by Prof Bazaryn Shirendyb, Deputy Chairman of the Great People's Khural and President of the Mongolian Academy of Sciences, arrived in the Capital on Saturday at the invitation of the Lok Sabha Speaker.

The delegation, which comprises chairman of the GPK's standing committee for legislative Proposals and nationalities Tserendashyn Naansarai, member of the GPK's standing committee for culture-education-health Bugagyn Nasanjargal, Mr W Wengchindorj and Mr T Erdenebold (from the GPK's legal department presidium), was warmly welcomed at Delhi airport by the Lok Sabha Deputy Speaker G Lakshmanan.

Later, the delegation called on President N Sanjiva Reddy and handed over a message from Chairman of the GPK Presidium Y Tsedenbal. The delegation members had a half an hour cordial talks with Mr Reddy.

At a press conference in the Mongolian Embassy the delegation members said that they had also brought a message from Mr Tsedenbal (who happens to be the President of Mongolia besides being first secretary of the Mongolian People's Revolutionary Party) for Mrs Indira Gandhi

In a written statement, the delegation members affirmed that being an Asian country Mongolia was 'vitally interested' in establishing 'durable peace and stability' in Asia.

Asked if the recent changes within China had led to any alteration of the Chinese foreign policy in relation to Mongolia, Mr Namsrai said Peking continued to pursue 'great power expansionist policy towards Mongolia' carrying on their subversive activities and ideological propaganda against the MPR.

CPI LEADER ISSUES STATEMENT ON GANDHI APPEAL

New Delhi PATRIOT in English 14 Dec 80 pp 1,5

[Text]

CPI general secretary C Rajeswara Rao has stated that Mrs Indira Gandhi's appeal for reconciliation on national issues which she made at the recent AICC-I sesion in Delhi, 'is meant only for public consumption and cannot be taken seriously by Left and democratic forces'.

In a statement on Saturday, Mr Rao took strong exception to the fact that Mrs Gandhi had not uttered a word of protest against the dangerous 'hysterical demands' some of her important followers made at the session for reimposition of emergency and suppression of mass movements with an iron hand. This approach he said, was sufficient to show that she was not serious in her appeal for reconciliation.

Elucidating the CPI position in this complex situation, he states: 'While making common cause with all possible forces for strengthening the progressive foreign policy of the country and defending our national security the CPI will not flinch from making any kind of sacrifice in defence of the interests of our people and the unity and integrity of our country'.

He said whatever might be Mrs Gandhi's attitude towards the Left and secular democratic parties in future, 'they will not desist from the path of channelling the mass discontent into united mass movements for getting relief for the people, while at the same time, fighting the reactionary and divisive chauvinist and communal forces'.

ANTULAY'S CAMPAIGN

Mr Rao assailed Maharashtra Chief Minister A R Antulay for openly decrying parliamentary democracy as the 'fountainhead of all evil' in the country. 'Antulay', he said, 'is running riot running down parliamentary democratic system day in and day out. Obviously Mrs Indira Gandhi is bent upon introducing the presidential system in our country when she gets a chance'.

Sharply denouncing the move, Mr Rao stressed that the presidential system would be the single biggest factor of destabilisation in a country like ours with all its diversity.

He said the political resolution of the AICC-I session was fully in tune with the Congress-I's economic policies and draconian repressive law as it tried to lay the entire blame for the present situation on the Left and secular-democratic parties.

In this context he sarcastically referred to Mrs Gandhi's attack on the 'co-called Left' at the civic reception to Mr Brezhnev. This took place when she was claiming that she was being obstructed in her efforts to end economic inequality and social injustice and completing the 'infinished revolution'.

Mr Rao pointed out that the Left and secular-democratic parties were not responsible for anarchy and chaos but the 'anti-people policies of the Congress-I Governments, alongwith the activities of the reactionary forces'. He also noted that the deteriorating law and order situation under the Janata was no better under Mrs Gandhi's regime. The police itself was the biggest culprit as reflected in the Baghpat atrocity on a woman and the blinding of undertrials in Bhagalpur.

He further urged the Congress-I not to disturb the legitimately elected State Governments of West Bengal, Tripura and Kerala and respect the electoral verdicts there in the same way as the AICC-I resolution wanted the Opposition to respect the electoral verdicts elsewhere.

GANDHI CLARIFIES STAND ON GOVERNMENT FORM

Bombay THE TIMES OF INDIA in English 12 Dec 80 p 9

[Text]

NEW DELHI, December 11 (PTI):

THE Prime Minister, Mrs. Indira Gandhi, has categorically ruled out proportional system of representation and denied any suggestion that she was advocating any particular form of government.

Referring to the debate on the presidential form of government, Mrs. Gandhi said she was not for or against it. She had only said that there should be a public discussion on all forms of government. Every system had its good points and deficiencies.

In an interview to a correspondent of "Le Figaro" recently, she reacted with surprise at the suggestion that the Soviet President, Mr. Leonid Brezhnev's visit was fixed in a hurry as a reaction to Mr. Ronald Reagan's election as President of the United States. The visit, she reminded the correspondent, was fixed long ago and finalised when President Sanjiva Reddy visited the USSR.

Asked whether in view of the failure of non-aligned group to do something effective in Afghanistan and the Iran-Iraq conflict, the movement served any purpose, Mrs. Gandhi said its validity should not be judged only with reference to these two issues.

Non-alignment was essential for peace, she said but conceded that divisions within the movement made it less effective.

Mrs. Gandhi said it was in everyone's interest that the Iran-Iraq war should end because not only both the countries were being hurt but also there was chance of its spreading. But it was wrong to think that if India came out and took sides, it would help.

Asked about her reaction to the US presidential election, Mrs. Gandhi said she had all along expected Mr. Reagan to win. As far as India was concerned, there was no difference between Republicans and Democrats and there were individuals in both camps who had been sympathetic to India.

The Prime Minister said she wanted American people to know that India was not against them. In the long run, everybody wanted peace and "we are for peace.

Replying to a question on China, Mrs. Gandhi said it was claiming land not only from India but from Burma, Vietnam and Malaysia.

TAMIL NADU FORMS BACKWARD CLASSES CORPORATION

Madras THE HINDU in English 14 Dec 80 p 1

[Text]

THANJAVUR, Dec. 13.

With view to improving the economic conditions of backward classes, the State Government has decided to form the Tamil Nadu Backward Classes Economic Development Corporation.

Announcing this, Mr. D. Sundaresan District Collector, said here on Saturday that the Corporation would provide margin money to backward classes at low interest rates. It would also enable them to take up trading, commercial and industrial activities.

The corporation would secure finances from the State Government, banks and other sources and would participate vigorously in the Integrated Rural Development Programme, Small Farmers Development Agency and other economic programmes of the State.

The Corporation would be registered as a Public Limited Company with an authorised share capital of Rs. 10 crores divided into ten lakh equity shares of Rs. 100 each. The Government would release the share capital of Rs. one crore during this year.

The Commissioner and Secretary to Government Social Welfare Department would be the Chairman. The Corporation would have three other official members. The Director of Backward Classes would be Managing Director. Two non-official members would be nominated separately.

The Government had sanctioned Rs. 1 lakh towards registration of the corporation and for other incidental expenses.

GANDHI SEEKS FORMULA TO DEFINE BACKWARD CLASSES

Madras THE HINDU in English 13 Dec 80 p 7

[Text]

NEW DELHI, Dec. 12.

The Prime Minister, Mrs. Indira Gandhi, said today that a widely acceptable formula for categorisation of backward classes should be devised.

There was a controversy whether the economic factor or caste should be the basis for determination, she said addressing the valedictory function of the Backward Classes Commission.

The Commission, headed by Mr. B. P. Mandal, is likely to submit its report to the President by the end of this month.

Mrs. Gandhi said categorisation of backward classes had always been difficult.

"Sometimes it seems to us that there is a competition to be categorised as backward classes", she added.

The Prime Minister said the Directive Principles and other provisions in the Constitution enjoined upon the State to make special provisions for the uplift of weaker sections of the society. "These provisions reflect the nation's understanding of the problems of weaker sections".

The provisions, however, were not intended to create new disparities, but to redress the grievances, she said.

"We are committed to a secular, socialistic society and planned development of the country. This is meaningful only when the backward classes are helped to share the progress", the Prime Minister said.

The Prime Minister said the question of backward classes did not concern them alone "It was a national question".

She said that the recommendations of the Commission, set up in January, 1979, would receive full consideration from the Government.

"We would be righting the longstanding wrong", Mrs. Gandhi added.

In his address the Home Minister, Mr. Zail Singh, said the Congress(I) and the Government were committed to uplift the weaker sections of the society.

"Loopholes Plugged" Welcoming the Prime Minister, Mr. Mandal said his commission had tried to improve upon and plug the loopholes in the Kaka Kalelkar report submitted in 1955.

Mr. Mandal said the Commission had adopted a multiple approach for collection of evidence and the report had "very solid and very extensive data base".

The backward classes reposed high hope in the Government's positive response to the recommendations, he said.

"If this report also meets the same fate as that of Kaka Kalelkar commission, the legitimate hopes and aspirations of the socially and educationally backward classes, which constitute a bulk of our population, will be dashed to the ground" Mr. Mandal pointed out.

The terms of the six-member Commission were to:

Determine the criteria for defining the socially and educationally backward classes; recommend steps to be taken for their advancement; and examine the desirability of reserving jobs for those not adequately represented in public services and posts connected with the affairs of Union or State.—PTI.

GANDHI SPEAKS AT KOLAR GOLD MINES CELEBRATION

Bombay THE TIMES OF INDIA in English 21 Dec 80 p 9

[Text]

KOLAR GOLD FIELDS, December 20.

THE centenary celebrations of the gold mines here today saw the Prime Minister, Mrs. Indira Gandhi, reiterate the vital role of gold in economy.

Gold standards might have been replaced but the standard of gold continued to fly high and gold mocked at economists from the vaults of central banks, she said.

Mrs. Gandhi remarked that the policies of various governments over the years had consolidated the hold of gold as the only store of enduring value in a world of depreciating currencies and undependable financial assets.

Fortunately, some changes had occurred in the relative scale of values. Today, gold was challenged as a medium of exchange. It had to compete with art and antiques in its role as a store of value. Real estate was another powerful rival. In international banking, there were "SDRs" (special drawing rights) and petro-dollars.

Mrs. Gandhi's remarks on the role of gold were considered important in economic circles. These were coupled with an announcement by Mr. Pranab Kumar Mukherjee, Union commerce minister, that the government had chosen to place increased emphasis on locating gold reserves in the existing gold mines and also in new areas.

NEW MINERAL POLICY

Mrs. Gandhi spoke of the need for a new mineral policy, which would take care of both conservation and development aspects and aim at and achieve self-reliance in as many minirals as possible.

Mineral resources were not renewable and the needs of the future generation had to be kept in mind. She also stressed the importance of the ecological aspect. Of 65 minerals produced in the country, 36 were from small deposits and mines, which should be encouraged to adopt scientific mining methods and take care of the welfare and safety of miners.

This mining town rose to the occasion to celebrate the hundredth year of organised gold mining in the area, initiated by John Taylor and Sons, a British firm. The undertaking was nationalised 25 years ago.

Workers in their thousands were present at a rally addressed by Mrs. Gandhi. Also present were some former employees — Mr. Alexander Cave, superintendent of the Champion Reef for 36 years, now settled in Australia. Mr. R. S. Stapleton, retired chief engineer, Mysore mine, who like his father, served the gold mines for many years, and Mr. Max Dunlop, retired electrical engineer.

The function was presided over by Mr. John, the oldest employee with 48 years of service, who joined as a fitter. His father and grand father too were employees of the gold mines.

The Kolar gold mines are among the deepest in the world and, as Mrs. Gandhi mentioned, their resources are virtually becoming exhausted. However, the high international gold price has given a new lease of life to the mines for at least 20 years.

Bharat Gold Mines Ltd., a government of India undertaking in charge of the mines, is gearing itself to exploiting lower grade ore available in substantial quantities. Old tailings will be re-treated. Exploration for gold in the southern and northern extensions of the mining belt are being intensified.

According to the Union commerce minister, two small gold prospects have been located in the Mallpakonda and Chigarguntu areas of Chittoor district in Andhra Pradesh. A feasibility report on developing the Yeppamane mine in Anantapur district in Andhra Pradesh is being prepared.

Drilling at Hutti gold mines, located in Karnataka, where sporadic gold values as high as 14 to 15 grams per tonne of ore have been found, is continuing. Another area of exploration is Gadag, also in Karnataka. Exploratory work is also being done in Singhbhum district of Bihar and Keonjhar District of Orissa.

Mr. Mukherjee announced that the Central geological programming board had formulated a five-year plan (1980-85) for a systematic study of old gold workings. The scheme included seven projects in Karnataka, three in Andhra Pradesh and one each in Kerala, Tamil Nadu, Orissa and Bihar.

Mrs. Gandhi stated: "We are entering an era of prospecting in the oceans." The results in this sphere were slow and hard to reach, but in today's world, many other minerals (apart from gold) were no less sought after — petroleum, called liquid gold, coal, "black gold," and uranium.

The oil crisis had made all nations realise that the easily exploitable resources of the earth were limited. As petroleum became dearer, industries were paying attention once again to coal. There was increasing recognition of the need to conserve mineral resources, minimise waste and optimise benefits.

PLANT INAUGURATED

Going back to the past, Mrs. Gandhi explained how gold had attracted men and women from the dawn

of civilisation. Many museums preserved ancient gold jewellery of exquisite beauty. Every language conferred the best qualities on gold.

There were golden ages in history and people with golden hearts. But, for saints and philosphers, gold was the symbol of greed and irrational elements, which governed human behaviour, for it had wrought havoc and brought in its trail misery, crime and violence.

The centenary celebration of the Kolar gold mines got a new dimension with the inauguration of a scheelite (tungston) plant by the Union commerce minister, who is also in charge of mines.

Tungston will be recovered from gold-bearing ore and tailing sands. At present, all the tungston available in the ore is lost. At the same time, the country is importing tungston. The tungston plant, besides being a conservation measure, is import-saving, adding to the financial strength of Bharat Gold Mines Ltd

Mr. C. M. Stephen, Union communication minister, presented to the Prime Minister an album of stamps brought out by post and telegraphs to commemorate the centenary of the gold mines.

CORRESPONDENT TELLS STORY OF KOLAR GOLD MINES

Calcutta THE SUNDAY STATESMAN in English 21 Dec 80 p 7

[Text]

BANGALORE, Dec. 26.—Systematic exploitation of gold at Bharat Gold Mines, whose centenary celebrations were held in Kolar today, began only in 1880 when Messrs John Taylor and Sons, a British company, in the Kolar area paid a royalty to the Government of the Maharaja of Mysore. For 76 years the company mined gold and made it a profitable venture. In order to do this it went as deep as three km, making KGF the deepest mine in the world.

In 1956, the then Government of Mysore, under the Chief Ministership of the late K. Hanumanthaiya, nationalized the mines by paying the British company a compensation of nearly Rs 2 crores and renamed it as the Kolar Gold Mining Undertakings. After working the mines for six years during which time the State Government found it hard going because of diminishing yield and high cost of production, the Government of India took over the management in 1962. For 10 years it was run a departmental undertaking by the Economic Affairs Department of the Finance Ministry. In 1972, it was converted into a public sector company and renamed Bharat Gold Mines Limited.

In the last 100 years the Kolar Gold Fields area has yielded 785 tons of the precious metal worth over Rs 12,000 crores. Last year the mines produced 1,650 kg of gold and in the current year the estimated production will be 1,778 kg. But this is nowhere near the world production, which is about one million kg. Over 85% of the world's gold comes from South Africa, the Soviet Union, Canada and Australia.

Gold is produced in India in three States—Karnataka, Andhra and Bihar. The contribution of Andhra and Bihar is almost negligible. Almost the entire Indian output comes from Karnataka which has two gold mining areas, the Kolar Gold Fields and the Hutti Gold Fields (in Raichur district, about 400 km from Bangalore). The Kolar mines contribute nearly 75% of the total output.

Gold mining in Kolar is confined to a small area, 3 km long and 2 km wide. In this small area man goes down to a depth of 3 km to bring out the yellow metal. During the last 100 years, 46.5 million tons of the gold-bearing ore has been mined and 785 tons of the metal recovered.

The mining for gold at KGF has passed through many vicissitudes. At one time it looked as though the mines would have to be closed because of the high cost involved in working it and fall in production. Added to this the cost of production was higher than the Indian and international market prices for gold.

What saved the industry and gave a new lease of life for KGF was the spurt in world market prices for gold in recent years and the discovery of a new oil-bearing reep in the area. This is reflected in Bharat Gold Mines earning a record profit of Rs 3.3 crores last year, the highest in the last 23 years.

Since last year, the Geological Survey of India and Bharat Gold Mines have taken up an intensive programme of gold exploration. They are carrying out exploratory activities in the Mallappakonda and Chigarkunta hill areas in the southern extension, the Manighatta area in the northern extension and Ratrayaswamy block of KGF.

DELHI REPORTED CONCERNED OVER GROWING DEFICIT

Madras THE HINDU in English 14 Dec 80 p 13

[Text]

MADRAS, Dec. 13.

the Union Commerce Minister, Mr. Pranab Kumar Mukherjee, said here today that the Centre was concerned about the widening trade gap, which was expected to touch the figure of Rs. 4,000 crores by the end of the year. "Therefore, concerted efforts have to be made to reduce the trade deficit", he told newsmen at the Raj Bhavan.

Mr. Mukherjee who arrived this morning from Delhi en route to Kumbakonam said one of the ways to reduce the gap was to restrict imports, confining it to oil, critical inputs, essential equipment and technology. Imports of consumer durables and other types of goods could be stopped and the country should be made self-reliant in these respects.

The Minister said in the current year alone, import of aluminium, cement and edible oils so far had accounted for around Rs. 2,000 crores. If only production of these commodities within the country were stepped up, he was sure that there could be a saving of nearly Rs. 1,000 crores in foreign exchange.

Mr. Mukherjee envisaged that the current decade would be one of deficit in foodgrains throughout the world. India should mount an all-out effort to produce more foodgrains so that the country could reach a position of "net exporter of food during the 1980s".

The Minister felt that if the country could increase its total food production from the present 160 million tonnes to about 200 million tonnes, he did not expect any difficulty about the country exporting foodgrains. He felt that the quantum of import of edible oils was "rather on the high side".

The Minister said this situation could not be attained overnight, but felt it should be possible over the next three years, for which a beginning had to be made right now.

'Outlook for Steel Output Bright'

He found that the outlook for steel production had brightened, because from a deficit of two lakh tonnes some time back, production had picked up and the gap had been reduced by one lakh tonnes.

In the case of aluminium, the production of the metal which was 1.8 lakh tonnes sometime ago, had been stepped up to two lakh tonnes. A similar attempt could be made in the case of cement also, he said.

Our Tiruchi Staff Reporter writes:

Mr. Pranab Mukherjee said even after pumping in substantial amount as subsidy, the public distribution system had not given us satisfaction. The system was meant to protect the consumers' interests and peg prices at reasonable levels, he told pressmen in Trichy on his assessment of the working of the public distribution system.

To a question, Mr. Mukherjee said the Centre had no proposal to nationalise the private trade. Private trade had its own role to play and would be allowed to do so.

About the prospects of extension of the free trade zone from the eastern sector to other sectors, the Commerce Minister replied that any unit which is 100 per cent export oriented would receive all the facilities of the free trade zone.

Answering questions on replacement of Sales Tax by Excise levy, the Minister said a committee with some Chief Ministers had been constituted to go into this issue and the rationalisation of the sales tax structure.

CSO: 4220

INDIA REPORTED TO DEVELOP MISSILE CAPACITY

New Delhi PATRIOT in English 13 Dec 80 pp 1, 7

[Text]

INDIA has achieved the capability to manufacture and launch intermediate-rang ballistic missiles, space research scientists have said.

Basic capability has been achieved not only in the booster technology, which in fact is smoothly progressing towards sending high-altitude heavy weight satellites in orbit, but also in essential systems for payload and booster guidance, re-entry, mobile ground control telemetry and higher resolution optical and infra-red sensing devices.

The senior science managers of India's space programmes point out that the research is committed to peaceful needs as a matter of policy. However, they say, the project engineers and scientists working on the Satellite Launch Vehicles (SLV)—SLV-3 was launched successfully in July this year—and its successor systems have developed a pool of information and technology which will make India self-sufficient in all respects of boosters.

Experimentally, highly technical systems of heat protection and guidance have been test-rsted, it is learnt. 'All they need is further refining, a senior scientists said when talking of sensitive trajectory and position correctional instruments now being developed for the peaceful space programme.

Although Indian Space Research Organisation chief Prof Satish Dhawan described the traditional 'ablative heat shield' systems as being in a primitive stage, scientists say they have solve the heat shield problems through basic research for the protection of the payload both through launch and through re-entry when it has to face more vicious forces of resistance and heat. An ablative heat shield removes the heat by melting itself with the molten bits thrown off. The coated fibre glass heat shields for the payload during the launch on the other hand act as a physical and insulating bulwark

According to scientists, the factors concerned in re-entry of missile payloads are guidance through the launch, guidance of the payload during the ballistic trajectory back to earth (when the booster is no longer aiding its movement, and the forces of gravity have taken over), the finding of the 're-entry window' through the outer layers of the earth atmosphere, and high resolution sensing systems operating on either infra-red heat-seeking principles or pre-programmed terrestrial coordinates.

Launch guidance systems have been thoroughly tested and the principle was used in the successful SLV-3 and other minor launches preceding it.

For the booster itself, rapid research in the last five years has shown India's competence in both solid state rocket propellents —some of which are said to be better than similar polymer fuels developed in other countries—as also in liquid propellent motors. Development is now under way to refine the liquid fuel motors for using liquid hydrogen instead of hydrazine which is now being used in the fourth stage motors of SLV-3.

'BLACK BOX'

At the heart of the guidance system is a 'black box' which is a super-secret gyroscopic arrangement which senses the position of the rocket and payload. Hitherto, even in the high secrecy field of rocketry, the inertial guidance system, was the most secret of all components. So much so that a simpler device used in commercial aircraf for their autopilot systems is sealed by the manufacturers with the condition that any buyer country which has the aircraft cannot open it. The purchase contract is terminated automatically if the seal is broken, and an embargo placed on all spare parts and facilities.

Indian scientists have developed this black box 'ab initio,' based on their own research, and numbers of them are being fabricated.

The other important part is the sensing device that can locate any area on earth, or for that matter a distant star in a galaxy. Research now underway seeks to increase the resolution of various types of sensing devices to narrow down the minimum distances the sensor can differentiate.

Once the sensing is done and the position known, the rocket

with its payload has to be controlled at two different points. One is at the moment of re-entry. Because of the earth's atmosphere and the speed of the missile, the payload will bounce off—or skim off—the atmospheric layers if it is not angled properly. This angle of re-entry has to be defined and controlled within small tolerances.

Later, during targeting also, control of the payload is necessary. Indian scientists have already perfected a system of on-board correctional boosters for space use—including the three-directional correctional device which can keep satellites free of unnecessary movement in the pitch, roll and yaw directions.

Research is also under way to further improve on-board computer systems for control and guidance systems, as also for miniaturised mobile telemetry systems.

All these, scientists say, are resultant spin-offs from the space programme which is now entering its second decade in which India hopes to send its first geo-stationary satellite by its own booster launcher from its own launching pad.

The space programme itself, Prof Dhawan said, is committed to peaceful uses of space, specially on agriculture, climate forecast, communications and education.

CSO: 4220

DIFFERENCES AMONG MARXIST COMMUNISTS TOLD

Bombay THE TIMES OF INDIA in English 14 Dec 80 p 9

[Text]

NEW DELHI, December 13.

THE inner contradictions of the CPM has accentuated and this has led to the indefinite postponement of a party delegation visiting Vietnam and Kampuchea for opening a dialogue on establishing relationship with the sister parties there.

This is a clear outward manifestation of the crisis overtaking the party. If it could, the party would not have cancelled the trip, because of the ideological implications, so soon after Mr. Brezhnev's visit. Obviously it thought it prudent to put it off.

Mr. Promode Dasgupta, secretary of the West Bengal unit, making the trip as one of the two members of the delegation, had always been in doubt. But he appears to have given an assurance to the Central leadership about going on the tour when our senior politburo members had gone to Calcutta last week to sort out ideological issues with the state unit.

Mr. Dasgupta, now suddenly changing his mind "for health reasons," indicates that the pressures being exerted on him by the pro-Chinese factions have more destructive potentialities than had been suspected.

He is not a recalcitrant. He is quite prepared to go along with the Central party's ideological formulations. This was indicated by his accepting the Salkhia plenum resolution, reversing his own previous stand. But he carries on his shoulders the onerous responsibility of keeping the diverse elements in the Bengal unit together.

The Central leadership obviously sympathises with Mr. Dasgupta because he is performing a task crucial to the party's future.

The party cannot afford to weaken its Bengal unit, which provides sustenance to the entire CPM movement besides giving important support to the other left parties.

The CPI owes to it all its three MPs from West Bengal and the other regional left parties of the state would be nowhere without being partners of the left front.

The Central leadership was prepared to play it cool for some time, not pushing the ideological issues too hard. The Brezhnev visit appears to have changed the situation.

Apparently, the CPM leadership sees in the visit a new Soviet initiative in the region and wants to be an active participant in it, whatever the objective.

This was indicated by the fact that the party leaders were present in strength at the airport to receive Mr. Brezhnev. They were keen for an audience with the Soviet President, which did not come off indicating continued Soviet reservations against them.

Anticipating this, four senior party leaders travelled to Calcutta on the eve of Mr. Brezhnev's arrival in an attempt to bring the Bengal unit to accept the Central line, ideological issues having now assumed an importance as never before.

They were able to bring round Mr. Dasgupta. But, obviously important elements in the Bengal unit are resisting.

Before long, the Central leadership will have to settle the Vietnam and Kampuchea issue with its Bengal unit. This has become imperative in order to straighten out its ideological line with the CPSU and end its isolation from the regional communist movement. The China line has few takers in the politburo.

It is obviously faced with a dilemma. If it precipitates the issue, it will quite certainly split the Bengal party and weaken it, will mean a serious setback to the communist movement in the country.

MEGHALAYA CABINET RESHUFFLE REPORTED

Bombay THE TIMES OF INDIA in English 12 Dec 80 p 9

[Text]

SHILLONG, December 11 (UNI): The Meghalaya chief minister, Mr. B. B. Lyngdoh, today reshuffled the portfolios among his council of ministers, ending the long speculation about his dropping a cabinet member following certain allegations against him.

The reshuffle came after the induction of one more member to the cabinet this morning raising the total strength of the ministry to 14 including the chief minister.

The political and home (including passport and jails) departments held by the chief minister have now been given to the deputy chief minister, Mr. S. D. Khongwir, from whom finance had gone to Mr. Maham Singh.

The chief minister will hold general administration, district council affairs, election, education, soil conservation, cabinet affairs, general co-ordination of all departments and port-folios not allotted to other ministers.

The newly conducted minister Mr. Endro Iawphniaw, has been allotted community development forests, printing and stationary.

CSO: 4220

NATIONAL PLAN TO INTERLINK RIVERS DESCRIBED

Bombay THE TIMES OF INDIA in English 14 Dec 80 p 13

[Text]

AHMEDABAD, December 13.

A PERSPECTIVE plan to inter-link the Damanganga River with the Tapi and the Narmada rivers has been formulated by the Union irrigation ministry and the Central Water Commission to provide irrigational facilities to about 680,000 hectares of land in the Saurashtra and Kutch regions.

Under the scheme, a link canal has been suggested to run northwards from the Damanganga and connect it with the Tapi and the Narmada rivers. Backed by the construction of as much storage capacity as possible, such a link canal will provide the requisite supply to the Ukai left bank and the Kakrapar left bank canal areas and release about 3.5 million acre feet of Tapi waters which can be used in the lower areas of the Narmada canal releasing in turn a corresponding quantity of water for extension of irrigation to the Saurashtra and Kutch areas from the Narmada high level canal.

It is estimated that the water to become available by inter-linking the rivers will be adequate to provide irrigational facilities to about 680,000 hectares of land in the Kutch-Saurashtra region by providing various alternative alignments at different levels.

The inter-linking of the Damanganga with the Tapi and the Narmada rivers in a part of the "national perspective for the water resources development" plan framed by the Union irrigation ministry to augment the irrigational facilities by inter-linking various major rivers in the country.

The national plan is estimated to cost Rs. 50,000 crores giving additional benefits of 25 million hectares of irrigation by surface waters, 10 million hectares by increased use of ground waters and generation of 40 million kilowatts of power, apart from the benefits of flood control and navigation.

The scheme, the planners believe, will not only be technically feasible but also economically viable when compared to the present cost development of irrigation facilities. The technology proposed in the scheme is already known and tried successfully in the country and do not involve experimentation or research. Besides, it is capable planning and implementation by the Indian experts without any foreign assistance.

By inter-linking various major rivers, the scheme is estimated to benefit nine states covering particularly such areas at present depending on the vagaries of the monsoon. The state-wise benefits worked out by the ministry include availability of additional quantum of six million acre feet of water in Orissa covering an additional 11.71 lakh hectares of land under irrigation, about 24 MAF. of water in Andhra Pradesh covering 46.85 lakh hectares. 6.5 MAF water in Maharashtra covering 12.69 lakh hectares, another 6.5 MAF water in Karnataka covering another 12,69 lakh hectares, about 12 MAF water in Tamil Nadu covering 23.42 lakh hectares, about five MAF water in Kerala covering 9.76 lakh hectares, about 2.5 MAF in Madhya Pradesh covering 4.88 lakh hectares, about 2.5 MAF in Uttar Pradesh also covering 4.88 lakh hectares and about 3.5 MAF in Gujarat covering 6.83 lakh hectares (approximately 17 lakh acres).

In addition, the plan estimates that from the Himalayan rivers development, major irrigation benefits will also go to Bihar and West Bengal besides U.P. while substantial benefits will also accrue to M.P. and it may also be possible to extend some benefits to Haryana, Punjab, Rajasthan and Gujarat.

HELP TO SAURASHTRA

The total surface water available in the country is nearly 1,440 million acre feet but of which only about 220 million acre feet are now being used. The rest is flowing waste causing disastrous floods every year. It has also been assessed that at the most, the plans evolved by various state governments can utilise not more than 540 MAF of water including various inter-state irrigation schemes.

In view of the Narmada tribunal's award giving a share of only nine million acre feet of the Narmada waters to Gujarat, the plan to inter-link the Damanganga, the Tapi and the Narmada will come as very handy to the state government to provide irrigation facilities in the Kutch and the Saurashtra regions which had very little scope of surface water irrigation.

Before the tribunal's award was announced, the state government, hoping for a much larger share of the Narmada waters, had expected to provide irrigational facilities to about 37 lakh hectares of land in the Saurashtra region. The tribunal, however, has since rejected the state's plea to allow it to utilise the surplus water till such time M.P. was in a position to make full utilisation of its share.

The tribunal has made it clear that such surplus water could be used by Gujarat only for power generation and not for irrigation.

COMMERCE MINISTER TELLS STRATEGY TO COVER DEFICIT

Bombay THE TIMES OF INDIA in English 14 Dec 80 p 13

[Text]

MADRAS, December13.

A LONG-TERM strategy to deal with the country's mounting trade deficit by slashing imports of consumer goods and exporting foodgrains was spelled out by the Union commerce minister, Mr. Pranab Mukherjee, here today.

The import of goods, like edible oils, steel, aluminium and cement, could be reduced to the extent of Rs. 2,000 crores, he said. The foodgrain production could be stepped up from 130 million tonnes a year to 200 million tonnes by the end of the decade. However, this exercise could not be begun this year or the next, for obvious reasons. The process could start in a couple of years.

"A beginning can be made immediately" in regard to steel as steel production had gone up this year. Mr. Mukherjee said that the country's trade deficit was expected to go up to Rs. 4,000 crores by the end of 1980-81. The new import strategy would give priority to critical equipment, technology and so on.

The commerce minister said the cutdown would be phased in such a way that imports would be reduced as internal production of the particular commodity — say oilseeds — was stepped up, so that a price spiral would not be created.

As regard the future of the giant Buckingham and Carnatic Mills employing over 10,000 in Madras, now under notice of closure from January 1, Mr. Mukherjee said the Centre would be prepared to take over the sick undertaking only if the workers agreed to rationalisation of the work force, wages and production norms, to bring them on a par with the rest of the textile industry.

He said the Centre had received the report of the chief minister of Tamil Nadu and had already told him about its attitude.

As things stood, with the workers opposing retrenchment and rationalisation as the basis for talks, Mr. Mukherjee said he was "not interested in taking over junk."

"I am interested in creating jobs", he said. "I am not prepared to pump in any more money into the mill if it is not going to be viable. I can invest the same money in some other project and create more employment.

USSR REPORTEDLY WILL SUPPLY INDIA WITH MIG-25S

Bombay THE TIMES OF INDIA in English 14 Dec 80 p 1

[Text]

NEW DELHI, December 13 (PTI): THE Soviet Union is reported to have agreed to supply India with MiG-25 reconnaissance aircraft.

According to reliable sources, the aircraft will be purchased by the Indian Airforce. The number of planes India is likely to purchase is being kept a closely guarded secret.

The MiG-25 is considered one of the most sophisticated reconnaissance planes with capability of flying at very high altitudes.

The Air Force is receiving two versions of the aircraft — trainer as well as reconnaissance. The Russian plane is known to NATO as "Foxbat".

According to defence ministry sources the delivery schedule of MiG-25 has been worked out and the planes were expected shortly.

The reconnaissance plane is fitted with five cameras. The aircraft has various flush dielectric panels and a very small dielectric nosecap for radar. Other equipment is believed to include the doppler navigation system and a side-looking airborne radar. There is no armament in this version of the plane. The MiG-25 was developed as an interceptor in the Soviet Union.

The MiG-25, known as Mach-3 aircraft, is capable of flying at a speed of nearly 2,900 km. per hour.

It has been flown by a number of Russian pilots in speed and height records and has achieved the maximum height of 35,000 metres in a 4 minutes 11.3 seconds.

In 1973 Dr. Robert C. Seamans, the then American secretary of the Air Force described the MiG-25 as probably the best interceptor in production in the world.

Dr. Seamans had said that the Mach-3 aircraft could "perform both interceptor and reconnaissance missions, can operate at 80,000 feet and has highly capable avionics and missile systems."

The first opportunity to study the MiG-25 interceptor outside the Soviet Union came when Lt. Viktor Belenko flew with an aircraft from one of the Soviet bases to Japan on September 6, 1976.

The maximum speed at which the reconnaissance aircraft can fly is reported in the Jane's All The World's Aircraft Book as about Mach 3.2.

INDO-BULGARIAN GROUP HOLDS NATIONAL PARLEY

New Delhi PATRIOT in English 14 Dec 80 p 5

[Text]

The economic progress of Bulgaria, basically an agricultural country, disproved the theory that industrial progress is antagonistic to development in agriculture.

This was highlighted by speakers at the first national conference of the Indo-Bulgarian Friendship Association, on Saturday.

Among the speakers were CSIR vice-president Nurul Hasan, CPI leader N K Krishnan, former Union Minister S.D.Sharma, Cong (U) MP N P Nanda, leader of a Bulgarian delegation P.Cholakov, Bulgarian ambassardor Tocho Tochev.

Presiding over the two-day conference, prof Nurul Hasan said that Bulgaria had made a phenomenal progress in all branches of science.

Referring to the nature and depth of the friendship between India and Bulgaria, he referred to a recent offer made by Bulgaria to bring whatever was available in this country.

Mr N. K. Krishnan drew the attention of bulgaria's heroic struggle against fascism and imperialism which provided inspiration to all those facing such forces.

Dr S.D.Sharma spoke about the support Bulgaria had given to India in her moments of crisis and said that more exchanges of delegations in various fields between the two countries should be encouraged not only at the official level but also at the non-official level.

Mr P.Cholakov said that Bulgaria considered India as one of the most valued friends and hoped that this friendship would continue to grow.

REPORTER DESCRIBES MARATHA LIGHT INFANTRY

Madras THE HINDU in English 12 Dec 80 p 11

[Text]

BELGAUM.

The process of giving the finishing touches to Ganapat is on. What scores of men have been concentrating their energies to achieve perfection is not to be confused with the clay model of Lord Ganesha worshipped by the devout Hindus.

Ganapat is a popular name for the Maratha Light Infantry, one of the oldest and most cherished regiments of the Indian Army.

He is a raw youth, wiry, supple, moderately-built, with a dark complexion: coming from a rural area, he is not even a matriculate. The youth is now at the threshold of realising his long-cherished dream of joining the elite band of Ganapats, who are known for bravery and valour in the midst of adversity.

Only 22 Minutes

In the midst of the thick jungle, infested with wild boars, leopards and snakes, this youth is waiting anxiously for the completion of the final lap of the 10-month training to make him a disciplined soldier. It is at once arduous, a test for endurance, quick reflexes and physical fitness. As he gets ready in his olive-green battle dress, with the slow-loading rifle slung on his shoulder, a mixed feeling of apprehension and confidence grips him. All the theory that has been dinned into his ears all along, is now to be practically applied.

As he and his comrades get set for the kilometer-long obstacle-course, which requires them to negotiate as many as 25 obstacles like crossing ravines, monkey-crawling and sliding through low-wire entanglements, the atmosphere acquires the tone and tenor of a battlefield. A smoke-screen throws a veneer over his movements, while the sound of distant firing fills the air.

Even as the bullets zoom across overhead, he reaches his destination—the firing range. He tackles standing and lying dummies for close bayonet fighting, and with a steadied hand, aims at a target lying 100 metres away with the help of the slow-loading rifle, he is carrying.

All this has to be accomplished in just 22 minutes and most of the time, as the training period reach the finale, he seldom misses the target. Thus begins his career in a regiment, sanctified by the memory of the historic exploits of the greatest of the Indian soldier-kings—Shivaji.

This youth can rise to the rank of Subedar Major, and given a bit of luck and gumption, he can even be in the line for the honorary rank of captain.

Diverse Training

For well-nigh four decades, the 800-acre range, safely ensconced amidst dense forests, 23 km. from Belgaum, has been reverberating with the sounds of rifle shots, and the rhythmic footfalls of trainee soldiers. The approach to the site is rough. There is no movement except of the army vehicles. The undulating terrain, criss-crossed by nullahs and wild jungle growth, is the baptising ground for the infantry in all aspects of warfare.

As Col. N. V. Subbaran, Commandant, Maratha Light Infantry Regimental Centre, puts it, the training area and the immense scope for providing diverse training, has been a special feature of MLI's activities.

Major Kadam, the officer-in-charge of the jungle training camp, says it is possible to give training in the camp in all aspects of warfare, except desert warfare. Not many of the regiments in the country have been blessed with such an all-purpose, training ground as MLI, he says.

Every new batch of recruits, joining the 40-week course, is put through the mill of a four-week obstacle course, to top off the training. "What we give here is a basic course", says Col. Subbaran. An inexperienced youth coming from the countryside is moulded into a soldier and as he returns to the battalion, he gets specialised training.

"In the army, it is training all through", he observes. The recruit learns the use of weapons, like the LMG, Stenguns and SLRs.

The Maratha Light Infantry, which in the words of late Zakir Hussain, a President of India, has added many a brilliant chapter to the glorious annals of the Indian Army, has a more than 200-year-old history, replete with heroic sagas in all major war theatres, relating to the days of the East India Company.

Even since its first battalion, known also as the Jangi Paltan, was made the second battalion of the Bombay Sepoys, in 1768, to protect the East India Company's possessions in the island of Bombay, the MLI has not looked back. It was in 1841, that the 8th regiment Bombay Infantry—now known as the second MLI,—by its stubborn defence of the tribal fort of Kahun, was honoured by being made "Light Infantry" for its "gallantry, prudence, skill under circumstances of unusual trial and difficulty".

Twenty-seven years later, the third and 10th regiments (later the first and 33rd Maratha respectively) were made Light Infantry.

From the jungles of Java, and the barren mountains of Ethiopia, to the deserts of North Africa and mountains and rivers of Italy, the MLI battalions were in the fore front during World War II. Two of its soldiers etched their names in letters of gold in the Scroll of Honour by earning the Victoria Cross.

One of them—Naik Yashwant Ghadge who was leading the rifle section during the Italian campaign in July 1944 was given the award posthumously for his courage, determination and devotion. The other winner of the Victoria Cross was Sepoy Namdeo Jadhav, who showed exceptional bravery and outstanding gallantry during the war in the Italian front in 1745.

After independence too, MLIs' exploits have remained heroic. Besides participating in every armed conflict, starting from the Jammu and Kashmir operation in 1947, to the Bangladesh operation, it has been an active participant in all the theatres of war. The record of the second Marathas as a part of the United Nations Emergency Force in Gaza, in the Middle East in 1962, has been outstanding too.

In the Bangladesh operations, one battalion in the battle of Jamalpur won five Vir Chakras and 2 Sena medals. Its tally of medals since Independence is impressive—four Maha Vir Chakras, 30 Vir Chakras, one each of Ashok and Kirti Chakras, five Saurya Chakras, 41 Sena Medals, 39 commendation cards and 31 mention-in-dispatches. During the 1971 Indo-Pakistan operations, the MLI increased its tally of battle honours by another nine.

Belgaum, a leading town of Karnataka, has been the home of the MLI since 1922. There are barracks that were constructed by the regiments troops over hundred years ago, which are in use even today.

Though originally, it had only the Marathas—the sturdy youths belonging to the caste that goes by that name in Maharashtra—the MLI has been thrown open its door to others too, of late. "We have gone cosmopolitan" says, Col. Subbarao.

The MLI infantry according to available information, is always a step ahead of the others with its brisk 140 paces to the minute, and that is why takes all orders from the "Vishram" position, and marches at the "trial" instead of at the "slope" like other infantrymen. The MLI is the only regiment in the Indian Army, to wear brass shoulder titles with its regimental crest. The battle cry was the traditional "Har Har Mahadev" which was changed over to "Bolo Chhatrapati Shivaji Maharaj ki Jai" from the days of World War II.—Our Hubli Staff Reporter.

PADDY PROCUREMENT FOR 1980 UP BY 1.5 MILLION TONS

Bombay THE TIMES OF INDIA in English 15 Dec 80 p 20

[Text]

NEW DELHI, December 14.

THE paddy procurement this year is far higher than in the corresponding period last year. According to the latest information available with the Food Corporation of India (FCI), official agencies have already purchased over 3.6 million tonnes of paddy under price support operations. This is about 1.3 million tonnes more than the purchases made during the corresponding period last year.

With about seven lakh tonnes of rice coming to the Central grainpool primarily from millers during this period, the total procurement in terms of rice is estimated at about 3.1 million tonnes, against two million tonnes till this date last year.

Although the peak kharif marketing season is almost over, large stocks of paddy are still pouring into the mandis of Punjab and Haryana. Some stocks are also being procured in Uttar Pradesh and Madhya Pradesh.

Punjab continues to maintain its lead in rice procurement. Over 2.5 million tonnes of paddy and nearly 4.5 lakh tonnes of rice have been procured so far in this state alone. In terms of rice, the state's contribution so far amounts to about 2.17 million tonnes. The procurement during the entire marketing season last year was about 2.27 million tonnes. This year, in view of the bumper crop, the procurement is expected to set a new record.

Rice procurement in Haryana so far is estimated at nearly 4.2 lakh tonnes, against 2.7 lakh tonnes in the corresponding period last year. This includes 3.3 lakh tonnes of paddy purchased directly from the growers by official agencies and nearly two lakh tonnes of rice collected from rice mills as levy. The total contribution of this state to the Central grainpool may also exceed last year's level of 5.56 lakh tonnes.

MARKET ARRIVAL

Rice procurement in Uttar Pradesh is also higher this year compared to last year. About 5.1 lakh tonnes of paddy has already been purchased in the state, against only about 9,500 tonnes purchased last year by this time.

Estimates for other states indicate that the rice procurement so far has been over 54,000 tonnes in Tamil Nadu, 43,000 tonnes in Madhya Pradesh, about 42,000 tonnes in Jammu and Kashmir, nearly 36,000 tonnes in Andhra Pradesh, about 7,700 tonnes in Maharashtra and about 9,500 tonnes in Orissa.

Rice millers have bought less paddy in Punjab this year. Of the total market arrivals of about 4.26 million tonnes, millers have purchased only about 17 lakh tonnes. Last year, they had bought over 21 lakh tonnes by this time.

In Haryana millers have mopped up about 11.7 lakh tonnes of paddy out of about 15 lakh tonnes that have reached the mandis so far. The bulk of these stocks would be passed on to the FCI after milling under the levy system in these states.

TATA INSTITUTE SCIENTISTS SEEK LOST BALLOON

Madras THE HINDU in English 13 Dec 80 p 1

[Text]

HYDERABAD, Dec. 12.

Ships of the Indian Navy and radars of the Meteorological and Civil Aviation departments are now scanning the skies to locate a giant balloon carrying a 900-kg infra red ray (IR) telescope, the heaviest payload ever launched from a balloon in India.

At the national balloon facility of the Tata Institute of Fundamental Research (TIFR) here, from where the zero-pressure polyethylene balloon with a gross lift of 1850 kg was sent up, scientists are "praying that the wayward balloon should somehow drift back inland."

The 1.31-lakh-cubic-metre balloon, which took off at 8.50 p.m. on Wednesday, was to release the infra red ray telescope through a twin parachute at about 6 a.m. yesterday somewhere near Yadagiri in Karnataka. The payload failed to get released owing to a malfunction of the release mechanism, with the result that the balloon and the payload reached the programmed altitude of 32 km, which is the stratospheric region, and drifted towards the west coast.

The ground control at the balloon facility and the Selenia radar at the air traffic control (ATC) at the Begumpet airport lost contact with the balloon at 7.11 a.m. on Thursday when it was 250 km south-west of Hyderabad.

Good News

As the scientists waited anxiously for four hours, in came the good news that the radar at the Santa Cruz airport in Bombay spotted it 180 nautical miles off Bombay. The TIFR headquarters in Bombay requested the airport to track the balloon.

The ATC at Santa Cruz kept feeding the balloon facility here with the balloon flight position regularly and at 5.25 p.m. on Thursday it crossed the coast and headed on to the sea, 164 nautical miles south of Bombay. The Santa Cruz radar also lost track of the balloon at 7.20 p.m. (Thursday) when it lay 196 nautical miles off Bombay.

Mr. R. T. Redkar, scientist in charge of the TIFR balloon facility, told THE HINDU this morning that the radar at the Colaba regional meteorological centre tried in vain in the early hours to track the balloon. Besides the radars, ships of the Indian navy have also been requested to help locate the balloon.

Anxious Moments

The launch of the balloon itself was dramatic. After days of waiting, the surface and upper wind data were found to be favourable and all was set for the launch on Wednesday night. At exactly 8.50 p.m. the giant balloon fluttered in the wind and then moved horizontally over the ground some distance picking up on its way the IR telescope attached to a launch vehicle.

As the payload did not come off smoothly, the ascending craft lifted the front wheels of the vehicle and spun it round. The sophisticated IR telescope hit the ground and was dragged a few yards. Scientists watched breathlessly as the balloon, instead of picking up altitude, moved horizontally, narrowly missing the roof of the BCIL complex nearby.

As the ballast (iron powder) was shed, the balloon rose and the relieved scientists at the TIFR control room found that by 10-15 p.m. the balloon had entered the 'critical' tropopause region (altitude 15-17 km) where several balloons in the past had burst on encountering extreme cold. Within minutes of the launch it was also clear that the IR telescope did not suffer any serious damage and was sending data normally.

Dr. T. N. Rangarajan of the TIFR School of Physics, Bombay, said they had carried out checks on some planets and other astronomical sources with the IR telescope in the far infra-red region lying between 40 and 200 microns. "We are satisfied with its performance."

Barring some anxious moments at the time of the launch, the balloon performed all the tasks set for it. It reached the altitudinal ceiling of 32 km and stayed aloft for six hours before slightly coming down at dawn.

Scientists were only sorry that because of the failure of the release mechanism, the sensitive IR telescope, representing three years of ceaseless effort, seemed destined to go waste.

KAUL: FOREIGN EXCHANGE NEEDED FOR OIL IMPORTS

Bombay THE TIMES OF INDIA in English 21 Dec 80 p 7

[Text]

BOMBAY, December 20: Mr. P. K. Kaul, secretary in the ministry of commerce, has called for serious and concerted efforts to increase exports to earn as much foreign exchange as possible to meet the staggering oil import bill of Rs. 500 crores a year.

Mr. Kaul, speaking at the awards function of the Engineering Export Promotion Council (EEPC) (western region) here today, felt that engineering goods exports could play a vital role in earning the much needed foreign exchange.

He assured the council of a full supply of steel and extension of time limit for concessional credit of pre-shipment finance for the exporters. He pointed out that the cabinet committee decision about free trade zone status for 100 per cent export-oriented units and exemption of export production from industrial licencing were some other steps taken by the government to boost exports.

Mr. Kaul complimented the EEPC for achieving a 30 per cent rise in exports during the first half of the current year, thereby regaining the position of prominence in India's export list.

Earlier, Mr. A. K. Jajodia, EEPC chairman, said the only way to increase the country's exports of engineering goods was to create surplus production with the help of advanced technology. Mr. Jajodia appealed to the government to continue compensating the exporting community, treating export credit as an additional requirement and meeting it in full and in time, permitting exporters to undertake off-shore banking operations and restoring facilities under section 35B of the I.T. act immediately.

Mr. Kaul awarded certificates of export recognition to various members of the western region on the basis of export performance during 1978-79 and 1979-80.

Mr. S. Rajgopal, secretary to the government of Maharashtra, department of industries, energy and labour, presided over the exporters' meeting and open-house discussion.

ANDHRA PRADESH NAXALITES STEP UP ACTIVITY

Bombay THE TIMES OF INDIA in English 15 Dec 80 p 1

[Text]

CHANDRAPUR, December 14.

ANDHRA Pradesh Naxalites have stepped up their actitities in the forest area of Sironcha tehsil of Chandrapur district, it is learnt from reliable sources.

Presumably, they are using the dense forest of Bhamragad as their underground headquarters.

Sironcha tehsil is on the Maharashtra-Andhra Pradesh border.

According to information reaching here, nearly 1,000 Naxalites have earned the sympathy of the rural people.

In an "encounter" last month, a 28-year-old Naxalite, Paddi Shankar, was killed by an SRP squad near Sironcha. He was in the process of crossing the border with many other Naxalites.

As the SRP men tried to apprehend them, the Naxalites were reported to have opened fire with their .12-bore country-made guns. Paddi Shankar was gunned down when the SRP men returned the fire. One extremist was arrested while the other made good their escape.

The police seized a .12-bore gun, some incriminating leaflets, a first-aid and ration kit from Paddi Shankar. The leaflets in Telugu and English described the police as the enemies of their struggle. This obviously is an indication that these Naxalites are the followers of Charu Mazumdar who, in his later days, spearheaded a drive against the police.

Those who have infiltrated Sironcha tehsil are believed to have been trained in guerilla activities. The first infiltration was in 1978 when they entered Bari village of Rajura tehsil and committed large-scale decoities. Since then, they have been indulging in terrorist activities and robberies in the villages on the border.

BRIEFS

TRIPURA BORDER CONTROL--Agartala, 12 Dec: The Tripura Government today decided to seal some portion of the State's north-eastern border near the tri-junction with Mizoram and Bangladesh. The Chief Minister, Mr Nripen Chakravorty, told newsmen that the decision was taken at a meeting of the State Cabinet. [Text] [Madras THE HINDU in English 13 Dec 80 p 9)

LOK DAL DEFECTORS--New Delhi, 14 Dec: Several Lok Dal leaders in Maharasatra and Uttar Pradesh joined the Congress (I) here today. They were admitted to the party by Mrs Indira Gandhi. According to Mr Vasantrao Patil, AICC (I) general secretary, they include Mr Shanker Rao Patil, general secratary of the Hamirpur District Bar Association in U.P., Mr Dinesh Kumar Kanwar of Ghazabad, Mr Ram Pravesh Giri, organising secretary of the Rajya Police Karmachari Parishad, U.P. and Mr Gaje Singh, former general secretary of the Delhi Lok Dal. [Text] [Bombay THE TIMES OF INDIA in English 15 Dec 80 p 1]

UAE INVESTMENT PLANS--Abu Dhabi, 14 Dec: The United Arab Emirates would like to invest its petro-dollars in Indian industry and "for India there will be no limits from our side." This was stated by the UAE minister of state for foreign affairs, Mr Rashid Abdullah, in an interview with PTI today. Mr. Abdullah leaves this week for India to take part in the Indo-UAE joint commission meeting in Delhi from December 19. He said tha UAE would like to have a part in India's new investment plan. During his visit to India, he said, he would look into this policy. In the past, Mr Abdullah said, this matter had been considered both in Delhi and Abu Dhabi. Mr Abdullah said, "I am going to Delhi with an open mind and if some specific programme is put before me, it will be looked into. We are prepared to share this plan." He said the UAE would be interested in joint projects in which its gas and oil is used with India's raw materials and technical knowhow. Such joint projects, he thought, would benefit both India and the UAE. Mr Abdullah thanked India for its support in the Palestinian cause. He said India and the UAE had excellent relations and "we are happy and satisfied with what we get." [Text] [Bombay THE TIMES OF INDIA in English 15 Dec 80 p 6]

ANDAMANS TERRITORIAL COUNCIL--New Delhi, 20 Dec: The Andaman and Nicobar Islands will have a territorial council within the next three months, Mr Zail Singh, Union home minister, announced today. The Union territory now has no representative body of its people although it sends a member to the Lok Sabha. Mr Zail Singh told his ministry's advisory committe on the islands that the proposed council would give the people of the Union territory a meaningful say in its administration and on programmes for their betterment and welfare. The 19-member advisory

committee is composed of the sole MP and prominent citizen of the territory, including municipal and block development board members, and meets irregularly. Mr Yogendra Makwade, minister of state for home affairs, was present at the committee meeting which lasted almost three hours today. [Text] [Bombay THE TIMES OF INDIA in English 21 Dec 80 p 9]

AID TO NAXALITES--Trivandrum, 20 Dec: The Kerala home minister, Mr T K Ramakrishnan, has claimed that Canadian aid for the Naxalite movement in the country had been proved. In an article he has contributed to "Chandrakantam", a Congress (U) magazine, Mr Ramakrishnan said the financial aid was coming as subscription to Naxalite publications and advertisements in them. He also said that Naxalite literature circulated in the country had been printed in Canada. Mr Ramakrishnan also disclosed that the government had in its possessions enough evidence to anticipate that the Naxalites in Kerala were planning to repeat terrorism and murder as they did in the state in 1969-70. The evidence came from some of the Naxalites who were arrested, he said. [Text] [Bombay THE TIMES OF INDIA in English 21 Dec 80 p 13]

JAMMU, KASHMIR, TRIPURA PLANS--New Delhi, 20 Dec: The Sixth Plan outlay for Jammu and Kashmir will be Rs 900 crores, and the size of its annual plan for 1980-81 will be Rs 160 crores, reports UNI. Tripura will have an outlay of Rs 245 crores for its Sixth Plan, and the size of the annual Plan (1981-82) will be Rs 45 crores. While the Kashmir Plan was finalized here today at a meeting between the State Chief Minister, Sheikh Abdullah and the Union Planning Minister, Mr Narayan Datt Tiwari, that of Tripura was decided on yesterday. The Tripura Chief Minister, Mr Nripen Chakravorty was with Mr Tiwari when the Plan was being finalized. [Text] [Calcutta THE SUNDAY STATESMAN in English 21 Dec 80 p 1]

DELHI POPULATION FIGURES--New Delhi, Dec 11: Delhi's population is expected to be 12.2 million by the turn of the century, the Minister for Works and Housing, Mr Bhishma Narain Singh, told the Rajya Sabha yesterday. This figure was double that of the present population. The Minister also disclosed that the Delhi Development Authority had begun the "necessary exercise" for the second development plan for Delhi. The present master plan envisaged to accommodate 4.5 million people. This had been revised to accommodate about 5.3 million people. [Text] [Calcutta THE STATESMAN in English 12 Dec 80 p 4]

RAJASTHAN SIXTH PLAN APPROVAL--New Delhi, December 20--Rajasthan has been allocated an outlay of Rs. 2,025 crores for the sixth plan. This is Rs. 275 crores more than the last plan allocation. The total plan expenditure in the state since the inception of planning in 1951 has been Rs. 1963 crores. Thus, the outlay for the sixth plan is more than the plan investment over the last 30 years. The allocation was finalised at a meeting of the chief minister of Rajasthan, Mr. Jagannath Pahadia, with the Union planning minister, Mr. N.D. Tewari. Mr. Pahadia said that the power potential of the state will be substantially increased to help accelerate the pace of growth in the key sectors. The Kota thermal project will have the first phase commissioned in January, 1982, with another 110 Mw. In addition, the extension of this project would provide another 420 Mw in the next five years. In addition to the state plan investment, Rs. 500 crores would be spent through the Centrally-sponsored schemes. An additional Rs. 1,500 crores is envisaged to flow through institutional sources. An outlay of Rs. 340 crores has also been approved for 1981-82. [Excerpt] [Bombay THE TIMES OF INDIA in English 21 Dec 80 p 1]

BRIEFS

RURAL WORKERS AID--Labor Minister Blas F. Ople cited yesterday a package of measures to be implemented by his ministry this year aimed at increasing the income of rural workers. Ople said the labor ministry, through its Rural Workers Office, had completed plans that would permit intensification of present socio-economic and income-generating programs for rural labor. He said the social amelioration program found effective in helping sugar workers will be recommended for adoption in other industries, especially the distressed coconut industry. Ople said the annual cash bonuses distributed to sugar workers coupled with several socioeconomic projects proved successful in protecting their well-being. BRIEFS

PRC TRADE PACT--Colombo, 20 Dec: The rubber-rice trade pact between Sri Lanka and China has been renewed for another year, following week-long trade talks held in Colombo with the visiting trade delegation from China. The pact, valid from January 1, to December 31, 1981, provides for Sri Lanka to export 20,000 tonnes of rubber in exchange for 80,000 tonnes of rice. The figures for this year are 30,000 tonnes of rubber and 150,000 tonnes of rice. The trade protocol between the two countries was signed at a ceremony held at the Bandarnaike Memorial International Conference Hall yesterday. It is the fourth annual contract concluded under the sixth five-year trade agreement which was signed in Peking in October 1977 between the two countries. The agreement also provides for Sri Lanka to purchase diesel oil, kerosene, chemicals, textiles and light industrial products from China and for Sri Lanka to export coconut oil, cocoa, medicinal herbs, tea and precious stones. ATROCITIES REPORTED AGAINST SCHEDULED CASTES

Karachi DAWN in English 31 Dec 80 p 12

[Text]

ISLAMABAD, Dec. 30: An alarming rise in the number of atrocities against scheduled castes and tribes in India, with the situation "drifting towards a kind of class war" has been reported to Parliament by the Commissioner for Scheduled Castes and Tribes.

The number of these atrocities like murder, rape, arson and other kinds of violence — has registered a three-fold increase during the last three years, according to the Commissioner, Mr. Shishir Kumar.

The malady appears to be deep-rooted and requires more drastic steps to attack it, "he says in his report covering the period March 1978 to December, 1979.

The Commissioner has called for effective intervention by the Union Government to check atrocities. He has strongly contested a view that this subject falls exclusively within the jurisdiction of the state governments and that the Centre can content itself by only issuing guidelines to the states. In a correct legal and constitutional appreciation of the issue, the Centre has an over-riding responsibility to ensure protection to the weaker sections, he added.

According to the Commissioner, the number of atrocities on scheduled caste increased from 6, 197 in 1976 to 10,979 in 1977, 15083 in 1978 and almost the same figure in 1979. This marks an increase of about two and half times in 1979, compared to 1976. In the case of tribes, the number increased from 1,085 in 1976 to 1,138 in 1977 and 1,832 in 1978.

Crime-wise, in 1978, a total of 456 murders of members of scheduled castes were brought to notice—with Uttar Pradesh reporting 219 cases, Bihar 63, Madhya Pradesh 41, Rajasthan 38, Maharashtra 26 and Karnataka 17.

The number of rape cases was 541, which included 188 cases reported from Uttar Pradesh, 94 from Madhya Pradesh, 76 from Bihar, 48 from Rajasthan and 35 from Maharashtra.

The number of arson cases was 1262—with Uttar Pradesh again reporting as many as 445.

According to the report, about 66 per cent of the bonded Labourers in the country belong to scheduled castes. They should be released promptly and rehabilitated, the report said.—PPI.

UNREST AMONG FARMERS SPREADING

Islamabad THE MUSLIM in English 5 Jan 81 p 5

[Text]

NEW DELHI, Jan.4:Fresh violence in India's southern state of Tamil Nadu is the latest flashpoint in spreading farmers unrest for higher crop prices which is troubling Prime Minister Indira Gandhi's government.

As many as people were killed in clashes between farmers and police and more than 6,000 farmers have been arrested in Tamil Nadu since the agitation began there on Dec. 23.

The trouble in the south follows massive demonstrations by the farmers in the Western state of Maharashtra last month in which 10,000 farmers and several opposition leaders were arrested.

The farmers, who were later released, had underlined their grievances with a 365-Km (226-mile) long march across the state, demanding higher support prices for sugarcane and other crops.

The farmers movement has also spread to the northern state of Uttar Pradesh, one of the biggest sugar-growing states, where the state government has already increased the price paid for sugarcane from Rs. 18 (about two dollars) to Rs. 23 per 100 kilograms.

But the farmers are demanding at least Rs. 30 per 100 kilos and also want more for their onion, cotton and rice crops.

While Mrs. Gandhi's government has agreed that some crop price increases are justified, it feels that to meet all the farmer's demands would only result in more inflation.

Maharashtra farmers leader Sharad Joshi, who claims no political affiliations, claims that successive Indian governments have kept farmers hovering around the poverty line so industry could be developed.

Foodgrain output is officially expected to reach a record 135 million tons in the current agriculture year ending in June, but Mr. Joshi says little of the benefit funds its way back to the farmers.

Mr. Joshi maintains that crop price rises have not kept pace with increased electricity costs for irrigation water pumps and other farm expenses.

"A farmer sells his produce cheaply and buys his needs at any prices, he told reporters.

The trouble in Tamil Nadu was sparked by farmers, who refused to pay arrears of their electricity bills and consequently their power supplies were disconnected.

Their leader, Nanjunaswamy Naidu, also pressed for an increase in procurement prices of up to Rs. 150 (19 dollars) per 100 kilos for paddy.

M.G. Ramachandran, the Chief Minister of Tamil Nadu, had earlier raised the price for paddy from Rs. 105 (13 dollars) per 100 kilos recommended by the central government to Rs. 115.

The farmers seem determined to gain their ends by every available means, including violence. In Tamil Nadu they put salt into milk cans, burnt buses and trucks carrying farm produce to the cities, destroyed bridges and attacked police parties.

The Indian Express newspaper said in an editorial that while it was distressing that the farmers movement there had turned violent, the Tamil Nadu government will do well to make another attempt to evolve a peaceful settlement of the agrarian unrest.

The Express added: "the voice of the country's primary producers of food needs to be heard with respect and such urban bias as there is in development policies has to be corrected.—AFP

BRIEFS

SMALL TRANSPORT PLANE PLAN--New Delhi, Jan. 7--India proposes to go in for the production of small transport aircraft. A proposal to this effect is being considered by the Indian Government, the Minister of State for Tourism and Civil Aviation, Mr. Chandulal Chandrakar has said. The need for indigenous production of small transport aircraft he said had assumed importance following the Government's acceptance of the concept of a third level airline for more intensive coverage of selected areas. It had already been decided to provide supplementary air services to the northeast region through such an airline.--PPI. [Text] [Lahore THE PAKISTAN TIMES in English 8 Jan 81 p 4]

BOATS FOR CUSTOM FLEET--New Delhi, Jan 11--About 100 ocean-going vessels, interceptors and patrol boats will be added to the Indian customs fleet in the next two years in a drive against increased smuggling along the country's western coast. The decision was announced yesterday at the end of a meeting of senior customs officials at Kalol, western India. Minister of State for Finance S.S. Sasodia, who chaired the one-day meeting, later told newsmen that about 70 percent of smuggling activities in India was being carried out along the western coast. Sasodia said that contraband goods worth more than 60 million dollars were seized in India last year. He said that smuggling was also on the increase along India's borders with Nepal and Bangladesh. The Customs now have a fleet of 86 boats, including 60 seized from smugglers, according to the United News of India (UNI), the news agency said the additional boats would be built in India.--Reuter [Text] [Karachi BUSINESS RECORDER in English 12 Jan 81 p 3]

DROUGHT IN RAJASTHAN--New Delhi, 7 Jan--Acute drought conditions threaten more than one million people in the western Indian desert state of Rajasthan, the Press Trust of India said Wednesday. The news agency said 1,739 villages and half a million cattle are affected by the drought resulting from poor rainfall for the second successive year. In some of the affected districts less than 50 percent of the average annual rainfall (633 millimetres) was recorded last year, PTI said. The Rajasthan Government has already declared the affected villages as "scarcity-hit" and appealed to the federal Government help finance a project to fight the drought relief operations have been launched, the news agency said. NAB/UPI [Text] [Rangoon THE WORKING PEOPLE'S DAILY in English 9 Jan 81 p 7]

NATION'S LARGEST REFINERY--New Delhi, Dec 21--India and the United Arab Emirates (UAE) yesterday agreed to jointly set up a 12-million tonne oil refinery in India, official sources said here today. The two countries will share the cost of the refinery which will be the biggest in India. The agreement was reached at an Indo-UAE joint commission presided over by UAE minister of state for foreign trade Rashid Abdullah al-Noaimi, who arrived here yesterday on an eight-day visit, and Indian foreign minister P.V. Narasimha Rao.--REUTER. [Text] [Karachi BUSINESS RECORDER in English 22 Dec 80 p 2]

DEVELOPMENTS IN PORTUGUESE RELATIONS WITH EAST TIMOR

FRETILIN Leader Lobato Interview

Lisbon EXPRESSO REVISTA in Portuguese 5 Dec 80 pp 13R-15R

[Interview with Rogerio Lobato, FRETILIN Central Committee member, commander of East Timor National Liberation Forces and minister of defense of the Democratic Republic of East Timor, by Carlos Gil; date and place not given]

[Text] Next Sunday will mark the fifth anniversary of the invasion of the Portuguese colony of East Timor by Indonesian troops. Despite the thousands of deaths, deportations and banishments, that middle island has not even yet been "pacified." With greater or lesser intensity, the people of East Timor are still fighting against the passivity of public opinion and international governments and ill-concealed neglect by the successive governments in Lisbon. Last month, Rogerio Lobato, a member of the Central Committee of the FRETILIN [Front for an Independent East Timor], commander of the East Timor National Liberation Armed Forces, and minister of defense of the Democratic Republic of East Timor, agreed to an interview with Carlos Gil (who thus became one of the few Portuguese journalists to interview that East Timor leader). During the interview, Rogerio Lobato told how and why this struggle is being waged in East Timor, along with many criticisms of the conduct of various successive Portuguese political leaders who, in one way or another, were involved in the "exemplary decolonization" of East Timor.

Along with this, we are publishing a short report by our London correspondent, Maria Teresa Guerreiro, on revelations made in Australia, and reported in Great Britain by the weekly NEW STATESMAN, according to which the British and American governments connived in the Indonesian invasion of East Timor.

Carlos Gil: On 15 August 1975, the Central Committee of the FRETILIN appealed for armed resistance throughout the territory of East Timor. Civil war developed in the most distant Portuguese colony. The Portuguese army disintegrated, while its native soldiers deserted, taking their weapons with them, to join the parties in conflict, mainly the FRETILIN. The pro-FRETILIN troops commanded by

Rogerio Lobato succeeded in reversing the situation to their own benefit, and a month later they controlled the greater part of the territory. Who was this young guerrilla leader, only 25 years of age?

Rogerio Lobato: Long before 25 April 1974, I attended the Dare Seminary. In 1971, already having left the seminary, I was drafted into the Portuguese colonial army, like all the young men of my age at that time. My political affiliations began after 25 April, and were the product of the fact that I served in the Portuguese colonial army as a militia supply corporal, in which capacity I began to pursue political tasks of mobilization with the soldiers. Later, the Central Committee of the FRETILIN entrusted me with the first and only course which was finally offered for militia officers. The UDT coup on 10 August 1975 found me at the general headquarters of the Portuguese colonial army. As of that date, I was chosen by the entire East Timor military who had joined the FRETILIN to command our forces. The Portuguese army was made up for the most part of native troops. Despite the apolitical propaganda pursued by the Portuguese colonialists in East Timor, the truth is that the soldiers were above all nationalists and could not be diverted from the problems which affected our country, and the future of East Timor, at that time.

Carlos Gil: You said that the people of East Timor are essentially nationalist. But in October of 1974, when he returned from a visit to East Timor, the then-minister for interterritorial coordination, Almeida Santos, told the mass media about the patriotism and love of Portugal and the Portuguese flag he had seen among its citizens.

Rogerio Lobato: There were people in East Timor who defended links with Portugal and created conditions for persuading some that the people loved Portugal and wanted to continue to be Portuguese. The Portuguese colonials always promoted this propaganda about the love of the flag.

Carlos Gil: Curiously, there is no word for flag in the Tetum dialect of East Timor!

Rogerio Lobato: Well, this does not mean that the people of East Timor have no understanding of the meaning of the word flag. We have the FRETILIN flag, which the people truly love. But it is an insult to say that our people always loved the Portuguese flag. For us it is a strange and unfortunate attitude which a man who claimed to be progressive, Almeida Santos, adopted after 25 April, saying that the people of East Timor loved Portugal, solely because he saw some persons at demonstrations organized by the former UDT waving Portuguese flags. At that point, we had occasion to see evidence of the contrary. Almeida Santos went to see East Timor with the eyes of a colonial and not the eyes of a decolonizer. He saw what the former UDT did, but he did not report what the FRETILIN revealed in East Timor. He went to East Timor with the intention to promote the former UDT and to exclude the FRETILIN.

Carlos Gil: What did the FRETILIN make clear to Almeida Santos?

Rogerio Lobato: At that point, the FRETILIN was already the party with the most support, the greatest acceptance among the people of East Timor. The FRETILIN

had shown this in large demonstrations held for Almeida Santos. When he came, we protested against the statements he had made.

Carlos Gil: I would like to note that 28 November is precisely the fifth anniversary of the unilateral proclamation of the independence of East Timor. This fact may have been the detonator of the imminent invasion of the Indonesians, on 7 December 1975. On that day, Radio East Timor made the following statement: "The Indonesians have invaded. Their soldiers are in Dili. They will kill without discrimination. Women and children will be fired on in the streets." Then it ceased broadcasting. Later that day, the Portuguese government informed the president of the Security Council that Indonesia had invaded East Timor with naval, air and land forces, and it termed this intervention an "act of aggression." On that same day, Portugal broke off all diplomatic relations with Indonesia. I want to refer again to Minister Almeida Santos. Some months before the Indonesian invasion, he answered a question from the newspaper O SECULO on "the risk of a possible military intervention by Indonesia in East Timor" with the following statement: "It is important in connection with the unlikely nature of such intervention is the consistent and clear official position of the authorities in Djakarta, reaffirmed a number of times, including to me personally when I went there, to the effect that Indonesia does not nurture any territorial ambitions with regard to Portuguese Timor." And he went on to say: "Military intervention by Indonesia would be a serious error, and so universally and promptly criticized that I cannot imagine this step being risked for uncertain future gains. Sensible politicians do not put the cart before the horse." I would ask you now what, 5 years after the Indonesian invasion, the political and military situation in East Timor is?

Rogerio Lobato: The invasion of East Timor by Indonesia was a military venture with unforeseeable risks. The plans of the Indonesian generals for controlling East Timor in 3 days, as they had initially planned, failed. On the contrary, the FRETILIN has been able to resist until now, inflicting more than 30,000 casualties on the invading army. The people of East Timor will have had to pay a very high price for their liberation, for they suffered some 30,000 casualties. Given the geopolitical situation of our country, the political-military situation is difficult, but we cannot regard it as lost. We find ourselves in the phase of struggle regarded as strategic defense, in which we launch attacks and armed actions which are small in scale and of a tactical nature. The strategic objective is to sustain the forces of the FRETILIN, to resist as long as possible, so that the prolonged nature of the armed struggle will make the contradictions among the various Indonesian generals' factions more acute. One of our goals is also to create the conditions so that the guerrilla army can give rise to a regular army, and to pursue the efforts necessary so that within a few years we can reach a balance with the invading forces.

Carlos Gil: Isn't it utopian to believe that a balance of forces can be achieved?

Rogerio Lobato: We are speaking in relative terms. We will not achieve absolute parity. This would be very difficult, because we do not have the logistic support means the invading army has, with the full support of imperialism.

Carlos Gil: The manuals written by guerrilla technicians make a statement which is well known, and not only among the military: If there is not concrete support from the population, guerrilla fighters will find it difficult to triumph over the occupying or invading army. It is a question of being in one's own element.

Rogerio Lobato: We too adhere to the principle that the guerrilla fighter must live in his surroundings like a fish in water. For us the water would be the people. The FRETILIN, even before the war against the Indonesian aggressors began, weighed this point and mobilized the people. I remember having said to the Australian television and radio journalists in December of 1975 that apart from the regular troops joining the FRETILIN as of 20 August 1975, we had already trained several thousand militiamen throughout the country. Our concern at that point was to provide them with a minimum of knowledge about weapons and firing, to teach them to put the bullet in the chamber, to aim and to kill the Indonesians.

Carlos Gil: Is the FRETILIN experiencing great difficulties?

Rogerio Lobato: We are having difficulties, certainly. I would not say that they are completely overcome. We began the struggle with thousands of weapons captured from the Portuguese colonial army. We had thousands of armed men at the time of the invasion.

Carlos Gil: Were there heavy weapons?

Rogerio Lobato: There were some, but those we had were very ancient. Some 75-millimeter guns the Portuguese brought to East Timor, but they had dumped the ammunition in the sea long before 25 April, worried about what might happen one day. Even before that date they wanted to send us back to Portugal, but some military units protested, because we knew the Indonesians were on the other side of the border. Governor Lemos Pires, when he fled from East Timor, allowed 600 G-3 machine guns to remain behind, but he gave orders that the breeches should be hidden. I remember that on the day we proclaimed independence, 28 November 1975, the battalion which marched in the official ceremonies did so with guns lacking breeches.

Carlos Gil: We know that the struggle in East Timor is difficult because there is no rear guard.

Rogerio Lobato: There is in fact the problem of supplying our forces, but we believe that the best system of transporting munitions and weapons to the FRETILIN is the Indonesian army. The United States, France, the FRG and England manufacture weapons, Indonesia brings them to East Timor, and the FRETILIN captures them. To turn to the new aspect of the struggle in East Timor, if we were to analyze the war theories of great thinkers, we will see that completely new experiences are occurring in East Timor. Look at the military writings of Mao Zedong. Some things do not apply to East Timor, where the conditions are different from those in China. For example, in the war between Japan and China, one of the tactics used was retreat. China is a vast territory, and it is possible to retreat as far as Tibet, and there is a great potential for maneuvering against the invader or occupant, for deploying forces and attacking the enemy from the rear or the flank.

Carlos Gil: Retreat in East Timor means backing into the sea.

Rogerio Lobato: Well, if the enemy attacks us in the mountains in East Timor, we often go to the beaches, or vice versa. The secret of war in East Timor lies in this mobility within very limited territorial space. It is for this reason that we are recording new experiences. An analysis of the experience of Cuba, also an island, also shows differences. Cuba achieved a rather substantial level of industrialization and the production forces were very different from those in East Timor when the armed struggle began. We did not even have anyone who could fly a plane. In Cuba, there were Cuban pilots to do this. We had no sailors. In 500 years of colonialism, the Portuguese did not train one of us as a sailor, a pilot or a physician. This is the specific situation which must be analyzed in order to understand the struggle in East Timor. Faced with these difficulties, the resistance for 5 years of the Mauber people, led by the FRETILIN, represents a victory. Timor is an island without a rear guard, and we are surrounded by countries with reactionary governments. It is under these difficulties that we developed our creativity. If we are asked where the weapons come from, we will say that the majority come from the Indonesians. Some are won in combat, others are traded for our coffee, with the corrupting of Indonesian soldiers and officers. This is no secret to anyone.

Carlos Gil: Has Indonesia increased its occupation forces recently?

Rogerio Lobato: Currently there are thousands of Indonesian soldiers in East Timor. We have reports that they want to reinforce their ranks in December with another 20 to 30,000 soldiers in order to put an end, they hope, to the FRETILIN guerrilla fighters. Clearly the new offensive represents a threat, but if in 5 years they have not succeeded in defeating the FRETILIN, they are not going to do so now.

Carlos Gil: There has been yet another debate in the United Nations on the East Timor question. What is the position of the Central Committee of the FRETILIN in the diplomatic struggle it has undertaken?

Rogerio Lobato: We must develop parallel struggles on the military and diplomatic levels. When there are great military victories, there are great diplomatic victories as well. At this moment we are seeing a number of imperialist maneuvers on the diplomatic level, and the most dangerous is the desire to hold a referendum in East Timor. Unfortunately this imperialist position is defended by the Sa Carneiro government. Our position on this matter is rejection of a referendum in East Timor. The Central Committee of the FRETILIN, when it proclaimed independence on 28 November 1975, interpreted the desires of the Mauber people and at this time we are fighting as an independent but occupied country, which has been attacked and which has had its sovereignty and territorial integrity threatened by a foreign power. When the Portuguese government speaks of a referendum, it ignores the situation in East Timor, the tremendous sacrifices and privations our people have agreed to and tolerated throughout these 5 years of heroic resistance and national liberation struggle. The most proper and just position, which the Portuguese government should have adopted, was to: I. Recognize the FRETILIN as the legitimate representative of the people of East Timor; II. Recognize the Democratic Republic of East Timor; III. Demand the withdrawal

of all the Indonesian forces of aggression from East Timor and condemn the Indonesian invasion in harsh terms; and IV. Contribute on the diplomatic level to the international recognition of the FRETILIN and the RDTL [Democratic Republic of East Timor]. If the Portuguese government were to adopt this position, it would create conditions for the establishment of an atmosphere of good relations with the RDTL in the future.

Carlos Gil: But the Portuguese government does not regard the FRETILIN as the sole representative of the people of East Timor, and in its recent plans for East Timor it calls for "hearing all the movements representative of the people of East Timor."

Rogerio Lobato: Obviously it is unaware and has even created some puppet movements, seeking to place on a level of equality with the FRETILIN movements which represent nothing but themselves. Basically, the so-called UDT is now defunct, as is the APODETI. What they called the UDT in Portugal is not that, because the UDT which developed in East Timor made a public statement of its support of Indonesia in 1975 and its president is currently the puppet vice governor of the Indonesians in Dili. There are some individuals who do not want to accept the facts. They yearn for the past, are proud and arrogant. The head of the so-called UDT in Portugal is Moises Amaral, an individual who during the colonial period was an agent of the former PIDE/DGS [Police for the Control of Foreigners and Defense of the State/Directorate General for Security] in what was formerly Porto Amelia, in Mozambique. If we analyze the other movement, the National Movement for the Liberation of Timor (MONALIT), the people involved are not serious either. One of its two most outstanding leaders, Jacob Xavier, has a police record for illegal trafficking in diamonds in Angola, where he was in prison for 2 years. The so-called UDT in Portugal is an extension of the CDS [Social Democratic Center Party]. The MONALIT is a creation of the PSD [Social Democratic Party], or at least of one of its leaders. Are these the factions which want to direct our people? It is impossible, and an insult to our people. In addition to all of this, they are not even nationalists. The so-called UDT in Portugal believes that the Indonesian occupation is a fact. Not even Portugal recognizes it. The MONALIT says that it is a Portuguese movement. After all, how can they defend the interests of the people of Timor?

Carlos Gil: What is the position with regard to the speech to the United Nations by Freitas do Amaral?

Rogerio Lobato: We believe that it is important for Portugal to assume its historic and moral responsibilities, but intentions are not enough. When Portugal says it is assuming its responsibilities and establishes contact with Indonesia without consulting the FRETILIN, it is engaging in demagogy. We are watchful and vigilant of the maneuvers of the Portuguese government. Moreover, we do not believe in the good intentions or the good faith of the Portuguese government, because in practice it reveals the opposite. It contacts the Indonesians without consulting the FRETILIN, it says it wants to negotiate with Indonesia, with or without the FRETILIN, it wants to place the FRETILIN on a plane of equality with other movements which are not even in the struggle but are living comfortably at the expense of the refugee commission in Portugal.

The mysterious mission entrusted to Moraes e Silva in East Timor by the reactionary government of Sa Carneiro bears witness once again to the demagogy, the hypocrisy and the lack of seriousness on the part of the AD [Democratic Alliance] government. The FRETILIN will respond to the maneuvers of Portuguese colonialism and imperialism by intensifying the armed struggle in East Timor and in Indonesia. If necessary, we will fight another 20 years, in the certainty that the solution to the East Timor problem will always be imposed by the force of the armed struggle headed by the Central Committee of the FRETILIN.

Carlos Gil: The Portuguese plan for East Timor further calls for a series of measures of humanitarian support, calling for the repatriation and return of the citizens of Timor.

Rogerio Lobato: We do not need acts of charity from Portugal. The problem is above all political. As to the humanitarian question, the steps Portugal wants to take in this sector will basically only serve to favor the Indonesian plan. Portugal says it wants to reunite families from Timor. This is an old Indonesian plan which is designed to get all of its citizens out of East Timor in order then to repopulate it with people from other Indonesian islands. There is an Indonesian plan for the forced migration of 300,000 people from the islands of Bali and Java to East Timor. The purpose of this plan is the forced repopulation of our country, and it is designed to alter the demographic situation in favor of Indonesia. This plan is sinister and macabre because it seeks to annihilate the cultural and national identity of our people and remove the base of support for the armed resistance and national liberation struggle.

Carlos Gil: Has this already been done by the Indonesians on other islands?

Rogerio Lobato: It is true that it has. The Indonesians plan to take hundreds of thousands of Javanese to Papua New Guinea, and also to the Moluccas, Borneo, Celebes, Sumatra and Flores. Portugal plans to aid Indonesia in recolonizing East Timor. These are the good intentions of the Portuguese government. We do not ask Portugal to send weapons or troops to East Timor. It would be unrealistic for us to think in these terms. We only want political support from Portugal. I reiterate that the Central Committee of the FRETILIN does not believe in the good intentions or the good faith of the Portuguese government. If there are people who do, this is an isolated and opportunistic position adopted against the interests of our people.

Carlos Gil: How do you view the role of other earlier governments?

Rogerio Lobato: It was a role of total complicity with the American imperialists. We know that the government of the United States exerted pressure on the Portuguese government at that time to prevent it from moving forward in any way in regard to East Timor. General Costa Gomes was president of the republic. The FRETILIN, on the contrary, has always had very serious intentions of negotiating with Portugal, but unfortunately nothing was ventured by Costa Gomes. Ironically, General Costa Gomes is today a member of the World Council of Peace, while at that time he did not want to contribute to peace in East Timor. What is the peace which he defends, after all? I would like to note further that there have been large demonstrations of solidarity with the struggles of other peoples in

Portugal throughout these 5 years. Last year there was a campaign of solidarity with the struggle of the Palestinian people. We support the struggle of the Palestinian people, but we find it very strange that, since our people were directly colonized by the Portuguese, there has never been the slightest attention paid by the Portuguese antifascists or internationalists.

Carlos Gil: The president of the republic, General Ramalho Eanes, met with the highest leader of the Palestinian people, Yasser Arafat, last year, during this solidarity campaign. The PLO was given the reception of a chief of state in Portugal. Has Ramalho Eanes ever welcomed a member of the FRETILIN or a minister of the Democratic Republic of East Timor?

Rogerio Lobato: To date, the president of the republic has never welcomed any of us, and this is because he himself deemed it untimely. We would like to know when it will be timely. After East Timor is liberated? At this juncture, the president would even like to establish a Portuguese embassy in the RDTL. It is interesting that the president was so sensitive to the Palestinian problem, that of a people who have nothing to do with Portugal historically. I think this was an attitude which developed out of the interest in relations with Arab countries because of the oil market. But we should have been welcomed first. It would appear that the cart has been put before the horse.

Carlos Gil: What are the prospects in the struggle the FRETILIN is waging against the Indonesian invaders?

Rogerio Lobato: It is in the 1980s that we will free East Timor from the Indonesian yoke. It is not only the FRETILIN which is fighting against the Indonesian generals at this time. Within Indonesia itself we are witnessing armed uprisings in Sumatra and in Papua New Guinea, where the National Liberation Front of Acheh-Sumatra and the Organizasi Papua Merdeka (OPM) also exist. In July of this year, when the FRETILIN attacked Dili, the OPM forces simultaneously attacked Jayapura, the capital of Papua New Guinea, where an Indonesian colonel and seven lower-ranking officers were captured. In that same month, the OPM forces annihilated 2 Indonesian platoons near the Mamberamo River, taking 60 prisoners. The FRETILIN is now coordinating its war efforts with those of these movements. Our struggle has ceased to be only a struggle within East Timor, and has become one within Indonesia itself as well. Ours is a common struggle, because we have a common enemy--the bloody and fascist Suharto regime.

Carlos Gil: Will this common struggle have a common direction?

Rogerio Lobato: Today a process which is unknown to many people exists on the various Indonesian islands. We have been contacted by the armed opposition in Indonesia so that we can coordinate our war efforts against Suharto. We drafted an agreement for the creation of a joint general staff for the anti-Suharto forces, and such a general staff has already recently been established in Southeast Asia.

Carlos Gil: The situation in Indonesia does not seem to be very favorable to Suharto, since there are contradictions among the generals.

Rogerio Lobato: Yes. The situation is good for the struggle against Suharto. General Ali Moertopo does not exclude the possibility of civil war in Indonesia if Suharto is not elected in 1982. The contradictions among the Indonesian generals benefit our struggle, which will cover all of Indonesia. If Indonesia wants to integrate us by force, we have no alternative but to disintegrate it, also by force. Suharto will not succeed in controlling his archipelago of 13,700 islands with his old vessels and scrap iron from World War II. The FRETILIN and all the movements waging the struggle in Sumatra, Borneo, Celebes, the Moluccas, Flores, Java and Papua New Guinea will determine what the fate of this bloody fascist called Suharto, the shah of Southeast Asia, will be. The future is bright and belongs by right to the people of the Democatic Republic of East Timor and the East Indies. Time will tell who was right.

Morais da Silva Visits

Lisbon EXPRESSO REVISTA in Portuguese 15 Nov 80 pp 1R-2R

[Article by Augusto de Carvalho: "Timor Community, Apprehensive, Wonders About the 'Mysterious' Visit"]

[Text] "Colonel Morais da Silva, please excuse the inconvenience. We here at EXPRESSO have sought you out to obtain exact information about your trip to Timor. Can you tell us something?"

This was the nature of the short telephone conversation we had with Air Force Colonel Morais da Silva at 1500 hours on Wednesday, before the UN vote on the East Timor issue was known.

[Answer] I can tell you nothing.

[Question] Why not?

[Answer] A very serious matter is involved.

[Question] But couldn't you meet me for an informal talk so we could exchange some impressions?

[Answer] Impossible.

[Question] Can you give me at least the exact date of your trip?

[Answer] As to that, you must consult the TAP [Portuguese Airlines] lists.

[Question] The fact is we will have a report this week and we have some information on your trip which we would like if possible to confirm.

[Answer] I have already said that a very serious matter, with grave implications, is involved, and therefore I cannot discuss it at all.

Enlightening Mystery

After this talk, which moreover was cordial, we felt certain that the terms "mysterious" and "secret," used about this trip, were fully applicable.

Mysterious because almost no one knew about it, mysterious because every means was used to envelop it with secrecy and mystery. To judge from the letters from many citizens of Timor who, breaking through the close network of Indonesian vigilance, succeeded in reaching Portugal as free men, "apparently a Portuguese named Morais da Silva made a trip there." But all this mystery in the end provided some clues for its clarification: everything suggested that it came within the framework of Portuguese diplomatic contacts with Indonesia, in the hands of a Portuguese citizen with prestige in that zone. And not only that. One who enjoys the profound sympathies of the local authorities and who supports Timor, to the exact extent that East Timor incorporated in his personality Portuguese components which gave him his own characteristic aspect, and who even points to his Timor origin. At least this is what Morais da Silva told EXPRESSO, precisely on 30 July 1976, when he was a general and chief of the air force general staff. This was during an informal talk after the trip which took him to the Orient to effect the liberation of 23 Portuguese citizens held as hostages by Indonesia.

What we wrote at that time as a result of this conversation may cast some light on the nature of the trip and the internal aspects of Portuguese diplomacy in the case under study, enabling us to detect its directions in this complicated international political meandering in which there are conflicting hegemonies, with a new element now provided by the election of Ronald Reagan.

We wrote then: "We also obtained from Morais da Silva and other Portuguese political circles the impression that the integration of Timor in Indonesia is an irreversible fact and that Portugal can do nothing, in terms of efficiency, to prevent it." And again: "In any case, the path of Timor seems irreversible, and Portugal will have to save what can be saved in terms of political realism. What we succeeded in establishing is just this, which remains to be done. And this, basically, was the information gathered by Morais da Silva." Morais da Silva who completed his secondary studies in Timor, where he left many friends.

The air force general then worked to save what could be saved (for which read the survival of the Portuguese culture in that zone) and he regarded integration in Indonesia as inevitable, reasoning, according to what he said, from a realistic point of view, on the basis of a study of the forces in play. And he will have made his report to the Ministry of Foreign Affairs along these lines, also based on elements gathered from Indonesian military sources, although not exclusively.

Support

If indeed there have been no substantial changes in the balance of forces sector, the cause of East Timor has succeeded in mobilizing considerable support since 1976 in the diplomatic sector, calling attention to the brutal and expansionist aggression.

It is this support which has culminated now in the United Nations vote approving the resolution asserting the right of East Timor to self-determination. There were 58 votes in favor, 35 against and 46 abstentions. The resolution said that "the people of East Timor must be able freely to determine their own future, under the auspices of the United Nations." Thus the Indonesian claim, to the effect that East Timor has been an integral part of its territory since 1976 "by the express will of the local population," was not recognized. The Indonesian delegate, Sumayo Suryokusumo, rejected the resolution. Indonesia will continue the struggle on the diplomatic and practical level.

The genocide which Indonesia has been perpetrating in East Timor since that time, attempting to reduce the voice of a people to silence by force, is beginning despite everything to become known in the international arena.

Meanwhile, although the positive action pursued by our diplomats at the United Nations should be stressed, the people of Timor fear that other actions are being planned so that the annexation by Indonesia will become little by little an accepted fact, being forgotten in the end or still worse being sanctioned by the international community.

The Purpose of the Trip

According to representatives from Timor with whom we talked, Colonel Morais da Silva's trip may come precisely within the context of this complex of operations, which will develop in the near future in favor of Indonesia.

Morais da Silva went to that region, according to our information, and according to his own statements in talks with friends, "at the invitation of a friend in Indonesia." Who this person is is not publicly known, but through information we were able to gather we are led to believe that he is closely linked with the government, above all that group of generals already known to Morais da Silva in 1976. Thus he was royally welcomed in Djakarta "like a prince" (he was accompanied by his wife) they told us.

His wife was even the guest in Indonesia in the home of an officer, now a general and at that time a colonel, who commanded the attack operations in East Timor in 1976, remaining on duty there until 1977. He is a general currently serving in the region including Flores and Timor.

It was in the company of this general precisely that Morais da Silva paid a visit to the invaded zone, leaving his wife at his home, since there were other individuals interested in going to Timor as well, and to this end she surrendered her seat to a member of the delegation.

In Dili, Morais da Silva was officially welcomed by the head of Indonesian intelligence, Colonel Sinaga, who is the strongman of the invading power, a man who according to eyewitnesses who talked with us and the testimony of refugees massacred the people in Timor and documented various executions in his account. He is, from all points of view, the military strongman of Indonesia in that occupied territory. He was also welcomed by Guilherme Maria Goncalves, the Indonesian governor, once a powerful member of the Apodetti, the party which

advocated integration even prior to the invasion. Sinaga and Guilherme Maria Goncalves accompanied Morais da Silva throughout the day and a half of guided tours he made in East Timor. Morais da Silva flew over a part of the territory to observe military operations in the field, which he could do with relative ease, given their technical simplicity. He also went to the Maliama zone, where Indonesia is trying to carry out a pilot project in the farm sector. In fact, Indonesia is concerned currently with developing the educational and agricultural sectors above all, as a means of winning popular sympathy.

According to our reports, Morais da Silva had yet another meeting with a group of Portuguese still living there, a meeting of a humanitarian nature, in this case.

On the basis of this information, it is legitimate to ask what kind of report Morais da Silva may have given the Portuguese government, in view of the sources on which at this point he can rely. It was this question which individuals in the Timor community wanted to make public through EXPRESSO, which now has a more detailed account of the trip made by this prestigious air force officer. Morais da Silva is reported to have said in talks with citizens of Timor that despite a collective sadness to be seen in the people, they are living rather better today than before 25 April, and that this fact is due to integration in Indonesia.

However, the general impressions of Morais da Silva are not at all consistent, we are told by the majority of individuals in the Timor community in Lisbon, with "the letters reaching us secretly, letters which come to us via even Indonesian military personnel themselves, and they are also inconsistent with the most recent reports of the refugees."

In fact, an average of 100 refugees a month are arriving, effecting their escape as they can, bribing the Indonesian authorities with sizeable sums. They begin by paying $500, more or less, to the officers in East Timor, to obtain free passage to Djakarta, and there, with $1,000 or more in addition, they manage to resolve their problems.

In this connection, some citizens of Timor told us that "we do not doubt the honesty of Morais da Silva, whose conduct at various times we have valued, to the point that we awarded him a decoration only given to great friends, but we have the right to ask what value there is in his views, with a certain tendency to defend integration as the only viable solution, given the forces in play, based only on the persons to whom he listened and who accompanied him."

However, as we said at the beginning, it was not possible for EXPRESSO to talk with Morais da Silva. Naturally, after what we have written in these pages, the illustrious air force officer felt obliged to respond. We told him on the telephone that he could do so even "after the fact." In any case there is an impression, with a certain justification, that Morais da Silva can through his Indonesian friends influence the future actions of the Portuguese executive branch. The United Nations vote, if indeed it was important, may be but a brief episode in the interplay of international expediencies operating in that area, in which Portugal has historic responsibilities.

SITUATION IN OIL CITIES OF DUMAI, CEPU DESCRIBED

Jakarta TEMPO in Indonesian 20 Dec 80 pp 43-44

[Article: "Dumai and Cepu, Sources of Oil"]

[Text] Dumai, an oil city in Riau, is developing quickly. However, the gap between the oil workers and the local residents is also rather wide. There is also Cepu, the oldest oil city in Central Java, which is now being turned into an educational center. It is dirty and run down.

Dumai, an oil city on the shores of Rupat Straits (Riau), is developing quickly. Originally, it was only a poor and quiet fishing village, inhabited by less than 500 people. Now it is a city with very good facilities. All of that is due to a flow of oil of more than 800,000 barrels per day from the fields of P T Caltex Pacific Indonesia (CPI) in Riau, which has been in operation for 30 years.

Dumai became important in 1958 when Caltex began to produce oil at Minas (30 km from Pakanbaru) and Duri (110 km from Pakanbaru). To expand its oil business, Caltex built a network of roads from these oil fields to Dumai as a center for transportation and as an oil pipeline distribution point. Later on a harbor for the tanker armadas was also built at Dumai.

This activity awoke Dumai from its sleep. Large numbers of people work there. In a period of only 4 years, since the road was completed and the harbor was ready, the population of Dumai has increased by 60 times. Homes, markets and shopping centers have emerged on several corners. Its status quickly became that of a city that was the headquarters of a subdistrict, and last year it was officially designated as an incorporated city.

About 10 years ago Dumai further increased its standing when Pertamina opened the Putri Tujuh [Seven Daughters] oil refinery there. The total number of people living there had swollen to 80,000. After Pertamina designated it as Working Region II [Wilayah Kerja II], Dumai also became the second largest city in the province after Pakanbaru, which is the provincial capital. About 6 km outside Dumai Pertamina has built Pinang Kampai airfield, which can take F-28 transport aircraft.

Ocean Harbor

Dumai, which occupies an area of 5 square kilometers, appears to have an increasingly open future, especially after agreement was reached with the provincial government

authorities in Pakanbaru to construct a 178 km oil road to Dumai. "This will begin next year. The road will be paved with cement and asphalt," says the mayor of Dumai, Wan Dahlan. Connecting roads to several areas in Riau will also be built, including the Siak River bridge, 350 m in length. The bridge will cost more than Rp 1.2 billion and will be the first road across the width of Sumatra, connecting Dumai on the east coast with Pandang on the west coast.

The future prospects are pushing the provincial government of Riau to move the capital of the Regency of Bengkalis to Dumai. Without waiting any further a number of office buildings of a permanent kind will immediately be constructed. The Ministry of Communications does not want to be left behind and has designated Dumai as an ocean harbor. Piers and warehouses are being constructed. Indeed, Ocean Communications Regional Office II for Riau and West Sumatra will be located in Dumai.

Slowing Down

However, the dream suddenly disappeared in 1974 when Pertamina activity slowed down. A number of construction projects were stopped, thousands of workers were thrown out of work, and even the population declined to 65,000 people. The roads which were not yet completed are now dusty in the dry season and muddy in the rains. The dream of obtaining a supply of clean water also disappeared. The only source of clean water is a water storage tank belonging to Pertamina, with a capacity of 100 m^3.

However, those who have an opportunity to enjoy the blessings of oil, in a direct way, are few in number. The mining sector in Riau only absorbs 70,000 workers, or 5 percent of the total population of 1.8 million people.

Nevertheless, it cannot be denied that there is a kind of gulf between the oil workers and the rest of the population. The lowest income of Caltex workers is Rs 148,000 per month. This gulf appears clearly in the Pakanbaru markets on Saturday and Sunday. On those days the wives of Caltex employees, who live in the housing complex at Minas or Rumbai, get out of their buses and flood the market. Then the price of fish, which is usually Rp 700 per kilo, leaps to Rp 1,500 per kilo, while vegetables or textiles increase by 30 to 40 percent. And all of the goods on sale appear still fresh and new, as if they were prepared for the Caltex families.

Cepu

Another oil city which is also rather well-known is Cepu, which is really a sub-district of the Regency of Blora (Central Java), on the border with East Java. It began in 1890 when a Dutch company found oil in Ngareng village in Cepu. In the course of its development up to now Cepu has become the Training Center for the Oil and Gas Industry. In 1967 there was also established the Oil and Gas Academy.

The choice of Cepu as the Training Center for the Oil and Gas Industry and the Oil and Gas Academy was perhaps the result of the fact that it was there that the first drilling for oil was carried out. Old oil wells are now used for demonstration purposes for the hundreds of government-sponsored university students who come from all parts of Indonesia. The wells still produce, but their production is very

small. Now, for example, of the 235 wells in the Ledok oil field, 11 km Northwest of Cepu, only 15 wells are producing. The wells have been producing since 1893.

Cepu as a city has a larger population compared to Blora, the capital of the regency. Some 25,000 people live there; only a few of them are supported by the oil industry. About 60 percent of the population is composed of farmers, with the remainder composed of manual workers, government employees and merchants. Among the latter, about 200 heads of families are of "nonindigenous" origin (about 10 percent of them are foreign nationals).

Unfortunately, this oil city is dirty. Trash and horse droppings are scattered around the streets. Grass is allowed to grow anywhere. Trishaws and oxcarts are allowed to park anywhere, so that the streets are often choked. However, there is a facility of the Oil and Gas Foundation [LEMIGAS] which can be used by some of the people of Cepu, the drinking water installation. "However, only one-third of the people can use this drinking water," said the subdistrict chief of Cepu, Mohammed Hussein.

Other facilities which can also be used by the public are the swimming pool, the golf course, the soccer field and the tennis court. However, all of this is only for the upper levels of the community. As is the case with the housing complex for other oil workers, the complex of the Oil and Gas Academy at Mentul is well known and stands by itself.

CHAMPASSAK GUERRILLAS FIGHT TERRORISM FROM THAILAND

Growth of Units Noted

Vientiane SIANG PASASON in Lao 22 Dec 80 p 2

[Article by Champassak correspondent: "Non Khoun, A Solid Outpost"]

[Text] Because it is one of the strategic areas of the southern border of our country, since the founding of the LPDR Non Khoun Canton, Phon Thon District, Champassak Province, which has a 20-kilometer long border with Thailand, has become a stronghold in the fight against sabotage and destruction by the American imperialists and exiled reactionaries. [These people] stubbornly spew forth bandit soldiers and reactionary criminals to join with their henchmen from the days of the old regime who are still hiding out among the people to carry out disturbances, murders and threats against the new authorities. They pillage the people's property and have created insecurity throughout the canton as well as nearby areas such as Veun Sai, Sak Meuang, Dong Gnang and Dou cantons. However, at the same time, they have suffered painful defeats due to the efforts of the people who have desired independence for a long time. They have joined with the mobile village guerrilla forces who are very strong in this canton.

As that canton's guerrilla chief pointed out to me, by implementing the party's correct, creative revolutionary line, and a fighting, courageous, militant and unyielding solidarity that dares to think, dares to act, both working and studying to implement all plans of the party, state and administrative authority. Our armed guerrilla units, from the time they were newly established to the time when they became large, at all times have been faithful to the party and to the revolutionary tasks to the utmost. At all times they have a high sense of awareness, firmly grasping weapons in hand night and day. They have overcome all difficulties and shortages with diligence and initiative, mobilizing themselves to fulfill all duties in defending their locality, to preserve the new life of the new regime.

When first established, we had only a few overt guerrilla units. Others were covert, hiding in each village with only three guns. As of the beginning of 1979, we had widely expanded our guerrilla units and armed them with dozens of weapons which included mortars, firepower [kamlangfai] and others. Aside from training in combat strategy and tactics, studying political theory and boosting production, over the last 5 years the guerilla units of each village have emulated to achieve step-by-step victories. During that time, they have been active in stopping the

ideology of the robbers, criminals and exiled reactionaries on dozens of occasions. They have killed 43 of them, 2 surrendered, and they seized 12 weapons. They hit and stopped them from stealing cattle and buffalo and recaptured those animals stolen by the reactionary exiles and returned 331 animals to the people. They also joined with the border defense forces to kill the robbers and protect public security on dozens of occasions.

All of this not only does a good job of defending public security, but it also allows them the right of being masters of the nation, and collective mastery in preserving, defending and building the people's new regime, making it grow bigger and stronger, purer and cleaner.

Along with that, all of Non Khoun Canton, today as in the future has become a garden of the new socialist man, the working people who have a spirit of being masters of the nation, of collective master, who know patriotism, and love the socialist regime with a revolutionary aggressive spirit, who never back away from difficulties and want to respect and preserve the collective property, and respect the laws of the state. They have a spirit of great love, solidarity, and mutual assistance between working people in order to build new lives. They know enough to combine the common good with their individual interest. They know how to make happy families with a total sense of responsibility in looking after and raising their children.

Non Khoun Canton is now a firm outpost of Champassak Province. It is now reinforcing and expanding its strong points in its national defense tasks and public security work and in the work of building its locality into a more progressive, stronger one.

Thai-based Insurgency Noted

Vientiane SIANG PASASON in Lao 24 Dec 80 pp 2,3

[Article in "Good Subject, Better Person" Column by B. Vatthananon: "Uncle Pian Phanphila, Brave of Heart"]

[Excerpt] Pho Kham Canton, Phon Thong District, in Champassak Province is one of the cantons along the Thai border, not very far away at all from the enemies who regularly carry out acts of disturbance and insecurity. Although our country has been completely liberated, the counter-revolutionaries have not abandoned their schemes and wicked tricks. They are coming over to cause trouble and sabotage our new regime in many ways in order to put pressure on us and prevent us from building and developing our nation as we want.

To stop and wipe out these counter-revolutionaries, the district and provincial administrative authorities have promptly upgraded and built bases and organized a guerrilla network within this canton.

Uncle Pian Phinphila is one person who became conscious and volunteered, along with his family, to take part in the public security work within his canton. Although he is elderly--46 years old--his spirit is still strong, filled with patriotism and a love of the new regime. This is what drew him to his responsible duty as one of

the committee members of the Pho Kham Canton guerrilla platoon. Four or five years ago, since the unit was armed as a guerrilla unit, he has brilliantly fulfilled his duties, making the multi-ethnic population in the canton dearly love and trust him. Wherever and whenever the enemy comes to operate, the people come to inform him promptly, making the enemy give up in defeat and death to return to Thailand dispiritedly. Recently, he has been in large-scale combat four times. He killed four enemy and has been in many small-scale actions. Primarily, in October of 1979, his guerrilla platoon was surrounded by the enemy. Although on the brink of defeat, his guerrilla unit was not demoralized and brought to bear strategy and tactics skillfully, making the enemy flee in disarray. His troops pursued them, wiping them out of the canton. In this pursuit, they came under heavy enemy fire, with less than 20 meters between them and the enemy. He fired to stop them and ordered his own son to wipe out the enemy, but the enemy shot him first. His precious son lay bathed in blood as Uncle Pian snatched up a gun and took after the enemy and then took up his son in his arms. When he could no longer bear to look at his son's condition, he spoke to him before he died: "You have died with the glory befitting a Lao youth and a child of your father." The youth simply turned his head and died. The tears and blood of hatred welled up. Uncle Pian rose up and grabbed his weapon solidly and blasted the enemy, chasing them until he cornered them, holding down the enemy guns with his feet and then slaughtering them.

Although he has lost his beloved son, he is not sorry and is not faint-hearted in his task. He has a spirit of hatred for the enemy and will sacrifice everything for the collective good. He is determined to take part in public security work in his canton unirngly. No matter where or under what weather conditions or time of day, when he learns that the enemy is active, he and his guerrilla unit goes right out to stop them and pursue them.

CSO: 4206

BRIEFS

VAPI DISTRICT STATISTICS--This district [in Saravane Province] comprises three cantons: Houai Khon, Saphat and Samia. It has a total of 58 villages and a population of 18,970 people which include two nationalities: Lao Theung and Lao Loum. Its economic base is mainly the production of rice. [Excerpt] [Vientiane SIANG PASASON in Lao 12 Dec 80 p 2]

SANAKHAM RICE SALES--Since the beginning of December, the Vientiane Trade Corporation has sent trade cadres to Sanakham District, Vientiane Province to join with the administrative authorities in the localities to purchase rice from the people living in the production bases throughout the district. This has been done with a spirit of urgency and dilligence. In making the purchases from the people, they set up 10 mobile purchasing units, each of which took various types of goods such as kerosene, bicycles, cloth, corrugated metal roofing, salt, blankets and household goods with them to sell to and barter with the multi-ethnic population in each locality. In attentively performing their duties, to date they have been able to purchase more than 200 tons of rice from the people in the various localities of Sanakham District. Of that the movement to sell rice to the state obtained much rice in Nam Kouan, Na Sak, Na Phieng and Sanakham cantons. The people in each locality were proud and happy to take part in selling their surplus rice to the state to form the capital to build and develop the nation so that it would steadily grow stronger and more prosperous. [Text] [Vientiane SIANG PASASON in Lao 20 Dec 80 p 1]

NEW COOPERATIVES FORMED--Because they understood clearly the party and state directives in building the economy that would preserve, defend and build socialism in our country at the present time, making it prosperous and strong, in 1980, the multi-ethnic population in Luang Prabang Province has voluntarily turned from small-scale, scattered production to collective production in accordance with the directive of large-scale socialist production. They organized 74 agricultural cooperatives with 17,086 members, 2,620 hectares of wet-rice fields, 1,816 draft animals and a complete set of production implements. The best performance was from Nan District which was able to set up 23 agricultural cooperatives. [Excerpt] [Vientiane KHAOSAN PATHET LAO in Lao 16 Dec 80 p A 8]

THAKHEK TAX COLLECTIONS--After completely collecting and storing their annual wet-rice crop, recently the farmers in Na Se, Ban Tham, Dong Tai, Sikhot, Chomthong and Na Ngeo cantons in Thakhek district, Khammouan Province joined together to pay on their annual crop to the state based on their harvest income. They paid with pride. Of the total involving more than 140 tons of rice paid, Dong Tai Canton paid nearly 55 tons of rice to the state. [Excerpts] [Vientiane KHAOSAN PATHET LAO in Lao 16 Dec 80 pp A 9, 10]

SARAVANE RICE SALES--Since the beginning of October, the multi-ethnic population of Toumlan and Khong Sedone Districts in Saravane Province have voluntarily brought in their families' excess rice for sale to the state at the set price. They did this happily. The total amount involved was more than 180 tons. Of that, the people of Khong Sedone District sold nearly 171 tons of rice to the state. Selling rice to the state not only brings more income to the family, but also makes a contribution to building capital for the state to use in its task of preserving, defending and building socialism in our country, becoming prosperous and strong. [Text] [Vientiane KHAOSAN PATHET LAO in Lao 17 Dec 80 p A 6]

TAX PAYMENTS, SALES TO STATE--According to news reports from the Ministry of Industry and Trade, since the middle of November to the beginning of December, the multi-ethnic farmers of all races in the production bases in the localities of various provinces throughout the nation have strengthened and expanded their rights as masters of the nation and rights to collective mastery along with a high sense of decisiveness to take part in paying agricultural taxes and selling excess rice to the state in a wide-spread and joyous movement. According to still incomplete figures that have been reported from nine provinces, to date some 5,080 tons of rice have been purchased from the people, of which 5,000 is unhusked rice. The movement to pay the state agricultural tax has yielded 1,846 tons. In the movement to sell rice to the state, the best performance was turned in by Attopeu, Savannakhet, Vientiane and Sayaboury provinces. At present, the sales of rice to the state and the payment of agricultural taxes by the farmers in each locality are coming along in a spirit of fun and vigor. It is felt to be a great contribution by Lao farmers to use rice in building and developing the nation to become bigger and stronger step-by-step [Text] [SIANG PASASON in Lao 24 Dec 80 p 1]

ISLAMIZATION OF COMMERCIAL BANKS DESCRIBED

Islamabad THE MUSLIM in English 30 Dec 80 pp 4,7

[Article by Abdul Jabbar Khan, president, Habib Bank Limited]

[Text]

IN VIEW of the clear and unequivocal commandments of the Holy Quran on the subject, the elimination of 'riba' is the bounden duty of an Islamic State. The Constitution of Pakistan 1973 in its Article 227 provides that all existing laws shall be brought in conformity with the injections of Islam as laid down in the Holy Quran and Sunnah. There is complete unanimity among all schools of religious thought that the term 'riba' covers interest in all its manifestations. It is unfortunate that during the first three decades of the country's existence as an independent state, no attention was paid to the elimination of 'riba'. The work of finding ways and means to eliminate interest started in right earnest only in the second half of 1977.

Since July, 1979 under a Presidential Order, the working of (1) Mutual Funds floated by Investment Corporation of Pakistan, (2) National Investment Trust and (3) House Building Finance Corporation has been so remodelled that these bodies have totally done away with the element of interest. Investors' scheme of Investment Corporation of Pakistan has also been brought under the interest-free system from 1st October, 1980. Very encouraging is the fact that they are not only free from interest-based investments but their business also is steadily growing.

Effective from 1st January, 1981, arrangements have also been made in all the nationalised commercial banks throughout the country to accept deposits on Profit and Loss Sharing basis.

TWO SUGGESTIONS

During discussions held at various forums, on the Islamization of commercial banks, the following two suggestions were made in respect of acceptance of deposits by banks:-

One suggestion was that with effect from the appointed date, depositors be given the following options:-

(a) They may keep their savings with the banks as loans to the latter without sharing the profit and loss of the bank. They can withdraw the money any time they like. The Federal Government would guarantee the safety of their loans with nationalised commercial banks as at present. These loan accounts would be just like present current accounts of banks. It has been stated by persons having knowledge of 'Shariah' that unless such deposits are treated as 'loans', the banks/financial institutions would not be able to use the funds. Or:

(b) They may keep their funds in interest-bearing accounts just as they do now. This option will be available during the interim period of, say, three years. Deposits kept on interest basis during the interim period would continue earning interest till their respective maturity dates, even if the maturity dates fall beyond the interim period. This arrangement during the interim period, is essential to retain confidence of the depositors so that shift to the new system does not adversely affect the resources of the banks. Or:

(c) They may open deposit accounts on profit and loss sharing basis. These accounts may also be of any duration, i.e., they could operate like savings accounts through cheques or they could be for a fixed period like short term or fixed term deposits. As at present, deposits of different maturities will have different weightages for sharing profit and loss. These weightages will be laid down by the State Bank of Pakistan. It was hoped that with the successful operations of the new system more and more accounts would come over to this category even during the interim period.

Supporters of above alternatives felt that if any depositor wanted to shift to the Islamic System immediately he should be provided with such an opportunity. Besides banks would gain experience in handling such accounts. Such experience would be useful when the banking sector shifts to Islamic system *in toto* at the end of the interim period.

The other suggestion was that instead of giving the above three options to depositors during the interim period, deposits be allowed to remain under the present system of interest and at the end of the interim period, should be brought under the Islamic system *in toto* and no fresh deposits be accepted or renewal of the existing ones be made on the basis of interest after that date. Advocates of this alternative argued that assets side of the banks/financial institutions should first be cleaned, so that income from sources other than interest was sufficient enough to be distributed among deposits made

with the banks on profit and loss sharing basis.

The Federal Government ultimately decided to adopt the first view, i.e., depositors have been given the option of keeping their deposits either on Profit & Loss Sharing basis or under the existing interest-bearing system during the interim period.

Information about rules governing the PLS deposits can be obtained from any branch of the five nationalised commercial banks or branches of other banks which are accepting such deposits. Some salient features of PLS deposits are, however, given below for general information:-

(i) Following categories of accounts can be opened in the nationalised commercial banks on profit/loss sharing basis:-

(a) PLS Savings Accounts.
(b) PLS Term Deposit Accounts.

(ii) PLS Saving accounts can be opened by individuals in their own single or joint names. The PLS Savings accounts can also be opened for Provident Fund or other benevolent funds of companies, firms, organisations of Welfare and Educational institutions. These accounts can be opened with a minimum sum of Rs. 100.00 Money can be withdrawn only through cheques from the accounts. To share in the profit, it is also essential to maintain a minimum balance of Rs. 100.00 in the Accounts.

(iii) PLS Term Deposits Accounts with a sum of Rs. 1000.00 or its multiple can be opened by individuals, in their own single names, or joint names. The companies, firms and other organisations may also keep PLS term deposits. PLS term deposits would be for following terms:-

(a) For six months and over but less than one year;
(b) For one year and over but less than two years;
(c) Two years and over but less than three years;
(d) Three years and over but less than four years;
(e) Four years and over but less than five years;
(f) Five years and over.

The Account can be opened with a cash deposit or by converting existing (existing on the day of introduction of the new system, i.e., on 1st January, 1981) interest bearing Term Deposits into PLS Term Deposit Account. Special facility has been provided in the latter case, i.e., the loss otherwise suffered in encashing premature Term Deposits will not occur in this changeover, provided that PLS Term Deposit is taken for, or more than, the unexpired period of the interest-bearing term deposit being converted.

Besides in the existing interest-based system, the fixed deposits are transferred to a separate overdue fixed deposit account on maturity whereafter the deposit ceases to earn interest. As such, the account holder loses interest on matured fixed deposit unless he obtains renewal. Under the new PLS Term Deposits, more liberal facility is offered. If, under certain circumstances, the depositors fails to withdrew his/her/their PLS Term Deposits on maturity, the funds will remain temporarily in use for profit sharing and out of profits earned a reasonable share would also accrue to such (overdue) PLS Term Deposits.

The PLS Term Deposit holders may also be allowed at the discretion of the banks, some interest free credit facility against the security of their PLS Term Deposits kept with the bank duly discharged and subject to recovery of a service charge. The amount of credit so allowed to a term depositor shall not qualify for participation in the profit.

(iv) All profit and loss sharing accounts in the banks shall be kept absolutely separate from interest-bearing accounts. Differently designed account opening form, pay-in-slips, term deposit receipts, cheque books etc., will be used for PLS accounts.

Devising a framework of interest-free banking is a challenging assignment. The task is all the more formidable because of the nature of the economy Pakistan inherited from the West and which we have continued to develop on the same pattern. Interest happens to be the main pillar of the economic edifice. The country's internal and foreign transactions and particularly its financial policies and institutions all are geared to this vital principle.

Replacement of the present structure by a more just and equitable system in conformity with the injunctions of Islam demands wholesale changes in every sector of our economy. The task becomes more difficult in view of the fact that we have no precedent before us to follow. We will have to charter our own course.

During discussions on this subject it was soon realised that while there would be no problem in cleansing up-the liabilities' side of the commerical banks' balance sheets, formidable difficulties would be faced when the assets' side of the bank's balance sheet, i.e., loans and investments, particularly the loans, is brought under the purview of 'Shariah'. Keeping this in view three different options were considered. The first was that a beginning may be made by setting up a model bank which may start operations on interest-free basis and from the experience gained from its working, the operations of the commercial banks and other financial institutions may be reorganised on interest-free basis subsequently. But this option has the following disadvantages:-

DISADVANTAGES

a) Setting up a new institution will take time and still longer time will be taken before it takes any root in the system. The question of gaining from its experience would arise much later.

b) It would be waste of money and experienced hands when both are not available in abundance in the country, particularly when, existing commerical banks can also do the job perhaps in a better way because of larger resources of men and money and wider network of branches at their disposal.

c) If the borrowers have the choice either to borrow money from commercial banks at a fixed rate of interest, or borrow from the new institution on profit and loss sharing, all highly profitable projects would borrow from commercial banks and less profitable and loss-incurring projects would come to the new institution for accommodation. Earmarking of certain field of finance exclusively for the new institution may also not be easy as commercial banks with much larger resources available at their disposal would not be kept away from any field of finance. Examples of already existing specialised institutions like ADBP, IDBP, ICP etc., are before us.

d) If a model bank is floated in the midst of competition with added disadvantage of 'lack of precedent', its success, if at all it comes, will take a very long and gradual course. The depositors will be faced with a dilemma 'to bank' or 'not to bank' to the detriment of the model bank.

The second option was to prepare a comprehensive scheme for a complete switch over to the

interest-free economic system and then decide on the timing of such a switch over. This option did not commend itself as the elimination of an institution as deep-seated and pervasive as interest at one stroke at any future date and replacing it by a new system could give rise to a number of intractable problems and adjustment.

The third option was to eliminate interest from the economy under a phased programme. Since this appeared to be most practicable and reasonable, the Council of Islamic Ideology recommended it and the Federal Government decided to follow this course of action. As such, the cleansing up of assets side of the banks would be done in three or more phases. The first phase begins from 1st of Jan., 1981. Effective from this date the deposits received on PLS basis will not be used by the banks in interest-bearing operations. Councils of Islamic Ideology, Government of Pakistan, while pointing out that ideal alternatives to interest in an Islamic economic system are Profit and Loss Sharing and Qarz-e-Hasna, have also cleared the following devices to replace the fixed interest system in some cases in view of the difficulties in the practical application of system of Profit and Loss Sharing in these cases:-

i) Time Theory/Fractional or Time Multiple Counter-loans.
ii) Discounting of equity.
iii) Leasing.
iv) Hire purchase.
v) Investment Auctioning;
vi) Bai Muajjal or Mark up;
vii) Bai Salam.

However, in the first phase commencing from 1st January, 1981 the banks would make use of the Bai Muajjal, i.e., 'mark up', device to finance all or some of the following:-

a) Foodgrains and commodity operations of the Federal and Provincial Governments and their organisations.

b) Documentary export bills negotiated under Export letters of credit.

c) Documentary Inland bills.

d) Trading operations of the Rice Export Corporation of Pakistan (RECP), Cotton Export Corporation of Pakistan (CECP) and Trading Corporation of Pakistan (TCP) and

e) Documentary Import Bills, drawn under import letters of credit. In addition to the above, banks may also purchase NIT Units, ICP Mutual Funds, Participation Term Certificates and shares of ICP and Bankers Equity Limited out of the funds received by them in PLS deposits. Besides, banks may also provide funds to House Building Finance Corporation and share in latter's income.

(i) Profit received under 'mark up' by the banks on transactions (a to e) mentioned above, (ii) share of profit, if any, on Participation Term Certificates, (iii) Dividends received on NIT Units, ICP Mutual Funds and on shares of ICP and Bankers Equity Limited, and (iv) income received in respect of finances provided to House Building Finance Corporation would be distributed half yearly after deduction of normal bank expenses and making of normal provisions, among the depositors etc., on daily product basis. Share of loss, if any, on Participation Term Certificates purchased out of the PLS deposit funds would, however, be deducted from the profits received from other investments mentioned earlier, before distribution among PLS Depositors.

The Federal Government has agreed that the profits accruing to PLS deposits shall be reckoned as dividened which as per the present Income Tax Rules, is exempted from Income Tax upto Rs. 15,000/- per annum.

It would be of interest to know that discussions by the bankers on Islamisation of banks held with members of Islamic Ideology Council, its Chairman and other learned theologians have been very fruitful. During discussions, 'Shariah' experts showed a deep sense of understanding of the problems and have always endeavoured to find workable solutions thereof by interpreting 'Shariah' in the context of present day social order. This appreciation of modern banking complexities and willingness to do 'ijtehad' should augur well for the Islamisation process of banks. For the sake of smooth and proper shift over to the Islamic banking system, dialogue between bankers and theologians should continue.

Effective from 1st January, 1981 the nationalised commercial banks are also introducing Qarz-e-Hasna Scheme for Education. Under this scheme loans may be granted to all nationals of Pakistan including those from Azad Kashmir who are of an age not exceeding 35 years and are desirous of pursuing studies within and outside Pakistan.

The facility will be limited to studies in subjects approved by the Federal Government. The amount of loan for studies in Pakistan will not exceed Rs. 6,000.00 per annum with a maximum of Rs. 25,000/00 for the entire duration of the course. An essential condition in this regard is that access to the loan facility and its continuation shall be subject to satisfactory performance of the student and shall be renewable on year to year basis.

As for studies abroad, no loan will exceed U.S. dollar 5,000.00 per annum. However, if the period of study is more than two years, the total advance for the entire duration of the course will not exceed U.S.$ 10,000.00. Maximum limit of loan under this scheme for studies outside Pakistan will be foreign exchange quota fixed by the State Bank of Pakistan for such studies less the amount of scholarship etc., if any, granted by the foreign university/institution. A grace period of two years will be allowed after the completion of studies. Thereafter repayments will commence in monthly instalments till full repayment is effected within ten years.

In case of a drop-out, unsatisfactory academic performance or breach of any clause of the loan agreement, loan will become repayable immediately. The borrowing student will have to furnish a bond that after the successful completion of the studies for which a loan has been granted to him, he would serve in Pakistan at least till his loan is fully repaid, failing which he would pay penalty equal to twice the amount of the loan outstanding. Of course, after successful completion of the studies for which loan has been granted to him, the borrower would be provided an opportunity to serve in Pakistan.

The dawn of the new calendar year will witness beginning of a new era in the banking history of the country. The

measures proposed towards the implementation of first phase for purifying operations of the commercial banks will mark revolutionary start to the first initiation of Islamisation of the national economy. The process will reinforce the conviction of all those who have sincerely been cherishing attainment of a true and real Islamic order in all facets of national activity. It will also expose bogy of contention raised by vested circles that the intricate and complex character of present-day economic functioning is so well-entrenched that it cannot be re-structured outside the parametres of capitalism and socialism. While it may for the time being be interpreted as the mere fancy of Islamic jurists, there cannot be any shade of doubt about the inherent strength of Islam as the most comprehensive and all-pervasive lasting code of human life which is capable of regulating it in all its hues and colours. What is demanded is unflinching faith in this reservoir of vitality and an unshakable will to conduct affairs of the state under the beacon light of Islam. It is the utmost satisfying that presently there is no lack of this will in the ranks of the nation as well as in the national leadership.

INTEREST FREE BANKING DECLARED SHAM

Karachi BUSINESS RECORDER in English 12 Jan 81 p 2

[Editorial: "Where Is the Difference?"]

[Text]

What we were afraid of and the risk on which we had tried to focus attention in an editorial entitled Asl and Riba published on November 22 last year, has unfortunately come to pass. Champagne will still be champagne even if we call it Bint-e-Enab and bear will be bear even if it is called Aab-e-Jao. And if fixation of time and return on a loan constitutes Riba, then give it whatever name you will—profit, commission, service charge or mark-up —it will still be Riba. And if bank interest is Riba and a thorn in our economy, then a thorn will remain a thorn by whatever name you may call it. Just because banks cannot be trading organisations involved in Bai (trading) and currency transactions would not be accepted by fundamentalists as leasing, we seem to have played the same game as has been played in some other countries and that is attempting to get around our own given definition of Riba through the medium of semantics.

The State Bank of Pakistan's circular published in the daily newspapers of Saturday last makes it so obvious even to persons of below average intelligence that the system of fixed return over a fixed time period which was hitherto known as interest, will henceforth be known as mark-up. And what is worst is that not only the usurous system of compounding has not been given up but has been made more lucrative for the

banks under the mark-up method.

Islam stands for speaking and observing truth in words, deeds and spirit. Let us pause and think as Muslims if the mark-up system as announced differs in word, deed and spirit, except for nomenclature from the system of commission and returns to the banks as at present. And if there is no alternative, then do we make anything Islamic just by giving it a new name? The impression that prevails in the minds of the people regarding the interest-free banking system is that the banking institutions will be participants in the profits or the losses of the clients who would be transacting business with them. One fails to understand how with this mark-up method the banks will involve themselves in the gains or losses of their clients. They would mark up or mark down the prices and would charged their commission irrespective of what fate their clients meet. If it has to be so and if the word interest has become so obnoxious and synonymous with Riba and usury, why did we not simply adopt the word profit which is now being widely used abroad and has been so successfully adopted by the Directorate of National Savings for its various schemes? Indeed, it would have been more honest. The Islamic Ideology Council owes it to itself and the people of Pakistan to publish its opinion on the mark-up method. So far as we can see the mark-up method as has been spelled out is neither Islamic nor un-Islamic. Why give it a name it does not deserve?

SUBVERSIVE LITERATURE RING UNCOVERED

Lahore VIEWPOINT in English 9 Jan 81 p 14

[Article by Iqbal Jaffery]

[Text]

INTELLIGENCE agencies here have unearthed a ring engaged in clandestinely printing and dissemnating subversive literature.

A few arrests have been made in Karachi and further investigations are in progress, according to an official handout issued on January 3 by the Government of Sind.

On January 3, all those arrested were produced before the Summary Military Court at the MPAs Hostel and all of them were remanded to police custody till January 10.

According to official sources, the arrests made so far are said to total 52. A few journalists working in a local Urdu Weekly, 'Al-fatah', are among those arrested on January 1 from various parts of the city.

Prominent among these are Irshad Rao, Wahab Siddiqui, Wahid Bashir, Editor and Assistant Editor, respectively, of 'Al-Fatah', Naeem Arvi of the Daily 'Mashriq' and Sharaf Ali. They have been charged under various Martial Law Regulations.

In September last, a cell working underground in Karachi & Hyderabad was traced and a number of arrests made. A few days later, a similar cell was unearthed in Multan. The most recent case was reported from Islamabad last month.

POLICE ORDERED TO ADMINISTER FAIR JUSTICE

Islamabad THE MUSLIM in English 27 Dec 80 p 3

[Text]

ISLAMABAD, Dec. 26: The Punjab Government has directed high police officials to take certain measures for expeditious and fair dispensation of justice. It has also pinpointed areas of weaknesses in the functioning of Police and Magistracy.

These include hardships the people face in the registration of cases with the police; absence of the accused from the Courts; undue delay in the submission of challans; poor turn-out of the prosecution witnesses; huge, unmanageable number of summary cases; long delay in the disposal of criminal cases and lastly, the malpractices in the examination and checking of traffic and vehicles.

REGISTRATION OF CASES: It has been observed that the ordinary persons, specially in the rural areas, can seldom hope to get a case registered even though the crime may be as serious as burglary. At times the poor villagers have to 'move mountains' for getting police help.

It has been suggested that the Local Councils could be of help in the reporting of crimes within their jurisdiction. This, in fact, is one of the duties of the elected Local Councils as incorporated in the Ordinance of 1979.

The Government plans to make it obligatory for the local police to register a case as and when the commission of an offence is reported by a Union Council. This, the Government feels, would definitely help in ensuring free registration of cases.

It has been noted that a large number of cases has been lingering on for years, thus eroding public confidence in the Administration.

In certain Districts, the number of cases which are pending because of the non-appearance of the accused is as high as 20 per cent.

The Government may launch a whole-hearted campaign against such absconders.

It is pointed out that often the submission of challan is delayed for months which could lead to enlarging the potential of mischief by investigating agencies.

The District Magistrates and Police Superintendents have been asked to ensure that challans are submitted within the specified period of 15 days.

On the summoning of the witnesses, it has been observed that unless at last 50 per cent summoned by the Courts are made to attend, the judicial system cannot be made to function ever at the optimum level.

A plan of action has to be devised by every District Magistrate for the disposal of all pending summary cases within less than three months.

Special attention has to be paid to the disposal of old criminal cases pending for years. All such cases pending for more than two years must be disposed of within three months.

It is alleged that huge amounts of black money changes hands in the process of examination of public vehicles as well as during traffic checking. Both systems require to be re-examined and improved. For example, traffic checking can be done by teams of officers instead of individuals.

All concerned departments have been asked to send their progress reports on the implementation of the suggestions made by the Government to Lahore.

PROVINCES ASKED TO FORM LAW, ORDER COMMITTEES

Islamabad THE MUSLIM in English 5 Jan 81 p 1

[Article by Qaiser Butt: "Law & Order Bodies Soon"]

[Text]

ISLAMABAD, Jan. 4: The Federal Government has asked all Provincial Governments to set up law and order committees in their respective provinces to strengthen the law and order situation in the country, an official source told The Muslim here today.

Following the directive, the Punjab Government has already set up a six-member committee, the source said and added that its first meeting would be held in Lahore on Jan. 24. The committee was constituted from among the Chairmen of various District Councils' Corporations and the other officials. The Governor, who is also the Chairman of the Provincial Council, has approved the constitution of the committee, he added.

The members of the committee are: Mohammad Raja Basharat, Chairman Rawalpindi District Council, Mohammad Riaz, Mayor of Faisalabad Corporation, Ch. Mohammad Iqbal Dar, Chairman of Sheikhupura Municipal Corporation, Nawab Liaquat Ali Khan, Vice-Chairman of Multan District Council, Khakan Babar, President of All-Pakistan Free Legal Aid Association, Lahore, and Maj. (Retd) Mohammad Akbar, Chairman of District Council, Attock.

The source said the committee would discuss the current law and order situation in its meeting this month in Lahore. Such committees in the other provinces would be set up soon, he added.

AUTHORITIES URGED TO DEVELOP NORTHERN AREAS

Lahore THE PAKISTAN TIMES in English 7 Jan 81 p 4

[Editorial: "Uplift in Northern Areas"]

[Text]

The Northern Areas Council has just concluded its latest session and finalised the various public sector projects for the next fiscal year. The commissioner and the councillors taking part in the discussions underlined the need of continued central subsidy for items like kerosene, wheat and sugar whose supply in the Northern Areas is conditional to good communications during climatically difficult winter months. The representatives also discussed the development schemes proposed and in progress in the areas. The Northern Areas have a characteristic economic pattern. Subject to a climate unique in the country and difficult of access from the plains, they are rich in the production of fruit while lacking in conventional food crops like wheat. Cold but dry for months, they need an efficient system of irrigation in the valleys. In Gilgit agency, for instance, the valley's fast running streams have to be controlled and channelled for agriculture and prevented from pouring headlong into the Gilgit river. The economy of fruit has to be supported with the setting up of canning and drying factories.

Rural uplift in the Northern Areas is the backbone of the development planning of the region. Its Directorate of Local Bodies and Rural Development was given Rs. 10 million late last year to spend on projects providing drinking water, roads, bridges, water-channels, rural electrification, cottage industry and local handicrafts. Although not a big allocation in itself, the amount, if spent in good time and on projects directly affecting public welfare, will change the complexion of the Northern Areas. In the circumstances that prevail, the public servants will have to participate whole-heartedly in the development work. There is no room for taking things easy, and there must be strict safeguards against such a tendency. For instance, in the last six-month period the allocation of Rs. 63 million for various schemes could not be fully utilised and only Rs. 40.8 million were disbursed on running projects by November. The Government has taken note of this slow-down and has pulled up the region's administration and has appealed to the people's representatives to work with dedication for the improvement of their constituencies. The economic possibilities in the Northern Areas are infinite; we need enthusiasm, creative thinking and application on the part of administrators and representatives to realise them.

BALUCHISTAN TO GIVE FOOD, FRUIT PRODUCTION PRIORITY

Karachi MORNING NEWS in English 10 Jan 81 p 2

[Article by Asif Ali]

[Text]

QUETTA, Jan 9: The Baluchistan Government had attached top most priority to the production of food and fruit in the province, official sources said here today.

Wheat-sowing was in full swing over an area of 4.47 lakh acres of land during the current rabi season.

More than 50 per cent of sowing has been completed while remaining sowing will be over by next month.

The wheat target has been fixed at 2.4 lakh tons this year as against 2.25 lakh tons during the corresponding period last year.

The Government has given facilities and incentives to the farmers to maximise wheat production.

These incentives include provision of Rs 30 lakh taccavi loans and 25,000 maunds of good quality high-yielding wheat seed for the farmers.

A chain 58 fertilizer depots has been set up to ensure easy supply of fertilizes to the farmers throughout the province

About fruit production, he said that 2.62 lakh tons of different types of fruits have been produced this year.

Valued at Rs 12 crore fruit had been produced by the farmers in the province during the corresponding period last year. Fruit production was 2.52 lakh tons.

JOINT FISHING VENTURE CRITERIA ANNOUNCED

Lahore THE PAKISTAN TIMES in English 22 Dec 80 p 10

[Text]

KARACHI, Dec. 21: The Federal Government has announced the criteria for joint fishing venture in exclusive 200 nautical miles economic zone of Pakistan.

This has been done to facilitate the intending Pakistani entrepreneur to collaborate with foreign fishing companies to exploit the marine resources.

The criteria for joint ventures include certain clauses to protect the interest of small fishermen as well as to benefit the country.

According to the criteria the duration of joint venture agreement, that would be extendable by Government, shall not be less than one year, and it would be counted from the date of arrival of foreign vessel in Pakistani waters.

Under the agreement the Pakistan Government will be eligible to terminate the agreement at any time by a written notice but the period of notice will not be less than one month. Fishing will be allowed beyond 25 miles along the Sind coast and beyond 12 miles along Baluchistan coast upto 200 nautical miles in the exclusive economic zone of Pakistan. No fishing for any kind of fish will be allowed in the territorial waters, it adds.

The marketing and export of catch will be subjected to prior permission in writing from Government and to the prevalent rules and regulations.

According to the criteria the percentage of equity to be shared between the Pakistani firm and their collaborators as well as other terms and conditions of sharing the operative expenditure of the vessels and catch will be determined by mutual agreement between the Pakistani firm and their collaboratory. It stipulates that the contracting party shall pay to Government royalty as high as possible, but not less than 10 per cent of the total catch. The contracting party shall open, maintain and operate a foreign exchange account and deposit therein for payment to Govrnment as high as possible but not less than 30 per cent of the exportable catch value.

The income from the joint fishing venture shall be exempted from income tax duties until June 31, 1983 and subject to such further extension or otherwise as allowed by the Central Board of Revenue.

The criteria also stipulates that foreign fishing vessels during their presence in Pakistani waters will employ Pakistani crew which will not be less than 50 per cent of the total deckhands on board.

The foreign collaborators will also impart training to Pakistanis in the marine fisheries so that the local fishermen could use the latest techniques and benefit from their experience.

The foreign vessels in Pakistani waters will abide by all the laws, rules and regulations in force in Pakistan and shall be liable to the prescribed penalties applicable for violating any such laws, rules and regulations, the criteria adds.—PPI.

FISHERIES DEVELOPMENT PROJECTS FOR SIND REPORTED

Islamabad THE MUSLIM in English 20 Dec 80 p 6

[Text]

KARACHI, Dec. 19: Fish and shrimp production of Sind Province could be increased from 24,000 million tons in 1979 to over 150,000 million tons by the year 2000.

The feasibility studies carried out by the Asian Development Bank indicate that the sea fish production from National waters could be increased from 500,000 million tons in 1979 to over one million tons by 2000.

The Provincial Government had sought technical and finance assistance in early 1979 from the Asian Development Bank to undertake detailed feasibility studies.

The country is faced with serious animal protein gap to an extent of about 80 per cent of the optimum requirements. Sind, which can meet the requirements of protein to a great extent commands 70 per cent of the fresh water and about 60 per cent of the marine fisheries resources of the country. The inland fisheries resources comprise an area of 7.6 million hectares, whereas the marine resources stretch to about 42.2 million hectres in exclusive economic zone.

On the basis of the studies made by the Consultants, two major development projects were formulated. Foreign consultants and local officials are being appointed for the execution of these projects and other measures are also in progress.

Under one of these projects a loan agreement was signed between Pakistan Government and the Asian Development Bank of Dec. 20 last year. The Project involves a total cost of Rs. 230 million, about Rs. 110 million in foreign exchange. Out of it the Sind Province component shall cost Rs. 70 million in public sector and Rs. 70 million in private sector through the Agriculture Development Bank of Pakistan.

Under the other Development Project, credit facilities will be available to fish farmers and fishermen, for setting up fish farms and fish ponds over 2,600 acres, ice plants and cold storages at Kinjhar and Bakar Lakes, besides operating insulated and refrigerated fish farms, and to supply 100 boats and 200 outboard motors, better gears and equipment through the Agriculture Development Bank of Pakistan.

This project is anticipated to be completed in June 85. It will result in increasing inland fish production from 24,000 million tons in '79 to 49,000 million tons in '85, increase exports by Rs. 10 million.

To develop marine fisheries the Karachi harbour is to be rehabilitated and improved at a cost of Rs. 120 million. It is expected to be available as a grant from the European Economy Community both in foreign exchange and local currency.

A new fish harbour is to be constructed at Korangi Greek at a cost of Rs. 335 million the Karachi fish harbour improvement is expected to be completed in 1983 and the Korangi fish harbour in 85.

Negotiations with the Asian Bank have been concluded for this project at Manila in the second week of November last and the loan agreement is expected to be signed sometime this month.--APP

CARBON BLACK PLANT ENTERS EXPORT MARKET

Karachi BUSINESS RECORDER in English 21 Dec 80 p 1

[Text]

The public sector carbon black plant, first in the country set up by National Petrocarbon Limited, a company of State Petroleum Refining and Petrochemical Corporation (PERAC) has entered the export market.

Accorrding to PERAC sources the maiden consignment of 125 tons of carbon black against an initial total export order of 1,345 tons valued at Rs 8.7 million was exported yesterday.

The plant which started production in the current fiscal year has met the total requirement of carbon black for the current year. The present domestic demand is around 2,000 tons annually.

The plant will save Rs 12.2 million annually by way of import substitution and earn between Rs 20-30 million through export of surplus products in the initial years of its operations.

The plant will meet the entire demand of the country's tyre and rubber industries.

The plant which has brought a new technology in Pakistan has been set up at Bin Qasim under the "pay-as-you-earn" scheme at an estimated cost of Rs 160 million including Rs 90 million in foreign exchange.

A French company has designed and established the plant on turn-key basis under a suppliers' credit of Rs 76.8 million repayable in 10 half yearly implements. The process is of an American concern.

The raw material for the manufacture of carbon black would be a bye-product of the "furfurol" extraction unit of the National Refinery Limited. The raw material would be transported to the plant by road in tankers in 7,000 tonnes capacity tank built at the refinery. About 2,500 tonnes carbon black would be used per annum in the country to improve the abrasive quality of rubber.

According to National Petrocarbon Limited sources export enquiries were received from Yugoslavia, Sri Lanka, Iraq, Egypt and Philippines to which samples of carbon black were sent for chemical tests.

The plant war working in three shifts with 87 Pakistani hands and the number would later go to 133.—APP.

PRAGMATIC MEASURES URGED FOR FAMILY PLANNING

Lahore THE PAKISTAN TIMES in English 16 Dec 80 p 4

[Editorial: "Population Master Plan"]

[Text]

The Government has approved a master plan, effective from 1981 to 1983, which will seek to bring the growth-rate of the country's population from the current 3 per cent to 2.5 per cent. Pakistan's population is expected to double by the year 2001. According to the statistics compiled by the World Fertility Survey this year, only 8 per cent women in Pakistan use contraceptives. Our family planning programme has been in operation since 1965 but such is the enormity of our failure in this crucial sector that our population growth rate, instead of going down, has climbed to alarming proportions. In 1976-77 we spent on it a total of Rs. 202 million, some of which was money given by international organisations, without achieving any results. According to the world survey, ours is one of the highest fertility rates in Asia. Our economic position is such that our dependency ratio now stands higher than that of India, 93 dependents to every 100 persons out of which children constitute 44 per cent. The newly born in Pakistan are exposed to disease to the tune of 80 per cent. Despite hectic Government efforts, the basic requirement of total child vaccination against disease will not be realised in this decade. The children that we send to school do not always get education. The drop-out ratio at the primary school level is a startling 60 per cent; girls are virtually all kept illiterate. Such is the inadequacy of our educational system in the face of an exploding population that in certain areas the literacy ratio is actually going down.

It is quite evident that we cannot adequately support the number of children born at the rate of four a minute. The family planning programme has failed miserably at the level of propaganda for various reasons, the big-

gest one being the illiteracy of the target individual who makes up most of the population of the country. Propaganda and motivation campaigns have presumed a basic susceptibility to literate rationalisation among the population. Governments have been indecisive about family planning and have relied too much on external assistance. Terrifying prognostications about all economic growth being nullified by growth in human numbers seem not to have persuaded the planners in the past. Although a number of seminars held under the auspices of the Islamic Conference have endorsed family planning and have categorically accepted the system as non-repugnant to the teachings of Islam, the average citizen seems to be confused about it. This psychological impediment to the implementation of family planning programmes in Pakistan must be removed before the task of arresting the growth rate of the population can be effectively undertaken. Family planning needs to be brought down from its macro-level objectives to micro-level targets where its operational aspects can make direct contact with the individual in need of contraception. Recently, an organisation called Fertility Regulation Association announced that it would open control centres in the major cities of the country and try to achieve 2,000 sterilisations at each city over the duration of one year. If family planning is to come to Pakistan it will be through pragmatic measures like this undertaken on a scale compatible with the problem we face.

GOVERNOR OPENS IODIZED SALT FACTORY

Peshawar KHYBER MAIL in English 24 Dec 80 p 1

[Text]

N.W.F.P. Governor Lt Gen. Fazle Haq has said that the government was spending a huge amount on the improvement of public health sector and crores of rupees were earmarked for this purpose every year in the budget.

Inaugurating the Goitre Control Project in the Industrial Area at Jamrud Road here on Tuesday he said that the manpower was a great asset of the country, therefore it was necessary to maintain this power for the effective functioning of all the projects of development.

He said that it was the endeavour of the present government to bring at par the areas which were neglected in the past with the comparatively developed areas of the province and expediciously completed the projects of social welfare.

The districts of Swat and Chitral were also amongst those areas, he remarked, adding that not only the work in the fields of education and health but the development projects were undertaken on priority basis in these areas

He said that despite its limited resources, the government was providing every facility to the people of these areas as was provided in other developed areas of the province.

He appreciated the invention of cure of endemic goitre at a low-cost and said that it was a remarkable and commendable invention.

He expressed the hope that the iodized salt produced in the factory would be easily transported to the Northern Areas of the country so as to rootout this disease and to maintain the health of the people of those areas.

The Governor thanked the UNICEF for providing machinary for the project and expressed the hope that the project would play a vital role in fields of health and social welfare.

Earlier, in his welcome address the Chairman of the Sarhad Development Authority Mr. Azam Khan, said that the authority had established the factory on priority basis at a cost of about Rs. 15 lakh and the machinary for the factory had been provided by the UNICEF which cost about Rs. 14 lakh.

COTTON EXPORTS REACH 4.37 LAKH BALES

Karachi DAWN in English 4 Jan 81 p 10

[Text]

Exports of cotton from Pakistan made by the Cotton Export Corporation (C.E.C) during the current fiscal year till November last stood at about 4.37 lakh bales valued at 106.23 million dollars and sizeable shipments were to follow in the coming months, the C.E.C. sources said in Karachi.

The sources here said that in spite of slack demand in the world market, the C.E.C. hoped that all the exportable surplus during the current year was expected to be disposed of. The current year's revised target of export is 393.5 million dollars which is based on the production target of 4.3 million bales. During the outgoing year, exports of cotton made by CEC reached a record level of about 340 million dollars. It is hoped that if the production target is achieved, it may be possible for the CEC to achieve the enhanced export target.

The CEC, the sources said, had been successful in diversifying export markets, exploring new markets such as Philippines, South Korea, Indonesia and others. Some buyers were expected to visit Pakistan soon to explore the possibility of buying more cotton from here.

The sources further said that an office of the CEC is proposed to be opened shortly in Hong Kong which has remained a traditional buyer of Pakistan cotton. This step would be of great assistance to the buyers and spinners of Japan, Hong Kong, South Korea and other countries in this region which faced difficulties in visiting Pakistan to negotiate and finalise business. This would also help to the CEC to keep close liaison with the buyers and enable it to obtain information on current market situation directly through its own sources as well.

This proposal, they said, had already been welcomed by the cotton community in the Far East.

An International Cotton Club of Pakistan, the sources said, had been sponsored by the CEC, a branch of this Club would be opened in Multan shortly. The membership of the club will be open to cotton traders, export agents and procurement agents of CEC, growers, ginners, textile mills and international firms. This club is intended to provide a forum to all the sections connected with the cotton economy where they can discuss the cotton situation.

The CEC said that at the moment, due to the threat of recession, the mills in the country were not coming forward to purchase cotton in big quantities. Although the prices have been generally firm, the demand has been slack and low. Even the international merchants are very cautious and not coming forward to buy in a big way.—APP

BRIEFS

RICE EXPORT TO SENEGAL--Karachi, Dec 21--Pakistan is to export 50,000 tons of rice worth Rs 135 million to Senegal. An agreement for the sale of rice was signed here today between a visiting 3-member official team from Senegal and the Chairman of Pakistan Rice Export Corporation, Mr Riaz Naik. The Chairman RECP later told Radio Pakistan that the shipment of the rice will start from February and the entire shipment will be carried by the Pakistan National Shipping Corporation. This will earn substantial foreign exchange for Pakistan, Mr Naik said.--APP [Text] [Lahore THE PAKISTAN TIMES in English 22 Dec 80 p 5]

PAMPHLETS, CASSETTES SEIZURE--Quetta, Dec 21--The Government of Baluchistan has immediately forfeited a pamphlet consisting of eight pages issued by the defunct National Democratic Party which contains objectionable material falling under the West Pakistan Press and Publications Ordinance, 1963, says an official handout. The Baluchistan Government has also immediately forfeited cassettes containing propaganda material in Baluchi and Pushto smuggled into Pakistan from Afghanistan. An official handout issued here today said that these cassettes are highly objectionable and prejudicial to national integration.--APP. [Text] [Lahore THE PAKISTAN TIMES in English 22 Dec 80 p 10]

LICENSE FOR OIL EXPLORATION--Karachi. Dec 26—The Federal government has granted Petroleum Exploration and Prospecting Licence to a British firm B.P. Petroleum Development Limited and Oil and Gas Development Corporation, Karachi over Dadhar area covering 5460 square miles in Sibi, Kalat, Khuzdar and Nasirabad Districts in Baluchistan and district Larkana, Sind, for a period of four years, it was learnt from official sources. [Text] [Quetta BALUCHISTAN TIMES in English 27 Dec 80 p 4]

ABU DHABI INDUSTRIES--Lahore, Dec 23—Abudhabi has shown keen interest for financing and the setting up of a number of industrial units in Pakistan in collaboration with local industrialists. A leading businessmen of Abudhabi on behalf of his country has approached the Investment Promotion Bureau (IPB) of Pakistan for setting up of 13 various types of industrial units in this country. The IPB has circulated a letter to various business organisations in the country inviting applications from interested businessmen and industrialists. The industrial units envisaged to be set up by Abudhabi entrepreneurs include power engineering, solar energy conversion petroleum and petrochemicals mining, water engineering, communication (roads highways), bridges,

railways and (telecommunication), steel mills and fabrication and heavy inorganic chemicals. The entrepreneurs have also shown special interest for financing units for manufacture of grid overhead transmission line and power stations, telephone system (fully electronic switching system (digits), cement factories and sugar mills.--PPI [Text] [Karachi BUSINESS RECORDER in English 21 Dec 80 p 1]

BALUCHISTAN RURAL PROGRAM--Quetta, Dec 22--The Baluchistan Government has undertaken a crash programme costing about Rs 40 million for the benefit of the people living in the tribal and rural areas of the Province. Our Representative says under this programme construction of rural roads, development of drinking water resources, improvement of health and sanitation services have been undertaken. The programme also provides for better education facilities for the rural and tribal children. The Programme is expected to be completed by June next. [Text] [Quetta BALUCHISTAN TIMES in English 23 Dec 80 p 4]

12 GAS FIELD DISCOVERIES--Quetta, Dec 18--Twelve more gas field have been discovered in the country raising the total to thirteen. Eleven exploration companies including eight international are engaged in determining the extent of gas deposits. Official sources said here this morning that of the total gas fields recoverable reserves of nine gas fields have been estimated at over 17 thrillion (17000 billion) cubic feet. [as published] Nearly fifty per cent of the gas is available at Sui, meeting more than 80 percent of the natural gas requirements for the country. At present Sui is producing about 650 million cubic feet of the total production of 800 million cubic feet of gas per day. The balance is met by gas fields from Sari Sing, Hundi and Mari. These sources said that as a result of discovery of gas, Pakistan has been saving during the current financial year foreign exchange valued at about 750 million dollars. [Text] [Quetta BALUCHISTAN TIMES in English 19 Dec 80 p 1]

NO-RISK INVESTMENTS--Karachi, Dec. 23--The interest-free deposits received by nationalised commercial banks on voluntary basis from Jan 1, 1981, will be invested in clearly defined fields on "Bai Muajjal" or "mark up" basis, it was learnt here today. Under the "mark up" system, the normal profits of a particular line of business or trade will be determined and a fixed return on investment will be sought by the concerned banks. The investments would, therefore, carry no risk. Investments made on "Bai Muajjal basis" will cover financing of foodgrains and commodity operations of Federal and Provincial Governments and semi-government organisations like trading, Cotton Export and Rice Export Corporations, documentary export bills, inland and import bills. Besides, the banks will also be authorised to buy NIT Units, ICP Mutual Funds, Participation Term Certificates (an instrument which will replace debenture financing), shares of Bankers Equity and Investment Corporation of Pakistan with the interest-free deposits received by them. These investments along with finances, provided to the House-Building Finance Corporation, will be on the profit and loss basis. Although the ratio of profit and loss to be shared between depositers and banks was not immediately known, the profits on interest-free deposits will be treated as dividend and exempted from income-tax up to Rs 15,000 per annum. Meanwhile, necessary amendments in the banking laws, including the State Bank Act, will be announced before January to enable the commercial banks to start the first phase of their interest-free operations. [By Jawaid Bokhari] [Text] [Islamabad THE MUSLIM in English 24 Dec 80 p 1]

KUWAIT DEFICIT OIL PURCHASE--Islamabad, Dec 24--Pakistan will buy 1.5 million tons of deficit oil products from Kuwait during 1980-81 under an agreement signed here today. The agreement, which reportedly offers highly competitive prices to Pakistan, was signed by Masihuddin, Secretary Petroleum and Nadir Sultan, a high official of the Kuwait National Petroleum company. The agreement also includes a clause under which Pakistan would be entitled to reopen the question of prices. So far it was the sole right of the supplier. The contracted quantity includes one million tons of High Speed Diesel (HSD) 0.4 million tons of kerosene, and the balance of Light Speed Diesel (LSD) and High Octane Blending Component (HOBC). Last year Pakistan purchased 1.8 million tons of deficit oil products from Kuwait, which meets the entire demand of Pakistan in this sector. The reduction has been due to conservation measures and more production in our own plants, Mr Masihuddin told THE MUSLIM. About 120,000 tons of the import would be used as filler for the newly-commissioned PARCO pipeline. The new deal also gives some advantage to Pakistan in the freight charges because from Jan. 1 next bigger ships would be able to enter the Karachi Port where the draught has been increased. Pakistan has been reportedly given preference over India, Iraq, Iran and some other countries who also requested Kuwait to sell these products. Inspite of scarcity of these goods in the region due to Gulf War the KPTC agreed to meet the full requirement of Pakistan, it was further learnt. [By Sikander Hayat] [Text] [Islamabad THE MUSLIM in English 24 Dec 80 p 1]

STEEL MILLS COMMISSIONING DELAY--Karachi, Dec. 29--The commissioning of the first phase of the multi-billion rupee Karachi Steel Mills project has been delayed because the firing of the first blast furnace originally scheduled to be commissioned in the current month will now take two to three months more. Sources close to the Mills' administration told THE MUSLIM that the delay was basically due to the general "testing of auxiliary units," which was now in progress. They, however, did not confirm or deny the reports that some defects had been discovered in the coke oven complex, particularly its generating unit which would take some time for completion. The raw materials needed for the commissioning of the first phase have already been obtained such as the pig iron and the coal, partly from India. The administration and the technical staff, however, are working day and night to ensure early commissioning of the project which will usher in era of gradual self-sufficiency in steel. [Text] [Islamabad THE MUSLIM in English 30 Dec 80 p 1]

SUBVERSIVE LITERATURE SUPPRESSED--The Sind Government forfeited all copies of an Urdu novel, 'Zinda Bhutto, Murda Bhutto,' written by Sattar Tahir and published by Syed Qasim Mahmood, Maktaba Shahkar, Clifton Road, Lahore. The Government thinks that the book contains material which tends indirectly to incite hatred against the Government. The order was published in the Sind Government Gazette on January 1. KRIANGSAK TO FORM PARTY, STILL SUPPORTS PREM

Bangkok SIAM RAT in Thai 3 Dec 80 pp 1, 12

[Article: "Kriangsak Encourages the Government to Complete Its Term"]

[Text] General Kriangsak Chamanan has confirmed that he will definitely establish a political party and will engage in politics. But he will wait until a political party law has been enacted.

The former prime minister has confirmed that he will resolutely refrain from taking MP's from other parties to form his party. He stated that he does not want to comment on the matter of MP's causing trouble except to state that it is natural for political parties to guard their interests. However, they must also consider the common interests of the country and people.

General Kriangsak also confirmed that he wants the government of General Prem Tinsulanon to continue governing the country until the end of its term of office. The troubles of the government are natural and they arise during every administration.

"Anyone can form a government but a frequent change of governments is a step backwards," stated General Kriangsak.

Concerning the present economic problems, the former prime minister stated that it is very saddening that the income of the people has not increased quickly. This has created hardships for them. But the people must help themselves because this is a problem that is affecting the entire world.

"We must all help each other and make sacrifices. The government must not be the only one to make sacrifices. These days, if people still try to gain the advantage for themselves, in the future there will not be any chance for gaining the advantage," stated General Kriangsak.

KRIANGSAK RETURN TO ELECTIVE POLITICS DISCUSSED

Bangkok TAWAN SIAM in Thai 8 Dec 80 pp 5, 2

[A Half Is a Half column by Phet Banlaem]

[Text] Although he resigned the position of prime minister, or retired from politics, General Kriangsak Chammanan acts as if he is thinking about returning to politics again, waiting only for the right time or a suitable chance.

Concerning the right time, when a political party act has definitely been promulgated, General Kriangsak has confirmed that he will establish a political party and get involved in politics seriously. It is thought that this means that he will seek election to parliament.

Concerning the fact that General Kriangsak is thinking about returning to the political arena following constitutional, or demoractic, methods -- that is, by establishing a political party and standing for election -- this is a right and freedom and, as a government leader, he should do this and he should be supported.

General Kriangsak once governed the country, even though he did not come to power in a democratic way. He came to power by luck, or on the top of a tank, but it must be recognized that he experienced many problems and various important events and, therefore, he should have adequate political experience.

If he enters politics again, this should give the people a broad field from which to choose.

In particular, General Kriangsak has stated, in forming his political party, that he will resolutely refrain from taking members of other political parties into his party.

In other words, he will not form a political party by "fishing in a pond" and getting MP's who were elected on the basis of their affiliation with some other political party to join his new party as some people like to do.

I admire this correct and reasonable decision. It shows his intention of engaging in politics in a really democratic way, that is, he will allow the people to decide whether or not to support him and to decide how much they trust him rather than buying people or using political positions to induce people to join his party, which teaches some MP's who were elected by the people first to betray the people.

Concerning this type of political party, I think that such parties are very dangerous, and not just to the democratic form of government. They are also a threat to the security of the country.

Besides this, a party that is established by inducing MP's who were elected in the name of other political parties to become members of the party frequently fails to gain the confidence of the people, who question the party's honesty and sincerity.

Or it can be seen that some political parties were not established to serve the majority of the people or protect their interests, although that is what they claimed. Rather the party was established in order to gain positions or personal benefits for certain people or groups.

The reason that I have constantly opposed, or not agreed with, this way of forming a political party is not that I am not satisfied with or prejudiced against those involved in establishing these parties. Rather it is because I want the people in general to help preserve the proper political party principles, or correct party system.

Because, from what I have seen, such political parties have tended to destroy the political party system and democracy in Thailand since the people think that these political parties are only the tools of certain politicians, who use them to justify their search for benefits and power in parliament.

There is nothing binding them to the people at all.

For these reasons, I was happy to hear General Kriangsak Chamanan announce that he intends to enter politics again following democratic methods. I support him and hope that the people welcome this and give him proper support.

SOVIET SUPPORT OF SRV ROLE IN INDOCHINA ANALYZED

Bangkok SIAM RAT in Thai 8 Dec 80 p 11

[Article by Kasem Achasai: "Moscow's Attitude Toward Asean"]

[Text] An international political theorist once made the statement that the Indochina problem will be solved, with Vietnam withdrawing its troops, only when this is supported by the Soviet Union since the Soviet Union gives Vietnam financial aid to carry on the war in Kampuchea in order to completely suppress the Pol Pot group.

This way of thinking has been implicitely applied in the policies for solving the Indochina problem. The Asean countries have joined together in stipulating that they will "ask" or "force" the Soviet Union to do this. They have sent a representative, Mr Arun Phanuphong, the deputy minister of foreign affairs, to meet Mr Andrey Gromyko, the Russian minister of foreign affairs, in order to discuss a "formula for solving the Indochina problem using political means" by stipulating the important goals as a starting point in this matter and holding a multi-nation conference for the countries concerned. But the reports that have been issued have not stated whether the Soviet Union opposes or supports the plan calling for a multi-nation conference.

The person who released this information for the first time was Air Chief Marshal Siddhi Savetsila, the minister of foreign affairs, who has constantly been kept informed by Mr Arun Phanuphong during his visit to Western Europe.

Concerning the indifferent response of the Soviet Union, if we discuss things superficially, it seems that Thailand has met with failure in its efforts to have the Soviet Union support the "single game" concerning Asean. But, it was expected from the very beginning that the Soviet Union would react this way.

In reality, the main reason behind Mr Arun Phanuphong's trip to the Soviet Union was that Asean wanted to officially inform the Soviet Union of its position, or policy, in detail.

"In reality, the Soviet Union does not want to have control over Vietnam. The real benefits to the Soviet Union are that it wants to use Vietnam to cause trouble for China and it wants to use Vietnamese territory for the benefits in implementing its worldwide strategy. For example, the Soviet Union is making use of the port at Cam Ranh Bay and has installed electronic equipment in order to intercept messages there," remarked a diplomat who is an expert on Indochinese affairs to the newspaper SIAM RAT recently.

"In fact, the Soviet Union wanted to help Vietnam settle matters with the Pol Pot government in just 1 month and so it sent military weapons by air. Thailand openly protested that the Soviet Union was secretly sending aircraft across Thai air space in excess of the number of flights approved. But it has been more than a year and Vietnam has still not been able to completely suppress the Pol Pot forces. This diplomat also observed that one day soon the Soviet Union may have to cut back on the 2.5 to 3 million dollars a day in aid that it has given to Vietnam up to now. This is because the Soviet Union itself is experiencing great domestic economic problems and there are not enough products for consumption. At the same time, it is having to spend large amounts of money to suppress the liberation movement in Afganistan, which is a serious situation at present.

Some news sources have reported that, in Vietnam's high-level administrative circles, at present serious opposition is arising to the "militaristic" policy of the older leaders who are very nationalistic.

This opposition [is said] to have arisen even within the Political Bureau, which is the important body in governing the country. New members of the Political Bureau feel that waging war at this time in order to realize the high ideals of Ho Chi Minh in creating an Indochinese Federation is an extravagence and that it will harm the economy of the country in general.

"But it is most unlikely that these differences will give rise to a reversal of policy since Vietnam has been able to withstand hardships for more than 30 years now," explained this diplomat.

The above is the position of Vietnam and efforts are being made to determine what its response will be to Asean's peace plan, particularly with regard to holding the multi-nation conference that Asean has requested, or wants to hold.

It is expected that Vietnam will hold firm to its original position. That is, it will not take part in such a multi-nation conference and will continue with its plans to hold elections in Kampuchea in order to be able to claim that the Khmer people approve of the Heng Samrin government.

The thing that should be known is that, in fact, Vietnam does not want the Soviet Union to come in and be their "lord" either. The fact that Vietnam "said goodby" to China after achieving victory in the war against America and the government of South Vietnam even though China constantly supported [North] Vietnam in its efforts to destroy the Saigon government shows that Vietnam has a great desire to be its own "boss" and does not want to be under the influence of anyone.

Concerning this matter, there is the story that even China did not believe that Vietnam would ever be able to be its own boss.

Once when Kukrit Pramot was prime minister, he told Mr Deng Xiaoping to be very wary of Vietnam because of its tendency to become a small great-power [nation] in this region. This is becoming a reality. But at the time Deng Xiaoping never imagined that Vietnam would be able to do this.

The Soviet Union is aware of this. But because it wants to use Vietnam as a "deadly enemy" to harass China, which is an old enemy of the Soviet Union, it is somewhat reluctant to abandon Vietnam.

Besides this, the Soviet Union wants to make China anxious about Vietnam, from which it would benefit.

This may be one reason why China remains unwilling to withdraw its support from Pol Pot as Vietnam's "deadly enemy." This is destressing to the Asean countries because Asean does not want any great-power nation to support any side in Kampuchea. It wants the people of Kampuchea to be able to decide their own fate.

One thing that is interesting is the attitude of the Soviet Union toward Asean. Mr Arun Phanuphong has revealed that Mr Andrey Gromyko has given assurances that the "soviet Union does not have any intention of destroying Thailand or any of the other Asean countries.

Besides this, Mr Gromyko also said that the Soviet Union wants to have close relations with the Asean countries.

Concerning this, for the first time, Mr Arun Phanuphong openly expressed the feeling that the attitude of the Soviet Union "shows that consulting with the Soviet representatives has achieved results that are satisfactory to both sides."

But some news sources have stated that the trip by Mr Arun Phanuphong (the former Thai ambassador to Russia) has achieved even greater results than were hoped for.

Since Thailand has shown such a reaction, this may force Vietnam to review its policy of how it will "retaliate."

Thus, I think that if Vietnam is smart, it will agree to the visit of Ahmad Rithauddeen, the Malaysian minister of foreign affairs, who is to visit Hanoi in the near future.

Perhaps it will even be possible to find a way to solve the problems without Vietnam having to waste time discussing matters with the Soviet leaders.

COLUMNIST SUPPORTS BALANCE IN RELATIONS WITH USSR, PRC

Bangkok TAWAN SIAM in Thai 26 Nov 80 p 6

[Politics, an Interesting Subject column by Dr Pricha Hongkrailoet]

[Text] Mr Arun Phanuphong, the deputy minister of foreign affairs, recently headed a delegation from the Thai government on a goodwill trip to the Soviet Union and the socialist bloc countries in Eastern Eurpoe.

The Thai deputy minister of foreign affairs received a warm welcome from the leaders of the socialist bloc countries in Eastern Europe. In particular, in East Germany, he signed a trade agreement with East Germany. This is the first agreement signed with that country and it should be beneficial for friendly relations with the socialist bloc countries in Eastern Europe.

But the news reports coming from the Foreign News Office made it appear that the Soviet government was "cool" to the visit by the Thai delegation and that they were not as enthusiastic as they should have been. Foreign news sources observed that this may have been because Thailand is following a policy that is rather slanted toward China, a country which the Soviet Union regards as a great enemy.

One purpose of the trip to the Soviet Union by the Thai delegation concerned the fact that the Soviet Union sent a flotilla near the Gulf of Thailand. This generated much criticism in the Asean countries, especially by the Thai people. The Thais felt that it was improper for the Soviet Union to do this. The trip to the Soviet Union was thus equivalent to holding "discussions" in order to end the matter satisfactorily between the two countries.

Another purpose undoubtedly concerned the fact that General Prem Tinsulanon, the prime minister, recently visited China. This led the Soviet Union to understand that Thailand was leaning more toward China than tothe Soviet Union. Thus, this shows that the trip to the Soviet Union was meant to create a "balance" of political power between the two communist superpowers.

This writer heartily supports a policy of creating a balance of power between the countries in these two communist camps. This will be more beneficial than leaning toward one of the camps, which may be dangerous. In any case, we cannot trust communism because the final objective in communish is world rule, regardless of whether the Soviet Union or China is the leader of the revolution.

Throughout history, following this policy of "linking interests" has amazingly enabled Thailand to preserve its independence for generations. It is proper that this policy continue to be followed rather than following only one path.

THAILAND

RESERVE CALL-UP, TRAINING EVALUATED; RTA EXPRESSES CONCERN

Editorial Comment

Bangkok SIAM RAT in Thai 1 Dec 80 p 5

[Editorial: "The Army Trains Reserves"]

[Text] Several months ago the Royal Thai Army began doing something that it had not done for decades -- it began calling up reservists for training in order to test their combat readiness.

This training period came to an end at the end of November. As people who continually followed this story for the newspaper SIAM RAT and who had a chance to participate in this training, we have obtained enough data to be able to present a number of ideas concerning this training that the army can consider as fitting.

First of all, we wish to express our support for this action, which showed initiative and which is good preparation for the situation presently facing the country. This is a period when we must be in full control of our own destiny in order to be ready to handle very uncertain situations such as those that have now arisen in neighboring countries.

However, whether it was because the army was unfamiliar with holding such training exercises or because of a lack of care in making plans and stipulating policies, the results of the training clearly revealed several weaknesses.

The first weakness concerns the lack of explanations, or good public relations. This can be seen from the fact that, during the first period when the reservists "unwillingly agreed" to undergo this training, they lacked morale and spirit and many thought that they were being mobilized to go to the battlefield. This lack of understanding could be seen when they parted from their relatives and when they took along various charms. It even reached the point where some were suspicious about why they had been called up and they wondered what measures the army had used in selecting people. In particular, they even wondered if there had been any corruption in selecting people.

Luckily, after some time had passed, such doubts subsided somewhat. However, the second weakness, which concerns the reservists' worries about loss of work, is someting that the army should discuss.

Because this call-up for training was for 60 days, because of the length of time involved the reservists who were not government officials or employees of state enterprises became apprehensive. In particular, those who worked for companies and stores and, even worse, those who had just started jobs, were very apprehensive about whether or not they would still have a job after the training was over. In this case, the army solved the immediate problem but its only reassurance was that it would appeal to the employers. We do not feel that this statement provides any credible guarantee unless the army considers revising the labor laws concerning the call-up of troops so that things are clear.

The final weaknesses are the various weaknesses directly concerning the training. We learned that there were many weaknesses but in the interest of army security, we will not go into specifics except to express the hope that the army keeps investigating things, or evaluating the results, until it discovers the weaknesses, either by analyzing the data or by examining the reports of credible officials in the field. [Officers] should not give attention only to the nice reports of their subordinates.

If it is asked what the achievements were in this training, our answer is that the most important achievement was discovering the above weaknesses. We say this in all honesty and with the hope that, since the army has encountered these difficulties, it will discuss ways to correct the shortcomings in order to improve later training exercises.

As mentioned above, we support the call-up of troops for such training. We feel that this is good. As for the accomplishments, or good results, we feel that there will be better results if the army holds training exercises every year and continually improves the training so that it benefits every sector. Because by carrying out such activities in a serious way, besides giving the reserve forces throughout the country a feeling that they all have equal duties, this will also increase the strength of the army by virtue of the fact that the army will have reserve forces that are ready to support the army when necessary. This should also increase the willpower of the regular soldiers, the people whose duty it is to fight to defend the country.

RTA Fears Embarrassment

Bangkok SIAM RAT in Thai 10 Dec p 4

[Letter From RTA Chief of Public Relations to SIAM RAT]

[Text] Bangkok 0344 (305)/2022
Army Operations Center
December 1980

Subject: Request for cooperation in disclosing information to the public.

To: The editor of SIAM RAT

The army held training exercises for the reserve forces for a period of 2 months, from October through November 1980. The reservists who took part in the training came from all walks of life. There were government officials, state enterprise personnel, merchants and [other] people. The training period lasted longer than any previous training period. Also, those taking part in the exercises included officials from all sectors, including reservists, officials, regular army personnel, civilians and state enterprise personnel, and there was cooperation from the private sector and from various companies and stores. The exercises were held in order to see whether, in the event of a real war, the reservists would be able to immediately perform as a combat ready force in accord with the needs. Because these training exercises were the first exercises to test the deployment of the reserve forces, it was only natural that there were shortcomings. These served as lessons that the army will have to improve. However, if people with bad intentions toward the country use these shortcomings in a way that is damaging to the army, this may make it impossible to achieve the proper results in preparing the reserve forces to become a combat-ready force and play a part in weakening the army. The reserve forces are very important forces of the army. Such damage may cause uncalculable harm to the country in the future. As for the reservists who took part in these training exercises, most were understanding and were very glad to be able to make sacrifices in the interests of the country.

For the reasons mentioned above, I ask your cooperation and the cooperation of your newspaper. Please consider things before you publish stories about the training of the reserve forces. If it is something that may harm the army and the country, please refrain from publishing that material. Or it would be very beneficial if you informed the Public Relations Section, Army Operations Center, or checked the story beforehand.

I have informed you about this to ask for your cooperation. The army hopes for your cooperation and also wishes to thank you in advance at this time.

Respectfully,

General Wichit Bunyawat
Head of the Public Relations Section, Army Operations Center

INTERVIEW WITH DEPUTY PRIME MINISTER BOONCHU

Bangkok BANGKOK POST in English 31 Dec 80, THE ECONOMY REVIEW Supplement pp 17, 19

[Interview with Boonchu Rojanastien, deputy prime minister, date and place not given]

[Text]

Question

Mr Boonchu you and your team have been in charge of the country's economy for a little over nine months now. What would you say were the highlights of your activities so far and were these the things you hoped to do on accepting this job?

Answer

I can best answer this by saying that before I accepted this job, I had ideas and plans, which I conveyed to the Prime Minister, about what I felt had to be done, what needed to be changed. I felt that the way the economy was being developed was wrong in a number of ways.

For one thing, past efforts have resulted in industrialists and businessmen reaping the benefits rather than the people who had the most need — the rural population. Everyone talks of inequalities, but the country's development efforts in the past have accentuated this inequality and, by doing so, have created social problems such as crime and lack of security.

I felt, too, that government action in getting involved with market forces, such as through the imposition of price controls, was bad economics as well as bad politics, for it meant that the Government ended up having to accept responsibility for everything. Market intervention is all right but not market interference to the extent of imposing price controls on more than 30 items!

I pointed out that these were the issues we would have to face, and pointed out, too, that these problems could not be solved immediately as the marketing system and the ethics of businessmen here, are not very good. However, they have to be dealt with, and this is what we have been trying to do in the last nine months.

Question

How successful have you been in dealing with these problems?

Answer

We have had succcess in some areas, but many problems still remain. Some people have said that we haven't achieved anything because prices of certain commodities such as sugar and vegetables are high. But if they are fair about it, they would realise that we are hardly to blame for the drought!

However, there are still problems such as income increasing at a very low rate, insufficient savings to meet our needs for investment capital, our increasing indebtedness which is very high and which is nearly at the alarming point.

We still have to find solutions to the rising cost of living, the oil problem. Our energy policy is still vague, the development of our gas project beset by problems and controversies on pricing. People's incomes are not increasing as fast as inflation so that this is still a burden for everyone.

We are now dealing with these problems but it will be some time still before they can be solved. However, what we have done is to try to have prices increase slowly and in a stable manner rather than in leaps and bounds, increase rural income through our 3,500 million baht rural development project,

and through the new budget, decentralise government by giving more authority to provincial governors, create an awareness of the need to conserve energy and so on.

We have had some success, but the success lies only in dealing with the immediate problems. We still have to go to the root of these problems and that is why we are putting such emphasis on and careful consideration into the next five-year plan.

Question

And what of next year? Do you see the problems becoming more acute or do you think things will be better in 1981?

Answer

There is nothing to say that there will be any significant changes next year, except for the start of production of the natural gas project. We hope that this will be in July rather than the scheduled date of September, but no matter when, it will help us save some funds.

Next year too, we hope to see changes in the country's energy picture for plans are being generated now to bring coal into the country as well as to further develop hydro-electric power and gas. We want to see electricity being generated by fuels other than fuel oil.

We are making efforts to keep inflation at a manageable 12% to 13% a year. However, world events affect us too and right now, the one factor that no one can predict is what is going to happen to oil prices. There are signs that they will not increase as rapidly as this year, but no one knows just what oil politics are going to be next year.

We will have to tighten our belts next year, but after a while, things should be better. We are determined to pull back inflation as much as possible, even if it means having to subsidise certain commodities, for we know that there is an end to it — that the cost to the country will be limited.

This has to be done next year, otherwise the burden to be borne by the public will be too heavy. Many people will not agree with this plan of action because it is going against nature, but we can't just walk away from it, especially as we are convinced that things will be better by late next year or early 1982.

Question

A while ago, you went public to say that the inflation rate this year is around 12% even though just about everyone else has put it close to 18%. How do you reconcile this great difference?

Answer

Determining the inflation rate for any period of time depends on where you start. My figure of 12% is based on the nine months I have been responsible for the economy and does not include the first three months of the year which was someone else's responsibility.

Inflation during those first three months was very high, and it would be unfair to add that in to the inflation during the last nine months in evaluating what our team has done, because it doesn't show what really happened — that we slowed inflation down. If you look at inflation for the whole of 1980, the rate would indeed be about 18%, but if you look at the inflation rate during our administration then it is only 12%.

Question

Mr Boonchu, the Government has indicated that it will stand or fall on its rice support scheme. As many people are still confused by this, do you think you could clarify just what you are trying to do and how you plan to do it?

Answer

We are not expecting this scheme to be 100% successful, but our strategy is such that we believe it should be possible to have an 80% success rate.

The paddy is harvested from mid-November, with the peak in March. This means, there will be 10 to 11 million tons of paddy coming onto the market out of a total production of about 17 million tons over a period of five months.

Our strategy is to build up demand for paddy from the millers and the traders, both domestic traders and exporters. In the past, exporters were not able to enter into long term contracts but were limited to contracts for one or two months forward because they didn't know if the rice premium was going to be changed or not, or what the reserve requirements were going to be.

Now, we are introducing a new system which should allow exporters to sell eight or 10 months ahead of time, for what we are doing is giving assurance that these costs to them will not change. That is, whatever the premium and the rice reserve requirement is the day they enter into a contract, that will be the premium and reserve requirement applicable to them no matter what the new figures might be.

By knowing in advance what their costs will be, exporters will be able to sell forward. We have also indicated to the exporters that we will give them their

export permits immediately they sign the contract, on the condition that they do not use the rice for speculative purposes but prepare it and hold it for export as they committed.

This will encourage the exporters to make their purchases from the millers immediately and these in turn will have to buy the paddy at once. At the same time, exporters have to build up a buffer stock of rice as well as their own reserve stocks and this will mean a large volume of rice being demanded and bought. By creating this demand, farmers should be able to get good paddy prices.

Question

The point however, is that the prices set by the Government are support prices, not guaranteed prices, so how are you going to get the millers to pay this price to the farmers, short of subsidising them?

Answer

What everyone tends to forget is that there are three groups of people in the rice trade — the millers, the exporters and the Government. We are planning to hold stocks too, and we've already started doing so by opening bids for rice which is to be sold to us in the future.

As a result of our purchases, it is possible for other rice traders to see just what rice prices are going to be like in the future so that both millers and exporters realise that if they put off their purchases, they are going to end up making less profit as the price trend is upward. If they don't buy now, it's going to cost them more later on — and they are catching on to this very fast!

The result is that there are now three groups of people competing to buy this paddy rice and farmers are getting the price we want them to get for their paddy. In a way, you could say that this is the beginning of a commodity futures exchange, for in the future, we plan to have similar schemes for other products.

Question

In view of the great controversy over whether Laem Chabang or Rayong is to be the site of the country's soda ash project, can you clarify whether the proposal to develop the eastern seaboard as well as the port at Laem Chabang is still going ahead? There has been some talk that if Rayong wins out over Laem Chabang as the site for the soda ash project, then the plans to develop the eastern seaboard could be shelved.

Answer

We are still going ahead with our plans for the development of the eastern seaboard and for the development of Laem Chabang port, so that any other plans for the development of industries or whatever, will have to be complimentary to this. For example, if we plan to import coal, we are going to need port facilities — and even if we don't import coal, we will need more port facilities!

What we are studying now is the possibility of building a floating dock which could be used in the Laem Chabang area in the initial stage and then towed elsewhere once the Laem Chabang port is opened. Our studies on this matter should be completed in one or two months, after which it should take only 11 months before we have a floating dock in operation.

Question

Mr Boonchu, earlier on in the interview you mentioned that you were looking to the fifth five year plan to solve Thailand's problems. What are the guidelines set for the formulation of this plan?

Answer

Basically, to alleviate the difficulties which are domestic in nature and which have been accumulating for some time as well as to promote further development of the Thai economy.

The basic objective to be met is improvement of the economic conditions of the country in the 80s, and this is to be done through various major policies such as a fiscal policy which will see the budget being balanced before the end of the fifth plan. This will call for government revenue to increase at not less than 25% a year while government expenditures are to increase by no more than 20% a year. These figures we feel are realistic given past performances.

On the revenue side, we believe this can be done through improvement in the efficiency of the tax collection system, especially in the areas outside the Bangkok Metropolis. Less than a quarter of government revenues in the form of taxes are now collected from outside Bangkok. These would include direct and property taxes.

We also plan to collect new taxes as well as adjust some tax rates to get increased revenues as well as better income distribution.

The policy on government expenditure is that because certain categories such as debt servicing and national security expenditure will have to increase at a higher rate, the Government's current expenditure is not to increase by more than 12% a year in order to remain within the 20% limit set. To control the rate of increase, the Government will monitor and evaluate the operations of all the Government agencies, control staff expansion and turn work over to private firms in case where they can do it more effectively. At the same time, steps will be taken to improve the efficiency of public agencies.

Question

Does this mean then that state enterprises will finally be expected to operate like a business? If so, what are the policies on this and on public utilities?

Answer

We are determined that the total efficiency of operations of public enterprises will be improved. This will be done through close supervision of their balance sheets and financial structures and operations, and wherever necessary changes will be made in top management. All public enterprises have been told to prepare a detailed plan of operations and this will be analysed by experts with monthly monitoring of their finances and production.

What we are looking to is a public enterprise system that is financially viable without having to depend on subsidies from the Government. In fact, they should be in the position to make a substantial contribution to government revenue. At the same time, we want to see public enterprises able to generate at least half their capital expansion plans from their own resources, and to achieve this public utility rate will be adjusted regularly to reflect the real cost of production. In some cases, some public enterprises might be turned over to private business.

Question

And what of the Government's energy policy?

Answer

We consider the ever-expanding foreign exchange requirements for oil imports as one of the most important development problems that have to be tackled, so the Government is seeking ways to lessen the country's dependence on imported oil.

A long range energy plan now being completed takes into account the availability of natural gas at the end of 1981, and increasing the use of lignite and importing coal as an oil substitute. The target for the fifth plan is that total energy demand is not to increase faster than the GDP growth rate and electricity, which used to expand at twice the rate of overall energy expansion, will now be limited to an expansion rate of 10% a year.

To be able to do this, means that serious measures to control demand are needed and these will include conservation measures, and the development of alternative sources of fuel such as natural gas, lignite and coal. Our target is to reduce heavy oil and diesel oil use for power generation by more than 80% by the end of the fifth plan. At the same time, savings will be introduced in transport and industry so that the total volume of oil imports will be reduced by 3% a year throughout the fifth plan.

Special incentives and privileges will be given industries which introduce oil saving measures, and prices and rates for electricity will be adjusted regularly in order to reflect the cost of production as well as to discourage wasteful use.

Effort will also be put into research and development of alternative sources of energy such as oil shales, alcohol, fast growing timber, bio-gas, and geo-thermal, solar and wind energy. These measures, we hope, will bring this problem down to manageable proportions.

Question

The cornerstone of the Government's policies has been rural development. What are your plans for the next few years?

Answer

It is a policy of the Government to promote rural development during the fifth plan, because raising rural incomes is the only way of bridging the income gap between urban and rural areas between the rich and the poor and between Bangkok and elsewhere. The only permanent solution to this lies in the generation of more employment in the rural sector so that they have at least, a sufficient minimum level of regular income.

We want to see agicultural output increased through higher yields, to make the best use of water resources, increase

productivity in rain-fed areas throughthe use of appropriate seeds and better cropping patterns, insecticides and fertilisers. We also want to promote agricultural products that can be exported or used as raw materials for processing industries.

We intend to increase credit facilities, give the farmers assurances on prices and markets, and introduce employment generation schemes particularly for off-season rural employment. This will be expedited through decentralisation of the Government. Given these things, we hope to achieve our targets by the end of the fifth plan.

Question

The policies that you have outlined, Mr Boonchu, are indeed desirable. However, given the frequency of government changes here, are you optimistic that this Government will be able to see these policies through?

Answer

I am not concerned whether I will be here or not in one year, two years or five years time. The most important thing is that these are basic policies which the country has to follow if it is to overcome its problems — not in a cosmeticfashion, but by actually solving the problems at their roots.

If the policies are appropriate then I am not afraid that future governments will throw them out. They too, will follow them. Besides, the NESDB is still here and we now have a very good man as Secretary General Dr Snoh Unakul is a very practical man and he can see the need for policies such as these.

Thank you Mr Boonchu.

REGIONAL INCOME FIGURES, EXTENT OF SEVERE POVERTY DETAILED

Bangkok SIAM RAT in Thai 2 Dec 80 p 4

[High Skys, Low Lands column by Chalom: "The Danger to the Thai Farmers"]

[Text] Today, there are 10 million poverty-stricken people in Thailand.

These 10 million people are poor because of the development in the country during the past 20 years. That is, after the various programs were formulated and implemented, we created 10 million poor people.

There were not this many before.

As our development plans were implemented, more and more poor people came into being. It is the "classic" example of plans achieving exactly the opposite [of what was intended].

The magazine TRADE BUSINESS, which is the organ of the Thai Chamber of Commerce, provides information that can be believed. Because these people are merchants outside the development plans, they are probably wealthy.

The "merchants" have said that, each day, the income gap between various segments of the Thai population is widening. This is because these development plans have created great differences between the cities and the rural areas.

These 10 million people, whose fathers before them were poor, live in the rural areas and work as farmers.

If international standards are used to measure the income of these people, things will look terrible. It is better to use Thai standards.

If we use an income of 150 baht per person per month as a measure of the poverty level, we find that, concerning the number of

people with this income, one-third of the people in the south and in the north have such an income while in the northeast two-thirds do.

Now let us look at family income. If we assume that each family that has a monthly income of 500 baht is living at the poverty level, we find that more than half of all the families in the south and north have such an income.

And in the northeast, two-thirds of all the families have a monthly income of only 500 baht.

Yes! A background of poverty.

The cause of this poverty is the uncertainty in occupation.

And concerning the reasons for the uncertainty in occupation, it has been proven that this arises in part from selling produce at unfair prices, which leads to failure in their occupation.

Almost all of these 10 million people who are living in absolute poverty are farmers.

These people who engage in farming are as poor as their grandparents before them and they have no idea what to do about this.

As for those who have gone to the Middle East to work, they are only leaving their position temporarily.

It can be seen that our various development plans show a great lack of smypathy for farming. Most of our poor people are farmers and, therefore, the development plans have benefited them very little.

Thus, it is not surprising that, in the past 20 years, many of the daughters of farmers have become prostitutes and many young children have been sold to work as slaves in the cities as Westerners have reported. These stories are true.

Concerning the policy of a rice price guarantee, I think that this is one thing in implementing development plans that will help improve the lives of the farmers somewhat. At least, there is the hope that they will be able to sell rice at better prices.

The fact that the government has made an effort to help the farmers so they can sell rice at higher prices, even if only a little higher, means that the incomes of these 10 million people who are living in absolute poverty have been increased.

Ten million people is not a small number! An increase in income will generate great changes within the country.

The important thing is the hope of being able to continue working as farmers.

With a monthly income of 150 baht, which is the income found by the journal of the Chamber of Commerce during its survey, no one can continue to engage in farming. In not too many years, the number of farmers will decline -- if not because of utter poverty then because of having to change occupations.

When that day arrives, the price of rice will be much higher than today.

Thai farmers today must fight against droughts, floods, insects and diseases. Let's not add the selfishness of city dwellers to this list.

The farmers do not have the strength to fight this last threat.

SOUTHERN SCHOOLS TO TEACH ISLAM

Bangkok SIAM RAT in Thai 6 Dec 80 pp 1, 12

[Article: "Primary Education Seminar Arranged For Four Southern Provinces"]

[Text] The Office of the National Primary Education Council has made preparations to hold a major seminar for the school administrators in four southern provinces in order to reduce the disparities between Buddhism and Islam.

Mr Rung Kaeodaeng, the deputy secretary-general of the Office of the National Primary Education Council, has revealed that, at present, the council is considering taking action concerning Islam in the primary schools of four southern provinces in order to reduce the disparities between Buddhism and Islam so that the students in the four southern provinces gain a greater knowledge of the Thai language.

Mr Rung stated that the council will hold a seminar for the primary school administrators of all four southern provinces in March 1981 so that things proceed in accord with the goals mentioned above.

Mr Rung also stated that, normally, when Thai Muslims in the four southern provinces finish grade 4, their parents enroll them in private schools that teach Islam. These are known as pondok schools and they adhere to Moslem practices very strictly. Thus, these children have little knowledge of the Thai language and they do not complete the minimum grade level stipulated, which is grade 6.

"The Ministry of Education has plans to allow schools whose studentbody is at least 50 percent Moslem to teach Islam so that these students complete the compulsory curriculum.One teacher seminar has already been held,and we will review the new courses that will be offered in 1981 at a future seminar to be held in Yala Province," stated Mr Rung.

IMPACT OF RISING OIL PRICES, CONSERVATION MEASURES DISCUSSED

Bangkok SIAM RAT in Thai 9 Dec 80 p 5

[Editorial: "A Way Out of the Energy [Crisis]"]

[Text] It is almost the end of the year and there is much talk that the price of oil will have to be raised again in Thailand. Even though the new year may arrive on a note of fear concerning the cost of living, the fact that we know ahead of time what is going to happen at least allows everyone to make plans for this. As for this problem that we may face, it is an important problem that all sides must work to solve.

The government has begun to greatly restrict energy consumption. The latest announcement by the government that was issued last week warned all sides of the truth of the fact that oil is becoming a weight that is preventing Thailand and the Thai people from making progress on all fronts. Thailand will have to use shocking amounts of money to purchase oil to produce other types of products. That is, it will have to use up to 44 percent of the total budget on oil. If this had happened to the business of an individual, the person would be considered to be very unlucky.

The plan to conserve oil by closing the service stations and fuel oil distributions stores on Sundays and by restricting sales to before 1800 hours only throughout the country as was announced earlier by the government has had the effect of forcing businesses to review their activities. Before 14 December, which is the day announced for the implementation of the plan, land transportation businesses have been making appeals and showing concern over the difficulties that will arise when all the transport trucks operate on days when there is no gasoline and about the great danger that will result from the trucks having to carry rather large quantities of reserve gasoline for use on days when there is no gasoline. Concerning these problems, these are matters that the government should quickly discuss and [try to] solve because they are important problems that may give rise to difficulties for the people concerning trade and prices.

The plan to conserve oil will certainly receive opposition if the government becomes stricter with those who use gasoline. We feel that in such a situation, the government may not be able to avoid having to raise oil prices. The thing that the government must do will be an important step that will generate criticism and unrest in Thai society for another period of time, just as past governments have learned. We believe that the people will cooperate in the fight against the various problems and cooperate with the government when they have the same understanding about the problems as the government does because this is a matter that directly concerns the stability of the income and expenditures of the people. We should begin to do something and do it regularly so that when it becomes necessary for the more than 40 million Thais to face this situation, we will be able to solve the problems in a peaceful and beneficial way.

COLUMNIST DISCUSSES RESTRICTIONS ON FOREIGN LABOR ORGANIZATIONS

Bangkok TAWAN SIAM in Thai 9 Dec 80 p 6

[Politics, an Interesting Subject column by Dr Pricha Hongkrailoet]

[Text] The National Security Council has proposed rules for receiving support from foreign labor organizations. This is because, in the past, many foreign organizations have freely come in and played a role in Thai labor groups without any supervision by government units. Sometimes these foreign organizations have played political roles that have involved the security of the country.

From the statement by the National Security Council mentioned above, we can see that, at present, there is much interference in Thai politics through the use of various interest groups in Thailand such as the laborers, the farmers and the students. Also, these foreign organizations often carry on their activities in the form of "providing help" in various forms, such as by giving money to hold seminars, conferences and meetings, which seems to have become so widespread in Thailand today that it is a "fashion."

Sometimes foreign organizations enter by providing support to hold academic seminars, using "academics" as a cover. In reality, these organizations use the opportunity to "sell their political views" to the members who come to listen. We can often see such seminars being arranged this way for various groups.

Concerning requests for support by these labor groups, Mr Charoen Siriphan, the deputy director-general of the Labor Department stated that, at present, the Department of Foreign Cooperation will serve as the body responsible for supervising foreign organizations that want to provide help to the labor unions. The Labor Department will be responsible only for supporting and cooperating with labor.

Mr Charoen Siriphan, the deputy director-general of the Labor Department, also stated that "concerning the many labor organizations that enter [the country], there are both underground and open organizations. They provide money for seminars in order to propagate

their improper ideologies and views among the various labor unions. In the past, we have infiltrated people [into the unions] to follow the activities of these illegal organizations in order to stipulate set courses [of action]."

Thus, this writer feels that in order to prevent trouble before it starts and to have the supervision of the government bring results in an efficient manner, we should stipulate measures concerning both proper and improper requests for suppot from foreign organizations in accord with the law. This should also be expanded to include requests for support by other groups and not just the labor groups.

POLICE CORRUPTION, INTERNATIONAL LINK EXAMINED IN ORE SMUGGLING

Bangkok TAWAN SIAM in Thai 29 Nov 80 p 2

[Editorial: "Don't Just Speak Well"]

[Text] Concerning the recent arrest of smugglers in Nakhon Sithammarat Province who were transporting smuggled ore out of the country, it is openly known that government officials were involved in this. They gave protection by supervising the transporting of the ore and preventing officials from other sectors from making arrests. Besides this, it is believed that some influential people and high-ranking police officials gave secret support.

It has been known for a long time that ore is being secretly smuggled out of the country and sold abroad. But it appears that serious and resolute efforts to suppress this have not been made, except for the occasional seizure of small quantities of ore, and suspects have not been arrested. It is thought that the smugglers who smuggle ore out of the country for sale abroad have formed illegal organizations and that there are widespread, closely-knit networks, or in other words, there are government officials involved too. Thus, the smugglers have continually been able to avoid arrest, even though the smuggling of ore requires the use of many workers and large means of transportation.

How well-organized the smuggling of ore for sale abroad is can be seen from the fact that Singapore has built an ore smelting plant even though Singapore does not mine ore itself. This shows that great quantities of ore are smuggled out and sold abroad every year. And when we consider the fact that those who sell this ore at low prices do not have to pay duties or taxes, it can be seen that this unfortunately causes Thailand to lose income and valuable resources.

We agree with a report by military officials that states that the reason why suppression this is so difficult and has not achieved results is that high-ranking local officials have become involved with the influential investors. They have given protection to or invested money in such operations. This has completely discouraged the lower ranking and honest officials. Thus, in order to solve this problem, efforts should be concentrated on those officials who

support ore smuggling in the south and who protect these smugglers. For these reasons, it is time that the government made a serious and resolute effort to solve this problem, or suppress this, before the people start thinking that government honesty, or the policy of suppressing the influential people in the localities, is just talk and nothing else.

BRIEFS

PARAMILITARY FORCES STRENGTH--Mr Phisan Mulasatsathorn, the director-general of the Department of Local Administration, has revealed that between the time of the training of Thai Volunteers for National Defense (TVND) and the end of September 1980, the total strength of the TVND was 634,748. Of these, those of the self-defense type numbered 415,990 and those of the guard and development type numbered 218,758. Of the total number of Thai Volunteers for National Defense, the northeast had the largest number with 380,373. There were 44,433 in the north, 86,171 in the Central Region and 73,771 in the south. BRIEFS

NEW PAKISTAN AMBASSADOR--Rangoon 4 May--The Government of the Socialist Republic of the Union of Burma have agreed to the appointment of Mr Afzal Mahmood as Ambassador Extraordinary and Plenipotentiary of the Islamic Republic of Pakistan to the Socialist Republic of the Union of Burma in succession to His Excellency Mr S Irtiza Husain. Mr Afzal Mahmood was born in 1925. A graduate in Arts and Law, he is a lawyer by training. He joined the Foreign Affairs Group in October 1973, served as Director-General at the Ministry of Foreign Affairs in Islamabad from 1973 to 1974 and as Minister at Pakistan Permanent Mission to the United Nations in Geneva from 1974 to 1976. He was then appointed as Director-General at the Ministry of Foreign Affairs in Islamabad from 1976 to 1979. He has been serving as Minister in the Embassy of Pakistan, New Delhi since December 1979. Mr Afzal Mahmood is married. NAB [Text] [Rangoon THE WORKING PEOPLE'S DAILY in English 4 May 81 pp 1,4]

EDITORIAL QUESTIONS U.S.-PAKISTAN RELATIONS

Bombay THE TIMES OF INDIA in English 2 May 81 p 8

[Text]

It is perhaps realistic on the Reagan administration's part to conclude that it has no option but to terminate prematurely the 1963 agreement with India on the supply of enriched uranium for Tarapur. For it is possible that the U.S. Congress will not modify the 1978 anti-proliferation act which makes it difficult for the executive to maintain nuclear co-operation with a country which refuses to accept, as India does, the so-called full-scope safeguards. President Reagan could, as President Carter did, use his right to waive this condition and sanction a shipment subject to congressional approval or rejection. But this is, as President Carter found, not a dependable procedure which can assure smooth relations. Even so, it is, from the American point of view, truly extraordinary that the Reagan set-up should on its own initiative wish to terminate the agreement with India just at this stage when it is planning to extend substantial economic and military assistance to Pakistan.

U.S. military aid to Islamabad may weaken rather than strengthen Pakistan's long-term security and as such hurt rather than promote America's own interests in the region. This is, however, a separate issue which we do not propose to discuss here. Washington's decision to arm Pakistan raises other issues which are more pertinent in the present context. Before deciding to resume aid to Pakistan, Washington has not asked it for an assurance that it is not engaged in developing nuclear weapons. Indeed, the administration's spokesmen have said that it has not sought such an assurance because it knew it could not have secured one. This means that the U.S. government is prepared to acquiesce in Pakistan's bid to acquire nuclear weapons. This must involve waiver by Congress of the Symington amendment which prohibits U.S. aid for countries which go in for nuclear weapons. It is possible that Congress will reject the administration's proposal to waive the amendment and thus cripple its programme to arm Pakistan. But if Congress accepts this proposal, which is surely what the administration thinks, it will be interesting to find out why it is not proposing a similar waiver in respect of the supply of enriched uranium for India.

The obvious answer, of course, would be that Washington regards Pakistan and not India as vital to its struggle against the Soviet Union. On a surface view, this is understandable. But the proposition is full of so many loopholes that the U.S. policy-makers must be very naive indeed to

accept it without qualifications. The qualifications in respect of the Zia regime in Islamabad are obvious enough and need not be rehashed once again. There are others which it may still be worth our while to state. If Pakistan is to play any role at all in the U.S. plans for the region, both Washington and Islamabad need India's acquiescence. Pakistan cannot but be paralysed if it is not assured of its security vis-a-vis India and has to take steps to safeguard it. Thus, not only must Washington do all it can to persuade Islamabad to befriend New Delhi but it must also seek to retain some leverage in India. And what better leverage could it have than to continue to keep this country dependent on it for the supply of enriched uranium? Washington cannot lure India into joining its senseless anti-Soviet crusade. But it need not push this country closer to Moscow and thereby increase the odds against itself.

India has, of course, considerable stakes in good relation with the United States. As such, it would have liked Washington to continue to honour its agreement regarding Tarapur so that the ties between the two countries did not come under unnecessary strain. But apart from this, it has no reason to regret the termination of the 1963 deal. Pakistan's decision to go in for nuclear weapons has left it no choice but to exercise the option it has maintained in this field at considerable cost to itself all these years. The best of relations with the United States cannot guarantee this country's long-term security against a Pakistan in possession of the bomb. That apart, India needs to be free of the stipulations which it accepted under the agreement with the United States in 1963, the most irksome of these being the obligation to pile up irradiated fuel rods and keep its reprocessing facilities idle. It had no choice so long as it was not in a position to produce an alternative fuel for Tarapur. Since it has produced and tested such a fuel — Dr. Homi Sethna has said so publicly — it is ready to be on its own in respect of Tarapur.

RAJYA SABHA DISCUSSES FOREIGN POLICY DEVELOPMENTS

Bombay THE TIMES OF INDIA in English 1 May 81 p 15

[Text] New Delhi, April 30 (PTI).

Mr. Bipin Pal Das (Cong-I) sounded a note of caution in the Rajya Sabha today over a "threat to encircle India by forces not friendly to our country" and called for the nation's armed forces to be kept in a state of readiness to face any eventuality.

Initiating a discussion on the working of the external affairs ministry, Mr. Das warned against designs of a Washington-Beijing-Islamabad axis to create instability in the region.

Pakistan's plans to manufacture nuclear bomb would have serious consequences because in that case India too will have to keep its options open, the former deputy external affairs minister said.

Welcoming the forthcoming visit of the Chinese foreign minister to India, Mr. Das told Mr. Narasimha Rao not to expect too much of it.

He was all for complete normalisation of relations with China but this could not be achieved without resolving the border dispute between the two countries, Mr. Das said.

According to him, the British Prime Minister, Mrs. Margaret Thatcher, during her visit to India, failed to give any concrete assurance to the Indian people on the issue of racial discrimiination and West's arms supply to Pakistan. "It appears that Mrs. Thatcher did not care about our interests on the issues," he said.

Mr. Das wanted the non-aligned group to launch a vigorous peace offensive and a campaign against war, arms race and nuclear armament.

The non-aligned countries should be told to deny military base facilities to super powers. If any country fails to comply with this directive it should be expelled from its membership, Mr. Das said.

Mr. N. P. Nanda (Cong-U) said the government should expand and intensify its diplomatic activities in Latin America. He was highly critical of the United States for adopting an anti-India posture. "Whenever we try to be friendly with

the US, they kick us. The US always adopts different standards with regard to its approach towards India."

Mr. Nanda asked the external affairs minister to deal with utmost caution the proposed visit of the Chinese foreign minister.

Mr. Syed Shahabuddin (Janata) said some cracks were clearly visible in the foreign policy of consensus evolved during the Nehru era. There was a definite tilt in our foreign policy towards a super power. A deliberate campaign was being launched to create a war psychosis, he said adding that this might be to cover up the incompetence of the present government.

During the past one year, the Janata leader said, there has been no progress in the working of the foreign ministry either in matters of bilateral in regional or global relations.

Mr. Shahabuddin was of the opinion that India was following double standards in its foreign policy, leading to its isolation in the United Nations and other forums. India's dialogue with the ASEAN had come to a halt he said.

Mr. Dinesh Singh (Cong-I) said the new cold war between the two super powers had its centre in South Asia.

Mr. Dinesh Singh wanted India to have a frank and detailed discussion with China and thrash out problems between the two countries.

Referring to Pakistan's efforts to acquire arms on a large-scale, he wondered whether Pakistan wanted to become a "client state of the U.S."

Mr. Prakash Mehrotra (Cong-I) felt that the super powers were involved in the arms race and had once again revived the slogan "peace through strength."

MANIPUR INSURGENTS SAID TO USE 'SOPHISTICATEL ARMS'

Madras THE HINDU in English 29 Apr 81 p 9

[Text]

IMPHAL, April 28

An indefinite dusk-to-dawn curfew has been imposed in Greater Imphal from Monday in view of the recrudescence of violence. Unlike in the past the army will be patrolling during the curfew hours.

A spate of violence in various parts of Manipur has rocked this insurgency-hit border State. For the first time the insurgents belonging to the People's Liberation Army (PLA) have started using sophisticated arms and explosive devices like land mines.

Further, they are using balloons for dropping propaganda material in inaccessible hill and jungle areas. It is feared that these balloons are also used as signals among underground camps. The timing and number of balloons seem to coincide with the ambushes and encounters.

The PLA has started operating in large numbers. It has been lying low except for killing those whom they consider as counter-revolutionaries.

Mr. Romen Kumar Singh, Additional Superintendent of Police, had a chance encounter with ten PLA members at Keishamthong bridge near here recently. Police sources said the insurgents could not fire more than two rounds as the ammunition was defective.

Two escaped, and out of eight arrested, two were killed. One of the dead was Joybi Singh, who was an expert bomb-maker.

Underground sources said both of them were deliberately bayoneted to death.

On the following night, a group insurgents planted a land mine at Kongba. An army jeep patrolling the area was blown up. The insurgents continued to fire from both sides at the surviving jawans for about 15 minutes.

The combing operations, conducted ostensibly to round up these insurgents, have drawn blank.

Meanwhile, the killing of police informers and counter-revolutionaries has been on the increase. Reports in the local press say that some PLA members were also killed by members of other ground organisations.

It has become increasingly clear that some anti-social elements have taken advantage of the fluid law and order situation to earn quick money.

Every second young man seems to have illegal firearms. Recently, four armed youths entered a hotel and demanded money. Three of them escaped after firing a shot at the manager. The fourth was caught and handed over to the police.

INDIA MAY BORROW FROM ASIAN DEVELOPMENT BANK

Madras THE HINDU in English 3 May 81 p 12

[Text] Honolulu, May 2.

India will consider drawing funds from the Asian Development Bank's Development Fund after 1986, marking the first time the country has come to the Bank for assistance, Mr. R. Venkataraman, Finance Minister, said here on Friday.

He told the Bank's annual meeting that India had unilaterally refrained from borrowing from ADB, even though, on any objective criteria, it would have been entitled to a substantial proportion of its lending resources.

"However, circumstances have undergone a dramatic change in recent years, compelling a review of our earlier position. The past few years have seen sharp increases in the prices of oil and related commodities, imposing a heavy burden of adjustment on the economy.

"If this adjustment is to be achieved without undue disruption of our development effort, India has to raise adequate resources through still greater effort at home and a larger inflow of external resources," he added.

Eligible to Receive Largest Share

Mr. Venkataraman said that on the basis of the Bank's criterion of income per head and population, India would be eligible to receive the largest share both from the Asian Development Fund and from the ordinary capital resources.

"The Government of India has come to the conclusion that in spite of its large requirements of concessional funds on account of its low per capita income, population and balance of payments difficulties, it should refrain from borrowing from ADF till 1986.

"However, India would be interested in drawing on the resources of later ADF replenishments," he said.

The Bank is currently discussing the receipt of more funds from developed countries from 1983, although the outcome of these discussions is far from clear yet.

Mr. Venkataraman said "India's approach assumes the country's requirements will be adequately met by ordinary capital resources of the Bank--lent at 9.25 per cent--from 1983.

He also announced India would add a further $300,000 to the ADB Technical Assistance Fund to bring its contribution to over $ one million.

The Deputy U.S. Treasury Secretary, Mr. Timothy McNamar, said "this will not be an easy year for foreign assistance. Eighty-six domestic and foreign assistance programmes have been targeted for spending cuts of roughly $56 billions in the 1982 fiscal year".

The U.S. administration intended to complete a review of its assistance to international development banks by September and hoped to set out shortly afterwards a timetable for negotiations on the subject.

RESERVE BANK REVIEWS COOPERATIVE MOVEMENT PROGRESS

New Delhi PATRIOT in English 2 May 81 p 7

[Text] Bombay, April 30.

The Reserve Bank's biennial review of the cooperative movement in the country for 1976-77 and 1977-78 reveals the failure of cooperative credit policy in reducing regional imbalances.

The review observes that the thrust of cooperative policy during the two years was mainly to gear up the cooperative credit institutions in meeting the credit needs of the hitherto neglected weaker sections of the rural poor and to reorganise and strengthen the credit structure with a view to improving its performance and reducing regional imbalances.

The review records that the performance of the cooperative credit structure continued to remain uneven among the States. Of the total loans of Rs 1,273 crore issued in 1977-78 by the primary agricultural credit societies for the country as a whole, the combined share of just five States of Maharashtra, Gujarat, Tamilnadu, Uttar Pradesh and Punjab was nearly 55 per cent.

Mounting overdues at various levels continued to smother the progress of the cooperative movement. The large-scale overdues constituted a major obstacle in meeting the short-term and medium-term credit needs of agriculture on an increasing scale year after year. The review brings out that the total overdues including unsecured cash credits and overdrafts of the Central cooperative banks further increased from Rs 460 crore in 1975-76 to Rs 754 crore in 1977-78 while the overdues of primary agricultural credit societies rose from Rs 561 crore in 1975-76 to Rs 809 crore in 1977-78.

The high-levels of overdues thus "calls for concerted and sustained efforts on the part of the cooperative banks, primary credit societies and State Governments to further intensify recovery efforts.

As regards the reorganisation of primary agricultural credit societies, the review notes, considerable progress was achieved in several States. During the period the re-organisation was more or less complete in Andhra Pradesh, Assam, Haryana, Karnataka, Kerala, Orissa, Rajasthan, Tamilnadu and Uttar Pradesh while in the remaining States much work remained to be done. A few States such as Maharashtra were still having reservations in completing the programme on the lines agreed.

Giving its overall view, the review report increase in the total loans, outstanding at the level of the State cooperative banks by nearly 50 per cent from Rs 894 crore in 1975-76 to Rs 1,339 crore in 1977. [as published]

CSO: 4220/7693

NEW FICCI HEAD HOLDS DELHI PRESS CONFERENCE

Madras THE HINDU in English 2 May 81 p 7

[Text] New Delhi, May 1.

The business community feels optimistic of achieving a growth rate of ten per cent in industrial production and 12 to 15 per cent increase in exports during 1981-82 if adequate infrastructure facilities are made available.

This optimism was expressed by Mr. Arvind Lalbhai, at his first press conference after assuming the presidentship of the Federation of Indian Chambers of Commerce and Industry here.

Mr. Lalbhai, however, said that the growth of industry and of trade would depend on the availability of adequate infrastructure facilities including power, coal and transport. Recently, there had been significant improvement in power generation, coal production as also rail movement, and he hoped that these trends would be carried forward in the coming months.

"If for any reason the growth of infrastructure does not match the requirements, the production programmes of industry will not be realised," he added.

Referring to generation of resources, Mr. Lalbhai said that even with a ten per cent return, public enterprises could generate resources to the extent of Rs. 2,000 crores per year.

This could be mobilised without any rise in prices or creating any adverse results like those stemming from taxation. It was therefore of utmost importance that the working of public enterprises was put on a sound footing.

Mr. Lalbhai said it was necessary to combine public accountability with commercial independence.

'Dismantle Controls'

Referring to the Government charge that the industry had not responded fully to the various incentives given to it to boost production and exports, the FICCI president said for any scheme to bear fruit some gestation period was required. He said he was confident that the desired objectives of growth and exports would be gradually achieved.

He said the industry should work in comparative freedom and the 30 years of controlled economy had generated a psychosis that if these controls were removed there might be chaos.

He felt that all controls should be dismantled as far as possible to impart necessary efficiency.

He said industries in which price control existed, had tended to become unproductive. He felt that excise duty rebate allowed to the tyre and tubes industry should be extended to other industries also.

The corporate sector, Mr. Lalbhai said, was faced with a paucity of resources. The Sixth Plan envisaged a corporate investment of Rs. 5,000 crores by 1984-85--a fivefold increase over the level obtaining last year. If this stupendous target was to be met, the present high level of corporate taxation would have to be reduced, Mr. Lalbhai said.

'Cut Corporate Taxation'

If the Sixth Plan target was to be achieved, the new issue market should absorb industrial securities worth Rs. 1,000 crores which amounted to a tenfold increase over the present level, Mr. Lalbhai said. The terms offered by financial institutions were difficult. These institutions, moreover, did not have adequate resources.

The need of the hour, therefore, was the reduction of corporate taxation to 50 per cent, Mr. Lalbhai said.

To create a market for debentures and other corporate securities including deposits, the private sector should be allowed to run unit trusts on the lines of the Unit Trust of India, Mr. Lalbhai suggested.

Referring to the rising cost of plant and machinery replacement, Mr. Lalbhai said such escalation had hampered efficiency. The problem was aggravated by the inadequacy of the depreciation allowance allowed under the Income Tax Act. He called for a system of inflation accounting.

Draconian Bill

Mr. Lalbhai criticised the Essential Commodities (special provision) Bill as "draconian".

The Bill provided, among other things, for summary trial by special courts, mandatory imprisonment of not less than three months and making offences non-bailable.

CHIEF OF STAFF REPORTS ON ARMY READINESS

New Delhi PATRIOT in English 3 May 81 p 4

[Text] Calcutta, May 2--Chief of the Army Staff General O P Malhotra said here today that the Indian Army was at present operationally well-equipped to face any challenge.

Talking to newsmen, Gen. Malhotra said that modernisation of equipment, increase in fire power and a satisfactory state of combat readiness, including mobility, were the salient features of Indian Army today.

The Army chief said that the well-being of the man who hand the equipment was his main consideration. [as published] Happiness of the individuals contributed a great deal towards improving their personal and operational efficiency, he felt.

The General said he was proud to say that everything "has been done on our part" to keep the army operationally fit and its very high. [as published]

General Malhotra said that as Army chief has was able to ensure modern weapons to the army and welfare of its personnel. [as published]

He was given an impressive cereonial [as published] guard of honour this morning by the troops of Madras Regiment. The General and Mrs Malhotra were later given a touching send-off by Lt-General and Mrs E A Vas, and Maj General and Mrs Pathania, and other senior military officers.

FRONT SEEKS TO FORM MANIPUR GOVERNMENT

New Delhi PATRIOT in English 3 May 81 p 5

[Text] The People's Democratic Front (PDF) has said it should be allowed to form a popular government in Manipur, now under President's rule, reports UNI.

Addressing a news conference on Saturday PDF leader K H Chaoba said the party had submitted a memorandum to the Governor, now in Delhi, on the demand The Front had strength of 31 MLAs in a House of 59. It comprises the Communist Party of India, the Communist Party of India (Marxist), the Congress(U), the Manipur People's Party and the Janata.

PTI adds: Mr Chaoba, who had met Governor of North-Eastern States L P Singh on Friday said the Governor seemed helpless to give him any positive answer.

Mr Singh who was to have relinquished his post, is still holding the office and is now camping here.

Mr R K Vyas, who was to have replaced Mr Singh, died recently before assuming office.

Mr Banka Behary Das, AICC(U) general secretary, who was present at the press conference, intervened to say that it was their feeling that by delaying to call on the PDF to form a government, the Congress-I was trying to form a government on its own after securing some defections to its ranks.

The Congress-I attempt would not succeed as all the 31 members of the PDF were united, Mr Chaoba and Mr Thombi Singh asserted.

GANDHI SAID TO ALLAY FEARS OF OPEC INVESTORS

New Delhi PATRIOT in English 3 May 81 p 1

[Text]

INDIA is assuring OPEC investors from West Asia that they need not be afraid of their investments in this country being nationalised.

This assurance is learnt to have been given to the visiting dignataries of the Gulf region on whom the Government has impressed the scope that India offers to investors in special fields.

These fields include petrochemicals, fertilisers and engineering, according to sources.

Prime Minister Indira Gandhi has herself assured OPEC investors that they should not be wary of investing in India for the fear of nationalisation.

Discounting such fears, she told the press corps in the entourage of the Amir of Baharin —who has just concluded a four-day State visit to India—that 'we do not nationalise just for the sake of nationalisation'. Nationalisation, she said, was resorted to only if that was imperative for the country's development.

The Prime Minister said one of the main reasons that increases in oil prices affected the developing nations far more than the western nations was that the OPEC had made massive investments in the West

India, she told them, understood the OPEC feeling on oil prices. The resources of these nations had been exploited by the western nations, and when the Arab countries took control of their own oil, it was natural that they would take steps to their advantage.

In the rise in oil prices, however, it was not the western nations that suffered, but developingirg countries like India. India for instance bought oil not for luxuries but for essential transport and for fertilisers. Although some economising could be done there was not much scope to reduce the oil imports.

She said OPEC nations were also spending the oil money in buying many goods from the West. by which they could largely manage to offset the rise in oil prices and did not feel the pinch as much as the developing nation.

The Prime Minister also pointed out that India, with its economic and political stability, was a good place to make investments.

INDIA, USSR SIGN SUPPLEMENTARY PACT ON OIL SUPPLY

Bombay THE TIMES OF INDIA in English 2 May 81 p 14

[Text] Moscow, May 1 (PTI): The Soviet Union will receive from India this year cereals and goatskin besides a few other items in exchange for the additional 1.35 million tonnes of crude and petroleum products in the current year.

This was stipulated in a supplementary protocol signed here last night by a visiting Indian delegation led by the commerce secretary, Mr. P. K. Kaul, and the Soviet authorities.

This was a sequel to the trade agreement for 1981 signed in December.

Two other agreements, one concerning banking arrangements for the 520 million rouble credit offered by the USSR for the next five years and the other relating to commercial credits for the import of equipment and machinery into India from the USSR for the various Soviet-aided projects in the next five years, were also signed.

The Soviet Union had been providing India in the past on a long-term basis crude and petroleum products amounting to a little over three million tonnes. It had agreed to supply for the next five years an additional 1.35 million tonnes of crude and oil products annually on India's request.

From next year, this additional quantity will be absorbed in the normal annual trade plan.

The agreements were signed for India by Mr. P. K. Kaul and Mr. D. K. Chatterjee, a joint secretary in the finance ministry, and the deputy minister for foreign trade. Mr. Grishin and the chairman of the foreign trade bank of the USSR, Mr. Iranov, signed on behalf of the Soviet Union.

CONCERN EXPRESSED OVER TREATMENT OF WORKERS ABROAD

Madras THE HINDU in English 29 Apr 81 p 6

[Text] New Delhi, April 28.

The Lok Sabha Estimates Committee has expressed serious concern over the exploitation of Indian girls, "enticed" into marriage by foreign nationals particularly from West Asian countries, and later deserted or ill-treated.

In its 16th report on "Indians in West Asia, Sri Lanka, Malaysia, Burma, Indonesia and Singapore" presented to the House on Tuesday, the committee has also expressed its distress over the harassment and exploitation of Indian workers in the West Asian countries.

It has expressed strong criticism of the "smugness" displayed by the External Affairs Ministry towards such a large number of cases of ill-treatment and exploitation.

"Thorough enquiries made in 1976," says the committee, "confirmed that a large number of Arab nationals, aged 60 to 70, got married to young girls who were later sold to Arab households as domestic servants or to some agents and in some cases were forced to take to unpleasant and indecent practices. [as published]

In 1977 the Regional Passport Offices were instructed by the Ministry to issue passports only after verification of facts from various sources and after satisfying themselves that Indian women were not being cheated.

The committee is unhappy over the failure of the Indian missions in Abu Dhabi and Doha to carry out the instructions to interview Arab husbands personally before attesting their sponsorship delegations and over the Ministry's attempts to whittle down its lapses.

Publicity: While agreeing with the Ministry that the precautions taken to regulate passport facilities to Indian Muslim girls married to Arab nationals are applicable only after such a marriage has been solemnised, it, however, says "The Ministry should not sit as idle spectator when it known that exploitation is taking place."

It has suggested that cases of desertion and exploitation of Indian wives by Arab husbands should be given discreet publicity to caution people about the dangers inherent in such matrimonial alliances with unknown foreigners.

The Ministry should also do its utmost to avoid fake marriages as cover for taking Indian girls out of the country for unauthorised employment, or marriages with maimed, sick or old persons. The Indian missions should be instructed to keep a close watch on such matrimonial alliances.

Since these cases relate mostly to Indian Muslim girls, the committee expresses the wish the "it should be possible for the Government to bring about, with the consensus of the minority communities concerned, a suitable system of compulsosry registration of all such marriages. [as published] This will minimise exploitation of Indian women by foreign nationals and safeguard their interests in the event of desertion or divorce.

Maid-servants: The committee has also expressed its distress over the ill-treatment, beating and molestation of Indian maid-servants, who had emigrated to Qatar and who wished to return to India at any cost.

In the past the Government had put a ban on Indian women going out to take an employment of this character in a household. But subsequently and particularly after a Supreme Court judgment the Ministry felt a total ban on women going out for employment could not be enforced.

The committee says that if requests from foreigners for employment of Indian women as ayahs or maid-servants or governesses are scrutinised closely with reference to the social stature, reputation and family background of the households concerned, the chances of ill-treatment can be minimised.

It expects the Indian missions to act as true guardians of the dignity of Indian women employees abroad and spare no effort to safeguard their honour.

Workers: As for the plight of Indian workers abroad, the committee says their harassment is taking place openly in most of the West Asian countries.

During the last three years, according to the figures given by the Ministry itself, "there have been 108 cases of harassment in Qatar, 300 in Saudi Arabia (in two years), 257 in Bahrain, 39 in Jordan, 1,000 in Kuwait, an undetermined number in Iraq, Iran and the United Arab Emirates, 11 in Lebanon, 9,965 in Omen and 617 in Yemen Arab Republic.

Taking strong exception to the Ministry's statement that these cases of harassment and exploitation coming to about 11,400 in three years or about 4,000 a year "are not really of any unusual magnitude", the committee says, "It is an astounding statement". If 4,000 cases of exploitation a year are not considered unusual, how many more should take place to convince the Ministry of the seriousness of the situation? The smugness displayed by the Ministry in the face of such a large number of cases of ill-treatment and exploitation is deplorable.

In a matter concerning the honour and prestige of Indian nationals abroad, the Ministry should view every such case seriously and not try to derive unwarranted consolation from statistical comparisons.

The committee has urged the Ministry to undertake a study into why the Indian workers, known to be hard-working, sincere and dedicated and not interfering in

the affairs of the country in which they work, are not treated properly. The Indian missions should consider every case of complaint, irrespective of the status of the complainant and follow it up vigorously with the employers and the local Government till a satisfactory solution is found.

On Indians in Sri Lanka, it has found that the implementation of the 1964 and 1974 agreements has not made satisfactory progress.

It has not accepted the statement of the Ministry that the people of Indian origin in Sri Lanka are reluctant to be repatriated.

ELECTION COMMISSION ANNOUNCES VOTING DATES

Bombay THE TIMES OF INDIA in English 1 May 81 p 7

[Text]

NEW DELHI, April 30 (UNI): The election commission has announced the programme for holding seven by-elections to the Lok Sabha from Orissa, Uttar Pradesh and West Bengal.

Simultaneously the poll will also be held in three assembly constituencies in Bihar and four in Uttar Pradesh where it was countermanded during the general election held in May-June, 1980, according to an official release.

Following is the state-wise break-up:

Lok Sabha:

Orissa — Cuttack: Uttar Pradesh — Garhwal, Bareilly, Amethi, Mirzapur and Allahabad.

West Bengal — Serampore.

Assemblies:

Bihar — Dhanaha, Parsa, Bakhtiarpur, Sandesh, Hisua and Giridh.

Karnataka — Dharwar, Rural.

Uttar Pradesh — Bilaspur, Bisauli, Shahjanapur, Tindwari Lakshmipur, Jahanabad, Patiali and Sikandrao.

West Bengal — Darjeeling, Kumarganj, Kharba, Suzapur, Jadavpur, Dum Dum, Manicktola and Midnapore.

The tentative programme for holding the by-elections except in respect of Karnataka and Orissa is as under:—

Date of notification — May 6; Last date for filing nominations — May 13; Last date for withdrawal of candidature — May 16 and Date of poll, if necessary — June 14.

In the case of Karnataka, the tentative programme is as under: Date of notification — May 8; Last date for filing nominations — May 15; Date of scrutiny — May 16; Last date for withdrawal of candidature — May 18, and date of poll, if necessary — June 14.

SHEIKH ABDULLAH SPEAKS AT SRINAGAR RALLY

Bombay THE TIMES OF INDIA in English 1 May 81 pp 1, 9

[Text] Srinagar, April 30.

The chief minister, Sheikh Abdullah, said today that the federal structure of the country was in danger of cracking up if the Congress(I) did not abandon its attempts to overawe governments and create conditions of instability in states where its writ did not run.

Addressing a rally at Iqbal Park, the first after his return here following the "darbar move", the Sheikh said in the federal structure the country had adopted, both the Centre and the states had their own roles to play and this was clearly defined in the constitution, and for Jammu and Kashmir, as one of the constituent states, by the instrument of accession.

In his hour-long speech, which was heard with rapt attention, the Sheikh dwelt on Centre-state relationship, the criticism that the minorities were feeling unsafe in the state and attempts by the Congress(I) to topple governments in the non-Congress(I)-ruled states.

He said there was no need for a confrontation to develop between the Centre and any state. Both had to realise the roles they had to play. But this relationship could not remain stable if the Centre sought to make its will prevail by force over the states. It had to retain parity between all states, even those where non-Congress(I) parties were in power.

The Sheikh alleged that after the 1980 parliamentary and state elections which had returned the Congress(I) in a majority of states and at the Centre, its partymen, "drunk with the heady wine of power," had initiated a systematic campaign to dislodge non-Congress(I) governments.

Bandhs had been observed in West Bengal during which many lives were lost. A communal problem had been created in Kerala and now similar attempts were being made to create a law and order problem in Jammu and Kashmir and then impose governor's rule.

The chief minister felt that the Congress (I) thought it could capture a majority of seats in the subsequent elections to the state assembly.

He said the Congress (I) campaign in the state had started by raking up the grievances of the people of Ladakh. After this, the agitation was shifted to Jammu, as a result of which the Sikri commission had been appointed. The commission's findings revealed that it was the people of the Kashmir valley who had suffered the most from regional imbalances.

When all these tactics failed, the Congress (I) president, Mrs. Gandhi, came here early this month and remarked that the minorities were unsafe in the state, he alleged.

/The campaign against the ruling party had been intensified by the spate of theft of idols from the shrines of the minority community and the more recent income-tax raids, he alleged./ [in boldface]

The chief minister regretted that while Mrs. Gandhi had expressed her sympathies with the plight of the minorities, she did not have a single word of cheer for the majority community in the valley.

He refuted the allegation that minorities were unsafe in the state. During the tribal invasion of 1947 when all members of the minority community had fled, it was the Muslims who had guarded the shrine of Khur Bhuwani in the valley.

The state had acceded to India voluntarily and not "through bribes or threat". The instrument of accession clearly laid that only defence, communication and foreign affairs were to be conducted by the Centre. He would strive to ensure the individuality and autonomy of the state.

Raising his voice, he said: "We will not permit anyone to play with our fate. Anyone questioning the individuality of the state or its interests could only do so over the bodies of the Kashmiris." He had made this clear to Mrs. Gandhi and Pakistan earlier.

JANATA LEADERS ADDRESS BANGALORE YOUTH RALLY

Bombay THE TIMES OF INDIA in English 1 May 81 p 9

[Text] Jayaprakash Narayan Nagar (Bangalore), April 30.

The Janata president, Mr. Chandra Shekhar, today accused the Prime Minister of trying to take advantage of the arms race in the Indian sub-continent.

He said that more and more tension was being injected into the residers did but because it was accentuated by the behaviour of Mrs. Gandhi. [as published] However, when the USSR intervened in Afghanistan, the government of India did not raise its "powerful voice" against it, he said.

The situation in the country was worsening every day in all spheres. Political and economic problems had mounted, law and order had deteriorated and the people were getting frustrated. It was to give a new turn to the country's development that the youth should strive through organised work among the people, Mr. Shekhar stated while inaugurating a two-day national meeting held by the Yuv Janata.

A similar call to the youth was also given by the former prime minster, Mr. Morarji Desai, in his "blessings" to the youth rally.

The youth rally, being held on the polo grounds of the Bangalore palace, once a property of the Mysore Maharaja, precedes the national executive committee meeting of the party which will be followed by a two-day convention of the workers of the south.

Both Mr. Shekhar and Mr. Desai spoke against the agitation initiated in Gujarat against reservations. The Janata chief said he could understand the need to remove the anomalies that had crept into the reservation scheme, but certainly not the agitation for doing away with certain facilities created for the benefit of the scheduled castes and tribes. This was a dangerous tendency, which the youth should guard against, Mr. Shekhar said.

Mr. Desai assrted [as published] that the reservation scheme should go on as long as untouchability remained. This was the time for those who had kept the untouchables in a state of oppression for centuries to repent for their past mistakes and allow the scheduled castes and tribes to come up the socio-economic ladder.

Mr. Shekhar put the problems of the nation, with 50 per cent of the people below the poverty line, 65 per cent of the people being illiterate and 80 per cent of the people without any medical aid, before the youth. Poverty was a curse, but disparity between the poor and the handful of the rich complicated the problem and created growing tension. There were regional imbalances and the tribal belt was in a turmoil, he said.

The Janata wanted these problems solved thorugh a democratic process, mobilising the enthusiasm of the people. It did not want to follow the Indira Gandhi regime which was a past master in making promises without fulfilling them he said.

Mr. Shekar [as published] wanted the youth to recognise the boys and girls belonging to the scheduled castes and tribes in colleges no longer believed that God was responsible for their miseries. It was the social structure that was responsible. Similarly, rural people had become restive because they felt neglected.

Mr. Shekhar recalled that a hue and cry was raised when the Janata government headed by Mr. Desai gave a subsidy of Rs. 500 crores to fertilisers to give an impetus to the agricultural sector. Nobody bothered about the subsidy being given to the corporate sector, amounting to Rs. 1,000 crores every year in terms of tax relief. The Indian corporate sector had the lowest taxation in the world.

Mr. Desai took his audience back to 1977, when the Janata was born to save the country from the "terrorism" of the then government. Democracy was in danger and emergency had been imposed because Mrs. Gandhi wanted to remain in power at any cost, he said.

The Janata had been voted to power in the subsequent election, but it fell because of elements which were obsessed with what he called "office-bearer mania" and political ambition and worked towards division rather than unity. They did not allow even organisational elections to be held. With a sigh of relief Mr. Desai said that these forces had left the Janata, which had emerged, at Sarnath, as a dynamic political organisation, free from dissensions.

Mr. Desai also outlined the Janata ideology as Gandhian. It did not believe in hero-worship. It wanted to become strong by reinforcing itself from within and not by destroying or weakening other political parties.

Mr. Desai referred to newspaper reports that there were differences between himself and the party president. "There can be differences between two intelligent people. Otherwise, they are not intelligent. Only fools have only one view. But in a democracy, one respected the other's view and did not quarrel. Democracy meant a spirit of reconciliation, he added. [as published]

He also referred to reports that he was leaving the Janata party and even politics and would take sanyas. "I do not believe in sanyas; I believe in the service of the people and this is to go on till the end of my life." Some people thought that it would be better if he went away. "I don't want to oblige them." Some others, who had left the Janata, spread the rumour that he was going to join them. "I have not lost my senses. My loyalty is to the Janata party."

Mr. Desai reiterated his belief in non-violence. While he wanted Janata workers to engage themselves in work and even agitations, if necessary, these should be

peaceful. He did not believe in "rasta roko," "rail roko" and bus-burning which had become part of today's agitations.

Mr. Desai felt that the Janata had not only become purified with divisive elements leaving it but it had become stronger as well. Some people thought that after the last Lok Sabha elections, the Janata had disappeared from the scene. This was not so. It had become a party with a better quality of people. Its popularity was increasing, as was his experience during his recent tours of Andhra Pradesh and Karnataka. People in unprecedented numbers came to his meetings spontaneously, unlike the people brought to Mrs. Gandhi's meetings in trucks, he said.

MAY 1 RESOLUTIONS OF JANATA EXECUTIVE REPORTED

Bombay THE TIMES OF INDIA in English 2 May 81 p 9

[Text] Jayaprakash Narayan Nagar (Bangalore), May 1.

The dismissal of the "discredited" Congress(I) government headed by Mrs. Anwara Taimur in Assam was demanded by the national executive committee of the Janata party here today.

This, a resolution passed by the committee said, should enable a democratic alternative to emerge.

Mr. Ramakrishna Hegde, general secretary, explained that the Assam governor should invite other political parties to form a government.

The brief resolution pointed out that the recent session of the assembly, when a cut motion on the budget demands was adopted, had demonstrated that the Taimur government had forfeited the confidence of the assembly as well as of the people. Its continuance was, therefore, repugnant to the letter and spirit of the constitution and accepted norms of parliamentary democracy.

It noted that Mrs. Taimur should have resigned, and might have done so but for the "brazen and partisan" manner in which the Central government had used its authority to prop up a "discredited" government, put together through defections. The Centre also permitted the governor to take the unprecedented step of authorising expenditure by the exchequer through an ordinance which was promulgated after the prorogation of the assembly.

The resolution was moved by Mr. Morarji Desai, who happened to be the chair in the absence of Mr. Chandra Shekhar.

Mr. Desai had earlier offered his good offices in finding a solution to the Assam problem and Mr. Shekhar had suggested a round-table conference of all concerned parties, including the opposition. But since these have been reportedly shelved by the Prime Minister, no fresh proposal emerged at the meeting.

However, the meeting welcomed the resumption of the dialogue on the foreigners' problem between the Centre and leaders of the Assam movement and hoped that a satisfactory solution would emerge.

While condemning acts of terrorism as well as separatist tendencies in the north-eastern region, the committee was of the opinion that it was the unimaginative

and inept handling of the situation by the government and its tactics of "procrastination and divide and rule" that had led to the worsening of the situation.

Electoral Reforms

Two other resolutions emerged from the national executive committee in the first half of the proceedings today--one on electoral reforms and another on tribals.

The committee said that what was urgently needed was the expeditious adoption of a suitable Central legislation on electoral reforms on the basis of various suggestions made so as to make the working on the parliamentary democracy more meaningful.

The present electoral laws, in the opinion of the Janata executive, had failed miserably to them the growing malpractices in the electoral system. "Suitable amendments" were suggested to the electoral laws and the constitution. The broad areas to be covered by such amendments were outlined as gerrymandering, faulty preparation of electoral rolls, flagrant use of force to stop legitimate voters from exercising their right to vote, capturing of polling booths, tampering with ballot boxes, partisan attitude of officers at polling station as well as in the counting of votes and declaration of results, impersonation of voters, defections and floor-crossing in legislatures leading to political instability.

Tribals' Problems

The resolution, however, appeared to stay away from suggesting any specific remedies.

One point on which the committee members were united was that the age of voting should be reduced to 18. This, as the resolution explained, was intended to involve the youth in the electoral processes--a "fitting" response to their urges and aspirations.

On the problems facing tribals, leading to growing discontent among them, the committee advocated a positive forest policy which should prohibit the felling of tress, promote forest-based cottage and small industries, harness research for commercial use of forest produce and employment of the tribal people, encourage community-based afforestation in a massive way and ensure the formation of co-operative societies, gradually eliminating contractors.

WRITER ANALYZES POSITION OF BHARATIYA JANATA

Bombay THE TIMES OF INDIA in English 1 May 81 p 8

[Article by A. S. Abraham]

[Text] The Bharatiya Janata Party's choice of Cochin for its national council session was doubtless designed to make a political point as much as its choice of Bombay for its first national convention some four months ago had a similar purpose. Then, because Bombay had been consistently more sympathetic to the opposition parties and more hostile to Mrs. Gandhi, the BJP was able to make a big splash.

In Cochin, it was, in fact, making two political points: one, that it was no longer a "northern party", but had a southern presence as well, and two, that in Kerala in particular, it had some say in the affairs of the state.

In Kerala, the former Jana Sangh, the BJP's parent party, did not win even one seat in the legislature. But the violent clashes between CPM and RSS cadres in the state are evidence that the BJP has made some headway, although how much it is difficult to say.

These clashes are one reason why the BJP has decided to have nothing to do with the Marxists politically. The BJP-CPM estrangement, in turn, is affecting Kerala's politics. The BJP, though not a member of the coalition ruling the state, wants the home ministry to be taken away from the CPM minister now running it and given to a non-Marxist cabinet member. And while the BJP has reaffirmed its opposition to any Congress(I) attempts to bring down non-Congress(I) state governments, there has been talk of joint BJP-Congress (I) efforts in Kerala to keep the Marxists at bay. What this adds up to is that the BJP, whatever its actual strength in Kerala, has become a factor for political parties to reckon with there. By holding its national council meeting in Cochin, it drove the point home.

Credit

What the BJP is striving after, however, is to become a force to reckon with in national politics, to be a, if not the, "national alternative" to the Congress(I). To its credit, it has emerged as one of the three major parties in the country today, the others being the Congress(I) and the CPM. Its membership is growing steadily, its overall sobriety has begun to win praise, however grudging, from

its severest critics, and its emphasis on "Gandhian socialism", however amorphous the term, may in course of time convince not a few sceptics that it is not a communalist wolf in Gandhian sheep's clothing.

In some ways, it is in a better position than the CPM or the Congress (I). The former remains, essentially, a regional party, albeit with national connections. Its efforts to win adherents on a large scale in the Hindi belt have not met with significant success and, Kerala notwithstanding, it has a distinctly Bengali ambience. The BJP, like the Jana Sangh out of which it grew, is strongest in the Hindi heartland and has substantial support in states like Maharashtra and Gujarat. It is making strenuous attempts to reach out to the south. While it is still far from being a truly all-India party in the way the Congress(I) is, it has much more of a national presence than the CPM.

Where it scores over the ruling party is in not depending on one individual for its effectiveness in the way the Congress(I) does today. True, the BJP has set about building up Mr. A. B. Vajpayee, its president, as its pre-eminent leader. But, firstly, Mr. Vajpayee is at best a reluctant leader and, secondly, the BJP is unlikely to link its fortunes with Mr. Vajpayee's fate in the way the Congress (I) has tied its fortunes to Mrs. Gandhi's future.

Mrs. Gandhi has ensured that her party will be all but rudderless when she is not at its helm. Whether Mr. Rajiv Gandhi will fill the bill remains to be seen. Even if he does, however, the Congress (I) will remain the one-person band it is today. The BJP, on the other hand, bids fair to become a party with a wide band of leadership, supported at lower levels by capable juniors moving gradually upwards. The cadre structure, in the case of both the BJP and the CPM, guarantees in some measure that there will be no paucity of leaders emerging from the ranks in time.

Support

The BJP's big problem remains the RSS. As far as all the other parties are concerned, this is always a good stick to beat it with. The CPM, for instance, in effect invited the BJP to join it in the struggle against "authoritarianism"--read, Congress (I)--when Mr. Jyoti Basu said, after a CPM politburo meeting, that there was no reason to keep the BJP out. When the BJP did not seem likely to accept the invitation (it didn't, eventually), the CPM made out that it never made the offer! The Kerala chief minister, Mr. E. K. Nayanar, spelt out this new line when he said that, at least in Kerala, the CPM could hardly discuss collaboration with the BJP unless that party first clarified where it stood /vis-a-vis/ [in italics] the RSS.

The CPM needed BJP support, rather than /vice versa./ [in italics] The RSS-CPM cadre clashes were seen by the Congress (I) at the Centre as strengthening its claim that the breakdown of law and order was a worrying enough feature of CPM-led state governments to consider having them dismissed. It was crucial for the CPM to pre-empt any move for a Congress (I)-BJP link-up in Kerala and to include the BJP among the "anti-authoritarian" forces that would oppose any attempt to prise the CPM out of office not only in Kerala but in West Bengal as well. Despite this, the CPM did not hesitate to tar the BJP with the RSS brush when the Marxists' effort at roping in the BJP for their purposes came unstuck.

The BJP's own confusion about the RSS factor encourages equivocation and impairs its coherence. At Cochin, the differences between the "moderates," led by Mr. Vajpayee, and the "hardliners" over how the party should handle this factor were only too evident. The "moderates," favouring the "Vajpayee line," seem to believe that the RSS connection lends the party misleading and damaging associations which only joint action with other parties, not excluding the Congress (I), can help immediately to blur and eventually to make invisible, Mr. Vajpayee's inaugural address at Cochin was an expression of this line and it is clear that he wanted the party to view the CPM offer more favourably than it finally did. The division between the two sides on the CPM invitation to co-operate was papered over at Cochin only at the very end of the national council meeting in the form of an amendment to the political resolution. Where the pre-amendment version had fudged the issue, the amendment categorically ruled out collaborating with the CPM.

The BJP cannot hope to present a "national alternative" to the Congress (I) unless it cures itself of its schizophrenia over its RSS links and gives up wanting to be a part, however vital, of a wider opposition grouping against the Congress (I) or "authoritarianism" of call-it-what-you-will.

Nurtured

It cannot survive for a day without the RSS network. If its roots go deep into some sections of Indian political soil, it is only because they have been carefully nurtured for decades by RSS cadres. Since it has no identity outside the RSS and cannot be viable without the latter, it is futile for it to try and dissemble by subordinating its interests to those of a larger opposition entity in the hope that this will make everyone forget its RSS base. The miserable experience it had in the Janata should have convinced it once and for all of the stony barrenness, for it and for the others, of that kind of fractious enterprise.

Instead of hankering after some form of political association with the other opposition parties that would all but resurrect the Janata (1977 model), an association that would seek as impossibly now as then to reconcile irreconcilable constituents merely on the basis of a shared enmity towards Mrs. Gandhi, the BJP should muster the courage, will and self-confidence to go it alone. It should openly declare its RSS links, assert that they cannot be equated with communalism and justify them on political, electoral, cultural and other grounds.

This approach would have the merits of enabling the party to speak with one voice, promoting coherence in national politics through the accumulation of social forces around two or three major parties (instead of these forces splintering into any number of pieces clustering round myriad parties to the benefit of none), and leaving it to the people to choose from among the political wares on offer without any of the vendors attempting to present their goods as something other than what they are.

Following its association (in its previous incarnation as the Jana Sangh) with the JP movement just before, during and after the emergency, the BJP has acquired political respectability in substantial measure. This did not prevent it from being humiliated by those with whom it was once allied. More recently, however, as those erstwhile allies have languished, it has grown stronger. Now, it is well-positioned to cut the umbilical cord of its past alliances and grow to political maturity on its own.

DISGRUNTLED KERALA MARXISTS JOINING BJP

Bombay THE TIMES OF INDIA in English 1 May 81 p 14

[Article by K. C. John]

[Text]

TRIVANDRUM, April 30.

ELEZHIKODE in Kerala is a cent per cent Muslim village. The CPM had just three followers there. The three have now joined the Bharatiya Janata Party, because they were disillusioned with Marxist promises and because the BJP alone could offer them "physical protection" against possible retaliation from the CPM musclemen.

A party member who left the CPM and joined the CPI was done to death a few days ago. Former CPM followers feel that the BJP alone could offer them protection through their trained RSS workers.

It is not as if there is an exodus from the CPM. But the BJP claims that most of the disillusioned Marxists prefer their party to any other. The "deserters" largely belong to the lower strata of society. One view is that the benefits of power that the CPM functionaries and prominent workers enjoy may not have percolated to the lower cadres.

Seizing the opportunity, the BJP has begun a systematic operation to identify the frustrated elements and win them over. Its cadres appear to be well-trained to provide the "converts" with both political and physical support. Years ago, it was the undivided Communist Party that attracted the Congress workers in Kerala. Now it seems to be the privilege of the BJP to welcome the politically disgruntled CPM men.

A BJP worker has said in a lighter vein that some three decades ago the communists used to stage a popular drama, "You made me a communist". The theme was that the rich forced the have-nots to seek asylum in the Communist Party. Today it could be another drama entitled "You made me a BJP man". The theme would be disenchantment with the CPM.

However, things are not as rosy as the BJP workers would have one believe. Though its volunteers earned the admiration of one and all with their organising capabilities at the BJP's recently concluded national council session at Mattancherry, there were no crowds to greet the party demonstrations passing by.

WEST BENGAL CPI LEADER COMMENTS ON DANGE EXPULSION

Calcutta THE STATESMAN in English 6 May 81 p 3

[Text] The West Bengal CPI leader, Mr Biswanath Mukherjee, has ruled out the possibility of a large-scale erosion of the party membership following the expulsion of Mr Dange by the national council and his reported decision to lead the All India Communist Party.

This is because, according to him, the former party chairman is not being supported either nationally or internationally. Not even one-third members of any State Council of the CPI are behind Mr Dange while the Soviet and other Communist parties of the world have no difference with the CPI on this issue. Only Mrs Gandhi and "some agencies" are trying in vain to break the party by their open support to the breakaway AICP.

Show cause notices, Mr Mukherjee said on Tuesday, were proposed to be served on 11 members of the party's Calcutta District Council, the unit most affected by the Dange problem while such notices had already been served on three other members of the council. The CDC has 63 members.

The State executive of the party, which will meet on May 21, has been empowered to study the organizational position in all districts and take disciplinary action wherever necessary. The party, according to Mr Mukherjee, takes steps only when the members concerned flout party discipline openly. The affected CDC members had violated discipline by holding a convention denouncing the party line. Mr Mukherjee added that Mr Dange's expulsion had had no impact on the BPTUC.

The CPI leader said that political bitterness at the lower level had stood in the way of finalizing the overall seat adjustments among the constituents of the Left Front and the CPI for the coming municipal elections. There had been agreement over 140 seats and disagreement in about 80 cases, mostly in Kharagpur, Contai, Garden Reach, Cooch Behar Dinhata and Purulia.

Despite this setback he maintained, the cause of Left unity had gained because of the agreement among Left parties for the majority of over 1,500 seats. "I do not hold anybody responsible for this setback" he added.

DANGE NOT ALLOWED TO SPEAK AT BOMBAY WORKERS' MEET

Bombay THE TIMES OF INDIA in English 3 May 81 p 5

[Text] May 2.

A peculiar aspect of the May Day celebrations in Bombay was that Mr. S. A. Dange could not address the joint meeting organised by the AITUC and the CITU at Bhoiwada Maidan yesterday though he is the president of the AITUC.

The Maharashtra executive of the AITUC at a meeting had decided a few days earlier that Mr. Dange should not be allowed to address the May Day rally in view of his activities against the CPI.

It seems Mr. Dange was keen on addressing the joint meeting so that he could make clear publicly his stand regarding his expulsion and other issues before the CPI and CPM workers. However, according to sources close to Mr. Dange, a note from the state AITUC executive asking him not to address the rally was delivered to him two days ago. The letter was signed by Mr. G. V. Chitnis, general secretary of the Girni Kamgar Union, who had been close to Mr. Dange for several years.

Mr. B. S. Dhume, AITUC leader, told this reporter that there was nothing wrong in asking Mr. Dange not to address the rally. In fact, last year, Mr. Dange had himself ignored the AITUC by refusing to address the May Day rally organised by the AITUC and the CITU. Instead, he had then chosen to address a meeting convened by his daughter, Mrs. Roza Deshpande.

Yesterday too, Mr. Dange had to address a meeting organised by his daughter and her All-India Communist Party which he had joined earlier in the day.

The Maharashtra AITUC executive meeting deciding against Mr. Dange's speech was attended by the president, Mr. A. B. Bardhan, Mr. B. S. Dhume and all other members.

At the Maharashtra Maidan meeting last night, Mr. Dange made only an indirect reference to his expulsion from the CPI and announced his joining the AICP.

The AITUC-CITU rally was addressed by Mr. S. Y. Kolhatkar, Mr. P. K. Kurane and Mr. K. L. Bajaj of the CITU, and Mr. B. S. Dhume, Mr. G. V. Chitnis and Mr. Sitaram Jagtap of the AITUC.

The Hind Mazdoor Sabha held a rally at the Podar College hall yesterday morning. Mr. B. R. Dandavate, the new president of the HMS, strongly attacked the government for the price spiral and anti-labour policies.

Among other speakers were Mr. K. A. Khan, dock workers' unionist, Mr. Vasant Gupte and Mr. Prabhakar More of the textile unions.

DANGE JOINS ALL-INDIA CP, MAKES MAY DAY SPEECH

Bombay THE TIMES OF INDIA in English 2 May 81 p 12

[Text] May 1.

Mr. S. A. Dange, veteran communist leader, today joined the All-India Communist Party founded by his daughter, Mrs. Roza Deshpande, a few months ago.

Mr. Dange, who was expelled from the CPI last month, made the announcement of his joining the AICP at a May Day rally organised by a "May Day Joint Committee" at the Maharasthra High School ground tonight.

He said he had filled the membership form of the party at 5 p.m. before coming for the meeting. Later, Mrs. Roza Deshpande announced towards the end of the meeting that she had resigned as the secretary-general of the party to make way for Mr. Dange.

The 82-year-old former CPI chairman and founder of that party, said sarcastically that he did not have to leave any party to join the new party for which he was thankful to Mr. Rajeshwar Rao. This was an indirect reference to his expulsion from the CPI.

May Day was celebrated by a number of trade unions during the day today. The AITUC and the CITU, the trade union organs of the CPI and the CPM, held a joint meeting at Bhoiwada Maidan, indicating the coming closer of the two parties.

Mr. Dange made his appearance at a public meeting after quite some time and his advanced age seemed to have had some visible effect on him.

At the very beginning, he said he would not be able to speak for long and old people should not talk much. He referred to his 82 years and said he might enter the 83rd soon.

He told the fairly large gathering that imperialism was the first enemy of the country and imperialist forces surrounding us were out to attack us.

However, Mrs. Indira Gandhi was taking steps to prevent imperialists from taking over India, he said. Mr. Dange also demanded the nationalisation of 75 monopoly houses in the country.

Indira's Offer

He quoted Mrs. Gandhi as telling him that she would do this if there was a strong agitation on the issue as there was before bank nationalisation.

He called upon the AICP to launch a programme on the issue. How could he give such advice to the party, he asked and then disclosed that he had joined the party.

He called for a tripartite management of industrial units and called for building up of a strong trade union movement. It was easy to talk of revolution, he said, and asked why the CPM government had not nationalised jute mills in West Bengal though the demand for the take-over dated as far back as 1925.

He also made a reference to the need for left parties coming together but did not elaborate. Mr. Dange defended the Soviet presence in Afghanistan.

He also explained that the purse of Rs. 2 lakhs presented to him on his 75th birthday seven years ago had been utilised for building a trade union study class centre at Khandala. Only through training could the class struggle be conducted property, he said.

Mr. Dange also attacked certain socialist leaders who ridiculed Karl Marx's Capital. He said even the capitalists in West Germany treated the book with great respect.

Earlier, Mr. Dange was profusely garlanded by several people. Among others who spoke on the occasion were Mrs. Roza Deshpande, Mr. Bhagwan Thorat, president of the Girni Kamgar Union, and Mr. Kari Jadhav.

The committee which organised the meeting consisted mainly of the Girni Kamgar Union and the All-India pharmaceutical employees' union led by Mrs. Deshpande.

URBAN INSURGENCY MAKES APPEARANCE IN ASSAM

Bombay THE TIMES OF INDIA in English 2 May 81 pp 1, 9

[Text] Shillong, May 1.

Urban insurgency, which continues to convulse the frontier state of Manipur, has apparently surfaced in Assam as well.

Attempts by small groups of terrorists in Assam at selective killings and engineering a series of bomb blasts along the railway track and the oil pipeline between Duliajan in upper Assam and Barauni in Bihar are reminiscent of the early stages of guerilla warfare in Manipur.

Alarmed by the spurt in subversive activities of the extremist elements in Assam, the state government has alerted the security forces throughout the state and tightened the security measures around the state secretariat complex in Dispur and vital installations in various parts of the state.

Many parts of Assam have already been declared "disturbed areas" and provisions of the Armed Forces (Special Powers) Act invoked, giving the security forces extraordinay [as published] powers.

The bomb attack outside the bedroom of the Gauhati residence of Dr. Tarini Mohan Barua, president of the Assam Janata Dal (AJD) and former minister, on Wednesday was the fourth attempt to liquidate marked men in the last six weeks.

Two bomb blasts, believed to have been set off to kill two legislators, rocked the heavily guarded MLA's hostel in Gauhati on March 17, on the eve of the budget session of the state assembly. In another explosion in Jorhat on April 6, Mr. E. S. Parthasarathy, commissioner of upper Assam, was killed in his office chamber.

The bomb blast at Dr. Barua's residence assumes significance in the light of his reported decision to quit the AJD and join the ruling Congress (I) with an important position in the Taimur ministry.

The dastardly attack on Mr. Parthasarathy is believed to have been an act of reprisal for the tough line he had adopted towards the Assam agitators.

The CBI, which has taken over investigations of the series of bomb explosions since December 6, when the Taimur ministry was installed in Assam, is reported

to have made a breakthrough in detecting the hidden hand behind the acts of sabotage.

Investigations made so far by the CBI team, led by Mr. C. N. Sharma, deputy inspector-general of CBI, have revealed that a number of small but determined groups of terrorists are active in Assam. The authorities have, however, not yet determined whether the groups are working in close concert or independently.

Some of these groups include die-hard members of the little known Jatiyu Rahi Bahini, founded in September by the former officer of the Special Security Bureau (SSB), Mr. Birkuju Choudhri, a section of the Purbanchaliya Lok Parishad (PLP) led by Mr. Hemanta Gogoi, a faction of the Jatiatabadi Yuba Chhatra Parishad, the Binode Mishra group of Naxalites and the militant elements the All-Assam Students' Union (AASU) and the All-Assam Gana Sangram Parishad (AAGSP).

The CBI also suspects the involvement of some leading members of the Assam Jatiatabadi Dal, a constituent of the AAGSP, in the recent bomb blasts.

Nripen Goswami, general secretary of the Gauhati unit of the parishad, Pudma Choudhury, president of the unit, and Abdul Jabbar, a prominent member, have been arrested.

Investigations in connection with the bomb blasts killing Mr. Parthasarathy reportedly indicate that a group of extremists has recently returned from the Akehin area in Burma, across Tirup district of Arunachal Pradesh, after having been trained in guerilla warfare and subversion techniques at a camp organised by the pro-Beijing underground Naga leader, T. Movia.

Another batch, which is believed to have completed its training at a camp in Kaintiapur in Bangladesh, across Jaintia Hills district of Meghalaya, is understood to be ready to return to Assam.

A third batch of militants is reported to have gone to Manipur to take training in the outlawed people's liberation army camp organised by the Tibet-returned Manipur underground leader, Iseshwar.

The Maipka Sharma faction of the banned PREPAK party in Manipur is also reported to have established links with extremists in Assam.

GANDHI CHAIRS MEETING ON INDIAN SCIENCE POLICY

New Delhi PATRIOT in English 2 May 81 pp 1, 5

[Text] India's science policy for the future emphasises the need for active research on the frontiers of the new sciences apart from effective implementation of all the continuing and projected schemes in the science and technology sector.

A joint meeting of the Cabinet Committee on Science and Technology and the Science Advisory Committee to the Cabinet, held on Friday under the chairmanship of Prime Minister Indira Gandhi, decided on measures towards successfully implementing these twin goals.

Among the decisions taken were the drawing up of a short-term plan to find gainful employment for the about three lakh unemployed scientific and technical personnel, the creation of a national registry on the technology of all foreign collaborations and the need to percolate science awareness not only to the school level, but to rural areas as well.

Mrs Gandhi, in her address, remained the scientists that self-reliance should be the core of all scientific and technological endeavours in the country. [as published] Special efforts, she said, were needed to develop the capacity to absorb imported technology and to ensure implementation of the proposals made in the Rs 3,400 crore science and technology section of the sixth Plan.

Briefing newsmen on the deliberations at the meeting, Planning Commission member Dr M S Swaminathan and Department of Science and Technology secretary Prof M G K Menon said it was also felt that India should continue to work towards breakthrough in 'frontier fields' like genetic engineering, and the atomic and space sciences despite the scarcity of resources.

Genetic engineering specially was of vital significance in many fields, including medicine and agriculture and it was decided to create a work force to study its scope, they said. Emphasis was also placed on continued development of alternate energy sources, waste processing and the like.

The Science Advisory Committee to the Cabinet (SACC), created recently to advise the Government on science and technology, will meet four times a year. It met on Thursday also.

In her address, Mrs Gandhi asked the SAC not to ignore the social implications of technological changes. She pointed out that many aspects in rural development

programme seemed to hurt the weaker sections most. "This must be avoided," she said.

She called for a social impact analysis in transferring new technologies to the field.

The Prime Minister stressed the need to consolidate the existing infrastructure while embarking on newer areas. She called for better utilisation of local resources and appropriate technologies for recycling wastes.

Emphasising the need for inculcating greater scientific consciousness among the people so that science and technology encompassed all aspects of life and living, Mrs Gandhi felt schools, universities and voluntary and non-voluntary organisations could join hands in promoting a 'climate of science'.

The Prime Minister called for coordination and the establishment of more effective linkages to ensure optimum utilisation of available resources. [as published]

Referring to the energy sector where different departments and ministries were involved, Mrs Gandhi said there was need for an effective coordinating mechanism where in aspects of energy conservation, generation and utilisation were attended to speedily and effectively.

On the information gap prevailing in several areas, Mrs Gandhi said this was because of the absence of integrated information regarding the on-going programmes in backward areas.

She suggested charting of a map in which accurate data on the existing facilities for science and technology and industrial units could be plotted.

Dr Swaminathan told newsmen that SAC had decided to develop the science and technology base of the universities. SAC was of the view that educational institutions should be provided with adequate funds for this purpose.

It was agreed that there was need for internal reorganisation of the educational institutions. The rules and regulations should be framed to absorb and effectively utilise the resources meant for them.

SAC suggested that to begin with, a provision of Rs 50 crores for more science and technology efforts in the university sector should be made.

To remedy regional imbalance in science and technology the SAC approved the establishment of a science and technology centre in Arunachal Pradesh as a 'test case'.

On a suggestion by Foreign Minister Narasimha Rao, who is a member of cost, it has been decided to set up a programme office for technical cooperation among developing countries (TCDC) with a programme director in the DST.

In the case of medical research the SAC decided to set up a department of medical research and education in the Ministry of Health with scientists, who would be secretary and Director-General of the Indian Council of Medical Research.

The meeting was attended by all except two scientists of the SAC and Finance Minister R Venkataraman, who is away.

Dr Swaminathan said the SAC will meet at least four times a year. The next meeting will be held in July.

HIDAYATULLAH SCORES INDIAN PLANNING PROCESS

Bombay THE TIMES OF INDIA in English 1 May 81 p 7

[Text]

NEW DELHI, April 30 (UNI) : Vice-President M. Hidayatullah today criticised planning in India as being based more on idealism than on needs.

Various plans formulated since independence had never been fully implemented, he said, while inaugurating a seminar on the sixth five-year plan and national objectives.

Referring to Jawaharlal Nehru's vision on planning as means for country's development, Mr. Hidayatullah said he had been greatly inspired by the Japanese example of industrialised economy. He said Nehru felt this would be the best example for India to follow in our bid to achieve industrialisation without realising the basic character and needs of the people.

The vice-president said that the Japanese have been one of the most industrious and hard working people in the world dedicated to the cause whereas an average Indian did not possess those qualities.

Mr. Hidayatullah said the need of the country today was food and, he thought, the earlier plans should have laid more emphasis on agriculture rather than industrialisation.

He said the Indian concept of planning was based on the Russian model and it had to be remembered that even in USSR, there had been no appreciable development after the first few plans. It was the success of the subsequent plans which had made them one of the most advanced industrialised nations in the world.

The vice-president throught that the Indian concept of planning had also suffered because of too much centralisation. This had resulted in a spoon-feeding to the states which preveted them from becoming self-reliant and conscious of their own development potential.

Delivering a keynote address the minister of state for industry, Dr. Charanjit Chanana, said planning as a process of development had not been greatly liked by the industry because they thought it was controlled. He said planning was necessary to translate a country's imagination into various schemes of development.

CPI-M POLITBURO ISSUES STATEMENT ON BIHARSHARIF

Calcutta THE STATESMAN in English 6 May 81 p 1

[Text] New Delhi, May 5.--The CPI(M) Politburo today expressed its grave concern over the tragic developments in Biharsharif and the neighbouring villages in Bihar.

In a statement in New Delhi, it said that as in several previous cases of atrocities against the weaker sections in the communal riots too, the local administration and the Congress (I)-led State Government in Bihar had completely failed in their elementary duty to protect the minorities.

The Politburo noted that the Biharsharif riots were a continuation of the Aligarh, Jamshedpur and Moradabad--all of them occurring in Congress (I)-ruled States. This underlined the total "unreality" of the ruling party's talk of national integration. It mentioned the atmosphere of communal tension created by those committed to such disruptive ideologies as "Hindu Rashtra", "Islamic fundamentalism", "Khalistan" etc. The forces representing these ideologies had been and continued to be busy setting one community against another and thus paved the way for the riots. The Ruling Congress (I) and its Central Government were using their control over the State-owned media like the All India Radio and doordarshan not to fight, but to encourage these ideologies, it alleged.

The Bharatiya Janata Party Parliamentary group at its meeting this morning expressed concern over the outbreak of communal violence in Biharsharif and called for the appointment of an inquiry commission.

AGRICULTURE MINISTER: NO PLANS FOR LEVY ON FARMERS

Calcutta THE STATESMAN in English 6 May 81 p 9

[Text] New Delhi, May 5.--The Government made two important denials in the Rajya Sabha today. First, it had no proposal to impose a levy on farmers, and, secondly, the Government had no plan to import wheat.

However, Rao Birendra Singh, Minister for Agriculture, told the House that he would "welcome" a levy on traders.

The Minister, who was replying to points raised by members during a discussion on the call-attention motion tabled by Mr Stapal Malik (Lok Dal) and others, denied that the farmers were not selling wheat to the Government agencies.

Rao Birendra Singh denied that the State Governments were imposing restrictions on the movement of foodgrain and said that Mr Satpal Malik's complaint about the sealing of borders in Haryana was not true as far as he knew. He agreed to the suggestion made by Mr K. C. Pant (Cong-U) that an inquiry should be made into the reported restrictions imposed by the Madhya Pradesh Government. As for the denial of wagons, his Ministry had been demanding wagons on a priority basis to supply foodgrain to deficit areas and the north-eastern region.

Most of the speakers had doubts whether farmers were coming forward to the Government agencies to sell wheat. Mr Malik, Mr Bhanu Pratap Singh, Mr Kalraj Mishra (BJP) were the main speakers to highlight this point. Mr H. K. Singh Surjeet (CPI-M) wondered whether the minimum support price was remunerative--a point also stressed by Mr Bhanu Pratap Singh.

Mr Kalraj Mishra alleged that in some districts in eastern U.P., officials were absent at procurement centres and were in league with the traders. But the Minister said that these were the deficit areas. Mr Mishra said that the Minister was "parrying" the question.

Earlier, the Minister said that some reports had appeared in the Press that certain political parties were asking the farmers not to take their produce to the mandis. However, the State Governments had not reported any such attitude on the part of the farmers.

According to information available yesterday 11.23 lakh tons of wheat had been produced as against 13.31 lakh tons on the same date in the last season. The

harvesting of the crop in Punjab and Haryana as well as in certain parts of western U.P. was delayed because of unseasonal rain. The peak season had not started and it was hoped that in the coming weeks more crops would arrive in the market and procurement would go up.

The Central Government had not asked the States to restrict the free movement of wheat. To maximise procurement, the Government of Madhya Pradesh had imposed "with our concurrence," a 50% levy on licensed dealers in the State except in the Chhattigarh region.

DEVELOPMENT OF KARNATAKA FARMERS' AGITATION TOLD

Calcutta THE STATESMAN in English 6 May 81 p 8

[Article by C. N. Vijaya]

[Text] The farmers' agitation in Karnataka has got enmeshed in a war of words between the Chief Minister, Mr R. Gundu Rao, and Opposition leaders and the president of the State Farmers' Association, Mr H. S. Rudrappa. The main demands of the farmers are remunerative prices for their produce and writing off of all agricultural loans. In the beginning the agitation did not hit any headlines because it was confined to a small section of farmers in one district. For four years farmers in the Malaprabha Command Development Area in Dharwar district in North Karnataka had made repeated representations to the Government about the arbitrary levy of betterment and water taxes by officials of the Irrigation Department and nonpayment of compensation to those farmers whose land had been acquired to build the Malaprabha irrigation project.

Finding that their representations had no effect on the Government, the farmers launched an agitation last May by offering "dharna" before irrigation and revenue offices in the area. The police watched and did nothing as the agitation was peaceful. This went on for more than two months. But the Government was unmoved. To draw the Government's situation to their demands, the farmers gave a call for Dharwar "bandh" on July 21. The violent incidents which occurred that day at Nargund and Navalgund, two interior towns in the district, and the police firings resulting in four deaths made it a "black Monday".

Lack of Tact

It was stated that the lack of tact on the part of the tehsildar of Nargund provided the spark to light the day's fiery incidents. He reportedly ignored the pleadings of farmers to close his office for the day. They requested him with folded hands, but the tehsilder trod on them to open his office. Whatever the provocation, the violence unleashed by the agitators was unprecedented. The tehsildar's office was ransacked, all files in the irrigation office at Navalgund were thrown into a bonfire, Government vehicles were damaged and three policemen were killed. After seeing the extent of the damage in the two towns, the Chief Minister reported to the legislature, both Houses of which were in session, that a situation like the one obtaining in Assam was sought to be created in the State. He alleged that it was pre-planned by anti-social elements and that in the name of farmers shops were looted and wives and children of officials threatened. "Such things are not done by agriculturists", he said.

The Nargund and Navalgund incidents snowballed. Soon a number of districts, most of them in North Karnataka, were affected by the farmers' agitation. Violence was widespread and the police fired at a dozen places killing over 40 people. No month in the past seven months was free from violence and police firings. Like the Government, the Opposition parties too started taking note of the farmers' demands only after the Nargund and Navalgund incidents. The police firings gave the parties, the Congress (U), the Janata, the CPI, the CPI(M) BJP and the Lok Dal, the opportunity they were waiting for to jump into the fray and try to take over the leadership of the agitation.

In an attempt to isolate the Opposition, the Chief Minister invited the farmers' leaders to Bangalore for talks on their demands. Mr Rudrappa, president of the Farmers' Association, put forward 19 demands and the Chief Minister accepted as many as 16 of them. He announced that acceptance of the demands would result in the farmers benefiting to the extent of Rs 86 crores. Thus an euphoric atmosphere were created [as published] which made the Farmers' Association suspend the agitation. But the euphoria did not last long. When break-up of the Rs 86-crore concession was made available, the farmers' leaders and Opposition parties found that the real benefit was small and that the main demands for better prices for farm produce and writing off all agricultural loans had been ignored. The Government improved on the support prices for grain announced by the Centre but this did not satisfy the farming community as its demand was for a much higher price. As for waiving agricultural loans, the Government pleaded its inability to do so since the Reserve Bank, the main source of credit, was opposed to that.

It took some time for the Opposition parties, particularly the Congress (U) and the two Communist parties, to reestablish their identity with the farming community. This they had to do carefully. They had to support the Farmers' Association, which was conducting the agitation by scrupulously avoiding identifying itself with any political party, and at the same time organize the farming community. With this end in view the Progressive Democratic Front, consisting of the Congress (U), the CPI, the CPI(M) and the Lok Dal, came into being. The BJP and the Janata Party were kept out.

The Front saw in the just ended Maharashtra "long march" of farmers a welcome opportunity to organize a similar march in the State. The Nargund-to-Bangalore march (460 kilometres) was organized to focus attention on the farmers' demands and press for a judicial inquiry into the police firings on agitating farmers. The response to the march in the beginning was moderate, but it picked up as the farmers' trek progressed. The reception on the way, particularly by villagers who came forward spontaneously to feed the marchers, and the publicity in the local Press helped. The march ended peacefully before the Vidhan Soudha (State Secretariat) in Bangalore and the Front leaders presented a memorandum to the Chief Minister detailing the farmers' demands. The Chief Minister refused to meet the marchers despite pleadings by Mr Aziz Sait, who was a colleague of Mr Rao in the Devaraj Urs Cabinet. But he did not lose the opportunity to score a political point against the Opposition, particularly the Congress (U) which had taken a leading part in the march, by dubbing the marchers as "hired men". The farmers felt hurt by the uncharitable remark and demonstrated before the Secretariat demanding an apology from the Chief Minister. Mr Rao refused and the police had to remove the demonstrators.

From then on the Chief Minister has made it a point to denounce the agitation and their leaders. Speaking at a function in Sagar, in Shimoga district, he dismissed the State Farmers' Association as a "spurious organization". Without referring either to Mr Rudrappa, president, or other office-bearers of the Association, he challenged them to contest the Assembly elections due in 1983. "Prepare yourselves from now for the elections. If you win I will accept you as leaders", he told them and added significantly, "I will see to it that none among you will be able to save the deposit."

Feeling of Hurt

Apparently the Chief Minister suffers from a feeling of hurt. He has said it repeatedly that his is the first Government in 25 years to invite farmers' representatives to the Secretariat, entertain them over talks and to issue orders accepting 16 of the 19 demands. His predecessors, he points out, never allowed farmers' representatives to climb the steps of the Vidhan Soudha. He sees a "force" behind the farmers' agitation but does not spell out what it is. Perhaps he feels the agitation is by "rich farmers" to derive benefits for themselves and small and marginal farmers and landless workers are not with them. The leaders of the agitation, he says, own 150 to 200 hectares each in the name of their daughters, sons-in-law and grand-children and pay hardly Rs 3 a day to farm labourers.

The Chief Minister's charge has been denied by Mr Rudrappa and Opposition leaders. The Farmers' Association chief has accused Mr Rao of having a "jaundiced mind" and challenged him to prove that the leaders of the agitation had extensive land holdings. He said: "Mr Rao is not an agriculturist, neither is he a decent politician. We have made representations to solve the farmers' problems, but we get bullets instead. So far 60 people have been killed in police firings. The State will not stand to gain anything by such a person". But the briefest, and significant, comment comes from Mr D. B. Chandre Gowda, president of the PCC(U) and leader of the Opposition in the Legislative Council: "I do not expect anything better from him (Mr Gundu Rao)".

WORK OF VIZAG STEEL PLANT TO BEGIN IN OCTOBER

Madras THE HINDU in English 1 May 81 p 9

[Text] New Delhi, April 30.

The construction work for the steel plant at Visakhapatnam will begin next October, the Steel and Mines Minister, Mr. Pranab Mukherjee, told the Parliamentary Consultative Committee for the Ministry on Wednesday.

The total area of land needed for the project is 10,800 hectares of which 6,400 hectares have already been acquired.

The current year's budget provides Rs. 130 crores for the steel plant. Earlier Rs. 71 crores had been spent on it.

An inter-ministerial committee had held negotiations with foreign firms in regard to the terms and conditions and cost of the plant.

The final decision about the plant will be taken shortly, after the recommendations of the inter-ministerial committee are received.

Meanwhile, a token provision of Rs. 1 crore has been made for preliminary expenses.

Metallurgical and Engineering Consultants Ltd (MECON) has submitted a report on alternative technologies and product mix for the proposed Vijayanagar steel plant.

The study was undertaken for assessing the suitability of iron-making, independent of the blast furnace route and of coking coal which has been proving a handicap in existing steel plants.

The detailed project report for the Vijayanagar plant, based on traditional technology, was being updated by MECON to incorporate techno-economic advances so as to optimise the economic viability and operational efficiency of the project.

BRIEFS

NEW VIETNAMESE AMBASSADOR--New Delhi, May 1 (PTI): The new ambassador of the socialist republic of Vietnam, Mr. Nguyen Quang Tao presented his credentials to the President, Mr. N. Sanjiva Reddy, at Rashtrapathi Bhavan here today. [Text] [Bombay THE TIMES OF INDIA in English 2 May 81 p 9]

ASSAM OIL PROSPECTS--Shillong, May 1: Studies conducted by Oil India experts so far indicate sizable oil reserves in the Bogapani area, near Duliajan in upper Assam. According to Oil India sources, there is a possibility of a new oilfield being developed in the area. A detailed seismic survey has been taken up. Oil India is reported to have modified its drilling programme, taking into account the intensified exploration work in the area. [Text] [Bombay THE TIMES OF INDIA in English 2 May 81 p 7]

CONGRESS-I MAYORAL WIN--Jabalpur, May 1 (PTI): The Congress (I) retained the mayoral post of the Jabalpur municipal corporation. Mr. Shivnath Sahu defeated his nearest rival, Mr. Jitendra Sharma (BJP), by a margin of 36 votes in the election to the 66-member body. Mrs. Annapurna Tiwari (Cong.-I) was elected deputy mayor, securing 49 votes, against her BJP rival, Mr. Raghunath Yadav, who got 16. [Text] [Bombay THE TIMES OF INDIA in English 2 May 81 p 7]

CABINET SECRETARY--New Delhi, May 1: Mr. Krishnaswamy Raosaheb, former principal secretary to the Prime Minister, has taken over today as cabinet secretary. Mr. P. C. Alexander takes over tomorrow as principal secretary to the Prime Minister. The cabinet has placed on record its appreciation of the services rendered by the outgoing cabinet secretary, Mr. S. S. Grewal. [Text] [Bombay THE TIMES OF INDIA in English 2 May 81 p 12]

BOMBAY SUBAREA CHIEF--April 30: Brig. N. C. Mehra today took over as Bombay sub-area commander from Brig. S. Krishnamurthy, who has been appointed provost marshal at army headquarters. Passing out from the Indian Military Academy, Brig. Mehra was commissioned in the Gurkha Rifles in 1952 and served later with the UN peace-keeping force in the Congo. He was for some time the chief instructor at the Counter-Insurgency and Jungle Warfare School. He was promoted brigadier in 1975. [Text] [Bombay THE TIMES OF INDIA in English 1 May 81 p 4]

PROJECT IN INDONESIA--New Delhi, April 30 (UNI): The Projects and Equipment Corporation of India Limited (PEC) today signed an associateship agreement with Walchandnagar Industries Limited for setting up of a Rs. 100 crore cement plant at Padang in Indonesia on turn-key basis. The 2,000-tonne-per-day cement plant would be completed within a period of three years. The contract was signed in Jakarta by Mr. Anand Krishna, executive director, on behalf of PEC and Mr. Joni Marsinih, president-director on behalf of P. T. Semen Padang of Indonesia. Mr. Krishna told newsmen that the present contract was the largest industrial turn-key project ever signed by India for execution abroad. [Text] [Bombay THE TIMES OF INDIA in English 1 May 81 p 7]

BONN INVESTMENT GROWS--April 30: After years of stagnation, German investment increased substantially during the year 1980. Latest statistics from Germany reveal that German investment in India increased from Rs. 714.8 million to Rs. 767.6 million in 1980. This increase is due mainly to the formation of new Indo-German joint ventures. However, as compared to the main competitors for German investment in Asia, India continues to receive only a small portion of new German investments abroad. As compared to to previous year, [as published] German investment in Singapore increased from DM 225.9 million to DM 367.6 million in 1980. German investment in Hong Kong went up from DM 152.8 million to DM 216.2 million, in Japan from DM 385.1 million to DM 416.1 million and in Saudi Arabia from DM 89.2 million to DM 117.8 million. India's investment in Germany amounts to DM 22.7 million as per 31st December 1980. [Text] [Bombay THE TIMES OF INDIA in English 1 May 81 p 14]

NEWS COVERAGE OF GARUDA DC-9 HIJACKING

Hijacked After Leaving Palembang

Jakarta SINAR HARAPAN in Indonesian 30 Mar 81 pp 1, 12

[Text] Penang, 29 March--Mrs Hulda Panjaitan, nee Tobing, who is 76 years old, was the only passenger freed by the hijackers of the Garuda DC-9 aircraft when it made a stop in Penang on Saturday afternoon [28 March]. She prayed continuously from the time of the hijacking until she descended from the aircraft.

The story of the trip of this grandmother begins in Ampenan (Lombok). She had gone ther to see her son. Last Thursday [26 March] Mrs Panjaitan was taken by her son to Denpasar. She spent a night in Jakarta, and it was only on Saturday morning [28 March] that she took the Garuda DC-9 flight to Medan, which stopped off at Palembang. In Palembang Mrs Panjaitan did not descend from the aircraft, as did all the other passengers.

The aircraft took off again for Medan. Shortly after it was in the air, and after the warning lights had been turned off and the stewardesses began to serve refreshments, a commotion was heard in the rear of the aircraft. Mrs Panjaitan said, "I didn't know what was going on in the back there. It was as if some people were involved in a fight. Suddenly, two men came from the back of the aircraft, going forward. They said, 'All right, hands up, everybody! Go to the back of the aricraft!'"

As Mrs Panjaitan remembers it, everyone was led to the back of the aircraft to occupy the seats there, leaving the front section empty. She couldn't recall when the hijackers appeared, one by one. As she saw it, there were four men actively moving about and giving orders. One of them had white skin or rather white skin, a mustache, and reddish hair. He spoke in a language which, according to Mrs Panjaitan, was English.

Later, the passengers were ordered to put their watches, rings, necklaces, bracelets, other jewelry, money, and identification cards on a table. A stewardess, watched by a hijacker, put all of these items into a plastic bag. When the aircraft landed, Mrs Panjaitan did not know where they were. All of the passengers were ordered to remain quietly in their seats and were not allowed to talk. Mrs Panjaitan was crying and her legs hurt her because she had been sitting for too long a time in conditions of tension. She told SINAR HARAPAN that, suddenly, a hijacker came to her and said, "Come on, lady, you're getting out. You're on in years. Just go."

When she had gotten down from the aircraft and was walking toward a motorcycle, Mrs Panjaitan looked around her and saw banana trees and some old buildings. This did not look like an airport to her. "I thought that here I was going to be shot to death. But why just me," she said, repeating the feeling she had at the time. However, her escort, Police Inspector Nasir, calmed her and told her not to be afraid because he was a Malaysian police officer.

The control tower at Bayan Lepas (Penang) knew of the hijacking incident when the Garuda aircraft was 140 miles (224 km) away or about 50 minutes after takeoff. The aircraft did not ask permission to land. At 1148 hours it stated that it would land. All aircraft in the air were instructed by the tower to keep away from Bayan Lepas, and the hijacked Garuda aircraft was requested to park in an isolated area at the north side of the landing strip, near the factories in the free trade zone. Minister of Home Affairs Tan Sri Ghazali Syafie, who also has the Malaysian police force under him, was informed. An operations center was established in the tower, under the chief of police of Penang, Haji Zaman Khan. For communications with the aircraft the hijackers were only willing to deal with the head of the Garuda office, Supangat Yuzar, through the captain of the aircraft, Herman Rante.

The first request of thehijackers was that they be sent a map of the world with international air routes on it. They also asked for additional fuel. Later, they asked for packages of cooked rice for 60 people. There was heard from the tower the voice of a hijacker who said to the Garuda captain, "No delay is permitted."

The hijackers asked that the map of the world be brought to the aircraft by a 15 year old child, traveling on foot. The tower rejected this because the aircraft was too far away. Finally, it was agreed that the map be brought by a man wearing only shorts and who could ride on a motorcycle, but this would have to be parked about 50 meters from the aircraft.

At 1355 the hijackers agreed to release an old woman and asked that she be met by a young woman wearing shorts and a short-sleeved shirt. The tower replied that it would be difficult to find such a young woman who would be willing to approach the aircraft. Finally, it was agreed that the man bringing the map, Police Inspector Nasir, would return to accompany the old woman, named Hulda Panjaitan, nee Tobing, who was 76 years old.

The hijackers of the Garuda DC-9 appeared to be very careful about everything. A tank truck with fuel which came to the aricraft at 1445 had to go around the aircraft twice. The purpose of this was apparently to let the hijackers see if there were police hiding behind the tank truck and waiting to attack them, as once happened in another place. The total amount of fuel loaded into the aircraft was reported to be about 10,000 liters. With its tanks full the DC-9 aircraft could fly for 4 hours and one-half hours, but usually, because of the security factor, it was only flown a maximum of 3 and a half hours.

The request of Garuda representative Supangat that a Garuda crew more experienced on international routes be permitted to go aboard the aircraft was rejected by the hijackers. In fact, in Penang there was such a Garuda crew led by Captain Sayogo which on the following day, according to the plan, was to fly to Medan. Captain Herman Rante was reported to be not yet qualified for flying international air routes.

At about 1500, when a small aircraft with the party of Minister Tan Sri Ghazali was about to land, the hijackers rejected the landing, perhaps because they thought that the aircraft was bringing assault troops. The entire international airport at Bayan Lepas was closed from 1200 to 1800, with the result that hundreds of passengers were filling the restaurant and waiting rooms.

The hijackers were beginning to lose patience in waiting for food in the form of packages of cooked rice. They must have been convinced that it was not easy to find a catering firm in a short time. Finally, at about 1545 two police officers wearing only shorts and singlet approached the hijacked aircraft, bringing packages of rice and a side dish of chicken, together with a large thermos bottle filled with tea.

At 1607 the Garuda DC-9 took off from Penang, but the operations center in the tower continued to follow it until a report was received that the aircraft had landed in Bangkok. It is reported that Minister Tan Sri Ghazali instructed all airports in Malaysia not to permit the Garuda aircraft to land if it returned from Bangkok.

Passenger List

Jakarta SINAR HARAPAN in Indonesian 30 Mar 81 p 1

[Text] The list of passengers who boarded the hijacked Garuda aircraft in Jakarta on Saturday morning [28 March] is as follows: 1) Badi Suwandi, 2) Ali Umar Biem, 3) Darma Wijaya, 4) Anwar, 5) Asmar Pohan, 6) Higa, 7) Heischaan, 8) Eddy Mulyono, 9) Irawan, 10) Kusdiarso, 11) Lukman, 12) Panjaitan, 13) Manurung, 14) Nurhadidjah, 15) Schneider, 16) Siesem, 17) Zuraida, 18) Sembiring, 19) Silitonga, 20) Siregar, 21) Wainwright, 22) Trimurniabid, 23) Mursidin, 24) Humt, 25) Adi Karang, 26) Junaedi, 27) Roy Sekewagl, 28) Abidin, 29) Abidin Usman, 30) Musril Hanafiah, 31) Tijipto Harsono, 32) Kai Siu Yan, 33) Sianturi, 34) Pasaribu.

The passengers who boarded the aircraft in Palembang, according to data obtained by SINAR HARAPAN on Sunday [29 March] were as follows: 1) Wendy, 2) Sofyan, 3) Maluizal, 4) Susanto, 5) A Aulaitupa, 6) Mulyono, 7) Zulfikar, 8) Marsi, 9) Budianto S, 10) Prapat, 11) David Manos Wendy, 12) Budi Nararja, 13) Wahono, 14) Mahyuddin.

Two Passengers Escape

Jakarta SINAR HARAPAN in Indonesian 30 Mar 81 pp 1, 12

[Excerpts] Don Muang Airport, Bangkok, 29 March—The eyewitness report of SINAR HARAPAN journalist Panda Nababan from Don Muang international airport in Bangkok states that the Garuda DC-9 aircraft "Woyla," which was hijacked Saturday morning [28 March] at 1730 [Sic; probably should read 0730] local time (same as Jakarta), arrived this afternoon [28 March] at this airport [Don Muang International Airport, Bangkok].

The first Indonesian journalist on the scene, who arrived Saturday evening at Don Muang International Airport in Bangkok, reports that the hijacked Garuda aircraft is parked at the southern end of the landing street, about two kilometers from the passenger terminal. Its position is just to the right of the Thai Air Force VIP building.

The position of the Garuda aircraft does not interfere with the flow of civilian as well as military ari traffic. Since the aircraft landed from Penang, Malaysia, after having been hijacked, Thai Air Force police and special troops of the Thai Army have been continuously watching it, from a distance of 300 meters. The hijackers do not allow anyone to approach it.

On Saturday night [28 March] all lights in the aircraft were turned off, and that night there was no request for food. It is believed that the ransom received from Penang, Malaysia, is still available. [Sic; the word "ransom" here may refer to food provided at Penang airport to the hijacked aircraft.]

The SINAR HARAPAN reporter states that at the time the aircraft landed in Bangkok the hijackers asked to establish contact with an Indonesian official. All communications are carried on in Indonesian. When the Garuda aircraft landed, precisely at 1600, the Indonesian ambassador to Thailand, Hasnan Habib, was already at Don Muang airport. The Indonesian Embassy in Bangkok, since 1100 had been monitoring the hijacking, including developments in Penang.

The Thai chief of police, the chief of staff of the Thai Air Force, the minister of communications, the chief of Thai intelligence, and a number of other military officers, were gathered together at Don Muang airport. Indonesian officials and Thai officials set up a command post in the KLM office (the Dutch-owned airline) on the second floor of the Don Muang terminal.

At 0618 on Sunday morning [29 March] the hijackers asked for food to be supplied at 0720, in accordance with their directions. The food and the person bringing it were to be in position 30 meters in front of the aircraft, and the hijackers could easily watch him from the cockpit. A Garuda employee from the Bangkok office, Subhaard (a Thai citizen), volunteered for the task. As soon as he arrived before the aircraft, he set the food down on the ground. Subhaard's upper clothing had to be open, and he was prohibited from carrying anything in his pockets, in accordance with the hijackers' instructions.

A British passenger named Robert Wainright (27 years old) is the manager of PT Micchem, which operates in Indonesia. Wainright jumped out of an emergency window on the right hand side of the aircraft. The window was very easy to open. By pulling the level inward and making no loud noise, he was able to escape when all of the hijackers were in the cockpit. This lack of attention was used for his excape. After he succeeded in getting out of the fuselage, he jumped onto the wing of the aircraft and them jumped 1.5 meters to the ground. He immediately ran to the after section of the aircraft to hide under it and then ran quickly to the edge of the airstrip. He was immediately seized [sic] by Thai air force military police.

The command post in the KLM office on the second floor of Don Muang airport was moved to the fourth floor in the operations office and called the "crisis center." The Indonesian officials who were directly handling the "crisis center" were the chief of BAKIN, Yoga Sugomo; the assistant for intelligence in the Ministry of Defense and Security, Lt Gen Benny Murdani; Director General of Air Communications Sugiri; and Ambassador Hasnan Habib.

Wainright, who succeeded in getting free, was immediately taken to the command post and interviewed by an Indonesian official and by high-ranking Thai officials. Also attending the interview were Thai Foreign Minister Siddhi Savetsila, Minister of Communications Amorn Sirigaya, and Deputy Prime Minister Prachuap. Wainright said that the total number of hijackers was five and that they were between 20 and 40 years old. As he had observed, the hijackers had an FN pistol and carried three hand grenades and a knife. Wainright's statement contradicted a previous report which said that there were six hijackers. The hijackers were led by a man who had a small beard.

The treatment of the passengers by the hijackers was very crude. Wainright said that the hijackers also beat up an American passenger after he tried to go to the toilet. According to Wainright, there were still two Americans, two Japanese, and one Dutchman in the aircraft.

At 1600 on Sunday [29 March] the hijackers asked for additional fuel and oil. At the time the tanks were to be filled the temperature inside the aircraft was already very high, and the service door, on the right hand side forward but just aft of the pilot's seat, usually used to load catering supplies. [Sic; sentence is incomplete; presumably, the service door was open].

An Indonesian technician with Garuda, Supangat, at the request of the hijackers, was invited to supervise the filling of the tanks with fuel. "Supangat clearly saw the co-pilot of the DC-9, Juwantoro, standing in the door, with a hijacker behind him, pointing a pistol. Supangat and four Thai technicians had only been working on the refueling for a few minutes when suddenly an American passenger, Karl Schneider, burst through the service door and tried to jump out. When he started to jump, a hijacker fired his pistol, and Schneider was hit in both shoulders. Panic broke out. Supangat and the other Thai technicians immediately ran from the aircraft to the edge of the landing strip, where they lay flat. It was only 20 minutes later that a military ambulance came on to the landing strip and approached the aircraft. Schneider was picked up and was immediately given first aid at the Thai Air Force emergency hospital.

Assault on Plane

Jakarta SINAR HARAPAN in Indonesian 31 Mar 81 pp 1, 12

[Excerpts] Don Muang Airport, 31 March--A tense drama carried out also for humanitarian reasons saved 40 passengers and five crew members of the Garuda DC-9 which was hijacked by six terrorists. The action took place at Don Muang airport in Bangkok, early Tuesday morning [31 March] at 0245, in the most amazing fashion, according to a report of SINAR HARAPAN correspondents Panda Nababan and Suryohadi, who reported from the scene of the events on Tuesday morning.

The tense moments began about 2145 on Monday evening [31 March] at the "crisis center" at Don Muang airport, after brief and heart-stopping discussions with the hijackers. Meanwhile, there were already available to the "crisis center" 35 special anti-terrorists troops led by Lt Col Sintong Pandjaitan. The special anti-terrorist troops remained aboard the Garuda DC-10 which had brought them from Jakarta to Don Muang airport on Sunday [29 March].

At 2145 on Monday evening [30 March] the assistant for intelligence at the Ministry of Defense and Security, Lt Gen Benny Murdani, who directly led the operation to save the passengers and crew, left the "crisis center" at the Don Muang passenger terminal to supervise the rescue operation. Since 1900 all of the special anti-terrorist troops had been in position about 400 meters behind the plane, where it was dark and protected from view from the plane.

The 35 brave ABRI troopers had been in place and ready to attack, the time depending on the threat and the moment for the assault to be launched, whose timing was only known to the chief of BAKIN, Gen Yoga Sugama, and HANKAM assistant for intelligence, Lt Gen Benny Murdani.

As had been the case with the previous nights, for about 100 meters around the hijacked Garuda DC-9, the ground was brightly lit by Royal Thai Air Force lights. It seems that the experience of the hijackers on Sunday and Monday night, when their requests were never rejected, such as requests for food, fuel, and cleaning of the aircraft, etc., had made the terrorists feel secure and in a strong position. This circumstance made them careless and left them feeling "on top of things." It was this situation which was used by the ABRI troops to launch the rescue operation effectively and quickly.

The SINAR HARAPAN reporter who directly followed the rescue operation from up close saw body shapes emerge from the dark from a direction in a straight line with the tail of the aircraft. About 15 anti-terrorist troops, wearing camouflage uniforms and without berets, formed into a single line. They were followed by a second file of about 20 soldiers wearing dark clothing.

The first group was clearly seen to be moving in a slow, orderly fashion but with steady strides that convinced an observer that without any doubt they would move on to their objective, while carrying three ladders! One ladder was placed at the tail door of the aircraft, while the other two were respectively placed on the right and left wings. Things were tense, as they are on a stage. When the order to attack came, the 35 special anti-terrorist soldiers went into action in lightning fashion. The placing of the three ladders only took 7 minutes.

From the time the doors of the aircraft were successfully opened in the lightning operation at 0242, it took 3 minutes for the whole rescue operation and the freeing of the hostages to be completed. The operation went on in a fantastic and orderly way, in accordance with the scenario for the operation as it was planned.

At the same time as the five doors of the aircraft were successfully opened there was immediately heard a volley of shots which broke the silence of the night and only lasted for a few seconds. Between the noise of the individual shots it could be seen that the forward door of the aircraft was open, and at the same time, before the ladder fell, a body was thrown out of the door which, from its clothings, must have been that of one of the terrorists.

Although the shooting had stopped, the troops were increasingly active. Members of the sepcial anti-terrorist squad were clearly seen climbing the ladder, with the passengers descending by the forward ladder. Although in fact the situation was fully in the control of the attacking troops, the passengers, who had spent almost 65 hours in a state of tension and threats of death, were still hurrying down the ladder.

Immediately after the rescue operation was completed, it was officially made public that the hijacking drama had ended. It had taken about 65 hours and cost the lives of three terrorists who were shot and one passenger (a child 4 years of age). In addition, the pilot, Captain Herman Rante, and a member of the special squad were wounded.

However, a short time afterward the announcement was corrected. The child, Abidin, had not died, and had not even been wounded, although his whole head was covered with blood. A terrorist who had been wonded later died at the scene of the action.

Before the rescue operation began, communications between the negotiator, the chief of BAKIN, Yoga Sugama, as representative of the Indonesian government at the "crisis center," with the hijackers, which had gone on Monday evening, ended at 0115. After the hijacker received the list of the names of the 84 people they demanded, the hijackers then asked that a man named Salman be added to the list of 84. A person representing the hijackers said, "And ask Salman whether there are more names which Salman wants to add to be flown abroad."

The hijacker also demanded that the next contact take place at 0630 on Tuesday morning [31 March]. In the final contact the hijacker no longer mentioned the sending of $1.5 million. Perhaps this was because the hijackers were busy examining the total number and the names of the people whom they wanted to be flown abroad. "It will be tomorrow morning at 0630 [31 March] before we decide when the 84 people and additional persons will be flown out," said a hijacker over the radio. After that, radio communications were broken off.

Troops Practiced Assault

Jakarta SINAR HARAPAN in Indonesian 31 Mar 81 pp 1, 12

[Excerpts] Immediately after Minister of Defense and Security Gen M Jusuf received a report on the success of the operation to rescue Garuda passengers, which was carried out by ABRI soldiers commanded by Lt Col Sintong Panjaitan, this important matter was immediately made known to all those attending the ABRI 1981 exercise in the VIP room at Pattimura airfield in Ambon.

From available information it appears that the commander of the assault troops planned that the attack would take 8 and one-half minutes, but it turned out that the entire operation was successfully completed in only 3 minutes.

The first comment from the minister of defense and security on the success of the special anti-terrorist troops was: "It is clear that our boys were able to handle this very dangerous matter in a relatively short time, 3 minutes. This is an achievement which is very impressive, compared with the same kind of rescue efforts against terrorists in other countries."

The "raid" against the hijackers early on Tuesday morning [31 March] was carried out by 32 members of the special anti-terrorist squad, led by a middle grade officer. Among the 32 soldiers was a doctor. The attack only took about 3 minutes.

The soldiers had gone through special training for raids of this kind and for anti-terrorism operations. Before they departed for Bangkok on Sunday [29 March] in a Garuda DC-10, they had again gone through intensive exercises on attacking an aircraft, lasting several hours.

Troops Return

Jakarta SINAR HARAPAN in Indonesian 31 Mar 81 pp 1, 12

[Excerpts] At 0802 Jakarta time Tuesday morning [31 March] the commando troops which brilliantly completed the rescue operation of the Garuda aircraft and its passengers who were held as hostages at Don Muang airport in Bangkok, safely arrived at Halim Perdana Kusuma Air Base.

Lines of ABRI military police were on guard to see that reporters, who were filling Halim Perdana Kusuma Air Base, did not go out on the airstrip. In addition, the commando troops were "quarantined" and not permitted to speak to reporters.

Lt Col Pieter Sitompul, an officer who followed the planning and execution of the operation at Don Muang airport, told SINAR HARAPAN that preparations for the operation were undertaken immediately after the hijacking took place. "Therefore, it was not too long afterward," he said, in explanation.

He said that the operation carried out by the commando troops, although a short one, was prepared in a careful way. "We can learn from the book, and other people can learn the tasks involved in operations to wipe outhijacking," he said. Lt Col Sitompul was not prepared to state whether the rescue operation to free the passengers of the hijacked Garuda aircraft was inspired by the Israeli troops at Entebbe a few years ago.

Lt Col Sintong Panjaitan, the officer who led the troops in the attack on the aircraft at Don Muang airport, was not prepared to duscuss in detail the successful operation. "Yeah, things went off normally," he said by way of comment, when asked by SINAR HARAPAN for his impressions when he was leading his troops.

Identity of Hijackers

Jakarta TEMPO in Indonesian 4 Apr 81 pp 17, 18

[Text] Who carried out the hijacking? Until Monday night [30 March] there had been no official statement. The first official statement was given by the assistant for intelligence at the Ministry of Defense and Security, Lt Gen Benny Moerdani, Saturday afternoon [28 March] in Ambon. It merely said that the hijackers were five unknown persons who knew each other, all of whom spoke Indonesian.

However, it appears that our security apparatus moved quickly. On Saturday [28 March] the Hotel Lusyana, located at the corner of the intersection of Jalan Letkol Iskandar and Jalan Sudirman, in Palembang, was visited by a security officer. Three employees of the hotel were interrogated. The owner of the hotel, Husein bin Asari, was also interrogated. Room 14 at the hotel was later sealed by the authorities.

The former occupants of room number 14, which cost Rp 4,000 per night, were strongly believed to be the hijackers of the Garuda aircraft, "Woyla." The four friends there were joined by a person who previously had been in Palembang, registered as coming from and staying at the same hotel on 26 March. A railway ticket stub was found in their room, and it was deduced that they had come to Palembang by land. "A few words were also found on the wall of the room, including writing which expressed the view: kill or be killed," said an official.

The friends left the Hotel Lusyana on 28 March at 0600. It is believed that loose security supervision at Talangbetutu airport in Palembang made it possible for the five hijackers to board the aircraft carrying firearms and a sharp weapon.

It is a matter of record that there were 14 passengers from Palembang who on 28 March boarded the Garuda DC-9 aircraft with the registration number GA 206. Six of them who are believed to be the hijackers are listed under the following names: Wemby, Sofyan, Machrizal, Zulfikar, Masri, and Machyuddin. It is Machrizal, a young man who is believed to have come from Saudi Arabia, who is the leader of the group. Meanwhile, Zulfikar, according to an informed source, once worked as a security officer at the Hotel Hilton in Jakarta.

Not only in Palembang were the security officials effective in their investigations. In Jakarta on Saturday evening [28 March] security officers searched a house on Jalan Bogor Lama, in the Pasar Manggis district, located in the Pasar Rumput area. It is reported that they detained two young men.

At various other places security sweeps were also undertaken. For example, at Duripolo district, West Jakarta, beginning on Sunday [29 March]. "They are looking for Ali Yusuf. I don't know why," said Mansyur, Ali's eldest brother. According to Mansyur, his younger brother had left home several months ago. In his own family Ali, 28 years old, is known as a stubborn young man who has often been in conflict with his family, particularly regarding religious questions. "I have heard that Ali was associated with a man named Imran," said Mansyur.

Who is Imran? Is it true that his followers are involved in the hijacking of the Garuda aircraft? Imran bin Muhammad Zein, known to his followers as "Imam," began to be known widely after theIstiqamah Mosque affair in 1980. The so-called "Istiqamah Affair" occurred on 4 August 1980. On that day at Istiqamah Mosque, which is the favorite mosque for the young people of Bandung, there was a fight. The program for that day of "training of religious officials" changed into ridicule of the senior religious officials [ulama] and the government. Fearing that a fight would develop, a security officer present at the mosque reported to the Military District Command at Cibeunying.

An Army garrison detachment from Cimahi in Bandung and the local police immediately came to the scene. As a result, 44 young men were picked up and held overnight. A few people who said they belonged to the Istiqamah youth group later came to the home of H M Rusyad Nurdin, chairman of the Istiqamah Mosque Foundation. They denounced the detention of their comrades as unjust.

It turned out that they also went to the home of the chariman of the Council of Ulama of the city of Bandung, Yunus Nataatmaja, and the home of the chairman of the West Java Council of Ulama, K H E Z Mutaqqien. They also went to the home of Mohammad Natsir in Jakarta with the same demand: free their comrades.

At Istiqamah Mosque they were only a few in number--about 25 to 30 people--but they were in control of the office of the Istiqamah Mosque youth organization. For that reason the mosque council dissolved the organization. The total number of "members of this doctrinal group" was estimated at 500, with about 150 of them from Bandung and Cimahi.

Those who entered their group had to show a firm intent and change or add to their names the name of one of the adherents of the prophet Mohammad. The expression of this firm intent was made to Imran, who was regarded as their Imam.

The West Java Council of ULama a few months ago had reported the activity of a group which it regarded as "rather strange." It made this report to the government and added to it six cassette recordings of speeches of Imran. They were also forbidden to carry out their activities at Istiqamah Mosque.

However, it turned out that their activity did not stop. About two months later the group was reported involved in a stabbing attack on Dr Syamsuddin, one of the directors of the mosque. As a result 11 members of the group were arrested by the West Java Special Branch office. The group was also stated to be involved in the attack on Cicendo police post in Bandung, in which three policemen were killed. It is reported that the group had destroyed a house of prostitution in Bandung.

A high ranking official confirmed that it is the Imran group which hijacked the Garuda DC-9 aircraft "Woyla" last week. "Their purpose is to escape abroad, together with their friends," he said. It was because of that consideration that they demanded the freeing of a number of prisoners, some of whom were their friends. This group, the same source said, had chosen the path of radical and revolutionary force.

Can this group be called extremist? In an interview with TEMPO last year, after the "Istiqamah Affair," Imran did not reject this view. "If they say we are extremists, let them," he said. "Because we are still weak, we are regarded as troublemakers and extremists. But if we are strong, big, numerous and disciplined, will there be anyone who will dare to say that we are extremists?

"What is clear is that we are firm in our views and don't want to fool around. For example, if the prophet Mohammad said that alcoholic drinks or pork are prohibited, even though we would be shot, we would say that these are prohibited," he said.

Imran bin Muhammad Zein, 31 years old, was born in Bukittinggi as the eldest of 10 brothers and sisters. Open in manner, with light brown skin, he is a young man who is engaged in the watch business and speaks calmly and clearly. He admits that between 1971 and 1976 he was in Saudi Arabia, studying religion with religious teachers there. "I didn't study in a systematic way, like in a university. For me the important thing was the matter of religion itself, and not the way to learn it," he said.

Imran stated that he only believed in the Koran and the Muslim traditions [Hadith]. "I want religion to be in its original form. I do not like to see religion politicized. Whatever the form of the state, the Islamic religion should control

it," he said. "Because of that I have not been in agreement with the old-style leadership. For if the old-style leaders were sincere in carrying out the teachings of our religion, it would be impossible for us to be faced with a situation like the present one."

He referred to his relations with the youth group at the Istiqamah mosque as a normal matter. Since 1978 he had been in touch with them as an ordinary preacher. Was it true that in that group there was a kind of devotion to the leadership? He answered, "I think this way. We joined together, having the same beliefs. Then we took an oath that we would truly remain within the Islamic faith, even if we should have to sacrifice ourselves: for Islam." He also admitted that he felt a bit strange to be called a "government man" and was startled to have his name mentioned as the leader of the Istiqamah youth group.

A conviction of Imran's is that, "humanity will return to its religious practices." "If a man is a Muslim, he will return as a Muslim. If he is put under pressure and provoked, a time will come when he will defend himself. And in the course of this self-defense, the consequences can be.... We all know," he said with a voice full of spirit, last August. And now, eight months later, is it true that we all know?

Imran Bin Muhammad Zein

GENERALS COMMENT ON NORMALIZING RELATIONS WITH PRC

Not in 1981

Jakarta KOMPAS in Indonesian 11 Mar 81 p 1

[Excerpts] Indonesia is not thinking of normalizing its diplomatic relations with the PRC in 1981. Indonesia is in no hurry to do this, but it is important that all matters involving these relations be noted and itemized so that political and other fields are well protected when relations are normalized.

M. Panggabean, minister coordinator for political security and foreign minister ad interim, gave this response to newsmen's queries after he had been received by President Suharto at the Istana Merdeka on Tuesday [10 March].

The minister coordinator said it is important to study past experience and the experience of other nations in normalizing relations with the PRC, "since the PRC has said it would cooperate with a neighboring country but not with its Communist Party."

He admitted that a certain group feels that business perhaps would be promoted if relations were normalized with the PRC. However, we cannot view this matter from one aspect solely but must view it from all aspects. "Therefore, the government is obliged to investigate all aspects, say the G-30-S/PKI [30 September Movement/Indonesian Communist Party] remnants, the status of foreign-born citizens, and other matters," the minister said.

Sooner or Later

Jakarta SINAR HARAPAN in Indonesian 4 Mar 81 pp 1, 12

[Text] Gen TNI [Indonesian National Army] M. Yusuf, minister of defense and security concurrently Armed Forces commander, told Japan's Foreign Minister Masayoshi Ito that Japan could obtain more assistance in settling the Kampuchea problem by offering more aid to ASEAN [Association of Asian Nations] countries than it does to Vietnam.

In a 30-minute meeting at the Seoul Hotel, South Korea, on Tuesday [3 March] the two ministers discussed the situation in Asia, particularly the Kampuchea problem and Indonesia's relations with the PRC, according to Japanese officials as reported by the Kyodo news service.

The officials said Foreign Minister Ito further clarified Japan's support for holding an international conference to discuss the Kampuchea problem.

Gen Jusuf told Ito that ASEAN nations held high expectations for the Japanese role in carrying out the UN resolution.

According to the Japanese officials, Gen Jusuf told Ito that one way to settle the Kampuchean problem was for Japan to furnish more aid to ASEAN countries than it did to Vietnam.

The Japanese foreign minister asked Gen Jusuf about the possibility of restoring relations with the PRC and said relations between the PRC and ASEAN member nations were needed for peace and stability in the region.

Minister Jusuf replied, "This matter will be settled sooner or later," but added no further information, the Japanese officials said.

The two ministers are in Seoul to attend the inauguration of South Korea's president Chon Tu-hwan.

BIOGRAPHIC INFORMATION ON INDONESIAN PERSONALITIES

[Unless otherwise noted, the following information on Indonesian personalities has been extracted from Indonesian language sources published in Jakarta.]

COL SARWONO--On Thursday [12 March] Col Sarwono (Corps of Engineers) was installed in office as the new chief of staff of Military Region VII/Diponegoro, replacing the former incumbent, Brig Gen Sawarno. The change of office ceremony took place in Semarang at the Sasana Judha offices of Military Region VII/Diponegoro, in the presence of Maj Gen Ismail, commander of Military Region VII. [Excerpts] [Jakarta HARIAN UMUM AB in Indonesian 16 Mar 81 p 2]

AMBASSADOR A KOHIR SASTRADIPURA--The Italian government has given its agreement to the appointment of A Kohir Sastradipura as Indonesian ambassador to Italy, replacing R Sri Soebiyakto. Ambassador Kohir was born in Ciamis on 2 May 1929 and obtained his senior high school certificate at the Foreign Service Academy. He obtained an M A degree from Columbia University in the United States and attended the first Senior Foreign Affairs course. He entered the Ministry of Foreign Affairs in 1955. In 1970 he was appointed counsellor at the Indonesian Permanent Delegation to the UN in New York. In 1971 he was transferred to the Indonesian Embassy in Tokyo and in 1972 he was appointed minister counsellor at that post. In 1976 he became Indonesian Minister in Tokyo. In 1977 he returned to the Ministry of Foreign Affairs as an inspector for the general program and for the Development Project in the Inspectorate General of the ministry. Later in 1977 he became chief of the Bureau of Personnel Affairs in the ministry and finally, before being appointed ambassador to Italy, he was deputy chief of mission at the Indonesian Embassy in London. COL E KUSNANDAR--The post of deputy commanding general of the Navy Training Command was recently transferred from Commodore Dick Isnyoto to his replacement, Col (T) E Kusnandar, at a military ceremony attended by commanders of the Training Center and military and civilian employees of the Navy Training Command. Commodore Dick Isnyoto had served as deputy commanding general of the Navy Training Command for one year and will be assigned to new duties at Navy Headquarters in Jakarta. Col (T) E Kusnandar previously was deputy assistant to the chief of staff of the Navy for planning and budget. [Excerpt] [Jakarta HARIAN UMUM AB in Indonesian 21 Mar 81 p 10]

AIR COMMODORE SURYONO HARDJOSUBROTO--Air Commodore Suryono Hardjosubroto, a member of parliament in the ABRI fraction, on Tuesday [wr March] died at the Jakarta branch of "Saryanto" hospital, aged 55. The remains of the deceased lay in state at the

family residence, Jalan Iskandarsyah 1/22 B, Kebayoran Baru, South Jakarta. The deceased was born in Banjarnegara on 12 December 1926. Before becoming a member of parliament he was deputy for administration in the office of the commanding general of AKABRI. The deceased had been a member of parliament since 1977. [Excerpt] [Jakarta HARIAN UMUM AB in Indonesian 25 Mar 81 p 2]

PROF A MADJID IBRAHIM--The governor of the Special Area of Aceh, Prof A Madjid Ibrahim (54 years old) died on Sunday [15 March] at Husada Hospital in Jakarta, after being ill since 24 February. The remains of the deceased will be buried at Seulimum, about 40 kilometers from Banda Aceh, on Tuesday [17 March]. Prof A Madjid Ibrahim was born in Seulimum, Aceh Besar, on 19 November 1926. During his life he was active in the field of education and held several important posts in the government. His career in the service of society began in 1945, when he became editor of the magazine API MERDEKA, which was published in Yogyakarta. He also became a member of the Student Army in East Java. Around 1953 he was chosen to be a member of the Executive Board of the HMI [Indonesian University Students Union]. After graduating from the Faculty of Economics at the University of Indonesia in 1957 he was appointed a permanent instructor at that faculty. Until 1963 he taught at a number of other universities. In 1963 he returned to Banda Aceh and became dean of the Faculty of Economics at the University of Syiah Kuala. In 1965 he was appointed rector of the University of Syiah Kuala. In 1973 he was appointed deputy chairman of the National Planning Board [BAPPENAS] for regional affairs. On 27 July 1978 he was installed in office at governor of Aceh. The deceased leaves his wife, Mrs Rohani, four sons, and one daughter. The eldest is in second year in junior high school, while the youngest child, a girl, is still attending kindergarten. [Excerpts] [Jakarta KOMPAS in Indonesian 16 Mar 81 pp 1, 12]

COL MOKHTAR HARAHAP--The inspector general of the Ministry of Trade and Cooperatives Col Mokhtar Harahap (Judge Advocate General's Corp), 52 years old, on Friday [20 March] at 0740 died at St Luke's Hospital in Houston, Texas, after undergoing a heart operation. The remains of the deceased will be returned to Indonesia and buried on Monday [23 March]. Mokhtar Harahpa became inspector general of the Ministry of Trade and Cooperatives on 8 July 1978. Previously, he had been a member of the MPR for Jakarta and Bandung from 1977 to 1979. He had also been a judge [Oditur Militer Tinggi] in the High Military Court in Bandung from 1972 to 1978. Mokhtar Harahap leaves a wife and four children (two sons and two daughters). [Text] [Jakarta KOMPAS in Indonesian 21 Mar 81 p 12]

SOEMARSO SOEMARSONO--Soemarso Soemarsono, former editor of ABADI, on Friday [20 March] died at the Islamic Hospital in Jakarta after being ill for some time. His remains were buried at Menteng Pulo on Friday. Soemarsono, who died at 53, left a wife and four children, three of whom were sons and one daughter. Since he was a young man the deceased had been active in several Islamic organizations and had been a member of the Students' Army during the independence war. He became a journalist in 1952, beginning at PEWARTA SURABAYA and later became editor of HALUAN RAKJAT, also in Surabaya, in 1955. In 1959 Soemarsono moved to Jakarta, where he was deputy editor of ABADI until the newspaper closed down due to pressure from the "Old Order" [of President Sukarno]. When the newspaper was authorized to be published again in 1968, the deceased became its editor until the newspaper was prohibited from publishing in 1974. The deceased was born in Magetan on 19 August 1928. He wrote a book entitled, "Pengalaman Dalam Tiga Penjara" [Experiences in Three Jails], which

contained his notes on his experiences in going in and out of jail during his life. During the period of the "Old Order" he was jailed in 1963 and released in 1966. He was later jailed in connection with the 20 March 1978 affair. Until the end of his life the deceased was under open arrest, confined to Jakarta. At a memorial service on Saturday [21 March] those attending included Dr Anwar Harjono, Mohammed Roem, and Chudori, the latter representing the Central Executive Board of the Indonesian Journalists' Association [PWI]. They spoke of the courage of the deceased during his life, heedless of risk. The deceased was a fighter who underwent considerable suffering and self-sacrifice, these leaders stated. [Text] [Jakarta KOMPAS in Indonesian 22 Mar 81 pp 1, 12]

IRAWAN DARSAH--Irawan Darsah, who is presently director of Multilateral Economic Cooperation Affairs in the Ministry of Foreign Affairs, has been designated ambassador and permanent Indonesian representative at the UN office in Geneva, replacing Atmono Suryo. Irawan Darsah (50 years old) is a career diplomat. He began his career in the Ministry of Foreign Affairs in 1955. He has served as third secretary at the Indonesian Embassy in Brussels, as second secretary at the Indonesian Embassy in Berne, as first secretary and then counsellor at the Indonesian mission at the UN office in Geneva. Later he was minister counsellor and then minister at the Indonesian permanent mission at UN headquarters in New York. He holds an M A degree in international law from New York University. According to available information Ambassador Atmono Suryo will be assigned to new duties as general secretary of the National Secretariat of ASEAN, replacing Umaryadi Nyotowiyono.

AIR COMMODORE SURYONO HARDJOSUBROTO--The remains of the late Air Commodore Suryono Hardjosubroto, a member of Committee I of parliament, on Wednesday [25 March] were buried at Kalibata cemetery, after having lain in state in the parliament building. The deceased died on Tuesday [24 March] at "Saryanto" hospital, East Jakarta branch, at age 55. He was born in Banjarnegara (Central Java) on 12 December 1926. He became a member of parliament as a representative of Golkar in 1977. During his life the deceased was very active in military affairs, since becoming a member of the Student Engineers Army in 1945 and until he entered parliament in 1977. He was an engineering specialist during his life. He underwent training in Great Britain (1954-1955) to study maintenance of jet aircraft. In 1958 he went through further training in Czechoslovakia in the form of a conversion course in MIG and IL-28 aircraft. He later attended a course in "overhaul" management of jets in Poland (1960). During the 3 years he was a member of parliament he was a member of Committee X (Technical Research) and then moved to Committee I (Defense and Security, Foreign Affairs, and Information). The deceased leaves a wife and four children (one of them a son and three of them daughters). [Excerpt] [Jakarta KOMPAS in Indonesian 26 Mar 81 p 9]

PERTAMINA DEBT REPAYMENT DISCUSSED

Jakarta KOMPAS in Indonesian 13 Mar 81 p 2

[Article: "Pertanima is Still Repaying Its Debts"]

[Text] Pertamina has been working hard to repay its debts up to the present time. An agreement is expected to be made with the government in this next year for a complete settlement of its debts.

Drs Dicky J. Turner, chairman of the Treasury Subdirectorate of the Pertamina Directorate of Finance presented this information in Jakarta on Thursday [12 March].

Drs Dicky, a former official of the Department of Finance, is now working in Pertamina and concurrently holds the position of special assistant to the Pertamina director. He said Pertamina's debts have been divided into three parts.

The first part covers Pertamina's debt to the Bank Indonesia; the second, its debt to the government, and finally the money owed to a third party.

Pertamina at this time owes the Bank Indonesia a total of about 1.3 trillion rupiah, including 500 billion rupiah in interest while 800 billion rupiah represents the basic debt. The debt includes funds used for Pertamina project development such as the liquified natural gas project, the Cilacap refinery, the pipeline project, and other projects. Some of this debt has been repaid but about 1.3 trillion rupiah are still owed.

Of the amount owed the government since 1974, an estimated 484 billion rupiah have been repaid as of the end of January 1981. Included in this total is the repayment of about $999 million to the Department of Finance which was settled by turning over certain Pertamina assets to the government, such as airfields and buildings.

Drs Dicky did not say how much of the Pertamina debt has been repaid to the third party. However, he said as of 1980 Pertamina had repaid $452 million to banks while another $192 million were deposited through the Bank Indonesia.

These three types of debt cover all the money owed by Pertamina including debts incurred by affiliates of this company.

Drs Dicky said Pertamina debt to the third party is less significant than the money owed the government or the Bank Indonesia. A long-term loan must also be repaid. In the interest of repaying these debts as quickly as possible, Pertamina has repaid a portion of this loan although it does not come due until 1984. The longest loan period is that for the third party loan which runs until 1986.

Questioned about the 1980/81 budget, Drs Dicky replied, the company's operations budget for that fiscal year was $8.1 billion as submitted to the Government Commissioners Council for approval. However, the expenditure budget was estimated at about $7 billion; therefore, there is a surplus of about $1.1 billion. These surplus funds, in addition to being used to finance the investment program, will be used to help repay the remaining indebtedness.

In regard to investments, Drs Dicky said many new projects were still being discussed with the government including the Cilacap refinery, the Balikpapan hydrocracking plant in Dumai as well as the methanol projects in Bunyu and Balikpapan. "Pertamina's current financial policy is limited to investments with the lowest risk," he added.

AVAILABILITY OF PUBLIC HOUSING DISCUSSED, IMPROVEMENTS NECESSARY

Jakarta TEMPO in Indonesian 25 Apr 81 pp 61-66

[Article: "Housing for Wahyudi and Teacher Sitorus"]

> [Text] A bajaj and pedicab driver is confounded by the electric lights in his new home. Further he is becoming accustomed to living in a flat. The first flats are to be inaugurated by President Suharto this week. But what has been done to date by the government to meet housing needs?

He is a bajaj driver. It had never crossed his mind that he would ever live in a sub-basic house with sturdy walls in a healthy environment in the capital city.

But luck, of course, brings surprises. Wahyudi, 44 years old, born in Pekalongan, moved into his new home at sundown on 1 February several days before the Klender sub-basic complex was inaugurated.

Happily, an elder of the citizen's association in Karet Tenssin, South Jakarta, was the first key to this lucky period. One day he forwarded a housing registration form to Wahyudi. The form was filled out immediately but thereafter the bajaj driver thought no more about it because he knows PERUMNAS [National Housing Corporation] housing was only slated for government workers and ABRI [Indonesian Armed Forces] personnel. That in the end he would be alloted one, that was too much!

Wahyudi was astonished, happy but nervous. Moreover, even now when he speaks of his good fortune, he does so meditatively. "Someone actually did show some interest in me," he mutters.

One can say this has been the experience of almost all of the occupants of sub-basic housing. No one could believe that out of the thousands of houses built by PERUMNAS, a house could be made available for the likes of persons such as they--pedicab drivers, broom sellers, bus drivers, taxi drivers, miscreants.

Such an attitude is understandable, of course, because 75,842 houses have been built in 17 cities in Indonesia since PERUMNAS was established in 1974. However, initially all were purchased by ABRI personnel, Grade I and II government workers, or middle class private individuals. It was only later that poorer people such as Wahyudi were able to purchase these houses.

During PELITA II [second 5-year development plan] the government began to build public housing on a large scale but the results were not readily apparent because not enough houses were built to accommodate the number of persons who needed them, especially in urban areas, and also because the houses that were built were restricted to basic houses (with a minimum floor space of 20 square meters) and simple houses (with a minimum floor space of 36 square meters).

The reach was extended for PELITA III. For instance, 150,000 houses (twice the number built during PELITA II) were planned to be built in the 1979-84 period in 77 cities in Indonesia.

Also housing has become more varied since four-storied walk-up flats and small, sub-basic houses (maximum floor space of 15 square meters) were introduced. The first walk-up flats in Tanah Abang, Jakarta, were inaugurated by President Suharto on Tuesday of this week [21 April]--a symbol of the government's attention to the problem of resettling the lower classes.

The first sub-basic housing was the pilot project in PERUMNAS II Mandala, Medan--occupied since early 1980. Here 401 sub-basic units were built, categorized as 72 units of type D-15, 181 units of type D-12, 148 units of type D-9. A sub-basic complex for Jakarta was built in Klender consisting of 190 units while in Surabaya 318 units were built which well be occupied at the end of this year.

Although the sub-basic house seems very small with its cinder block walls, asbestos [tile] ceilings, and cement floors, occupants view them as far better than their former homes. The average people lived in houses that did not meet sanitary requirements. For the most part, they had no electricity nor was a WC always available and if it was, it was used by several families. Further, the rooms had no windows, the walls were made of woven bamboo, and the floor was hardened earth. Not to mention the arguments with the neighbors.

The situation is different in the new housing, moreover, from what can be observed in Mandala II, Medan, it is far different now that it was when the first occupant moved in. The sub-basic houses were changed to meet the needs and capabilities of each occupant. Pedicab drivers gave priority to building garages for their pedicabs. Some added kitchens first.

Muhammad Nurdin, 49 years old, a pedicab driver, has added a bedroom, a living room, and a kitchen. With a wife and six children, of course, they could not be crowded for long in a 9 square-meter-room.

To make their surroundings more pleasant, the Nurdin family painted their fence and planted flowers, cassava, and corn in the yard. Their cleared land--not extensive, of course, only 60 square meters--is very well taken care of and is attractive

In the Mandala II complex the day begins about 8 am with clean pedicabs ready and waiting in the yard. Several bare chested men are standing there erect and challenging the sun's rays. Young girls come out of the house to discard the garbage in a bin at the edge of the street. Meanwhile Malay songs float out from several houses--and music in the Hong Kong rhythm is also heard. Children leave for school on a public bus at 7 am.

About mid-day, it is rather quiet, but toward evening those who have a TV gather around their sets. It is hard to gain a livelihood, a mouthful in the morning and a mouthful in the afternoon, but this doesn't prevent the people from enjoying a new peaceful life in the sub-basic housing environment.

Also there is a very noticable feeling of solidarity among the occupants. If someone adds on to his house, neighbors on both sides help and, moreover, they have formed a group called the Mutual Aid Society (STM) which, among other things, is responsible for local security. The occupants rotate on evening patrols. The lane chief, although located in a different place, functions like the chief of the neighborhood or citizen's association and rarely has come in to handle problems arising among the inhabitants of the lane. "We can settle them ourselves," Nurdin remarked confidently.

Neverthelsss, there are some limitations here and there. Eng Budi Prabowo, 36 years old, chairman of the Medan PERUMNAS project, is very dissatisfied with this inadequate garbage collection and environmental sanitation, responsibility for which rests with the contractor. Further some occupants are sloppy; garbage is thrown about anywhere. Complaints are also heard that potable water supplied by PAM [Potable Water Company] is limited and has even been turned off completely. Nurdin and his neighbor, Mochtar, were forced to dig a well--meanwhile the bill of PAM water keeps coming.

In the Klender complex in Jakarta, the PAM water supply initially operated smoothly but several days later it became irregular. Wahyudi and his neighbors, in a self-help way, set up a pump. Ten persons paid the 55,000 rupiah cost. But as soon as the pump began working, the expensive water supplied by PAM suddenly flowed again except there was not enough pressure to fill a bathtub.

One complaint has not yet been heard. For shopping, wives do not have to go far There is a market in the middle of the complex. Children also go to the available elementary school, two junior high schools and one senior high school. These were ready when the families moved in. There is a People's Health Center and a few general practitioners have opened offices in the complex.

Since the sub-basic houses in Klender have been occupied for only 2 months, no significant changes have been made in them. At present Wahyudi only plans to save so that he can make his house more attractive later. He is still unable to build a fence, much less add a room. A belimbing [Averrhoa belimbi] tree grows in his yard--a "gift from Mother Tjokro"--meaning Mrs Tjokropranolo, the wife of the governor who assisted in making the area green.

A neighbor, Ahmad Sobirin, 41 years old, an employee of the Special Capital Region Sanitation Service, has just finished building a fence, installing a roof over the outdoor bathroom and is busy building an additional room. He knows his monthly income is insufficient to buy food let alone pay for his monthly instalment, electricity bill, and monthly security fee. Therefore, Sobirin, who has a wife and one child, sells cigarettes in front of his house and at the Taman Mini [mini-garden] on his day off.

Since the sub-basic house in Klender covers only 15 square meters, crowding is inevitable. At first glance from the outside, the houses look like "mini" garden houses emerging from a growth of trees but filled with children. They sit around or race their bicycles through the lanes which are kept neatly. There are volley-ball fields to the south. In back of the houses wet ricefields spread out filled with yellowing paddy. The Pondok Kelapa housing is also visible and is clearly more attractive than the PERUMNAS housing.

The occupants of the sub-basic housing project do not need to envy the people in the Pondok Kelapa housing which was built by a real estate company for wealthy people. Wahyudi, for instance, is happy when he presses the button on the wall and the electric bulb lights, which is hard to understand. "You don't have to use a match to light the lamp," he remarks simply.

In this respect, the man with two children acts like a child in the Medan sub-basic housing complex. Eng Budi Prabowa tells about the children, who several days after they moved in, kept turning the lights on and off. They enjoyed seeing them light up and go out--this moved Budi Prabowo.

However, what Nurdin said is more to the point. "This PERUMNAS house makes me happy," he remarked slowly. "Till now I didn't even think about owning a house. Earlier I rented one room for 15,000 rupiah a month and could have kept on paying rent without ever owning the house. Now I look toward becoming the owner of a PERUMNAS house on the instalment plan."

The rising expectations of these people--as pointed out by Eng Soenaryono Danoedjo, executive director of PERUMNAS--makes even these occupants without any regular income zealous in keeping up their monthly payments. They couldn't be more grateful

However, both sub-basic houses and walk-up flats in Tanah Abang are something new greated with joy--plus an irritation. Not only to those living there--who are higher on the social scale than Nurdin--but also to the people who live around the housing area. The project was built on 4 hectares of land that formerly was a cemetery. Now there are 60 blocs of apartments soaring upward.

Those who live around the project, in the words of a neighbor, are reminded of Taman Ria when they look at the groups of flats, possibly because they see lovely park lights, neatly kept trees, grass growing as well as inviting park benches. The children in particular throng there. They play ball or fly kites there and roasted peanuts are sold there. The project children mingle with children of the surrounding area who roller skate and ride minibikes there.

In the early morning people from the surrounding area walk through these well-ordered areas inhaling the fresh air.

These flats can hold 960 families. Earlier 2,853 indicated they were interested but 1,967 completed and returned the application. Of the total number of families the project can support, 128 were approved during the first phase--as of last week only 30 families had moved in.

What is their impression of the flats?

Mrs Eman and Mrs Sitorus, who live on the fourth floor, say the water pressure is intermittent. Mrs Alex Miraza on the first floor of complex A (built by PT Pembangunan Jaya) has been able to use her gas stove while Mrs Eman in complex B (built by PT Wijaya Karya) is forced to use an oil stove because the gas is not hooked up to the kitchen.

PAM's water pressure was believed to be enough to get water to the top floor because every bloc has its own underground reservoir and two water tanks on the roof. There are no bath tubs because it was felt a "shower"--a shower bath--would be sufficient.

However occupants may install a bath tub. This, among other things, was done by the new occupants soon after moving in. Alex Miraza, for instance, did not wait a long time. He immediately painted, installed an etermit, and even bought new furniture. Eman Siswanto covered the floor of his living room with a green carpet and arranged a cupboard so that it divided the room. This had to be done to break up the open space.

The stairs apparently are a problem for many residents. Mrs Eman (who lives on the fourth floor) admitted that her four children happily run up and down the stairs but she gets very tired. To keep up her strength, she plans to shop once every 3 days. However, in order to be able to do this, one of her first steps will be to buy a refrigerator. A new problem arises as to whether the 450 VA available for each unit will be enough to run the refrigerator.

Mrs Sitorus, a 44 year old teacher, clearly cannot be stopped because of the stairs. She is tired every day but is cheered by the fact that there are two sets of stairs in her bloc (B) while bloc A has only one. "I can vary the climb," she remarks exhaling cigarette smoke.

Most occupants feel at peace in the flats. The concrete walls are thick enough to keep out the sounds of other people's voices. The sun shines through the windows into every room, but rain also comes in freely. To keep it out, PERUMNAS will install awnings on each window.

In addition to being sprayed by the rain, Mrs Eman had a minibike stolen one day. One of her children left the bike down below and someone took it immediately.

How can guests be accommodated in a unit that measures 6 x 6 meters and has only two small bedrooms? "I believe I could accommodate a family with two or three children, but for 2 or 3 days only. If they stayed longer, that would create other problems," remarked Miraza carefully. Other occupants feel the same way.

Apparently it is not always true that transportation to one's job is facilitated by living in a walk-up flat. It's still the same problem for Eman Siswanto. He takes two buses and now adds another ride on a bemo to get to his office in Kemayoran. Sukardi feels he must travel further, and Mrs Sitorus must travel almost the same distance she did before moving. Miraza, of course, is much closer to his office.

But all this is not too bad. What people are really wracking their brains about is where to dry clothes for which few preparations have been made. "The biggest problem is where to dry sheets," Sitorus, the teacher with 22 years experience, remarked.

Actually both the sub-basic housing and the walk-up flats need improvements, The difference lies in the degree of improvements that must be made. In the flats with a floor space of 36 square meters almost nothing needs to be added except room dividers and a bath tub. But Wahyudi, Nurdin, and Sobin must sweat to improve the sub-basic housing with a floor space of 9, 12, or 15 square meters.

Nevertheless sub-basic housing can be equated to simple housing with a floor space of 36 square meters on 60 square meters of land. This is the minimum standard for low-cost housing, meaning housing subsidized by the government.

Because it is calculated that more than 50 percent of urban residents are unable to buy a simple house (their average monthly income is 30,000 rupiah and under), housing experts in both the Department of Public Works and in PERUMNAS concluded that sub-basic housing (with fooor spaces of 9, 12, 15, 20, 21, and up to 33 square meters) should be built. This is still far below the minimum standard of 45 or 50 square meters for this type of housing in advanced nations.

Taking into account the ability to pay of those owning sub-basic housing, occupants in Medan must pay a daily installment of 180 rupiah. In Jakarta the instalment is 270 rupiah per day. Some of the occupants may feel overburdened, "but isn't it hard to find a house like this?" Sobirin said staunchly.

Soenaryono, executive director of PERUMNAS, admits that housing built by PERUMNAS, in many respects, is not free from defects. In Cirebon, for instance, such housing is flooded and many walls are cracked. In Depok some houses have no potable water supply and the same is true for some housing in Medan. In Surabaya housing allocation has not been very orderly.

On the other hand, he also feels some things should not be demanded of PERUMNAS, for instance, repeated demands for housing for two or three wives (this actually has happened), demands for more space but unwillingness to pay the extra cost, the purchase of land with the hope that PERUMNAS housing will be built on it in the future.

He recalled that a mass approach was used for PERUMNAS housing development. There are shortcomings in its implementation. However, a few shortcomings out of the 1,000 good results are normal. "We encounter a strange society," remarked Soenaryono. "If all goes well, there is peace, but there is a loud outcry when there are a few shortcomings.

Alex Miraza, who lives in a walk-up flat, has another outlook. "I am very grateful to the government, particularly to PERUMNAS," he remarked, "because they paid some attention to people who had no houses." He also sees the advantages gained by living in the flat; a person can move up the social scale gradually and the environment is good for growing children and the family.

In general occupants of the flats make intelligent judgments. For instance, they accept the big difference in the amount of the instalment depending on the floor they occupy. The higher the floor, the lower the instalment. (The instalment for the first floor is 61,710 rupiah a month, for the second floor 57,390 rupiah; third floor 53,060 rupiah; fourth floor 48,740 rupiah). Allocation of flats is done through a lottery system.

Two contractors, PT Pembangunan Jaya and PT Wijaya Karya, built the walk-up flats in Tanah Abang. They built 32 blocs and 28 blocs, respectively. Those built by Pembangunan Jaya are visible from afar because some of the outside walls are covered with red brick. The model chosen is called a mushroom flat because each bloc consists of four floors, with four units on each floor, and a central stair well connects each floor. The model selected by Wijaya Karya has two stair wells for every bloc, built in columns of flats rather than in clusters of flats.

The Cortina system, considered a modern system, was selected by PT Jaya. It was imported from Mexico, is more efficient and construction is speedy. For this system "lifting equipment" was imported, that is, special cranes, costing 300 million rupiah. "Conventional methods were used for casting the concrete but it is put up in a modern way," said Eng Ferdinandus, manager of the Pembangunan Jaya housing unit.

But why must such high technology be used? "First, of course, is speed of construction so time is gained. More precision can also be expected; the use of concrete forms makes for more accurate construction than other systems," he explained further.

Did PT Wijaya Karya use its own concept for the concrete panel system? According to Eng Yoyon Mulyana, who was assigned as technical manager for this company, this system was selected because "the foreign system was very expensive." No significant problems arose in its implementation except those regarding the site, which apparently had once been a swamp. "Here we planned to use a pillar foundation but were forced to replace this system with a piling foundation," said Yoyon.

And this clearly affected the cost. Both Ferdinandus and Yoyon said their companies "made no profit" from the walk-up flat projects. Construction costs were estimated at about 1 billion rupiah but were overrun because of increasing costs for building materials.

It is not clear whether PT Hutama Karya had the same problem. This company built four-storied flats on 2.5 hectares of land in Sarijadi, Bandung. They were planned to be finished by May. The project consists of 11 matching blocs (with 32 units in each bloc), costing about 1.25 billion rupiah. Dr P. Sibayang, chief of the subsection for allocation of PERUM PERUMNAS, Bandung, was not prepared to say what the monthly instalments would be but ventured to say that they "clearly would be less than those in Jakarta."

Nevertheless thus far no one has indicated his willingness to live in the Sarijadi flats. "The problem is if one lives on the top floor of the project, one might feel like a pigeon," remarked Yayat Hidayat, who lives in the old-style PERUMNAS housing in Bandung. "It may also be that this is the first time walk-up flats have been available here," Yayat added.

Walk-up flats, of course, are something new in both Jakarta and Bandung. Later this will be true for Medan and Surabaya.

MINISTER SPEAKS ABOUT URBAN RENEWAL

Jakarta TEMPO in Indonesian 25 Apr 81 pp 64-65

[Article: "With No Satellites, Go Into the Slums"]

[Text] Cosmas Batubara is noted as a minister who travels a good deal around Indonesia. Almost no PERUMNAS [National Housing Company] complex escapes his attention. This April alone his visiting schedule covered seven cities including Banda Aceh and Palangkaraya.

The minister is young (42 years of age), the father of four children, slim and tanned. His darker skin could be the result of his outdoor assignments outside the city, but it also might be the result of playing tennis, usually three times a week.

At first glance, he is no different than anyone else. He is open and smiles readily. Persons close to him, including the executive director of PERUM PERUMNAS, Eng Soenarjono Danoedjo, have their own impressions of him. According to them, this minister is "more Javanese than the Javanese." In other words, the minister, born in Tapanuli, is very refined.

Below is part of the interview given to Isma Sawitri of TEMPO by Vice Minister Cosmas Batubara at the end of last month.

[Question] What is the government's resettlement strategy at this time?

[Answer] At our present level of development we can only formulate a strategy for simple housing for Indonesian families, that is, housing with a 36 square meter floor space, with two bedrooms, a living room which includes a dining area, a bathroom, a WC, and a kitchen. This is the minimum standard in line with available funds.

I am not speaking of an attractive standard--that is another problem. Of course, the housing development concept has been simplified for PELITA III [third 5-year development plan]. But former housing concepts will be continued.

In PELITA II we just had simple and basic housing. In PELITA III we have tried something called sub-basic housing in four cities: Jakarta, Surabaya, Medan, and Bandung. This type of housing is intended for people who have no regular income, of whom there are very many in urban areas.

[Question] Housing construction initially was directed toward opening up new satellites such as Depok, Tangerang, Bekasi, Helvetia, and so on. More recently the government has tried again to rebuild the cities with walk-up flats such as those in the Tanah Abang, Jakarta, area. Why?

[Answer] After we reviewed the situation, we saw that if we continued to build satellites no wet ricefields would exist around the cities. So, for instance, Depok must not be expanded.

Because buildings do not absorb water but rather discharge water. If water from 6,000 hectares is not absorbed, think what will happen during the rainy season when water from the flooded Ciliwung River pours into Jakarta. So let's first give some thought to the higher regions above Jakarta if we want to spare Jakarta. So, in the framework of looking far into the future, we began what is now called urban renewal. In this framework we prepared the Tanah Abang flats.

[Question] What advantages are gained frmm walk-up flats?

[Answer] A number of steps are achieved simultaneously with urban renewal and walk-up flats. If you build a satellite, you must build roads, but if a slum area is upgraded, the government does not need to build roads. If a slum area was frequently flooded in the past, it can be redesigned. For instance, by constructing drainage to keep pools of water from forming. For children who did not have "space" to play in, "open space" is provided for them. If the area formerly was barren, it can be made green. Musollas, mosques, shopping centers, and the reaction of occupants can be studied and thereafter improvements can be made.

Clearly if one just uses common sense, the walk-up flats were a solution not only for overcoming the problem of limited land available in the urban areas but also to facilitate transportation and cut down the "slums."

From another aspect, occupants of the flats must be very well disciplined. As to whether the occupants are or are not, there are two answers: they are or they are not yet. If I had my say, I'd say let's begin to discipline them.

[Question] In their efforts to get land in the urban areas, if I am not wrong, the government ran into the land owners. And the situation became more complicated because these land owners felt they were entitled to receive priority for PERUMNAS housing.

[Answer] If land is needed by those who want to build on it, land owned by others, the matter must be discussed with the owners. For this reason perhaps, the Special Capital Region proposed to begin with state-owned land. In our way of thinking, the problem was that people's lives should be improved. I went through the kampungs around the flats. Housing there was far below standard. If they wanted to improve the environment there, it could be done. The problem here is "desire." If the people do not want to do this, how can the government improve the situation?

Housing priority continues to be given to those who have no houses. In the next phase, the landowners get housing. Mutual desire is important. Details of the problem can be discussed on a case by case basis.

[Question] Is the housing pattern implemented by the government in the same way in all regions of Indonesia?

[Answer] The same way. The types of houses and the land area are the same, because housing is being built and not a house. Housing consists of houses and the surroundings which consist of infrastructure and facilities such as roads, drainage, water, electrictty. The maximum standard for all this is 200 square meters. It is different for a private home. However, a house subsidized by the government is always built using the same standard.

FISCAL YEAR TRANSMIGRATION TARGETS OUTLINED

Jakarta PELITA in Indonesian 6 Mar 81 pp 1, 7

[Article: "Government Faces New Challenges for Developing Transmigrants"]

[Excerpt] The government faces new challenges in developing transmigrants in resettlement areas compared to those for transmigrants who have already been moved.

From January to December 1979, 13,010 families were moved. This grew to 62,339 in 1980 and during the 2 months and 4 days of 1981 (from January to 4 March), 14,361 families were moved. The 64,000-family "carry over" from the 1981 target of 100,000 families as of 1 April 1981 must be added to this year's total. In the new fiscal year of 1981/82, therefore, 164,000 families must be resettled. The 1 April carry over is far less than the 79,556 families that were carried over as of 1 January 1979.

This transmigration problem was reported to President Suharto on Thursday [5 March] at the Bina Graha by Prof Drs Harun Al-Rasyid Zein, NAKERTRANS [manpower, transmigration, and cooperatives) minister along with Vice Minister for Transmigration Martono and Transmigration Director General Kadarusno.

Kadarusno said the new challenges for this year are more training for specialists in agriculture, animal husbandry, fisheries, and veterinary medicine as well as for graduates of senior agricultural high schools and agricultural technical schools so that they can immediately handle problems arising in the transmigration sites. The period for developing specialists should be cut from 5 to 3 years, better yet if it were cut to 2 or 2 and 1/2 years. When this development period is completed, they will be sent to the various regions involved to develop transmigrants in the new sites.

Meanwhile Vice Minister Martono said the Lampung transmigration project requires special handling since a resettlement area financed through the budget is planned for Lampung as of 1 April.

Four ministers recently made an observation tour of Lampung to study what preparations need be made for resettlement there and to determine how those methods can be applied in other provinces. The four ministers were NAKERTRANS Minister Harun Zein, Agriculture Minister Sudarsono, Research and Technology Minister Habibie, and Vice Minister of Transmigration Martono. They were accompanied by Transmigration Director General Kadarusno.

On that occasion the feasibility of starting an "energy estate" in the transmigration project was studied. Two hundred hectares have been cleared for this estate in the Tulang Bawang transmigration project. The Tulang Bawang energy estate is a pilot project for all the provinces. Here tubers (particularly cassava) will be planted. These will be converted into ethanol. If this pilot project is successful, it will be carried out in other provinces.

The transmigration resettlement target for Lampung is 50,000 families, of whom 5,000 have already volunteered to move to the area and the remaining 45,000 will follow, including 10,000 who will be resettled in 1981/82.

AGRICULTURAL PROBLEMS OF FUTURE OUTLINED

Jakarta PELITA in Indonesian 4 Mar 81 pp 1, 7

[Article: "Agricultural Sector Will Face Huge Problems in the Next Twenty Years"]

[Text] PERAGI (Indonesian Agronomy Association) members feel the agricultural sector will be faced with huge problems in the next 20 years, particularly with regard to food crops.

The problems facing the country in the coming 20-year period and the measures to be taken to resolve them will be discussed at the second PERAGI Congress and the National Agronomy Conference to be held in Jakarta for 3 days beginning 31 March.

The opinions of these experts were reported to President Suharto on Tuesday [3 March] at the Bina Graha by Eng Ahmad Afandi, vice minister for food affairs and acting chairman of PERAGI, who was accompanied by other executives of the organization, Prof Dr Eng Gunawan Satari, Dr Eng Sjamsoe'oed Sadjad, Eng Soemantri, and Eng Djatiyanto.

PERAGI Chairman Eng Ahmad Affandi said PERAGI's view is supported on eleven counts:

1. The preliminary report on the national census shows a total population of 147.86 million and a population growth rate of 2.34 percent.

2. Half of the gross domestic product (GDP) comes from the agricultural sector and most of it depends on smallholder agricultural units.

3. The 14 million depressed smallholder agricultural units have little capital, little knowledge and technology and management, and use traditional farming methods.

4. These small units consist of arable plots averaging less than 1 hectare; their numbers will increase, and the size of the arable plots will be reduced.

5. More than 60 percent of Indonesia's food is grown in Java which is densely populated and whose arable land continues to decrease with the increasing encroachment of residential developments and allocation of land for industrial purposes.

6. An estimated 12 million economically depressed farmers produce almost all the food (paddy, secondary crops, vegetables and fruits) and they are spurred on to increase food production at the rate of 4 percent per year.

7. The threat of depletion of natural resources has been with us for a long time.

8. The continuing increase in manpower and unemployment, totaling 1.6 million persons per year, causes concern.

9. Non-fossil fuel consumption is increasing at the rate of 14 to 15 percent a year. This is of concern because the supply must not run low in the next 20 to 25 year period, considering that fossil fuel is still expected to play a role as the primary producer of foreign exchange.

10. The organizational and institutional structure of the Department of Agriculture at present continues to use an information system approach.

11. The production, stockpile, and marketing systems are being handled by a variety of agencies. The production, stockpile, marketing, and consumption systems actually comprise a supra system that should be considered as a whole to facilitate handling its various elements intensively to maintain a balance among the elements to achieve benefits in each of the systems.

According to PERAGI, the congress and conference will seek ideas on how to solve these problems. About 400 participants are expected to contribute ideas on formulating new concepts for both micro- and macroagriculture models, based on observation and analysis.

BRIEFS

ECONOMIC RETALIATION--Drs Sudardji, chairman of Commission VII of Parliament, affirmed that we must "show our fangs" to Italy and France for their sudden halt to importing readymade clothing from Indonesia. When questioned about a response to the Italian and French sudden cancellation of orders for Indonesian-made men's shirts, as reported in PELITA on Tuesday [3 March], Sudardji replied, "We must take another look at our imports from these two countries and then import the same items from other countries." We must cut off items used for development as well as those used for ordinary business purposes which we have been importing from Italy and France and seek them in other countries. We must stop all government imports as well as private sector imports, he added, further clarifying what he meant by "showing our fangs." Sudardji reminded us that Britain had taken the same step some time ago and we retaliated by stopping our imports from Britain. This produced good results for Britain changed its attitude, Sudardji said. We must also be resolute now in confronting Italy and France, he added. The step taken by Italy and France against Indonesia is an indication of continuing conflicts of interest between advanced and developing nations. This is why the nations in the Group of 77 must remain vigilant, Sudardji said. If European Economic Community nations do this, they are not supporting the dawn of world economic peace. INFORMATION ON PRK AND SRV MILITARY UNITS

[The following information was extracted from Phnom Penh Domestic Service broadcasts at 1200 GMT unless otherwise indicated or from Vietnamese press material as indicated. Unit designators and locations are as given. The remarks include a brief summary of the information available in the source.]

Unit	Remarks
317th Gp	Unit members who completed military service in Kampuchea were feted by the 1st Precinct, Ho Chi Minh City on 5 Dec 80 (Ho Chi Minh City 6 Dec 80 p 1)
38th Gp	Serving in Kampuchea. Commended for improved discipline (NHAN DAN 8 Jan 81 p 3)
7708th Gp	A headquarters officer: Lieutenant Colonel Vo Hoang Minh [VOX HOANGF MINH]. This unit is serving in Kampuchea (Ho Chi Minh City TIN SANG 26 Dec 80 p 8)
82nd Gp 4th Bn	Serving outside Vietnam (QUAN DOI NHAN DAN 13 Jan 81 p 2)
Dong Bang Div 48th Regt 52nd Regt 64th Regt 16th AA Machine Gun Co, M.8 Gp	Deputy Division Commander: Le Nong [LEE NOONG]. In 1980 was withdrawn from Kampuchea for intensive training (QUAN DOI NHAN DAN 16 Jan 81 p 3)
7th Plat, 3rd Co, 1st Bn, M.32 Gp	Located at Dum Dam Prey Hamlet, Ta Rop Village, Chuong Prey District, Kompong Cham Province, Kampuchea (QUAN DOI NHAN DAN 6 Jan 81 p 2)
75th Gp, Kampuchea Revolutionary People's Army	This recently activated unit is one of several main force border defense units (Ho Chi Minh City SAIGON GIAI PHONG 7 Jan 81 p 2)

3rd Group, Kampuchea Revolutionary Army	Photos of unit members training meeting with local villagers and reading newspaper (QUAN DOI NHAN DAN 22 Jan 81 p 2)
6th Bn, Vinh Quang Gp	Located in Kampuchea. Deployed on Highway 4 (QUAN DOI NHAN DAN 9 Feb 81 p 3)
H.70 Gp, 5th MR	Photo of unit bridging a body of water in support of VPA forces "performing an international mission" (QUAN DOI NHAN DAN 10 Feb 81 p 1)
2d Battalion, Koh Kong	Statement by commander on achievements made by his unit last year and targets for this year: 6 ha of crops planted, 15 houses built for people, vigilance heightened (12 Feb 81)
First Battalion, Krakor District, Pursat	Helped people in rice planting, house building (14 Feb 81)
86th Battalion of Cavalry Force, Kong Pisei District, Kompong Speu	Station correspondent describing training and building unit. Unit took part in maintaining security and providing food for people. Paramedics also provided medical treatment for civilian patients (17 Feb 81)
12th Co, 3rd Bn, B.32 Gp	Has served and may still be serving in Kampuchea (QUAN DOI NHAN DAN 23 Feb 81 p 2)
72d Battalion of Signal Corp	Station correspondent article on changes in training of cadres and combatants in signal technique (24 Feb 81)
3rd Infantry Regt, 9th MR	Located in Kampuchea (QUAN DOI NHAN DAN 27 Feb 81 p 3)
19th Battalion in Kompong Thom Province	Report on achievements of mass agitation effort (28 Feb 81)
3rd Battalion, Takeo Armed Forces	Newspaper article telling how members of this unit kept themselves fit by drilling constantly and upheld high sense of discipline by emulating with each other in work and combat (9 Mar 81)
8th Battalion of Kompong Cham Province	Successfully built its units. Political and military training were emphasized and stimulated. Presents impressions by Battalion Commander (Yin Hong) (12 Mar 81)

19th Battalion, Kompong Thom Province	Rescued a group of fishermen being robbed by Pol Pot remnants at (Stoeng Cho) 2 km away from Tonle Sap Lake (14 Mar 81)
Kpraf Infantry School	Held meeting to study Defense Ministry's circular on election 11 Mar in presence of school officials (19 Mar 81)
81st Battalion	Statement hailing draft constitution favorably comparing PRK Constitution with early Cambodian constitutions (19 Mar 81)
H.4 Regt	Component of a Corps [Binh Doan] of which Major General Nguyen Chon [NGUYEENX CHOWN] may be a member and which appears to be in the south or in Kampuchea (NHAN DAN 26 Mar 81 p 2)
H.03 Tank Brigade	" " " "
M.64 Artillery Regt	" " " "
Units of 1st Division	Harvested 50 tons of rainy-season rice, bred 21 oxen, 37 hogs and 207 chickens, helped people harvest 80 ha of rice, build 16 houses (28 Mar 81)
23d Battalion of 2d Division	Provided protection of people harvesting rice, helped them harvest and thresh rice. It tended gardens and bred hogs and chickens for own needs (28 Mar 81)
12th Battalion of Kompong Som City	Opened 2-month political study course for cadres and combatants. It planted vegetables and bred hogs and chickens for own needs (28 Mar 81)
17th Battalion of Kompong Thom	Reconnaissance group uncovered and foiled an attempt by Pol Pot remnant troops to steal people's rice in Khar Village, Stoung District, on 12 Feb (28 Mar 81)
23d Battalion	Holding political course for cadres, combatants; helping local people in harvest and reconstruction; tending vegetable gardens for own needs (4 Apr 81)
23d Battalion of 2d Regiment	Article by correspondent on building of units hails efforts by leading cadres to improve units through political education, material care, civic action and gaining people's confidence and support (7 Apr 81)

Battalion 16-A, Svay Rieng Province	Article by correspondent notes successes of unit in sweep operations and mass agitation work in Romeas Hek District (11 Apr 81)
2d Battalion of Kompong Speu Province	Station correspondent article describing encounter with cadres and combatants who praised Commander (Mor Chor) for his excellent performance in leading unit in all operations--sweeps against enemy remnants, mass persuasion work and unit building (18 Apr 81)
1st Battalion of Takeo Provincial Armed Forces	Article describing growth, interviewing provincial forces commander on steps taken by unit to improve itself and become outstanding unit in observing discipline, dealing with masses and conducting operations (21 Apr 81)
5th Task Group, Samraong Tong District, Kompong Speu	Feature telling how (Chea Sat), 34, head of the group, worked in mass persuasion operation trying to win over people misled by Pol Pot remnants. Notes success of his group's effort to make people understand KNUFNS and KPRC policies (21 Apr 81)
Political and Military Training School in Phnom Penh-Dei Eth area	Opening fourth political-military training course for cadres and combatants. In addition to giving training, school also promotes production drive. So far, over 3,500 kilograms of various vegetables were planted; 4 oxen and 25 hogs were raised (25 Apr 81)
2d Battalion of Kompong Speu Province	Made good achievements in mopping up enemy elements and supporting people. Since Jan 81 the battalion captured 35 reactionary elements, seized 112 weapons and helped people to reap 50 ha of rice (25 Apr 81)
2d Battalion of Koh Kong Province	Opened training courses for cadres, combatants to study four documents to strengthen discipline and understand central policy (14 May 81)
91st Battalion of Koh Kong Province	Attending training course, maintaining security and assisting people (16 May 81)

6th Battalion, Kompong Thom Province	Attending political courses, planting crops and raising animals (16 May 81)
9th Battalion in Kompong Thom Province	Article by correspondent depicting development of cadres and combatants (21 May 81)
Vietnamese company of Battalion 30, Chamar Bang District, Koh Kong	Helped four old women from the jungle (23 May 81)

TEXT OF HINDU INTERVIEW WITH PAKISTAN FOREIGN MINISTER

Madras THE HINDU in English 1, 2 May 81

[Interview with Agha Shahi, foreign minister of Pakistan, by N. Ram at the United Nations on 24 April 1981]

[1 May 81 p 8]

[Text]

QUESTION: Mr. Foreign Minister, in the recent period and particularly since 1977, there appears to have started a process widely welcomed in our countries. A process of normalisation or all-round improvement of ties, on the diplomatic, trade, cultural and other fronts, including sports. And some of the major landmarks after the Simla Agreement appear to be the Salal Dam Agreement, your visits in May 1978 and in 1980.

Meanwhile, there was a return visit by the Indian Foreign Minister. And in November 1980, President Zia advised Prime Minister, Mrs. Gandhi of his "keenness to normalise relations". Quite recently, something seems to have happened to upset this. Coming from India, I see quite a lot of concern over what has happened. How would you place it in this context of what has happened, particularly since 1977?

Answer: Well, we made considerable progress towards normalisation of relations. And this was being done irrespective of the regime in either country. Actually, the movement towards normalisation started in the time of Mrs. Gandhi herself, from 1974-75. I, was then Foreign Secretary and I and my Indian counterpart made an agreement for the restoration of diplomatic relations, resumption of trade, travel. Some of this we have been implementing.

I think there is a totally unfounded fear in India about what is called the 'arming of Pakistan. This is a very unfortunate phrase because it raises the spectre of some fearful shadow falling over India. If you look at it dispassionately, what is this 'arming' of Pakistan?

Arms embargo

You know, from 1965, military aid from the United States stopped. We tried to buy something while they said, 'you can buy spare parts, non-lethal weapons, or supplies'. Then, again, for one reason or another, they clamped down the embargo. And it was lifted in 1975. Even then...we got supplies, because most of our equipment has been of American origin...then came President Carter and he introduced a new arms policy. He said he would not allow new weapons to go into areas where they do not exist. This had reference to our interest in some A-7 aircraft at that time. And then they offered us some other aircraft, F-5 or something.

Then, they made an issue of our agreement with France on the nuclear reprocessing plant. Even though we were bound hand and foot...there was no possibility of cheating, to secrete plutonium. We offered all kinds of guarentees. We said, 'you take away all the plutonium and place it under international control and give us only what we may need' But the U.S effectively sabotaged that agreement. And after some time, President Giscard froze it. That agreement wasn't implemented. So that was used as an excuse for embargo on supplies...even purchases.

What we need is...you understand. You have said in India that you need to replace your obsolete military equipment. I'm sure that every fair-minded Indian would say that Pakistan also has the need to replace obsolete equipment. You know we have some squadrons of F-86 aircraft, which were phased out all over the world in the 1960s. And we are using them,

cannibalising them, and several of our pilots have been lost on account of...we have grounded this. We have the Chinese F-19s, we have a few Mirages.

Suddenly, India felt it must upgrade, replace its obsolete squadrons. And you went in for some 200 Jaguars costing two billion dollars. I believe 40 of them have already been delivered. Well, we were worried, but we didn't raise a furore. You know, any expert will tell you that this is a long-range aircraft which avoids radar by flying low and it carries heavy payloads, and the Americans offered to give you navigation and guidance equipment. We didn't raise a furore. And in our professional military judgment, these 200 aircraft are only good against Pakistan. Because they don't have the range to be a threat to Chinese industrial or military centres. But still still we — since 1978 — have been trying to get some modern aircraft.

Military balance

We have told you repeatedly that we shall in no way enter into an arms race with India. We have no resources to match your build-up, nor do we have any desire to do so. But we do need a certain kind of modern aircraft - of the interceptor type. And whatever we get, given our resources, will be only a fraction...do you think that about three to four squadrons of interceptor aircraft will threaten the security of India when you have 200 Jaguars?

Q.: These will be F-16s/79?

A.: Well, whatever it is. Supposing, they are interceptors, they are not long-range aircraft. Suppose we get a few squadrons of them. Does the military balance which is so much in your favour — get upset? So we ask ourselves: why is India so worried?

Similarly, there are critical shortages in our army...in terms of tanks. We have Chinese tanks and you have T-72 tanks. I told Mr. Rao when I visited Delhi last year (July 1980)... and I met Madam Gandhi and she said they were worried about. I said, 'Madam, why are you to worry about this? Because we are ready to sit with you instead of making these public statements which only confuse'. The laymen in both countries get worried. They don't know what to make of these statements.

What level of forces and armaments from Pakistan will constitute a threat to india should be a matter of professional military judgment — on both sides. So I suggested, 'we can sit down together with our military experts and discuss what should be the level of forces and ratios of armaments. If you feel that Pakistan is a threat anyway, taking into account our total number of forces and defence equipment and location (and similarly your location along our borders and all that), we can be assured we can reach an agreement.

Because we have no intention of going to war with India under any circumstances.

A no-war pact

Use of force is ruled out by the Simla Agreement. Even the status quo in Kashmir is not to be disturbed by military means. We have eschewed the use of force. So this is a no-war pact. What more? You can give it any title you want. But what the Simla Agreement says is a no-war pact.

So we made this proposal in order to reassure India and convince them of our *bona fides*. But India reacted strongly. They said, 'you made this public statement. And this you should not have done'. So I told Foreign Minister Rao, the next day when I met him, I said, 'well, we didn't do this in order to create any propaganda. It was sincerely meant. If you feel you don't wish to discuss this matter, we'll drop this'. But, then, you know that the Indian 'press' about the visit that I had paid. They said they wrapped me on the knuckles.

Q.: But I'm told that that misunderstanding was set right...by a telephone call...

A.: Yes, it was set right by a number of people. They published something to have transpired which did not figure in our talks. So anyway...

Q.: But that was set right, is that clear...

A.: Well, more or less. But, you know, the purpose of the visit was largely undermined. But anyway...now there is a great anxiety in India. I wish to state categorically that Pakistan will never commit aggression against India. We are not for trying military conclusions. You can rest assured that anything we get...naturally, every country will defend itself if attacked, with whatever it has. But we face a difficult situation. You know what the position in the West is.

Supposing even there is a local attack. Well, with what will the local attack take place? It will take place with more modern and sophisticated armaments than we have.

So, if we want to replenish some equipment, this should not be a cause of concern to India.

Now, you're worried that we are going into an aid relationship. I want to tell you categorically we have told the U.S....We think India's fears are so baseless as to be incomprehensible...Nevertheless, we would prefer not to have an aid relationship. We want...

Military sales

Q.: How would you define an 'aid relationship'?

A.: That they, under the legislation, extend to us grant aid. We said, we're interested in economic aid and we want suppliers' credits to go to the manufacturers...

Q.: But it is classified as "security assistance" under their budget...

A.: That is for their own purposes, you see. But if we go to the manufacturers and we arrange the terms of repayment and rate of interest, then all we need from the U.S. is political clearance. But we're told that in the U.S., there's no system of suppliers' credits by the arms manufacturers. We have to go to their loan institutions and borrow money. Which will be 12-13 per cent, I don't know. It keeps changing according to the going rate of interest.

So we are exploring an economic aid and military sales relationship. Not a military aid relationship — meaning grant aid.

Now, I also said, in a public statement before I went to Washington: India got highly favourable terms for purchase of armaments — 17 years' payment, two-and-a-half per cent interest, and 10 years' grace period. We like that the U.S. extend similar terms to us. Then they gave me the answer. They said, "The U.S. administration has no authority to reduce prices"...

Q.: Are you suggesting that prices were discounted...

A.: ...Yes, in your agreement...

Q.: ...Apart from low interest rates?

A.: Your agreement...although on this, I don't wish to provoke a controversy. You may publish it if you like or not...

Q.: We will publish what you say...

A.: No, no, your agreement — 1.6 billion dollars. If the same quantity and quality of equipment were bought in the international market...and considering the terms of payment that you have secured, which are so favourable over the maximum terms that would be available through commercial credits in Europe...we think your deal is worth between six to eight billion dollars. And your Jaguars, you had given out the figure, they are two billion dollars.

Needless worry

Therefore, I ask you: if we, even through these loans which will be a very big burden on us and some economic aid, buy military equipment of the order of two billion dollars in five years...and in five years who knows whether the programme can go through, it is subject to appropriation by the Congress every year...

Will that be a threat to India? You must be fair-minded. So we don't understand why our Indian friends are worried. We pay great attention to their susceptibilities. Mr. Rao is coming to Pakistan.

We are ready. If you think that we're going to arm ourselves to the teeth and become a threat to you, we're ready to undertake an agreement to say that we will not arm ourselves to the teeth.

Q.: A formal agreement?

A.: Yes. We have said we will not seek parity of armaments. We can agree on ratios, a reasonable ratio. You see, if we want to commit aggression against you, we must be militarily stronger than you. So that is impossible.

Q.: Is that the way it has always happened in the past?

A.: Of course. After all, any soldier will tell you...After all, look at all the professional soldiers, this is all very scientific. That a country which wants to attack must commence with a three-to-one superiority. Now after five years, we get two billion dollars' worth of equipment. Does it give us any aggression capability against India?

I want to tell you in reasonable talk. And I'm sure if your military men and our military men were to sit opposite each other, they would at once reach understanding. And your military men will be able to assure your Government that whatever arms Pakistan would be able to get...would not be arming itself to the teeth. And it would never enable Pakistan to try military conclusions with India.

So we ask you to take an understanding attitude. Recently, words have been used to say that the storm clouds of war are gathering...

Q.: You're referring to Mrs. Gandhi's...

Limiting factors

A.: ...What I wish to say is that in Pakistan we have no such clouds. They are peaceful skies. We are ready to enter into a discussion with India to allay mutual apprehensions. Why not try a dialogue? Is it our fault you don't want to discuss with us, you don't want to try a dialogue, and you build your fears on...no basis?

We're not getting into an aid relationship. And secondly, I will tell you...that we have said that our relationship with the U.S. must take into account limiting factors on both sides. To be a durable relationship, they must take these into account.

Limiting factors on our side are: our relationship with the U.S. must be consistent with our allegiance to the principles of the non-aligned movement. This rules out multilateral military arrangements, formal or informal. They...

Q.: For the region, of any kind?

A.: Of any kind. For the region, naturally. We will not be drawn into NATO (laughs) or some such thing!

Q.: Okay.

A.: There is no question of giving any bases. To be fair to the Americans, they have told us that all this talk in the press about a 'strategic regional consensus' does, in no way, represent the thinking

of the Reagan Administration. It is based on ideas put out by various people and press speculation, stories. They said, 'we would never think of asking you to give us bases. Your non-alignment we consider to be important to the peace and stability of the region. And we have admiration for the way you have conducted yourselves and tried to steer the non-aligned movement towards true non-alignment'.

We made it clear to them we're committed to the positions of the Islamic Conference on the Palestine question, on the Middle East. We would not be in a position to support any 'Camp David' or some other 'peace' process. We support the Arab cause. And on the question of Jerusalem, our position is well known.

The U.S. Administration have assured us that they do not want to involve us...or, to use your Foreign Minister's phrase, to be 'sucked into' these things. You see, we want to build a new durable relationship taking into account all these limiting factors. And a relationship consistent with Pakistan's non-alignment, and the positions to which it is pledged as a member of the Islamic Conference.

Gulf's security

We also told them that on the question of the Gulf, we are committed to the Mecca Declaration which says that the security of the Gulf and the safety of its sealanes is the exclusive responsibility of the Gulf States. So we cannot support any proposal put by one superpower or the other superpower for the security of the Gulf. We feel that if the Gulf States guarantee the uninterrupted flow of oil, then all the global interests would be, should be fully met.

And there's no reason for superpowers to come and inject their military presence in the region in order to 'protect' it. Because there will be a danger. If both come in, then there is a danger of confrontation. Or there would be a danger of mutual accommodation over the heads of the regional States...

Q.: Here, unless I'm cutting off your train of thought, it might be relevant to raise this concern with you. Now you have dwelt in detail on your position — as a member of the non-aligned community, as a leading power in the Islamic Conference, your own bilateral relations with India, as you see it. I'd like you — if you will — to sit back and look at the U.S. role in this...looking at its overall record.

You point to Afghanistan. But given the militarisation on the part of the U.S. of the Indian Ocean and Gulf region...regardless of what India or Pakistan might went to do, isn't there a sucking in effect? Isn't there something which is tension-raising?

A.: Not at all. As far as Pakistan is concerned, what the U.S. is going to do vis-a-vis the Soviet Union as far as our position is concerned as to the region of the Persian Gulf, we have a say. We're not a Gulf country, we will support the positions taken by the Gulf States. We are clear about it. And we have been assured in these talks that the U.S. fully respects Pakistan's position as a non-aligned country. They desire nothing more than that Pakistan should strengthen its security interests...

Q.: But does not their military activity, their considerably enhanced and strengthened military activity cause concern?

A.: Considerable military activity where?

Q.: In the Indian Ocean and Gulf region.

A.: You know they have concentrated their forces in the mouth of the Persian Gulf,because of the hostages question. The hostages' question has been resolved. Now we are trying to do our best to bring an end to the Iraq-Iran war.

And we are on public record as saying that the American military presence from the mouth of the Persian Gulf must be withdrawn. We have said that — in the resolutions of the Islamic Conference, in our statements, my statements.

Now, the question of the Indian Ocean had best be tackled under the auspices of the United Nations. There was a proposal for a world conference.

Blow to detente

I'm afraid that the Soviet military intervention in Afghanistan has poisoned the world political atmosphere. It has inflicted a blow to detente and it has retarded the prospects of Strategic Arms Limitation Talks. It has led to the determination on the part of Western countries to (what they call) modernise their theatre nuclear weapons. And so on.

What we envisaged step by step is that if we improve our relations with the Soviet Union, and I said on the basis consistent with our non-alignment, recognising the limiting factor...we will persist in our policy of seeking a political solution of the Afghanistan situation through the intermediacy of the Secretary-General and his Special Representative.

Our position has in no way changed. We came under great pressure from all sides not to undertake a dialogue even on the basis of non-recognition. But we maintain our position. The moment Iran agrees to participate, we will have a bilateral conference...

Q.: Would not that be putting a very 'high', difficult condition, given the attitude of Iran? Couldn't Pakistan take a positive step by itself?

A.: We can take the step through the intermediacy of the representative of the

Secretary-General. If you mean we have to sit across the table, that will not be possible. Why, of course, we do not want to go against the wishes of so many countries of the world which are supporting us. We do not want to isolate ourselves.

But the Secretary-General's representative can go to Kabul, come to Islamabad, practise such diplomacy...

Q.:Which he did recently...

A.:It was only the beginning, and an encouraging step forward has been taken, in that Kabul has accepted the good offices of the Secretary-General.So this can continue. But we feel that it's not impossible that Iran will participate. You must make allowance for the fact that Iran is at war with Iraq, that their whole time and energies are absorbed in this war. That also there is an internal unresolved political situation within Iran. So we've had talks with them. We believe they understand the situation better. But we need to have this communication. We would hope that the Secretary-General's Special Representative will go to Iran.

Meanwhile, there is nothing to prevent him from trying to advance. We would be carrying on a dialogue through his intermediacy and not across the table.

Q.:You think that is quite satisfactory given the present constraints?

Common elements

A.: No, for instance, see what the Islamic Committee of Heads of State. It went to Teheran, it went to Baghdad. It made shuttle trips, came forward with a very good peace plan — ceasefire, withdrawal, the reference of Shatt-al-Arab to a committee. And we provided for observers. We provided for a commission to go into the question of sovereignty over Shatt-al-Arab. A commission to investigate the responsibility for the war. And then a peacekeeping force to ensure the freedom of navigation in Shatt-al-Arab pending settlement of the issue between Iraq and Iran. And we were all ready to come with our forces. We even agreed to earmark them, we agreed on financing.

The result is that although neither side has fully accepted these proposals, both want us to continue with this effort. So we have made very encouraging progress in studying the respective positions and coming forward with something we think is practical and pragmatic and which would bring about a quick end to the war.

There are great possibilities provided the will is there to cooperate, and there is will on our part to cooperate with the representative of the Secretary-General. We have said our stand will be based on the November 20 resolution of the U.N. General Assembly. The Soviet Union doesn't accept the resolution. Well, we don't want to quarrel with that. We will base our stand on that resolution, the Soviets or Afghan authorities can say they take their stand on the May 14 proposal. There are some common elements. Then the Secretary-General's representative would try to bring the positions close.

[2 May 81 p 8]

[Text]

QUESTION.:So, to sum up. Your position now is that it remains what it was. (Mr. Shahi nods) And has responded to the specific problems of Iran. And therefore you are putting all your emphasis on the Secretary-General's intermediacy or representation through him...

Answer.:Yes.

Q.:And you remain committed to some form of exchange, however indirect, with the Karmal regime as a party, as a political party or a force that has to be reckoned with?

A.:That is being accepted.

Q.:That remains...

A.:That, yes, we will...The point is that without Iran we won't sit at a conference table with the representatives of Babrak Karmal even as a political party. But there is no impediment to a dialogue with the opposite side as representing a political party and ourselves through the personal representative of the Secretary-General.

Q.:You see no obstacle or no impediment brought against this by either the U.S. or the Soviet Union?

A.:I think the encouraging factor has been the Soviet Union has not objected to the appointment of a personal representative. He has been received in Kabul. And we hope he can go with the Secretary-General to Moscow early next month.

And as for the U.S., they know our policy is clear, we have enunciated it publicly. We have stood firm against criticism from various sides — from our closest friends — and we reiterated our policy in my talks in Washington.

Q: Mr. Shahi,let me ask you about another aspect of your Government's policy towards Afghanistan. Recently, Mr. Ronald Reagan made the not very subtle suggestion that the U.S. funnel arms into Pakistan for the Afghan resistance...

A: I was told that it was an off-the-cuff remark. I have made it clear that Pakistan would adhere to its position. We do not want to get involved in this. And there was no challenge to our position. Of course, some Congressmen want Pakistan to commit itself to such a role. You know that the U.S. people speak out freely. But our policy has been accepted.

Q: Would you say your Government considers itself bound by the formulation in the New Delhi non-aligned declaration that has two elements — a call for withdrawal of foreign forces and respect for the principle of non-intervention?

A: Yes. We want the solution to be on the basis of the right of the Afghan people to self-determination.

Q: Mr. Foreign Minister, let me ask you about your reported arrangement with Saudi Arabia...

A: We have a training mission in Saudi Arabia. But they are all engineers, technicians, signalmen and so on. They are there to provide administrative and such types of support. This talk of Pakistan sending a division to Saudi Arabia is false...our relationship will be strictly bilateral and we have made it clear there will be no arrangement with the U.S.

What I said earlier can be given a slight twist, and you have this story! I said that if we could have some financial assistance, we could be more at ease. It was reported (by a Syrian journalist) that I said: "If Pakistan is given upto five to seven billion dollars, we can become the policeman of the Persian Gulf"...We don't want to become a policeman. We want to maintain our independence. If others consider us important to the stability and peace of the area, they are welcome to help. But from us, there will be no *quid pro quo*...

Q: Thank you. If I may take up very quickly specific questions related to what you said earlier about buying arms, about 'legitimate' security concerns and so on. The question has been raised in India...They are cognisant of your argument that it is a move to 'defend' Pakistan...and here comes the grey area. Is it against the possible fall-out of the Soviet presence in Afghanistan? If that were the case, they are raising the question: how important is the task of improving bilateral, State-to-State relations with India.

There is, on the one hand, the reason given which makes your security concern particularly 'pressing' or 'urgent', namely what has happened in Afghanistan. As against that, you have the impact on the military balance in South Asia, specifically between Pakistan and India...

A: I don't think there is any impact on the military balance. I say, let us discuss this question...whether the acquisition of arms on the scale that we have in mind will have an impact. You assume it will have an impact. We don't think it will. So why not let us sit down down across the table and convince each other?

Q.: I have a related question. It is also contended in India that the types of weapons you are seeking are basically offensive in character. They are seen in Indian strategic thinking, even in articles by military personnel, as basically offensive in character. And not at all suited to the 'defence' of your western front. Given the deployment that both countries, for whatever unfortunate historical reasons, have...on your eastern front, isn't there — whatever the intention — a danger of the kind of weapons you are seeking being attracted to this front?

A: We have committed ourselves to no confrontation, to non-use of force under the Simla Agreement. Now, you see the types of weapons we have in mind to purchase, are they offensive weapons?

Q: Yes?

A: This is not so. This again should be a matter of professional military judgment, not what you say or I say. So why can't our experts sit down and see if certain types of interceptors are offensive or defensive. But there's no question your 200 Jaguars are offensive weapons. So India should not be unreasonable and say, "I will have overwhelming offensive capability. Pakistan should not even have some offensive capability" That is one question.

Secondly, I think the difficulty in both countries is that we are only told of Indian power and Indian deployment and you are told only of Pakistan power and Pakistan deployment. There again, I think much is known. Because I think you have all your cantonments along our border. And deployment...much of your strength is known to us. And our strength is known to you.

So the question that you have raised, I think can easily be resolved and fears allayed to mutual satisfaction if there is a sincere...dialogue between us.

Because what is the best policy for a country? A friendly country. I don't want to go into this point. I think we face such an entirely new qualitative situation that we need to make mental adjustments. And the first thing we've got to do is to reassure each other. Because old syndromes are revived and we must guard against this.

Let us talk to each other and convince each other. Because what you possess and what we are going to possess...Will it represent a threat to you? If so, how we can so deploy our respective armaments in order to reinforce mutual assurance.

Q: Could you sketch for us how you see the purpose of the Indian External Affairs Minister's visit to Pakistan? What could be achieved?

A: I think if it contributes to allaying unfounded apprehensions, it would be a great success. And we are ready to talk to him frankly and sincerely, as we've always done.

Q: Mr. Foreign Minister, let me put to you a question which has perhaps been put bluntly before. The question is often raised in India and elsewhere...the U.S. comes to this question of Afghnistan with its own angle, it has a particular set of

policies. Its contention is that the present situation in that region is so "tense", so "special" that "we have to resort to these steps in relation to Pakistan". It is that Pakistan must be built up as a power that will be able to "stand up" to "pressure" or "threat" (or whatever the word) that has arisen after the Soviet Union moved into Afghanistan. The question asked to Pakistan, often bluntly, is: Do you seriously believe you will be able to counter the overwhelming military capability, the power, the deployment of the Soviet Union...

Theoretical fear

A.: This is a purely theoretical question. It is based on theoretical fear. We don't believe that the Soviet Union will launch a massive military attack against Pakistan. Because if it does that, then the situation in that kind of event can precipitate a truly global crisis.

What is relevant is a limited attack. And even that limited attack will be undertaken with much more modern weaponry than what Pakistan possesses. What if MIG-23s attack us? And the scale of the purchase we have in mind is only to meet a local attack. In these days of inflation, how much military equipment does two billion dollars buy? How much does it buy? We have to purchase at market rates...

Q: But we are told that apart from FMS (U.S. Foreign Military Sales) credits, you're also interested in commercial transactions which would be facilitated through other resources. And in that connection you've read the reports about Saudi Arabia...

A: My friend, don't worry about it. Two to three billion dollars over five years is not going to make any difference.

Q: That's the range you're talking about. Thank you.

A: You have already procured 10 billion dollars' worth...Why are you worried about it?

Nuclear weapons

Q.: May I get your thoughts on the issue of nuclear non-proliferation? You have already mentioned the U.S. response, which you considered unwarranted, to your reprocessing arrangement with France in an earlier period. Now, there seem to be common elements in India's and Pakistan's positions. They are rather well known. But there is also talk about developing a 'nuclear strategic capability — on both sides, of course...

A: On your side. Because you're turning to rocketry. You're close to the Soviet Union. You've already put something into orbit. We haven't even started...

Q: Let me ask you this question, Mr. Shahi, if you would care to respond to it directly. You mentioned that reprocessing...When you enter into that arrangement, there is no problem. Now Pakistan has no way of using enrichment, enriched uranium in the near future...

A: Excuse me, we have. We're going to go in for a power water reactor. And all the uranium we can enrich will be barely sufficient for that reactor. Six to eight hundred million dollars...We delayed this because we had some difficulty in raising finances...You know the cost of nuclear power stations has been going up. We have plans for a nuclear power reactor based on enriched uranium. This is what we are going to do.

The U.S. says, 'your programme is a threat, you open it for inspection'. We say, 'don't be discriminating'. They say, 'give us an assurance'. We have given them an assurance that we are not engaged in the manufacture of nuclear weapons, that we are not conceiving aid for this programme from any source. And I even told them that the question of a peaceful nuclear explosion is also not a foregone conclusion. When and if we attain the capability, we will take into account all the various factors. Let us wait and see what the Committee on Disarmament does on peaceful nuclear explosions.

I'm told that the three nuclear powers — the Soviet Union, the U.S. and the U.K. — have drafted a protocol on these nuclear explosions. And the other countries — Argentina, Brazil and others — said: Why should only the nuclear weapons powers have the privilege of carrying out nuclear explosions? So we may have a regime for peaceful nuclear explosions and that is something in the future.

But we do not have a nuclear weapons programme. I challenged Mr. Vance (Mr. Cyrus Vance, former U.S. Secretary of State) and I challenge anybody today: produce any evidence. It's not enough to say, 'you're engaged in this, you're suspected of this'. You have so much intelligence capability. Produce some evidence - before us and the world — that we are engaged in manufacturing nuclear weapons. But if you charge us and accuse us and say we've got money from Col. Qadhafi...it is totally false. I said, 'all right, if we got this money, produce some evidence'.

So, you know, they are making these accusations and I'm sorry to say that in India it is assumed we are engaged in manufacturing nuclear weapons. And, therefore, India must do it.

We're worried now that you're going to carry out some tests. If we don't say anything, it is again not to enter into a controversy. But what have you to fear?

And I can tell you categorically we're not engaged in the manufacture of nuclear weapons. About nuclear explosions, we shall see if and when we get the capability. We will find out what international regime is envisaged. And we have told you we're ready to talk to you, to exchange mutual assurances. If you want, let us agree to

reciprocal inspection — if you don't agree to international agreement. And I say, all right, even without inspection let us engage in a binding declaration not to manufacture nuclear weapons. What more can we do? Short of saying, 'you come and inspect us and you will not let us inspect your facilities'...

Q: Nobody would make that demand, or take that unreasonable position.

A: Short of that what more you want us to do, we're ready to do.

Trade relations

Q.: Thank you. Some disappointment has been expressed in India over the loss of momentum in the development of trade relations, cultural,people-to-people contact, without assigning blame...Let us note the feeling that the inhibiting factors seem to have gained the upper hand. Naturally, people in India look to Pakistan to produce other results. How would you see that? Do you see any specific problems on that front?

A: There are some problems. Because you know we have a nascent industry and certain elements are worried about Indian competition. And we have engaged in a dialogue for a long time and there was a technical team to come from India. But the real difficulty is that there is nothing that India can buy from us, it seems. Except it's bought some fuel oil.

Therefore, this is the problem. But we don't think this should be made into a political issue and a test of our willingness to continue with normalisation. I don't think that this should be brought in. It should be approached on its own merits. And on this, considerable discussion has taken place and there has been considerable meeting of minds. Our contention is that we have 412 items on the, open list for imports. India has a very small list...So there are technical problems.

Cultural and other exchanges have taken place. How many visas...you know the number of people who are going and coming back...15,000 visas are being issued by us...and on your side, you have the figures, they are no less. There was some hitch about this, because India didn't give sufficient foreign exchange to its visitors to Pakistan.

There have been considerable cultural exchanges. These can all be done. But the point is that when the political climate becomes adverse, it has its effect on all that. So the first thing to do is to talk in terms of permanent peace between India and Pakistan.

Again I say you may rest assured there is no danger to India from Pakistan. That anything that we do to build our relationship with the U.S. naturally, we don't want the U.S. as an enemy. I mean, we can't but deal with the superpowers, but we do not want a close embrace...

Ram :Thank you, Mr. Foreign Minister, for responding to these questions in detail.

EDITORIAL SAYS FREEDOM IS NEEDED TO FIGHT ANTISTATE ELEMENTS

Lahore NAWA-I-WAQT in Urdu 20 Mar 81 p 3

[Editorial: "Give Freedom to Friends and People Loyal to Pakistan"]

[Text] Just because the patriots of Pakistan are keeping quiet should not be taken to mean that they are weak. Should the integrity of Pakistan be threatened, they will not remain inactive. They love Pakistan above everything else. Politics comes later. These are the words of a distinguished tribal leader, Sardar Mir Taj Mohammad Khan Jamali, of Baluchistan, who said them in Quetta. He said that to meet the threat posed by the activities of the anti-Pakistani elements, all rightwing parties whose activities are banned have been holding talks and very soon will unite and form a common front against them. The unity that Mr Jamali mentions as being under consideration has also been given clear expression by Pir Sahib Pagara, who also spoke of talks regarding the establishment of such union.

The lawlessness and disturbances that took place after the grief-striken victims of revenge established a front in Karachi and the conspiracy plot of the hijacking clearly unveiled its purpose provide all the justification necessary at present to effect the unity of the patriots of the country and the supporters of the ideology of Pakistan. This in itself is a satisfactory thing--that this need is not only felt but that necessary steps and talks are also taking place for its implementation. But freedom of thought and expression are also required to do this, and the ruling party should not further delay reviewing this freedom.

The enemies of freedom and of the solidarity of Pakistan are black thieves (in different colors and styles). Therefore, their way of action can spin around the axes of conspiracy, treachery and terror. So they have chosen to work underground, whereas Pakistan and its patriots, by their nature, are not like this, because loving your religion and country is not a crime that must be expressed and pursued in secrecy. It is a well-known duty that should only be performed in the open.

President Gen Zia-ul-Haq, after attending the welcoming ceremony for the freed hijacked hostages and crew members in Peshawar, told the press that Pakistan is an ideological country and the negation of this ideology should not be permitted. When and how this ban might be implemented, he did not say at that time. There can be no denying the fact that all those people working for the betterment of the state should be, within the bounds of law and ethics, be given a chance to discharge their duty. The uncertainty and terror that the antistate foreign culprits are trying to create, and which the president also referred to, can be effectively countered by patriotic Pakistanis. In this respect, the performance and promptness of the

administrative machinery is such that the hijackers have already struck a full blow and from that the details of their criminal records are now emerging, when they are already out of the reach of the law. Anyhow, with all the antistate activities that their comrades are involved in, besides activating a more active and responsible administration there is another basic need that those people in Pakistan who want to see neither events like those Afghanistan nor conditions like those in Iran should be kept well aware of--the determination and activities of the anti-Pakistan elements. It is an educational type of conscious activity that the patriotic quarters of the country can only perform under freedom of speech and thought. Enemies and traitors have undoubtedly already been unveiled, but to counteract the conspiratorial activities taking place outside the country, it is essential to gain the confidence and help of the sincere and devoted people of this country, and this can only be achieved by creating an environment of freedom, not suppression. The patriotic unity that Mr Jamali has referred to can also come into existence by including it in freedom of movement This unity cannot take place by victimizing both the enemies and faithful under the same restrictions. They can also consider these restrictions as reflections on and lack of confidence in their sincerity and faith. This is food for thought for the president and his associates who are most accountable to the people through their control of the administration of the country.

PAKISTANI COMMUNISTS, JOURNALISTS ATTEND SOVIET, OTHER RECEPTIONS

Lahore CHATAN in Urdu 23 Mar 81 p 27

[Article by N.R. from Islamabad: "The Presence of Pakistani Reds in the Functions of the Russian Embassy"]

[Text] Islamabad is the national capital, and so all the countries' embassies are located there. Because of this, there are always diplomatic receptions taking place. On occasions such as Independence Day, Defense Day and National Day, when foreign ambassadors are invited to a reception, people from Rawalpindi and Islamabad are also present. At certain diplomatic receptions, "special faces" are seen representing people not only from other walks of life but also lines of federal capital journalists who visit certain embassies late at night in quest of drinks. Certain busy "pretty faces" also seen at diplomatic receptions do not belong to a particular walk of life but are always there at every reception, making contacts with ambassadors, wherever drinks are served.

Dear readers! This week our topic of discussion is the journalists of Rawalpindi and Islamabad and the embassies. A few days ago, the news published in the paper unveiled some journalists of Rawalpindi and Islamabad who were arrested on their way home by the police because they were intoxicated. What happened was that about a week or so ago, a reception took place in the Russian embassy in connection with Defense Day. At that reception, many foreign diplomats were invited and a great number of Pakistani reds participated. There was also a group of journalists whose mecca is Moscow. Some journalists were intoxicated and when two of them were seen weaving along the Islamabad streets, the police arrested them. The Rawalpindi newspapers did not publish their names and so we will not, although they do not deserve any concessions. It is worth noting that although with the exception of the socialist block more or less all the countries including China did not participate in the Russian Defense Day reception because of the Russian invasion of Afghanistan, a great number of Pakistani reds did actively participate. Embassy vehicles were busy transporting communist invitees to and from the airport.

The 'wine loving; journalists' friends struggled to free them. Nevertheless, the government made it clear to them that no one is superior to or above the law. Talking to the newspaper correspondents in the School of the Army Association, President Zia said that every individual was equal in the eyes of the law; they may be journalists, but they deserve punishment if they break

the law. Now it has become known that they have been released. Their fellow journalists have also become careful. Now they will not dare to walk along the Islamabad streets while they are intoxicated. It is worth noting that a few months ago, the government of Pakistan issued a circular requesting that guests, especially Pakistani guests, not be served drinks at embassy receptions. Many countries conformed to that directive, but some embassies totally ignored it and by taking advantage of diplomatic concessions continued to serve wine. Social circles in Rawalpindi and Islamabad have brought these matters several times to the attention of the Pakistani government and have demanded strict action against the defaulters who, for the sake of wine, talk nonsense against Pakistan in front of the foreign ambassadors. The new federal cabinet has been formed and patriotic circles rightfully expect that necessary actions will be taken in this connection.

Faiz Ahmed Faiz's 70th anniversary was lavishly celebrated at the Hilton in Lahore. In imitation, Halqa-e-Arbab-e-Zoq [literary circle] also announced a celebration of Faiz's anniversary in Rawalpindi. The said Halqa-e-Arbab-e-Zoq has been using the auditorium of the Pakistan National Center for quite some time but was not allowed to use it for the Faiz anniversary; so the press club was elected for the ceremony. During that occasion, an employee of the Literary Academy was seen very actively involved. Prof Fateh Mohammed Malik presided over the ceremony. The guest of honor was Mrs S. Faiz. The communists had invited Mrs Faiz as the guest of honor to the Faiz anniversary celebration in Lahore, too. Dr Mohammad Ayub, Prof Sajjad Haider Malik, Prof Khuaja Masud and Sarmad Suhbai expressed their faith in Faiz. Prof Khuaja Masud is a strange character. The news that he published said: "On the occasion of the 70th anniversary of the great poet of the present day, Mr Faiz Ahmed Faiz, a memorial celebration was held at the local press club under the management of Halqa-e-Arbab-e-Zoq." The said newspaper reporter, mentioning Faiz as the great poet of the present and describing the gathering of a few people for a memorial celebration, does not make it known whom he wants to please. In reference to the so-called memorial celebration, let me bring something to the attention of the government. While celebrating Faiz Day, vehicles of the Pakistan National Council of Arts were busy transporting people to the gathering. High officials of the council were present at the airport to recieve Mrs S. Faiz.

PAPER WONDERS IF VIOLENCE IS BEING ACCEPTED AS NORMAL

Karachi JASARAT in Urdu 13 Mar 81 p 5

[Editorial: "What Is Happening?"]

[Text] At a time when all the various sections in the country are condemning the air pirates and praying for the safety and security of the hostages, certain quarters inside the country are preaching violence and are trying to prove that the atrocities committed on the hostages conform to the normal everyday conditions of life in Pakistan. We have before us an agenda of the subjects for debate at the NED Engineering College in Karachi. The subject for debate on Wednesday, 18 March, at 10 am is, "Violence Is the Only Solution." The same subject will be debated in Baluchi on Thursday, 19 March, at 10 am. On Sunday, 22 March, at 10 am, the subject debated in Urdu will be "We Are All Hostages." A mere glance at these subjects is enough to point out that the main idea behind these debates is to pave the way for violence and to organize public opinion to favor violence. It is said that the atrocities that the hostages were subjected to were not an out of the ordinary occurrence but a condition of everyday life that we are all undergoing. Therefore, it should not be taken that seriously. We want to know if the preaching of violence is being declared just. In no society in the world, whatever its ideologies and beliefs are, is the preaching of violence permitted. If it was lawful today, then tomorrow looting, mugging, murder and kidnaping would also be declared lawful and schools would open for professional training in these fields. After all, who are these people who are providing all the opportunities to a selected group practicing violence? Will the governor of Sind feel it necessary to attend to it?

MOSCOW SENDS RED GREETINGS TO SOCIALIST AGENTS IN PAKISTAN

Karachi JASARAT in Urdu 13 Mar 81 p 10

[Article by staff reporter concerning a letter addressed to former General Secretary of Karachi University Rafiq Patel from Lumumba University]

[Text] Circulation of foreign ideology and support for the influence of a superpower is openly pursued in educational institutions throughout the country. In this respect, student union members are being instigated to bring about communist revolutions and to follow the path of Afghanistan. Recently, literature from a superpower conveying red greetings was circulated among communist agents.

In this context, Mr Rafiq Patel, former general secretary of Karachi University and a so-called progressive, received a message from Patrice Lumumba University in Moscow that says: "Socialist countries' success in economic and political fields, and the national peoples' revolution in the neighboring country of Afghanistan, gave new life to the struggle of the depressed people of Pakistan. We . . . look with respect to the joint struggle of the progressive unions. We understand that the working peoples' front to oppose imperialism and achieve democracy is the most important need of the time." It is worth noting here that Patrice Lumumba University is quite famous for providing a communist education for Asian students from backward countries through scholarships that inspire revolution.

CRIMINALS FROM INFLUENCIAL FAMILIES SAID TO GET SPECIAL TREATMENT

Lahore CHATAN in Urdu 13 Apr 81 pp 6,39

[Article by Tanweer Shahid: "Why Do Criminals Belonging to Influential Families Escape Punishment?"]

[Text] It is neither an undeserved compliment or flattery for a person in authority nor a desire to overpraise or placate the current government, but it is a fact to say that since attaining power, President Gen Zia-ul-Haq has taken some steps on political and social levels to eradicate hooliganism in Pakistan. This achievement is undoubtedly praiseworthy. So far, those convicted murderers who have been executed include former prime minister Zulfiqar Ali Bhutto, Ghias-ud-Din, alias Ghiasa, and two of his accomplices, Wajid, alias Pappu, and Naeem Akhtar Shah and various other people. When there was a delay in carrying out the death sentence against the former prime minister, people generally felt that as some big powers and friendly countries had recommended mercy for him, he would not be executed by President Zia. Despite external and internal pressure, however, he did carry out Bhutto's execution. The current government has imposed death sentences against several people for serious crimes. The most recent incident against acts of terrorism, murder and gang robbery involves death sentences for notorious criminals Ghias-ud-Din, alias Ghiasa; Wajid, alias Pappu; and Naeem Akhtar Shah. All three have attained their final destiny. Another criminal member of this gang, Arshad Mahmud, alias Bhola, has also been arrested, and he too is awaiting his end.

Criminals should be punished for their crimes and from this viewpoint these are undoubtedly praiseworthy steps. At this stage, however, many questions of the common people remain unanswered. There are rumors among the people that the government executes only those people who are pursued personally by some high-ranking officials and who are not supported by any strong recommendation that could rescue them from the gallows. According to the people, there is hardly an example in the history of Pakistan when a person of any influential family has been punished for murder. Recently, a high-ranking official's son was arrested for car theft. The comments made by the police in this connection would never have been expected from a responsible institution. Referring to this case, the police said that he is a "spoiled child" of an influential family.

The people involved in the Shabnum case have committed more serious crimes than Ghias-ud-Din and his accomplices. The court ordered death sentences for them, but they are still alive. Why? The perception of the people in this case is

that our spoiled officials play a dual role in the enforcement of law and this perception could be correct.

It is essential to point out here that it is not easy to run the affairs of even a single house. Running a country with a population of about 80 million, while taking good care of its organization and administration based on justice, is much more difficult. The writer does not believe that the responsibility of the delay in the Shabnum case lies solely on the head of state. Surely, this situation is proof of the incapability and moral weakness of the high-ranking officials. It is worthwhile noting here that in an Islamic social structure, the responsibility for injustice or its results after all have to be accepted by the people in authority, especially the head of state. History bears witness that usually the aides and assistants to the head of state are at fault, but it is the head who falls prey to the misunderstandings and suspicions of the people. Hazrat Omar's well-known proverb, which can actually be regarded as the cornerstone of the Islamic governmental structure, is that terror, murder and dacoitism taking place anywhere in the country will have to be answerable by the ruler of the time. Hazrat Omar said, "Even if a baby goat dies of hunger on the banks of Furat River, I swear that God will question Omar as to why it happened."

Therefore, we respectfully request of our president that he investigate those high-ranking officials who are accused of criminal negligence as to why, despite the government's sentence of death, the accused in the Shabnum case have not yet met their fate, whereas Ghiasa and his companions were hanged instantaneously? After all, what is the reason behind this discrimination and criminal negligence?

According to the Islamic justice, Hazrat Ali and the Jews deserve equal treatment and according to the law both parties are liable to conviction if proven guilty. The Holy Prophet rejected the recommendation of his close disciples for Fatima, a woman belonging to a respectable Quraish family of Mecca, and her hands were severed. The Holy Prophet said that he would have ordered the same punishment had his own daughter Fatima committed theft. Therefore, when a criminal is convicted, why is there discrimination between rich and poor and high and low people in the society? Why are the people of high society and capitalists not duly punished for their crimes?

There is a general perception that people of high society avoid law enforcement by dint of their influence and wealth. On the other hand, criminals belonging to a low class or who are unable to approach higher authorites are punished.

This does not mean that attention should be drawn only to the Shabnum case. It is to point out a comprehensive principle. The people involved in the above-mentioned case were from influential and wealthy families. Therefore, there is a general feeling that if Shabnum forgave those people, there were motives behind it that compelled her to do so. The people who asked Shabnum for mercy (or, as it is generally felt, who put pressure on her) were influential people. Thus, an oppressed woman was forced to forgive them. If the criminals of the Shabnum robbery case were from ordinary families and she had granted them mercy, the situation would have been completely different. Therefore, it is not easy

to shed misconceptions caused by this situation. The manner in which the newspapers gave publicity to and advertised the death sentences of Ghiasa and his accomplices is also saddening. Was it not agonizing to see the frightful pictures of the hanged bodies displayed on the front pages of the newspapers? The grief of the common people is that our newspapers did unveil their horrible crimes and gave detailed information about their acts of terrorism and looting, but they failed to tell the public who was responsible for turning a school teacher and educated youths of decent families into murders and dacoits? What were the motives and factors on the basis of which civilized citizens of Pakistan acquired the role of dangerous criminals? Alas! Our newspapers had also pointed out those sinister factors of society that compel youths to commit crimes. The public's question is that after all, who were the criminal and evil-minded people who diverted them towards such terrible crimes against society? What were oppressions and deprivations that gave birth to animosity and revenge in their hearts against the society? It was essential to emphasize these factors, too. Alas! Nobody has ventured to explore the motives that caused these decent youths to be pushed into the dark alleys of crime. If an investigation is made in this connection, certainly there will be some conspicuous individuals who deserve much more punishment than Ghiasa and his accomplices. Will the law enforcement authorities pay heed to this?

INCREASES IN PRICE OF ESSENTIAL GOODS REPORTED

Lahore VIEWPOINT in English 16 Apr 81 pp 10, 11

[Article by M.A. Kamran]

[Text]

DESPITE administrative measures to keep the prices of essential goods under check, certain items continued their upward march while some showed stability.

According to figures officially available from the Punjab Bureau of Statistics for March 30, rock salt (crushed) had gone up by 25 per cent as compared to the fourth week of February. It was being sold for Rs. 1.25 per kilo. Shakkar and gur had also gone up by 5.3 and 6.7 per cent, respectively, during the period under review. Shakkar was priced at Rs 5 per kg and gur at Rs. 4 per kg. Among pulses, masoor (whole) had shot up by 16.8 per cent and was selling at Rs. 7 per kg and mash (split, unwashed) had gone up by 2.9 per cent.

Similarly, eggs shot up by 30.4 per cent and were available at Rs 7.50 per dozen against Rs. 5.75 per dozen in the last week of February. Potatoes were up by 50 per cent, spinach by 33.3 per cent, peas by 77.8 per cent, carrots 50 per cent, brinjal (round) 33.3 per cent, radishes by 50 per cent and cauliflowers by 100 per cent.

Against this, wheat atta (bag) went down by 2 per cent, desi ghee by 2.9 per cent, grams by 7.7 per cent, gram dal by 13.3 per cent (but it was scarcely available), moong (split, unwashed) 1.5 per cent, sugar desi by 20 per cent, onions by 25 per cent and tomatoes by 11.1 per cent during the same period.

Record increase

Over a year (March 1980 to March 1981), wheat atta (loose) went up by 2.9 per cent, maida by 6.1 per cent, rawa and suji by 4.2 per cent, desi ghee by 10 per cent, butter (Nurpur) by 26.7 per cent and 18.8 per cent respectively, for packing of 200 and 100 grams, rice Basmati by 20 % rice broken by 16.7 per cent, grams by 140 per cent, gram dal by 160 per cent, dana (cattle feed) by 122.2 per cent, masoor (whole) 40 per cent, masoor dal by 75 per cent, mash (whole) b 16.7 per cent, mash (split, unwashed) by 33.3 per cent, mash (split, washed) by 45.4 per cent, moog (whole) by 9 per cent, moong (split, unwashed) by 23.8 per cent,

moong (split, washed) by 27.3 per cent, rock salt (crushed) by 25 per cent, double roti by 33.3 per cent, chicken meat by 14.3 per cent, mutton by 20 per cent, beef by 25 per cent, milk by 16.7 per cent, potatoes by 200 per cent, spinach by 60 per cent, carrots by 27.1 per cent, radishes by 20 per cent, cauliflowers by 77.8 per cent, kerosene oil by 38.9 per cent per bottle and 36.4 per cent per litre.

During this period, maize went down by 25.6 per cent, sugar desi by 33.3 per cent, shakkar by 27.9 per cent, gur by 33.3 per cent, turnips by 15.3 per cent, tomatoes by 28.1 per cent and brinjal (round) by 2.9 per cent.

The prices of mutton and beef stabilised at Rs. 22 to 24 per kg and Rs. 9 to 10 per kg. The controlled price for mutton was Rs. 18 per kg that of beef Rs. 9. Chicken was sold at Rs. 24 to Rs. 32 per kg and fried fish was priced at Rs. 32 per kg and raw fish was also being sold at Rs. 12 to Rs. 16 per kg.

Milk prices also rose in some areas of Lahore from Rs. 3.50 to Rs. 4 per kg on the pretext of cattle feed prices having gone up.

BRIEFS

TERRORIST RECRUITING CENTERS -- Government authorities have started working to bring to task recruiting centers that train Pakistanis in subversive and terrorist activities. The authorities are gathering the necessary information. According to reliable sources, the government has been informed about some recruiting centers responsible for training people in subversive activities in the country. In those centers, Pakistanis were being sent abroad on the pretext of taking jobs. In this respect, facts are being gathered about the rest of the recruiting agencies, too, so that it can be proven that Pakistanis were sent to an African country specifically to be trained in subversive activities and so that the necessary action can be taken against recruiting agencies that recruit people for subversive activities. OPPOSITION BLOCS FORMING COALITION

Manila PHILIPPINES DAILY EXPRESS in English 1 May 81 pp 1, 2

[Article by Mel Parale and David C. Borje]

[Text]

A NEW umbrella organization of opposition groups which do not share the ideals of the United Democratic Opposition is now being formed to field a common candidate who could give President Marcos a good fight in the June 16 presidential polls.

About 100 opposition leaders supporting the movement will convene in Cebu City on Sunday to work out an agreement.

Prime movers met in an urgent session yesterday in Manila and came up with provisional general principles as starting point for the envisioned political compact.

* * *

ASSEMBLYMEN Filemon L. Fernandez, one of those present in the Manila meeting, said the Cebu convention on Sunday may also pave the way for the reunification of the warring factions of Pusyon Bisaya.

Convention organizers said elements identified with other opposition groups -- notably the Bicol Saro, Nacionalista Party, Mindanao Alliance and the Concerned Citizens Aggrupation -- were set to join the convention.

Andres Corominas, head of the Cebu United Opposition, said a search is on for a common candidate to be drafted by the emerging opposition union to oppose the President in the polls.

Organizers of the movement expressed optimism that they will find the "worthy candidate" before the nomination deadline is over. Under the law, political groups have until May 16 to nominate their candidates.

* * *

THE CEBU convention is expected to be capped by the election of a new set of officers of the strife-torn Pusyon Bisaya, an event regarded by observers as a prelude to the Pusyon reunification and mobilization for the polls.

Vying for the Pusyon overall leadership were Batasan Minority Floorleader Mariano R. Logarta, Assemblyman Alfonso N. Corominas Jr. and Hilario Davide Jr., insiders said.

Former Con-Con Delegate Casimiro Madarang Jr., Pusyon Bisaya chairman, signified intention to stay away from the race.

* *

AT THE Commission on Elections, the ruling Kilusang Bagong Lipunan beat five other political parties yesterday in the contest for submission of complete evidence for accreditation by the Commission on Elections in the June 16 presidential elections.

Under Batas Pambansa Blg. 126 (former Cabinet Bill No. 44), approved by President Marcos the other day, only two political parties or groups shall be accredited in accordance with certain rules embodied in the law.

Because the KBL petition appeared to be supported by evidence tending to show that the party possesses all the relevant factors and standard for accreditation, the Comelec is expected to rule favorably on the KBL petition not later than Monday.

Chairman Vicente M. Santiago Jr. said the poll body, under the law, is mandated to decide any petition for accreditation within three days from the submission of the case for resolution. The three-day period ends on Monday.

* * *

AT THE HEARING yesterday conducted by the Comelec en banc, the five other political parties -- the Nacionalista Party, Pusyon Bisaya, Bicol Saro, Federal Party of the Philippines and the Sovereign Citizens Party -- asked and were granted until Monday to submit documentary evidence for accreditation in compliance with the law.

During the hearing, Commissioners Luis L. Lardizabal and Jaime Opinion questioned the capability of the Sovereign Citizens Party to conduct a nationwide drive.

Opinion remarked that the founder, president and presidential bet of the Sovereign Citizens Party, Lucio Ebraham Hingpit, won only 6,272 votes out of the 7,759,460 votes cast or .80 percent for the Batasang Pambansa seat in the April 1978 election in Region 10 (Northern Mindanao).

VIRATA REPORTEDLY FIRST CHOICE FOR PRIME MINISTER

Manila PHILIPPINES DAILY EXPRESS in English 9 May 81 pp 1,6

[Text] Finance Minister Cesar E. A. Virata appears to be the first choice of President Marcos as Prime Minister if the President wins the June 16 elections under the new semi-parliamentary setup.

The possible nomination of Virata was revealed by the President in an interview with ASIAWEEK, wherein he said that Virata is the probable choice as chairman of the Executive Committee, a constitutional body that assists the President in running the government.

Virata is now chairman of the Cabinet Standing Committee, which was created by the President not only to assist him in the exercise of his executive powers but also to train his successor.

The President earlier said the present members of the Cabinet Standing Committee will automatically be members of the Executive Committee. Aside from Virata, the Cabinet Standing Committee is composed of Industry Minister Roberto Ongpin, defense Minister Juan Ponce Enrile, Local Government Minister Jose Rono, Economic Planning Minister Gerardo Sicat and Budget Minister Manuel Alba.

"He (Virata) and the existing members of the Standing Committee will be the ones running the government after I have taken my oath, if I win the election. And that would be after June 30," the President told ASIAWEEK.

The Prime Minister, under one of the constitutional amendments approved in the April 7 plebiscite, shares the executive functions with the President and is head of the Executive Committee.

The President said if he is reelected he will train second and third echelon leaders through the Executive Committee.

"The first mission is to train the second and third echelons of leaders--younger than my generation--while training a group that can immediately take over if, God forbid, anything untoward happens to me," he said.

"These leaders have to learn to be both wise and practical. They have to be politicians as well as technocrats. They have to be wordly as well as fresh and vital. This I consider of primary importance. There must be leaders who

are acceptable to the people, who understand the New Society program, who are incorruptible and hardworking," the President said.

"The Technocrats have to learn to be pragmatic and acquire a common touch," the President said. He noted that Finance Minister Cesar Virata and Central Bank Governor Jaime Laya "are not backslappers. 'They will have to learn," the President said.

He added that "I would like Education Minister O. D. Corpuz to enter politics and participate in developing new leaders."

He said he would like "to draw leaders from the academic circle, and executives from the private sector."

Other points raised by the President during the interview:

--On the opposition boycott: "That's their privilege." But the question that now arises is a constitutional one: Under the Constitution and the Election Code one has to participate in this election in order to be accredited--for 1984 and subsequent elections. How do they get official candidates on a block-voting system, on a regional basis, without accreditation? They will now come before the Batasang Pambansa and ask for special privilege."

The President observed that "apparently, they (the opposition) are now trying to agree to put up a token Nacionalista candidate. If the candidate doesn't get 10 percent (of the votes cast), they will appeal to the Comelec and to the Batasan: 'You must have an opposition party, so you might as well give (the job) to us.' This seems to be the game plan."

ASIAWEEK noted that "in the Chief Executive's view, the oppositions attitude (to boycott) is attributable to rather more basic instincts: fear of losing. Unido's refusal to field a candidate, he claims, is less a moral exercise than an acknowledgement of public opinion surveys that suggest the Opposition's strongest candidate (apparently ex-Senator Salvador Laurel) would get no more than 12 percent of the votes." Marcos said he would get at least 57 percent of the votes.

--On granting general amnesty to all detainees: "It could be disastrous. We'd have to give amnesty to (Communist Party chairman) Jose Maria Sison, to (New People's Army) Commander Dante, to the members of the Communist Party central committee, to those guilty of rape, murder, things like that. I am not ready to give a general amnesty because there are many members of our society who would feel offended if I were to do so."

--On Former Sen. Benigno Aquino Jr. if he decides to return from the US: "He has to answer to the courts. He's already beyond my jurisdiction. I don't know exactly what the courts will do with him. The Supreme Court directed that his case be returned to the military tribunal. I cannot disregard that order.

The President added: "I personally have nothing against him (Ninoy). I'm willing to give him a chance to lead a normal life. As you know, I offered his conditional amnesty and conditional pardon. But he has hemmed and hawed."

--On the Mindanao problem: "We are trying to get a conference going again with Nur Misuari (the MNLF chieftain) through the Islamic Conference."

--On a supposed visit to the United States this year: "I don't know. I haven't been invited. I have not tried to wangle an invitation."

He described the US-Philippines relations as "mutually beneficial and cooperative." "There's an atmosphere of mutual respect. The Americans understand us much better now than they did before."

POWER RIVALRY SPLITS NPA, SAYS MILITARY

Manila PHILIPPINES DAILY EXPRESS in English 1 May 81 pp 1, 2

[Text] Camp Olivas, Pampanga, April 30--A rift within the ranks of New People's Army was bared here today by a ranking constabulary official.

Brig. Gen. Vicente Eduardo, PC region 3 commander, said in a press briefing that Rodolfo Salas, alias Commander Bilog, is splitting from the Communist Party of the Philippines.

Eduardo, quoting intelligence sources, told newsmen that Salas was disgruntled over the appointment of Juanito Rivera, alias Commander Juaning, to the top post vacated by captured dissident leader Bernabe Buscayno, alias Commander Dante.

Eduardo said Rivera, the NPA field commander for Tarlac, is senior in the rankings, and Salas is known to be the more ideologue and appropriate replacement for Commander Dante. Salas was third year engineering student of the University of the Philippines before he joined the NPA movement.

Salas, a native of Mexico, this province, was reported to be moving about in some western towns of this province and was believed to be meeting with other dissidents to back him in the power struggle.

Eduardo said the power struggle sort of toppled Horacio Morales, a former professor at the Development Academy of the Philippines who was reported to have been aspiring for chairmanship of the CPP.

Earlier, Defense Minister Juan Ponce Enrile disclosed that Rafael Baylosis, 35, a lawyer and former student leader of the University of the Philippines, recently took over as head of the CCP.

The revamp in the CPP and NPA hierarchy has caused a split in the loyalties of the rank and file of the two organizations according to Eduardo.--MS

MARCOS ASSURES ASSISTANCE TO NIGERIA

Manila PHILIPPINES DAILY EXPRESS in English 23 Apr 81 p 6

[Text] President Marcos, assured yesterday the government of Nigeria that the Philippines is ready to extend agricultural technology expertise to Nigeria.

The President gave the assurance to Nigerian Agriculture Minister Ibrahim Gusau, who called on the President.

The Nigerian Minister is leading a mission exploring areas of cooperation in agriculture, particularly rice production, storage, milling and marketing, and fish farming.

Minister Gusau said he was impressed by the strides made by the Philippines in agricultural production, and would like to invite agricultural technicians to help improve his country's agricultural production.

The President, briefed Minister Gusau on Masagana 99, Biyaya ng Dagat, Maisan ng Bayan, fresh and brackish water fishing, supervised credit, and blue farming or sea farming.

The Nigeria delegation included Agriculture Director O. Awoyemi, Fisheries Director B. Dada, Livestocks Director Dr J. David West, Mrs G. Samorin. E. U. Aklang and E. A. Onyiri, charge d'affaires and second secretary, respectively, of the Nigerian embassy.

Present during their call were Agriculture Minister Arturo R. Tanco, Natural Resources Minister Jose Leido Jr., Deputy Agriculture Minister Orlando J. Sacay, and Assistant Agriculture Minister Salvador Escudero III.

Later, the President also received Knut Hammarsjold, director-general of the International Air Transport Association (IATA), who paid his respects and exchanged views on problems facing the air transportation industry. He was accompanied by Philippine Air Lines President Roman Cruz Jr.

Also received by the President was Richard Thomas, president of the First National Bank of Chicago, who informed the President of the increasing investments of his company particularly in copper mining and in the Filipino contracts in road-building in Iraq. Thomas was accompanied by Panfilo Domingo, president of the Philippine National Bank, and Rodolfo Cuenca, president of the Construction Development Corp. of the Philippines.

MORO NATIONAL LIBERATION FRONT MEMBERS SURRENDER

Manila BULLETIN TODAY in English 9 May 81 pp 1, 14

[Text] Zamboanga City, May 8--Forty-five leaders of the Moro National Liberation Front (MNLF) from eight provinces in Southern Philippines have surrendered.

They are scheduled to meet with President Marcos and the First Lady of Malacanang tomorrow.

Twenty-five of the surrenderers are from Jolo, Sulu, Basilan, Zamboanga del Sur, Zamboanga del Norte and Tawi-Tawi, while 20 are from Maguindanao and Lanao del Sur.

The surrenderers were headed by "Kumander" Barawir Baranga, chairman of Patikul MNLF Revolutionary command. Barawir headed the revolutionary command after "Kumander" Usman Sali escaped from government troops after his band massacred Brig. Gen. Teodulfo Bautista and his 34 officers and men at Patikul on Oct. 10, 1977.

Among those who surrendered were three foreign-trained MNLF commanders. They are Jelene Janggay, MNLF overall commander in Siocon, Zamboanga del Norte; Aniaman Tanajalan, MNLF chief of the Mindanao Central Intelligence unit and chairman for mass media for the entire province of Basilan; and Kumander Sultan, who headed MNLF group in Lanao del Sur.

The group has a total armed followers of 794. They surrendered 501 assorted high-powered firearms and thousands of ammunition.

In an interview, the MNLF surrenderers said they decided to return to the fold of the law because they were convinced by the tangible accomplishments of the government and its effort to rehabilitate their social and economic conditions.

The surrenderers also said they came to know that the top MNLF leaders who now live in style and comfort abroad have deceived them.

"We now want to live a peaceful life and be useful citizens again," the MNLF commanders added.--Roy C. Sinfuego

POSSIBLE OIL FIND REPORTED OFF NORTHWEST PALAWAN

Manila PHILIPPINES DAILY EXPRESS in English 12 May 81 p 10

[Article by Samuel V. Senoren: "Cities Service Excited Over Tara-1 Drilling Off Palawan"]

[Text]

PHILIPPINE Cities Service Inc. may have struck oil in a well called Tara-1 off Northwest Palawan, industry sources disclosed yesterday.

Tara is located in a cluster of oil bearing reefal structures that include Pandan, Matinloc, Cadlao and Libro. It is closest to Libro which flowed 1,100 barrels of oil per day in July last year.

According to sources, Cities Service drillers were excited about a new find because of strong indications of an oil presence as the well went to its final depth of 7,107 ft.

Confirmation of the new strike was to have been made over the weekend when drillers were scheduled to conduct a drill stem test (DST). The first DST however was not successful due to some technical difficulties.

Cities Service drillers are now preparing to conduct a retest of the first DST.

* * *

THE DST will determine the properties of the rocks penetrated by the drill bit. Succeeding DSTs would enable to determine the flow rate and quality of newly discovered oil.

Sources say an oil discovery in Tara is not surprising since the well is still in an area that's considered an oil province stretching for about 50 kms. nearly parallel to coast of Palawan.

Tara is being drilled by a consortium of oil exploration companies led by Cities Service and composed of Basic Petroleum, Landoil Resources, Oriental Petroleum, Philippine Overseas Drilling and Husky Oil of Canada.

Hopefully, it could become the first oil find for the year. Last year, exploration companies made three discoveries. These were Pandan-1, Libro-1 and S. Pandan-1 which were all drilled by Cities Service.

The three oil discovery wells were among 21 wells drilled by service contractors throughout 1980.

* * *

THIS year, service contractors have committed to drill a total of 27 wells – seven onshore and 20 offshore.

Aside from Tara, three other wells are in various stages of drilling operations. They are:

- Caverna-1 – Amoco has resumed drilling and the well has reached a depth of 2,750 ft.
- Cowrie-1 – Total exploration drilled down to a depth of 4,477 ft. Preparations are underway to perform a DST to fully evaluate the engineering properties of the rocks penetrated. Target depth is 5,500 ft. although total may decide to drill further down.
- Galoc-1 – Cities Service has resumed drilling after conducting a suite of wireline logs. The well is now at 8,070 ft. out of a target depth of 12,500 ft.

STATUS OF MEDICAID PROGRAM FOR INDIGENTS

Manila PHILIPPINES DAILY EXPRESS in English 9 May 81 pp 1,6

[Text]

TACLOBAN CITY, May 8 -- The innovative Kalusugan sa Bagong Lipunan medical aid project has grown nationwide, the First Lady and Human Settlements Minister Imelda R. Marcos was informed here today.

Mrs. Marcos flew here this morning for a visit to this city and her hometown Tolosa. She was welcomed by local officials and civic leaders upon her arrival.

In a progress report, the First Lady was informed that starting with 43 MARCOS clinics in Metro Manila, the project now has 390 mobile teams in all parts of the country. MARCOS stands for Medical Assistance for the Rural Communities and OtherSectors.

* * *

THE PROJECT was launched last May 1 on the occasion of the First Couple's 27th wedding anniversary. It provides free medical treatment and medicine for the poor. President Marcos has set aside P150 million for the program.

The report said more than 2,000 doctors and nurses and 7,000 support staff have volunteered their services for the success of the project which delivers one of the 11 basic needs of man.

The MARCOS clinic in Tacloban City treated more than 489 people during its opening yesterday. Estimates are that it will exceed that number today as more people lined up for treatment and free medicine.

* * *

MARCOS clinics are also operating in the towns of Palo, Tanawan, Tolosa and Maras-Baras in Tacloban.

Upon her arrival at the airport, Mrs. Marcos proceeded directly to downtown Tacloban to inspect the progress of work on the Shrine of the Sto. Nino Heritage Museum which is nearing completion. The shrine and the imposing People's Center and Library for Leyte and Samar nearby will be inaugurated soon.

From Tacloban Mrs. Marcos motored to her hometown Tolosa. Her arrival was cause for rejoicing by the 15,000 residents who are celebrating their town fiesta. The First Lady is the town's most illustrious daughter.

* * *

MRS. MARCOS, who maintains a house in barrio Olot near the town proper, prayed in the town church and later mingled with her townmates in a seaside pavilion.

She also visited the memorial grounds of the Romualdez family where her parents, a brother and a stillborn son are buried.

The hermano mayor of this year's celebration, in honor of St. Michael Archangel, is Daniel Andrew Gomez Romualdez, a son of Gov. Benjamin Romualdez.

* * *

TOLOSA, named after the Spanish town of Tolouse, became the base of American liberation forces after the Battle of Leyte Gulf in World War II.

It was also in the town's barrio Tanghas that the famed American composer Irving Berlin first presented his famous composition "Heaven Watch the Philippines" to a Filipino-American audience led by the late President Sergio Osmena, Sr.

Mainly through the efforts of the late Speaker Daniel Z. Romualdez, and later of the First Lady and Governor Romualdez, Tolosa has become a model community in Leyte, winning prizes in cleanliness, beautification, and community development contests.

GOVERNMENT SPEEDS UP MINDANAO DEVELOPMENT

Manila PHILIPPINES DAILY EXPRESS in English 2 May 81 p 2

[Article by Norbi Edding]

[Text]

THE GOVERNMENT believes that the Mindanao problem cannot be solved by using guns, bullets and grenades but by operating tractors and road graders and setting up factories.

It believes that lasting peace can be attained in strife-torn Southern Philippines if its people are given not just the promise but the reality of a better life.

And that is why the government is undertaking a massive social and economic development program in the South which is being administered and supervised by the Southern Philippines Development Authority.

* * *

ACTUALLY, the government had been carrying out a development program in Southern Philippines even before trouble broke out shortly after the declaration of martial law.

Many of the development projects had to be suspended because of the fighting but since the ceasefire declared in December 1977 in accordance with the Tripoli Agreement, these projects have been resumed.

The Southern Philippines Development Authority, which is supervising these projects, was created on April 22, 1975. At that time it was known as the Southern Philippines Development Administration. Presidential Decree No. 1703, issued on July 26, 1980, revised the SPDA charter and changed the word "Administration" to "Authority."

An indication of the importance being given by the government to SPDA is the fact that no less than the First Lady, Imelda Romualdez Marcos, was appointed by the President as its chairman.

* * *

THE SPDA has a capital stock of P500 million and a P2-million yearly outlay for operating expenses.

The SPDA took over the functions of four agencies which were abolished: the Mindanao Development Authority (MDA), the Commission on National Integration (CNI), the Presidential Task Force for the Reconstruction and Development of Mindanao (PTFRAD) and the Special Program of Assistance for the Rehabilitation of Evacuees (SPARE).

* * *

THE REASONS for the creation of the SPDA are:

- To hasten the balanced growth of Southern Philippines and thus promote national economic, social and political stability.
- To sustain the development of the region, relying heavily on the capability of the people in the area to participate in the development effort.
- To make the region more responsive to national plans and policies within the context of national solidarity.
- To serve as the government agency responsible for starting and carrying out development projects in Southern Philippines.
- To promote lasting peace in Southern Philippines through a development program which would make the fullest use of resources, open new jobs, increase business and technical efforts and supplement the efforts of the private sector.

To these ends, the SPDA is undertaking development and business projects in agriculture, power, infrastructure, energy, public utilities, land development, manufacturing, exploration, use of natural resources and other fields and is making investments in various ventures.

FRG GRANTS LOAN FOR HOUSING PROGRAM

Manila PHILIPPINES DAILY EXPRESS in English 9 May 81 p 2

[Text]

THE GOVERNMENT'S low-cost housing program recently received a timely boost with the granting of a loan amounting to P445 million by the West German goverment.

Most of the amount will go to the National Housing Authority's Dagat-Dagatan II A/B project in Tondo.

Over 3,000 squatter families are beneficiaries of the project which is principally aimed to solving the displacement to be created by the establishment of the Manila International Port project in the area.

The loan, which was formalized by Finance Minister Cesar Virata in Frankfurt, West Germany, was extended through the Kredistanstalt Fuer Wiederaufbau (KFW), the West German government's principal development finance agency, with the National Housing Authority as project proponent.

* * *

GAUDENCIO TOBIAS, NHA general manager, said that the KFW loan to the Philippine government is a significant development in the country's housing program as undertaken by the First Lady and Human Settlements Minister Imelda R. Marcos since it marks the recognition and acceptability of the country's low-cost housing programs by international finance institutions outside of the World Bank, the traditional fund source.

Tobias also said that the West German government's assistance is founded on socially-oriented concessional terms which carry a 2 percent per annum interest only.

Total repayment period is 30 years and will be completed in year 2011.

* * *

MEANWHILE, the Ministry of Public Highways said yesterday that it has embarked on a P345-million infrastructure program in the Visayas and Mindanao that includes farm and road projects.

Highways Minister Jesus Hipolito said part of the money for the projects came from the Asian Development Bank which gave a $30-million loan to the government.

Hipolito said that all national roads in the islands of Panay, Palawan, Masbate, Marinduque, Tablas and Mindanao will be widened and asphalted under the project.

Construction starts next year and will be completed in two years, he added. A total of 1,201 kilometers of asphalted major and secondary roads in these areas will be improved, Hipolito said.

Feeder roads, irrigation systems and bridges in Mindanao and Visayas region will also be put up by the MPH to help farmers increase the harvest, he said.

BANKS PLEDGE 1 BILLION ₱ TO HOUSING PROGRAM

Manila PHILIPPINES DAILY EXPRESS in English 7 May 81 p 6

[Text]

THE FIRST LADY and Human Settlements Minister, Imelda Romualdez Marcos, paid tribute Tuesday to the social conscience of Filipino businessmen which she said has provided the breakthrough in the solution of the once formidable housing problem.

The First Lady made the observation in a speech at commitment ceremonies marking the Chamber of Thrift Banks' participation in the government's social housing program, held at the Philippine International Convention Center.

Mrs. Marcos said the decision of the private sector, through the Chamber of Thrift Banks, to participate in the government's housing program has given the people, particularly those in the low-income groups, an opportunity to own homes.

SHE SAID: "This is the substance of your commitment to provide up to one billion pesos for the secondary mortgage market through the Bahayan certificates program. With your one billion combined funds backing up primary mortgages, housing credit becomes easier to obtain at affordable interest rates and with the stretched out repayment schedules that sufficiently bring down amortization rates to the reach of the workers."

Under the agreement, the Chamber of Thrift Banks, composed of the Development Bank of the Philippines, Savings Bank and the Savings and Loan Bank, agreed to buy P1.1-B worth of Bahayan Mortgage Certificate of Participation from the National Housing Mortgage and Finance Corp., an agency of the Ministry of Human Settlements.

GROWTH OF FOOD, FISH PRODUCTION NOTED

Manila PHILIPPINES DAILY EXPRESS in English 29 Apr 81 p 16

[Text]

In the past decade, the economic face of the country has improved significantly, as the major industries constituting the Philippines' Agricultural and Fishing Resources have shown remarkable changes.

Since 1974, the combined productions of food crops and fish have grown at an annual rate of 5.3%, resulting in the country's self-sufficiency in rice as of 1975, and the Philippines' becoming a rice exporter in 1978, where previously the Philippines had been importing rice. This reversal was made possible through the support given these industries by government and private financing and technological institutions.

The Philippine Sugar Industry has generated millions of dollars in earnings, thus contributing to the National Treasury through the exportation of more than half of the industry's annual production to the world market. Credit for this development is due the banking institutions, both private and governmental, which have totally subsidized the sugar industry.

The Coconut Industry has earned over a billion dollars in the past year as the leading supplier of coconut products in the world market, making the Philippines the top foreign exchange earner for the fourth consecutive year.

After its subsidy was scrapped in 1973, the Virginia Tobacco Industry today subsists on its own, generating some P2 billion annually. It employs 12,000 people while 14,000 more are engaged in planting, selling and re-drying

During the decade of the Seventies, the volume of fisheries production had an annual growth rate of 5.4%. Keeping up with the developments in agriculture, the fisheries production continues with an annual growth rate of 22.1%.

The Philippine Fertilizer Industry has played a major role in the country's food production programs, providing the agricultural sector with the required input to improve the productivity of the soil and to maximize farm production

BRIEFS

LOAN FOR GAS FIRM--Singapore, May 11 (AFP)--A Philippine company manufacturing medical and industrial gases has procured foreign currency facilities amounting to about $9.5 million for its expansion program. An agreement for a credit of $4.98 million and another $4.5 million loan was signed in Hongkong today by Consolidated Industrial Gases (CIGI), a Filipino-Australian joint venture and the Singapore-based Private Investment Corporation of Asia (PICA). According to a PICA announcement here, the suppliers credit facility of $4.98 million is guaranteed by PICA and partially counter-guaranteed by Bank of America, Bank of New South Wales, Barclays Bank International Ltd. and Banco Urquijo. The $4.5 million eight-year loan is provided by Bank of America, Australia-Japan International Finance Ltd.,-Bank of New South Wales and Chemical Bank. In addition, CIGI has also secured a P50 million term loan facility provided by the Philippine-American Life Insurance Co. The announcement said the funds will be used for CIGI's current expansion program, costing approximately P150 million, to meet the growing local demand for industrial liquid nitrogen. [Text] [Manila PHILIPPINES DAILY EXPRESS in English 12 May 81 p 10]

RICE HUSKS FOR ENERGY--Rice husk or the lowly "ipa" lying in waste in various parts of the country may yet prove to be another major source of nonconventional energy. Fifty per cent of 1.5 million metric tons of the 2.5 million metric tons of rice husk produced in the country annually (based on 1980 figures) is convertible to energy equivalent to that generated by 2.4 million barrels of oil, government sources said. At current prices of oil, this could mean a savings of $83 million a year in oil bills. The National Food Authority (NFA) said the potential of rice husk as an alternative energy source has been confirmed through its successful utilization in NFA's Southern Philippines grains complex in Tacurong, Sultan Kudarat. The NFA said that during the past few years, rice husk has been the fuel of the grains complex's power plant which is capable of producing 1,200 kilowatts of electricity. Aside from supplying electricity for the complex's milling and related operations, the SPGC power plant also sold electricity amounting to P70,000 a month to nearby towns before the installation of the Maria Cristina power lines, NFA officials said. The NFA said that other power plants in the country could also utilize rice husk as fuel-source in the wake of skyrocketing oil prices. (AML) [Text] [Manila BULLETIN TODAY in English 11 May 81 p 36]

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

PAPER REPORTS ZIA'S ACTIVITIES IN DAMASCUS

Talks with Al-Asad

Dacca THE BANGLADESH OBSERVER in English 5 May 81 p 1

[Text] Damascus, May 4:--Bangladesh and Syria on Sunday struck uniformity of views for further consolidating the solidarity of the Islamic countries and also close cooperation among them in resolving the Middle East problems and facing economic challenges reports BSS Special Correspondent Hamiduzzaman.

The visiting Bangladesh President Ziaur Rahman and Syrian President Hafez Al Assad held formal talks lasting over two hours at the presidency here on Sunday evening and agreed that the core of the Middle East problems lay in the illegal Israeli occupation of Arab and Palestinian territories including Jerusalem.

The two leaders stressed that united and concerted efforts by the Islamic countries were a paramount need of the hour to solve the problems.

After the talks Bangladesh Foreign Minister Prof. Shamsul Huq told the accompanying newsmen that the two leaders also expressed great anguish and concern over the fratricidal conflict between the two brotherly Islamic countries--Iran and Iraq which is diverting the attention from the major problems of the Middle East. Besides it is also undermning [as published] the unity and solidarity in the rank of the Islamic countries.

The two sides reviewed their bilateral relations and decided to set up a joint Foreign Ministers level committee to be supported by appropriate experts for further deepening and diversifying cultural and technical fields.

President Hafiz Al Assad and Madami Assad have accepted an invitation from President Zia to visit Bangladesh Prof. Huq said.

During the meeting the two leaders also reviewed regional and international issues.

President Assad characterised the visit of Bangladesh President to Syria as a historic landmark in the development of brotherly relations between the two countries.

Reciprocating, President Zia paid tributes to President Assad for his courageous and dynamic leadership in the struggle of the Islamic world against Israel.

Prof. Huq said the meeting was held in a friendly and cordial atmosphere.

Bangladesh President was assisted in the meeting by Foreign Minister Prof. Shamsul Huq, Adviser to the President Dr. M. N. Huda and Additional Foreign Secretary Mr. Ataul Karim.

The Syrian President was assisted, among others, by Deputy Premier and Minister for Foreign Affairs Mr. Abdul Halim Khaddam.

President Ziaur Rahman on Sunday afternoon placed wreaths at the cemetery of martyrs dedicated in memory of those who laid down their lives in the struggle against Zionism in the outskirt of the city.

Wide Coverage

Meanwhile, the Syrian news media on Sunday gave wide coverage of President Ziaur Rahman's visit to the Syrian Arab Republic.

All the four major dailies including the English language daily the SYRIAN TIMES published photographs of President Zia and carried lead items welcoming the honoured guest. The Arabic language daily AL THAWRA carried a front page editorial on the visit of President Zia to Syria. The editorial describe [as published] the Bangladesh President as a prominent leader of the Third World and praised his leadership as a member of the summit level sub-committee on Al Quds.

The radio and television also put on special programmes on President Zia's visit here.

Message on Departure

Dacca THE BANGLADESH OBSERVER in English 5 May 81 p 1

[Text] Damascus, May 4:--President Ziaur Rahman was accorded a hearty send off when he left here this morning ending a two day visit to Syrian Arab Republic, reports BSS.

President Zia accompanied by his host President Hafez Al-Assad drove in a ceremonial motorcade from the State Guest House to the airport, 15 miles away from the city.

President Zia who was accompanied by his wife during the visit took salute from a smartly turned out regiment of presidential guards while the national anthems of the two countries were played. The two presidents then inspected a guard of honour.

President Assad escorted President Zia to the presentation line which included members of the Syrian cabinet, ruling party leaders and diplomats.

The two Presidents embraced each other, before President Zia boarded the special plane.

In a farewell message from the aircraft on way to FRG President Zia felicitated the Syrian President and the people for the warm hospitality they had shown to him, his wife and members of his entourage. He also wished continued progress of the brotherly people of Syria.

CSO: 4220/7759

TEXT OF PRESIDENT RAHMAN'S DAMASCUS BANQUET SPEECH

Dacca THE BANGLADESH OBSERVER in English 4, 5 May 81

[Article by Fazle Rashid]

[4 May 81 pp 1, 12]

[Text] Damascus, May 3:--The tenor of banquet speeches tonight by Bangladesh President Ziaur Rahman and Syrian President Hafez Assad was similar excepting for the fact that President Zia in his speech touched upon the crisis in Afghanistan while the host made no reference to it.

President Assad regretted the absence of many-sided relations between Syria and Bangladesh but he hoped President Zia's visit would serve as a prelude to developing friendship and expansion of avenues of cooperation.

Mr. Assad said Islam was a powerful link and principles of Non-alignment is our common guide.

The Syrian President expressed gratitude for President Zia's stand on Middle East. He lauded his initiative in building a modern Bangladesh and strengthening ties with Islamic countries.

President Assad expressed grave concern at efforts at partitioning Lebanon and Israeli domination over it.

President Zia said Muslim world is passing through its most critical phase. The brotherly peoples of Iran and Iraq are tragically engaged in fratricidal armed conflict. Continuing crisis in Afghanistan is yet another cause of our great concern.

President Zia reiterated the urgency of an immediate solution of the crisis through withdrawal of all foreign troops from the soil of Afghanistan and creation of conditions in which the people of Afghanistan would be left free to determine their destiny.

BSS adds: President Ziaur Rahman today called for global cooperation to tackle effectively the chronic problems stemming from the state of under development of the Third World countries.

Bangladesh President reiterated the urgent need for restructuring the system leading to the establishment of a New International Economic Order based on equity and justice in the interest of an enduring world peace.

President Zia who is now on a two-day official visit to Syria at the invitation of President Assad said Bangladesh valued greatly the friendship with the brotherly people of Syria, which was rooted in shared history, religion and values and common aspirations. As a natural corollary, the pace of development of the relations between the two countries must be accelerated for the mutual benefit President Zia said and hoped that his current visit would initiate a process for rapidly expanding relations in all fields between Syria and Bangladesh.

He recalled that as fellow members of the Organisation of Islamic Conference and the Non-aligned Movement Bangladesh and Syria were cooperating in various forums for unity and solidarity among the Islamic and the Non-Aligned countries.

President Zia said that decisions adopted at the third Islamic Summit meeting in Mecca and Taif and the historic Mecca Declaration presented new charter for the entire Islamic world and provide a blue print of increasing co-operation among the Islamic countries and also between Islamic and other countries that shared the Islamic values of justice, equality human dignity and universal britherhood [as published] of mankind.

He reiterated Bangladesh firm conviction that an enduring peace in the Middle East could be established only on the basis of total and unconditional withdrawal of Israel from all Arab territories including the holy city of Jerusalem and the restoration of the legitimate rights of the heroic peoples of Palestine including their right to an independent state in their own homeland.

The President denounced heinous Zionist attempt to annex the holy city of Jerusalem as its "eternal and undivided capital" as illegal and invalid. He also condemned the Zionist attempt to annex...the Galan feights [as published] in utter violation of ethics morality and all canons of international law. He appealed to the international community to stand unitedly against the decision of Zionist regime and force it to vacate the agression [as published] by restoring the Golan heights to Syrian sovereignty.

Zia's Speech

Following is the text of speech delivered Sunday night by President Ziaur Rahman at the baquet [as published] hosted by President Hafez Al-Asad:

"Your Excellency, The President of the Syrian Arab Republic,

Madame Hafez Al-Assad, Excellencies, Ladies and Gentlemen,

Assalamu Alaikum Wa Rahmatullah Wa Barakatahu.

We are, indeed, very happy to be in the midst of our esteemed friends and brothers of the Syrian Arab Republic in the historic city of Damascus. I bring with me the warm greetings and best wishes of the people of Bangladesh for the brotherly people of Syria.

We are deeply touched by the heart warming welcome and generous hospitality accorded to us. On behalf of my wife, members of my entourage and also on my own behalf, allow me Excellency, to express our most sincere thanks for this fraternal welcome and gracious hospitlity. [as published]

Excellency,

We have been watching with great admiration the rapid strides made by the Syrian Arab Republic under your able and dynamic leadership in all fields. Your brave and tireless efforts for the cause of the people of Palestine have won for you the high esteem of the Muslims throughout the world.

In Bangladesh we are currently engaged in a nationwide drive for achieving a self-reliant economy designed to improve the quality of life of the 90 million people of our country. It is no doubt a challenging task; but we are confident that through the determined efforts of our people and cooperation of friendly countries we shall be able to meet this challenge.

Global Peace

Our deep commitment to global peace and progress is total and unequivocal. We desire to live in peace, freedom honour and dignity. We stand for strict adherence to the principles of peaceful co-existence, sovereignty equality of all nations, respect for territorial integrity, noninterference in the internal affairs of other states, non-use of force and peaceful settlement of all disputes. We are firmly of the view that it is possible to resolve all disputes and problems through peaceful means and negotiations, given an atmosphere of mutual trust and understanding.

As fellow members of the Organisations of the Islamic Conference and the Non-aligned Movement, our two countries are cooperating in various forums for unity and solidarity among the Islamic and the Non-aligned countries. We believe that the decisions adopted at the Third Islamic Summit Meeting in Mecca and Taif and the historic Mecca Declaration present a new charter for the entire Islamic world and provide a blue-print of increasing cooperation among the Islamic countries and also between Islamic and other countries that share the Islamic values of justice equality, human dignity and universal brotherhood of mankind.

Palestinian Cause

The peace loving nations of the world, especially the Islamic nations, are today greatly dismayed by the deepening crisis in the Middle East. Our heroic Palestinian brethren are the victims of most inhuman atrocities. We reiterate our firm conviction that an enduring peace in the Middle East can be established only on the basis of total and unconditional withdrawal of Israel from all Arab territories including the holy city of Jerusalem and restoration of the legitimate rights of the heroic peoples of Palestine including their right to an independent state in their own homeland.

We reject the heinous Zionist attempt to annex the holy city of Jerusalem as its "eternal and undivided capital" as illegal and invalid. It is also an affrent [as published] to the sentiments of all Muslims as well as Christians alike. We strongly condemn the Zionist attempt to annex the Golan Heights in utter violation

of ethics, morality, and all canons of international law. We earnestly appeal to the international community to stand unitedly against this illegal act of the Zionist regime and force it to vacate the aggression by restoring the Golan Heights to Syrian sovereignty.

We view great anguish and concern the present crisis in Lebanon. The Zionist intervention in this crisis and interference in the internal affairs of Lebanon and an attack on her sovereignty and territorial integrity resigned to weaken Arab deterrant posture. We sincerely hope that joint efforts will lead to national reconciliation and peace and order will be restored with full respect to Lebanon's sovereignty and territorial integrity.

[5 May 81 p 4]

[Text] Following is the remaining part of the text of speech delivered on Sunday night by President Ziaur Rahman at the banquet hosted by President Hafez Al Assad in Syria.

We view with great anguish and concern the present crisis in Lebanon. The Zionist intervention in this crisis tantamounts to interference in the Internal Affairs of Lebanon and an attack on her sovereignty and territorial integrity. We urge upon the parties concerned to cease hostilities immediately and reach a just and honourable settlement through peaceful negotiations in the interest of peace in the region.

At a time when the Muslim world is passing through its most critical phase, the two brotherly peoples of Iraq and Iran are tragicaly [as published] engaged in a fratricical armed conflict resulting in loss of valuable lives and resources. On behalf of the good offices Committee I declare we shall not, Inshallah relent in our efforts to end this unfortunate conflict through a just and honourable settlement.

The continuing crisis in Afghanistan is yet another cause of our great concern. We reiterate the urgency of an immediate solution of this crisis through the withdrawal of all foreign troops from the soil of Afghanistan and creation of conditions in which the people of Afghanistan would be left free to determine their own destiny without any external interference or intervention.

In the context of our policy of firm opposition to imperialism colonialism, neocolonialism, racism, domination and hegemonism in any form or manifestation we condemn once again in unequivocal terms the apartheid policy of the racist regime of South Africa and reiterate our unstinted support for the heroic peoples of Azania and Namibia in their just struggle for freedom and justice.

Excellency, I cannot help emphasising that the chronic problems stemming from the state of under-development of the Third World countries results of centuries of neglect and exploitation cannot be tackled effectively without global cooperation meant specifically to reverse the exploitive trends of the past. We reiterate the urgent need for restructuring the system leading to the establishment of a New International Economic Order based on equity and justice in the interest of an enduring world peace.

Excellency, We greatly value the friendship between our two brotherly peoples rooted in our shared history religion and values and common aspirations. As a natural corollary the pace of development of relations between our two countries must be accelerated for our mutual benefit. This visit, I hope, will initiate a process for rapidly expanding relations in all fields between our two countries.

Your Excellency Brother Hafez Al-Assad, as I conclude I wish to thank you Madame Assad, Government and brotherly people of Syria once again for your gracious hospitality. I wish to extend a very cordial invitation to you and Madame Hafez Al-Assad to visit our country which will provide our people with an opportunity to demonstrate their high esteem for you and your great country.

I wish Your Excellency long life happiness and success and the brotherly people of the Syrian Arab Republic continued peace progress and prosperity". [as published]

PRESIDENT'S SPEECH OPENS MAY DAY CELEBRATION WEEK

Dacca THE BANGLADESH TIMES in English 3 May 81 pp 1, 12

[Text] President Ziaur Rahman on Friday evening inaugurated the 'week for implementation of industrial revolution in the spirit of May Day' with a call for establishing an exploitation free society inspired by Bangladeshi nationalism, reports BSS.

The President said that the ideal of Bangladeshi nationalism backed up the process of establishing an exploitation-free society and added, language, culture, land, religion, economy and the struggle for liberation comprised the corner stone of Bangladesh nationalism.

President Zia said establishment of an exploitation free society meant ensuring of five basic requirements for all citizens, the five basic needs for a human life are education, shelter, food, clothing and health and family planning.

He said, we have to ensure equitable distribution of wealth for meeting these basic needs and for that matter the production at all levels has to be increased.

The President said, the massive force latent in working class has to be organised through institutions for increasing the production at all levels, for organising the working force for enhancing production. The political, social, economic and religious rights of the workers have to be granted through the functioning of multi-party democracy.

President Zia described himself as a worker and said, all the citizens should feel honour by identifying themselves as workers as we have to be workers in our action and makeup for developing the country.

He said, the developed nations have increased their production level by following the spirit of 'May Day' and added, we all should endeavour to increase the national production through our best efforts.

President Zia said, the organised labour force has to be involved in production for strengthening the national economy through peaceful revolutionary process and added, we have to quicken our development through peaceful resolution to make good the losses of centuries colonial rule and exploitation on this land.

Continuing, he said, the implementation of the development programmes are to be processed through peaceful revolution and added, we have experienced much blood shedding during our independence war.

The function held at the Shilpakala Academy in Dacca was also addressed by Labour and Industrial Welfare Minister Mr. Reazuddin Ahmed and Labour Secretary, Mr A. B. M. Golam Mustafa. The inaugural function was attended, among others, by Vice-President Mr Justice Abdus Sattar, Members of the Cabinet, diplomats, civil officials and workers.

Speaking on the occasion, Mr Reazuddin Ahmed said, increase of national production is essential for all our socio-economic development. He referred to President Zia's call for peaceful industrial revolution and said, for this reason, this year's May Day bears special significance for our workers who have spontaneously responded to the call of the President.

The Labour Minister expressed the hope that the lessons of May Day will inspire us to adopt Bangladeshi nationalism which will help develop a happy and prosperous country and serve as motivating force for bringing about economic emancipation for all.

TEXT OF PRESIDENT RAHMAN'S MAY DAY MESSAGE

Dacca THE BANGLADESH TIMES in English 1 May 81 p 1

[Text] President Ziaur Rahman on Thursday called for increasing production in fields and factories for further strengthening the economic foundation of the country, reports BSS.

In a May Day message the President said the working class of the country inspired with the ideal of Bangladeshi nationalism could positively contribute to attaining this goal through their relentless efforts. He said this is their (workers) responsibility towards the nation and the country and added "I have the faith that they will fulfil their responsibility with sincere dedication."

The President extended his felicitation to all the working people on the occasion saying that the memory of self-sacrifice of this day will remain evershining in the mind of the workers of the world.

President Zia said peaceful revolution has begun in the industrial sector in Bangladesh side by side with the revolutionary process going on in the agriculture sector. The peaceful revolution aimed at establishing a welfare and exploitation free society. He said and added to attain this goal we require to increase production in the field and factories for further strengthening of the national economic foundation. [as published]

ACTIVITIES OF VISITING QATAR MINISTER REPORTED

Visits to President, Foreign Minister

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 p 1

[Text] The visiting Qatar Minister for Industry and Agriculture, Sheikh Faisal Bin Thani-Al Thani called on President Ziaur Rahman at Bangobhavan in Dacca on Tuesday afternoon and remained with him for some time says BSS.

Foreign Minister Professor M. Shamsul Huq, Agriculture Minister Mr Nurul Islam and Jute Minister Mr Habibullah Khan were present on the occasion.

Sattar

Sheikh Faisal Bin Thani Al-Thani called on Vice-President Mr Justice Abdus Sattar at his Secretariat office on Tuesday morning.

During the meeting the Vice-President informed the visiting Minister of the developmental efforts particularly in the field of agriculture now underway in the country.

The country hopes to attain not only self-sufficiency in food but also to export foodgrains in the next five years or so, the Vice-President told the Minister.

Sheikh Faisal appreciated the efforts for boosting agricultural production in Bangladesh.

Justice Sattar reciprocated the sentiments expressed by the Minister of Qatar to forge a closer bond of friendship between the two brotherly Muslim countries.

Shamsul Huq

Foreign Minister Prof Muhammad Shamsul Huq and the visiting Qartar [as published] Minister for Industry and Agriculture on Tuesday expressed keen interest for increasing bilateral cooperation between the two countries.

Prof Huq and Sheikh Al-Thani held discussions informally in a friendly and cordial atmosphere covering bilateral, regional and international matters of mutual interest at the Foreign Office. The Foreign Minister earlier warmly welcome his guest at the Foreign office. [as published]

The Qatar Minister who is leading a nine-member high-powered delegation of his country expressed the keen interest of Qatar in increasing closer cooperation with Bangladesh in various fields.

The two Ministers noted with satisfaction the emphasis laid on the need for closer cooperation among the Islamic countries in the Mecca Delcaration and the communique adopted by the third Islamic Summit held in Mecca and Taif.

They expressed "deep anguish and concern" over the continuing conflict between Iran and Iraq and stressed the "imperative need" for ending the conflict not only in the interest of the two warring Muslim countries but of the entire Islamic world.

The Qatar Minister extended an invitation to the Foreign Minister to pay a visit to his country.

Agricultural, Industrial Cooperation

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 p 1

[Text] Bangladesh and Qatar have decided to cooperate in the agricultural field and set up some joint venture industries in the two countries reports BSS.

This was stated at a Press briefing addressed jointly by Qatar Minister for Industries and Agriculture Sheikh Faisal Bin Thani Al-Thani and Bangladesh Agriculture Minister Nurul Islam at the end of official talks between the two countries.

Sheikh Thani summed up his week-long visit to Bangladesh as "very successful" in knowing the country and exploring the possible areas of future cooperation between the two countries.

Giving his impression about Bangladesh which Sheikh Thani described as "a brotherly country and our second home;" the Qatar Minister also visualised a good future for Bangladesh "with the type of people you have."

Asked about specific areas of future collaboration the Qatar Minister listed agriculture, joint venture industrial projects export of surplus rice and agricultural commodities to Qatar as the possible fields where the two countries could fruitfully cooperate.

Bangladesh Agriculture Minister Nurul Islam said that the talks covered wide ranging subjects relating to agricultural development joint ventures in petrochemical industries, fish cries [as published] and livestocks and exchange of manpower and expertise.

He described the visit of the Qatar Minister as "just the beginning" of bilateral economic cooperation.

The Agriculture Minister said that he had accepted an invitation of the Qatar Minister to visit his country soon to follow up the talks.

Earlier, official-level talks were held between Bangladesh and Qatar at the State Guest House.

Bangladesh side was led by Secretary Ministry of Agriculture and Forest Mr. A. Z. M. Obaidullah Khan while Mr. Sultan Al-Kuwari; Director of Agriculture affairs of the State of Qatar led his country's delegation at the talks.

Bangladesh Agriculture and Forest Minister Nurul Islam and Qatar Agriculture and Industries Minister Sheikh Faisal Bin Thani Al-Thani also held separate meeting.

FOREIGN MINISTER SPEAKS AT JAPANESE RECEPTION

Dacca THE BANGLADESH OBSERVER in English 30 Apr 81 p 1

[Text] Foreign Minister Prof. Muhammad Shamsul Huq on Wednesday hoped that the bilateral friendly relations between Bangladesh and Japan would grow from strength to strength, reports BSS.

Speaking at a reception accorded by the Ambassador of Japan to mark the National Day of Japan Prof. Huq praised Japan for its commitment to world peace and progress.

Prof. Huq wished long life to the Emperor of Japan on whose birth day the National Day of Japan is observed.

Lauding the progress made by Japan, a fraternal Asian country, the Foreign Minister said that Bangladesh admired Japan's commitment to the cause of the developing countries as well as world peace.

"The Foreign Minister observed that the relations between the two countries have reached a new height during the past few years, for which Prof. Huq congratulated Ambassador Otsuka of Japan. [as published]

The Foreign Minister recalled the warm and friendly welcome accorded to President Ziaur Rahman during his visit to Japan in 1978.

The Foreign Minister wished continued peace and progress for the people of Japan.

A number of Cabinet Ministers including Mr. Obaidur Rahman, Minister for Civil Aviation, Mr. Saifur Rahman, Minister for Finance and Mr. L K Siddiqui, State Minister for Power, Water Resources and Flood Control, attended the reception.

PRESS REPORTS ACTIVITIES OF DELEGATION IN BRUSSELS

Dacca THE BANGLADESH OBSERVER in English 30 Apr 81 pp 1, 8

[Text] Brussels Apr. 29:--King Bouduin of Belgium desired that the existing friendly bonds between the two countries would lead to much wider economic relations to their mutual advantages when Bangladesh could mark her economic development further particularly in the rural and agricultural fields, reports BSS.

The Belgian King said this when he received the visiting Bangladesh Deputy Premier Jamaluddin Ahmed yesterday morning at the Royal Palace. Mr. Jamaluddin is in Brussels as the head of a highpowered delegation to four EEC countries including its headquarters in Brussels pleading for investment in Bangladesh due to conducive climate and legal protection.

The Belgian King showed keen interest in the economic course of the meeting and praise Prisident [as published] Ziaur Rahman for his "remarkable leadership" he was providing to his country as well the role he had been playing in the international sphere. During their discussion of the forthcoming visit of the Belgian monarch an [as published] Queen Fabiola to Bangladesh in late May the Deputy Premier handed over to the King a personal "written message" from President Zia.

The Belgian Prime Minister Mark Eyskens noted with satisfaction the expanding relations between the two countries and recalled his visit to Bangladesh while he was Minister for Development Cooperation. He referred to the economic development taken place since then in Bangladesh with satisfaction when the Deputy Premier called on the Belgian Premier yesterday.

The Deputy Premier thanked the Belgian leader for his interest he showed in the development of relations between the two countries.

The visiting Bangladesh minister had a working session later with the Belgian Foreign Trade Minister in which officials of both the sides were present when various aspects of economic relations between the two nations were discussed.

It was followed by a luncheon at the Egmont Palace in honour of the Bangladesh Deputy premier hosted by the Belgian Foreign Minister Charles Ferdinand Nothomb which was attended by Foreign Trade Minister Robert Urbain high officials and leading people from different walks of life. Bangladesh Ambassador to the EEC and the Benelux nations Faruq A Chowdhury accompanied the Deputy Premier in all the occasions.

The Deputy Primier [as published] addressed members of the Belgo-Bangladesh joint economic committee later in the afternoon at the World Trade Centre detailing on the investment climate and preferential measures adopted as a matter of policy to attract ventures from abroad in the fields of leather footwear electronics, canning and preservation, cottonisation and woolonisation of jute, shipbuilding pharmaceuticals agro and gasobase industries etcetera. [as published] He also detailed on the Export Processing Zone at Chittagong ready for possible investors.

Chaired by Mr. Dahlmann President of Belgo-Bangladesh Joint Economic Committee the gathering was attended by a large number of Belgian entrepreneurs who showed keen interest to talk to undertake projects in Bangladesh. It was attended also by the high officials of the Bangladesh desk of the Foreign Office and the Foreign Trade Ministry of the Belgian government. The committee threw a dinner in honour of the visiting delegation from Bangladesh.

Earlier in the morning a hectic session packed with industrialists from various countries of the Common Market was held arrange by the EEC headquarters enabling members of the delegation to get closer contact with them. [as published]

Rashidul Hasan Director General of Industries addressed the European Community of industrialists about the Bangladesh Government policy for foreign investment. Bangladesh EEC Mission Economic Minister Syed Shamim Ahsan was present to assist the delegation in answering querries on the investment climate and other related issues. The European entrepreneurs demonstrated keen interest coming even from Denmark and Switzerland Holland Germany France U.K. and of course from Belgium with specific proposals for setting up undertakings in Bangladesh. Members of the Bangladesh delegation freely exchanged enquiries and proposals with their West European counterparts including the financing aspects of the possible projects. Many of them desired to visit Bangladesh for on the spot exploration of their proposals.

They also took up the possible constraints and limitations they might have to face going to Bangladesh which was clarified by the Bangladesh side. Director General of the Directorate General of Industries Number Three of the Common Market presided over the session taking place at the Manhattan Centre of the Sheraton Hotel Brussels.

REPORT ON DEMOCRATIC LEAGUE EXECUTIVE MEETING

Dacca THE BANGLADESH TIMES in English 29 Apr 81 p 3

[Text] The National Executive Committee of Democratic League at a meeting on Sunday urged the people to participate in constitutional movement for establishment of sovereign parliament to achieve national unity for preserving the independence and sovereignty of the country.

Presided over by Khandkal Mushtaq Ahmed chief of the party the meeting in a resolution said only the use of joint efforts of the better talents by way of a sovereign parliament could solve the problems that the country was facing now.

The meeting said that the country was now faced with a critical situation. It alleged that the Government was leading the country towads irustration [as published] anarchy and aggrandisement when national unity for facing aggression was the need of the hour.

The meeting said that a political party based in a foreign country and the Government were competing to show their allegiance to a foreign country thus taking the independence and sovereignty of the country under threats.

The meeting said that corruption had reached its highest peak and the people were burdened with taxes. The economy was in bad shape. Religious beliefs and moral values were being destroyed. The law and order situation had also deteriorated the meeting observed.

In another resolution the meeting demanded return of nationalised industries banks and insurance companies to the private sector.

AGENCY INTERVIEWS EEC PRESIDENT ON AID TO DACCA

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 pp 1, 12

[Text] Brussels Apr. 28:--EEC, Commission President Gaston Thorn reiterated the Community's allout cooperation and assistance to help win Bangladesh her economic challenge when their bilateral relations were strengthening very happily.

The European Community President told BSS following his meeting with Bangladesh Deputy Premier Jamaluddin Ahmed here Monday at the EEC headquarters that the Community would certainly do its best to help and assist Bangladesh in her search for economic development despite the calamities it faced from the nature and the worldwide recession.

The Deputy Premier is leading a highpowered delegation to four EEC countries, Britain, Belgium and Denmark to attract possible investors in bilateral and joint ventures in different sectors of traditional, nontraditional agro and gas based industries.

On the first leg of his hectic trip to the EEC countries, Mr Ahmed had a long and detailed session with the community's Vice-President Wilhelm Haferkamp Monday morning at the EEC headquarters accompanied by Bangladesh Ambassador Faruq A Chowdhury and other aides.

At a formal luncheon hosted by him Mr Haferkamp recalled President Ziaur Rahman's visit to the EEC in 1979 and said our relations since then intensified and we noted with admiration and sympathy the remarkable development Bangladesh so far made.

"We can extend our hands in cooperation, but it is the people of Bangladesh to mark their achievement" he said adding, "Bangladesh was very well contributing in North-South Dialogue, Non-aligned conference and Islamic moot." He recalled his visit of Bangladesh in March last when he had met President Zia and Cabinet members to come to know its economic plan and found development in industry and agriculture interestingly encouraging. The Commission Vice-President described the Bangladesh legislation on foreign investment protection and taxation as an "important development" and as a very positive outlook on the part of Bangladesh by which she could attract investors.

Asked to opine on President Zia's proposed South Asia moot for cooperation, the EEC Vice-President said, we are in full sympathy with the move as it transpired the urge of cooperation conciliation and pragmatism towards development in peace for prosperity.

CONFERENCE PARTICIPANTS SKEPTICAL ON FOREIGN AID

Dacca THE BANGLADESH OBSERVER in English 4 May 81 pp 1, 12

[Text] The participants in the concluding day's session of the special conference of the Bangladesh Economic Association (BEA) on Sunday were quite sceptical of the role of foreign aid in generating real productive growth of the economy.

The main tenor of discourses and discussions at the session on various aspects of foreign aid and its impact on the economy was that dependency on foreign aid would lead to ever-deepening crisis without helping the least to retrieve the economy from its existing state of structural imbalances.

The broad consensus that emerged in the course of deliderations [as published] by the participants was that foreign aid was 'inextricably linked with political strings' and resulted in external interference and 'donor dictates' much to the detriment of the 'national interests'.

In all, ten papers were read at the day's session. Among those who presented the papers included Dr. Quazi Kholiquzaman Prof. Mosharraf Hossain, Dr. Sofia Hasna Jahan Ali, Dr. Mohammad Ali Akbar, Mr. Atiar Rahman, Mr. Mohammad Mahmood, Mir Obaidur Rahman, Mr. M. A. Jalil, and Mr. K. M. Matin, Prof. Raihan Sharif, Prof. Abu Mahmood, Dr. M. A. Atahar, Dr. Sheikh Maqsood Ali, Syed Jamaluddin Mr. Abdus Samad and Kazi Akram Hossain took part in the discussions.

The participants observed that foreign aid was 'a tool of economic exploitation' and integration of our economy with international capitalist system that resulted in political, economic and cultural domination. Dependency on foreign aid, they noted, dampens the initiative for national self-reliance.

Various issues which came up for close scrutiny in connection with the discussions on foreign aid included transfer of inappropriate technology, consultancy fees, distorted allocation pattern, sectoral imbalances, maintenance of the socio-political status quo, etc.

In his paper, Prof. Mosharraf Hossain maintained that there was no immediate prospect for a dramatic change in the power and class structure as well as in the internal resource mobilisation strategy. He felt that the aid-givers must be persuaded hard in this context to allow potentials of engineering and technological facilities to help support raising of new industrial facilities in the organised sector of the economy.

Dr. Kholiquzzaman discussed the strategic importance of Bangladesh in big power rivalry and in the context of the Indian Ocean and the natural resource endowment that allured the Western aid to the country.

The contention of Syed Jamaluddin in favour of accepting foreign aid in the country was strongly contested by Prof. Abu Mahmood in the session. While Syed Jamaluddin felt that Bangladesh would not be able to run herself without foreign aid for the next ten to 15 years Dr. Abu Mahmood observed that Western countries were funneling funds to Bangladesh recognising the potentials of exploiting the country's resources.

Referring to the contention of some that the Eastern Socialist countries were also accepting foreign aid, Dr. Mahmood Noted that aid to dependants [as published] and aid to equals were not the same.

Mr. Abdus Samad suggested that the economists should suggest a future course of development and alternatives for domestic resource mobilisation in case of non-acceptance of foreign aid. He was however of the view that planning for a mixed economy would always involve an element of uncertainity [as published] about resource flows.

PARLIAMENT DICUSSES GOVERNMENT EDUCATION POLICY

Dacca THE BANGLADESH OBSERVER in English 1 May 81 pp 1, 16

[Text] Shah Azizur Rahman, Prime Minister and Leader of the House said that a planned education system was the objective of the present government's education policy. The government was making efforts in that direction. He said that the universities of the country were own autonomous.

The Prime Minister was speaking while winding up the discussion on the Dacca University (amendment) Bill on Thursday in the Jatiya Sangsad in the evening. The bill passed by voice of vote after the PM's speech. Shah Aziz further said that 20,000 primary schools have been brought under development scheme. Under this sceme [as published] a new curriculum will be introduced which, includes vocational course. Under the development plan 700 nongovernment schools have also been included. 145 government schools and 37 government colleges will be included in the scheme.

He also said that within only nine months 27 lakh people were given functional education in the country under literacy programme. Within next four year the country will be freed from illiteracy. [as published] The prime Minister who is also in charge of the Ministry of Education said. [as published]

He furher [as published] said that it was a prde [as published] of the present government that it has restored some descipline [as published] in the Dacca University after introduction of semister [as published] system. During the last three years attendance in classes in the university rose to record number.

Shah Aziz also said that during the Awami League regime election to Dacca University Students' Union was not held. Students' right to voice their demands were curtailed. The present government restored the right and election to DUCSU was held after six years.

Leader of the House refuting the allegation said that all the universities were autonomous during their regime. Universities, he said, decide about the examination, curriculum and even the expenditure of the government money which constitutes 90 per cent of the spending. But the universities are not accountable to government. He said the government decides only the poiicy. [as published]

Regarding appointment of Vice-Chencellors the Prime Minister said that Professor Fazlul Halim Chowdhury and Professor M. A. Bari were elected by the respective

universities as number one candidate for appoinment as Vice-Chancellors. He said that he had no alternative but to appoint the number one man. He said that late Sheikh Mujibur Rahman made the provision of appointing a Pro-Vice Chancellor to provide party supporters in administration in universities. He further said that Professor Afsaruddin was appointed Pro-Vice Chancellor in the Dacca University which was resented he said that negotiation with the university teachers were going on for a solution. [as published]

The Leader of the House said that another credit of the present government was introduction of scholarship for meritorious students in the country. An amount of 50 crore Taka would be given as scholarship in five years, he said.

A Victory

Earlier in the same session Mr. Asaduzzaman Khan, Leader of the Opposition while speaking on the bill suggested resotration of all the povisions [as published] of 1973 Dacca University Order which was amended by an ordinance in 1977. He observed that the 1973 order was the result of long years of struggle by teachers and students for autonomy of the universities. But by the 1977 ordinance the autonomy of the university was curtailed, he said. This has resulted in movement by the teachers and students due to which the government was restoring only two provisions of the earlier order. This was a victory of the struggle by the teachers and students.

A total of 11 Opposition members participated the discussion on the bill in the morning and nine members participated the discussion in the evening session. Those who participated the discussion (morning session) are: Mr. Muzaffar Ahmed (NAP) Mr. Almas Hossain (ML), Mr. Imajuddin Pramanik (AL-H), Mr Asaduzzaman Advocate (AL-H), Mr. Rafiqullah Choudhury (Gano Front) Col. (Retd) Anwarullah (AL-H), Mr Shudhangshu Shekhar Haldar (AL-H) Mr. Rashed Khan Menon (Ganotantrik Andolan) Principal Nazrul Islam (AL-H) Mr. Suranjit Sen Gupta (Jatiyo Ekota Party), Mr. A. S. M. Solaiman (Ganofront).

In the evening session Professor Mofizul Islam (BJL) Mr hahjahan Siraj and Mr. Golam Mostafa (JSD), Mr. Mozammel Huq (IDL), and from (AL-H) Mr. Salauddin Yusuf, Mr A. B. M. Taleb Ali, Mr. Profullah Kumar Shil, Mr. Abdul Jabbar, Mr. Sirajul Islam and Mr. Habibur Rahman, took part in the discussion.

Proposals for circulation of the bill for elicting [as published] public opinion were rejected by voice vote.

MINISTER REPORTS 24.3 PERCENT LITERACY RATE

Dacca THE BANGLADESH TIMES in English 30 Apr 81 p 1

[Text] The literacy rate in 1979-80 in the country was 24.3 per cent.

This was stated at the Jatiya Sangsad by Mr Abdul Baten, State Minister for Education on Wednesday in a written reply to a question from Ukil Shahadat Hossain Choudhury (BNP).

He further said that there were one crore 19 lakh 68 thousand children in the 5-9 year age group who were eligible to study at primary schools. The number of primary students during the same period was 82 lakh 36 thousand 526 studying at 43 thousand 936 primary schools. The number of primary teachers were one lakh 88 thousand 234.

Mr Abdul Baten while answering another question said that during the same period the number of high schools students (10-16 year age group) was one crore 47 lakh four thousand studying at 8 thousand 6 hundred 42 high schools of which 155 were Government schools. The number of high school teachers were 82 thousand 61, he said. [as published]

PRESIDENT OPENS ECONOMIC ASSOCIATION MEETING

Dacca THE BANGLADESH TIMES in English 1 May 81 pp 1, 8

[Text] President Ziaur Rahman on Thursday advised the economists to be pragmatic and shun their text book approach, patterned on Western thinking, to the problems faced by the country.

Inaugurating the four-day general meeting and conference of Bangladesh Economic Association (BEA) at the Engineers, Institute auditorium, the President noted that the economists often make excellent theoritical [as published] exposition based on unrelated academic theories. "But we have to find out our solutions in our own way," the President said.

President Zia spoke at length on various criticisms against Government's economic policies and regretted that the economists had hardly been able to offer practical solutions to the economic problems.

Presided over by Dr Abdul Gafur, President of BEA, the inaugural session of the conference was addressed by Prof. Fazlul Halim Choudhury, Vice-Chancellor of the Dacca University and Mr A F Mustahid, General Secretary of the BEA.

President Ziaur Rahman said that the economists had been criticising the Government for its failure in solving economic problems over the years. But, he asked them what solutions they could give.

President Zia said that those who discuss and often criticise the economic policy, had no idea about the real condition of the country. He told them to ask themselves how many of them had connections with the rural people who constituted the overwhelming majority of the population. "You want to solve the problems of Bangladesh following which system?", he asked them.

Gram Sarkar

President Zia said, "I have been moving round the rural areas almost everyday. This is my firm conviction that the self-reliant Gram Sarkars can only solve the problems of the country." He advised the economists not to challenge the Gram Sarkars, because it had already started producing good results.

He reminded that during colonial period the grass-root level was never allowed to be organised. Under the present social system, the Gram Sarkar was highly essential, he said.

President Zia said that Bangladesh was one of the least developed countries and in the past neither the country nor its economy was ever free. "We have a long past of colonial subjugation and exploitation and now we need foreign assistance to make up the resources gap," he said.

President Zia said that it was very easy to solve the problems academically. But, in reality it was very difficult to run a country like Bangladesh which had resource constraints. He said that the world economy had been in a bad shape due to world-wide inflation, pricehike of oil and war at places. "You should appreciate our problem that we have started our development process in such a difficult situation," he said.

President Ziaur Rahman said that the country at present had to spend Tk 1000 crore per year for importing oil as against Tk 150 crore spent a few years back. The prices of jute country's main foreign exchange earner were not increasing compared to the price-hike of other commodities and products. The Government had to give subsidy totalling Tk 500 to 600 crore annually on different items. Under such circumstances, he said "We have to take foreign assistance". It would not create any adverse effect on the economy if "we can pursue a correct plan", he said.

President Zia referred to the canal digging programme and said that it had resulted in increasing food production. He said that it would not be possible to develop the country without the assistance and support of the masses. "We are organising them socially, economically and politically", he said.

Basic Shift

Dr Abdul Gafur said that a basic shift in the national economic policy and development strategy was brought recently. The major aspect of the shift was to abandon the goal of socialism of First Five-Year Plan. He said that the FFYP was framed to create preconditions of establishing socialism.

Dr Gafur said that the Two-Year Plan (1978-80) and the Second Five-Year Plan aimed at flourishing capitalism in the economy. He said that priority of private sector in agriculture, industries and trade and commerce was the main basis of the Second Plan.

Dr Gafur observed that capicalistic [as published] development strategy creates unemployment and increases exploitation tremendously. Mass poverty, unemployment and malnutrition in Bangladesh were increasing as the second of this process, he said.

Prof Fazlul Halim Choudhury said that the Western economic concepts were firmly active in all economic activities of Bangladesh. "We want an end to this situation", he said.

Prof Choudhury said that elderly and promising economists of the country would have to come forward with correct direction to improve the lot of 80 per cent people living below poverty level and to bring out the nation from the situation created by worldwide economic crisis and local population explosion.

The Vice-Chancellor of Dacca University said that many of the young brilliant economists and senior teachers engaged in various research projects financed by different international organisations. By this, he said, the researchers benefitted themselves financially. But, it should be assessed how much they could contribute to their country and the society in this way.

Prof Choudhury said "I think such researches, which have no link whatsoever with the society, is a sort of luxury". He said "we will become bankrupt soon if we allow to waste local talents in this way".

PRIME MINISTER SPEAKS AT END OF BUDGET DEBATE

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 pp 1, 12

[Text] Prime Minister and Leader of the House Shah Azizur Rahman on Tuesday gave a clarion call for harmony and homogeneity in diversity and protecting the Parliament which is the last hope of the people. Otherwise he asserted anarchy will be let loose and independence and sovereignty will be in jeopardy.

Winding up the 40-hour-long general discussion on President's address to the Jatiya Sangsad the Prime Minister said the President Ziaur Rahman has decentralised power. The President never interfered in legislature and other business of the House. The President has no veto power. The Parliament is sovereign and can pass any bill, he added.

The Jatiya Sangsad approved through voice vote a motion of thank to the President for his address to the House on April 10.

The Prime Minister said that during the Awami League rule late President Sheikh Mukibur Rahman had the power to veto and the Parliament was not sovereign. Recalling the past rule the Prime Minister said that within 15 to 20 minutes a fundamental change in the Constitution was made thereby establishing a one-party rule on January 25, 1975. None in the Parliament was allowed to speak and even the elderly leader Mr. Ataur Rahman Khan could not say anything. The then President was brought down from the highest pedestal and made Revenue Minister, he added.

Refuting the allegation made by the Leader of the Opposition about the changing of the Constitution by President Ziaur Rahman the Prime Minister said that the Constitution was changed through a referendum before the presidential elction. [as published] The Prime Minister said that secularism has been dropped from the Constitution at popular will. From 1972 to 1975 the people of Bangladesh have seen the ugly face of 'no religion' in the name of secularism. He called upon the Opposition to demand a referendum for establishing secularism replacing 'Bismillaher Rahmanir Rahim'. The Government will readily accept the demand, he added.

The Prime Minister pointed out that every religion helps build moral values and in Bangladesh everybody was free to profess his respective religion. We stand for religious freedom and are trying to help build places of worships, he added.

FFs Being Rehabilitated

Speaking about the freedom fighters the Prime Minister said that the present Government has made elaborate arrangements to rehabilitate the freedom fighters. Due attention has been given to the crippled freedom fighters and the Muktijoddha Kalyan Trust is entrusted with nine industries for their benefit. Allocation to the tune of Taka three crore will be made in the next year's budget for the welfare of the freedom fighters. Today the freedom fighters enjoy due social honour. Over 200 freedom fighters have already been sent abroad on employment. No freedom fighter will remain unrehabilitated, the Prime Minister declared. During the Awami League rule thousands of freedom fighters were kept in jails and now President Zia has released them from prison. Today we find the portraits of Shaheed freedom fighters hung on the walls of Bangabhaban he added.

Referring to the Opposition move to divide the people the Prime Minister said that President Ziaur Rahman has build up [as published] national unity irrespective of party, class and opinions and none can break it.

Contradicting the Opposition allegation the Prime Minister said that the Government did not want to destroy the Opposition rather law has been enacted providing privileges to them. The Government was eager to see that the Leader and Deputy Leader of the Opposition in Parliament grow as institutions. He regretted that the Government vehicles and fuel have been used by the Opposition leaders in the Parliament in organising demonstrations against the Government.

The Prime Minister categorically said that the generosity shown by the Government in dealing with political elements should not be taken as weakness. He cautioned that the Government would take appropriate measures against those who indulge in subversive or anti-state activities or work against the independence and sovereignty or attempt to launch Afghan-type revolution and wage war against the country in any part of Bangladesh.

Foreign Policy Acclaimed

BSS adds: Prime Minister said that Bangladesh was playing the role as harbinger of Islam's message of peace and universal brotherhood of mankind.

The Prime Minister said that the inclusion of Bangladesh in various Islamic committees and conferences including the Jerusalem Committee and the Islamic peace mission was an eloquent testimony of the confidence and trust reposed in Bangladesh by the Islamic world. He said that President Ziaur Rahman was the first leader from the developing world to address the 11th special session of the United Nations General Assembly on the North-South dialogue last year to spotlight the pathetic plight of the least developed countries.

Shah Aziz told the House that the scramble for global supremacy power rivalry and escallation of arms race had plunged the world into growing tension and insecurity. He said that in such a situation Bangladesh had been playing an effective role in different international and regional forums to defuse tension and restore peace and stability in the world.

Explaining Bangladesh's foreign policy the Prime Minister said thatour foreign policy was based on moderation and pragmatism with non-alignment forming the

corner stone. He said that the positive non-alignment pursued by Bangladesh had been reflected in our stand on Kampuchea, Zimbabwe, Namibia Afghanistan South Africa and the Middle East.

Referring to the dispute on the question of south Talpatty island Shah Azizur Rahman said that the island was not practically in possession of any country. The two Governments were exchanging additional information and data on the issue he said and hoped that the problem would be resolved through bilateral discussion.

The Prime Minister denied allegations that the foreign bases were allowed to be set up in the St. Martins Island. He declared in categorical term that there could be no foreign military bases in the St. Martins.

REPORT ON OPPOSITION LEADER'S SPEECH IN BUDGET DEBATE

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 pp 1, 12

[Text] Leader of the Opposition Mr. Asaduzzaman Khan said in the Jatiya Sangsad on Tuesday that if the government fails to over come the present political and economic erosion in the country femine [as published] and bloodshed were inevitable. He opined that the crisis could be overcome only through implementation of the resolution initiated by Sheikh Mujibur Rahman.

Participating in the debate on President's speech Mr. Asaduzzaman Khan said that the speech was frustrating and unfortunate. He claimed that the economic condition had deteriorated in the country and production in agriculture and industry had fallen. He said that the President in his speech tried to cover the failures in all fields using rhetorics.

The Leader of the Opposition who spoke for more than an hour claimed that the Parliament was fully sovereign and was not a rubber stamp after the passing of the Fourth Amendment which created one party rule in the country. He said that the Parliament at that time had the power to impeach the President. He feels that the Present Parliament is not sovereign.

Mr. Asaduzzaman Khan said that President Ziaur Rahman had distorted the state principles of nationalism, democracy socialism and secularism replacing these by nationalism; democracy socialism for social justice and dropping secularism. [as published] He also said that the history of liberation struggle had been distorted by calling the liberation struggle--struggle for independence. He said that President Zia was trying to confine the liberation struggle within the period from March 26 to December 16.

Mr. Asaduzzaman Khan alleged that the President had violated the constitution by defining nationalism in his speech which was completely different from the definition given in the Constitution. He also said that the ruling party was killing and harassing the political workers and leaders of the Opposition. He said that although the President had called for democratic tolerance, he was uttering most intolerant words against the Opposition.

Mr. Khan said that the Ministers were not answerable to the Parliament and the Democracy permitted in the country was suitable for establishing one-man rule in the country. He told the House that the right of changing the Constitution by the Parliament had been taken away. He said that now the Constitution could be amended only through referendum.

Less Production

Speaking on economic situation of the country Mr Asaduzzaman Khan said that production had fallen in agricultural and industrial fields and the prices of essential commodities were going up. He said that the rate of inflation had gone up. Mr. Khan regretted that President had not given any programme for ending the exploitation of the rural people. He said that the people were convinced that they would not be benefited through Gram Sarker and village cooperative banks. He alleged that the government had spent huge amount of money for organising the Gram Sarker conference in Dacca in which 70,000 people attended. He further said that the government had asked the Gram Sarkers to buy 270 maunds of paddy and they bought it at much lower price than that of the fixed price. He alleged thus the present government was indirectly bribing these people to muster their support.

The Leader of the Opposition said that although the present government was talking of rural development the allocations for the rural development had been reduced from 34 per cent in 1973-74 to 29 per cent in 78-79 and 21 per cent in 1980 81. The allocations in agricultural sector had come down from 35 per cent to 24 per cent.

Criticising the canal digging in the country Mr Asaduzaman [as published] Khan said the target of doubling the food production was not feasible in such a short time. He said that if the food production was to be doubled the irrigated areas must be increased. He clamed [as published] that the irrigated areas after canal digging had come down from 35 lakh acres in 1974-75 to 32 lakh acres at present. He also alleged that the canal digging was a wastage. Citing an example, Mr. Khan said that 400 students participated at a canal digging programme on voluntary basis and the total expenditure for them was 25 000 Taka. He said that according to experts the quantum of work done by 400 students could be completed by four labourers and the cost would have been only 200 Taka.

Mr Asaduzzaman Khan said that the food production had come down and so the production of jute, sugarcane etc. He also alleged that the production of fertilizer, jute goods, cement also fell short of the target. He expressed concern at the unemployment problem and said that the President had not said anything about unemployment problem in the country. Mr Khan also claimed that the government had failed to tackle the population problem and arrest the baby boom.

Foreign Policy

Speaking about the foreign policy Mr Asaduzzaman Khan said that the present government was the stooge of the imperialists and was dependent on others. He alleged that the present government was actually working against the Non-aligned policy. He said that the government maintained complete silence on issues like what he called Chinese aggression of Vietnam, Camp David agreement Afghan issues, Indian Ocean and South Africa. He said that the government was working as the stooge of the US imperialism.

Mr Khan said that the government of President Ziaur Rahman had failed to resolve the Farakka and Talpatti problem, transfer of assets from Pakistan and repatriation of stranded Pakistanis.

REPORT ON JUTE MINISTER'S SPEECH TO DACCA MEETING

Dacca THE BANGLADESH OBSERVER in English 29 Apr 81 pp 1, 12

[Text] Jute Minister Mr. Habibullah Khan, on Tuesday reiterated Bangladesh's total support to the formation of the proposed International Jute Organisation (IJO) and stressed the need for a greater unified front among the producers to protect their interests, reports BSS.

Mr. Khan was addressing the delegates to the negotiating meeting of the five major jute producing nations on the second day and the concluding day on Tuesday. The meeting presumed to be the last one before the next meeting in Geneva in May began in Dacca on Monday, under the aegis of UNOTAD.

The Minister said that for the interests of the producers 'we must have a common unified front to settle our issues with the North.' He said IJO was not a dream it must be brought into reality.

The Jute Minister reminded the delegates that several rounds of meeting were held during the last six years for such an organisation 'when we have reached a common accord, we must forget small differences for a better future tomorrow,' he maintained. [as published]

He said the earlier efforts of the producing countries had failed as there existed no common approach and the producers were blamed [as published] for not forging an unity among themselves he said.

Giving a background of the proposed IJO the Minister said that the producing countries were misunderstood at the initial stage. But a series of seminars and meeting have helped overcome that problem he said and added a stage had come where IJO was likely to be born in the next Geneva meeting.

Mr. Salahuddin Ahmed Chairman of the negotiating meeting and Mr. S. K. Sarkar leader of the Indian delegation also spoke at the meeting.

Mr. Habibullah Khan said Bangladesh was ready to make some concessions regarding the IJO voting system. This gesture he said would facilitate the fellow partners to plead their respective cases. He however, reminded the delegates not to misunderstand 'our desire for concession as our weakness.' In that case he warned 'we will go by voting formula accepted the United Nations. We will follow the UN charter in letter and spirit and not make any concession before any threat.'

JUTE ASSOCIATION MEMBERS NOT TO RENEW LICENSES

Dacca THE BANGLADESH TIMES in English 3 May 81 p 12

[Text] The Bangladesh Jute Association in its meeting on Saturday decided that its members would deposit all their jute traders' licences with the Association and would refrain from seeking to renew them until the Government took positive steps for removing the problems of private sector jute traders and shippers.

The BJA also resolved that none of its members would make any sale of the new crop of jute until further decision. The meeting also called upon the Government to accept the various recommendations made by BJA at its meeting on April 17. These inclue the following:

Procurement policy: "Whatever be the size of the crop and whether there is a Statutory Minimum Price or not adequate arrangements must be made for proper marketing of jute from 67,000 villages so that the growers may receive a fair return for their produce. The private traders who handle about 85 per cent of the exports should, therefore, be assisted to play their due role in both procurement and export of raw jute so that interests of growers and the country do not suffer."

Export price: In the absence of MEP in any other producing/exporting country this is a handicap for us in a competitive and free world market leading to adoption of unethical business practice by both buyers and sellers. Hence it should be totally abolished." [as published]

Committee: To regain the lost markets and maximise Bangladesh interests a "Negotiating Committee" may be set up under the Ministry of Jute with adequate representation from BJA with the authority to negotiate and conclude all barter and bulk sales so that business may not go out of Bangladesh." [as published]

Export duty: Duty should be wholly abolished. The reduction of duty to 5 per cent in case of lower grades could not substantially achieve the desired effect as a difference of even 1/2 per cent in the price in the international market often becomes the deciding factor.

Licence fee: "The Licence Fees should be reduced to the pre-1980 levels and all superfluous conditions recently imposed should be abolished as no such conditions exist in any other case of trade licence."

ESSENTIAL COMMODITY PRICES 'MORE OR LESS STABLE'

Dacca THE BANGLADESH TIMES in English 28 Apr 81 p 1

[Text] State Minister for Commerce Chowdhury Tanvir Ahmed Siddiky on Monday told the Jatiya Sangsad that the prices of essential commodities were more or less stable at present.

Replying to a question by Begum Ayesha Sardar (female seat) the State Minister said that the Government had taken all measures to keep prices at a certain level.

Replying to a supplementary the minister said that in urban areas prices of essentials showed frequent fluctuations but in rural areas they remained fixed at times.

The foreign cigarettes now available in the country were generally imported by travellors. [as published] Some foreign embassy also import foreign cigarettes for their own consumption, he said.

The State Minister said that some international hotels were allowed to import foreign liquors.

CSO: 4220/7745

FOOD MINISTER EXPLAINS INCREASE IN PRICE OF RICE

Dacca THE BANGLADESH TIMES in English 3 May 81 pp 1, 12

[Text] Food Minister Mr. Abdul Moman Khan said on Saturday that the prices of rice and wheat distributed under the rationing system were increased in the interest of the farmers as well as the interest of the nation.

He was speaking on a short discussion on the question initiated by Mr. Asaduzzaman of Awami League (Hasina) at Jatiya Sangsad.

The Minister said the Government increased the food procurement prices to ensure fair prices to growers and as such it had to increase the sale price to reduce Government subsidy.

He said that the measure was also intended for generating more savings so that more investments could be made for increasing production. If we are to reduce dependence on foreign aid there is no alternative but to increase savings for more and more investment, he said.

He said that the recent increase in the price of rice and wheat under rationing system would cost only an additional 0.55 paisha for each adult each week. We should be prepared to make this sacrifice to ensure a better future he said.

The Minister said that the Government was empowered by an act to increase the price of such items through executive orders. The earlier Government also increased the price of such items in the same way on three occasions. He thus argued that the measure did not lower the prestige of the Sangshad. [as published]

The Food Minister said the Government's aim was to attain self-sufficiency in food within the shortest possible time and it was necessary to make more and more investments for increasing production by reducing subsidy.

He informed the House that the subsidy on food would be reduced to from Taka 157 crore in 1979-80 to about Taka 112 crore this year. Recent increase in prices of rationed rice and wheat would help save Taka two crore.

The Minister denied the allegation that the Government was not looking after the interests of the fixed income group by saying that the Government had given new pay scales and compensatory allowance to the group while the previous Government had limited the salary at Taka two thousand.

MINISTER REPORTS REDUCTION IN FOOD DEFICIT

Dacca THE BANGLADESH OBSERVER in English 4 May 81 pp 1, 12

[Text] Fulpur (Mymensingh) May 3:--Mr Abdul Momen Khan, Minister for Food, said here today the government had given top priority to agricultural development so as to make the country self-sufficient in food soon. Inaugurating the Boro procurement programme of 1981 at Fulpur 14 miles from Mymensingh today the Minister said that as a result of which the current food deficit of the country had come down to 10 lakh tons from 22 lakh tons of the last year, says a PID handout.

The Minister said that government had intensified the procurement drive only to ensure fair prices for the products to the farmers. The Minister said that government had so far procured nine lakh tons of foodgrains since July 1. The Minister urged the farmers to grow more food and sell their rice and paddy of good quality to the government so that the activity of profit mongering elements could be curbed down. In this connection he referred to the government's plan to build a reserve of 15 lakh tons of foodgrains to meet any calamity. The Minister called upon the people to be united being imbued with the spirit of Bangladeshi Nationalism to devote their energy to increase the resources of the country.

The Minister urged the food department officials to give all cooperation to the farmers and warned that any unfairmeans by food officials during the drive would not be tolerated. The procurement began with a ceremonial purchase of 1500 maunds of paddy. It may be mentioned here that Mr. A. S. Prue Chowdhury Minister of state for food and Mr. Iqbal Hossain Chowdhury Deputy Minister for food on Saturday inaugurated the same programme at Narayangonj and Sunmgonj respectively.

COMMERCE MINISTER: NO SHORTAGE OF BABY FOOD

Dacca THE BANGLADESH TIMES in English 28 Apr 81 p 1

[Text] State Minister for Commerce, Mr. C. T. A. Siddiky on Monday ruled out the necessity of introducing price ontrol because, "there is no shortage of baby food or powdered milk in the country".

Replying to a supplementary by Sheikh Selim (AL-H) the Minister said that Trading Corporation of Bangladesh (TCB) sold powdered on "no loss, no profit" basis while the private sector pursued its own price policy.

Replying to another supplementary Mr. Siddiky said that an adequate quantity of powdered milk was available with both TCB and private sector. He said at present TCB has 25 lakh pounds of powdered milk at its stock and another 35 lakh pounds are in the pipe line now.

The Commerce Minister informed the Parliament that the total requirement of powdered milk was one crore pounds annually. He said the government imported powdered milk and baby food worth Taka 18 crore while private sector imported powdered milk or baby food valued at Taka 8 crore this year. Besides the country produces 25 lakh pounds of powdered every year", he said. [as pulished]

CSO: 4220/7745

WATER RESOURCES MINISTER LECTURES ON GANGES PROBLEM

Dacca THE BANGLADESH TIMES in English 29 Apr 81 pp 1, 8

[Text] Mr B. M. Abbas, AT, a former Minister of Water Resources on Tuesday said that Bangladesh could jeopardise its future development by agreeing to Indian proposal for diversion of the Brahmaputra river to the Ganges basin.

He said that the Ganges, an international river had enough water to meet the needs of its basin with potentiality of raising dry season flow from possible storages in India alone by about 181,000 cusecs.

The storage in India "can easily meet the shortage of water at Farakka. But India maintains that it can not spare any of the additional water for augmenting the dry season flow of the Ganges at Farakka," he said while delivering a lecture at a Seminar on Ganges water--its problems and solutions" at the Institution of Engineers. [as published]

Indian Threat

Mr B. M. Abbas said that instead of agreeing on augmentation of dry season flow of the Ganges as stipulated in the Indo-Bangladesh agreement on the Ganges water of 1977 "there is now an implied Indian threat of rescinding the agreement or not renewing it after it expires on November 5, 1982."

Sponsored by the Bangladesh Institution of Engineers, the seminar was also participated by State Minister for Flood Control and Water Resources Mr L. K. Siddiky, Dr Alimullah Khan presided over the session.

Mr B. M. Abbas further said that "India wants the entire Ganges water. India will not spare any of its water even for West Bengal, not to speak of Bangladesh which is using it from time immemorial. India insists that the supply from the Brahmaputra be diverted to the western region of India outside its own basin. Bangladesh can not afford this," he noted.

Mr Abbas further noted that "the Brahmaputra is the most important source of water for Bangladesh. About 12.7 million acres of net irrigable area is dependent on the waters of this river. The irrigation requirement alone is far above the average availability of water in the river during the dry season."

Serious Jeopardy

He observed that diversion of water from the Brahmaputra will seriously jeopardise agricultural devlopment of a vast area and added that apart from the question of technical and economic feasibility of the Indian proposal it would have serious social and physical impact on Bangladesh.

Turning to other rivers, Mr Abbas said that a situation similar to that of the Ganges was also developing in river Teesta on which India was constructing a barrage. While Bangladesh was kept at the negotiating table India went ahead with own projects. "It has built or building control structures on other rivers like the Gumti and the Khowai, blocking smaller streams for utilising their dry season flows and diverting the course of the many border river like Kusiyara, Muhuri, Feni to the detriment of the interests of Bangladesh. Bangladesh, therefore, has cause for great concern not only for the Ganges waters but also for the waters of its other rivers."

Mr Abbas noted that as the present dry season flows in the Ganges, Brahmaputra and other rivers were not adequate for the development of lands in Bangladesh, these needed to be augmented by storing a part of the abundant monsoon flows. But such measures were not available to Bangladesh. This underlines he imperative need of the basin wise development," he argued. [as published]

The Agreement

Giving a background of the protracted negotiations between India and Bangladesh on sharing of the Ganges water since the completion of the Farakka Barrage in 1975, Mr Abbas said that the two countries reached an interim agreement for the sharing of the waters of the Ganges at Farakka for a period five years on November 5, 1977. It also promised to seek a long term solution to the problem through the augmentation of the dry season flow of the Ganges.

Abnormal Flow

The accord on sharing the waters at Farakka was based on the premise that the historical pattern of the flow reaching Farakka should not be disturbed. But in 1980 dry season, the flow reaching Farakka dropped abnoramlly throughout January to April, forcing a big reduction in the Bangladesh share of the Ganges water. Compared to the calculated 75 per cent availability, the monthly total flow at Farakka was less by 33.4 per cent in March and 24.7 per cent in April. During the first 10-days of April, the flow reaching Farakka was only 39,000 cusecs against 59,000 cusecs as noted in the schedule of the agreement. The entire basis of sharing the Ganges water was therefore upset," he observed.

Mr Abbas said that the question of augmentation of the dry season Ganges water flow was crucial to finding a long-term solution to the problem. He said despite provisions in the Ganges water agreement the two countries had been unable to agree on the approach to the longterm solution to the problem.

Key to Solution

Mr Abbas further said that a solution of the Ganges water problem lied in cooperation between all the riparian countries. He pointed out that it was an

international river with drainage basin in China (Tibet), India, Nepal and Bangladesh.

He said that three of its important tributaries Karnali (Ghagra), Gandak and Kosi which flowed from Nepal contributed together 41 per cent of the total annual flow and 71 per cent of the dry season flow of the Ganges.

He pointed out that to augment the dry season flows development of large reservoirs to store a part of the excess monsoon flow (2 million cusecs at peak) was the key to the solution of the problem. This would make up the shortage of the water during the dry season and would also help in controlling the recurring annual floods.

Mr Abbas pointed out that studies made so far of possible storage sites on the tributaries of the Ganges in Nepal by reputed international engineering firms had established that it was possible to increase the lower Ganges dry season flow to the extent of 140,000 cusecs or more with an aggragate active storage of 80 MAF (million acre feet) over and above the present natural dry season flow which were used by Nepal and India.

This; he said; would develop continuous hydropower of 9000 mega watt or more with installed capacity of about 15;000 MW at the site studied so far. This would also help substantially reduce flood flows which devastate large areas every year in India and Bangldesh. Other direct benefits would be improvement of navigation; recreation facilities and environment. Besides; storages on the Arun and Tamur rivers of the Sapta Kosi basin could further increase the dry season flow of the Ganges.

Indian Insistence

Mr Abbas said that India always insisted on keeping Nepal out of the Indo-Bangladesh study of the long term scheme proposed by Bangladesh on the plea of bilateralism though the river was not bilateral. 'Nepal he said; was very much a co-riparian and Indian argument that there could not be a tripartite talks made little sense. [as published] He further said that a river could not be treated piecemeal but must be taken as a whole from its source to the outfall for the optimum development of its water resources.

Bangladesh Requirement

Mr B. M. Abbas said that the south western part of Bangladesh was largely dependent on the ganges water for its net irrigable area of 7.3 million acres. Its full development would require 120,000 cusecs flow. In addition to other uses the river Garai-Madhumati required a minimum flow of 5000 and cusecs for checking salt water intrusion. The total water requirment, [as published] therefore, was far more than the supply.

He said Bangladesh's major policy objective was to acquire self-sufficiency in food. But he added that called for raising three crops in about 13 million acres of land which were now single crop producing land.

The irrigation and land development suffered from three main problems flood, droughts and saline water intrusion in the southern belt. He suggested a long

term water development plan including a barrage across the Ganges below Hardings Bridge, Festuary [as published] control and a barrage across the Jamuna near Bahadurabad.

Only a barage [as published] over the Ganges, he said can ensure utilisation of whatever water flow was available in that river, it would help irrigation to the southern districts of Faridpur, Rajshahi Pabna Khulna, Jessore Barisal and Patuakhali.

Mr B M Abbas said the Brahmaputra Barrage was the key to the future development programme of the country. It would irrigate at a comparatively low cost a large area of land in both banks of the river.

Regulation of the tidal inflow from the Bay of Bengal, he said was necessary to halt the increasing inroads of saline water. He also emphasised the need for fresh water reservoir in the southern belts.

He also called for preparing a long term regional water development plan to ensure flood protection, drainage and irrigation. A major part of the regional water plan, he said, could be implemented by mobilising local people.

L K Siddiky

Speaking on the occasion with the help of slides and maps State Minister for Water Resources Flood Control and Power Mr L K Siddiky declared that just share of the Ganges water was a birth right of Bangladesh which no body could deny.

Rejecting the proposal for Brahmaputra link canal Mr L K Siddiky questioned the justification of the 207 mile canal apart from its technical feasibility. He also questioned the Indian argument on using the Ganges water diverted from the Farakka Barrage to flush silts from the Calcutta Port. He said that it was futile to use 40 thousand cusecs of the Ganges water to clear silts when daily tides and ebbs and monsoon waters failed to clean the Calcutta Port from siltation.

Turning on the harnessing of the Ganges water upstreams in Nepal the State Minister said that Nepal was keen on development of the water resources and stressed the need for a long term solution. He said "we have also got indications about help from the World Bank in harnessing the waters of the Ganges provided the three co-riparians Nepal India and Bangladesh cooperates." [as published]

STATISTICS ON INADEQUATE GANGES WATER SUPPLY GIVEN

Dacca THE BANGLADESH TIMES in English 1 May 81 p 1

[Text] The quantum of Ganges water released by India during dry months of January to March this years [as published] was not adequate for Bangladesh, according to Mr L K Siddiqui, Minister of State for Power, Water Resources and Flood Control.

The Minister was replying to a question by Mirza Abdul Latif of JSD at the Jatiya Sangsad on Thursday.

Following is the statement of 10-day period-wise discharge of water by India during the months of January, February and March, 1981.

January

1 to 10--56,866 cusecs, from 11 to 20--51,114 cusecs, from 21 to 31--46,600 cusecs.

February

From 1 to 10--49,139 cusecs, from 11 to 20--44,747 cusecs, from 21 to 28--38,532 cusecs.

March

From 1 to 10--35,814 cusecs, from 11 to 20--34,152 cusecs, from 21 to 31--33,129 cusecs.

MINISTER REPORTS ON DIVERSION OF KUSHIYARA WATERS

Dacca THE BANGLADESH OBSERVER in English 3 May 81 pp 1, 12

[Text] The government is aware of the Indian efforts to change the course of the River Kushiyara in Sylhet by throwing a large quantity of boulders Power Water Resources and Flood Control Minister Kazi Anwarul Huq told the Jatiya Sangsad on Saturday, reports BSS.

He told the House that the Ministry was taking effective measures against the efforts from Indian side, which he said would result in the change of the international boundary.

Replying to a call attention motion of Mr. M. A. Huq (Independent), Kazi Anwarul Huq also informed the House that the government had earlier protested against the creation of groynes in the Kushiyara River and hoped that the question of throwing boulders in the river would be settled through discussions.

Earlier Mr. M. W. Huq said in his call attention motion that India was regularly throwing a huge quantity of boulders in the River Kusiyara [as published] which flows through Jakigonj thana under Sylhet district. He pointed out that by throwing boulders from the other side of the border, India was trying to change the course of the river in violation of the Intenational Law. [as published]

He also said that the Indian government had already occupied a large area formed as a result of the change of course of the river on the other side and demanded immediate steps against the illegal Indian occupation.) [as published]

Kazi Anwarul Huq Minister for Water and Power development told the Jatiya Sangsad on Saturday that steps have already been taken to improve supply of power to the areas under western grid. He said distribution system has also been improved substantially.

He was replying to two separate call attention notices in the House by Mr. Almas Hossain (ML) and Mr. Salauddin Yusuf (AL-H).

The Minister said that due to shortage of fuel the power supply in the western grid suffered for a short period. But suply [as published] of fuel was arranged and the supply has been restored. He said the 60 megawatt Goalpara power station which was under repair will come into operation in August or September next.

The crisis started when this power station was under repair the barge mounted power station did not function as was expected up to its capacity. [as published]

The Minister further said that with the completion of the East West Inter-connector the situation in the western grid will improve. The East West Inter-connector is likely to be completed by the middle of next year, he said.

Kazi Anwarul Huq, however, admitted that load shedding in the western grid was necessary because production of power in the grid was lower than the demand. He said load shedding was done from 6 p.m. to 9 p.m. the pick hour. He suggested suspension of production in industrial units during this three hours to minimise loss.

INCREASE IN PETROLEUM PRODUCT PRICES ANNOUNCED

Dacca THE BANGLADESH OBSERVER in English 4 May 81 p 1

[Text] The Government on Sunday night announced revision of prices of petroleum products equalising the prices of korosene [as published] with diesel, reports BSS.

With the revision the prices of kerosene have been increased from Taka 17.65 to Taka 22.50 ex-depot.

Prices of diesel have not been increased but that of petrol (motor spirit) and octane increased slightly, according to the Bangladesh Petroleum Corporation sources.

The revised prices will come into effect from Sunday midnight.

Prices of petroleum products were increased last time on July 21, 1980.

Petroleum Minister Mr. Akbar Hossain told BSS that the revision of prices were designed mainly to equalise the prices of kerosene with high speed diesel.

The minister said that the domestic prices of petroleum products had not increased since last July athough [as published] OPEC prices increased nearly 13 per cent in the meantime.

He described the increase as adjustment which would help slightly reduce the loss incurred in the petroleum sector. This year the Minister said the Petroleum Corporation would have to incurr [as published] a loss to the tune of Taka 105 crore which was Taka 50 crore last year.

Giving rationale for increasing the prices of kerosene the Minister said that some unserupulous [as published] people had been using kerosene for diesel purposes.

From Today (Monday) the ex-agency prices of kerosene would be Taka 23.03 and that of diesel Taka 23.06 in Dacca Chittagong and Khulna.

Pump selling prices of petrol within 25 miles radius of Dacca and Narayanganj will be Taka 50 and that of octane Taka 54.23.

PETROLEUM MINISTER: NO CRISIS IN OIL SUPPLY

Dacca THE BANGLADESH OBSERVER in English 1 May 81 p 1

[Text] Minister for Petroleum and Natural Resources Lt. Col. (Retd) Akbar Hossion said in Dacca on Thursday night that there is no crisis of oil or oil products in the country, reports BSS.

He said during the recent years the government was successful in averting any crisis in this vital sector of economy due to proper procurement of crude from abroad and satisfactory distribution system within the country.

The Minister was speaking at the annual dinner of Bangladesh Petroleum Corporation Officers' Association at a local hotel. President of the association Mr. M. H. Chowdhury also spoke on occasion.

Lauding the role of the BPC in maintaining a normal situation in the petroleum sector, the Minister called upon the officers of the corporation to work with honesty and dispense justice at the appropriate time.

Referring to the various demands of the association the Minister assured the members that he would seriously endeavour to turn the BPC into A category corporation and further assured that he would sympathetically look into their demands.

BRIEFS

INVESTMENT CORPORATION CHAIRMAN--Mr. Zahirul Huq Chairman of the Investment Corporation of Bangladesh died of heart attack at his residence in Dacca on Saturday morning. He was 70 reports BSS. Late Zahirul Huq was the former Chairman of University Enquiry Commission and Deputy Chairman of the Planning Commission. He was also the ex-Managing Director of erstwhile Industrial Development Bank of Pakistan. The deceased left behind his widow, three sons and two daughters. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 May 81 p 1]

JSD MP RESIGNS--Mr. Abdur Rashid a member of Parliament from Comilla belonging to the Jatiya Samajtantrik Dal (JSD) has resigned from the Jatiya Sangsad it was announced on Saturday night, reports BSS. The Parliament Secretariat in a notification also said the parliamentary seat (Constituency No. 250 Comilla Eight) had fallen vacant. The notification said Mr. Abdur Rashid, a member of parliament elected from Constituency No 250 Comilla Eight, having resigned his seat in Parliament in the afternoon of April 30 1981 the seat has become vacant under Clause (2) of Article 67 of the Constitution. With the resignation by Mr. Rashid the total number of members belonging to JSD now stood at seven. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 May 81 p 1]

PAKISTANI REPORT DENIED--A Foreign Office spokesman on Saturday said that a report published by the Pakistani daily JASARAT and lifted by PPI news agency (Pakistan Press International) quoting the Bangladesh President on the matter of arms and economic aid to Pakistan had "no basis at all", reports BSS. The spokesman in a statement told newsmen that the attention of the Government of Bangladesh had been drawn to a report carried by PPI and published in a section of Pakistan Press quoting the Bangladesh President on arms and economic aid to Pakistan. The PPI report is claimed to be based on an exclusive interview by the Dacca based correspondent of the daily JASARAT. The spokesman categorically said that the President of Bangladesh did not grant any interview to JASARAT correspondent and therefore the said report and the views attributed to him in that report had no basis at all. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 May 81 p 1]

FRENCH DRILLING COMPANY--Petrobangla signed a contract with a French Firm named Dresser France for procurement of a modern Ideco Drilling Rig, requipment [as published] and ancillaries at a cost of 84.00 million French francs. The purchase will be financed under France-Bangladesh financial protocol. The French Government is taking keen interest to assist Bangladesh in the energy sector, says a Press release of Petrobangla issued in Dacca on Saturday. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 May 81 p 12]

TEAM TO DAKAR--A three-member Bangladesh delegation left Dacca for Dakar to attend a 10-day interregional meeting on international rivers sponsored by the United Nations which begins in the capital of Senegal on May 5. The delegation comprises Mr M. F. A. Siddiqui Secretary, Ministry of Relief and Rehabilitation and Member of Indo-Bangladesh Joint Rivers Commission, Mr. Muhammad Muniruzzaman Additional Secretary, Ministry of Power Water Resources and Flood Control and Mr. Amjad Hussain Khan Director Joint Rivers Commission. The meeting is being held in pursuance of the Resolution Number 7 of the UN Water Conference held in Mardel Lata Argentina, in 1977. The meeting will mainly consider institutional and legal arrangements, progress in cooperative arrangement and economic and financial matters. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 May 81 p 12]

STATEMENT ON ISRAEL--The Government of Bangladesh has been deeply shocked at the recent Israeli attempt to commit sacrilege on the mosque 'Majid Al Ibrahimi' in the village of Arbaa in the city of Hebron says an official announcement. The Zionist regime also prevented the Muslims from offering their Friday prayers in the said mosque. The Government of Bangladesh strongly condemn this act of sacrilege and considers it yet another example of Zionist aggression against the Arab and Palestinians and an affront to the sentiments of Muslims. [as published] [Text] [Dacca THE BANGLADESH TIMES in English 30 Apr 81 p 1]

VICE CHANCELLOR TO WASHINGTON--Services of the former Provice-Chancellor of Dacca University Prof Afsaruddin have been placed at the disposal of the government for appointment as education attache in the Bangladesh Embassy in Washington, according to a reliable source. It is learnt that Prof Afsaruddin has been advised to apply for leave without pay for a specified period as professor, Department of Sociology; DU. KARENS OPTIMISTIC OF ACHIEVEMENTS

Bangkok BANGKOK POST in English 19 May 81 p 2

[Article by Pairoj Poompradit]

[Text] NATION NEWS Editor Pairoj Poompradit last week ventured into the jungled area on the Thai-Burmese border to assess the latest developments there.

He had an exclusive interview with one of the important rebel leaders, Gen Bo Mya, leader of the Karen National Union, who discussed the latest thinking among the armed minority rebels. Here is his report:

IT HAS BEEN almost 33 years of tough and difficult struggle for independence against Rangoon. But the Karen National Union (KNU) appears determined to fight on.

Gen Bo Mya, leader of the KNU, said in his jungle headquarters last week: "We strongly believe that victory will be with us in the near future."

The 55-year-old well-built Karen guerrilla leader may not be all that convincing in his litany of propaganda statements. But he does exude confidence.

"We believe that we are almost winning the war. But the problem is that our enemy, the Ne Win group – is still being aided by some foreign countries up to this day. It is a very big problem for us to overrun them now," he said.

Bo Mya admitted that his guerrillas were short of arms and ammunition. He claimed about 10,000 "regular troops" on his side.

"We have tried our utmost to get arms from abroad. We have asked for arms from the United States and Taiwan. But our efforts have been in vain. So, we have to snatch arms from our enemies in the battlefield," he said.

A KNU official said every guerrilla ordered to go out to do battle against Burmese government troops would normally be given about 150 bullets each time while every Burmese trooper is known to carry about 300 rounds of ammunition each.

"Right from the beginning until today, we have had no foreign support. But we continue to survive because not only the Karen people are on our side, the entire nationalists are also against the Burmese Government," Bo Mya said.

Bo Mya was speaking in Karen while Saw Than Aung, the KNU's prime minister, acted as interpreter translating into English.

Bo Mya, who concurrently holds the posts of the president, defence minister and foreign minister, claimed that even the "oppressed Burmese people" supported the Karen revolution.

"We are not fighting against all Burmese. We are fighting the Burmese who adopt "Great Burmesenism." His greatest enemies, he said, are Ne Win himself and his army.

"Our political demand is for the formation of a genuine federal union in which every nationality has a state of its own with equal status in every respect," Bo Mya said.

Burma, he said, may officially call itself a union. "But in fact, it's not a genuine union. It is a country where all nationalities are oppressed by the Burmese Government," he claimed.

The Karen rebels had earlier demanded an autonomous and independent status. But now, they want a federal union.

"At the time we were fighting alone against the Burmese Government, our political demand was our own freedom. But now that we have united with other groups, our demand is a federal union," Bo Mya said.

He added: "When we started the revolution, only the Karens were fighting the Burmese Government under the premiership of U Nu. Later, we grouped together all the revolutionary parties. On that ground, our demand has been changed so that our goal could serve all the nationalities."

The KNU was pivotal in forming the so-called "National Democratic Front (NDF)" which is made up of several minority groups all opposed to the Burmese Government.

The NDF, in which Bo Mya serves as the president, currently comprises seven groups namely the KNU, the Karenni National Progressive Party, the Shan State Progressive Party, Paluang State Liberation Organization, Pa-o National Organization, the Arakan Revolutionary Party and Lahu National United Party.

The NDF's political line, Bo Mya said, is to stand for national democracy.

"We are neither rightists or leftists," he said.

He did admit that some members of his group had "long time ago" accepted the doctrine of the Burmese Communist Party (BCP). But they soon discovered that their efforts were in vain.

"The BCP doesn't stand for all nationalities. They don't stand for the cause of the people. They simply want to usurp power. That's why those who were initially inclined towards the leftist ideology returned to be united with us," he said.

Th left-leaning members had tried to approach some Communist countries, including China, for help. But the move proved futile.

But Bo Mya admitted that the joint armed struggle of the NDF had not been too well in its joint military actions.

"When we formed the NDF in 1976, we also set up the NDF's military committee with its secretary general being the second in command of our armed forces – the Karen National Liberation Army (KNLA). But in practice, we still cannot fight under one single command because each party faces its own difficulty in sending troops to the NDF headquarters here," he said.

But Bo Mya said he continued to try to persuade each party to station one company of troops at the NDF headquarters. "In that case, we would have seven companies of fighters ready to take on the enemy," he said.

Coordinated attacks were planned occasionally, Bo Mya said. "For example, when we struck a town, others in the front would strike another town or another place at the same time," he said.

Bo Mya said that the whole "armed personnel" of the NDF was in the range of 40,000 to 50,000 – and 20,000 of these belong to the KNU while of these about 10,000 are regular troops."

He said that plans for launching heavy offensives against the government troops had been planned. But the main problem is the lack of arms.

"We can get thousands and thousands of soldiers in a month's time because all nationalities are willing to fight."

Bo Mya was careful in his statements about Thailand. He said. his movement had tried to avoid involving Karens who had moved into Thailand.

"We never tried to persuade them to join us. But if they volunteer, we would accept them. However, so far, there aren't too many in this category," he said.

Asked for his comments on Thailand's attitude towards his movement, Bo Mya said:

"We are not against Thailand. And we hope Thailand would not be against us. So far, we have been getting along fine ..."

BRIEFS

CLASH IN 'LIBERATED AREA'--We will not tolerate any enemy who comes into our liberated area; if his foot trespasses on our area we will cut it off. At 0400 on 26 May, two regiments from the military government's mercenary army, under the cover of darkness, intruded into our liberated area in (?Namtaung) township of Kutkai region. The people's army and the people lured the intruding enemy soldiers from the mercenary 3d and 9th infantry regiments into terrain which they know very well. The permanent army, the regional army and the people's militia later surrounded and annihilated the enemy. In a battle which lasted for about a day on (Mabayang) hill near (Yang Tawng) village, the enemy ultimately regrouped the remaining troops, left behind their corpses and fled hurriedly. When the people's army and the people cleared the battleground after the battle, 43 enemy corpses were found. Searches have yet to be conducted in the long grass plains and deep ravines. Among the corpses were three officers. It is also learned that a major was among the scores of enemy soldiers wounded in the battle. So far, among the supplies seized from the enemy are 1 pistol, 1 G-2, 1 Sten, 3 artillery shells for a 75 mm recoilless fieldgun, 24 shells for an 81 mm mortar, 3 shells for a 50 mm mortar, 5 mines, 12 shells for a collapsible mortar, 3,000 rounds of other assorted ammunition, important documents, medicines and other war materiel. GANDHI'S 7 MAY GENEVA PRESS CONFERENCE DETAILED

Calcutta THE STATESMAN in English 8 May 81 p 7

[Text] Geneva, May 7--Mrs Gandhi told a Press conference here last night that while India intended to stick to her policy of using nuclear energy only for peaceful purposes, it had to be prepared to face what Pakistan did, reports PTI.

On the U.S. decision to arm Pakistan with sophisticated weapons, she said this was bound to increase tension in the region although it would not be fair to deny Pakistan its legitimate defence needs.

To an American correspondent who thought that with its decision to arm Pakistan with weapons, the Reagan Administration had signalled another tilt towards that country, Mrs Gandhi said: "We have faced this tilt for many years, and we have survived it."

At the same time, the Prime Minister hoped that the U.S. Government would face up to the realities and not have global strategies which could increase tensions. On its part, India, she added, continued to make efforts to be friendly and to improve relations with the USA.

Mrs Gandhi also said that while Pakistan had been telling India that it had no intention of making nuclear weapons, "we do not know what the (real) situation is."

At her hour-long Press conference at Hall of Nations, Mrs Gandhi was asked questions by the international Press on India's nuclear programme, U.S. move to arm Pakistan, the Afghan issue, family planning programme in India and her "serious accusation" in her address to the World Health Assembly yesterday about dangerous drugs being used in developing countries.

An American journalist reminded Mrs Gandhi about her statement that India would have to respond in an appropriate way if Pakistan went nuclear and he referred to a PTI report that Pakistan was evacuating villages in the border in Rajasthan area for that purpose. How would India respond, he asked.

Mrs Gandhi told him that India had been using nuclear energy for agriculture, medicine, power and other peaceful purposes. "That is what we intend to do," she added. However, she went on to emphasize that any country had to be prepared to face what its neighbours did.

On Afghanistan, Mrs Gandhi did not see a way out at the moment. She reaffirmed the need for a political solution and again warned that mere condemnation of anyone would not help.

The Prime Minister rejected a suggestion for mediation by her to end the seven-month-old Iran-Iraq war, saying that others were trying for it. India was in a four-member non-aligned peace committee set up for this purpose, she added.

Asked what would be India's reaction if Switzerland supplied Pakistan material to help in its nuclear programme, Mrs Gandhi said it depended on whether Pakistan made weapons or used it for peaceful purposes.

/The Prime Minister refuted propaganda that Pakistan had started its nuclear programme only after India's peaceful nuclear explosion in 1974 by pointing out that it had now been established that Pakistan had started its investigation to get knowledge of the subject "even before we did anything."/ [in boldface]

Elaborating her reaction on the U.S. decision to give sophisticated arms to Pakistan, Mrs Gandhi pointed out that there was a general increase in tension in the region and a war (between Iran and Iraq) was going on in India's neighbourhood.

The question was why some countries were trying to help Pakistan with arms at this time. Would it not increase tensions, she asked, adding that she did not see this issue purely in the Indo-Pakistani context but in a broader perspective. "If there are tensions, we move closer towards a war," she remarked.

The Prime Minister reminded the Reagan Administration that giving arms to other countries never strengthened them.

On Sino-Indian relations, Mrs Gandhi said both the countries were trying to strengthen friendship. They were in touch with each other and the Chinese Foreign Minister was expected to visit India soon. "We hope the relations will improve," she added.

About her recent talks with the British Prime Minister, Mrs Margaret Thatcher, Mrs Gandhi said that their views differed on a number of matters.

In her opening remarks at the Press conference, the Prime Minister said that the world today faced a large number of problems. It was time for a greater exchange of views and cooperation to find areas of agreement.

/Asked for her views on the Brezhnev proposal to make the Persian Gulf a region of neutrality, Mrs Gandhi said that the world situation was so serious that any suggestion that would help should be given due consideration./ [in boldface]

Mrs Gandhi faced a large number of questions on her statement yesterday morning about the drug industry having become very powerful and that sometimes new drugs were used in weaker countries for experimentation.

In response, she pointed out that, for instance, the USA had lifted restrictions (for export) on several drugs not allowed for use within that country. It might be so in other places.

She told another questioner that while India had liberalized its general import policy, it had to protect its interests and see that prices of drugs did not become prohibitive. If these could be produced within the country, that would be better.

She described as "delicate" a question as to what measures her Government proposed to take to control population. She felt that education would have to be stepped up and people would have to be persuaded and convinced.

The Prime Minister reiterated that nobody would be forced to undergo sterilization.

Replying to a question on brain drain, she said that during her previous regime a large number of scientists had returned to India. The Government had now been able to enthuse the scientific community again and she hoped more would return to the country.

When a reporter asked how she reconciled her health policy and "imprisonment of medical students" on the reservation issue, Mrs Gandhi said she did not think they had been imprisoned as such except for a day or so. However, if anyone committed a crime, action had to be taken.

On the Indian Ocean, Mrs Gandhi said the situation had deteriorated of late because of tremendous competition among Superpowers which was dangerous for the whole world. But she did not agree with the questioner that the situation had reached a "point of no return."

About oil prices, she said that India had been hit the hardest but the oil-producing countries could not be blamed because they had been exploited for long. Western countries were not really suffering because they could afford to pay more.

PAPER REPORTS GANDHI ACTIVITIES IN BERNE

Calcutta THE STATESMAN in English 8 May 81 pp 1, 7

[Text] Berne, May 7--Mrs Gandhi today appealed for an immediate end to the "blatant confrontations" in many parts of Asia, which she said were "neither local nor unconnected events," reports UNI.

Speaking at a luncheon in her honour hosted by the Swiss President, Mr K. Furgler, the Prime Minister said the time had come for diplomacy to re-establish confidence and India would consider it a privilege and a duty to do what it could. "We are engaged in efforts to reinforce trust in our immediate region."

She expressed her anxiety about the conflict between Iran and Iraq and said that in Afghanistan conditions were not being created for the withdrawal of foreign presence. These developments were not causes but consequences of events in the neighbourhood and even further afield.

She agreed with Mr Furgler that recourse to armament was the reason for and not the result of international tension. Mrs Gandhi also referred to the atmosphere of suspicion in Europe and the tremendous increase in the arms build-up in the Indian Ocean region.

Mrs Gandhi said confrontation must be stopped. She referred to an Indian saying: "when elephants fight the bushes are trampled" and said that nuclear armament, and even deadlier methods of war, threatened not just one country or another but human civilization itself.

/On disarmament, Mrs Gandhi said: "Like Switzerland, we stand for total and universal disarmament. The cost of military defence of strong nations rises every day and commands the major share of world resources and researchers neglect the more worthwile and immediate responsibility of the social defence of the weakest and the poorest of the earth./ [in boldface]

"Peaceloving people should continue their efforts to redress the balance in the international community. Man's intelligence will redeem itself not by making death more deadly, but by making life more livable."

"Deep-Rooted Suspicions"

Mrs Gandhi said there was no problem which could not be solved through negotiations. As regards East-West or North-South problems dialogue must be continued.

The process of dialogue was even more valuable at this point of time because of deep-rooted suspicions. The East-West dialogue might not yield quick results. Old prejudices were blocking North-South discussions.

She said Switzerland, which had a deservedly high reputation for mediatory diplomacy, could do much to break the deadlock in the efforts to usher in a more equitable international economic order.

National sovereignty and the rule of law, friendship and good neighbourly relations, economic cooperation and international friendship, non-interference and regard for human dignity should be the basic principles which govern international relations. That could be the only sound base for inter-dependence, she said.

PTI adds: Mrs Gandhi described her current visit to Switzerland as a homecoming, saying that it reminded her of her own ancestral home Kashmir which had similar snowny mountain peaks azure lakes and flowering meadows.

Mrs Gandhi today invited Mr Kurt Furgler and his wife to visit India. The Foreign Minister of Switzerland was also invited.

Mrs Gandhi today advised the Indian community in Berne to act and behave in a manner so as to project a true picture of India.

Addressing them at the residence of the Indian Ambassador in Berne, she said the Western Press and the media were biased against India. The Indian Press too, at times, did not project the true picture of happenings within the country, she added.

Mrs Gandhi said the Indians living abroad were the unofficial emissaries of their country and people abroad joined their opinion about India by coming into contact with them.

She asked them to keep in touch with the developments, both economic and political, in India and strive to improve the image of the country which, she assured them, was "on the march again." She said the economy had started picking up and good and prosperous days were ahead.

Visit to School

Earlier, Mrs Gandhi drove 80 km from Geneva to Bex, a picturesque village, to visit the La Pelouse Institute where she studied in her childhood. She went round the institute, where she was a student in 1925-26 and again in 1935, and planted a sapling there. She said her memories of Bex were evergreen.

From Bex, she went to Berne.

Mrs Gandhi will make a night halt at Vitznau. Tomorrow she will go to Zurich and spend the night there before leaving for Kuwait on May 9.

Western Media

Last night, the Prime Minister has deprecated the tendency in the Western media to look down upon the poverty in India and the lack of literacy in the country.

Speaking at a dinner hosted in her honour by the permanent Indian representative at the United Nations office in Geneva, Mrs Gandhi said that as a person who always had close contact with the people and who was exposed to them all the time she was greatly impressed by the degree of understanding shown by ordinary Indian people.

The Prime Minister said: "What made her most proud of her people was their spirit of accepting challenges and their whole attitude towards life." Mrs Gandhi said she had come across the expression of this spirit at her daily open-house meetings with the people, a practice she had begun in her father's time. Anyone could call on her at these meetings.

She said this practice brought her closer to the people, their feelings, and their aspirations.

The President of the Republic and Canton of Geneva, Mr Andre Chavanne, who was also present at the occasion said that the people of Geneva were honoured by her presence specially as she (Mrs Gandhi) had an older association with the city. He paid tribute to the people of India who he said were the true inheritors of ancient culture, wisdom and philosophy.

Thanking Mr Chavanne for the warm welcome accorded to her in the city, the Prime Minister said she was very happy to be back in a city with which she had such old association.

Recalling that a part of her schooling had been in Geneva, Mrs Gandhi said "this for her" had been significant experience because her stay here had enabled her to meet different kinds of people--intellectuals and others--and exposed her to a different culture.

The president of the 34th World Health Assembly, Mr Violaka Parasekva, the director-general of the World Health Organization, Dr Mahler, the director-general of the United Nations, Dr Luigi Cottafavi, and the Health Minister, Mr B. Shankaranand, who is leading the Indian delegation to the Assembly, were also present at the dinner.

GANDHI GIVES INTERVIEW TO PAKISTAN DAILY

New Delhi PATRIOT in English 11 May 81 p 7

[Text] Islamabad, May 10 (PTI). Prime Minister Indira Gandhi has assured the people of Pakistan of the "fund of good-will which exists in India towards them," an Islamabad daily reported today.

In an interview featured on the front page, independent English language daily THE MUSLIM quoted Mrs Gandhi as saying that her Government had a feeling of good-will and concern for the people of Pakistan.

"We feel that a stable Pakistan and progress of its people is as much in India's interest as it is in Pakistan," she said during a 40-minute question answer session in her office in New Delhi.

The MUSLIM report said she appeared to be at pains to erase the impression that she was less friendly towards Pakistan and its people than many opposition leaders in India.

"We believe in co-existence. We would not let any system of government stand in the way of attempting friendship with Pakistan," she said in reply to a question about the current state of Indo-Pakistan relations.

Asked about the present health of the Simla spirit, Mrs Gandhi said, "I think it is a bit weak at the moment. That is why we have asked our Foreign Minister to go there."

The Prime Minister told the newspaper "There is no specific proposal" that Mr Rao would be taking to Islamabad on his visit later this month or in early June. But "we are constantly trying to see that the climate does improve."

The MUSLIM report said Mrs Gandhi seemed to have softened her attitude a little over arms purchases by Pakistan but had not ceased opposing it.

She told the newspaper: "We are not afraid of Pakistan having arms or of Pakistan attacking us. We can deal with it. The impression that India was afraid of Pakistan was deliberately created."

But, Mrs Gandhi added "When Pakistan once becomes part of global strategies then I think it becomes much more dangerous." India did not want the area to be caught in global rivalries. "We think that is a great danger."

Asked if acquisition of the capability by Pakistan to explode a nuclear device would amount to possessing the bomb, Mrs Gandhi said, "No. Just an experiment would not."

But, the Prime Minister added, "The information is not that it will acquire nuclear capabilities but actually the making of a bomb. Now, that does change the overall situation, tensions and so on. We know that there are a lot of people interested in this," she said. Asked if she meant outsiders, Mrs Gandhi replied, "Also, I think."

Motivations

In reply to another question the Prime Minister said: "It is quite true we do not favour military dictatorships and things like that. But we believe in coexistence."

India had not let this stand in the way of attempting friendship with Pakistan, she said reminding the questioner that it was she who took the initiative for Simla talks.

She said at no time would India stand in the way of Pakistan's legitimate needs of defence or anything else. It was because they got combined with a particular attitude that misgivings and apprehensions arose in Indian people's minds.

India, she said did not want an arms race and "We think Pakistan, as a trusted friendly neighbour, would be a very great advantage to India."

In airing views about Pakistan's decision to acquire arms, Mrs Gandhi said India was not interfering with it." We are just saying that experience has shown that this is not strengthening the country.

Need for Talks

Asked if it meant she proposed to take certain steps in the immediate future, Mrs Gandhi said, "Steps can only be mutual. We can talk to the Government of Pakistan. I do not think one can just mention something in the air here."

GANDHI INTERVIEWED ON KUWAITI TELEVISION

Bombay THE TIMES OF INDIA in English 11 May 81 p 9

[Article by M. Shanim: "PM Warns Against Rivalry in Ocean"]

[Text] Kuwait, May 10. The Prime Minister, Mrs Indira Gandhi, said today that if the 'presence' kept on growing in the Indian Ocean, it would pose a threat to us all.

In an interview to Kuwait television here, Mrs Gandhi said India was not the only country in the region which was concerned with the situation in the Ocean. The littoral states had passed a resolution seeking to convert the region into an area of peace. But "the presences" kept growing and one (power) tried to outdo the other. This kind of confrontation could be dangerous to all the countries in the region.

Mrs Gandhi was asked what should be done in the Arab-Israel conflict after the failure of the Camp David agreement. She said there had been a noticeable change in the attitude of Israel. Those who had friendly relations with that country should exert greater influence on it.

About the Iran-Iraq war, Mrs Gandhi said India wanted an early solution, "not because we were friendly with both the countries, but because that kind of conflict in the neighbourhood could open doors to interference by others."

Mrs Gandhi welcomed the idea of a Gulf council but advised that the impression should not go around that it had been set up against anyone, because it would then have an adverse reaction.

About Afghanistan, Mrs Gandhi said the situation called for a political solution and not apportioning blame. Asked what solution she would suggest, Mrs Gandhi said, "Well, it is very difficult at the moment. Life is full of difficulties." The interviewer then said that she had faced many challenges "and that is why we are looking forward to you to find a solution," Mrs Gandhi smiled and said the solution could be found "if all of us put our heads together."

The interviewer told Mrs Gandhi that India's support to the Arabs and to the PLO was greatly appreciated in the Arab world.

Answering another question, Mrs Gandhi said India believed in a just economic order. It also believed that the developing countries should cooperate with each other. "There should be a south-south dialogue before a north-south dialogue."

Briefly tracing the history of the non-aligned movement, Mrs Gandhi said it was true that it had weakened recently because members concentrated on the aspects that divided them. However, the Western press was always giving the impression that the movement could collapse any minute. Despite that, the members of the movement recently produced a working document.

Abu Dhabi (WAM): "The Americans have decided to store nuclear arms in the Indian Ocean island of Diego Garcia at a time when the international situation is drifting towards confrontation," Mrs Gandhi has said.

Mrs Gandhi told the Emirates news agency (WAM) in an interview, "The increased foreign presence in the Ocean, the actual war going on in Asia and the thriving of the armament industries are all signs of the international situation drifting, willingly or unwillingly, towards a confrontation.

Mrs Gandhi agreed that it would be impossible to go to the other extreme of achieving total neutrality of the Ocean but at least an effort should be made towards this end.

Asked about the nature of the effort which should be made to ensure the neutrality of the Ocean. Mrs Gandhi said all the countries concerned should try to persuade the super powers that neither should take attitudes which would aggravate the situation any further.

GANDHI SPEAKS TO INDIANS LIVING IN KUWAIT

New Delhi PATRIOT in English 11 May 81 p 7

[Text] Kuwait, May 10 (PTI)--Prime Minister Indira Gandhi today said her visit to "this friendly country is to take a step forward in strengthening our age-old ties and not to ask for anything." "I have brought the message of friendship," she said.

Addressing a large gathering of Indian community at which she was given a traditional welcome with "arati" by young girls attired in dancing costumes and showering of rose petals, Mrs Gandhi expressed the hope that Indians working in the Gulf region would help further strengthen friendship and good neighbourliness by hard work and disciplined conduct. Thereby, they would help enhance the image of their country, she said.

Mrs Gandhi said Indians living abroad could in every way possible assist their motherland in its efforts to build a self-reliant economy. They could do so through investments of their earnings in India and other ways. Each person could do this according to his capacity and even smallest remittances would help improve India's foreign exchange problem.

Mrs Gandhi did not directly refer to the memorandum submitted on behalf of Indians in the Gulf region seeking certain facilities by way of reduction in air fares and better returns on foreign exchange remittances. Later, informally talking to local Indian journalists, she said all these would be looked into.

Mrs Gandhi said India's relations with Kuwait and other Arab countries are long standing. There are traditional ties of friendship of culture and ties of trade and commerce, but in this fast changing world there are many problems which have arisen in the region. It is important to keep in constant contact and exchange views so "we can cooperate in many matters in trying to help resolve these problems."

She recalled the visit to India last year of the Amir of Kuwait and said "we received him with love and respect. I then thought I should also come here--to this very friendly country."

Mrs Gandhi expressed her thanks to the Indian community in Kuwait for helping Indians who were stranded when the Iran-Iraq war broke out and enabling them to go back to India. Mrs Gandhi was greeted by a large crowd and she in turn walked around offering her greetings to them.

PAPER GIVES DETAILS OF GANDHI TALKS IN KUWAIT

Calcutta THE STATESMAN in English 11 May 81 p 1

[Text] Kuwait, May 10--Mrs Gandhi and the Amir of Kuwait today discussed super-Power confrontation in the Gulf and the Indian Ocean even as their Ministers and officials were paving the way for additional Kuwaiti financial investments in India, reports PTI.

On the second day of her three-day official visit to this oil rich nation, Mrs Gandhi had wideranging discussions on the international situation with the 54-year-old Amir, Sheikh Jaber al-Sabah, and separately with her Kuwaiti counterpart and Crown Prince, Sheikh Saad al Abdullah al-Sabah.

The Afghan issue, militarization of the Indian Ocean and the situation in the Indian sub-continent, possibly including Pakistan's nuclear programme are believed to have figured at Mrs Gandhi's talks with Kuwaiti leaders but no official word was available on the details of the talks.

Kuwait today agreed to provide a loan of Rs 52 crores for the Anpara thermal power station in Uttar Pradesh. An agreement for this was signed.

Later, Kuwait showed interest in financing part of the foreign exchange component of the Thal Vaishet fertilizer project in Maharashtra.

On Afghanistan, the joint communique to be issued tomorrow is believed to have expressed deep concern and calls for a comprehensive political solution based on withdrawal of foreign troops and ensuring its sovereignty and integrity. They expressed hope that the non-aligned Ministers' committee would be able to make some headway in bringing the Iran-Iraq war to an end.

India and Kuwait have also voiced the grave concern over the latest development in Lebanon and hoped it would not be allowed to escalate.

The Crown Prince and Prime Minister of Kuwait reportedly told Mrs Gandhi that the Kuwaiti fund for economic development would continue to assist India, especially in oil-related industries and fertilizer production.

While Mrs Gandhi and the Kuwaiti leaders held talks, India's Minister of State for Commerce, Mr Khursheed Alam Khan, and the Kuwaiti Commerce Minister, Mr Jasim Khaled, discussed the general possibility of Kuwaiti investments in India

through the Kuwaiti Development Fund and the Kuwaiti financial market. India pointed out that it had recently relaxed rules for foreign investment.

Another topic discussed by the two Ministers related to manpower problems such as issue of visas for Indian workers. India offered to provide a draft agreement for the purpose and the Kuwaiti side reacted favourably. The two sides also considered the possibility of entering into an agreement to avoid double taxation.

During the talks, Kuwait complained of delays in the supplies of iron and steel from India. The Indian side agreed to look into it. It was also agreed to activate the Indo-Kuwaiti Joint Economic Commission.

Mrs Gandhi, speaking to a wide Gulf television audience tonight, warned of grave dangers arising from big Power confrontation in the Gulf and the Indian Ocean region.

In a prime time television interview to the Kuwaiti TV, Mrs Gandhi pointed out that all littoral States had favoured the Gulf and the Indian Ocean to be kept free from foreign presence, but in spite of that such presence was increasing.

"This type of confrontation with each Power wanting greater presence is threatening us all" she added.

Mrs Gandhi arrives in Abu Dhabi tomorrow on the last leg of her nine-day three-nation tour of Switzerland, Kuwait and the United Arab Emirates.

DETAILS OF INDIAN-KUWAITI JOINT COMMUNIQUE GIVEN

Bombay THE TIMES OF INDIA in English 12 May 81 pp 1, 13

[Text] Kuwait, May 11: Both India and Kuwait have called for the restoration of the non-aligned status of Afghanistan, withdrawal of Israeli forces from Arab territories and reduction and eventful withdrawal of the "presence" in the Indian Ocean. The two countries expressed full support to the efforts made by non-aligned countries to bring about an end to the Iran-Iraq war.

A joint communique, signed by the Prime Minister, Mrs Indira Gandhi, and the Crown Prince and Prime Minister of Kuwait, Mr Saud Abdullah al Salem al-Sabah, said there were vast possibilities for further increasing economic exchanges.

The communique noted that Mrs Gandhi and the accompanying delegation were given a warm welcome in Kuwait, reflecting the age-old relations between the two countries.

It stated that during the visit, the Prime Minister of India had called on His Highness the Amir of Kuwait. The two leaders exchanged views on bilateral relations as well as regional and international issues. The talks reflected similarity of views in regard to a wide range of issues which were discussed.

The Crown Prince and Mrs Gandhi had detailed discussions on matters of common interest and these discussions were held in an atmosphere of cordiality, mutual trust and understanding. They recalled with profound satisfaction the traditional and close relations between Kuwait and India. The leaders expressed their determination to further develop these relations to the mutual benefit of the peoples of both countries on the basis of equality and mutual respect.

Stress on Non-Alignment

They noted with concern the deterioration in the international situation, the persistence of unresolved problems and the emergence of new areas of tension. Both sides were convinced that in the period of acute international crisis today, the movement of the non-aligned countries and the policy of non-alignment were indispensable for the promotion of international peace, cooperation and progress.

The two sides felt that there was need, more than ever before, to reassert the role of the non-aligned movement as an independent non-bloc factor in international relations and as a positive, moral and political force for the preservation and strengthening of peace and security in the world.

The communique noted with concern the deteriorating situation in West Asia and emphasised that it was a source of grave danger for the peace and stability of the region and the world as well. No just and durable peace in the region could be found without the immediate and complete Israeli withdrawal from all Arab territories, including Jerusalem, occupied by Israel since 1967, and the restoration of the inalienable rights of the Palestinian people, including the right to return to their homeland, and to establish their independent state. They reiterated their full support for the PLO.

The Kuwaiti side expressed deep appreciation of India's consistent and firm policy of supporting the Arab cause. The Indian side reiterated that this policy would continue. The two sides also expressed grave concern over the situation in Lebanon and called for an urgent and peaceful solution. They strongly condemned the Israeli aggression against Lebanon and Israel's illegal intervention in the internal affairs of Lebanon.

The two sides noted with grave concern the situation in Afghanistan and called for an urgent, peaceful, comprehensive and just settlement on the question on the basis of the withdrawal of foreign troops, return of the refugees to their homes in safety and honour, strict observance of the principles of non-intervention and non-interference and full respect for the independence, sovereignty, territorial integrity and non-aligned status of Afghanistan.

Grave Concern

They expressed their deep concern and distress at the Iran-Iraq conflict. They hoped the two would sort out their differences peacefully. Kuwait and India expressed full support for the efforts being made by the non-aligned ministerial committee to restore peace.

They also expressed their grave concern at the increasing escalation of the great power presence in the Indian Ocean against the declared wishes of the littoral and hinterland states of the Ocean. They called on the great powers to progressively reduce and eventually eliminate their military presence from the Ocean. The two sides reaffirmed the need to redouble the efforts for the speedy implementation of the declaration of the Ocean as a zone of peace, as contained in the 1971 United Nations general assembly resolution.

They affirmed their conviction that safeguarding and maintenance of peace and security in the Gulf region was the responsibility of its states alone without any foreign interference. While reviewing the situation in the Gulf region, the Kuwaiti side explained the objectives behind the establishment of the cooperation council for the Arab states of Gulf. India expressed its best wishes for the success of the step.

They agreed that tension and confrontation in southern Africa could not be eradicated and no peace established until the liberation of Namibia from the illegal occupation of South Africa and the dismantling of the structure of apartheid in South Africa. They called for total support to the decisions taken by the non-aligned foreign ministers' meeting on Namibia held in Algiers.

The two sides noted with deep concern the acute crisis facing the world economy and in particular the developing countries. They underlined the urgent need to make structural changes in the present international economic system.

India expressed its great appreciation to the government of Kuwait for the assistance that had been extended over the past few years by the Kuwait fund for Arab economic development. Kuwait assured India of continuing willingness in assisting in the economic development of India. The Kuwait fund for Arab economic development would explore new avenues including projects relating to oil-related industries and fertiliser production.

Economic Links

The communique expressed satisfaction at the satisfactory increase in economic exchanges between the two countries. They believed that in the present situation and in the context of developments taking place in both countries, there were vast possibilities for further increasing economic exchanges and for their diversification. In particular, mutually beneficial possibilities existed in areas of investment and joint ventures in India, Kuwait and in third countries. The possibility of devising a suitable arrangement for facilitating such investment would be further pursued by the two sides.

Kuwait and India expressed Profound satisfaction at the positive outcome and results of Mrs Gandhi's visit to Kuwait. This visit had made a significant contribution to increased understanding and cooperation between the two countries. Mrs Gandhi invited the Crown Prince and Prime Minister of Kuwait to visit India. The invitation was accepted.

HISTORY OF SINO-INDIAN BORDER DISPUTES OUTLINED

Calcutta THE STATESMAN in English 11 May 81 p 8

[Article by Karunakar Gupta: "Sino-Indian Relations: Getting the Facts Straight"]

[Text] Discussing the border dispute between China and India in the context of Mr Huang Hua's forthcoming visit to India, the author sees the best solution in the offer of "the actual line of control" as the basis for a settlement of the dispute. Especially so, he says, because "distorted records" influenced India's notions about its frontiers with China. Repeating the claim that the McMahon Line is not based on a legally valid treaty, he urges a scrutiny of fresh evidence to expedite a compromise settlement.

Karunakar Gupta, who did his Ph.D. in International Relations at the London School of Economics, has written several books on Indian foreign policy, including one on Sino-Indian frontier problems.

THE recent meeting of the Chinese Vice-Premier, Mr Deng Xiaoping, with the Janata Party M.P., Dr Subramaniam Swamy, and the Indian Ambassador in Beijing, hit the headlines in the Indian and foreign Press. Not only did Mr Deng break the news of the forthcoming visit of the Chinese Foreign Minister, Mr Huang Hua, to India this summer, but he also gave a clear indication of his approach in tackling the long-standing problems between the two countries, complicated since 1959 by a succession of event such as the Tibetan uprising and the flight of the Dalai Lama to India, the border skirmishes and then, the Chinese invasion in 1962.

Mr Deng's formula for the settlement of the border dispute was Chinese acceptance of the McMahon Line in exchange for an Indian agreement to the Chinese claim to Aksai Chin. In June last year, Mr Deng had made a similar suggestion in his interview with an Indian journalist. He said, "China has never asked for the return of all the territory illegally incorporated in India by the old colonialists ... China suggested that both countries should make concessions, China in the east sector and India in the west sector, on the basis of the actually controlled border line so as to solve the Sino-Indian border question in a package plan...." There is reason to believe that Zhou En-lai offered a more or less similar formula to Nehru in April 1960. The Chinese proposal is not all that different from the proposal India has made, again and again, to Pakistan since 1955 to accept the actual line of control as the boundary between the two countries in the Jammu and Kashmir region

DISPUTED AREA

This formula for the settlement of the Sino-Indian border dispute had been commended by Mr K. P S. Menon in December 1969 in the following terms: "When Chou En-lai came to India in 1960 ... there was a hope that a settlement could be reached, under which the Chinese Government would recognize the McMahon Line, which no previous Chinese Government had recognized, in return for some recognition on our part of Chinese claims in the disputed Akasi Chin area. I deliberately say 'disputed', because the maps, treaties, agreements and other documents on which both sides

rely cannot be said to place the boundary, as conceived by either party, beyond the region of doubt or the need for negotiation. The watershed principle, on which we have heavily relied in other sectors of the frontier, is, in the Aksai Chin area, not in our favour. Moreover, Aksai Chin is of no importance to India, whereas, to China, it is of utmost importance, because it is the link between two historically troublesome regions, Tibet and Sinkiang". (Mr. Menon is, perhaps, the most knowledgeable person in India in regard to the legacy of the British Raj and the Northern frontier.)

Nehru, however, was misled by a group of officials in the External Affairs Ministry, who distorted official records of the Raj to convince him, his Cabinet and the Indian Parliament about the so-called "sacrosanct" nature of India's border claims. While China extended de facto recognition to the McMahon Line in 1950, the India Office Records in London show that it was not based on any legally valid treaty. Nehru told Parliament on August 13, 1959, "The McMahon Line is the firm frontier, firm by treaty, firm by usage, firm by geography". As a geographical boundary, the McMahon Line, roughly following the crest of the Himalayas, may be regarded as the natural division between India and China in the Eastern sector. But up to 1947, it was not regarded as a "firm" frontier, either by "treaty" or by "usage".

A careful examination of the official documents available in the India Office Records does not bear out the veracity of this claim; nor was this recognized as such by the British Government at that time, which becomes clear from the official correspondence between the Governor General, Lord Hardinge, and the Secretary of State for India, Lord Crew, in July, 1914.

In the late thirties, however, an attempt was made by some Indian officials, under the inspiration of Sir Olaf Caree, to give the McMahon Line an ex post facto legal basis by changes in Volume XIV of the 1929 edition of the Aitchison's Treaties, which contained the original official version of the proceedings of the Simla Conference, as follows: "In 1913, a conference of Tibetan, Chinese and British Plenipotentiaries met in India to try and bring about a settlement in regard to matters on the Sino-Tibetan frontier; and a Tri-partite Convention was drawn up and initialled in 1914. The Chinese Government, however, refused to permit their Plenipotentiary to proceed to full signature".

This authentic volume was withdrawn from circulation in 1938 and replaced by a faked version with an imprint of 1929. This concocted volume of Aitchison's Treaties remained a continuing source of confusion in free India about the true position of the British Raj in regard to the North-eastern frontier. It was unfortunate that none of the senior officials in the External Affairs Ministry was aware of the dubious legal status of the McMahon Line when the border dispute began in the wake of the Tibetan rebellion.

OFFICIAL MAPS

From the official Indian point of view, the Sino-Indian border dispute is now limited to the Chinese occupation of about 14,000 square miles of territory in the Kashmir-Ladakh region. According to the authoritative Aitchison Treaties, Volume XII (1931), however, the Northern and Eastern frontier of Kashmir remained "undefined" during the Raj. Also, many official maps, including the map of India attached to the Report of the Indian Statutory Commission (Simon Commission), Volume I (1930), and the map of India submitted by the General Staff of the British Indian Army (marked "Top Secret") to the British Cabinet Mission in 1946, show the crest of the Karakoram Mountains as the approximate alignment of the Northern and Eastern frontier of Kashmir. So the question arises: How did some officials conjure up a border claim of 14,000 square miles in the Western sector, which remains a stumbling block in resolving the border dispute today?

During the Raj, however, there were two other versions of the Northern and Eastern frontiers of Kashmir, one proposed by Sir Ardagh (1897), and the other by Macartney-Macdonald (1899), which tried to push the Kashmir frontier beyond the Karakoram ranges. But these lines were never officially accepted. In July 1954, however, the Indian Government, following the advice of the North and North-east Border Committee, published a new official map of India showing a boundary line in the Kashmir-Ladakh sector which took the crest of the Kuenlun range and placed within the Indian territory, for the first time, the whole of the Aksai Chin area, notwithstanding the fact that the area was at that time under the actual control of China. This new boundary line was a version of the John Ardagh Line, which had been dismissed by the General Staff on the ground that it was difficult to defend, and, strategically, useless in comparison to the Karakoram line

From the legal point of view, this unilateral alteration of the Survey of India maps in July 1954 did not establish any right to extend India's boundary in the North-west, including Aksai Chin. As successors to the Raj, free India has to accept whatever legacy was left by the British in this respect. The British Government, however, remained discreetly silent about the matter all these years.

WESTERN SECTOR

But in 1977, Sir H. A. F. Rumbold, a senior official of the India Office, revealed the truth about the Western sector of the Northern frontier of British India in a review article in "Asian Affairs" (June, 1977). He said that in the north-west, "in the frozen, uninhabitable, wilderness of the Aksai Chin", there was no defined frontier. He further said. "In researching this point, I found nothing in the India Office Records to justify the line on the Kuenlun range indicated on some maps and the (Simon) Commission's map accordingly adopted a line roughly along the crest of the Karakoram ranges."

The Indian Government should set up an independent fact-finding commission under the chairmanship of a Supreme Court Judge to scrutinize the new evidence on the Sino-Indian boundary question brought to light by independent researchers in the India Office Records in recent years, instead of relying on the Officials' Report of February 1961. This will help them understand why a compromise settlement of the Sino-Indian boundary question is imperative on both the sides.

In reply to a discussion on the subject in the Lok Sabha on July 31, 1980, the Foreign Minister, Mr P. V. Narasimha Rao, said that "the Government, who keep abreast of all important research on the subject, are fully convinced that the alignment shown in our maps conforms to the true international border." This shows that our Foreign Minister is still being kept ignorant of the facts by his officials, just as Nehru had been by the Historical Division of the External Affairs Ministry, who misquoted documents in 1959, particularly regarding the Western sector of the Northern frontier.

Mr Deng, in his interview, suggested that, in case of difficulty on the Indian side, the border issue might be set aside for the moment, while progress is made in other directions. This shows a keen desire on the part of China to normalize relations with India.

MILITARY PROBLEMS OF NORTHEAST ANALYZED

Madras THE HINDU in English 5 May 81 p 17

[Article by Major T. R. Vedantam]

[Text] The military problem in the North-East of India can be dealt with under the following headings:

1. The Indo-Tibetan border problem.
2. The northern frontiers of Sikkim and Bhutan.
3. Relations with Bangladesh.
4. The problems of the Indo-Burma border.
5. The insurrection in Nagaland & Mizoram.

Receding Threat & a Better Position

The border between India and Tibet was, is, and continues to be the still controversial McMahon line. It is too late at this stage to go into the long drawn-out controversies about this line. Of late China has expressed a keen desire to get this question settled amicably. In fact there is no serious problem or dispute except Aksai Chin.

Aksai Chin is the north-eastern most corner of the old undivided Kashmir. It is a central region with easy access to Gilgit to the west, to Sinkiang in the north, to Tibet in the west and southwest. China has built a road through this region to Sinkiang from Tibet and claims it to be part of Tibet and hence part of China.

China took three years to build this road and we knew nothing about it as our troops were not there to patrol the frontier. When we came to know what had happened it was too late.

After the 1962 invasion, China made an offer to settle all the border problems by agreeing to our version of the McMahon line in the northeast if we did not raise any question about Aksai Chin. Wounded pride and prestige fouled the atmosphere then for a settlement. Now that tempers have cooled, China has repeated the offer giving also an indication that the details are negotiable.

Looking at it without prejudice, it sounds very reasonable and so deserves a detailed study. China's offer bids fair to put an end to a quarrel of over 25 years standing, both sides having strong and weak points. To accept the solution offered is indeed a pragmatic approach.

But there are a few snags. China has not always been dependable or trustworthy and so the actual wording of the treaty or agreement will have to be carefully studied. They have given an indication of a few conditional clauses. There may be more coming as the negotiations progress. We have also a few conditional clauses.

Settling the McMahon line is not the last word for settling all the problems we have with China. The indications are that with a little bargaining China may be prepared to concede a lot. India's approach has been very cautious and halting. We have to take some risks. He who risks nothing gets nothing.

Why is China so suddenly anxious to normalise relations? We can only guess some of the reasons. The others would become clear when China comes forward and puts all its cards on the table.

The Chinese want to extricate themselves from the blunders of the Mao regime, which are still hanging like a millstone round their neck. There are many raw products that China needs that India can supply very cheap. All these are possible only if unpleasant memories of the past are wiped off. China's motivation can be genuine.

New Situation

There is another very strong reason why China wants to take a pragmatic view and settle its disputes with India. This is the new situation that has developed due to the Russian occupation of Afghanistan.

Quite a few Soviet divisions are massed in the Kunar province in the north-east of Afghanistan. A whole division is deployed on the border of Afghanistan with Chitral and Swat States.

To the north of this area is Sinkiang, the troubled province of China. To the east lies the strategic area of Gilgit, Aksai Chin, and the highway to Lhasa and Peking, as also the Karakorum pass through which runs the road to Islamabad.

To the south lies what was known to the olden days as Malakand Agency, the northern part of Pakistan. These regions are thinly populated, highly strategic areas. There is every likelihood that Russia will sooner or later make a thrust into this area. We can be sure that it will be specially timed. As and when it happens, it will be a challenge to more than one country, the countries being powerless to retaliate with force.

This area has no railways, no waterways, not many motorable interconnecting roads, is not industrially advanced, and is thinly populated by a few tribals. It is one of the world's most undeveloped areas. Yet when this intrusion takes place the entire world will be frightened and alarmed, because of its possible repercussions.

In this venture who profits and who loses? First Pakistan will raise a hue and cry that their country has been invaded. The Russian reply may be somewhat on the following lines: "We have not come anywhere near Pakistan. This is part of Kashmir and so part of India so far as we are concerned. If anybody has any right to question us, it is India. When India asks the question we will answer them."

Then China: It has no locus standi in that region, yet Russian intrusion into this region will definitely constitute a serious threat to Sinkiang and Tibet. If Russia pushes further on to Aksai Chin, then the two strategic highways in which China is vitally interested will be cut. If China confronts Russia in Aksai Chin, Russia will give China the same reply as given to Pakistan.

With this one move, Russians would unilaterally have closed the Kashmir dispute, and not a dog will bark.

It may not end there. The western powers, the U.S. and Britain, supported by some of the Muslim States of West Asia would try to launch a well planned programme to oust Russia from this region as well as Afghanistan.

But who can do it and how? Only Pakistan and China can try. India will certainly not get into this fray. Pakistan is determined not to confront Russia directly now, either in Afghanistan or in Chitral and Swat. But it seems half willing to let the U.S. land its army and air force in Pakistan and march against the Russian intervention in the north or in Afghanistan.

The only other country that may try to combat Russia in the regions of the Hindu Kush, Pamirs, the Karakoram, and the Baltistan States is China. In fact, China cannot afford to sit on the fence and watch the developments. It has to act and will be forced to act. Otherwise it may be too late.

No country big or small wants a war now. No country can afford that luxury. But the superpowers are all the time trying to put the rifle on somebody else's shoulder and pull the trigger. They succeed very often, but they do not achieve their aim or object. War solves no problems generally, but often paves the way for future wars.

If Russia and China confront each other in the Karakoram region and in the area of Baltistan and Chitral, then it will be a war between two superpowers, a situation which the whole world as well as the superpowers themselves would like to avoid.

In the event of such a collision, Pakistan will be pushed into it in a matter of hours. To start with India will try its best to keep out, but will ultimately be dragged into this vortex. It will be the collapse of the flimsy protective wall of non-alignment. Under those circumstances we will be confronting China once again all along the Himalayan frontier.

Now let us switch back once again to the Northeast of India.

The defence of the Indo-Tibetan border is the first major problem of the Northeast. This can be understood in depth only by taking into consideration a typical situation like the one mentioned above.

China Wary

There has been some misunderstandings about the Chinese invasion of 1962 across the Himalayas. Everyone talks as if we suffered a very heavy defeat. This is not so. There was fighting all along the Himalayan frontier from Ladakh and Leh to

the easternmost tip of Lohit bordering on Yunnan. We held our own in all sectors except in the Kameng division of Arunachal Pradesh. Here it was a total rout with heavy losses. Some of the funniest things happened.

What is the present position? China is getting wary. About 1954 when the Aksai China problem came up we had a few conferences with the Chinese in Delhi. At that time Marshal Chen Yi addressing the Cabinet Ministers said: "We don't want to fight a war on two fronts. Gentlemen I don't think that you wish to fight a war on two fronts either, if it is three fronts it is still worse." It was a challenge and a threat. The meaning will be clear. The implication was that China had Pakistan as an ally.

Now the boot is on the other leg. If Russia and China should clash on the Karakorum, China would very much like to avoid fighting on many fronts. How India will react to the situation is their question. Since we have during the last few years been tilting more towards Russia, we may be forced to jump into the fray. We can take this opportunity to straighten out our Himalayan border with Tibet to suit our requirements. It will be a strain for China to deploy large forces on the Himalayan front to prevent incursions from our side.

At present China seems to be the only country able to look into the future and see the new writing on the wall. So they are now willing to concede all our claims about the McMahon line provided we concede all that they want on the Aksai Chin sector.

What is our present position on the Himalayan front? In 1962 we had no roads or other types of communications in that area, worth mentioning. Now we have a complete set of tarmac roads, mostly 24 feet wide with cross links. In 1962 we had only the BSF to patrol the border. We have now more than eight divisions suitably deployed in the eastern sector. In 1962 it was not a case of China being extremely strong, but it was a case of India being weak and unprepared.

China is now being pushed into a tight corner. It is natural that it should try to avoid fighting a battle on many fronts if it is to fight Russia. If the border problem with India is settled, one great danger is over. China will pretend to be tough but will concede all our reasonable demands regarding the settlement of the border disputes in the north-east.

But there will be one condition, that in the event of China and Russia confronting each other on the Karakoram, we should give a guarantee that we will not join with Russia as an ally and stage a diversionary attack on the Tibet--Arunachal Pradesh border. It is certainly to our advantage to be non-aligned. But will that be our position?

Peking's Handicaps

China's difficulty on the Himalayan front is one of logistics. Much of Tibet is barren territory over which blows for four months the cold winds from the Gobi desert. All military supplies have to come from the main line of China. A five-tonne lorry loaded with 60 drums of diesel uses 42 drums to travel from Peking to Lhasa and delivers 18 drums for stock. This is a ridiculous state of affairs.

There is no railway to Tibet. There were no proper roads either. China embarked on a crash programme and made a long metalled trunk road along the valley of the Tsang Po to Aksai Chin with connecting roads to Lhasa. They are metalled but not asphalted inside Tibet.

China tried extensive reforms in the field of agriculture in Tibet to produce more food. It was not a great success. You can't squeeze blood out of stone. A vast majority of the Tibetans are still loyal to the Dalai Lama. They have no strength or power now to resist or revolt, but the Chinese also do not enjoy their support or loyalty.

A ferocious tribe known as Kampas is operating on the Himalayan border regions against the Chinese forces harassing them at many points. They were going strong even during the years 1972-73. What happened to them afterwards is not clear.

North of the upper triangle of Burma, north-east of the Lohit division of Arunachal, and east of Tibet and west of Yunnan is a mountainous gorge known as the Chamdo region. It is the only link between China and Tibet, it is not more than 100 km long, rather narrow and in its broadest portion is about 30 km broad. It is a very strategic area. During the last 1,000 years whenever there was a clash between Tibet and China, big or small the battles used to be fought in this region only.

If this corridor or communication link could be cut effectively, the Chinese position in the whole of Tibet will be very seriously jeopardised. In the event of a major hostility between India and China, our natural aim should be to try this stunt of blockading the Chamdo region. Can it be done? Is it possible?

Between 1962 and today two decades have elapsed. Today we are in a very much better position on the Himalayan front for both offence and defence. From Sadiya to Kibitoo on the Chinese frontier we have today a very broad excellent road specially designed for heavy two way military traffic. Our second echelon bases and the supply lines are all properly laid on. Our logistics today is far better than that of China.

All the same the threat of a confrontation between India and China is receding.

The military problem on the northern frontier with Tibet can be considered as settled if a compromise solution as suggested by China is accepted. It will however require a few amendments and modifications. These are not very difficult under the circumstances. The prospects appear to be very good.

Weak Link

Sikkim is a small State now part of India. It was previously a protectorate. Bhutan is a different story. It is considered to be a small independent kingdom ruled by a king. Between these two lies the V shaped Chumbi valley. The lower apex of this wedge is nearly touching the strategic area of the Siliguri gap, our only communication link with Assam. China is well entrenched in this valley, the Yatung region being their headquarters. It is a base well organised, garrisoned, and well furnished, now after many years of effort.

Sikkim lies on the western side and Bhutan on the eastern side of this wedge. The border of Sikkim with Tibet in the north and Chumbi valley in the east is well guarded by Indian troops in strength and in depth. This is not the case with the border between Bhutan and the Chumbi valley. It is virtually undefended. There are two rivers from the Chumbi valley flowing into Bhutan, the Amo Chu and the Ha Chu. The valleys of these two rivers are the channels of communication between the valley and Bhutan.

On the northwest of Bhutan lies the gigantic Chomolhari range forming a natural barrier between Bhutan and Tibet. On its western side this range curves down south, its southermost tip reaching to the valley of the Amo Chu. On the northern side of this Chomolhari range runs the frontier between Bhutan and Tibet. This boundary is yet undefined. It is however shown on the maps by a dotted line. This is a rough marking following the watershed principle, not ratified by the two countries.

China does not accept this customary watershed boundary as valid. It has claimed about 780 sq. km. of northeastern Bhutan as also some substantial areas north of Punakha the old time capital of Bhutan. Chinese maps show substantial chunks on the Indo-Tibetan border including that of Sikkim and Bhutan as Chinese territory. During the last 15 years there has been many incursions of Chinese troops into these regions.

Under a treaty relationship, Bhutan is guided, in its foreign relations, by India. Bhutan is not to have direct consular or other relations with any foreign country, but it has to go through the Government of India. In return India accepts the responsibility for Bhutan's defence and its strategic communications.

This treaty however has a funny provision to the effect that India may not station its troops inside Bhutan, but it can and has to come in as and when so requested by the King for the defence of Bhutan against external aggression. This virtually makes the responsibility for defence practically meaningless.

The only danger to Bhutan comes from China. With an undefended border with Tibet, China can run over the whole of Bhutan in the matter of a day or two at the most. Then it will not be defence of Bhutan but expelling an invader.

Looked against the background of this weak point, the idea of our being able to stop the Chinese at Chamdo is childish tall talk. Tibet's border with Nepal, Sikkim, and Bhutan are all part of the same McMahon Line. When China agrees to accept our version of this line on the eastern sector, does it include Sikkim and Bhutan also? will China also recognise our special relations and rights in China's offer would be worthless if Bhutan is to be left out. [as published] Meanwhile Bhutan will continue to be the weakest link in the chain of our Himalayan defences.

There are four divisions in Arunachal Pradesh, Kameng, Subansiri, Siang, & Lohit. Kameng division is the westernmost bordering on Bhutan. We have today in this division, a long road starting from Misamari on the plains to Khinzamane a border town on the Tibetan frontier in the north. This road passes through Tanga valley, Bomdilla and Tawang in the inner Himalayas. Tawang is a village full of Buddhist monasteries and gumphas.

During the 1962 war the Chinese entered deep into Bhutan along the valley of Tawang river, turned south, reached Lumithoung and then turned east, re-entered Kameng division very much to the rear of our forward divisions, thereby cutting off our supply lines. Our forces sandwiched between two Chinese forces one to the north and another to the south, had to suffer heavy casualties.

Private Armies

Let us have a look at Burma. We have a common frontier of about 320 km with Burma. It has been demarcated and deleneated--no problems. Burma has remained friendly.

But our northeastern frontier with Burma is not under the control of the Rangoon Government. It is for all practical purposes under the control of the Chinese. This upper triangle of Burma as it is called is the valley of the Chindwin and the Upper Irrawaddy.

On the western side of this triangle close to the Indo-Burma border live many tribes, Kachins, Chins, Nagas, and Lushais. On the eastern side, this upper triangle of Burma has a common frontier with the Yunnan province of China, Laos and Thailand. In this area are the Shans and the Karens. The Karens, before the Second World War, inhabited areas in Central Burma, Lower Burma and Tennasserim. During the years 1890 to 135 nearly 90 per cent of them became Christians and sided with the British against the Burmese nationalists. The British recruited large numbers of them into an auxiliary force known as the Karen Irregulars and used them against the Burmese. After World War II, the Burmese people drove them out of lower Burma and then they took refuge in the upper triangle.

In the northernmost reaches where Tirrup and the Lohit division have a common frontier with Burma live the Kachins. That region is also known as the Kukawing valley. Putao or Ft Hertz located in this region was the northernmost military outpost in those days. The famous Ledo Road also known as Stillwell Road passes through this region.

Coming south we have the common frontier with Nagaland. In this region we have the Burmese Nagas. The last remnants of the rebel Nagas from the Indian side under the leadership of Izak and Muivah have taken asylum in this region. Another small group of the rebel forces, the pro-Phizo group also has joined with them.

Coming further down, we have the Chin Hills region with a common frontier with Manipur. This area is inhabited by the Chins. Still further south the area adjoining Mizoram is inhabited by the Lushalis and the Kukis. Mizos are also Lushais, Lushai, Mizo, and Kuki, are all closely allied groups. They are only different sub-sects of the same tribe. To the south we have the Chittagong Hill region of Bangladesh.

All these tribes have formed themselves into private armies declaring their territories independent. The Government of Burma is militarily too weak to subdue them or liquidate them.

A major portion of the sophisticated weaponry for these private armies has come from the U.S. and China has also made a substantial contribution.

The tribes on the Indo-Burma border are all of specific ethnic groups. Their opposition to the Government of Burma is based on religion. As Christians they refuse to accept the overlordship of a Buddhist government. The Shan State Army, however, is predominantly Buddhist. It claims Burma as its country.

Twenty years ago all these insurgent forces constituted not more than 24,000 armed men. But today their strength is estimated to be upto two divisions, more than half deployed on the Indo-Burma border. So far we have had no direct encounter with these forces. But there had been some stray incidents as they are collaborating actively with the Nagas and the Mizos.

Even though our border with Burma is at present peaceful, this state of affairs may not continue for long. The Second World war left the socioeconomic set up of Burma completely shattered. When the war ended and Burma got Independence, it had no army worth mentioning for its own defence. It had to start from scratch.

It could not have a settled government for some time. Then came the socialistic experiment of General Ne Win. It was not a success in any sense of the term. It brought Burma very close to economic ruin. Result--the rebel elements in the north had a field day.

Burma is now faced with the problem of eliminating and if necessary even destroying altogether the rebel armies of the tribals in the northwestern region of the Chindwin valley. This is an operation which will take some time and is not likely to be so very easy unless it has the full cooperation and assistance of India on the western side of the border. Burma's headache is our headache too, so it is in our own interest to help it in whatever way we can.

During our operations in Nagaland, the rebel forces when hardpressed used to retreat across the border into the Chindwin valley. Burma pleaded inability to deal with the problem as it did not have enough armed forces to deploy on the border. It, however, conceded to India the right to enter its territory and deal with the rebels in any manner we chose. It was willing to give whatever other help it could with its limited resources.

Burma helped us at the time. It is now for us to reciprocate by deploying enough troops on the border to prevent Burmese rebels crossing into Indian territory. We have also to prevent the tribals from our side of the border going into the Chindwin valley to assist the tribals there.

During the last five years in particular our forces have been more and more successful in preventing the rebel elements from sneaking out to China for training and they have also successfully prevented their return to Indian territory. Large numbers have been rounded up.

In the beginning the insurgents passed through Mizoram and then into Bangladesh. From Bangladesh they entered Burma through the Chittagong Hills region and then worked up the Chindwin valley, crossed over to Bhamo on the Irrawaddy and passed into China. This was very tedious and very difficult of course.

Ever since the U.S. and China established friendly relations, the Chinese have been encouraged to maintain the fires of insurgency in this area. There were plans for China to establish an alternative training centre at a spot south of Lhasa on the north bank of the river Tsang Po (Brahmaputra). The idea was to send the new rebel recruits for training to Tibet through Arunachal Pradesh.

Simultaneously a massive programme of conversion of the tribals in Arunachal Pradesh was planned. The basic issue of the tribal problem in the northeast is that the Christian tribals are hostile to the Government of India, while the non-Christian tribals are friendly. The move was to make the friendly tribals of Arunachal hostile by converting them first and then indoctrinating them.

Christian missionary activity is forbidden in Arunachal. So the churches, schools and other installations were put up just a kilometre or two south of the border line and all kinds of indirect methods were being used to gain converts.

The tribals were then alerted about the dangers involved in repeating the situation of Nagaland and Mizoram in Arunachal. They got alarmed and in a body went up and blew up the churches and schools. There were casualties among the clergy too. Thus the transit camp and base for channeling Naga and Mizo hostiles to the training camp south of Lhasa in Tibet fell through.

Since then China has been more explicit in withdrawing support to the hostile tribals. It has also told Pakistan clearly not to bank on it for any further substantial supplies of arms and ammunition. The final settlement with China and the normalising of relations will depend on the stand it wants to take on these problems. Indirectly it can influence Russia's plans and intentions for any intrusion into the Baltistan area.

However, Burma is not India. Will China agree to withdraw from the upper triangle of Burma and stop giving aid to the hostile tribals of the Chindwin valley? The indications are it will agree to withdraw.

Not a Skirmish

China seems to have put up a very interesting explanation and excuse to justify its new alignment. When the Burma Government starts military operations against the Kachins, Nagas, and the Lushais on their side of the border, if China should come in the way, then they fear a large influx of Vietnamese and Kampuchean troops assisted by the Cubans, who will spread and take positions along the China-Burma frontier. That will be Russia's challenge brought nearer home. The Armed forces of the Burmese Communist Party now in the Shan States will join these forces. Then it will not be a skirmish but a war.

One trend is very clear China is in no mood to take a belligerent attitude unless forced into it by a very difficult situation. China's cooperation with the U.S. will not be unconditional. It will be circumscribed and limited.

pages tightly bound

Bangladesh Unfriendly

On the Tibetan frontier and the Indo-Burma border there is no war or threat of war at the moment. Even latent tensions are not there to any marked degree. The case of Bangladesh is different. Tension between India and Bangladesh is escalating during the last five years. It can ultimately lead to a blow-up and that may not be far off.

For nearly three decades East Pakistan has been a thorn on our side, the border problems, the sharing of the Ganga waters, trade relations, driving out the Bihari Muslims into India, persecution and harassment of the last remnants of the Hindu population and many more problems have bedevilled the relations between the two countries.

During these years, East Pakistan and later Bangladesh has been helping the Naga rebels and the Mizos with asylum, arms, ammunition, and training facilities. During the short regime of Mujib Rehman the rebel camps were closed and facilities denied. After Mujib all these troubles have arisen again.

The rebel army of the Mizo National Front has established its base headquarters in the Chittagong Hills region, with the help and support of Bangladesh. It is alleged that large numbers of Chinese officers came in as instructors to train the rebel army in guerilla warfare. Most of them appear to have gone back in more recent months.

Whenever the insurgents cross into Mizoram and confront the units of the Indian army, there is a skirmish. The remnants after the battle are chased and they retreat into Bangladesh. We normally have the right to chase. Under similar circumstances, Burma has cooperated with us. But Bangladesh is a different story. This is a matter over which tension between the two countries can escalate.

The treaty of friendship with Bangladesh is a peculiar one. It is more or less a personal understanding between Mujib and Mrs Gandhi. Once Mujib and his group had been assassinated and wiped out, this treaty ceased to be relevant. The later events in Bangladesh are not in agreement with the provisions of this treaty.

There is a provision in the treaty conceding to India the right of entry and passage for Indian defence forces through Sylhet and Mymensing in the event of warlike operations in the northeastern regions.

There is another provision that India should not repatriate the Bihari and Bengali Muslims who migrate to India. This provision is quoted as an excuse and a valid reason for the Government of India refusing to deport these Muslims now referred to as foreigners in Assam. The snag is that this provision is no more valid in the present context.

There was a vaguely worded report in the papers some months back saying that Bangladesh gave some indication that it intended to repudiate the provision granting Indian troops the right of passage through Sylhet and Mymensing. The Government of India is said to have replied that in that case we will be compelled to push the Muslims now in Assam back into Bangladesh. Dacca is said to have remarked that such a move was sure to precipitate a war between the two countries.

It should be clear to everyone that the Assamese are not prepared to let the foreigners stay in Assam. It is necessary to take a pragmatic view. International law, treaty obligations and humanitarian grounds are not relevant in this case. In fact, a stage has been reached when these considerations threaten the freedom, security, and safety of the local population.

It appears that there is a new trend in the northeastern regions, which may result in the Muslims of Assam being pushed back into Bangladesh in large numbers. Then Bangladesh can declare a war if it so felt.

More than six months ago Izak and Muivah, leaders of one of the rebel Naga groups, started seeing the writing on the wall. They felt that a concentration of 47 lakh Muslims from Bangladesh in Assam constituted a serious threat and danger to Nagaland, Manipur, and Mizoram.

These three tribal areas are now thinly populated. The aggressive Bengali Muslim with his expansionist ideology, trained to invade neighbouring territories will very soon become a serious danger to the tribals also.

Some interested party or parties seem to have put into their head the idea that the Government of India is trying to retain the maximum possible number of Bengali Muslims in Assam to be used against the rebel forces operating in the tribal areas. They then worked out a plan for all the rebel elements in Assam, Meghalaya, Magaland, Manipur and Mizoram to rally under one flag, and take joint action to go to the aid of the Assamese Hindus, and drive the Bengali Muslims back into Bangladesh.

All the rebel groups appear to have agreed to the proposal in principle. But the non-Christian tribals refused to accept their leadership on the ground that the Christian tribals, because of their religion, argue that they are not Indians.

Muivah reacted promptly by agreeing to give up that stand. It resulted in the pro-Phizo group deserting him. The Mizos of the Mizo National Front also objected to this idea of giving up the Christian stand. Hrankal, Koloi, Nripen, the PLA, and the TUJS seem to have remained with him.

According to a statement made by Hrankal after his arrest the whole scheme was toppled by a group of American Baptist missionaries, previously expelled from the tribal areas, but now stationed with the headquarters of the MNF in the Chittagong Hills area. These missionaries appear to contend that any move to jump into the Assam fray might help India indirectly, but will definitely affect Bangladesh adversely.

Muivah recently seems to have been making renewed efforts to rally the tribal forces once again under the same flag and go to the help of the Assamese Hindus, and thereby forestall a serious danger which might threaten them as well. The Assam Hindus, however, have not asked the tribals to come to their aid.

Mizoram Still in Hot Waters

That leavessus with the internal problem, the military operations in Nagaland, Mizoram, etc. There is no tribe known as Nagas. It is a generic name given to a large number of tribes, e.g., Sema, Ao, Lohta and Angami. They are racially similar but with small differences in their ethnic identity. The same Naga group of tribes are spread over in the Chindwin valley also.

All the tribes are Mongoloid, falling broadly under two categories, Tibeto-Burman, and Indo-Chinese. The Daflas, Apatani, Sherduks, and Monpas of Arunachal are Tibeto-Burman, as also the Nagas. The Lushais, the Mizos, and the Karens of Burma are Indo-Chinese types.

The Nagas have claimed that they were not Indians because they were Christians. This was the position up to 1965. That is what they were taught to believe by the foreign missionaries, who were playing havoc in those areas particularly after Independence. Many of them were espionage agents of foreign countries and they were as a rule hostile to our country.

Their main job was to organise the tribals of the northeastern territories to rebel and declare themselves independent. No Government worth the name can tolerate this kind of threat to the safety, security and independence of the country.

Under these circumstances arriving at a compromise solution through negotiations does not arise. Might is right. One major mistake that these foreigners committed was to make the tribals believe that they could win the war against India. The Nagas realised the folly of this line of thinking even as early as 1960. Many surrendered and laid down their arms. A provisional civil Government was formed and it has now come to stay.

By the time the Nagas realised their mistake a very large number of casualties had been inflicted. There was at the time a hard core that would not surrender and it continued to fight.

About the year 1959 General Thimmayya made an offer to the Government of India, to finish the Naga problem if only he were given a free hand. Nehru turned it down and took the view that the hostile tribals should be won over by sweet words. The Nagas did not understand that language. The trouble continued and a large number of casualties had to be inflicted over a period of 10 to 12 years before the situation could be effectively brought under control.

A military operation is always the last resort. Once it is launched sweet words are taboo. We have to make a thorough job of it by taking drastic action irrespective of consequences. Soft pedalling in a military operation is a crime. Whenever the rebels succeed in inflicting a few casualties on the armed forces, it becomes necessary to inflict a deterrent punishment. During these operations, the civil population who are noncombatants also suffer sometimes.

As time passed many elders in the community as also a section of the clergy got very much upset over this trend. They started agitating that this war of the Christian Nagas against a Hindu army should be stopped forthwith. Twenty years ago theirs was a voice in the wilderness. Today they are in power controlling the local administration.

The rebel army beleagured and depleted retreated to the Chindwin valley in Burma and established its headquarters there. In consequence rebel activity is now very much on the decline in Nagaland, and has practically tapered off.

When a civil elected government was established, the army still retained its powers and responsibilities to liquidate the remnants of the rebel forces. That job has more or less been completed now. The remnant of the rebel forces now in exile in the Chindwin valley under Muivah is said to be about 960 to 1000 strong.

So the war in Nagaland is supposed to have ended. But it will take at least one more decade to restore normality in the area.

Mizoram in 10 years has suffered more casualties than Nagaland in 20 years. For obvious reasons the correct figures are not published, the rebel armies are a hundred per cent Christian. The young able bodied section of the population only are recruited to the rebel army, and these became the casualties.

A small tribe of not more than six lakhs in Nagaland and about three lakhs in Mizoram is being continuously depleted of its youthful manpower. The number of middle aged widows and unmarried girls are continuously on the increase. The number of children born in the community has gone down considerably; so also the population. In Nagaland at least this state of affairs seems to have been halted, but not Mizoram so which is still in hot waters.

The population of Mizoram 15 years ago was not more than 3.2 lakhs. Now it is 2.6 lakhs. The Mizo rebels have been reckless dare-devil types, and as a result have suffered much heavier casualties. What is happening can be described as a mild form of genocide. But this word has not yet been flung on us. Obviously the reason is that they do not wish to admit or disclose the fact that they are now fighting a losing battle.

If the Mizos try to keep up the tempo of the struggle for another decade the population there will be more than decimated. Now the elders in these two areas as also a section of the clergy are very much worried and are vehemently opposing the way the youngsters have been made a cat's paw by the foreign missionary element.

The rebel Mizo forces are now compelled to have their base and headquarters in Bangladesh. It has its implications for the future. All the same, the end to hostilities in Mizoram is not far off. More than a year ago, the Government of India took the view that it would better to force a military solution there with speed. Laldenga's dilatory tactics appear to have stalled the issue.

Speedy, Efficient Military Solution

It has been suggested and legitimately too that the root cause of the internal troubles should be gone into and the defects rectified. This is an oversimplification of the case. Two main reasons are usually given. The tribals feel that they have been badly neglected, and the other is that they are frightfully anxious to safeguard their ethnic identity.

The so-called neglect was neither intentional nor deliberate. It was about the year 1952, that Nehru had a discussion with Dr Verrier Elwin the famous anthropologist, who was then settled in Meghalaya. During this discussion Dr Elwin is said to have cautioned Nehru against introducing too rapidly into the tribal set up western technology and rapid industrialisation, but to take it easy and go slow. There are different versions of what Dr Elwin's remarks were. Whatever was said, it is likely that it was not understood in the correct perspective.

Today this charge of 'neglect' is no more relevant. Roads have been laid, hospitals have come up, postal and telecommunication facilities are fast expanding.

This is the case in Nagaland, the same will be the case with Mizoram after the rebel activities have been effectively suppressed.

There is a note of dissent even in this. It appears that all welfare activities are being directly controlled and administered by the Government of India. The local church dignitaries do not seem to like it. They seem to think that someone else is stealing the thunder. This is inevitable. Once thier isolation is neutralised, it is only a question of time for the tribals of these territories to get more and more integrated with the rest of India.

The second grievance is about the preservation of the "ethnic identity." This is just a high sounding phrase intended to confuse the issue. The tribals, the Christians in particular, have already lost their ethnic identity long ago. From the year 1832 when the first British expedition into Nagaland took place the ethnic identity of the tribals all over the northeast has been undergoing a continuous metamorphosis. From headhunters they have evolved into university graduates, civilised men adopting western modes of life. Under the impact of modern trends these changed and changing patterns are being still further modified.

Their ethnic identity was changed beyond recognition by the British Government and not by the Government of India. And the Government is not interested in restoring to them the ethnic identity they had a hundred years ago. That is not our responsibility. Do the tribals want to go back to their headhunting days?

In 1964 I met Mr Jasokie at a dinner party in the Station Headquarters near Nichoogad. I asked him what was actually meant by this preservation of the ethnic identity. The following is roughly the gist of what he said: "Let us get back to the position as it was a 100 years ago. Delhi was only vaguely aware of our existence. It was only in 1880 worthwhile contacts started coming up. Thereafter it was a case of continuous change.

"In 1900 the tempo started increasing. Our society was being swept along a new groove. There was a slight slackening of the tempo during the first world war. By 1925 or about that time we can say that we have emerged from our seclusion. Our contact with the outside world was gaining tempo. Christianity had come in by that time. English education came in, and you can call it a revolution.

"Every twenty years we passed from one stage to the next. It was all very nice, it was a peaceful revolution. But by that time we had ceased to be what we were, when the second world war overtook us. Some of the worst fighting took place in our territory, just around our villages, you can say in our backyards.

"The events of the period 1935-50 remoulded us into a totally new pattern, we lost our identity. The Government of India cannot give it to us. We have to find it ourselves."

The position should be obvious. The Nagas have lost their identity because of the heavy impact of western civilisation. They would not like to be headhunters once again. Their present identity is rootless, they have to come out of their isolation and mix with the rest of the people around them in the country, and then they will discover once again a new identity which may be worth preserving.

The tribals of the northeast today are a bitter and disillusioned people, more offended against than offending. All this military adventure against them could have been avoided if only they had been properly advised by their own leaders and if they had been left free to negotiate with the Government of India for an amicable settlement. This was not the case.

Once the Government is in full control, the missionary influence will automatically decline and taper off. The foreign elements could not reconcile themselves to it. But this phase is passing in Nagaland, it is not yet over in Mizoram.

The British during a period of 80 years from 1832 sent many punitive expeditions into Nagaland and inflicted heavy casualties. Despite this, during the period from the beginning of the first world war to the end of the second world war the tribals in the areas of Nagaland, Mizoram and Manipur were very loyal to the Government. There are thousands of these tribals who bemoan the sudden withdrawal of the British in 1947-48, something which they never anticipated.

The time has come for India to enforce a military solution with speed and efficiency, wherever rebel activity continues and then close the case. Then there will be a clear line for the constructive work of building up lasting goodwill.

Procrastination of the type we find in Assam will give the politics of the tribal areas a very serious setback. The problems confronting us in the Northeast are variegated and far too numerous. But they are not insoluble. We have only to approach the problem with courage and determination.

LOK SABHA DISCUSSES SALES OF CENTURIAN TANKS

New Delhi PATRIOT in English 9 May 81 p 5

[Text] The Government denied in the Lok Sabha on Friday that there was any sale of Centurian tanks since the proposal of 9 obsolete ones during the Janata regime in 1977, report agencies.

Mr C P N Singh, who was Minister of State for defence in 1980 said the proposal for sale of 190 centurians initiated by the predecessor regime in November 1979 was called off in June 1980.

Mr Singh made a statement of personal explanation to refute certain allegations by Mr K P Unnikrishan during the debate on the defence demands.

Mr Singh, however, said that 2000 tonnes of Centurian spares were sold to M/s Levy Auto Parts Co of Canada for 0.9 million dollars after due consultations with different government agencies and the Ministries. The payment was received well before shipment.

The sale was against import license issued by the Canadian Government and the Canadian High Commissioner had informed that reexport from Canada would need Government approval.

The Minister said the enquiry for the sale of 190 tanks included one for spares and ammunition. This was widely circulated. The ocers [as published] were considered by an interdisciplinary committee headed by the then secretary (Defence Production).

The statement said: "Having been informed that the tanks sold in 1977 did not reach Spain it was proposed in consultation with the Ministry of External Affairs to take all possible precautions to ensure that the tanks do not find their way to a country which is politically unacceptable. Since the offer of M/s Ferro-Import was considered the most acceptable, it was proposed to seek necessary guarantees in case the offer of M/s Ferro-Import was to be accepted.

"The papers were put up to the Prime Minister and the Finance Minister as required and their directions were fully implemented. The sale was deferred: I called off the negotiations on 3-6-1980 for the sale of the remaining Centurian tanks.

"Offers were invited for sale of spares along with tanks and ammunition. Since there was no worthwhile offer for spares, the negotiating committee recommended re-invitation of bids for sale of spares separately. All the bidders who had submitted offers for tanks and/or spares were invited to submit their offers.

"The bid of M/s Levy Auto Parts Co of Canada was the only one fulfilling the conditions laid down regarding earnest money deposit and end user country.

There was no prescribed price: The sale was to take place on the basis of the highest acceptable offer. The initial offer of M/s Levy Auto Parts Co was 900,000 dollars for 5,000 tonnes of spares.

"When the initial offer of M/s Levy Auto Parts Co was considered by the negotiating committee, a view was expressed and duly recorded in the minutes that it was on the low side, it was precisely for this reason that the likely scrap value was got assessed by the representatives of the Iron and Steel Controller and the Metal Scrap Trading Corporation after physical inspection and a higher price negotiated. The Ministry of Steel was consulted.

"While the transaction of the sale of tanks did not take place at all, the one relating to sale of spares was concluded with the concurrence of the ministries concerned. It is unfortunate that Mr Unnikrishnan unnecessarily attributed ulterior motives on my part."

NAVY DEEMED ILL-EQUIPPED TO CARRY OUT MISSION

Madras THE HINDU in English 10 May 81 p 2

[Article by G. K. Reddy: "Two Fleet Navy To Mind Coast"]

[Excerpt] The unfolding superpower rivalry on the high seas leading to a fresh scramble for bases has set the smaller powers thinking seriously about their own responsibilities in defending their shores and safeguarding their maritime interests.

A country like India with a vast coastline and offshore installations has to evolve a naval strategy designed to serve the dual purpose of containing any possible threat from the sea by Pakistan and protecting the two million sq km of sea constituting its exclusive economic zone.

It is not India's intention to compete with the big powers in the scramble for the control of sea routes, but it cannot afford to neglect the duty of guarding the approaches to its coastline. The tiny Indian Navy cannot discharge these functions without a well phased expansion and modernisation programme.

If it beyond India's financial resources to have two independent fleets operating in the Bay of Bengal and the Arabian Sea with all the paraphernalia of shore-based installations, it has to make the next best choice of two self-contained task forces stationed on either side of the peninsula with offensive-defensive capability for keeping the enemy at bay and protecting its off-shore interests.

The Navy is often described as a silent arm of a country's defence forces, but its very silence makes it also a neglected arm in the conventional environment of military power primarily designed to defend the land frontiers and, if necessary, carry the fighting across the borders into enemy territory.

The thinking and training of the Army and the Air Force is "border oriented" in the sense that the battle lines are well demarcated and, even when the frontiers are crossed, it is only to relieve the enemy pressures along the country's frontiers through interdictory action.

No Physical Frontiers

The Navy has no such defined physical or psychological frontiers for its obligations, since it has to look upon the entire ocean expanses as a battle zone.

It is trained to think and react in terms of varied chores, ranging from offensive-defense operations against enemy craft and protection of the country's coastline to interception of contraband on high seas in times of war and the chasing away of foreign trawlers fishing clandestinely in its exclusive economic zone. It has also to safeguard the seabed mineral resources and off-shore oil deposits especially in areas where the maritime boundary is in dispute.

The Indian Navy with its modest complement of only 47,000 men, is hopelessly ill-equipped to discharge these onerous responsibilities whether in peacetime or wartime. It has to be expanded and reorganised into virtually two independent task forces, each with an aircraft-carrier, destroyers, frigates, submarines, missile boats and other craft.

The smaller Pakistan Navy is more comfortably placed to operate as a single fleet, since it has no responsibilities left in the eastern region after the emergence of Bangladesh as an independent nation. It is doubly necessary, therefore, for India to have a two-fleet navy to keep an eye on the vast expanse from the Straits of Malacca to the Gulf of Aden on either flanks of the Indian Ocean.

The Indian Navy now consists on paper of one aircraft-carrier undergoing extensive refitting and renovation, two old cruisers which have been phased out, eight out-dated submarines, 28 frigates out of which only eight are of the latest types, dozen corvettes and missile boats and the usual complement of mine sweepers and landing craft.

The Navy has also an independent air arm with about 50 aircraft for carrying out reconnaissance and providing land-based support for anti-submarine and other operations nearer the coastline.

There are plans under way to acquire Sea Harriers for the refitted aircraft-carrier Vikrant, three destroyers, two modified frigates, two submarines, two minesweepers, six landing craft and some more patrol boats.

Two Pronged Policy

The Pakistan Navy with a complement of 13,000 men consists of one cruiser, six destroyers, six submarines, five midget submarines, three patrol boats and 12 Chinese-built torpedo boats, besides a minesweeper, some missile boats and a few aircraft and helicopters for anti-submarine warfare.

It is basically intended as a hit and run navy with no pretensions at all about commanding the sea lanes, much less venturing out on the open seas in the event of a conflict. It managed to sink an Indian frigate and a few cargo vessels during the Bangladesh war, but lost heavily when the Indian missile boats attacked and sank several of its ships in Karachi port. It also lost a submarine outside Visakhapatnam.

The old warships, used to be scrapped or phased out after 20 years of service, but the costs of replacement have gone up so high that almost all the countries, including the two superpowers, prefer to repair and refurbish them with the latest weapon systems about half way through their normal life.

READEX FICHE best copy available

The Indian aircraft carrier Vikrant has been in the dockyard for the last two or three years undergoing extensive repairs and refitting, and it will be as good as a new ship equipped with the very latest vertical take-off Sea Harriers when it gets back into service.

The Indian Navy has been pursuing the two-pronged policy of buying and building under licence the latest frigates, submarines and missile boats, while reconditioning the old ones to make them equally versatile with their new weapon systems.

The navy has set its heart on acquiring another aircraft-carrier to give itself a two-fleet capability with independent and self-contained task forces operating in the Bay of Bengal and the Arabian Sea. Despite its modest size, the Indian navy is the only one in the entire Indian Ocean region which has the potential for developing in due course into a full-fledged naval force.

The other 35 littoral countries, including Australia and New Zealand, stand no comparison with it. The very smallness of the Indian Navy has also helped its personnel to develop high technical skills and establish a first rate command, communications and maintenance structure.

It has the capacity to expand at a much faster rate than other comparable navies in the region because of the rigorous standards observed in the training of its personnel, the maintenance of the ships and the conduct of operations.

The intention is to go in for a balanced development within the country's financial limits without entertaining any illusions of matching the big powers or entering into an arms race with them in the Indian Ocean.

NAVAL CHIEF HAPPY OVER MAJOR TEST EXERCISES

Bombay THE TIMES OF INDIA in English 10 May 81 p 13

[Text] New Delhi, May 9 (PTI)--The Indian Navy is in a fighting fit condition. The combat worthiness and operational efficiency of ships, submarines and naval aircraft were tested recently at sea in a major naval exercise lasting three days, according to defence sources.

The exercise, was held in the north Arabian Sea, the Chief of the Naval Staff, Admiral Pereira, and Vice-Admiral M. P. Awati, flag-officer-commanding-in-chief, Western Naval Command, witnessed various phases of the exercise.

Units of the Western Naval Command, including the Leander class frigates like "Dungiri," "Udaygiri," "Himgiri," missile frigate "Talwar," tanker "Deepak," minesweepers of the 19th mine-counter measure squadron, submarines "Vagir" and "Gagsheer" and naval aircraft IL-38 superconnies, Alises, Seakings and ship-borne Alouette helicopters took part in the exercise.

The sources said the exercise was carried out under simulated war-time environment in three phases, each phase corresponding to one of the roles of the Indian Navy in war.

The first phase covered mine-sweeping operation, second related to the protection of the country's offshore assets and harbours, and the third was a tactical exercise involving the escort of merchant ships carrying vital cargo against the threat of submarines.

The Chief of the Naval Staff expressed great satisfaction at the results achieved during the various tactical exercises.

SEMINAR DISCUSSES INDIAN-PRC RELATIONS

Calcutta THE STATESMAN in English 8 May 81 p 7

[Text] New Delhi, May 7--A seminar on "India, China and Tibet," organized by the "Group of Eighty" today suggested that Indian leaders avail themselves of the Chinese Foreign Minister, Mr Huang Hua's visit to Delhi next month "to raise the whole gamut of issues, from the Sino-Indian border question, to Afghanistan, to Tibet and seek a friendly discussion with Mr Huang on them."

There was consensus at the seminar that India had a big role to play in resolving the problems of the sub-continent and neighbouring regions, and there were favourable circumstances in which India could play this role to its own advantage. "There are cards in the hands of our diplomats that they play, but whether they will play those cards remains to be seen," Mr Badruddin Tyabji, a former diplomat, said, summing up the discussions.

Most of the speakers found "an interesting parallel" between Afghanistan and Tibet, and suggested that it would be good for India "to drive the advantage home," especially because the Soviet Union and China were now in conflict with each other.

Mr Tashi Wangdi, representative of the Dalai Lama discussed how important Tibet had become after the Chinese had turned it into a formidable military base, posing questions of defence and security for the different regions in Asia. He wanted India to "redeem its pledge" with regard to Tibet and in this connexion quoted Jawaharlal Nehru's assurance in Parliament on December 7, 1950: "It is not right for any country to talk about its sovereignty or suzerainty over any area outside its own immediate range...It is a right and proper thing to say, and I see no difficulty in saying it to the Chinese Government, that whether you have suzerainty over Tibet or sovereignty over Tibet, surely, according to any principles you proclaim and the principles I proclaim, the voice in regard to Tibet should be the voice of the people of Tibet and of nobody else." According to Mr Wangdi, "China cannot be good friends with India without solving the Tibetan problem."

Mr Lobsang Zinpa and Mr Raptan Chazotsang, members of the Dalai Lama's second and third delegations to Tibet, sent there at the instance of the Chinese Government, said that during their extensive, though conducted, tours, they had

found monasteries ravaged and destroyed, the roads used by the Chinese only for military movement (in 3-1/2 months they had found only 10 civilian buses on the roads carrying Tibetans), acute food shortage, grain being given only to those who worked for the Chinese and education far worse than what it had been when the country had been taken over. The people they had met had all wanted "independence of Tibet" and they "all want to live under the rule of His Holiness the Dalai Lama."

Professor M. L. Sondhi, convenor of the "Group of Eighty," wanted Indian foreign policy makers to respond adequately to the situation in Afghanistan and Tibet. He said there should be nationwide debates on foreign affairs and more awareness on the part of the people about what was happening around. That alone would compel the Government to take the right attitudes in foreign affairs.

General Rajinder Singh Sparrow, M.P., said the "situations around India are developing ominously" and he found no alternative for India, which was so strategically placed, but to aim to be a "super Power." Mr Farukh Abdullah, M.P., felt the Tibetan situation could not be settled only through a dialogue.

Mr Tyabji said both Afghans and Tibetans were in a difficult plight because they had to fight a super Power. The only "fortunate thing" was that the Soviet Union and China were not friends any more. India should take note of this. "I think that India has cards to play in this situation, because China has also taken a large part of India. I think there are still ways of reaching a settlement with China."

'FRIENDS OF AFGHANISTAN' SOCIETY MEETS IN BOMBAY

Organization Meeting Reported

Bombay THE TIMES OF INDIA in English 4 May 81 p 14

[Text] Bombay, May 3--Friends of Afghanistan held a convention here today to denounce the Soviet military intervention in the neighbouring land-locked country, but spent considerable time debating the Maharashtra government's measures to debar the public meeting at Chowpatty.

There was suspense over that jinxed meeting till noon today when the court ruled against the state government. The legal complications attending on the meeting became equally topical, if not more than the cause of Afghanistan, at the afternoon convention held at the Indian Merchants' Chamber.

Making his observations on the meeting's legitimacy, Mr Ram Jethmalani, Bharatiya Janata party MP, said that the refusal of permission to hold a meeting at Chowpatty was "unprecedented" as the option was not exercised even by the British government at the zenith of its tyranny.

Jinxed Meeting

The meeting became jinxed from the time permission for holding it was sought some two weeks ago. Mr Jethmalani also attributed Sheikh Abdulla's absence in the city today to the uncertainty over the meeting because of legal complications.

"I don't know the reason or all the reasons for the Sheikh's absence but the suspense over today's evening meeting was one of them," he said.

Mr Atal Behari Vajapayee, former Union external affairs minister, arrived towards the close of the afternoon meeting. On being pressed to speak, the unwilling Mr Vajapayee--he had planned only to speak at Chowpatty--said that he had come to the association's platform as a "friend" of the Soviet Union. "As a friend I am obliged to caution the Russians for their wrong steps," he said.

"We want friends, not masters," he stated, adding that the Russians must quit after occupying Afghanistan for 18 months.

He said there was no justification for Russia to "interfere and intervene" in Afghanistan. There was much less justification for India to hold a brief for the Soviet Union, he pointed out.

"Threat to Security"

Referring to the Prime Minister's fears of a war, he said, at least on such alarming situations the opposition should be taken into consideration. " I want to know where is the threat coming from and who is issuing it," he said.

To those who wished Mr Vajapayee to carry on with his speech, the former minister replied: "This is only the trailer. Watch the main event in the evening at Chowpatty."

Most speakers pointed out that early invasions of India had all started from Afghanistan and, therefore, the presence of the Soviet Union in that country was a threat to national security.

Mr Arun Sathe welcomed the guests. Mr A. G. Noorani, Mr Arif Beg and Mr Dhanmendranath also spoke. It was pointed out that the U.S. arms aid to Pakistan was a consequence of the government's Afghan policy.

An eight-point resolution condemning the Soviet Occupation of Afghanistan was adopted.

Vajpayee Addresses Public Meeting

Bombay THE TIMES OF INDIA in English 4 May 81 p 1

[Text] Bombay, May 3. Mr A. B. Vajpayee, former external affairs minister, said here today: "We are for continuing our relations with Russia, but it should not be at the cost of Afghanistan.

Mr Vajpayee was addressing a public meeting organised by the Friends of Afghanistan Association at Chowpatty to denounce the Russian action in Afghanistan. The meeting passed off peacefully.

Mr Vajpayee and other speakers at the meeting strongly condemned the earlier attempt of the Maharashtra government at not permitting the meeting. He would have even defied the ban to address the meeting. But the high court, however, brought the state government to proper path.

Though it was stated that such meetings might adversely affect the relations with Russia and Afghanistan, he felt that our relations with Russia was not so weak to be affected by a few speeches here.

He cannot understand why Mrs Indira Gandhi was hesitating to call an aggression by that name and trying to hold brief for Russia. This had hit our reputation among other countries.

While he was thankful to Russia for its help, India should not hesitate to tell that country when it had committed a mistake. India should take the initiative in bringing together the nations in the region and bring pressure on Russia to quit Afghanistan, he added.

Continued presence of the Russian army in that country posed a threat to India's independence, he added. He did not think Pakistan posed a danger to India.

Mr Ram Jethmalani presided over the meeting. Mr Ziauddin Bukhari and Mr Arif Beg also spoke. Mr Arun Sathe, convenor, earlier welcomed the leaders.

JAPAN REPORTED UNLIKELY TO INCREASE AID TO NATION

Bombay THE TIMES OF INDIA in English 4 May 81 p 20

[Text] Tokyo, May 3 (PTI): Japan, which feels that India is no more a developing but a developed country, is unlikely to make any substantial increase in its loan assistance for 1981-82 when the aid-India consortium meets in Paris next month.

This was indicated by a spokesman of the Japanese government who told a visiting PTI correspondent here: "We hope to at least maintain the last year's level, if not increase it." Last year Japan had pledged 30 billion yen to India.

Disbursement of Japanese assistance announced last year is yet to take place. The clearance is likely to be given this month except for about 10 billion yen which India had sought for the Oil and Natural Gas Commission (ONGC).

The Japanese government had insisted that unless all projects finalised under the 1979-80 assistance programme were tied up, they would not proceed with the 1980-81 programme.

India has recently sent documents for all such projects to the Japanese government except that meant for the ONGC. It hopes that the projects under the 1980-81 programme would be taken up now.

While the Japanese side complains that it found it difficult to locate "good projects" for assistance in India, Indian sources feel that Japan's procedures are most demanding and create a problem in the utilisation of such assistance.

Since 1979-80, Japan, taking note of India's improved foreign exchange reserves, has switched over rather drastically from commodity to project aid. Commodity aid was stopped in 1979-80.

The Japanese finance ministry points out that India was giving aid to Bhutan, Bangladesh and Nepal and was a donor country in the ADB, it was not really a developing nation.

"Our finance ministry feels that India is a developed country," the spokesman said but added that at the Paris meeting Japan would announce its aid pledge not less than last year's.

pages tightly bound

"We will continue to provide assistance to India despite such difficulties," he said, pointing out that India was the first country to which Japan provided overseas developmental aid since 1958.

Asked about the prospects of an increase in the trade between India and Japan, the spokesman said that the Japanese government was looking forward to expanding trade with India and was encouraging a continuing dialogue between the two governments and businessmen.

"But frankly speaking, there is not much sense of confidence between businessmen and economists of the two countries. Efforts at expanded trade must be accompanied by efforts to develop mutual trust," he said.

The spokesman saw room for import of manufactured goods from India. "We hear about the success story of India in the manufactured goods sector but we do not really know much," he added.

Other items in which he felt there was scope for Japan to import included spices, coffee, textile and marine products.

Out of the 1979-80 aid pledge, India is likely to import cross bar telephone exchanges worth nearly 7 billion yen, railway equipment worth 1.8 billion yen and equipment worth 7 billion yen for the power sector.

One of the projects that the Japanese government is considering for assistance is for the manufacture of encephalitis vaccine in India.

The two countries have been involved in protracted negotiations for the project over a long period of time, but it now appears to have reached an advance stage.

A Japanese study team visited India recently in connection with the vaccine project and, according to the Japanese government spokesman, found that "there is room for setting up the project on certain conditions."

"We have not yet committed ourselves to the project but we are tackling in a positive manner," he said.

CONGRESS-U LEADER MEETS PRESS, DENIES RUMORS

New Delhi PATRIOT in English 10 May 81 pp 1,5

[Excerpt] Congress-U president Devraj URS at a morning press conference on Saturday categorically repudiated all rumours of any impending merger or understanding with the Congress-I. The Congress-U, he declared, stood on its own and there was no move to join the Congress-I. "Individuals can say whatever they like, but they do not speak for the party," he added.

Mr Urs was sarcastic in his reply when asked to comment on reports that his party leaders had been praising Mrs Indira Gandhi. "There is place in the Congress-I for those who admire her," he said.

Replying to questions on statements by Maharashtra Chief Minister A. R. Antulay and other State Ministers about an impending merger of the Congress-U and the congress-I, Mr Urs said it was wishful thinking. His own partymen, he said, had not spoken on the issue.

Mr Urs vehemently denied reports that he had met Mr Rajiv Gandhi recently. "I have not met him at all. He was not even pilotting planes I took in my recent tour" Mr Urs said. He had met Mr Rajiv Gandhi only when he used to go to Mrs Gandhi's house to see her. "We used to casually greet each other in passing. You cannot call that a meeting," he added.

Mr Urs and party general secretaries Mr Banka Behadi Das, Mr K P Unikrishnan and Mrs Ambika Soni were non-commital when asked if the party intended taking disciplinary action against persons who had spoken in favour of Mrs Gandhi.

Referring to the Lok Sabha motion of Mr Bhagat, Mr Urs said Mr Bhagat had claimed that he had discussed the issue with Mr Chavan. The issue could be taken up at the Parliamentary Party meeting on Sunday. It was for the CPP again to discuss the performance of party MPs during discussions and debates, he added.

Mr Unnikrishnan, in reply to a direct question, however admitted that Mr Ram was speaking on behalf of the party in his speech on the no-confidence motion. The Congress-U, Mr Unnikrishnan said, had supported the no-confidence motion. 'If Mr Ram said anything, it was his way of developing his argument,' he added.

Mr Devraj Urs also expressed surprise at Mr Ram's press statement criticising the Friday Working Committee decision to postpone the presidential elections

till early November. 'I am surprised at such a senior leader going to the press. Mr Ram was a party to the decision. Whatever he had said in the CWC was an internal matter.' (Mr Ram had called the postponement of the elections as an unprecedented and undemocratic step.)

Mr Urs, however, clarified that the entire organisational elections had not been put off. Elections to the pradesh, district block Congress committees would be held on schedule and would be completed by 20 May, he said. Only the presidential elections had been put off.

Mr Unnikrishnan said that efforts were afoot to get a consensus on the party president.

The CWC authorised the president to allow the State units to put off by some days the organisational elections in view of municipal or other elections. In the case of UP, Delhi and Madhya Pradesh, where internal differences continued and various factions had challenged memberships, the president was authorised to resolve the matter.

The party is holding a leaders' camp in Bangalore in July to thrash out the party's responses to various problems as also its long range political programme.

Meanwhile, the Congress-U Working Committee at its Friday meeting passed a resolution condoling the death of Northern Ireland martyr Bobby Sands and expressed a party's solidarity with the struggle of the people of Northern Ireland.

Soon after the CWC meeting, Mr Jagjivan Ram strongly criticised decision and described it as "undemocratic and unprecedented."

Mr Ram told UNI after the two-hour meeting that despite his strong opposition, the committee by a majority resolved to postpone the poll.

"Whatever be the majority, verdict should be binding on all," he said.

Mr Jagjivan Ram is one of the contenders for the prestigious post for which the poll was scheduled for 20 May.

Mr Ram said it was strange that they should have come to this conclusion when elections to various other levels, including that of the choice of the PCC presidents were being allowed as per schedule.

He added that at no time in Congress history, the election of the party president has been delinked from the election to the PCCs.

The only inference he could draw was that 'some leaders were afraid that the majority of the rank and file' in the party would back his claims, he stated.

The meeting, presided over by party chief Devraj Urs, was attended, among others' by Mr Jagjivan Ram, Mr A. K. Anthony, Mr Priya Ranjan Das Munshi, Mr Shrad Pawar was a special invitee.

Mr Y. B. Chavan, a senior member of the working committee, did not attend the meeting as he was away from Delhi.

SHEIKH SUSPECTS DELHI'S INTENTIONS TOWARD KASHMIR

Calcutta THE STATESMAN in English 5 May 81 p 9

[Text] Shrinagar, May 4.--The Kashmiri leaders, Sheikh Abdullah notably, have become very suspicious about Central intentions. The ruling National Conference's rank and file also seem convinced that the Centre is not going to rest until the Sheikh's Government is dislodged. Mrs Gandhi and the Centre's assurances (that nothing of the sort is contemplated) carries little conviction with them.

Why did Mrs Gandhi have to refer to the sense of insecurity among the minorities in the State? The short answer given by the Sheikh is: "politic." He cannot understand why Mrs Gandhi, of all persons, should have levelled such a charge against his administration.

Then comes the question of Central financial assistance to the State. The Sheikh claims, that Kashmir simply does not have the kind of resources which the Planning Commission expects it to generate internally. The state does not have any industry worth the name. He argues that he is trying his best to mobilize internal resources "but there simply isn't much scope left."

The basic problem, the Sheikh's men argue, remains Mrs Gandhi's refusal to countenance a non-Congress(I) Government in the State. In the prevailing atmosphere, anything approximating criticism of the State administration by Mrs Gandhi or her men often gets distorted. In the latest round of acrimony, triggered off by Mrs Gandhi's speeches in Jammu, the Sheikh's men perceive a challenge thrown to their leader. And they are determined to meet that challenge.

The party rank and file is already functioning as if it were in the middle of a full-scale war. Party men have fanned out into the interior and questions are being posed. Would the Kashmiris be party to "another 1953?" (The allusion is to the Sheikh's dismissal in August that year.)

The upshot of the exercise is that Kashmiris are once again beginning to feel politically threatened. Against this background it is not strange that while some people have welcomed the recent income-tax raids on several establishments in Srinagar, these raids should have generated sympathy for the Sheikh and his party. The fact is that the majority of the establishments that have been raided belonged to men, who have backed the Sheikh for years. This is seen as another act of "vindictiveness" on the part of the Centre.

BENGAL TRADE UNION LEADER SCORED CPM 'MONOPOLIST' TIES

New Delhi PATRIOT in English 6 May 81 p 4

[Text] Calcutta, May 5: President of the West Bengal National Trade Union Congress Subrata Mukherjee said here today that the CPM in West Bengal "has tied itself" to the service of the monopolists and transnational corporations. It was for this reason that more than 100 medium-scale industrial units and more than 400 small units remained closed during the CPM rule in the State. As a result, more than one lakh workers were jobless. Taking five members per family, it would mean five lakh people in the State "are starving."

Mr Mukherjee was addressing a press conference here today. Present at the conference were Mr Kali Mukherjee, the veteran INTUC leader, Mr Lal Bahadur Singh and Mr Samar Chakravorty.

Mr Mukherjee said during the CPM rule in West Bengal, there were 706 lockouts in industrial units. The CPM did not do anything about these lockouts.

He recalled that during the earlier Congress regime there was an enactment by which a State Government could declare any lockout illegal. It was strange that the CPM could find no time or opportunity to implement this enactment.

Mr Mukherjee also said that the CPM-led Government here allowed the employers in jute, engineering and textile industries to go without any industrial agreements for 24 months after the lapse of the earlier agreements. As a result of this, the employers could gain an additional amount of Rs 100 crore.

The INTUC leaders said the CPM and the CITU were preventing the working people from starting any movement against the monopoly exploitation. The INTUC would hold a public rally of working people in Calcutta on 28 May, they informed.

ANALYST DESCRIBES CASTE TENSIONS IN BUJARAT

Bombay THE TIMES OF INDIA in English 7, 8 May 81

[Article by Inder Malhotra: "Gujarat's Caste Conflict"

[7 May 81 p 8]

[Text] To be in Ahmedabad these days is to be in two states at the same time. One is, of course, the state of Gujarat; the other a state of despair. This is because the continuing antagonism between the caste Hindus and the Harijans there is so great as to be a source of grave concern. In fact, it has to be seen to be believed.

Contrary to the impression prevailing elsewhere and the claims made locally, the end of the antireservation agitation has in no way abated the caste conflict in Gujarat. Only the overt violence has died down or has been brought under control for the time being. Mutual bitterness between the two sides, however, is both spreading and taking deep roots. Nothing could have illustrated this more vividly than the recent brutal attack on Dr Murgesh Vaishnay, the leader of the junior doctors' struggle against reservations in medical colleges, especially at the post-graduate stage. His assailants were not Harijans but his own erstwhile supporters and followers who openly said that by agreeing to withdraw the antireservation agitation he had let the side down.

Embittered

For their part the Harijans are even more embittered than they might have been because they have good reason to feel that the local language press has unfairly made them out to be the villains of the piece even though they were at the receiving end of violence most of the time.

Surely this distressing situation would not have existed today if, as is generally made out, the caste conflict in Gujarat had been the result only, or even principally, of the anti-reservation agitation. The reservation issue is a highly complex and emotive one no doubt. But its role in the tragedy that has unfolded itself in Gujarat has been and continues to be limited. There are other more powerful reasons for a sudden accentuation of the caste tensions in that state and these can be understood only in proper historical perspective.

The most important of these is a drastic disturbance of the traditional balance of caste forces in the state as a result of Mrs Gandhi's return to power at the Centre and the subsequent victory of the Congress(I) in the state assembly election. In Gujarat today, KHAM has become an abbreviation as well known as say, CPWD is in Delhi. The four letters stand for the new ruling combination of Kshatriyas, Harijans, Adivasis and Muslims. This means that the political power of the hitherto dominant caste of Patels or Pattidars has been destroyed almost completely though it retains its substantial economic and social clout.

For the first time in Gujarat's history, there is not a single Pattidar in the state cabinet that previously was virtually run by Patels. Ironically, the Harijans, too, have no representation in the cabinet today. But that is a different story that has more to do with the rivalries within the ruling party than with the caste configuration in the state's politics.

A major conflict, if not an upheaval, would have been inevitable in these circumstances. Two factors appear to have hastened and accentuated the process.

First, Mr Solanki's government, having deprived the Patels of political power, has embarked on an attempt also to erode their economic power base, the formidable cooperatives controlled so far almost exclusively by Pattidars. Most of the apex committees of cooperatives would have been totally reconstituted by now under a new law but for the fact that it has been challenged in the Gujarat high court.

Secondly, the first taste of real power has made the hitherto docile Harijans rather assertive which is tantamount to sprinkling salt on the wounds of those unable to distinguish between natural assertiveness and intolerable aggressiveness. Mr Yogendra Makwana's appearance on the scene, his appointment as Union minister of state for home affairs and his ill-concealed ambition to play in the new dispensation the role that Mr Jagjivan Ram did in old days, have also had their impact on the troubled situation.

The unchallenged dominance of the Patels and the generally complacent behavior of the Harijans, combined with the Gandhian tradition, had mercifully kept Gujarat free from such outrages as Belchi or Narainpur during the last 33 years. But by December last the situation had changed so radically that precisely such a horror was perpetrated on Christmas day at a village called Jaitalpur, barely 18 km away from Ahmedabad.

A Harijan youth of the village, accused of theft, was first beaten up brutally and then burnt alive. Almost immediately all hell broke loose. Led by Mr Yogendra Makwana's wife, Shantaben, who is herself a vocal MLA, Harijan leaders of all parties, including the militant Dalit, Panthers who have made an appearance on the Gujarat scene for the first time, descended on Jaitalpur and demanded that all the local Pattidars be arrested. The police resisted this demand and eventually took into custody only ten people of whom five, named in the dying declaration of the Harijan youth, have since been denied bail.

Misinformation

Tension, however, mounted fast, especially because during the motorcade to Jatalpur, led by Mrs Makwana, a Harijan in one of the jeeps hurled a stick on a Pattidar driving a tractor. This led to a fatal road accident. The upshot of the whole traffic affair was rather curious. Instead of there being sympathy for the Harijan there was much resentment against them, especially in Ahmedabad.

Against this backdrop it is only fair to conclude that the antireservation agitation, which began 11 days after the Jaitalpur burning, did not touch off the caste conflict but was itself an outcome of the growing caste antagonism. Moreover, it is rather strange that the agitation should have lasted more than three months although all the demands of the agitating doctors, except that for a total abolition of reservations, had been conceded within the first few days.

A close look at the course of the agitation and the claims and counter-claims made during it also reveals that even on the issue of distortions and aberrations in the implementation of the reservation policy much misinformation was spread, wittingly or unwittingly. That only added to the sentiment against the Harijans.

Far more vicious was the campaign to malign the Harijans, on the basis of rumours, half-truths, innuendo and downright fabrication. During the days that the city was caught in the grip of violence, it is not that the Harijans did nothing wrong. They surely did. But, by and large, they were the target of attacks rather than the attackers. And yet they were depicted as the aggressive party.

The pattern of wholly false rumours, fostered so sedulously that they circulate till today, was revealing. The Harijans were accused of attacking successively a Jain mandir, the office of the Khoja association, the Guru Nanak Bhavan and St. Xavier's Ladies' Hostel. None of these incidents ever took place. Nor did the alleged attack on a marriage feast at Khambatwala Hall which is supposed to have "put into shade even the Rabindra Sarovar outrage in Calcutta a decade ago."

No wonder, in such an inflamed atmosphere, trouble quickly spread from Ahmedabad to villages where, as at Detroj, their homes could be burnt down in a jiffy. Social boycott or Harijans in some villages persists even today.

Rivalries

It is possible, indeed probable, that the caste conflict in Gujarat could have been prevented from assuming the ugly proportions it did were it not for multiple rivalries within the Congress (I) and the diverse, often conflicting pressures on the state chief minister.

From the other side of the political fence, the BJP made things difficult by fanning the anti-Harijan sentiment. Mr Atal Bihari Vajpayee reportedly remonstrated with local leaders and advised them not to alienate the Harijans completely. But he was curtly told that since the Harijans were "lost" to Mrs Gandhi anyhow, the BJP should try to win over the caste Hindus at least, rather than allow them to rally round the Lok Dal leader, Mr Chimanbhai Patel of the Navnirman notoriety.

The police and its leadership also showed signs of strain and there came a stage when clashes between the caste Hindus and the Harijans ceased and the public versus the police battles began.

In this connection it is significant that the clashes between the caste Hindus and the police were far more widespread than those between the Harijans and the police force. There were 176 cases of stonethrowing on the police by the Harijans and 1,263 by the caste Hindus. The police found it necessary to open fire on the Harijans 14 times, and on the caste Hindus 125 times. For "substantive offences" 335 Harijans and 2,003 caste Hindus have been arrested.

Perhaps the most telling indicator of the situation in Ahmedabad is that the Magsaysay award-winner, Mrs Ila Bhatt, was the only caste Hindu leader of stature to have spoken out in favour of the Harijans as well as the reservations. Her house was immediately and repeatedly stoned. For the last two months she has had to take shelter in her parents' home in a different part of the city.

More chilling than this is the comment of some respectable citizens of Ahmedabad that she deserved no better.

[8 May 81 p 8]

[Text] Evidently, the caste polarisation in Gujarat cannot be allowed to remain at its present fevered pitch without risking a major upheaval in the state's body politic. But the trouble is that on both sides of the dividing line, even those aware of the danger ahead seem unwilling or unable to do anything about it.

On the contrary, a lot is "being said and done to exacerbate feelings. For instance, a federation of students, bank employees, traders, doctors, lawyers and others, cutting across party lines, has been formed to "renew" the struggle against reservations and to "carry it through this time." It is also noteworthy that the associations and unions of the Gujarat police, the quarter million state government and panchayat employees and the Central officials and workers posted to that state have all passed resolutions demanding that the reservations be scrapped completely.

This may be no more than a tactical move. By pitching their demand too high, the babus and bureaucrats may be hoping only to get rid of the roster system under which officials belonging to the scheduled castes and the scheduled tribes can be given accelerated promotions. A commission, headed by Mr Samdhani, a retired chief secretary, is, in fact, looking into this very problem which has undoubtedly caused a lot of heartburning in the bureaucracy at all levels. But the extreme stand taken by those who are supposed to implement the reservation policy, to which not only the government but also the entire Parliament is committed, does create grave misgivings among Harijans and Adivasis.

Overblown Rhetoric

By comparison the advocates of reservations continue to be disorganised and somewhat weak. But the lack in unity and strength they are trying to make up by overblown rhetoric which is often self-defeating. The Dalit Panthers are not the only ones to provoke many caste Hindus by their militancy.

There is an equally strong feeling agaist the utterances of a senior and respected Congress (I) leader, Mr Jinabhai Darji. He is not a Harijan but belongs to the backward caste of tailors which should explain his surname. But on the issue of justice to the socially deprived, he is uncompromising to the point of being unrestrained. He has been proclaiming from the housetops, for instance, that the centuries-old injustice in Hindu society would be undone only when high-caste women in large numbers start working as maidservants in Harijan and Adivasi homes.

In such an inflamed atmosphere how can one hope for an amicable settlement of the ticklish issue of the roster system when a consensus on it would have been difficult even at the best of times? Unfortunately, matters have been made a lot worse by two parallel but conflicting developments.

In the first place, those opposed to reservations have succeeded in spreading so much misinformation on the subject as to cloud the issue, mislead the gullible and infuriate the Harijans. For instance, the impression that brilliant caste Hindu students are being turned back by medical colleges by the dozens while mediocre Harijans and Adivasis can have their pick of post-graduate medical courses is a grotesque distortion of reality.

In the B.J. Medical College of Ahmedabad that became the epicentre of trouble, there are 56 post-graduate seats. Of these, only three are reserved for Harijans and another six for Adivasis. During the last six years since reservations at the post-graduate stage were introduced, the reserved seats have never been fully utilised despite the now discarded carry-over and inter-changeability systems introduced by the Janata ministry, headed by Mr Babubhai Patel, in 1978.

Because of the roster system, it does happen that a solitary seat in, say, the pathology department may be reserved for Harijans or Adivasis one year and thus out of the reach of general students. But then the next year it is bound to be reserved for general students and unavailable to Harijans irrespective of their marks. And it needs to be added that, contrary to the general impression, Harijan students do sometimes get higher marks than their caste Hindu counterparts.

Furthermore, while there are strident objections to reservations for Harijans and Garijans, there has not been even a whisper of protest against the reservation of seats in medical colleges for the children of "donors," irrespective of their academic performance.

Insidious Canard

Perhaps the most insidious canard successfully spread in Gujarat is that reservations at the post-graduate stage in medical colleges were introduced by the then governor, Mr K. K. Biswanathan, to facilitate the admission of his own son, Mr K. K. Venuraj. The truth of the matter is that the young man joined the post-graduate course in 1973, while the reservation principle was extended to the post-graduate level two years later. Another small point is that Mr Viswanathan is neither a Harijan nor a Girijan. [as published]

In any case the reservation issue affects only a small proportion of the Harijans, while the caste Hindu resentment is directed against all of them.

The second development that has muddied the waters further is the addition of 82 castes to the list of backward classes. This was done in accordance with the recommendations of a commission headed by Mr Justice Buxi, and the 82 castes have been collectively nicknamed the "Buxi panch." Another commission, presided over by Mr Justice Rane, is now busy examining the claims of several other castes to be recognised as backward. All this has fed the fear of the anti-reservationists that reservations may be increased from 25 per cent at present (seven per cent for the scheduled castes, 13 per cent for the scheduled tribes and five per cent for other backward classes) to 45 per cent, the maximum permissible under a Gujarat high court judgment.

However, this dark picture is not without the proverbial silver lining. For one thing, the Congress(I) in Gujarat has been shocked into recognising the dangers ahead. New Delhi's plain-speaking also has had some effect on the ruling party's squabbling leaders.

On the other hand, even behind the smokescreen of angry rhetoric, Harijan leaders have realised that by carrying things too far they might invite disaster on the Harijan population scattered most vulnerably in tiny pockets across thousands of villages. This is the foundation of which men of goodwill anxious to restore sanity and harmony in Gujarat will have to build brick by brick.

VENKATARAMAN SPEAKS IN DEBATE ON 1980-81 BUDGET

Bombay THE TIMES OF INDIA in English 8 May 81 p 13

[Text] New Delhi, May 7 (UNI). The finance minister, Mr R. Venkataraman, today indicated his preference for market borrowing for raising resources to a heavy dose of taxation.

Replying to the debate on the finance bill giving effect to the 1980-81 budget proposals in the Rajya Sabha, Mr Venkataraman said the government had resorted to the mobilisation of resources through borrowing, as he wanted to avoid "savage taxation."

The house later returned the finance bill, 1981, as passed by the Lok Sabha, without any modification.

He said the sale of special bearer bonds, issued to mop up black money, had yielded Rs 374 crores, according to the final figures.

The minister admitted that the court case had hampered the sale of the bonds. The sale proceeds of the bonds would have crossed Rs 1,000 crores, had their issue not been challenged in the court, he said.

Asked what would happen if the court invalidated the bonds scheme, the minister said the government would pay the money immediately if the individuals so wanted. "In case they wanted it after ten years, we will pay then," he added.

In his reply lasting more than one hour, the minister dealt with various points made by members including the state of the economy and taxation.

The minister listed various signs of the recovery of the economy and said it was now poised for a "moderate rate" of growth of five per cent as envisaged in the plan.

Mr Venkataraman hoped the price level would remain at a "moderate level of increase" if international oil prices remained stable.

He said oil prices might not go up further in the current financial year, because of the declining demand and more availability. The "whip hand" of oil-producing countries was somewhat loosening, he added.

Mr Venkataraman said the rate of inflation had been moderated during 1980-81 and he hoped the declining trend of inflation witnessed during the last financial year would continue in the current year.

The minister said the government had referred to the Jha commission on economic administration the re-codification of income-tax laws.

Mr Venkataraman also informed the house that the proposed income-tax appellate tribunal would start functioning very soon. The government had decided to appoint a retired or sitting high court judge as its chairman.

The minister defended the import duty on newsprint and said, "it does not deserve any special treatment."

He did not favour the introduction of an expenditure tax as suggested by some members as experience had shown that this tax did not yield much revenue.

NORTH INDIAN MUSLIM LEAGUE FORMS NEW PARTY

Bombay THE TIMES OF INDIA in English 10 May 81 p 13

[Text] Agra, May 9: The north Indian group of the Indian Union Muslim League (IUML) has "revolted" against the party leadership and formed a separate independent party known as the Indian Muslim League (IML).

Mr Shujatullah Khan, former chairman of the parliamentary board of the IUML, has assumed chairmanship of the newly constituted unit.

Addressing a press conference here yesterday, Mr Khan said that the split had been the result of deep-rooted differences. The party leaders wanted the League to extend full support to the ruling Congress(I). They refused to raise their voice of dissent even on such vital questions as the police firing on farmers in Andhra Pradesh or on a congregation engaged in Id prayers at Moradabad. The party legislators did not register their protest on many other questions involving basic interests of the minority communities.

Fissures in the party fold were noticed before the last parliamentary elections, when the party leadership in the southern states, decided to support the Congress (I) and the CPM, whereas in the northern states, the League refused to have any truck with Mrs Indira Gandhi's party. Since then, there had been heated discussions within the party during which Mr Sulaiman Sait was criticised for his pro-Congress(I) posture.

Although the IUML had come into existence nearly ten years ago, a constitution had not yet been adopted. Party elections had not be held for the past eight years, he said. [as published]

Mr Khan announced that the IML would shortly hold party elections in the states of U.P., Rajasthan, Madhya Pradesh, Haryana and Delhi, where ad hoc party units had already been constituted.

In Bihar, the establishment of a party unit was under consideration. In the southern states, his party would work for the establishment of a strong base.

His party would also hold a conference of Muslim jurists and "ulemas" at New Delhi shortly to discuss possible areas of reforms in the Muslim personal law in the light of the Holy Quran and other tenets of Shariat.

"Certain practices under the Muslim personal law have become obsolete and these must be changed to meet the challenges of the present times," he said.

His party, he said, would not field candidates for the forthcoming by-elections for parliament and state assemblies. But the IML would support opposition efforts to field common candidates against the Congress(I).

'PATRIOT' INTERVIEWS NAXALITE LEADER PATNAIK

New Delhi PATRIOT in English 11 May 81 pp 1,7

[Interview with Nagabhushanam Patnaik, Naxalite leader, by the PATRIOT on 10 May 1981; place not given]

[Text] The politics of annihilation is not a pragmatic political philosophy, said ailing Naxalite leader Nagabhushanam Patnaik on Sunday in an interview with this reporter.

Mr Patnaik, a free man after 11 long years in detention, concedes: "We did commit an error by implementing this erroneous line."

The ailing leader also does not see cause for consternation in the so-called repeated splits in the left movement. In fact, he sees hope in the recent phenomenon of major revolutionary groups assiduously hunting for grounds they can rally themselves together on.

Mr Patnaik hopes that other political sufferers, like him, too will be released by the Government.

Question: Are you in favour of politics of annihilation?

Answer: We are against annihilation of class enemies. There are only a negligible number of revolutionary groups that still believe in this philosophy. But the major groups have understood the futility of such politics. We did commit an error by implementing the erroneous line. Annihilation can never be a political campaign or line of any political organisation much less a Marxist-Leninist organisation.

In the course of the development of the agrarian revolution, there may be sparse instances where people are roused against some atrocious landlord. There can be appropriate punishment awarded by the people but such practices cannot form part of a general political campaign. By practising this kind of politics, we give a handle to the enemy to come down heavily on people with the worst kind of white terrorism.

Splinter groups have to learn the lesson and it will be through discussion they will have to be brought round the corner.

Left Unity

Question: Sometime back you had given a call for left unity?

Answer: Call of left unity, if it is not well defined, may lead us like the six blind men who are to describe an elephant. When I gave the call for unity, I gave it for revolutionary forces, groups and individuals and when I spoke of . united front in mass struggles it was to get together against a common enemy.

Today fascism rules the roost. There is a great need for antifascist forces to get together and fight the common enemy.

Question: But it is being observed that leftist parties are sometimes splitting and drifting away from each other?

Answer: The phenomenon of splitting under the Marxist-Leninist dialectics is not exasperating. We are not disheartened by the so-called splits. It is in the general stride of the development of struggle and development of revolution.

In the great Lenin-Bolshevik party there was a time when there were seven groups but the effort and endeavour should be to unite the revolutionary forces.

I see a basis for the principle of unity of all revolutionary forces. There is not much ideological difference between major groups as I see... Its only the tactical questions which have been worked up to such a high pitch and hence stand as barricades to unity.

There is a very happy trend today that all major revolutionary groups are able to see eye to eye and together are in search of grounds on which they can rally themselves together. This figures well for the Indian revolution.

Politics

Question: You had mentioned that you planned to enter the mainstream of national politics. How do you plan to do so?

Answer: Before anything else, I plan to build up my health to my normal self. As I have said before, politics is our life blood.

When I say that I would be in the mainstream of country's national life with politics I believe in, I mean I would be with my people--involved in their issues and carrying on anti-feudal struggles. I visualise it as the practical first step I have to take. The first mission is to strive for left unity of the revolutionary forces, groups and individuals.

Question: What are your views on parliamentary politics?

Answer: We are of the view that the parliamentary path is a negation of the new democratic revolution we believe in. We had given the 'boycott election' slogan earlier while we were in the united party as a general political line of ours which we corrected later and treated the slogan as a tactical line.

Participation in elections here and there, now and then to further the immediate cause is one thing and believing in the parliamentary path is another.

Question: Which was the first case instituted against you by the Government and in how many cases were you allegedly involved?

Answer: After we formed our movement, the ruling classes were in tantrums and in their attempt at the usual suppression, they did nab me as long back as June 1969 and involved me in a case that came to be known Nagavani Pelem case with murder charges. I was sentenced to death since, despite being a lawyer, I did not defend myself as a disciplined soldier of the organisation. I did not beg for my life from the State.

There were at least eight cases instituted against me by the Government of which quite a few were those of murder. One murder case is still pending.

Question: How did you lose your health?

Answer: Repeated hunger-strikes during my imprisonment which was torturous did tell upon my gastric system resulting in two surgical interventions in the abdomen. Major portion of my stomach had to be removed. The imprisonment may have broken my health but not my spirit.

I came to the AIIMS to be treated for fever I had been continuously running since last five months. For the first time on 1 May, the temperature came under control.

I am a bundle of bones in a sack of skin with no flesh on my body.

Question: How do you view your new-found freedom?

Answer: I take it in my stride. Nothing euphoric about it. I was surprised since I never had expected this from the law courts.

Release or no release, I hail the valiant efforts put up by the democratic forces of the country in attempting to set political prisoners free including myself.

This spirit has to be kept up for the benefit of many other prisoner comrades confined in different jails in the country.

Question: When the Government started a crackdown on your party, many of your comrades dropped out of the movement. How do you feel towards them since you stuck to the cause through thick and thin?

Answer: In every movement every one will not reach the destination and drop-outs are bound to be there. We are not antagonistic to these dropouts, since we consider them to be political sufferers as well. Its just that these people could not contribute to the cause to that extent. The Government should release such people first.

FINANCE MINISTER SCORES PUBLIC SECTOR PERFORMANCE

Madras THE HINDU in English 12 May 81 p 1

[Text] Mr R. Venkataraman, Union Finance Minister, today said "the managements of public sector enterprises, whose capacity utilisation has been woefully unsatisfactory, owe the nation an explanation for their poor performance. It is unacceptable that some units should work at high levels of efficiency while others languish."

The Finance Minister was inaugurating a two-day seminar organised by the Centre for Public Sector Enterprises in collaboration with the Bureau of Public Enterprises in collaboration with the Bureau of Public Enterprises (BPE) and the Standing Conference of Public Enterprises.

Expressing concern over the deterioration in labour-management relationship and professional morale in the public sector, Mr Venkataraman said: "At present labour as well as managers have no sense of belonging to the unit and adopt an attitude of confrontation with each other. The champions of the public sector should realise that unless productivity and profitability improve, it will be difficult to face parliamentary and public criticism of the public sector."

The Minister said a big improvement in the performance of the public sector had now assumed greater urgency, because of the huge expansion of some of the public sector activities in the core sector, envisaged during the Sixth Plan.

"The Government placed great faith in the public sector. It has progressed in several directions, but has not yet delivered results commensurate with the massive investments which have gone into it at great public sacrifice. If the public sector enterprises are to deliver the results expected of them, they will require the unstinted support from all concerned--Parliament, Government, labour and management."

Managements Accountable

Stressing that the public sector managements should be held accountable for achieving the tasks allotted to them, the Finance Minister also took note of some of the constraints. To some extent, unsatisfactory power availability and transport bottlenecks and also the disruption caused by the Assam situation, might have contributed to the loss of output in some public sector enterprises. "But were these the only reasons for their poor performance?," he asked.

"I am sure there were other factors within the control of Government, management and labour which caused the shortfalls in performance," he said.

He called upon the employees of the public sector "to appreciate the national purpose of their employment and the public trust reposed in them. They should develop productivity-consciousness and eschew demands for higher remuneration not matched by increased productivity."

Expressing distress over the poor capacity utilisation in many public sector units, the Finance Minister said this was one of the reasons for their declining profitability. In 1979-80, capacity utilisation in steel was only 66 per cent, in fertilizers 52 per cent, zinc 59 per cent and copper 53 per cent. He, however acknowledged the encouraging performance in respect of coal, and the 100 per cent capacity utiliations [as published] of the Brahat Heavy Electricals and 85 per cent by the Hindustan Machine Tools.

Plan of Action

Mr Venkataraman said that in order to identify clearly the goals of corporate management, the BPE had requested all public enterprises to prepare a plan of action for 1981-82 and 1982-83 indicating their physical and financial targets. Once these plans were made available, the BPE would consolidate them for monitoring the projected achievements of the enterprises.

Though Mr Venkataraman expressed his distress over the poor performance and the declining profitability of a number of public sector enterprises which perpetuated their continuing dependence on budgetary support, he acknowledged that the public sector was not guided by profit motive and that its performance should not be judged only on the basis of profitability.

A deliberate policy decision had been taken to peg prices in public enterprises below cost. To that extent, the losses of the public sector might be explained. But losses in excess of the allowable limit called for managerial accountability.

Minimum Standards

"It is for this reason that in drawing up performance evaluation criteria for public enterprises, the BPE has evolved a set of "required rate of return for various public sector enterprises. I hope the public sector managers will be able to achieve these minimum standards of performance expected of them," he said.

Mr Venkataraman said in the public sector, the return on investment measured in terms of gross profit before tax as a percentage of the capital employed, rose from 4.2 per cent in 1969-70 to 7.6 per cent in 1979-80. But considering the return after payment of tax, which is the corresponding yardstick of performance in the private sector, the rate of profit was negative in the last two years in the public sector.

PTI reports: A separate Department of Public Undertakings was suggested by Mr D. N. Tiwari, president of the centre, and former Chairman of the

Parliamentary Committee on Public Undertakings. The proposed department should be directly under the Prime Miniser, he said.

He also suggested the formation of a committee of MPs, headed by the Speaker, to lay down norms and guidelines to ensure accountability without eroding the autonomy of public enterprises.

Mr Chintamani Panigrahi, MP and covener of the seminar, emphasised the need for a positive and vigorous public relations policy for the State units.

MNF LEADER LALDENGA REPORTS ON PROGRESS OF TALKS

Bombay THE TIMES OF INDIA in English 11 May 81 p 9

[Text] New Delhi, May 10 (UNI). The discussions on the 26-point political demands submitted by the Mizo National Front (MNF) for arriving at a permanent solution to the Mizo problem are likely to be completed in the next two weeks the MNF leader, Mr Laldenga, said today.

Mr Laldenga told UNI that the first round of discussions with the Union government on these demands had been completed and that the final round was likely to commence some time next week.

Mr Laldenga has had four rounds of meetings with the Union home minister, Mr Zail Singh, in this connection.

He said that some sort of a broad agreement and understanding of each other's viewpoint had emerged out of these discussions.

Mr Laldenga expressed confidence that the day was not far off when a permanent solution to the Mizo problem would be found within the parameters of the constitution.

Mr Laldenga was assisted in the talks by two of his underground "cabinet colleagues," who have been camping here since the demands were presented to the Prime Minister, Mrs Indira Gandhi, early last month.

The home secretary, Mr S. M. H. Burney, and other officials assisted Mr Zail Singh. Mr Yashpal Kapoor was also present at the meetings.

The likelihood of the Laldenga-led three-member MNF delegation entrusted by the underground movement with the task of holding discussions with the Union government returning to the MNF headquarters is not ruled out.

The delegation, in any case, would like to return to their headquarters to apprise the rank and file of the MNF about the outcome of the discussions on their demands.

About the MNF's demand for the merger of Mizo-speaking areas of states adjoining the Union territory of Mizoram, Mr Laldenga said that this would be the most opportune moment to settle this issue once and for all.

Mr Laldenga pointed out that in Manipur the Meitis considered themselves a superior race and looked down on the Mizos.

In such a situation, how could a large population of Mizos in Manipur live in peace and harmony, he asked.

He said that this was not merely a political problem. It was also a human and social problem. The Mizos, living in Manipur bordering Mizoram had been subjected to a lot of indignities for over a century, he added.

WEST BENGAL CHIEF MINISTER TALKS TO NEWSMEN

New Delhi PATRIOT in English 10 May 81 p 4

[Text] Trivandrum, May 9 (PTI)--West Bengal Chief Minister Jyoti Basu said today that Pakistan backed by "US imperlialism" posed a real threat to our country.

"Pakistan by itself is no danger. But US imperialism is behind it and India should take note of it," he said at a "Meet the Media Programme" of the Press Club here.

Mr Basu was happy that the Government was aware of it. Military strength should be there, but that alone was not sufficient. Democracy had to be strengthened further which, however, was not the case at present, he regretted.

Mr Basu expressed himself against creation of any "war psychosis" in the country. Asked if it would not help people rally round, he countered "Why did we then run away during the Chinese Attack?"

The Chief Minister devoted considerable part of the time to explain his present mission which would take him to different States. Though he did not see any imminent danger of his Government being toppled, he felt such a possibility was certainly on the cards. The Cong-I was an 'undemocratic party" and he didn't want the people to be taken by surprise as happened in the case of imposition of emergency.

The Chief Minister refuted the charge that his Government was attempting at indoctrination through the educational system. It was his Government which introduced Tagore's "Sahaj Path" in the primary classes, but later found it was too tough for the tower standards, he said.

Mr Basu also criticised the Election Commission's action in postponing the by-elections as demanded by Cong-I legislators.

Before emplaning for Bombay just afternoon, Mr Basu spoke on the topic 'West Bengal experience' at a function organised by the Indian School of Social Science.

Centre Desperate

West Bengal Chief Minister Jyoti Basu has said the public utterances of Prime Minister Indira Gandhi dissociating from the toppling non-Cong-I governments, moves should not be taken at their face value.

Addressing a public meeting here last evening Mr Basu said for the last 17 months, ever since the Cong-I returned to power at the Centre, its leaders like Mr C M Stephen and others, had been calling for Presidential rule in States ruled by the non-Congress-I Governments. Mrs Gandhi, on her part had not even once reprimanded these leaders "flying wide to discredit such Government," he added.

Mr Basi said the Cong-I was creating trouble in the non-Cong-I States to oust the Governments there, because its Government at the Centre had not been able to fulfil is election pledges. [as published]

Mr Basu said the Cong-I Government at the Centre had become desperate for its failure to redeem its election pledges to solve economic, political and other problems facing the country.

He alleged that most of the activists of the Cong-I in West Bengal were gangster and anti-social elements trained in all sorts of anti-people activities.

They have been let loose to create a situation that would attract a Central intervention under Article 356 of the Constitution, he added.

Mr Basu said during the opposition sponsored Bengal Bandh on 3 May, they killed as many as 23 innocent persons, five of them women.

CSO: 4220

CONGRESS-U REPORTED PLANNING JULY MEETING

Bombay THE TIMES OF INDIA in English 12 May 81 p 7

[Text] Cochin, May 11 (PTI): A party leaders' camp of two or three days' duration will be held in Bangalore in July to discuss and decide on the Congress-U's new political line.

Mr A. K. Antony, Kerala PCC-U president, who returned here today after attending the party's working committee meeting at Delhi during the week-end, told PTI that the over-all political situation obtaining in the country would be taken into consideration while giving final shape to the political line of the party. He did not elaborate further.

Mr Antony said there was no change in the venue of the AICC(U) session which would be held in November at Aurangabad. The election of the party president would be held a month earlier. He said the election to this post was postponed because of by-elections to the Lok Sabha and assemblies in five or six states next month. In all other states, including Kerala, organisational elections were going on as scheduled. In Kerala, these elections would be completed by May.

Mr Antony said there was bound to be contests for some posts in the party. "There cannot be any wonder in it. This is how a democratic organisation functions."

He said attempts were being made by some people to create "confusion" among party workers. He asked the workers to be vigilant and remain firm within the party fold.

CPI LEADER RAO COMMENTS ON BIHARSHARIF INCIDENTS

Judicial Inquiry Opposed

Bombay THE TIMES OF INDIA in English 12 May 81 p 5

[Excerpt] Bhubaneswar, May 11 (PTI)--The communist party of India is opposed to holding an "immediate" judicial inquiry into the Biharsharif disturbances as it felt that this would stall action against a section of the police and administration which "colluded with communal forces," CPI general secretary, Mr C. Rajeshwar Rao, said today.

Mr Rao told a press conference here that the demand for an immediate inquiry made by the Bharatiya Janata party president, Mr Atal Behari Vajpayee, was meant to cover up "the mischief of the RSS," which, he alleged, was responsible for the riots and to prevent action being taken against the culprits.

Mr Rao said the judicial inquiry into the Jamshedpur riots two years ago, was yet to be completed, pending the inquiry, no action had been taken against mischief makers in Jamshedpur, he added.

Mr Rao, answering questions, said: the CPI did not believe in banning the RSS. They should be fought politically, exposed wherever they caused mischief and administrative action should be taken against them.

Alien Hand Seen

Bombay THE TIMES OF INDIA in English 12 May 81 p 5

[Text] BHUBANESWAR, May 11: The CPI general secretary, Mr. C. Rajeshwara Rao, said here today that the believed there was a connection between the recent communal and fratricidal conflicts in some parts of the country and the Washington Beijing-Islamabad axis building up a threat to the security of the country.

Mr. Rao told a press conference here today that the anti-reservations agitation in Gujarat and the communal clashes in Biharsharif had taken place "precisely at a time" when the country was concerned over the external threat arising from the massive arming of Pakistan by the US and Chinese expansionism.

According to Mr. Rao, while the Bharatiya Janata Party and the RSS had played "a sinister role" in fanning communal flames, the Congress (I) governments were responsible for encouraging chauvinist conflicts. The Congress (I) had joined hands with the RSS with the objective of toppling the Left Front government in Kerala and the Antulay government in Maharashtra was "openly befriending the Shiv Sena" to crush people's movements. He alleged that in Orissa, the Patnaik regime was hand in glove with RSS-dominated student organisations like the Vidyarthi Parishad.

Mr. Rao alleged that the ruling party in Orissa was sheltering anti-social elements.

MUSLIM LEAGUE DEMANDS RESERVATIONS FOR MUSLIMS

Madras THE HINDU in English 11 May 81 p 10

[Text]

CALICUT, May 10.

The national executive of the All India Muslim League at its meeting here on Sunday demanded due representation for Muslims for jobs in Government and quasi-Government institutions.

It said that Muslims were far behind the Scheduled Castes and Tribes in getting jobs in the IAS, IPS, Railways and Posts and Telegraphs and other departments. Immediate steps should be taken to give them their due share.

The national executive adopted a resolution urging the Centre and State Governments to declare Muslims as a 'backward community'.

The principle of reservation in educational and job opportunities should be applied to Muslims also. A separate Ministry or department should be set up by the Centre and States to deal with their problems, it said.

The meeting demanded that Urdu be recognised as an official language wherever it formed the mother-tongue of the majority of Muslims. The minority character of the Aligarh Muslim University should be restored without any delay.

'Check communal incidents'

Describing the Biharsharif incidents as the "latest shock" to Muslims, it urged the Centre and State Governments to crush communal incidents with a iron hand. It deplored that even 33 years after Independence communal incidents continued to rock the country and all Governments had "miserably failed" to contain them.

A resolution demanded statutory powers for the minority Commission.

The meeting deplored that Waqf properties were being "trespassed" and "alienated indiscriminately".

It appealed to the Centre to solve the citizenship issue in Assam by adopting Constitutional means.

The meeting supported the Centre's foreign policy and condemned the Soviet intervention in Afghanistan and the U.S. attitude to the Palestinian issue.

It urged the Centre to appoint at least one officer knowing Malayalam in Indian embassies in the Gulf countries so that the large number of Keralites employed in these countries could get the maximum help.

Mr. P. M. Abu Backer, Kerala PWD Minister, participated in the meeting.

Mr. Ziauddeen Buhari, president of the all India committee of AIML presided.

PAPER REPORTS NO-CONFIDENCE DEBATE IN LOK-SABHA

Madras THE HINDU in English 10 May 81 p 12

[Text] NEW DELHI, May 9

After a nine-hour debate lasting till 2-15 this morning, the Lok Sabha rejected a no-confidence motion — the first since Mrs. Indira Gandhi was returned to power 16 months ago — by 275 votes to 90.

The ruling party members greeted the declaration from the Chair that the motion had been lost.

The House then adjourned sine die.

Replying to the debate, hilarious and at times boisterously acrimonious, the Finance Minister, Mr. R. Venkataraman, asserted that most of the promises his party had made in the poll manifesto had been implemented.

The economy, which was in a very poor shape, had been completely resuscitated — from a position of near-sickness to one of moderate growth.

Intervening in the debate the Home Minister, Mr. Zail Singh, twitted the sponsors of the motion by saying that everyone knew what would be the fate of the motion.

'In delirium'

Amidst cheers from the ruling party members, Mr. Venkataraman said: "We had inherited an economy which was in a state of delirium".

It was in a poor shape. Now it had been resuscitated — from near-stagnation to one of moderate growth.

Countering Opposition criticism point by point, Mr. Venkataraman said the claim of Mr. George Fernandes, that the Congress (I) got only 42 per cent of votes, had no force.

In a multi-party system, it was seldom that any party got an absolute majority, total vote-wise. Even the Janata Party in 1977 got only 41.23 per cent of the total votes polled.

Mr. Venkataraman said the Congress (I) was the only party which had complete coverage of all parts of the country, and commanded the confidence of the people.

On the other hand, the Janata Party, which had two-thirds majority in Parliament after the 1977 poll, had no representatives in many parts of the country.

Drought

Mr. Venkataraman said that when his party came to power it had to work under certain constraints like drought. The price level in 1979 spurted to 24.4 per cent and the deficit had gone up to Rs. 2,700 crores. The infrastructure was in a shambles.

"From this condition we have brought about a marked change in the economy", he said. Food production had reached 132 million tonnes last year. The country hoped to achieve the same figure this year, if not surpass it.

Industrial production, which was minus 1.4 per cent in 1979-80 had registered plus 4.1 per cent in 1980-81. It had gone up to 8 per cent in the second half of 1980-81.

In spite of the low per capita income, India was giving food aid to five developing countries. Besides, the country was giving Government-to-Government aid, including technical assistance, to a number of other countries.

The span of life, which was 31 years immediately after independence, was today 52 years, which was higher than in many other countries with a higher per capita income. The increase in longevity was mainly because of better medical, health, food, educational and nutritional facilities made available to the people.

Inflation

Though the Government had succeeded in reducing the rate of inflation from 21.4 per cent in 1979-80 to 16 per cent this year, Mr. Venkataraman said he was not happy with it. But no miracle was possible in economics.

Inflation was being handled in a scientific manner by supply management and demand management. It was a new concept. Even the United Kingdom had not accepted supply management. As a result, their industry and economy faced recession.

Barring Japan and Federal Republic of Germany, almost all other countries in the non-communist bloc had a higher rate of inflation than India, the Finance Minister said.

Mr. Venkataraman denied Mr Fernandes' charge that the Congress (I) had not implemented the election manifesto and recalled that even last year, he had mentioned in reply to the budget debate how a "whole lot" of promises, including the 20-point programme, had been fulfilled.

So far as the complaint that promises to farmers were not kept, he pointed out how the Government had directed the Agricultural Prices Commission (APC) to take into account the cost of inputs and how, for example, the wheat price was raised from Rs. 117 last year to Rs. 130 this year, more than what the APC recommended.

The Finance Minister said the foreign exchange reserves had been depleted only by Rs. 1,000 crores, which was not too high compared to the Rs. 2,400-crore rise in the oil bill to Rs. 5,400 crores in 1980-81.

On the charge of extravagant spending on the Asian Games coming off in 1982, the Finance Minister said it was an international responsibility. It would not be proper for the country to go back. It was first proposed and decided upon in 1976 and confirmed by the Janata Government. The successor Government did not take any decision to withdraw it.

Referring to Mr. Madhu Dandavate's complaint about Clause 8 (2) of the National Security Act, by which the grounds of detention need not be disclosed in the public interest, he said it was based on the provision under Article 22 (6) of the Constitution.

He said the Prime Minister's programme for Geneva was fixed long ago. It would be improper for any leader to cancel a pre-fixed programme in another country.

The Finance Minister said Mr Vajpayee should either have the courage of disclosing the name of the Minister who, according to him, beat up a sentry in Parliament House premises, or should not have said such a thing at all on the floor of the House.

Mr. Venkataraman refuted the charge that the Government was stifling the voice of dissent. He said it was not the Government's wish to impose emergency, whatever the Opposition might say.

SLOW PACE OF REPATRIATION FROM SRI LANKA REPORTED

Madras THE HINDU in English 10 May 81 p 13

[Text] Madras, May 9. The completion of repatriation of persons of Indian origin from Sri Lanka to India may take another 10 years or so due to the slow progress in achieving the target set under the 1974 accord.

This is stated in a policy note on rehabilitation of Indians overseas presented to the Tamil Nadu Assembly today.

Under the agreement reached between the two Prime Ministers, Mrs Indira Gandhi and Mrs Sirimavo Bandaranaike in 1974, it was agreed that the pace of repatriation would be progressively increased by 10 per cent each year over the figure of 35,000 persons contemplated in the Shastri-Sirimavo accord of 1964.

The terminal year for the completion of the repatriation under the agreement between Mrs Gandhi and Mrs Bandaranaike is 1981.

A total of six lakh persons accounted for in the two agreements, are to be repatriated to India from Sri Lanka.

Taking into consideration their natural increase, the final number may be 7.5 lakhs.

Up to February end this year, 86,805 families consisting of 3,52,748 persons have been repatriated.

On February 28 this year, out of 86,805 families which came to India, 59,979 families have been rehabilitated in Tamil Nadu alone.

During 1981-82 it is proposed to provide employment to 2000 repatriate families under the Khadi Commission scheme in the following industries: village oil, toilet soap, match, dyeing and printing and polyvastra.

Four polyester khadi textile units are proposed to be stated for employment of 240 repatriate families at the rate of two members from each family. [as published]

Employment would be provided to 75 families at the rate of two from each family in polyester khadi textile centre under a Gandhigram Trust scheme.

BIHAR REPORTEDLY ATTEMPTS TO SUPPRESS RIOT NEWS

Bombay THE TIMES OF INDIA in English 10 May 81 p 9

[Text] Patna, May 9. The leader of the opposition, Mr Karpoori Thakur, and even several members of the ruling Congress(I), have strongly condemned the reported move of the state government to seize the copies of THE TIMES OF INDIA at the airport here a few days ago.

Mr Thakur said today that the move showed that the Mishra ministry was losing its grip on problems facing the state. Instead of taking effective measures to deal with the Biharsharif riots, the government had attempted to curb the freedom of the press.

Several Congress(I) members, who belong to the dissidents' camp, said that THE TIMES OF INDIA reports had focussed the attention of the people on the failure of the administrative machinery to deal with the riots which had claimed 47 lives, according to official sources, but unofficially the number was higher.

Mr Mritunjay Prasad, former MP, said attempts to gag the press would not enhance the reputation of the ruling party. In a state like Bihar, where the law and order machinery seldom functioned effectively, the press had a great role to play. But for the newspapers, the Bhagalpur blinding cases would never have come to light, he pointed out.

Again, the newspapers had brought to light the serious situation in Biharsharif, while the government apparently wanted to suppress information relating to the riots.

Mr Prasad said the fact that the chief minister had not visited Biharsharif until the Prime Minister made an airdash to the affected town, was another instance of the fact that the state government was not bothered about the problems of the people.

"Unfortunately, well-meaning Sarvodaya workers and others who want to visit Biharsharif to heal the wounds are not being allowed to do so on one pretext or the other," he added.

NEW TWO-TIER MINISTRY INSTALLED IN MEGHALAYA

New Delhi PATRIOT in English 9 May 81 p 4

[Text] Shillong, May 8 (UNI). A 16-member, two-tier Meghalaya ministry, headed by Captain Williamson Sangma, was inducted in office today, replacing Mr B. B. Lyngdoh which bowed out yesterday by a unique arrangement of sharing the leadership in a single term of the legislature.

Capt Sangma, his 13 Cabinet colleagues and two Ministers of State were sworn-in as the new Council of Ministers at a Raj Shawan ceremony by Governor L. P. Singh this afternoon.

Capt Sangma's Ministry comprises all but one member of the outgoing Council of Ministers, Mr Printington Sangma, who was a Minister of State in Mr Lyngdoh's Ministry has been appointed deputy chairman of the State Planning Board which will now be headed by Capt Sangma who has taken over as the board's chairman from Sangma. The only new entrant to the Sangma Ministry is Mr Upstar Kharbuli who has been given a Cabinet rank. Earlier during the day, Capt Sangma submitted the list of his Council of Ministers to the Governor.

Mr S. D. Hongwir was sworn-in as Deputy Chief Minister. He held the same post in the outgoing Ministry.

The following is the full list of Ministers:

1. Captain Williamson Sangma (Chief Minister), 2. Mr S. D. Khongwir (Deputy Chief Minister), 3. Mr Maham Singh, 4. Mr Humphery Hadem, 5. Mr Salseng Mara, 6. Dr Berister Pakem, 7. Mr Peter Garnet Marbaniang, 8. Mr Fuller Lyngdosh Mawanai, 9. Mr D. D. Lapang, 10. Mr M. Reidson Momin, 11. Mr Iawphnew, 12. Mr Gosswell Mylliemng, 13. Mr Albinstone Sangma, 14. Mr Upstarkharbuli.

Ministers of State: 15. Mr H. Dan, 16. Mr G. B. Momin.

The Lyngdoh Ministry was sworn-in on 7 May, 1979 after four political parties--The Lyngdoh Faction of PAHLC, the Congress-I the HSPDP and the Jaintia National Union--signed a solemn agreement on 17 April 1979, forming the United Meghalaya Parliamentary Democratic Forum (UMPDF).

The agreement had envisaged that Mr B. B. Lyngdoh (APHLC) would hand over leadership of the Legislature party to Capt Sangma, leader of the Congress-I after a tenure of two years in office.

BANK STUDY SHOWS IMPROVEMENT IN PRIVATE SECTOR

Calcutta THE STATESMAN in English 8 May 81 p 11

[Text] The confidence in equity is reinforced by the improved performance of the private corporate sector as is evident from a study made by the Company Finances Division of the Department of Statistics, Reserve Bank. The study is based on 426 selected large non-financial public limited companies with a paid-up capital of Rs 1 crore and above.

Gross profits of such companies amounted to Rs 1,548 crores during 1979-80 showing an increase of Rs 264 crores over those of 1978-79. The operating profits increased by Rs 203 crores to Rs 1,066 crores, revealing a growth of 23.5%.

After taking into account the rise of Rs 24 crores in non-operating surplus profits before tax rose from Rs 894 crores in 1978-79 to Rs 1,121 crores in 1979-80. The rate of growth in profits after tax was 32.4%. Since the payment of dividends rose from Rs 218 crores in 1978-79 in Rs 241 crores in 1979-80, the growth rate of ploughed-back profits dropped from 55.4% to 52.7%. The ratio of gross profits to total net assets increased from 12% to 12.6%, while the margin on sales as measured by gross profits rose from 10.5% to 11%. The return on shareholders' equity increased from 11.7% in 1978-79 to 14% in 1979-80.

The value of production and sales at Rs 14.286 crores and Rs 14,090 crores, respectively, during 1979-80 disclosed increases of 15.2% and 15.3%, respectively, in comparison with the corresponding growth rates of 12.6% and 11.6% in the previous year. It may be noted that all the main heads of expenditure contributed to the increase in total expenditure. Manufacturing expenses and remuneration to employees increased by 15% and 11.5%, respectively.

The significant point is the substantial decline in the share of bank credit in their total borrowings. The proportion of bank credit dropped from 64.1% in 1978-79, to 42.6% in 1979-80. More than half of the total assets formation, to the extent of Rs 1,099 crores, was financed by external resources. Among internal sources, totalling Rs 863 crores in 1979-80, depreciation provision contributed Rs 411 crores.

SUPREME COURT RULES ON JUDGE TRANSFER CIRCULAR

Bombay THE TIMES OF INDIA in English 9 May 81 p 1

[Text] New Delhi, May 8. The supreme court today gave directions that additional high court judges who did not want to respond to the circular of the Union law minister for indicating their consent to their transfer outside their state need not do so.

The general directions, which virtually operate as an injunction against the circular, were given by a four-judge bench on an application filed for an interim order in the writ petitions challenging the constitutional validity of the circular.

Directive to Government

The bench headed by Mr Justice P. N. Bhagwati also directed that an additional judge shall not be refused extension of his tenure or appointment as a permanent judge of the high court on the ground that he had not indicated his preference as asked for by the law minister in his circular.

The impugned circular was addressed by the law minister to the chief ministers requesting them to obtain consents from additional judges in their states to transfers to high courts in other states.

The court ordered the Union government to decide within less than ten days from today whether the additional judges of high courts should be reappointed for a further period as additional judges or appointed as permanent judge or otherwise.

It noted that one of the petitioners, Mr V. M. Tarkunde, a senior supreme court lawyer, had stated in his petition that the extended terms of the three additional judges on the Delhi high court were expiring on June 6 and that it was not possible for the court to hear the writ petition when the court reopened after the summer vacation.

The direction for deciding the fate of additional judges in advance was given to the government as Mr Justice Bhagwati felt that an additional judge must know what is to happen to him. "It would be much fair (to the judge)," he added. [as published]

Earlier, the attorney general, Mr L.N. Sinha, after consultation with the government submitted that his instructions were that the decision about additional judges would be taken by May 31. The court did not agree and issued the directive.

The court's directive will remain in force until the decision on the writ petitions of Mr Tarkunde and others.

The two writ petitions, which came up before the court today, were filed originally in Delhi and Allahabad high courts. These were later transferred to the Supreme court at the instance of the Union government.

The supreme court has given notice already on a petition for transfer to it of a similar writ petition, which was admitted by the Bombay high court.

The bench also declined to look into the special leave petition filed by the Union government challenging the order of the Bombay high court in the writ petition (which is sought to be got transferred to it) restraining the government from further implementing the circular.

When the attorney-general of India wanted Mr Justice Bhagwati, Mr Justice A. C. Gupta, Mr Justice O. Chinnappa Reddy and Mr Justice R. B. Mishra to hear the special leave petition, which in a way seeks vacation of the restrain order, they told him they could not hear it as it had not been listed before them.

Mr Soli Sorabjee, who appeared for Mr Tarkunde, had objected to the hearing of the special leave petition on the ground that it was highly irregular if petitions presented right in the court room itself were entertained for hearing.

When Mr Sinha submitted that the government had mentioned to the chief justice, Mr Y. V. Chandrachud, that the special leave petition was being filed, Mr Justice Bhagwati told him that directions for its hearing had to be obtained from the chief justice.

Later, the chief justice said special leave petition could be taken up by the vacation judge on Monday. He said the matter could be mentioned to Mr Justice D. Tulzapurkar, who would be sitting as the vacation judge.

The chief justice also fixed August 4 for hearing on the writ petitions challenging the circular. The parties have been directed to file their written briefs by July 21.

ASSAM STUDENT LEADERS ISSUE JOINT STATEMENT

New Delhi PATRIOT in English 10 May 81 pp 1,5

[Text] Gauhati, May 9 (PTI)--The All Assam Students Union said here today that the Centre's willingness to bear the burden of those foreigners who could not be deported would pave the way for a solution to the foreign nationals issue in the State.

In a joint statement, Mr Prafulla Mahatna and Mr Bhrigu Phukan, president and general-secretary of the AASU said that the ensuing talks might suffer if the Government again failed to demonstrate "a strong political attitude lacked during the previous rounds of discussion."

The AASU leader reiterated that there would not be any compromise on their stand that every foreign nationals fliegally [as published] residing in the State must be detected.

The statement said a six-member AASU delegation was likely to participate in the ensuing talks in New Delhi on 16 May.

The AASU leaders alleged that the State Government to obstruct the proposed talks had stared "provocative actions" like indiscriminate arrest of students and youths, assaults on them in police lock up and filing fabricated cases against them. [as published]

The AASU had decided to observe 'protest day' on 12 May next against such "tyrannical act." The leaders said adding that a memorandum requesting the Government to withdraw all such repressive action had been submitted yesterday to the Chief Secretary to the Government of Assam.

They expressed the hope that the Government would come out with a open mind to create a congenial atmosphere for the discussion.

Meanwhile, several Assam Opposition leaders today alleged that Chief Minister Anwara Taimur was trying to stall the proposed talks by creating 'unfavourable conditions in the State.'

The leaders belonging to the Assam Janata Dal (AJD) Progressive Democratic Front (DF) and Lok Dal said to a press conference here that the State Government was trying to 'vitiate the present congenial atmosphere by indiscriminate arrests of students and other agitation leaders.

Among the leaders at the press conference were former Chief Minister and AJD leaders J. N. Hazarika and Tarini Das, PDF leaders Premadhar Bora and Atul Goswami, and Lok Dal leader Ramesh Mohan Kuli.

They claimed that the Taimur Government had allotted plots of land to "foreigners and persons holding dubious citizenship documents" in tribal belts of the State in the past five months.

They said the allotment was in contravention of the Central Ordinance promulgated during President's rule in the State banning land-allotment to "foreigners."

They also alleged that the State Government had "illegally withdrawn about 5,000 'quit India' notices served on people during President's rule."

1981 CENSUS RESULTS FOR GOA, DAMAN, DIU REPORTED

Bombay THE TIMES OF INDIA in English 9 May 81 p 7

[Text] Panaji, May 8. Mormugao is now the "most thickly populated" town in the Union territory of Goa, Daman and Diu. Panaji, its capital, takes the second place.

The provisional report of the 1981 census says that in Mormugao about 5,962 people dwell within a square kilometre as compared to Panaji's 5,699 people. The other thickly populated towns are Daman, Quepem and Margao, with density of population between 3,000 and 4,000.

The report expresses concern that Mormugao and Panaji are "growing much too fast" and if this trend continues "it will not be long before these towns become too congested to be places of happy domicile and safe transport."

The phenomenal post-liberation spurt in population growth--from under ten per cent at the turn of the century to 36.9 per cent during 1961-71--has eased, and the rate of 1971-81 decadal growth has stabilised at 26.15 per cent. The report observes that this percentage of growth is "normal" in comparison with the rest of the country.

The territory's total population has crossed the one-million mark at 1,082,117. The population is distributed among the territory's three districts--Goa (1,003,141), (1,003,141), Daman (48,557), and Diu (30,419).

During 1971-81, according to the report a "high rate of urbanisation" has been noticed. The urban population in 1971 was only 2.27 lakhs or 26 per cent of the total population. Today, 3.51 lakhs people (32 per cent of the total population) live in towns.

Besides, the erstwhile rural localities of Calangute and Siolin in Bardez taluka, Cuncolim in Salcete taluka and Curchorem in Quepem taluka are now considered "non-statutory" towns, because of their growth in size, density of population, types of jobs performed by men and availabiilty of civic amenities. This change from rural to urban status is also responsible for the high rate of urbanisation, says the report.

The census also reveals that the territory has achieved a "high rate of literacy" (55.86 per cent of the population as compared to 44.75 per cent in 1971). Today, 65 out of 100 men are literate, but among women the percentage is 47, says the report. Among talukas, Bardez tops with a literacy rate of 67 per cent followed by Tiswadi with 63 per cent.

TATA TALKS TO NEWSMEN ON FAMILY PLANNING PROGRAM

Madras THE HINDU in English 8 May 81 p 6

[Text] New Delhi, May 7. The Family Planning Foundation, a voluntary body devoted to population control, has suggested to the Government an increase in the outlay for the family planning programme in the Sixth Plan and also a sizable step-up in the monetary incentive for sterilisation cases.

The Chairman of the Foundation, Mr J. R. D. Tata, who disclosed this at a press conference here today, said he had recently met the Union Finance Minister, Mr R. Venkataraman and discussed this matter.

Mr Tata said that the allocation for family planning in the Sixth Plan was only one per cent of the total plan outlay and this was grossly inadequate to achieve the desired results. As regards monetary incentives, he felt that if the amount was increased from the present level of Rs 200 to Rs 2,000 or even Rs 5,000 per vasectomy or tubectomy, spectacular results could be achieved.

He argued that the capital cost to the nation to meet the minimum necessities of life for every additional citizen had been estimated at Rs 7,000. Every birth would lead to at least five more births during the next two generations. Therefore, a birth prevented now would mean a saving of Rs 42,000 in capital expenditure. It would therefore be worthwhile to raise the incentive amount substantially. In response to enhanced monetary incentives, 50 million briths could be prevented in the next five years and our population could be reduced by 300 million by the year 2030, he pointed out.

Mr Tata regretted that there was not sufficient awareness in the community about the threat posed by unchecked population growth. In order to bring about a national consensus in favour of family planning, the Foundation had secured an appeal signed by leaders of all political parties and a cross section of eminent men. The two communist parties had not signed the appeal but had expressed themselves in favour of family planning. Mr Tata wanted mass media like newspapers to devote more space to the problem of population growth and exert pressure on the Government to take effective measures for family planning.

Mr Tata pointed out that at the present rates of population growth and of economic growth, the per capita income would only double in the next five decades. The real income would be much less than now. Hence, the imperative need to control population.

This, he felt, could not be achieved by voluntary organisations only. The major effort should come from the Government, particularly the State Governments. In States where the Government was conscious of the problem, considerable advance had been made in family planning and these States included Kerala, Goa and Maharashtra. But in most other States, the Government had not evinced adequate interest or shown concern to the problem.

Replying to a question, Mr Tata and Dr Bharat Ram, Vice-Chairman of the Family Planning Foundation agreed that the private sector industries could do a lot more to promote small family norms among the workers. They also agreed that there were numerous bottlenecks in the spread of family planning services. They wanted the mass media to highlight these and bring pressure on the Government to take remedial measures and implement the programme more effectively.

ENERGY MINISTER ADDRESSES MINERS DAY RALLY

Calcutta THE STATESMAN in English 5 May 81 p 13

[Text] Ranchi, May 4--The Union Energy Minister, Mr A. B. A. Gani Khan Choudhury, has reiterated that the headquarters of Bharat Coking Coal may be shifted from Dhanbad if the activities of the "Mafia" continued there reports PTI.

Addressing a miners day rally organized by the Central Coal fields Limited at Kargali colliery stadium about 130 km from here, yesterday, Mr Chowdhury claimed that the administration of the Dhanbad-Jharia coalfield was in the hands of a "mafia." "Gangsterism controls the administration in which there is corruption from top to bottom," he alleged. Not only the CIL officers but the police and the railway were involved in corruption, he said.

The Minister urged the people to raise their voices against the "mafia." He said that he wanted to stop corruption in the coal industry.

Mr Khan Choudhury ruled out the possibility of handing over some of the nationalized mines to the private sector. He reminded the miners that politicians who were spreading the rumour that coal was "a sick industry" and hence should be handed over to the private sector, were lobbying for the private sector.

The Minister said that the economy was in danger owing to the energy crisis. The coal industry would have to play a major role during the next five years. Power generation would be increased to 23,000 MW at the end of the sixth Plan. Of this, 15,000 MW would be hydel power. A number of super thermal power stations were being set up in the Sixth Plan and would consume about 70% of the coal production, he said.

Earlier, the Minister faced a "black flag" demonstration in the pandal. The demonstrators shouted slogans against Mr Khan Chowdhury saying: "go back Energy Minister." Some Congress-I workers shouted counter slogans. Police chased away the demonstrators after making some arrests.

Mr B. L. Wadhera, chairman-cum-managing director of the CCL, welcoming the miners, said that production of the CCL had increased from 78 million tons to 114 million tons during the eight years of nationalization.

Mr Ram Das, MLA, informed the Energy Minister that the move to shift the BCCL headquarters from Dhanbad and the CCL offices from Ranchi would be strongly resisted by the miners of the respective collieries.

Mr R.N.S. Sharma, chairman of the CCL, congratulated the miners for achieving a remarkable production last year and said that 50 miners would be sent to Poland, USSR and the U.K. for training every year.

SAUDI AID FOR POWER, OTHER PROJECTS REPORTED

New Delhi PATRIOT in English 9 May 81 p 5

[Text] An agreement was signed by Finance Minister with the Vice Chairman and Managing Director of the Saudi Fund for Development for a loan of 32 million dollars for the Koel Karo Hydro-Electric Project in Bihar, reports PTI.

The loan carries an interest of 4 per cent per annum and is repayable in 20 years including an initial grace period of five years.

This was stated by the Finance Minister R. Venkataraman, in reply to Mr Ramjibhaimavani in the Lok Sabha on Friday.

Mr Venkataraman said assistance from the Saudi Fund for Development for the Rajasthan canal phase two and connected command area development was also discussed.

Other possible areas of cooperation between the two countries by way of joint ventures and investments figured in the discussions.

In a written answer, Minister for External Affairs said the Government of India had repeatedly indicated its willingness to sign a no-war pact with Pakistan.

DETAILS OF NEW ONGC DRILLING PROGRAM REPORTED

Madras THE HINDU in English 8 May 81 p 16

[Text] New Delhi, May 7. The Oil and Natural Gas Commission (ONGC) has drawn up a programme for offshore and onshore exploration in the Krishna-Godavari basin.

Estimated to cost Rs 275 crores, the foreign exchange component of the programme will be $244 millions (Rs 195 crores). The ONGC has sought World Bank assistance of $120 millions, to finance part of the cost.

The ONGC has told the Government that the Rs 275 crores programme was the minimum for arriving at a final assessment of the oil and gas resources in the Krishna-Godavari basin.

The programme provides for the drilling of 10 offshore and nine onshore exploratory wells. The drilling is for a total projected depth of 87,500 metres comprising 49,000 metres for offshore and 38,500 metres onshore. The ONGC will seek foreign assistance and engage drilling consultants to overcome the several problems it faces.

These include the presence of soft clay mud, extreme ocean current velocity, huge water depths, rapid and unpredictable variations in formation characteristics, as well as what is known as "artesian water flow."

It was because of these problems that the ONGC ran into bad luck with the five wells it had drilled in the Godavari offshore basin between December, 1979, and 1980 and the drilling was abandoned.

The new programme includes the carrying out of seismic surveys for a total of 14,950 line kilometres made up of 9,600 offshore and 5,350 onshore line kilometres.

INCENTIVES FOR ELECTRONICS INDUSTRY PLANNED

New Delhi PATRIOT in English 9 May 81 p 5

[Text] The Government has accepted Sondhi Committee's recommendations on fiscal incentives to electronics industry, but has turned down most of its suggestions, including the abolition of the Electronics Commission and liberalising import of foreign technology, reports PTI.

Rejecting the Sondhi Committee's observation that the Commission was only playing a regulatory role, the Government said the "present regulatory system has to be kept continuously under review to import even greater momentum to the electronics industry."

The Government's final decisions on the Sondhi report placed in the Lok Sabha on Friday stressed the need for self-reliance and support of the public sector and small scale industry.

Turning down the Sondhi recommendation for import of ready-to-use electronics equipment, the Government said that present policy under which fully assembled electronic items are banned "should continue."

The Government decided that industrial licences to the private sector for manufacture of various electronics items should be given under the condition that two per cent of their turnover would be invested in research and development.

A specific assurance to this effect should be obtained from the company before the licence is issued.

The Government also turned down the recommendation for ending canalisation of imports of such items as picture tubes and electronic watch modules.

It also did no accept the recommendation for raising the investment limit for delicensing from Rs 30 million to Rs 100 million [as published].

Regarding small scale electronics industry, the Government accepted Sondhi recommendation that items reserved for this sector should be reviewed annually.

The recommendation exempting capital goods, test equipment, raw materials, and components from customs duty was not accepted by the Government.

The Government decided it was not necessary to set up an electronics research and development organisation as recommended in the report. It also was not necessary to merge the computer division of Electronics Corporation of India with the Computer Maintenance Corporation (CMC).

Rejecting the Sondhi recommendation that maintenance of imported computers should also be done by firms other than CMC the Government said that "maintenance of all imported computers should be the responsibility of the Computer Maintenance Corporation."

CSO: 4220

STEEL INDUSTRY OUTPUT REPORTED BELOW TARGET

Calcutta THE STATESMAN in English 11 May 81 p 15

[Text] ALTHOUGH steel production improved marginally during the last few months, the problems in the steel sector are mainly due to what has been called "abysmally" low level of production. The country is still grappling with a total steel production of well below 10 million tons a year. The average annual per capita steel consumption continues to be at a rock bottom level of 15 to 16 kg, against an average annual per capita consumption of 100 kg in the developed countries.

Because of the low level of production the internal price of steel is still ruling much above international prices. The very nature of the steel industry is such that economies of scale could be enjoyed only at a very high level of production and efficiency. Thus the ultimate price could be pegged down to a low level only when the volume of production is large. Japan, which has to import all its iron ore requirements from outside and pay much higher wages, could yet sell steel far below the Indian prices mainly because of economies scale it enjoys from largescale production.

The Union Steel Ministry itself is far from satisfied with the performance of the industry. At the beginning of the last financial year, it was planned to make available 10.18 million tons of steel to the economy, compared with the actual availability of 8.61 million tons in the previous year (1979-80). However, with the production of 6.13 million tons of saleable steel by the integrated plants, another 1.73 million tons from the mini-steel plants and imports of 1.46 million tons, total availability of steel during the last year (1980-81) would be only 9.26 million tons. Even then, this would represent an increase in availability of a little more than seven per cent.

SALEABLE STEEL OUTPUT

The six integrated steel plants production of 6.13 million tons during the last fiscal year showed a shortfall of 16.3% from the target of 7.32 million tons for the year. In its report to Parliament, the Steel Ministry recently admitted that the overall performance was substantially lower than the target and was far from "satisfactory". Apart from the well-known constraints like shortage of power and coal, the management of the plants have no less been responsible for the performance.

Against the installed capacity of 11.4 million tons, ingot steel production in the integrated steel plants in 1980-81 was only 7.21 million tons. In 1979-80, production of ingot steel was higher at 8.02 million tons and it is expected that actual ingot steel production in 1980-81 would be about 10% lower than in 1979-80. Of course, the decision to lower production of ingot steel was taken deliberately in view of the huge stock of the item in the stockyards of the Steel Authority of India.

Undaunted by the performance, the Steel Ministry has set substantially higher production targets for the current year. The tentative production plans envisage an output of 7.21 million tons of ingot, 5.73 million tons of saleable steel, and 1.42 million tons of saleable pig iron, representing growth rates of 35.5%, 24.8%, and 8.5% respectively, over the last year's production.

However, the Joint Plant Committee, an independent body, has estimated that the country was likely to face a shortage in steel to the tune of 1.6 million tons during 1981-82. While the shortage would be across the board for all items, some of the priority items would be more acutely affected. The shortage in structurals was feared to be the worst of at least 63.00 tons. In tested quality heavy

plates the committee anticipates a shortfall of 49.000 tons, in hot rolled coils 14.000 tons and railway material 11.00 tons. The availability of pig iron would be lower than the requirements by about 16.00 tons.

The JPC assumed the steel requirements to go up by 10% over the actual consumption during 1980-81 While total demand has been estimated at 10.52 million tons, bars and rods which are used in building construction has been identified as the item of highest consumption of 4.2 million tons. The second-highest consumption item is structurals component, with a demand of 1.6 million tons, followed by plates, cold rolled sheets, railway material, hot rolled sheets, and galvanized plate and corrugated sheets.

In view of the internal shortage of steel, the Government has been obliged to allow imports of steel on the basis of actual users' licence to keep on-going and priority projects running. Here the Ministry has to take into account the interests of the principal domestic producers and also the need for executing various programmes and essential production. However, on the whole the import policy folowed during 1979-80 was largely adhered to.

The SAIL's plan for 1980-81 provided for imports of 1.46 million tons, including 692,000 tons under the buffer import programme. Buffer imports are made to supplement indigenous availability and in 1979-80 buffer imports were much higher at 950,000 tons. For the 1980-81 fiscal year up to end-December, total import orders placed were worth Rs 382.88 crores, involving imports of 1.17 million tons. Buffer imports constituted mainly of high-consumption items like structurals, plates, hot-rolled coils, cold-rolled coils and tin mill black plates. It is regrettable that the country has to import steel when the annual requirements are a mere 10 million tons, after the substantial investment in the steel sector over the last several years.

Where the inefficiency of the steel sector has become most palpable is in the execution of new projects. Delays in the execution of projects have become a rule. All the major projects like Salem and Vizag steel plants Kudremukh iron ore pelletization plant and even expansion projects for the existing steel plant are running behind schedule.

Early in 1970, the Government announced to put up three new steel plants in the South to meet the increasing demand for steel at home. Of these, work has started on the Salem plant alone; the SAIL board is still struggling with finalization of the project costs and detailed project reports for the Vizag plant; the fate of the Vijaynagar plant is still uncertain. Originally, it was thought that the Salem plant would be complete in 54 months from the date on which the project was sanctioned. Since official sanction was given in March 1977, the project should have gone on stream by September this year. However, that hope seems to be far too ambitious now.

With delays in execution project costs are also mounting. The ultimate cost of the Vizag plant is expected to touch the Rs 4,000-crore mark, while the original estimate put the cost at Rs 2,258 crores. In the last 11 months not a bit of progress could be made in respect of either the Kudremukh pelletization project or the Paradeep plant. Out and out bungling marred the timely execution of the Kudremukh plant from the beginning.

According to a reliable source, while the Union Minister for Steel and Mines, Mr Pranab Mukherjee, urged the Kudremukh Board to quickly finalize the award of the contract for the project, the latter has deliberately restored to dilatory tactics. The Kudremukh Board extended the date of submission of tenders by a month last December to allow the Soviet Union to bid for the job through "back-door", shortly after Mr Mukherjee announced in Parliament that the last date of submission of tenders was December 15. Indeed, the extension of the date of submission of the contract was an open defiance of the Steel Ministry by the Kudremukh Board.

Once again, sitting over the tenders for two months after they were submitted, the Kudremukh Board asked the bidders to submit fresh tenders on the revised basis of "engineering consultant-cum-constructor" approach. Knowledgeable sources point out that the revised estimates are nothing but prepared after adding another 10% as consultancy fees on the earlier estimates submitted. Two more weeks were wasted by the board in deciding upon the award of the contract because of this "avoidable" exercise.

It appears that the principal snag which is affecting the Kudremukh project is that it has ben willy nilly tagged to SAIL. Having a common chairman with SAIL, the Kudremukh project has been taken for a baby of SAIL and it has to be admitted that an authority engaged in the day-to-day running of a steel plant is not the eminently suitable agency for execution of a new project. For better management of both SAIL and the Kudremukh project the chairmanship of the two should go to two different persons.

STEEL TUBE INDUSTRY ASSURED OF IMPORTS

Madras THE HINDU in English 12 May 81 p 11

[Text] New Delhi, May 11. The Deputy Minister of Industry, Mr P. A. Sangma, today assured the steel tube and pipe industry that about 50,000 tonnes of steel would be made available to it this year.

In addition the industry would also be allowed to import hot rolled coils up to 2.5 mm thickness under OGL. These measures should lead to higher production and better capacity utilisation.

Inaugurating the second annual meeting of the Federation of Engineering Industries of India (Steel Pipe and Tube Panel) he said he was not sure however whether it was better to have 50 units working at an average of 20 per cent capacity utilisation or half that number working at full capacity.

"It would be interesting to find out who pays for the underutilisation of capacity and consequent inefficiencies and/or larger fixed costs or overheads," he said.

Mr Sangma said in view of the fact that the industry would be a net importer of its raw material even with regard to domestic demand for tubes, the Government had no option but permit exports only against imported raw material.

There was no bar on the export of tubes against imported raw materials. As and when the domestic availability of raw materials led to a surplus in relation to domestic demand, the Government would review the situation.

Mr Moni Bose, outgoing Chairman of the FEII (Steel Pipe and Tube Panel), wondered why the price of indigenous hot rolled coils and skelp should be around Rs 4,000 per tonne when imported materials were being offered at Rs 2,200 per tonne FOB.

The tube industry was a continuous process industry and high frequency welders and galvanising plants could only be run if power was available on an assured basis, he said.

Units facing power shortages could put up their own generators and it would be helpful if a Central directive was issued to the State Governments to give some subsidy to units putting up their own generators.

Mr Bose called for streamlining the distribution of hot rolled coils and skelp, and said the release of quarterly allocations was generally not in time.

The steel tube industry, he said, had 50 units licensed to produce 20 lakh tonnes but the present demand for steel pipes and tubes was six lakh tonnes. There was also an export market for two lakh tonnes. By 1984-85 the domestic demand was expected to rise to 10 lakh tonnes.

There had been a fall in output in the past few years. From 5.22 lakh tonnes in 1977-78 production came down to 4.48 lakh tonnes in 1978-79 and to four lakh tonnes in 1979-80. The 1980-81 output would not be very encouraging and radical steps were needed to boost production, Mr Bose said.

PROBLEMS OF COAL MINING, DISTRIBUTION DISCUSSED

Bombay THE TIMES OF INDIA in English 9 May 81 p 7

[Text]

NEW DELHI, May 8.

THE scheme for free sale of coal has been further liberalised to enable genuine consumers of high-grade coal to get their requirements without difficulty.

This was stated here yesterday by the energy minister, Mr. A. B. A. Ghani Khan Choudhury, while addressing the parilamentary consultative committee attached to his ministry. Mr. Vikram Mahajan, minister of state for energy, was also present.

Mr. Choudhury said under the scheme of free sale of coal nearly nine million tonnes of comparatively low-grade coal has been put on unrestricted sale. Coal India has modified its distribution system to meet quickly the actual requirement of consumers of high-grade coal.

The minister told the members that vigorous steps were being taken for stepping up coking coal production. This would, however, depend on the progress of the Jharia reconstruction plan. In order to accelerate the pace of work a high-power committee had been constituted under the chairmanship of the energy minister. The committee includes the mines minister of Bihar and officials of the Central and state governments.

CENTRALISED DUMPS

Mr. Ghani Khan Choudhury said the government had drawn up a scheme to set up centralised coal dumps in Bharat Coking Coal Ltd., in order to benefit those consumers who take coal by road. Similar schemes are being drawn up in Eastern Coalfields Ltd. and Central Coalfields Ltd., the minister said.

Action was being taken to eliminate private contractors from transporting coal and sand and entrust some of this work to ex-servicemen, he said.

The minister told the members that the government had accorded high priority to the welfare of coalmine workers. The government proposed to double the number of houses constructed for coal mine workers by next year.

Referring to the problems of land acquisition for implementing new mining projects, the minister said he had told the Bihar chief minister that the government should be liberal in awarding compensation. In order to expedite matters money had been deposited in advance with the state government so that the compensation could be promptly disbursed.

ALL-TIME HIGH

The minister said coal production in 1980-81 reached an all-time high of 114 million tonnes exceeding the target by half a million tonnes. Coal India exceeded its target by two million tonnes despite the constraints faced by it in the first half of the year. He said for the current year a production programme of 121 million tonnes had been drawn up and he was confident the target would be achieved.

The minister said as a result of various measures taken by the government capacity utilisation of thermal plants had gone up from 41.1 per cent in October, 1980, to 52 per cent in March, 1981. He was hopeful that the capacity utilisation would reach 55 per cent by next year. The performance of 200 M.w. units had considerably improved.

COMPOSITION OF RAILWAY REFORMS COMMITTEE ANNOUNCED

Bombay THE TIMES OF INDIA in English 12 May 81 p 1

[Text] New Delhi, May 11 (UNI)--The Union government today set up a high power "railway reforms committee" to review the organisational structure of the railways including that of the railway board.

The five member-committee of experts, headed by Mr B. D. Pande, would also suggest measures for improving the capacity of the railways to handle higher volume of traffic in future.

Mr Pande, as chairman, would have the status of minister of state.

It is understood that the committee would also examine the question of running the railways as a departmental undertaking or converting it into a public sector corporation.

Besides Mr Pande, the committee consists of the five members: Mr Ravi Mathai (Indian Institute of Management, Ahmedabad), Mr H. C. Tripathi (retired judge, Allahabad high court), Mr Rusi Modi (chairman, TISCO), Dr Manmohan Singh (member-secretary, Planning Commission) and Mr M. S. Gujaral (chairman, railway board), Dr S. K. Ray, an officer of the railways, will be the secretary of the committee.

The non-official part-time member of the committee will have the status of secretaries to the government of India.

Railway minister, Mr Kedar Pandey, had indicated in his budget speech in parliament on February 19 that a high power committee of experts would be appointed to go into the entire gamut of the railway administration and recommend measures for improvement.

PROBLEMS, PROGRESS IN GRAIN PROCUREMENT TOLD

Bombay THE TIMES OF INDIA in English 10 May 81 pp 1,9

[Text] New Delhi, May 9. The enthusiasm of private traders to mop up large quantities of wheat from the new crop seems to be on the wane now. The purchases being made by them in the major wheat-surplus states of Punjab and Haryana have come down considerably. Consequently, wheat prices in most mandis in those states have nose-dived, facilitating larger purchases by official grain procuring agencies. However, the target of procuring 9.5 million tonnes of wheat during the current rabi marketing season may not be attained, agricultural experts feel.

The total quantity of wheat bought by the private trade has not been unusually large this year. According to the latest figures available from Punjab and Haryana, traders have bought only about 1.2 lakh tonnes of wheat so far out of the total market arrivals of over 16.9 lakh tonnes.

In Punjab, wheat arrivals till yesterday were estimated at about 11.48 lakh tonnes. Of this, the traders are reported to have purchased only a little over 66,700 tonnes, the rest going to the official agencies. In Haryana, the procurement is estimated at over 4.9 lakh tonnes of the total arrivals of over 5.4 lakh tonnes. The traders bought only about 50,000 tonnes.

The quantity of wheat mopped up by the private trade in these two states, however, is likely to be more than the figures computed from market records as some transactions are reported to have taken place at the village level, outside the regulated mandis. The situation now seems to have changed drastically. The denial of railway wagons to private traders for transporting wheat to outside regions and the curbs imposed on the stocks allowed to be held by them seem to have dissuaded them from buying more wheat.

Some experts, in fact, feel the government should not be unduly perturbed over grain purchases by traders. This might ultimately prove to be a blessing in disguise. The public distribution system being as it is, sufficient grain stocks in the private sector are indeed desirable as they can help maintain grain prices and their availability in the open market. Paucity of supplies in the open market can lead to the escalation of prices in major consumption centres, especially during the lean season.

The pessimism regarding prospects of procuring 9.5 million tonnes of wheat during the current season stems primarily from the fact that the target is too high to attain. The maximum quantity of wheat procured in a single season so far was nearly eight million tonnes in 1979 out of the total production of 35.5 million tonnes. This year, the wheat output is expected to be around 36 million tonnes. The procurement cannot be expected to exceed the previous peak by 1.5 million tonnes, especially when the production is up only by 0.5 million tonnes, experts maintain.

The government itself is partly to blame for dismal procurement prospects. The very announcement of a high procurement target followed by repeated official statements showing undue anxiety to make large grain purchases to replenish the depleting grain coffers gave a cue to the traders to enter the market in a big way. They anticipated the food situation in the country to turn critical in the later part of the year.

Krishi Bhavan's move to cut down the allocation of wheat to the states only weeks before the harvest of an expected record crop further encouraged pessimistic speculations regarding the wheat stock situation in the country.

The call given to farmers by some political parties to withhold the sale of their produce, however, is not likely to have any impact on the total wheat procurement. The growers by and large, can ill-afford to store their entire produce. The grain has to come to the market sooner or later, experts believe.

MORE DETAILS OF GRAIN PROCUREMENT PROBLEMS GIVEN

Madras THE HINDU in English 10 May 81 p 6

[Article by Leo: "Crucial Role of Foodgrain Buffer Stocks"]

[Text] The rebound in foodgrain production in the current agricultural season has helped avert a crisis on the food front and obviated the need for marginal imports. As the disastrous drought of 1979-80, resulting in a sharp decline in the yield of food crops by 23.05 million tonnes to 108.85 million tonnes, was experienced, after the harvesting of bumper crops in 1978-79, the buffer stocks could be drawn upon liberally for overcoming the shortfall in production. The surpluses with growers from earlier crops also were useful in minimising sales through the public distribution system.

Large sales through fair price shops

The offtake through fair price shops and under the food-for-work programme was nevertheless quite high at 14.84 million tonnes in 1980 against 11.66 million tonnes in 1979 and 10.18 million tonnes in 1978. Even with regulated releases of wheat, the total offtake in 1980 was substantial at 8.85 million tonnes while rice accounted for 5.87 million tonnes. The food-for-work programme absorbed 2.07 million tonnes out of this total, roughly in equal proportions of wheat and rice.

As the quantity procured in the 1979-80 marketing season was only 9.8 million tonnes against 14.46 million tonnes in 1978-79, buffer stocks registered a drop of over five million tonnes. But for the pick-up in procurement of rice out of the kharif crops in the current season the decline would have been more pronounced.

The total stocks stood at 11.4 million tonnes at the beginning of February this year against 16.7 million tonnes in February 1980. The procurement of rice upto February 25, 1981 were quite satisfactory at 4.77 million tonnes against aggregate procurement of 3.23 million tonnes in the previous marketing season. It can be expected that an additional five lakh tonnes can be procured before June.

A further drop from the existing levels can be prevented only if aggregate procurement in 1981-82 exceeds 17 million tonnes and there is also reduced pressure on the public distribution system.

Higher target for 1981-82

After the performance of the agricultural sector in 1977-79 and 1980-81 it is confidently expected that higher targets can be fixed and achieved. Accordingly, it is estimated that an output of 138 million tonnes can be secured in the 1981-82 agricultural season. If this target can be realised with normal behaviour of the monsoons, it will not then be difficult to step up procurement of wheat and rice especially as there will be a fairly large carryover from 1980-81 assuming that there will be no downward revision of estimates in the final tally.

It is reiterated in the annual report of the Union Ministry of Agriculture for 1980-81 that the production of all food crops will exceed the record of 1978-79. Immediately, it is expected that purchases of wheat can be effected in large volume as the crop is likely to constitute a new record at over 36 million tonnes. (The previous best was 35.51 million tonnes in 1978-79).

A target of 9.5 million tonnes has been fixed for wheat procurement but of the new crop and it is hoped that it will be achieved. Even so, total purchases of rice and wheat may not be more than 15 million tonnes in 1980-81, which is only slightly more than the withdrawal of 14.84 million tonnes from buffer tocks in 1980.

A drop in buffer stocks is also due to the fulfilment of export commitments. The return of loan wheat to the Soviet Union has been completed as total shipment upto 1980 amounted to 14.96 lakh tonnes out of a commitment of 14.98 lakh tonnes and shipment to Vietnam 2.99 lakh tonnes. This obligation to USSR was fulfilled even earlier. The Soviet Union however, imported 1.99 lakh tonnes of wheat and 60,560 tonnes of rice from India against additional supplies of crude and refined products.

Only about 52,000 tonnes of rice was sent to Vietnam. Mauritius got 24,000 tonnes of rice on a commercial basis and Bangladesh 1.49 lakh tonnes by way of commodity loan.

It is the intention to enter into export contracts for upto one million tonnes of rice in 1981-82 and augment foreign exchange earnings. The existence of large buffer stocks has, therefore, been useful in overcoming a critical situation. There are also indications that food production is getting stabilised at higher levels with the extension of irrigation facilities and the adoption of improved techniques of cultivation in the rain-fed areas.

Even the low level of 108.85 million tonnes in 1979-80 was considerably higher than the yield of 99.83 million tonnes in 1974-75 which also witnessed drought conditions in some regions. If the target of 138 million tonnes for 1981-82 is achieved, as stated above, the offtake through the public distribution system aNd under the food-for-work programme may be significantly lower and buffer stocks can rise to the earlier levels even with limited exports.

NEW HIGH-YIELDING PULSE VARIETY DEVELOPED

Madras THE HINDU in English 11 May 81 p 16

[Text]

NEW DELHI, May 10

A breakthrough in pulses production is not far off with farm scientists having come out with new high-yielding varieties in bengalgram — which account for nearly 50 per cent of total pulses output — close on the heels of development of high-yielding varieties of redgram.

According to Dr H. K. Jain, Director, Indian Agriculture Research Institute (IARI) here, for the first time in the world bengalgram varieties, having an altogether new form, have been evolved to meet the requirements of a more modern agriculture.

The new varieties have been evolved by crossing the Indian stock with certain selected ones of the Mediterranean and Russian varieties. The new ones are found to have 30 per cent higher yield potential than traditional varieties.

The blue-prints were prepared by Dr. Jain, Dr. Bahl and their colleagues at IARI 10 years ago and their efforts have borne fruit.

The first generation of these new varieties are now in advanced stages of testing at IARI fields. They will be subjected to various other trials and in two years' time they are expected to be released for largescale cultivation.

Dr. Jain said traditionally pulses had been grown in drylands and they had been selected more for adaptation to moisture stress conditions than for high yields. With the rapid development of irrigation, scientists felt that pulses could be given a better deal.

They could be fitted into intensive cropping patterns with cereal and other crops in irrigated lands and in lands where at least one protective irrigation could be provided.

This concept had led the plant breeders to develop varieties, very different in their form from the crops with which the Indian farmers had been familiar for thousands of years.

In the new varieties, the plant stands erect like wheat. This allows greater light penetration through its foliage and diverts more of its energy to the pods rather than the vegetative parts.

Scientists believe that these varieties of bengalgram will have an yield potential of about 50 quintals per hectare provided farmers provide protective irrigation and improved management practices. The maximum yield potential of traditional varieties is 30 quintals per hectare.

More flexible: The new varieties are more flexible in their sowing dates so that, unlike the traditional ones which must be sown towards the end of October, these new groups can be sown as late as middle of November and can be fitted in new cropping patterns such as rice followed by bengalgram in eastern parts of India. Also, their maturity duration has been reduced and this again helps in fitting them in new crop rotations with the central crops.

The new bengalgram varieties constitute a development which is claimed to be parallel to that relating to the improvement of the arhar (redgram) crop.

BRIEFS

DEATH OF MP--New Delhi, May 4--A minute's silence was observed in the Rajya Sabha today as a mark of respect to Nargis Dutt, a sitting member of the House, who passed away in Bombay yesterday, report PTI and UNI. The Chairman, Mr M. Hidayatullah said the country had lost a "great humanitarian." The Lok Sabha today mourned the death of Mr Y. S. Parmar, who was a member of the Constituent Assembly, the provisional Parliament and the second Lok Sabha. [Text] [Calcutta THE STATESMAN in English 5 May 81 p 9]

SIKKIM POPULATION GROWTH--Gangtok, May 5 (UNI)--Sikkim registered the highest rate of population growth among all States in the country during the 1971-81 decade. The decennial growth rate in Sikkim during this decade was 50.44 against the all India average of 24.75, according to the Sikkim Census Directorate. At the same time Sikkim, the youngest member of the Indian Union having joined it only six years ago, also claimed the distinction of having the lowest density of population among all States. The population density per square kilometre in the State is 44 against the all India average of 221. In 1971, when Sikkim was not a part of India, it had a population of 209,843. In 1981, the State's population increased to 315,682. [Text] [New Delhi PATRIOT in English 6 May 81 p 7]

NEHRU UNIVERSITY VICE CHANCELLOR--New Delhi, May 6 (PTI)--Dr Y. Nayudamma, a distinguished scientist, has been appointed vice-chancellor of Jawaharlal Nehru University (JNU) Dr Nayudamma will hold office for a term of five years from the date on which he assumes office. Meanwhile, President Sanjiva Reddy has been urged by 161 MPs to set up a commission to inquire into the affairs of the University. In a memorandum to the President, the five MPs of the opposition parties said charges of corruption, misuse of public funds and violation of rules had been levelled at the university authorities. The allegations by the different sections of the university community--students, staff and teachers--were serious, the memorandum said. The MPs have also demanded the revocation of the expulsion of Rajan G. James, a Ph.D. student and convener of the democratic students' front. His expulsion was "political victimisation," the memorandum said. [Text] [Bombay THE TIMES OF INDIA in English 7 May 81 p 13]

THREAT TO RAJIV--Raigarh (MP), May 7 (PTI)--Three persons involved in the alleged conspiracy against the life of the Prime Minister's son, Mr Rajiv Gandhi, were rearrested here immediately after they were released on bail today.

The three persons--Raghunath Singh, Satnarain Singh and Bhaskar Singh--had allegedly sent telegram to Mr Rajiv Gandhi containing the "threat" and asking him to quit India. The three had been first arrested earlier this week under section 151 for breach of peace and remanded to custody till May 7. They were released on a bail of Rs 5,000 each by the magistrate, but police again arrested them under section 506 (B) (conspiracy for threat to life). [Text] [Bombay THE TIMES OF INDIA in English 8 May 81 p 1]

WESTERN COMMAND ADMIRAL--Bombay, May 7--Rear Admiral Gulab Mohanlal Hiranandani took over here today as the new chief of staff, Western Naval Command, from Rear-Admiral S.C. Chopra. Prior to his new appointment, Adm. Hiranandani was commanding officer of the guided-missile destroyer, I.N.S. "Rajput." Trained at Royal Naval College, Dartmouth in U.K., Admiral Hiranandani was commissioned in the navy in 1952. He distinguished himself as fleet operations officer winning the Nao Sena Medal in 1971. He was awarded the Ati Vishisht Sena Medal in 1978 for his services as director of combat, policy and tactics at naval headquarters. [Text] [Bombay THE TIMES OF INDIA in English 8 May 81 p 4]

SRINAGAR ISLAMIC CENTER--Srinagar, May 7--The establishment of a permanent "Islamic centre" here was among several decisions taken by the recently constituted Jammu and Kashmir 15th Hijrah celebration committee, which met yesterday under the chairmanship of the chief minister, Sheikh Abdullah. [Text] [Bombay THE TIMES OF INDIA in English 8 May 81 p 9]

FAMILY PLANNING AID--New Delhi, May 7--Norway will grant Rs. 3.5 crores for financing extension of the all-India hospitals' post-partum family welfare programme under an agreement signed here today. The programme seeks to maximise effective contraception among the target population by upgrading hospitals to enable them to focus attention primarily on obstetrical and abortion cases. Support for the programme comes from the Norwegian Agency for International Development. In recent years, Norway has actively co-operated with the Indian family welfare programme providing assistance totalling Rs 33 crores. This is mainly used for family planning facilities in hospitals. [Text] [Bombay THE TIMES OF INDIA in English 8 May 81 p 14]

MISSION STAFFS REDUCED--New Delhi, May 7--Staff strength in the Indian Missions abroad has been brought down following last year's review exercises in respect of the staffing requirements in London, Dacca, Kathmandu, Bangkok and Karachi, Mr P. V. Narasimha Rao, External Affairs Minister, told the Lok Sabha today. Similar exercises, he said, were being undertaken in the U.S.--PTI [Text] [Madras THE HINDU in English 8 May 81 p 6]

BABABUDAN IRON ORE--Chikmagalur, May 7--The Bababudan hills in Chikmagalur taluk has deposits of 3,000 million tonnes of iron ore according to Mr Venugopala Rao, Chairman and managing Director of the National Mineral Development Corporation (NMDC). Talking to pressmen at the iron ore investigation complex, he said a special team of the Corporation took up investigation work in 1975 and had nearly completed its survey work. They would be submitting their report to the Centre shortly. The ore contained 35 per cent of magnetite which after crushing and refining could be raised to 65 per cent and above. The Bababudans deposits,

he said, was much larger than the ones at Kudremukh and extended to a length of 20 km. The prospecting team had divided this area into three sectors--Rudragiri, Attigundy and Mahal Blocks. Eight hundred million tonnes were available in the Attigundy block itself. Mr Rao said if iron ore extract were to be approved by the Centre necessary care would be taken to maintain the ecological balance on the Bababudan hills and the coffee plantations would not be disturbed. [Text] [Madras THE HINDU in English 8 May 81 p 9]

KERALA MOLYBDENITE FIND--Reserves of "molybdenite," a strategic material, the supply of which was being either withheld or made at exorbitant cost by the developed countries, have been located in Kerala, according to a spokesman of the Geological Survey of India. Molybdenite is the disulphide of molybdenum and is used as a lubricant in hot extrusion process for seamless stainless tube manufacture and other chemical, metallurgical and special alloy industries. The reserves, believed to be of economic level according to preliminary reports, have been found in the Ambalavayal and Kalpatta areas of Wynad district and Pathanamthitta taluk of Quilon district in Kerala. The mineral, which had not been found in adequate quantities in India earlier, was imported and cost the country Rs 61 lakhs for 44 tonnes in 1975, according to the official. [Text] [Bombay THE TIMES OF INDIA in English 10 May 81 p 9]

RECORD TRADE DEFICIT--New Delhi, May 9--The trade deficit in the first eleven months (April-February) of 1980-81 has reached an all-time record of Rs 4693.52 crore, which is even higher than the Government's own estimate of Rs 4500 crores for the whole year. The 1980-81 provisional figures, according to official sources, show exports at Rs 5915.26 crores and imports at Rs 10608.78 crores against the provisional export and import figures of Rs 5474.10 crores and Rs 7373.59 crores respectively for the first eleven months of 1979-80. If the present trend continues, it is likely that the year 1980-81 may close with a deficit of over Rs 5000 crores, which would be the highest ever on record.--PTI [Text] [Madras THE HINDU in English 10 May 81 p 6]

INDO-CZECH FRIENDSHIP--The Indian National Cong-I is with the socialist countries of East Europe, in their fight for equality and better opportunities, All India Congress Committee general secretary Shyam Sunder Mahapatra said on Saturday. Mr Mahapatra was speaking at a function to mark the 36th anniversary of the liberation of Czechoslovakia. Indo-Czech friendship, Mr Mahapatra said was going from strength strength, in the nations' efforts to build an egalitarian society based on the norms of socialism. The Soviet Union, which had been India's friend in its hour of need during the seventies he said, was instrumental in liberating Czechoslovakia 36 years ago, from the clutches of Nazism. The AICC general secretary later inaugurated an exhibition of photographs depicting Life in Czechoslovakia. [Text] [New Delhi PATRIOT in English 10 May 81 p 10]

ANDHRA PRADESH MINISTER--Hyderabad, May 10--The Finance Minister of Andhra Pradesh, Mr G. Rajaram, died in a road accident near Ramayampet in Medak district this morning, reports PTI. He was going from his native place (in Nizamabad district) to attend a Cabinet meeting. The car in which he was travelling skidded and hit a tree. The Minister and his bodyguard died before being taken

to hospital. The superintendent of the Nizam's Orthopaedic Hospital said Mr Rajaram was injured in the chest and his thigh bone was fractured. The President, Mr Sanjeeva Reddy, condoled the death of Mr Rajaram whom he described as "a popular figure and an able administrator." [Text] [Calcutta THE STATESMAN in English 11 May 81 p 1]

ASSAM MINISTER RESIGNS--Gauhati, May 11 (PTI)--Mr Joy Chandra Magbanshi, minister of state for labour, today resigned from the Assam ministry. Mr Nagbanshi is one of the six Congress(I) MLAs representing the tea garden labour community who announced their decision to resign from the ACLP (I) membership last week. [Text] [Bombay THE TIMES OF INDIA in English 12 May 81 p 1]

LOK DAL CANDIDATES--Lucknow, May 11 (UNI)--The Lok Dal general secretary, Mr Mandu Limaye, today announced the names of party candidates for four of the five Lok Sabha and eight vidhan sabha seats in the by-elections in Uttar Pradesh, polling for which will be held on June 14. Mr Limaye told newsmen that he would announce the party's decision on the Pauri Garhwal parliamentary seat by tomorrow after consulting the party chief, Mr Charan Singh. He said the Yuva Lok Dal chief, Mr Sharad Yadav, a former member of the Lok Sabha, would oppose Mr Rajiv Gandhi in the Amethi parliamentary constituency. Mr Limaye said he was sorry that despite their best efforts, no understanding could be reached among opposition parties to jointly oppose Congress(I) nominees. [Text] [Bombay THE TIMES OF INDIA in English 12 May 81 p 9]

NORTHEAST GEODYNAMIC MONITORING--Shillong, May 11--The programme relating to the study of geodynamic problem and the establishment of effective monitoring network in the seismic north eastern region has been intensified, according to a spokesman of the Regional Research Laboratory in Jorhat. Its geoscience division, in collaboration with the National Geoscience Research Institute in Hyderabad, has established four seismic surveillance stations in the north-eastern region. Eight other stations are to be set up in the region. The geoscience division has carried out a statistical analysis of earthquake data relating to the 1923-1977 period. The analysis has revealed that the probability of an earthquake of magnitudes between 7.5 and 8.0 on the Richter scale occurring in the region is "significantly high." [Text] [Bombay THE TIMES OF INDIA in English 12 May 81 p 7]

ARGON FOR EXPORT--New Delhi, May 11--The Fertilizer Corporation of India is now the country's biggest producer of argon, a product in increasing demand for precision welding in sophisticated industries. There is now a surplus in the country. The corporation is exploring possibilities of exporting argon to neighbouring countries. The purity of argon produced in FCI's plants is over 99.995%--the purest in the country, because of the particular recovery process. Besides, the oxygen content is low. The corporation has taken the lead with the commissioning of the coal-based projects at Talcher and Ramagundam, where argon recovery plants have been installed with an annual capacity of 900,000 cubic metres at each project. Earlier, argon was being produced only in the Gorakhpur unit of the FCI. The corporation has now an installed capacity of over 2 million cubic metres, which is considerably in excess of the present domestic requirement. [Text] [Calcutta THE STATESMAN in English 12 May 81 p 9]

WORLD BANK LOANS--Washington, May 11--The World Bank today announced three interest-free loans worth $88 millions (Rs 70 crores) for farm training in Tamil Nadu, Madhya Pradesh and Maharashtra. Madhya Pradesh will get $37 millions (Rs 29 crores) Tamil Nadu $28 million (Rs 22 crores) and Maharashtra $23 million (Rs 18 crores). Repayment of the loans from the bank's International Development Association will take 50 years, including a ten-year grade period.--AP. [Text] [Madras THE HINDU in English 12 May 81 p 1]

MEMBER OF PARLIAMENT URGES GOVERNMENT TO TABLE NEW LABOR LAW

Jakarta KOMPAS in Indonesian 19 Mar 81 p 9

[Article: "DPR Member Asks Government to Quickly Submit New Labor Law"]

[Excerpt] DPR [Parliament] member from Central Java Imam Churmen has urged the government to quickly submit to the DPR a new labor law.

According to Imam who represents the Development Union Party faction, the law now in effect in Indonesia, as the government has already said, is no longer applicable to the present situation.

Imam told reporters that for 3 years the government has been working on this. But its results are still being awaited by the DPR as nothing has been submitted for discussion by the respreentative body.

Imam feels that a new labor law is important because the sanctions imposed by the old law are not as clear or as strict as hoped for. For example, at present there are no adequate sanctions for the businessman who won't obey the decisions of the P4D [Regional Committee to Solve Workers Disputes] or the P4P [National Committee to Solve Workers Disputes]

The P4D and P4P have decided that a worker who has a problem with his employer must be rehired. But many employers have refused to obey this decision and have continued to not rehire the worker. This is done by the businessmen because the sanctions imposed by the present labor law are considered light.

FBSI

Also the FBSI (All-Indonesian Labor Federation) as the workers organization is limited and regulated by the law. The FBSI often still doesn't have the power to help make a decision in a labor disagreement.

There is the proposal that in every problem the police as the public security and order apparatus should be included. Imam feels that as long as the problem can be handled by existing organizations, it would be

better to leave out involvement by a third party outside labor and management.

Imam also complains about the right to strike. The right to strike is guaranteed by law and workers can carry out "rest" action orderly. But workers are under pressure by the government not to initiate work stoppages and in fact action is taken against those who do strike by the security forces.

REAGAN DESIRES INCREASED COOPERATION WITH INDONESIA

Jakarta KOMPAS in Indonesian 20 Mar 81 pp 1, 12

[Article: "Reagan Hopes for Increased Cooperation With Indonesia; Indonesia Desires Liberalization in Trade Relations"]

[Excerpts]In his special message to President Suharto, U.S. President Ronald Reagan hopes that Indonesia will continue and increase its cooperation with the U.S. The message from Ronald Reagan was delivered by former President Gerald Ford to President Suharto at the Istana Merdeka on 19 March.

Gerald Ford arrived in Jakarta by special plane on the afternoon of 19 March and that evening paid a courtesy visit on Vice President Adam Malik. Following discussions with President Suharto he met with Coording Minister for Ekuin [Econocy, Finance and Industry]/Chairman of Bappenas [National Development Planning Board] Widjojo Nitisastro and Minister of Industry A.R.Suhud along with Minister of Mining and Energy Subroto. On 20 March he left Indonesia enroute to Hong Kong and then on to Osaka (Japan).

In answer to a question Minister of State and State Secretary Sudharmono said that Ford had explained the new U.S. government policies in both the economic sector and in foreign relations. President Reagan hopes that with Indonesia in particular and with the countries of Southeast Asia in general the present cooperation can be increased.

"In addition an exchange of ideas took place on various world problems. President Suharto gave Indonesia's viewpoint on the problems, particularly concerning the Indochina situation. Indonesia's attitude is still as it has been often expressed, so that there is nothing special to report."

Answering a question Sudharmono said that the economic relations between Indonesia and the U.S. and the U.S. and other countries were explained generally by Ford, particularly as the U.S. is giving more attention to its domestic economy at present. When asked if the coming of Gerald Ford was as a special envoy of the U.S. President, Sudharmono said "I believe so. He is helping Reagan by delivering his special messages."

Did Ford ask about Indonesia's diplomatic relations with PRC ? Sudharmono answered "no". But President Suharto did explain the Indonesian attitude which has been stated many times. It is that Indonesia is in no hurry to unfreeze its diplomatic relations and in addition PRC must convince Indonesia that it really won't interfere in Indonesia's internal affairs, Sudharmono said.

Concerning U.S. foreign aid, Sudharmono added that Gerald Ford explained that what will be decreased is the increases in foreign aid. But the overall total won't be decreased. However, he didn't give any detailed explanation. "However, for Indonesia," the minister said, "in developing economic cooperation, it is not entirely a matter of aid being cut off."

He said that what Indonesia hopes for is liberalization of trade relations so that there won't be any difficulty for the entry of goods produced by developing countries like Indonesia into U.S. markets. Among other matters, there are the tarrifs and the tin quotas. The U.S. has just issued an announcement releasing its tin reserves. As a result producing countries like Indonesia have concerns, said Sudharmono, using this as an example.

OVERSEAS CHINESE IMMIGRATION PICTURE CHANGING

Jakarta KOMPAS in Indonesian 21 Mar 81 pp 1, 12

[Article: "Indonesian Consulate General in Hong Kong Points Out That Thousands of Former Hoakiao Have Given Up Their Intentions of Coming to Indonesia"]

[Excerpt] The Indonesian Consulate General in Hong Kong has pointed out that thousands of former Hoakiao [Overseas Chinese] in Hong Kong have given up their intention of returning to Indonesia because they consider that living conditions in Indonesia have become as difficult as their present living conditions.

From late 1979 to early 1980 it is estimated that 4,000 former Hoakiao lined up to leave the British colony with the intention of returning to Indonesia. To carry out their intention, there were those who tried to enter by falsifying the contents of passports (replacing the photo in someone elses passport) falsifying passports and disguising themselves as sailors.

The staff at the Indonesian Consulate General told KOMPAS in Hong Kong last week that it is thought that the illegal immigrants were aided by an international overseas Chinese syndicate. The syndicate helps foreign overseas Chinese to settle in certain places and indeed arangess citizenship applications.

But recently the Consulate General has been hearing different reports, that lining and seeking work in Indonesia is "extremely difficult". So instead of seeking a new place full of risks, in addition to having to adapt to a new environment, the Hoakiao feel it is better not to leave Hong Kong. They have also heard about what happened in Solo [Surakarta] and Semarang last year which has been exaggerated by their own people.

To substantiate this report, KOMPAS sources at the Indonesian Consulate General point to the tours to Indonesia. Seven recent tours (each group had at least 50 participants) to Indonesia arranged by one company,

all returned in tact as they left Hong Kong. There was no one who deserted to remain in Indonesia.

The report has also been partially confirmed by Chief of public relations at the Directorate of Information Drs Subagio.

Answering a KOMPAS question on 20 March, Subagio added the element of tightened sucurity as the main obstacle for illegal immigrants entering Indonesia. "At present security is more intensive and more attentive to their job," he added.

The change factor in the political life in mainland China has also played a role in obstructing the entry of illegal immigrants into Indonesia. He said as an example that western life style has begun to infiltrate mailand China. There is also the threat from the north (USSR) which requires people who can be called on from time to time to defend their country.

Although there is the indication that the entry of illegal immigrants into Indonesia is slackening off, the chief of the public relations for the department of immigration called on all parties to continue to maintain vigilence. Consciousness must be planted from below beginning with RT [neighborhood associations] and RW [citizens associations]. This is because officials at the lowest levels know the most about new people and foreigners who are in their areas.

RELATIONS GOOD WITH NORTH KOREA

Jakarta SINAR HARAPAN in Indonesian 19 Mar 81 p 12

[Article: "Minister of Foreign Affairs Mochtar: Indonesia-North Korea Relations Good for Some Time"]

[Text] Minister of Foreign Affairs Mochtar feels that Indonesia's relations with North Korea are extremely good at present, and this not only includes official relations. He gave as an example the fact that in international forums Indonesia and North Korea often cooperate.

He pointed out that in the Non-block conferences since Havana, Indonesia and North Korea have always had close cooperation. A SINAR HARAPAN reporter who covered the Non-block summit conference in Havana in 1979 reported that Indonesia's good offices were used to help North Korea get a seat on the coordination bureau.

Mochtar spoke of the good and more than official relations while commenting on an analysis broadcast by BBC London in Indonesian on the morning of 16 March during which it was reported that the President of North Korea Kim Il Sung in an interview with several Japanese reporters had said that he desires to stimulate friendship with the non-communist countries of southeast Asia.

Relations between Indonesia and North Korea have been established for a long time. Since the days of the previous government (Orde Lama) those relations haven't ever been disturbed. In fact since the relations have been established for several years, Indonesia is in a more favorable position than the other four members of ASEAN [Association of South East Asian Nations] because it isn't necessary to make approaches to open relations.

DISUNITY IN GOVERNMENT CAUSED BY POWER CENTERS

Jakarta KOMPAS in Indonesian 25 Mar 81 pp 1, 12

[Article:"According to Dr Juwono Sudarsono, Certain Power Centers Have Caused Disunity]

[Excerpts] Dr Juwono Sudarsono sees the presence of certain Indonesian national sicknesses which obstruct the progress of the nation. Among others there is the tendency that anything called government has never been unified.

Juwono said this on 24 March to participants of the National Study Forum held by the Indonesian National Student Movement(GMNI) in Ciawi Bogor.

He said that as a result of this lack of unity in the government, every time an economic problem or political problem arises, it is always handled by special groups as power centers, depending on what kind of problem it is.

For example, there was a problem with Japan and so there were special groups of officials who had good relations with Japan who were prone to favor Japan. According to Juwono this isn't unusual. Only it is to be regretted that these power centers that form special groups aren't united.

This kind of government, consisting of power centers that form their own special groups, is always bargaining among itself about what it is doing. As long as there isn't one power center that is able to overpower the other power centers, there will always be compromise. In this way every policy issued will be the results of compromise and will be a half hearted policy.

Juwono said that the presence of these power centers will in a short time cause the governmental elite group not to be able to make its selections on foreign capital investments. "Most of them are already caught up in this important matter for what they can get," he added.

Juwono also said that he could understand the demands by students and others that officials be honest and not accept commissions. "This demand can be

understood because the students have never had the experience or faced those who want to give commissions," he said.

In return Juwono asked the students whether in 10 years time when they have become high officials they will be invunerable to the offer of commissions? "It is uncertain whether I myself could reject them and such a question can't be settled academically because it is one of political practice," he added.

He feels that Indonesia will experience critical years in 1985-1990, because during that period Indonesia must pay the highest debt installments it has ever paid since the New Order began. He estimates that 20 percent of the value of all exports will have to be used to pay the installments, while national resources for export, especially petroleum, will decrease.

In addition between 1985-1990 Indonesia's role and credibility as the Non-block country which could motivate a desire to strive for a new international economic system, will face severe tests, particularly in its efforts to strengthen the "South-South" unity in the "North-South" struggle.

Indonesia's diplomatic picture will also become increasingly questioned during this decade because of the critical problems being faced domestically, which in part will disrupt the ability to take an active role in efforts to create world peace.

Meanwhile there is the long-continuing sickness, namely that no government whatever its stripe, has been free from the reality that it hasn't been able to be self-sufficient in food. Each year the forwign exchange reserves are used to import rice at an ever increasing rate.

According to Juwono, the policy being implemented is in reality altogether different from the policy implemented by the Sukarno government. At that time Indonesia wanted to play a political role which was very important outside, but which didn't destroy the domestic economy. But at present, we are busy destroying the domestic economy by many shortages and the political role being implemented isn't too outstanding, even though it is being carried out in the Non-block and ASEAN [Association of South East Asian Nations] groups.

Juwono feels that now is the time to seek a balance so that Indonesia's political role can become a kind of lamp or star light that can become a guideline for other development.

ATTACK ON POLICE SECTOR COMMAND SEEN AS HAVING POLITICAL BACKGROUND

Jakarta KOMPAS in Indonesian 20 Mar 81 pp 1, 12

[Article: "Kopkamtib Explains Attack on Cicendo Police Sector Command in Bandung; Three Police Killed, Instigators Apprehended"]

[Text] On 11 March 1981 around 100 hours WIB [West Indonesian Time] the Cicendo Kosekta [city police sector command) 8606 in the city of Bandung was attacked by an unknown bank of 15 people using a truck and carrying both firearms and knives. Resistance was carried out with three Indonesian policemen being killed and another being seriously wounded.

The Commander of Kopkamtib [command for the restoration of security and order] Adm Sudomo told this to the press on 19 March at the press room of the department of defense and security. During the press conference, Adm Sudomo was accompanied by Commander of Kodam [military command region] VI/Siliwangi Maj Gen Yogie Suardi Memed as special executive officer (Laksus) for the West Java Kopkamtib and Commander of Police Region VII/ Langlangbuana Police maj Gen Drs Muryono and Information Service Chief for police headquarters Police Brig Gen Darmawan and others.

Adm Sudomo added that "the band then fled after burning documents, releasing four detainees accused of automobile theft and carrying away equipment and several motocycles, some of which were being held as evidence in traffic violations."

On the same day, a chase operation was launched by regional Laksus and the Indonesian police. Eventually the instigators were apprehended and the four detainees they released were recaptured.

The operation also succeeded in seizing four firearms, four motorcycles and other equipment that had been carried off.

From investigations it can be reported that the motive behind the attack was to get weapons and funds to support operations that have a specific political background. The process of investigation continues and it is expected that in a short time this case can be legally completed by being brought to trial.

It should be remembered that following the incident both central and regional Kopkamtib have called on the press to not write up articles about the case for the time being, not to cover it up but because of the secrecy and follow-up of the security operation which is being carried out by the West Java Laksus and the Indonesian police.

In reality the "off-the-record" call was not heeded by two newspapers, the "M" in Bandung and the "SIB" in Medan. In fact this seems to have been done deliberately for specific reasons, so that the operation underway had to be stopped and changed.

Strong action has been taken by the department of information against the two newspapers because of the violation of the ethics code. And following discussions with the Press Bureau, the owners and reporters of the two newspapers were detained by local Laksus for the time being for further investigations relating to the deliberate leaking of military secrets.

To the public a call has been issued to increase watchfulness so as not to be caught up in side issues relating to the case which have been deliberately thrown in for specific purposes.

Aften giving this information Sudomo answered many questions at the press conference about the incident at Bandung but almost all were declared as "off-the-record".

LABOR UNEASY OVER GOVERNMENT POLICIES

Jakarta KOMPAS in Indonesian 26 Mar 81 pp 1, 12

[Article: "Indonesian FBSI, KADIN: Workers Uneasy Because Government Policies Not Consistent"]

[Excerpts] The all Indonesian Labor Federation (FBSI) and the businessmen's organization KADIN (Indonesian Chamber of Commerce and Industry) are in agreement that the recent unrest in the labor sector, particularly in the textile and lumber industries, has been due to the inconsistency in government policies.

This statement was issued together by FBSI chairman Drs Agus Sudono and a KADIN chairman A. Baramuli S.H. during a press conference on 25 March at the Dshif Jaya Boulevard Hotel in Jakarta.

According to Agus Sudono, the recent inconsistent government policies particularly relate to the textile and lumber industries. In these sectors the regulations for issuance of Export Certificates have made it impossible for businessmen to export goods. Also the rumors about a decrease in import taxes for all imported textile components from raw materials to ready-made goods have caused uneasiness in the business community.

All of this has produced a sluggishness in the textile world recently. This doesn't include the imprt quotas fixed by some West European countries, such as Britain, France, Netherlands and Luxemburg, which add to the increasing seriousness of the situation in the textile world and at the same time have an effect on workers because businesses aren't on full time operations.

The textile quotas for western Europe also are one reason for the weaknesses of the government's representations at the Republic of Indonesia embassies in western Europe. Embassy officials are indirectly responsible for the low textile quotas for Indonesia. For example, textile production in Indonesia which is 2.240 billion meters a year was only reported to be 1 billion meters by officials of the embassies in Europe. Also the amount of ready-made clothing exports were listed by embassy officials as being far below

the actual amounts exported by Indonesia. Because of these mistaken reports by officials some western European countries have fixed their quotas very low.

Both Baramuli and Agus Sudono agree that the number of uneasy workers is around 1.5 million at present. Most of them are textile and lumber industry workers. This uneasiness is caused by the lack of assurance about the fate of the businesses where they work.

Concerning the lumber industry at present, it seems that the three-minister SKB (Joint Directive) issued by the ministry of industry, the minister of trade and the minister of finance, clearly has created difficulties for the other ministers. Because in accord with the three-minister SKB as it effects the lumber sector, exports are only permitted in the lumber industry when a certain round figure of lumber for domestic industry has been met. This has caused many businesses to stop because they couldn't export.

Agus Sudono further said that up to the present there are 7.6 million people in the work force that need jobs. This 7.6 million total was figured to the end of Pelita III so that if following Pelita III that total can't be put to work, it will continue to increase.

The FBSI chairman feels that a National Work Opportunity Council should be formed to provide a listing of workers needed and coupled with this should be a listing of the education needed. In this way there would be a plan for the use of workers.

A. Baramuli admits that private companies have been slow in developing their activities and aren't filling their need for workers. But all of this is due to the government policies which often don't support the development of business. With the development of business, the businessmen could save funds which could then be used to expand their businesses.

MONEY IN CIRCULATION UP SHARPLY

Jakarta KOMPAS in Indonesian 21 Mar 81 p 2

[Article:"Minister of Finance Ali Wardhana: Money in Circulation Has Increased 20 Fold"]

[Text] Minister of Finance Ali Wardhana said that the money in circulation in Indonesia has increased 20 times in the last 10 years. This is from 250 billion rupiahs in 1970 to 7 trillion rupiahs in 1980. It has increased more than 25 times in the credit sector, from 300 billion rupiahs in 1970 to 0.5 [sic] trillion rupiahs in 1980.

Minister Ali Wardhana said this during an installation ceremony for several bank officials at the department of finance on 20 March. The bank officials installed are: Engineer Kuntoadji appointed as principal director of the Indonesian Development Bank (Bapindo); Drs Subekti Ismaun as Bapindo director; R. Djamu Achmad S.E. as director of the State Commerce Bank (BDN); Surasa as BDN director and Drs. Marzuki Usman M.A. as member of the board of directors of Bumi Daya Bank (BBD).

Minister Ali Wardhana admitted that in development before Repelita III [third 5-year development plan] in certain situations stresses often took place on the economic stability, particularly in the monetary sector. In addition, price increases were very high. All of this was caused by sharp increases in the money in circulation.

The amount of money in circulation will continue to increase sharply, in particular because the APBN(National Income and Expense Budget] will continue to increase. For fiscal 1980/1981 it is estimated that the APBN will end with a 11 trillion rupiahs total and this will be 14 trillion rupiahs in the 1981/1982 APBN. These increases will increase the amount money in circulation.

With the increased amounts of money in circulation, the responsibility on the banks in managing it becomes increasingly difficult. The amount of money in circulation has sharply increased. In 1978 there was o.5 trillion rupiahs in circulation. In 1979 it increased to 1 trillion rupiahs and increased again in 1980 to 1.5 trillion rupiahs according to Ali Wardhana.

JOINT OIL EXPLORATIONS TO BE CONDUCTED IN WEST SUMATRA

Jakarta KOMPAS in Indonesian 16 Mar 81 pp 8, 9

[Article: "Pertamina-Caltex Contract; Oil Exploration in West Sumatra to Cost $60 Million"]

[Excerpts] On Thursday 12 March a joint Pertamina [National Oil and Natural Gas Company]Caltex team began exploring the possibility of carrying out oil exploration in West Sumatra in a concession area of 7,625 square kilometers. They will meet with local government and civilian leaders in the three districts of the concession area, namely Sawahlunto/Sijunjung, Solok and Tanah Datar.

This is the outworking of the production-sharing contract signed by Pertamina and Chevron Singkarak Inc/Texaco Singkarak Inc which was approved by the President on 8 January 1981. The exploration contract was signed on 12 February 1981 by Chevron/Texaco as contractors and Pertamina and Caltex Pacific Indonesia as operators. Caltex will invest $60 million for exploration and implementation costs over a 6-year period. If there are no delays, explorations will begin in April 1981.

Normally oil wells are found in low lying plains or even off-shore. So, this will be the first time in Indonesia than explorations will be conducted in a high hilly plateau area such as West Sumatra.

Harun Al Rasjid, chairman of the board of directors of Caltex said if the exploration is successful, oil production will be increased in Indonesia. At present Caltex production alone is 780,000 barrels a day from 65 oil fields. "We hope and feel sure that the explorations in West Sumatra using the latest technological equipment will succeed," he said.

Chairman of Pertamina's Foreign Contractors Coordination Board (BKKA) Engr D. Zahar said that in the production sharing contract, management is completely in Pertamina's hands. All exploration, investment and production costs are the responsibility of the contractor who will get back all operational costs. There is a production-sharing division of

85-15 for oil and 70-30 for gas.

The contractor must pay corporate taxes and taxes on interest, dividends and royalties directly to the government. Concerning control of the oil, the government has the option of selling to the contractor a part of its oil as long as the oil sold or received is not less than 50 percent of the total production.

If oil is found, the contractor will set aside 10 percent of its interests for participation by an Indonesian company to be determined by Pertamina. The contractor must be prepared to turn over 28.57 percent of its production share to be processed in Indonesia and construct an oil refinery or petrochemical plant in Indonesia, if there is no guaranteed processing available and if its share is in excess of 100,000 to 175,000 barrels a day.

According to Zahar, after the 5th year the contractor must make oil available for domestic fuel oil on a proportional basis at a price of 20 cents to the dollar. The original concession area will be returned in stages so that at the end of the 6th year no more than 20-25 percent will remain with the contractor.

Chief of the geological section of Chevron/Texaco Chaidar Makki said that geological discoveries around Danau Singkarak have met the conditions needed to surmise that oil is to be found in the region. Original stone,that with oil seeping from its sediment has been found in the Sangkarewant and Ombilin regions. Also there has been discovered oozings of oil in the Sijunjung and Singkarak areas with the oil type being the same as the oil from Duri (Riau) that has been changed by bacteria.

In the exploration strategy preliminary seismic exploration to determine the basin configuaration, the thickness of the sediment, how the oil is entrapped coupled with gravity and magnetic investigations, geological maps of the surface and the interpretation of aerial photos reveal petroleum possibilities in the Ombilin basin, according to Chaidar Makki.

LIMITED VISION SEEN AS MAJOR ERROR IN AGRICULTURAL POLICY

Jakarta KOMPAS in Indonesian 26 Mar 81 pp 1, 9

[Article: "Professor Gunawan Satari: Natural Resources Have Reached Critical Point"]

[Excerpts] At present the natural resources found in Indonesia have reached a critical point, due to the condition of land, water, forest and genetic resources. Almost all of them are in poor condition.

This was stated by first chairman of Peragi (Association of Indonesian Agronomy experts) Professor Dr Engr Gunawan Satari at a press conference on 25 March. The press conference was held to prepare the way for the second national congress of Peragi which will be held in Jakarta from 31 March to 2 April.

The first chairman of Peragi said "Agriculture efforts occupy an important place and role in Indonesia. But we have made a major error in thinking that the agriculture sector is only working the soil and planting the crops.

So as quickly as possible we must desire and be able to chang this wrong thinking. Farmers must be enabled to use the advances made in the developing agriculture technology sector while they become progressive businessmen or industrialists.

Up to now our thinking and actions have been more harmful than beneficial to the farmers. Agriculture officials too have made the same mistakes. Right now farmers are only "helped" and guided from above. The result is that they have succeeded in increasing agricultural production but aren't able to process and market their produce. In other words, farmers have not been stimulated to develop creativity and capabilities.

The result of this limited agricualtural thinking is that without realizing it they are ruining the natural resources (land, water, forests and genetic resources).

Recognizing this, according to Prof Gunawan Satari, the members and supporters of Peragi, a total of around 468 people (active members) will endeavor to improve this sad situation. The second Peragi congress will formulate a proper operational strategy which will then be submitted to the government.

Various activities will be undertaken to improve the damage to the existing natural resources. Efforts will be made to improve the damaged condition of thousands of DAS (river flow areas) regions. This will be done by creating a unified development area for the DAS regions. Agricultural activities, developed around the DAS regions, will be limited and managed through a coordinated agricultural activity pattern. In this way the natural resources (water resources) and total environmental conservation can be reunited as it was originally.

In addition, the level and role of farmers, which has been considered low will be changed and increased in a proper proportion. In particular the small farmer whose role is very importenat will be guided to become a businessman and industrialists in addition to being able to use developments in agriculture technology.

These activities will be undertaken in a variety of ways. For example, the agricultural activities of the small farmer will slowly be united into farmers' groups, so that the production unit per hectare can be increased and a shorter time used.

This increase in production will result in additional income for the farmers and will have a possitive effect on the program to adequately meet the people's need for calories and protein. In fact, indirectly the increases in agricultural production and the small farmer's income, will also motivate the development of activities in the industry and other sectors.

Prof Gunawan Satari admits that in the carrying out of this program Peragi will face various complex and difficult obstacles and problems. So, this effort will require help and support from various competent agencies to handle the agriculture problems and natural resources needed by the whole nation.

EDITORIAL VIEWS LIBYAN-U.S. RELATIONS

Peshawar KHYBER MAIL in English 20 May 81 p 3

[Editorial: "Libyan-U.S. Fall Out"]

[Text]

A recent action by the United States in expelling Libyan diplomats from the country was not only sudden but also drastic. It has come to as close to breaking of diplomatic relations as is possible under the circumstances, with the United States purchasing a substantial portion of Libyan oil and having a large number of Libyan students getting educated in the country. The charge levelled by Washington is that Libya supported international terrorism. It is surprising that a nation which has had a long record of similar activities, albeit in a more sophisticated frame of reference, the Central Intelligence Agency and the multi-national commercial concerns, should dare to make such a charge. For the greater part of this century, the American streets have been dipped in the blood of honest-to-God men by the gangsterism of the notorious Mafia, the organisation with the lowest moral values, involved in white-slave trade, narcotics, gun-running, with the godfathers coming direct from Sicily. But, no political action was ever taken against Italy. The latest sample of American politics by distant blackmail is the presence of an active Zionist lobby and the expansionist mechanism of Israel which the United States is forced to patronise. The terrorism which Israel has let loose in Lebanon has been tacit if not openly supported by the White House because it dare not go against the Jewish Big Business at home.

The only charge of which Libya can be said to be guilty is its burning desire to see justice done to the Palestinians, whose homeland has been usurped by alien immigrants under the patronising wings of the world powers, and wanting the Islamic world to be most completely united in persuance of the edicts of the Holy Quran. It has been in the context of the latter that it has provided assistance to Muslim insurgents in the southern Phillippines, in Chad and elsewhere. Libya's positive concern to strengthen itself is the outcome of a normal desire of every sovereign and independent nation to defend its integrity. If the country's leaders find the friendship of America less fruitful in this respect and they turn to the Soviet Union for achieving the objectives, the fault could not be found in Libya but in the unreliable friendliness of the United States itself. The latter has on record of leaving its closest friends in the lurch in moments of crisis, and Pakistan is one of the countries which can bear positive witness to this. One can see the lukewarm attitude of the American security advisors and officials in acceding to an incomplete assistance to this

country while it stands four-square on the edge of a precipice since the incursion of the Soviets into Afghanistan. The trouble is that all American foreign policies are governed by the insensate patronage given to the Israelis for which it would not like any Muslim nation to be strong enough even if in the process it has to face severe dangers from Soviet expansionism. The latest sign of Libyan devotion to the unity of al-Islam came from Moscow where Col. Muammar al-Qadhdhafi pulled the leg of his greatest friend, President Brezhnev, on the matter of the Soviet policy in Afghanistan. It is only a part of the diplomatic game that in the final communique words had to be carefully inserted in order to bring out a measure of unanimity for international consumption.

The American animosity seems to be placed in a different context. There have been gathering cloud of of military action within the programme of Israeli expansionism, this time against Lebanon, and the likely explosion that may result from it. The United States Rapid Deployment Force has been gathering up in the Indian Ocean, obtaining right-of-way for arms and men from the NATO countries, not so much to face the Soviet threat but to contain Arab and Muslim resistance to the Israeli programmes. Immediately following the break in diplomacy with Libya, Washington has been pressurising NATO countries not to sell arms to it. France has already suspended the despatch of missile patrol boats to Tripoli, though already paid for and ready for their maiden trip. These efforts had already been planned and the action of diplomatic expulsion was only an excuse. Libya sells a substantial portion of its oil to the United States, and a complete break of relations at this stage was inadvisable. In the meantime, the situation in Lebanon has taken a serious turn, as expected. Syria's installation of its SAM missiles in Lebanon has brought matters to a head, though it was only a defensive action against the terrorism spread by Israel through a series of uncalled for attacks by air, sea and land on that country. Now, President Reagan's representative cools his heels in the Middle East to delay matters while Israel prepares. Libya has already thrown its lot with Syria if things go worse. There seems to be a method in the American madness!

RAMPANT CORRUPTION CALLED MAIN CAUSE OF KARACHI PROBLEMS

Karachi MORNING NEWS in English 23 May 81 p 8

[Text]

The Senior Sind Minister, Mr Rasool Bux Talpur, last night called for strict measures to curb corruption in the civic bodies of Karachi and help solve the multifarious problems of this metropolis.

Presiding over a seminar on the problems of Karachi held under the auspices of Association of Young Social Workers at a local hotel, he said the main cause of our problems are rampant corruption in almost all walks of life. Unless people shed their present attitude of trying to get rich quick through fair means or foul, the collective problems would continue to multiply. He advised all people to make conscious endeavour to earn "Rizq-i-Halal" (lawful income) and to do away with temptations of making money by questionable means.

The Senior Minister said there should be strict accountability of all those involved in publis affairs, whether they were in power or out.

Pointing to the present shortage of electricity in Karachi, he said it was mainly due to "thefts" of electric power.

Mr Talpur said the unwieldy migration of people from upcountry to Karachi was another major cause of the problems of this city. He advocated to check of this migration.

The Senior Provincial Minister said the spawning Katchi Abadis had turned entire Karachi into an almost "katcha" city. It was the duty of civic bodies' officials and police to prevent further growth of such Katchi Abadis. "Those found wanting in their performance of duties should be taken to task," he added.

Mr Talpur suggested that an effective coordination agency should be instituted for the several dozen civic agencies in the city. He said Karachi was the very heart of Pakistan, and unless the problems of this metropolis were solved, the country's future prosperity and well-being would be affected.

The Commissioner of Karachi, Mr M. M. Usmani, in his speech proposed that a federation of various civic agencies in Karachi should be formed. He said it was not practicable to merge all the civic bodies.

Brigadier S. S. Qasim, Chairman, Karachi Transport Corporation, explained the various steps taken by KTC to increase the number of buses in the city for solving the transport problems of the people.

Other speakers included Khanum Gohar Ejaz, Mr Ishtiaq Azhar, Mr Abdul Hakim and Mr Mahfoozun Nabi Khan.

Earlier, Mr Kemran Mirza Rizki, President of the Association, welcomed the chief guest. —APP.

SATELLITE LAUNCHING CAPABILITY DISCUSSED

Karachi DAWN in English 29 May 81 Supplement p IV

[Article by Muhammad Ali Siddiqi]

[Text]

With more and more satellites going up into space and with the neighbouring 'science superpower' joining the exclusive club of satellite-spinners, where does this country of ours stand in this most modern of man's techniques to conquer the Universe?

Can Pakistan, for instance, hope to put a satellite of its own into orbit in the near future – not by just pressing the button of a rocket made by others but as part of a project visualised, handled and executed entirely by Pakistani engineers themselves?

The reply comes from an expert: some two decades back, this country was firing rockets that went upto 160 kilometres into space. Today, we have more powerful rockets that can, and do, go upto a height of 500 kms. (For putting a satellite into space, a rocket must be able to cross the atmosphere and reach a minimum height of 100 kilometres). This means technically speaking Pakistani rockets today have a thrust that can easily put a crescent on the horizon.

The expert here is Salim Mahmood, who has been associated, directly or indirectly, with the firing of no less than one hundred and fifty rockets on behalf of SUPARCO – the national agency for space and upper atmospheric research which he now heads and with which he has been associated since its inception some twenty years ago.

The way SUPARCO came into being and the part Salim played in it constitute an interesting episode.

Way back, in 1961, when Salim was working in the US at the Oak Ridge School of Reactor Technology, Tennessee, he received a telephone call. The Pakistan Embassy wanted him to rush to Washington for a hush-hush meeting with a top personage, and no time was to be lost.

Salim dashed to Washington, along with another Pakistani scientist, Tariq Mustafa, and in walked into the Embassy lounge Pakistan President's Chief Scientific Adviser, Prof. Abdus Salam.

Salam told Salim in no uncertain terms Pakistan had to have a rocket programme, that his qualification both as a nuclear engineer and as an electronics expert stood him in good stead for piloting such a programme and that he had to return home post-haste.

This was in September 1961. In less than three months, SUPARCO was born, a rocket firing range at Sonmiani, some 50 kms northwest of Karachi, organized and work got going with top speed.

I remember I had come out of a cinema hall on the evening of June 7, 1962, and found crowds looking up into a sky that had more than the usual twilight hue. The horizon was red and people were wondering.

An hour later, in its 8 p.m. bulletin, Radio Pakistan announced SUPARCO had fired its first rocket, Rehbar One, carrying a sodium payload whose release had turned the sky scarlet.

Useful scientific data had been collected and plans were on for further launching. Four days later, Rahbar II, a two-stage rocket, was fired and it went to an altitude in excess of 160 kms. This was nearly a year before India could fire its first rocket of similar type.

Since then, for understandable reasons, but to Salim's utter distaste, SUPARCO has come to be associated with meteorology.

"This is not the case," he insists. "Our rocket programme is an entirely scientific programme."

Why should we go in for rocketry? Isn't this a waste of valuable resources, technical and financial, for a developing country like ours that imports milk powder and razor blades?

No, says Salim. "It is neglecting rocketry that is a luxury."

In fact, a broad-based rocketry programme, he feels, will be the precrusor of Pakistan's overall lift-off into the realm of higher and sophisticated technology. For, rocketry, he says, is not an isolated and self-contained discipline; "it is a conglomerate of technologies – electronics, computer science, avionics, thermodynamics, nuclear physics, metallurgy and even medicine – that go into the firing of a rocket or the launching of a satellite."

Why is it, however, that we do not hear of SUPARCO anymore? – Security reasons?

No, he says. "I believe in maintaining a low profile. But this does

not mean SUPARCO has been dormant all these years."

He dwelt at length on SUPARCO's future plans, the progress his organisation has made all these years and the major breakthrough that has been achieved in the manufacture of rockets entirely within Pakistan.

In the 60's, during the Rehbar generation of rockets, "we only assembled parts obtained from abroad. Now we manufacture all parts of the rockets ourselves, including electronic parts and computers."

In fact, he claimed, the electronics instrumentation lab facilities available to SUPARCO were the best in the country.

Future plans

What specifically, then, are SUPARCO's future plans?

First, there is a slowing down of rocket-firing activity throughout the world, because satellites have taken over the functions of the rockets. So, SUPARCO will now concentrate on making use of satellites already in space.

In other words, SUPARCO will make use of foreign satellites for economic purposes, like probing the geological formations, so as to locate and exploit Pakistan's mineral wealth, gather more information about glaciers in Pakistan's snowy heights, develop TV and microwave communication and ensure the transmission of TV's educational programmes to Pakistan's teeming millions in the villages.

Second, SUPARCO should develop its own satellite-launching capability, given financial commitment, sufficient time and technical collaboration from friends.

In fact, he said, "It is not beyond our capability to make and launch satellites entirely on our own". When? He didn't say. "Soon?" He kept quiet.

Third, he emphasized the need "to have our own national program, even if it is modest".

Talking to him makes it clear Salim is the man the nation can rely upon to do the job, for there is no position he has not held in Pakistan's rocket programme.

He began by building the SRR (Sonmiani Rocket Range) and then was associated with Pakistan's rocket programme in various capacities – Director (Operations and Instrumentation), Director (Space Technology) and Deputy Executive Director, until the Government asked him to become SUPARCO's Executive Director, i.e., its chief, on January 1, 1976.

An M.Sc. in Physics from the Punjab University and post-graduate qualifications in nuclear engineering with specialisation in electronics, Salim has experience of work at some of the world's most advance space stations, including the Wallops Flight Test Centre run by NASA at Wallops Island, Virginia.

It was, however, his irresistible energy and a passion for service to Pakistan that often brought him in conflict with his superiors and even led, for about a year, to his absence from the national programme.

An example of his enterprising nature was his insistence that he would build a ground station at Dacca for receiving pictures from Tiros, a weather satellite. His bosses opposed him, and Dr. I. H. Usmani, never at a loss for words, gave him the go-ahead with the words: "Either you go up like a rocket or get fired – like a rocket!"

Well, Salim went up – like a rocket. For the ground station that he built in 1968 correctly forecast the terrible 1970 cyclone, rated as the century's worst, when it was still 700 miles away in the Bay of Bengal.

PAKISTANI YOUTH UNION STATEMENT ON CONDEMNED PRISONERS

LD261010 Kabul Domestic Service in Dari 1600 GMT 25 May 81

[Report on statement issued by the Pakistani Federal Union of Students--date not given]

[Text] The Pakistani Federal Union of Students declares its deepest hatred and wrath at a situation brought about by the military clique in Islamabad which could lead to the death of Habib Baluch, the well-known political leader of Baluchi youth, and eight other youth leaders, who have been convicted as the result of a ludicrous military court verdict.

The Pakistani Federal Union of Students points out that the courageous and democratic students of Baluchistan and other provinces defend the claims of Hamid Baluch and the other eight Baluchi youth leaders who have the courage and daring to oppose the military government, do not want their country to be a crossing point for imperialist aggressors and are attempting to raise and reflect the indignation and anger of the courageous Baluchi people in connection with the employment of Baluchi youths as the soldiers of the client regime of Soltan Qabus, that imperialist tool, against the revolutionaries and progressive forces in the Persian Gulf.

The use of tear gas and police nightsticks against the recent student gatherings on the campus of Quetta University and in Moltan, and the arrest of several hundred students has once again revealed the reactionary and fascist nature of the military gang and their actions in violating the sanctity of educational institutions. Similarly, it must be pointed out that educational institutions and centers in most Pakistani cities have been closed by the military clique, as a result of which youth education has been severely disrupted.

The Pakistani Federal Union of Students points out in its statement that the speeding up of the extensive arms buildup in Pakistan, the adventurous, expensive and harmful projects of the Pakistani military rulers in manufacturing a nuclear bomb and the oppression and force applied to various strata of the masses of the people and progressive youths by the military clique are all closely linked. But various students, youths, workers, peasants and intellectuals, who are under severe pressure from the socioeconomic crisis today, which has increased as a result of the antipeople's and undemocratic policy of the military regime, will never slacken their struggle to bring back the sovereignty of the people and

their democratic and civil rights, flouted by the heretic and brutal power of the militarists.

The union congratulates students and the youths of Pakistan on carrying out their responsibilities to society by courageously opposing the military regime, defending the people's democratic and civil rights and opposing imperialist and hegemonist designs for the disruption of peace and security in the region.

In its statement the Pakistani Federal Union of Students condemns the unjust and illegal nature of all imprisonment orders, and particularly death sentences given by military courts against political workers, while civil courts have been deprived of their authority in exercising justice in political cases, and it demands that the death sentence on Habib Baluch and the other youth leaders should be nullified immediately and all political prisoners and arrested students should be freed.

The Pakistani Federal Union of Students warns the tyrant band of Ziaul Haq that it will account for every drop of blood that is shed by every patriot. The death of Hamid Baluch and others, if they are executed, will not be allowed without retribution from the courageous, democratic students and peace-loving youths.

BRIEFS

POLISH DRY CARGO VESSEL DELIVERY--Pakistan will get the delivery of the first of eight dry cargo vessels, nearing completion at the Gdansk Shipyard in Poland in the third week of June this year. The 15,000 deadweight tonnage vessel, which has been named mv Nawabshah, was actually scheduled to be delivered on May 31. Under an agreement, Poland will supply eight ships to Pakistan National Shipping Corporation at a cost of 87 million dollars. According to the agreement, 90 per cent cost of the vessels under-construction will be met from the yard credit provided by Poland and the PNSC will only be required to pay 10 per cent of the cost of each vessel as downpayment. The rate of interest on the credit is seven per cent per annum. The re-payment of the credit will be due in 10 to 15 years. Each of these vessels will have air-conditioned accommodation for 50 officers and crew members. There will also be a mosque on board each vessel for offering prayers. BRIEFS

POLICE WARNED ON POLITICAL INVOLVEMENT--Major-General Fidel Ramos has warned the Philippine Constabulary and the Integrated National Police against involvement in partisan politics. The PC chief also called on all the personnel of the twin commands to exert all efforts to make the forthcoming June 16 presidential election clean, orderly and honest. The appeal of the PC chief was sounded in a conference with Central Visayas Constabulary and police commanders at Camp Seri Osmena SR in Cebu City. In his speech Major-General Ramos said that the only time the constabulary or policeman can participate actively in an election is when he goes out to vote. [Text] [HK230004 Manila FEBC in English 2330 GMT 22 May 81]

NEW MUSLIM AFFAIRS MINISTRY--Manila, May 29 (AFP)--President Ferdinand Marcos created today a new Ministry for Muslim Affairs to "enhance the full integration of Muslim Filipinos in the body politic" in the face of an eight-year Muslim secessionist war in southern Philippines. Former southern command chief, Admiral Romulo Espaldon, was named to head the new ministry which will coordinate with local Muslim groups and foreign agencies or organizations which are involved in Muslim projects and activities. The creation of the Muslim Affairs Ministry comes on the heels of the (?42-) nation Islamic Conference (IC) foreign ministers meeting in Iraq where leaders of the separatist Moro National Liberation Front (MNLF) are expected to lobby for more support. The Philippine Government had recently sent a delegation of Filipino-Muslim leaders to Iraq to counter MNLF appeals. Last year, some members of the IC urged economic and political sanctions against the Philippines for their failure to implement a 1976 Tripoli agreement with the MNLF calling for the setting up of autonomous Muslim regions. FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

U.S. RELATIONS WITH ASIA SHAPED BY SOVIET FACTOR

Kuala Lumpur BUSINESS TIMES in English 10 Jun 81 p 6

[Article by Tan Siok Choo]

[Text] ALTHOUGH there has been no clear enunciation of the American foreign policy towards Asia, at least the outlines are discernible. The main theme of the Reagan administration is the need to contain Soviet expansionism, particularly in Third World countries.

This has given rise to marked support for right-wing, authoritarian regimes in Asia which are avowedly anti-communist and unabashedly capitalist, coupled with increased military aid in order to bolster their defences against external and internal threats. In the process, the issue of human rights is being down-played.

Although officials have taken pains to stress the Reagan administration's concern about the plight of political dissidents in Asia, this will be expressed, not publicly or in strident tones, but sotto voce through diplomatic channels.

It was, therefore, no coincidence that the first foreign head of government to visit the Reagan White House this year was President Chun Doo Hwan of South Korea, a leader with the same lively concern about Soviet intentions as President Reagan.

Th visit gave the US President the opportunity to signal to the communist bloc the US intention to maintain a military presence in the Asian continent as well as a determination to stand by US allies in the face of communist aggression or a threat thereof.

The US-South Korean joint communique stated bluntly that "the United States has no plans to withdraw ground combat forces from the Korean peninsula," adding that "appropriate weapons for enhancing Korea's capability to deter aggression" would be sold to it. This fulfilled a long-standing Korean demand which went unheeded during the Carter years in line with the promise he had made during his campaigning in 1976 to withdraw all US ground troops from the country.

The warmth of President Chun's welcome was all the more remarkable in view of his controversial rise to power. Although he has now legitimised his position, it will be recalled that President Chun, who was then an army major-general, withdrew frontline troops to Seoul in December 1979 to back his takeover of the government, without US approval and in defiance of the South Korea-US agreement governing the deployment of troops placed under their joint command.

Seoul-Washington relations were further strained by the death sentence imposed on dissident leader Kim Dae Jung, which was later commuted to life imprisonment, thus paving the way for the Korean President's visit to the US.

Predictably enough, despite his election campaign rhetoric which advocated improved relations with Taiwan, President Reagan decided on assuming office to place US-Taiwan ties on a back-burner because of fears of jeopardising the fragile links between Washington and Peking.

Moreover, the new administration perceives Peking as an integral part of a tacit strategic alliance, linking Washington-Tokyo-Peking together against the Soviet Union.

However, US efforts to persuade Japan to increase its defence spending elicited only a response that it would "make all efforts" to carry out its defence plan of building a 180,000-man army backed by a 60-ship navy and 450 frontline aircraft — a force modest enough not to aggravate Japanese taxpayers or Moscow.

Moreover, the use of the word "alliance" in the joint US-Japan joint communique issued after Prime Minister Zenko Suzuki's talks with President Reagan precipitated a political crisis which culminated in the resignation of Foreign Minister Masayoshi Ito within one week, despite the fact that the communique stressed that "the alliance between the United States and Japan is built upon their shared values of democracy and liberty."

This is due to the reluctance of the Japanese to be seen as part of an anti-Soviet alliance because of fears among the Japanese business community that such a move might jeopardise their business opportunities in the USSR.

The Americans are incensed with Japanese parsimony on defence spending, maintaining that Tokyo is getting a free ride at the expense of the American taxpayer, as illustrated by the fact that Japan spent only US$87 per person on defence while the corresponding US figure is US$520.

Although economic aid has fallen foul of Budget Director David Stockman because of his zeal in pruning public expenditure, security assistance to Asia is being maintained at near current levels. For some countries, the allocations have in fact been increased, in line with the

US policy of arming not only itself but also its allies.

Therefore, countries like Indonesia will receive a 50 per cent increase in credit under the foreign military sales programme, from US$30 million to US$45 million in order, "to restore Indonesian confidence in the US commitment to regional security while assisting Indonesia to counter the growing Soviet and Vietnamese naval presence in South-East Asia." However, Indonesia will receive only US$30 million this year in food aid compared to the previous year's US$60 million, some 50 per cent less.

The largest Asian beneficiary of military assistance programmes so far presented to Congress is Thailand. Compared with US$50 million in 1980-81, it has been allocated US$80 million for 1981-82 to enable it to purchase small arms and helicopters, replace aging patrol aircraft and upgrade its anti-tank, anti-aircraft and communications system.

However, because of Thailand's crushing burden of debt, US$50 million of the foreign military sales credits will be on concessional terms. The Thais will have to pay only three to six per cent interest, payable over 12 years.

President Reagan obviously hopes that this largesse will be seen as concrete evidence of the administration's firm support for a regime, perceived to be threatened by Soviet initiated aggression carried out by its proxy, the Vietnamese-backed Heng Samrin regime.

Another equally massive military aid package for Pakistan is in the pipeline, presumably to enable the country to defend itself against possible threats from Soviet-controlled Afghanistan. Pakistan, like Thailand, is next door to a Soviet-controlled regime.

Another US$100 million in security assistance has been earmarked for the Philippines — another staunch pro-US, anti-communist ally. The aid package, half in foreign military sales credits and half in economic support, is part payment of the US$500 million President Carter promised President Marcos for the five years until 1985 in return for the renewal of the agreement for continued American use of Subic Bay and Clark Air Force Base.

Malaysia and Singapore will also receive additional military aid under the aegis of the foreign military sales programme together with some help in training their men.

This indicates that the disbursement of funds will, from henceforth, be dictated largely by military and strategic considerations while economic assistance will get lower priority. The danger, however, is that such policies, far from promoting stability in Asia may lead to increased instability.

It is noteworthy that the main recipients of American military assistance are, with some exceptions, authoritarian regimes, which, with American support, are becoming more entrenched in power. Any change of government is likely to be achieved through force of arms. Because of the perception of American support of such regimes, the incoming governments may be stridently anti-American, like Imam Khomeini's Iran.

In the realm of economic relations, the Reagan administration's policies are overtly biased in favour of American businesses. For example, the refusal of the US to endorse an international code of conduct to restrict the advertising and marketing of milk powder was seen, even by American health officials some of whom resigned in protest, as caving in to pressure by three American firms — American Home Products, Abbot Laboratories and Bristol-Myers — which together account for 20 per cent of the world market.

Again, American mining companies were responsible for the Reagan administration's decision to review its policy on the nearly-completed Law of the Sea treaty. The volte face would seem to have come about because of claims by these companies that certain treaty provisions limit American access to deep-seabed minerals, force them to share their technology with competitors and submit to Third World dominance in deep-seabed mining operations.

This move has jeopardised seven years of hard bargaining. It also aroused fears among Third World countries that the US would renege on the commitment by three previous administrations of President Nixon, Ford and Carter — two Republicans and one Democrat — of the concept that the deep-seabed is the common heritage of mankind. The supreme irony, however, is the fact that the US negotiating team was always headed by Republican lawyers and that the policy was usually evolved on a bipartisan basis.

The Reagan administration has adopted a similar go-it-alone attitude in the negotiations for the next International Tin Agreement, with the dispute around the size of the buffer stock and the right of producer countries to impose export controls as a last resort to prop up falling prices.

President Reagan has also tightened up the rules governing the duty-free entry goods into the US under the Generalised System of Preferences (GSP). This has affected exports from Hong Kong, Taiwan and South Korea. Asean countries are exempt except for three items exported by Singapore — radio/telegraphic equipment, solid state radios and electric irons — because of claims that the exports from the island republic exceeded the ceiling set by the US administration last year.

The Reagan administration has, however, reaffirmed President Carter's commitment to pledge to the World Bank's International Development Association US$3.4 billion for 1981-1983.

However, in order to appease congressional conservatives, this sum will be paid in three instalments so that two-thirds will be deferred until much later. IDA is the World Bank's soft loan organisation which lends to the world's poorest countries without any interest charge.

Although the Reagan administration has asked Congress for US$7.6 billion for economic aid programmes, this represents a cut-back from the US$8.7 billion proposed by President Carter for 1981-82, although it represents an increase over current spending levels.

The tendency of the new administration to place greater importance on buttressing allies by supplying military aid and arms and its outmoded perception of the world as divided into two distinct camps, pro and anti-Soviet, is, however, too simplistic for this era.

ASEAN, AUSTRALIA, UK RESOLVE AIR DISPUTE

Kuala Lumpur BUSINESS TIMES in English 3 Jun 81 p 6

[Article by G.O. Kuah]

[Excerpts]

AFTER two-and-a-half years of stormy talks and seething frustrations, the air row between the Asean five and Australia and Britain came to an abrupt end about a fortnight ago.

The sudden ending of this long bitter story came about when Qantas, the Australian airline, met the five Asean national flag carriers with a new set of proposals that the five had been glamouring for in the face of the restrictions placed on them in their rights to the lucrative "Kangaroo" route.

The restrictions or curtailment, which became the bone of contention, took the form of the International Civil Aviation Policy (ICAP), or cheap fare scheme, imposed by both Australia and Britain about two-and-a-half-years ago that initially kept the Asean airlines out of the "Kangaroo" route.

The ICAP brought with it a storm of protests and criticism from the Asean five who regarded the ICAP as a form of protectionism.

The result was a series of spluttering talks between Asean and Australia, each of which dragged on for days and nights, leaving much bitterness particularly in Asean when no conclusion was reached.

The Asean five were somewhat "appeased" when some form of limited participation was allowed them in cheap fare scheme through a "package settlement" worked out with Australia.

But even then, the problems for the five partners were far from over: they had to meet the British to seek the British endorsement to the package settlement so that the Asean airlines too could take to their wings in the cheap fare scheme.

The British, however, not only refused to endorse the package settlement but also came up with their version of Asean's participation (or rather non-participation) in the cheap fare scheme.

But the Asean aviation officials were left in quandary as to whether they should accept the British proposals for it would mean having to start the negotiations all over again with Australia.

The result was that the talks ended inconclusively in Genting Highlands about six months ago. Another attempt between the Asean airlines and British airways to work out an acceptable stopover fare also met with the same fate.

The British-Asean air talks was then left "hanging" in the air till Qantas appeared with the settlement, which they claimed to have the concurrence of the British.. And the British confirmed their consent in the meeting between the British Airways and the Asean airlines about a week ago.

The new proposals or air fares, in fact, has come into effect from Monday following the endorsement by the Asean economic ministers in their Jakarta meeting last week-end.

In a nutshell, the new air fare scheme is basically a reversion to the pre-ICAP days when all the airlines were "free" to ferry any number of passengers along the "Kangaroo" route, including with stopover in any of the Asean capital.

What then could have prompted Australia as well as Britain to adopt this "sudden reversal" in their stance when the ICAP was introduced with so much trouble and labour?

Firstly, as the leader of the Qantas team to the final talks, Mr Keith Hamilton said the ICAP did not work. Both Qantas and the British Airways found themselves in the red last year even with the ICAP.

And secondly, the Asean airlines, so claimed the British at the Genting Highlands talks, had actually seen an increase in their traffic along the "Kangaroo" route — again despite the ICAP.

Thirdly, according to aviation officials, both Qantas and the British Airways would find themselves in a better position to ask their respective governments for a fare increase under this new set of fares.

Fourthly, there is the other factor of other airlines playing the "Kangaroo" route with even cheaper fares. For example, the KLM has unilaterally lowered its fares resulting in a diversion of travellers from London to Amsterdam to catch the KLM flights to London and vice versa.

Fifthly, there is the domestic and government pressures on Australia and Britain to discard the ICAP.

In this respect, the questions raised were: why should the Asean airlines be the only ones to be penalised when other airlines were dishing out their own low fares, and why should the travellers be limited in their choice of air travel?

All said, the controversy brought about by the ICAP episode is like a bad dream to the Asean airlines, particularly SIA, which brings in a huge chunk of the tourist trade to Singapore from the "Kangaroo" traffic. — Bernama

FIVE-POWER DEFENSE ARRANGEMENT BEING REVITALIZED

Kuala Lumpur NEW SUNDAY TIMES in English 7 Jun 81 p 4

[Text] CANBERRA: The joint military exercises to be staged in the South China Sea and Australia over the next two months will mark a revitalisation of the five-power defence arrangement set up 10 years ago, linking Australia, New Zealand, Britain, Singapore and Malaysia.

But the manoeuvres are also a clear reaction to the Soviet intervention in Afghanistan and the presence of troops from Moscow's ally, Vietnam, in Kampuchea.

Australia sees the two developments as major threats to its own interest and those of non-communist South East Asian States.

The joint operations will be the first under the FPDA. But 20,000 men from the armed forces of the five countries took part in a manouvres code-named "Bersatu Padu" in 1970, the year before the FPDA was set up, marking Britain's decision to withdraw from east of Suez.

Australian Prime Minister Malcolm Fraser said last September the five nations had agreed to a series of exercises.

The move followed a series of military measures initiated by Mr Fraser in reaction to the Soviet action in Afghanistan.

One of these was an increase in combined exercises with Australia's South East Asian neighbours.

Facilities

The revival of FPDA was the first evidence of this, but Australian defence co-operation with other non-communist South East Asian nations has also been considerably boosted over the last year.

The biggest sign of this so far has been a jump in the number of officers from South East Asian states training at Australian military colleges.

In other measures, Australia has granted staging facilities for American B-52 bombers and boosted defence spending by at least A$95 million (M$245 million) in the last year.

It also ran a very successful $3 million advertising campaign which looks like reaching its target of adding 6,000 men to the army reserve in one year instead of five years.

Revitalisation of FPDA seems a response to the link Mr Fraser sees between Soviet actions in Afghanistan and the consolidation of Vietnam's position in Kampuchea.

The latter is the most serious foreign policy concern of Asean to which both Malaysia and Singapore belong.

So, in the words of a Defence Ministry official here, Canberra's initiative over FPDA fell on "receptive ground" in Singapore and Malaysia.

The revival of the quasi-dormant FPDA was also a subtle way of organising joint military exercises without prejudicing the sensitive South East Asian situation with aggressive new military groupings.

This would appeal particularly to Malaysia which is anxious to avoid the appearance of being linked too closely militarily with Western countries, defence analysts said.

FPDA is not a strong military alliance. It's terms merely say that the five nations will consult on appropriate action in the event of an attack on Singapore or Malaysia.

Nevertheless its revitalisation is a way of responding to the dangers created in the region by Vietnam's presence in Kampuchea, according to senior defence officials here.

The joint exercises are seen here as a way of signalling the region's resolve in the face of external threats.

Such threats have come closer to Australia with the establishment of Soviet bases in Vietnam from where air attacks could be launched on this country.

Joint air exercises have been held regularly during the life of FPDA but the first joint naval manoeuvre for 11 years, codenamed "Starfish 81" will take place off the east coast of Malaysia from June 23 to 26. Some 16 ships will take part including two British vessels from Hong Kong.

This will be followed between July 24 and August 5 by the "Platypus 81" land exercise in Shoalwater Bay, Queensland, to be attended by company strength contingents from all five countries.

This will constitute a small, battalion strength exercise but military officers here say that after 11 years the five forces must establish joint operating procedures and communications before the exercises can be expanded.

"These exercises will be conducted on a military training basis not as a public relations exercise. Otherwise there will be a bloody shambles and no-one will learn anything," one Australian officer said.

Mr Fraser has said Australia would like to see at least one significant joint exercise a year and a land manoeuvre in New Zealand and maritime exercise off Singapore have already been lined up for next year. — Reuter.

DRIVE LAUNCHED TO INCREASE JUTE EXPORTS

Kuala Lumpur BUSINESS TIMES in English 1 Jun 81 p 6

[Article by Alamgir Hossain in Dacca]

[Text] BANGLADESH has launched a new export drive for raw jute and its diversified products, the country's principal foreign exchange earner, by setting up five marketing offices overseas.

Manned by high-ranking experts, the offices are located in Nairobi, Melbourne, Brussels, Singapore and Atlanta (USA). More such offices are planned to tap new markets on a global basis.

The drive abroad is backed by several measures taken on the home front to ensure the continued supremacy of Bangladesh as the world's principal supplier of jute and jute goods, in the battle against new rivals and the threat of synthetics.

A new department for market research and exports promotion has been set up at the headquarters, while 73 jute mills in the country are paying more and more attention to developing new varieties of jute products, such as well coverings, union fabrics curtains and multi-colour upholstery furnishings. Many of these products, including jute carpets, have been successfuly marketed abroad.

Another breakthrough is the completion of two ultra-modern ten-loom carpet factories, using jute as the raw material, costing US$20 million and financed by a soft loan from Iraq. Now fully operational, the two factories are expected to earn US$10 million worth of foreign exchange for the country from next year.

To meet this anticipated increased world demand for jute goods, the mills are to reach a new target in production this year, set at 610,000 tons of jute products, up from 510,000 tons of last year.

The new export drive, backed by increased domestic production, comes against the background of a steadily pronounced upturn in the country's jute production as much as in the performance of jute mills.

For years, a variety of problems — ranging from fluctuations in production of raw jute and price for the grower to continual labour unrest in jute mills — cast their shadow over the future of the biggest foreign exchange earner of this populous nation in South Asia. The crisis also threatened the livelihood of an estimate 22.5 million people, or more than 30 per cent of the country's total population who are engaged annually in growing what is known in Bangladesh as the "golden fibre".

The turning point came in 1978 when production of raw jute almost reached the level of 1969-70, the last year when Bangladesh was a part of Pakistan. Despite labour unrest in jute mills, the country exported 512,000 tons of jute goods and earned US$248 million in foreign exchange.

Since then, the upward trend has continued. Last year, the country exported jute goods worth about US$400 million.

Credit for this success primarily goes to Bangladesh Jute Mills Corporation, a semi-government autonomous body set up by the authorities when jute mills and jute export trade were nationalised in January 1972. While the corporation owns 73 mills in the country, the private sector is now also encouraged to move into the jute industry to provide the much-needed competition to the state-run enterprise. This flexibility is regarded as a factor in the changed outlook for the jute industry as a whole.

The jute trade of Bangladesh has certainly regained its position of strength. But it must still reckon with a number of old problems.

One is posed by competition from synthetics.

However, experts here argue that foreign buyers, by and large, recognise that as compared to its synthetic competitors, jute goods are versatile, durable, reusable and free from health hazards. Some developed countres, including Japan and the United States, have put severe restrictions on the use of synthetic bags for packaging food products.

The other threat to Bangladesh jute comes from other jute growing countries, especially India, and from some South-East Asian nations, like Thailand and the Philippines, which produce kenaf and abaca — regarded as minor rivals of jute in certain uses.

To deal with the second problem — the competition from other Asian countries — Bangladesh officials show considerable interest in developing collective marketing strategy with its "rivals" to ensure continued exploration of the global market against both unfavourable fluctuations in export price and the threat of synthetics.

Here, too, one answer lies in setting up a multilateral research organisation to develop new uses of jute and similar raw material like kenaf and copra.

Experts here say that such research could well produce a new kind of plastic produced from jute, to serve as a substitute for wood and other construction materials, even for building vehicle bodies and boats. — Depthnews Special

AGREEMENTS SIGNED WITH SAUDI ARABIA

Jakarta PELITA in Indonesian 21 May 81 pp 1, 8

[Article: "MENLU Mochtar Signs Two Cooperation Agreements with Saudi Arabia"]

[Excerpt] On Tuesday afternoon [19 May] in Riyadh Foreign Minister Dr Mochtar Kusumaatmadja and his counterpart Saudi Foreign Minister Prince Saud al-Feisal signed two cooperation agreements between Indonesia and Saudi Arabia, one covering the economic and technological sector and the other Islamic teaching and science.

The economic agreement states that in an effort to strengthen the closely knit friendly relations and with expectation of obtaining mutual benefits, both sides agree to attempt to increase and strengthen economic and technological cooperation in a spirit of mutual understanding.

The cooperation sectors intended in this agreement cover, among others, support for agricultural project development, animal husbandry, industry, technology; exchange of information linked to science, research, technology; trade in a number of commodities and products; as well as exchange and training of manpower needed to implement these cooperation programs.

The agreement also states that the two sides are attempting to support an increase in economic and technological cooperation among their respective citizens, including those in legal bodies and project development as well as joint ventures in various fields.

The two sides will attempt to support investment and the free movement of capital between the two countries and the exchange of visits by economic and technological experts, delegations, and missions as well as hold exhibitions for the purpose of strengthening cooperation.

Under this agreement the two sides will form a joint committee which will meet alternately in these countries at the request of one of them to discuss ways and means to strengthen and increase economic and technological cooperation.

The agreement just signed by Foreign Minister Mochtar and Foreign Minister Saud al-Feisal is in effect for 3 years and is automatically extended for another year unless one of the two sides informs the other in writing 6 months prior to its termination of the intention to terminate the agreement.

On that occasion Foreign Minister Mochtar conveyed President Suharto's greetings to King Khalid and extended an invitation to the Saudi Arabian chief of state to visit Indonesia.

In this connection, the Saudi Arabian king expressed his appreciation and high esteem for the invitation and asked Foreign Minister Mochtar when it would be best for him to visit Indonesia.

BORDER TALKS HELD WITH VIETNAM

Jakarta SINAR HARAPAN in Indonesian 16 May 81 pp 1, 12

[Article: "RI-Vietnam Border Negotiations To Be Continued in Hanoi"]

[Text] The sixth meeting to establish a continental shelf boundary was held in Jakarta by Indonesian and Vietnamese delegations of experts from 11-16 May. It ended on Saturday [16 May] afternoon with a very brief press release issued. Both sides agreed to recommend to their respective governments that the seventh meeting be held in Hanoi at a mutually convenient time.

The press release said the meeting was held in a friendly and informal atmosphere, underscored by a spirit of cooperation and good will. Both delegations renewed attempts to achieve an agreement.

Some advancement was noted at this meeting compared with earlier meetings but no information was provided on what advancement had been achieved.

The Vietnamese delegation also visited Bali for 2 days (visiting the airfield there, according to information received from a senior official in the Department of Foreign Affairs). This was believed to be important because the Bali Airport is similar to the airport just inaugurated by Indonesia on Natuna Island. The dual-purpose airport, serving both civil and military aircraft, is on an island which lies in Indonesian waters opposite Vietnam and is the closest island to Vietnam.

Some time ago Indonesia entered into an agreement with four foreign contractors to explore for oil offshore Natuna Island.

Mining Minister Soebroto had said this exploration area was located very far from the median boundary line between the two countries.

At the meeting which was still underway when the brief press release was issued, the Indonesian delegation, headed by Zakar Arifin, international agreements director of the Foreign Affairs Department, and two representatives from MIGAS [Oil and Natural Gas Directorate].

The Vietnamese delegation consisted of its head, Nguyen Thuong of the Legal Directorate of the Vietnamese Foreign Ministry, Vice Chairman Ta Ngoc, and one member, Kruong Gia Nhan, an expert from the Vietnamese Foreign Ministry.

STANDARD WEAPON SELECTED BY POLRI

Jakarta SINAR HARAPAN in Indonesian 22 May 81 p 12

[Article: "Clarification of KADISPEN POLRI on the SK Standard Weapon"]

[Excerpts] Police Brig Gen Drs Darmawan, chief of the Information Service for POLRI [Republic of Indonesia Police Force] informed SINAR HARAPAN on Thursday evening [21 May] of the decision by the POLRI chief on standardizing the police weapon. The U.S. carbine is to be used.

He explained that POLRI was now carefully researching various types of the U.S. carbine, including those made by Iver Johnson and Ruger. Tests have been made of both types. Arrangements have been made to use the U.S. carbine, Darmawan said. A final decision to use this weapon was made by the chief of POLRI, and it is to be submitted to the minister for defense and security for approval.

The decision to use this weapon was taken after careful consideration of the fact that the police are accustomed to using this weapon and that it has already been in use for many years.

However, in tests conducted, the U.S. M-1 carbine failed to meet the technical standards. The test of the U.S. Ruger carbine, carried out on 17 May appeared better to meet the requirements.

The "U.S. carbine" is the name given to a long barreled rifle (assault rifle) made and designed in the United States. However, since the outstanding rifle used during the World War II period was the 30-caliber MI carbine, this is what the well-known U.S. carbine has been called popularly since October 1941.

Actually this rifle is also well known as the Garand, and therefore some call it the "M-1 Garand." [as published]

In the past few days, the POLRI chief has also tested the Ruger 5.56-mm carbine made by Sturm Ruger & Co., also of America. This company has produced four types of rifles beginning with the 5.56-mm Ruger Mini-14, the Ruger AC-556, the 5.56-mm Ruger AC-556K, and the 5.56-mm lockless rifle.

This company is still producing these rifles. This rifle can use bullets made for the M-16 A-1, the standard rifle used by the ABRI Raider troops. Ammunition for this rifle is produced domestically by a plant located in Turen Village, Malang.

CUT IN PL 480 FOOD AID DISCUSSED

Jakarta SINAR HARAPAN in Indonesian 21 May 81 pp 1, 12

[Article: "Cut in PL 480 Funds Will Not Affect Food Supplies"]

[Excerpts] Sukrya Atmadja, BULOG [Logistics Bureau] vice chairman, said the cut in food aid under Public Law 480 of the United States Government to Indonesia this year will not affect domestic efforts to supply and stock food.

The cut in the "soft loan" (a loan on soft terms) food aid from the United States was announced for the first time by Dr. Sumarlin, minister for the reform of the state aparatus, after he was received by President Suharto at the Binha Graha on Thursday of last week [14 May]. The cut in funds was submitted by the U.S. government delegation to the 24th annual session of IGGI (Intergovernmental Group on Indonesia] nations held in Amsterdam at the beginning of last week.

Sukrya Atmadja, a member of the Indonesian delegation to the IGGI session, said it was planned to grant Indonesia $20 million in PL 480 funds, a 60 percent drop from last year's figure of $50 million.

The United States grants PL 480 food aid to developing nations, particularly to those nations believed to be experiencing difficulty in obtaining foreign exchange to meet their food requirements. This aid is extended on soft terms (average repayment period is 30 years), with a grace period averaging 8 years (at 2 percent interest) and 3 percent interest during the repayment period.

The BULOG vice chairman said the reduction in PL 480 funds would have no affect whatsoever in view of current food stocks. On 19 May BULOG's food stocks totaled 1.8 million tons equivalent of rice. Meanwhile domestic production accounted for 900,000 tons equivalent of rice as of the same date.

Sukrya Atmadja estimated that as of the end of June food stocks will reach 2 million tons, which is equal to the highest amount stocked by Indonesia in the past year.

For this year (within the framework of ASEAN friendship) Indonesia signed a contract to import 300,000 tons of rice from Thailand, 100,000 tons from Burma, and 30,000 tons from Pakistan (within the framework of IIPECC). The total amount, 450,000 tons, is estimated to arrive during the famine season prior to harvest in July. Shipping was arranged for that period because Indonesia's godowns could not handle it if it were shipped now, the BULOG vice chairman said.

While the cut in PL 480 funds will have little affect on domestic stocks, this aid is still needed in the coming years to ensure the availability of foreign exchange. Moreover the amount of PL 480 funds granted for 1981 is still felt to be too low so an augmentation must be obtained from the U.S. government.

Sukrya Atmadja explained that food aid is only a small item if viewed from the aspect of the composition of funds needed within the IGGI framework, that is, funds needed to support development. However, viewed from the aspect of BULOG interests, these funds are very advantageous "because we can augment our domestic food supplies without direct use of our foreign exchange."

This means we help to save foreign exchange at least while we are still dependent on overseas supplies of additional food. In other words, maximum use can be made of the foreign exchange now accumulated by the government to import goods which aid development and minimal use can be made of these funds to import consumer goods.

In reply to questioning, Sukrya said that even though the food aid is in loan form and must be repaid in yearly installments, and even though it has been offered on soft terms (meaning that is has a grant element), it is advantageous if viewed from the economics aspect. "We buy a certain amount of food at a certain price now, and we repay it 30 years from now. Wouldn't you call that advantageous?" the BULOG vice chairman asked.

Sukrya Atmadja said the cut in PL 480 funds was inherited from President Carter's administration but it also derives from President Reagan's overall economic policy which aims at cutting all budget items except defense.

The cut in PL 480 funds, of course, "was plotted" when the Carter administration was leaving the White House and was submitted to Congress for ratificaiton, to take effect in fiscal 1981-82, beginning next October. The cut in PL 480 funds was not only directed at Indonesia but at all the developing nations that ordinarily received such funds.

In view of this, the BULOG vice chairman said, the Indonesian government will approach persons in Washington who make budgetary decision. We must convince them that more funds are needed to accelerate the rate of development in Indonesia. "Meaning, determining how much the global PL 480 funds will be cut and even indicating the desirability of increasing the share allotted to Indonesia over that planned by Carter," Sukrya Atmadja said.

At the IGGI session in Amsterdam, he had approached the U.S. delegation requesting their assistance in obtaining a larger share of the funds. At that time it appeared that they would respond to our request.

Further, due to subsequent efforts by the government, the impression was gained that the allotment would be increased, due, among other reasons, to the efforts of friends of Indonesia in Washington. These friends had promised they would help Indonesia by "approaching" the "budget cutters" in the United States.

Our devoted friends in Washington indicated they would fight to obtain more than $20 million," the BULOG vice chairman said.

It should be possible to obtain this augmentation, Sukrya Atmadja said, as evidenced by the materialization of PL 480 food aid in 1980 which initially was planned to be eliminated. "As long as we keep fighting and presenting strong reasons for obtaining more funds, there is a good possibility that more funds will be granted."

On being questioned, the BULOG vice chairman replied that PL 480 funds for this year, whether $20 million or more, most likely will be used to buy rice. Various factors must be taken into account including whether Indonesians have "become accustomed" to eating U.S. rice and "whether the U.S. wheat price (C&F) is higher than that for Australian wheat."

Under decisions already taken, nations receiving PL 480 funds alone decided on which commodities to buy. The U.S. government merely allocates the funds and the recipient government buys the commodities it desires, depending on prices in effect on the market.

NATUNA AIRFIELD STRENGTHENS PERIMETER DEFENSES

Kuala Lumpur BUSINESS TIMES in English 3 Jun 81 p 6

[Article by Colin Bickler in Jakarta]

[Text]

INDONESIA has taken another important step in strengthening its perimeter defences by opening a new runway in the remote South China Sea islands of Natuna, opposite Vietnam and Kampuchea.

The move takes on added significance because the surrounding waters are believed rich in oil and gas and a dispute between Vietnam and Indonesia on their exploitation remains to be settled.

Officials point out that contrary to some reports, no new Indonesian base has been built on the island and that there is no build-up of forces in the sensitive region.

The 2,250-metre long Ranai airfield, opened earlier last month by Defence Minister General Mohamed Yusuf, will however allow sophisticated jet combat planes to fly in an out of one of the far-flung archipelago's furthest points.

It should also mean easier access to services for American oil companies prospecting offshore areas for the Indonesian government.

It will reduce the isolation of the Natuna islands' 10,000 scattered people and officials say they will now be able to get relief supplies in quickly to island areas frequently battered by wind driven high waves.

Vietnam has long claimed rights to the waters near the Natuna islands, though not the islands themselves. Fresh talks between officials of the two sides in Jakarta earlier last month failed to resolve a dispute which has dragged on for several years.

Vietnam is also apparently anxious to prospect and exploit the area which geologists believe may have huge desposits of oil and gas and has invited the Soviet Union to help.

American companies have already found some oil and large quantities of gas though there are problems still to be solved in its exploitation, including ways to eliminate some noxious gases that have been found mixed with the natural gas.

The possible eventual presence of both American and Soviet oil prospectors in the area has its own clear security implications.

Indonesian Foreign Minister Mochtar Kusumaatmadja has said that he believes the Vietnamese are willing to compromise on where to draw the ocean boundaries eventually. Until recently both sides were approaching the problem with a conflicting set of principles for drawing the lines.

But some officials are less optimistic than the minister, who told reporters before the last round of talks began, that he believed the matter could be settled in "one or two more sessions."

He also emphasised that talks so far had been strictly technical. Political differences on international and regional issues had not been brought into the discussions.

Vietnam says this is interference in internal affairs and will agree to no more that regional consultations to resolve differences.

While this gap exists, Hanoi's readiness to get an agreement on dividing the South China seabed could be a barometer of the goodwill it seeks to promote, diplomats say.

Indonesian officials believe Jakarta's relations with Vietnam are on a better basis than between Hanoi and other Asean states because both nations fought for their independence from colonial powers. This promoted better understanding of each other's attitudes.

Whether there is better understanding or not, the dispute remains to be settled and the extension of the Natuna islands' runway suggests Jakarta is taking no chances.

New naval facilities are also planned for the area. Like the runway these can be justified by the need to help the civilian population, to protect internal security and to prevent smuggling.

But as one Indonesian newspaper pointed out recently, the Natuna islands, in facing Vietnam and Kampuchea, are a key link in a defence chain that stretches from Sabang in the far northwest of Sumatra to Jayapura, Irian Jaya, in the far southeast. — Reuter

PRELIMINARY TALKS WITH SOUTH KOREA ON LNG PROJECT

Kuala Lumpur BUSINESS TIMES in English 15 Jun 81 p 20

[Text]

JAKARTA, June 14

SOUTH Korea has opened preliminary negotiations with Indonesia for the eventual supply of some three million tonnes a year of liquefied natural gas (LNG) in a project that could cost over US$1.5 billion, South Korean Ambassador Woo Suk Han said yesterday.

The sales would be worth hundreds of millions of dollars annually for Indonesia.

South Korea expects to invest some US$700 million at least in building production units and terminal facilities near Indonesias Arun Field in Sumatra.

A similar amount will be spent on receiving facilities in South Korea, the ambassador said.

Mr Han was giving a Press briefing on the forthcoming visit beginning in Jakarta on June 25 of South Korean President Chun Doo-Hwan at the start of a tour of the Association of South-East Asian Nations (Asean).

He said it was hoped that the first LNG train (production unit) built by and for South Korea will be operational by 1985, with a capacity of 1.5 million tonnes a year, followed by a second train of similar capacity to be operational three years later.

South Korea would use most of the gas for power generation, but a small amount would also be used for city domestic supply, Mr Han said

Contract and tender details have still to be worked out and it is unlikely that final agreement will be reached until some time after President Chun's visit here.

This will be the second and biggest arrangement on energy between South Korea and Indonesia.

Last month the Kodeco (Korean Development Company) Energy Company signed an agreement with Indonesia's state-owned Pertamina Oil Company to explore and exploit potential oil fields offshore in West Madura at a minimum investment of between US$30 million and $40 million.

At present Indonesia's biggest LNG customer is Japan, which last year took some seven million tonnes, worth around $2 billion to Indonesia.

Under new contracts signed with several Japanese companies this year, this will double and possibly treble the value and volume from the mid 1980s.

The Korean participation will also considerably increase its investment in Indonesia, at present some US$45 million with a further $47 million approved, the ambassador said.

About $17 million of the investment is in logging, an area of some problem since Indonesia is banning log exports and demanding that foreign companies process timber in Indonesia for export.

Mr Han said two Korean companies had already begun plywood manufacture and some of the other five are taking steps to do so.

This is a topic that is expected to figure in the talks that President Chun and his Economic, Foreign Affairs and Defence Ministers will have here during their five-day stay. — Reuter

PT TIMAH TO MAINTAIN TIN PRODUCTION WITH PRICE DROP

Jakarta HARIAN UMUM AB in Indonesian 21 May 81 pp 1, 8

[Article: "DIRUT PT Timah Tells DPR Commission VI Drop in Tin Price Will Not Affect Production Targeted at 23,800 Metric Tons"]

[Excerpts] Although PT Timah's 1981 income is estimated to fall by 13 percent compared with that of 1980 because of the continuing decline in the price of tin on the international market, PT Timah will try to meet its original production target of 23,800 metric tons.

In the exchange of views with Parliamentary Commission VI yesturday [20 May] in Senayan, Rachman Ramli, PT Timah executive director, said further that PT Timah will make internal adjustments to maintain its initial work schedules. For instance, expenditures will be restricted, efficiency will be increased, limitations will be placed on any extraordinary activities but those closely connected with production will not be postponed and any drain on PT Timah [resources] will be countered to the extent possible.

According to Ramli, the highest price for tin recorded in Penang in 1980 was 16,387 per metric ton; the price has now dropped to $12,500 per metric ton. The price is estimated to rise only to $13,000 per metric ton in 1981.

At the current price level, PT Timah income is estimated to be 207 billion rupiah, a drop of 74 billion rupiah compared to the 1980 income. A profit of 55 billion was estimated in PT Timah's 1980 budget if the price of tin was $14,500 per metric ton. However, with a price of $13,000 per metric ton, the profit will drop to 32 billion rupiah.

Although the price has reached a very low level and forces PT Timah to tighten up its operations, Ramli said PT Timah will not introduce any policies that will bring hardship to the workers such as wage cuts, reduced bonuses, or limited vacation pay.

Speaking about the lack of success in arriving at a formula for the sixth International Tin Agreement (ITA) despite the fact that negotiations have been held three times on the matter, Ramli noted that the failure was due to the inflexible stance of advanced nations such as the United States, Germany, and Britain.

Originally the United States intended to radically reorganize the existing ITA concept by introducing new elements, namely, it did not want to accept the principle of limiting exports as one of the mechanisms for stabilizing the price, huge bufferstocks (70,000 metric tons), and the application of a reference price.

In regard to the sixth ITA, the government had established the policy that all efforts would be made to achieve a sixth ITA even though, Ramli said, "We can only accept a tin agreement that functions for and is of benefit to Indonesia in particular and to tin producers in general."

The director admitted that if a sixth ITA cannot be achieved, it will mean the end of the International Tin Agreement which has been in effect for 25 years. This would be a bad example, for to date the International Tin Agreement has been considered a good model for organizing international agreements for a number of commodities.

BOOKS BANNED--Attorney General Ismail Saleh, under Decision no Kep 052/JA/5/1981, banned the circulation in Indonesia of two books written by Pramudya Ananta Toer, entitled "Bumi Manusia" [World of Man] and "Anak Semua Bangsa" [Child of All People], effective 29 May 1981. Anyone storing, owning, and selling these books is obligated to turn them over to the chief public prosecutor or chief of the local office of the public prosecutor, for forwarding to the Indonesian attorney general. The decision which bans the circulation of the books published by PT Hasta Mitra and printed by "Ampat Lima," both in Jakarta, states that the "contents create certain reactions in various social circles and have affected public security and order." It was also stated that when the contents of the two books "were scrupulously studied," it was apparent that with the skillful and flowing use of his pen, the author subtly and under the cloak of historical data was able to introduce "Marxist-Leninist theory." The contents of the books were considered clearly to conflict with MPRS Regulation No XXV/MPRS/1966, dated 5 July 1966, on the abolition of the Indonesian Communist Party, declaration of the Indonesian Communist Party as an organization banned in all regions of the Republic of Indonesia. DJUARSA ON IMRAN--M. Ishak Djuarsa, who had been in contact with Imran, the leader of the plot to hijack the Garuda aircraft some time ago, said he met with Imran because he was interested in a business connection with a Saudi Arabian company. In his letter to this daily newspaper, the veteran major general added that he had not met with Imran after 1979. Moreover, "I felt there no longer was any hope whatsoever of concluding a business arrangement with the Arab world." Ishak Djuarsa's letter in full follows: "1) Imran came to visit me at my home at the end of 1979 and introduced himself as a representative of Saudi Arabian company and carried a letter of introduction from the company concerned. 2) At that time I had just gone through the MPP period and was studying to enter the business world. 3) Imran came to my house several times and, of course, we talked about the struggle, but I never took this seriously because I was more interested in contacting the Arab world. 4) Imran did not meet with me after 1979, and there was no more contact with him. Moreover, I felt there no longer was any hope whatsoever of concluding a business arrangement with the Arab world. 5) I was very surprised when Imran reappeared suddenly in 1981 at the time of the Garuda hijacking when my address was used as the address of the branch office of the Imran Revolutionary Council. I have no knowledge whatsoever as to why it was used and, moreover, I never authorized its use." [Text] [Jakarta MERDEKA in Indonesian 18 May 81 pp 1, 8] 6804

VARIOUS DISTRICTS REBUILD AFTER LIBERATION

Leach District

BK070646 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 6 Jul 81

[Text] After invading and occupying Leach District, Pursat Province, the Vietnamese enemy began to massacre our people by using all types of weapons, spraying poisonous chemicals, firing toxic gas shells and looting and destroying the property, houses, cattle and crops of the people in order to create famine to starve them to death.

After the liberation of their villages and communes from the evil claws of the Vietnamese enemy aggressors, our people in Leach District, assisted by our army and guerrillas, have strived to rebuild their villages, houses and farmland and prepared the fields and seed for production. They have pledged to jointly fight in all available forms against the Vietnamese enemy aggressors for national salvation.

In this year's rainy season, despite uncountable obstacles and difficulties caused by the Vietnamese war of destruction, our people have held aloft the combative banner and helped each other in the production for self-consumption. Various kinds of crops, such as rice, corn, potatoes, beans, cucumbers, pumpkins and various other vegetables, are growing well in the fields and around the people's houses. Our people are striving to increase production and take care of their crops by weeding out the undergrowth and preventing wild animals and insects from destroying their crops.

The brothers and sisters pledge that they would protect this year's crops from being looted and destroyed by the Vietnamese enemy as it did last year.

Samlot District

BK120840 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 11 Jul 81

[Text] The soil in Samlot District, Battambang Province, is very fertile and is good for growing all kinds of crops, particularly fruits, such as durian, potato-fruit, rambutan, mangos, oranges, coconuts, jack-fruit, bananas and pineapple.

During their invasion of Samlot District, the Vietnamese aggressors massacred our people, young and old alike, even babies in cradle, in a most cruel and barbarous manner. At the same time, the Vietnamese aggressors looted the property, rice and seeds of our people and destroyed and burned their houses, villages and all kinds of crops in an attempt to starve them in accordance with their policy of genocide. However, the people of Samlot District, who have a tradition of struggling valiantly since time immemorial, would not stand idle nor allow themselves to be starved to death as the Vietnamese enemy wished. They fought in close unity with our Democratic Kampuchean army and guerrillas to drive out the Vietnamese criminals from their district.

After driving all the Vietnamese aggressors out of their district and villages, our people in Samlot District, assisted in all aspects by our Democratic Kampuchean Government, have helped each other in reclaiming the ricefields and land destroyed by the Vietnamese enemy in order to grow rice, corn, beans, cassava, sesame, bananas and various other vegetables for consumption and to improve their strength so that they can fight more vigorously against the Vietnamese enemy. At the same time, they have gradually rebuilt their houses and villages.

The brothers and sisters pledge to increase production vigorously and to improve their strength and health so that they can help fight the Vietnamese enemy in all forms available, thus contributing to the rapid liberation of the entire Kampuchean nation and people.

Svay Leu District

BK150300 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 14 Jul 81

[Text] Our soldiers and guerrillas in Svay Leu District, Siem Reap Province, just as others throughout the country, are children of the people of all nationalities. They have endured all the difficulties of our struggle filled with its twists and turns, valiantly and courageously shared the people's weal and woe, and constantly demonstrated their determination. Now at this difficult time they continue to live with the people sharing their difficulties to fight against the Vietnamese Le Duan aggressors.

In Svay Leu District, Siem Reap Province, amid the people's untold plight--extreme suffering, separation from relatives, and lack of shelter, food, clothing, medicine and other things caused by the Vietnamese devastating war--the Democratic Kampuchean army and guerrillas are committed to defending their lives and wholeheartedly solving their problems. Following the liberation of the villages and communes in the district, and the salvation of the people's life from the monstrous claws of the Vietnamese enemy, our soldiers and guerrillas have helped to revive villages and to steadily repair and rebuild wrecked houses. They have provided necessary tools and seeds to allow the people to work and restore their badly affected health. In the areas temporarily controlled by the Vietnamese enemy, whenever they encounter hungry and suffering people, our guerrillas sacrifice their rations for them and even give them their clothes and scarves. These gestures have induced the people in the district to feel confident in the Democratic Kampuchean army and guerrillas and consider them as their trusty supporters. Our people have also pledged to support them in return, and have closely contributed to struggling with our army and guerrillas against the Vietnamese aggressors, expansionists, annexationists and race exterminators until the final victory.

'VODK' REPORTS ON VARIOUS BATTLEFIELD SUCCESSES

Battambang Province

BK140830 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 13 Jul 81

[Excerpt] In June, our comrades in arms on the sisophon-south of Route 5-Mongkolborei-Bavel battlefield in Battambang Province killed 436 Vietnamese aggressors troops and wounded 557 others, for a total of 993 casualties.

We destroyed a ten-wheel truck, a C-25 radio, a 12.7-mm machinegun, an M-30, an RPD, an M-79, 2 B-40's, 19 AK's, 57 barracks, 29 trenches and a quantity of other materiel. We seized a 60-mm mortar, a 12.7-mm machinegun, a Goryunov, an RPD, an M-79, 4 B-40's and B-41's, 15 AK's, 20 M-79 grenades, 27 B-40 and B-41 rockets, 10 crates of AK ammunition, 5 cartridge magazines, 12 Soviet landmines, 9 grenades and a quantity of other materiel. We cut 260 meters of telephone line.

Compared with the monthly plan to inflict 800 casualties on the Vietnamese enemy troops, our comrades in arms achieved more than 124 percent--24 percent more than planned.

Concerning the smashing and liberation of enemy positions, our comrades in arms destroyed two independent Vietnamese positions--one platoon-sized and one battalion-sized position. They liberated and occupied two independent Vietnamese positions--a battalion-sized and a regiment-sized position. We smashed and routed two Vietnamese attacks--a platoon and a battalion assaults.

Concerning the production of primitive weapons, we made and planted 191,000 new spikes, dug 120 new punji pitfalls and set 180 new automatic bows.

FULRO Successes

BK140736 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 13 Jul 81

[Text] The (Bigiar)-FULRO [United Front for the Liberation of Oppressed Races] guerrillas have actively and vigorously stepped up their attacks against the Le Duan Vietnamese enemy, inflicting constant losses on them and gradually gaining strength.

The Cong Tum battlefield:

On 2 September 1980, the (Bigiar)-FULRO guerrillas ambushed Vietnamese vehicles on Route 14 between Dak To and Cong Tum. They seized 9 AK's, an M-79, 3 M-16's and 1,000 dong.

On the same day, they ambushed Vietnamese vehicles on Route 14 between Cong Tum and Pleiku, destroying two jeeps, killing four Vietnamese enemies and wounding four others. They seized 3 pistols, 3 AK's, 1,000 dong and a suitcase.

Also on the same day, they ambushed Vietnamese vehicles moving from (Be) Village to Cong Tum, destroying a jeep, killing three enemies and wounding four others. They seized three AK's and a crate of TNT powder.

On the same day, the (Bigiar)-FULRO guerrillas attacked two Vietnamese positions in (Cong Loi Sai Na) and (Ton Mang Lang) in Cong Tum Province, killing four enemies and wounding nine others. They destroyed two houses of Vietnamese commanders, a storehouse, three radios and a typewriter. They seized three AK's.

On 5 and 6 September 1980, they ambushed Vietnamese enemies on the route out of (Plei Kleng) and attacked an emeny position at (Plei Sa), killing six and wounding eight others. They destroyed a rice storehouse and seized an AK, three CKC's and an M-79.

In sum, during these 3 days the (Bigiar)-FULRO guerrillas on the Cong Tum battlefield inflicted 60 casualties on the Vietnamese Le Duan enemies, destroyed 4 vehicles, 2 houses of commanders, a storehouse and a rice warehouse. They seized 19 AK's, 3 pistols, 2 M-79's, 3 M-16's, 3 CKC's, a crate of TNT powder and a quantity of other materiel.

Pleiku Successes

BK150622 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 14 Jul 81

[Text] The (Bigiar)-FULRO guerrillas have actively and vigorously stepped up their attacks against the Le Duan Vietnamese enemy, inflicting constant losses on them and gradually expanding the areas of their activities.

The Pleiku battlefield:

On 2 September 1980, the (Bigiar)-FULRO guerrillas ambushed the Vietnamese enemies when they attacked (O Leav), killing one and wounding four others. They seized an AK.

On 20 and 21 September 1980, they ambushed Vietnamese vehicles moving from Cheo Reo to Pleiku, and attacked a Vietnamese position in Pleiku. They ambushed some Vietnamese vehicles moving from (An Tho) to Pleiku. During these operations they killed 10 enemies and wounded 13 others. They destroyed a jeep and two commanders' houses. They seized two pistols, five AK's and a radio receiver.

On 23 and 25 September 1980, the (Bigiar)-FULRO guerrillas ambushed Vietnamese troops moving from (O Yiem) to Cheo Reo and from (Phu Vien) to Pleiku, killing four enemies and wounding seven others. They seized five AK's.

In sum, during these 5 days the (Bigiar)-FULRO guerrillas on the Pleiku battlefield inflicted 39 casualties on the Vietnamese Le Duan enemies, and destroyed a jeep and 2 commanders' houses. They seized 2 pistols, 11 AK's and a radio receiver.

FURTHER ON MESSAGE ON POLAND'S ANNIVERSARY

BK290355 Phnom Penh Domestic Service in Cambodian 1100 GMT 27 Jul 81

[Text] Comrade Heng Samrin, chairman of the Council of State, and comrade Pen Sovan, general secretary of the KPRP Central Committee and chairman of the Council of Ministers have recently sent a message greeting comrade Henryk Jablonski, chairman of the Polish Council of State, and comrade Wojciech Jaruzelski on the occasion of the 37th anniversary of Poland's rebirth.

The message reads:

We are extremely elated to extend to you and the Polish people most warm felicitations on the occasion of the 37th anniversary commemorating the rebirth of Poland. We are firmly confident that the 9th extraordinary congress of the Polish United Workers Party will bring about significant solution for the future of the Polish people, give an impetus to the Polish economy and effectively counter the maneuvers to undermine socialism by the counterrevolutionaries, who are organized by the imperialists.

We are strongly confident that the fraternal bonds of friendship and cooperation between our two countries and peoples will vigorously develop on the basis of proletarian internationalism for the benefit of peace and the socialist community.

We wish you good health and more successes in fulfilling your lofty mission.

BRIEFS

KAMPOT TREE PLANTING CEREMONY--On 15 June 1981 a tree planting ceremony was held at (Boeng Ta Pream) school in Traeuy Kaoh Commune, Kampot District, Kampot Province, to mark the anniversary of the KPRAF. Present on that occasion were Koy Luon, Kampot provincial party committee secretary; (Im Chira), provincial military commander; (Mao Chun), chairman of the Traeuy Kaoh commune people's revolutionary committee; as well as many cadres, combatants, people and teachers. (Mao Chun) and (Im Chira) gave speeches in which they stressed the struggle of the army in defending the country. [Phnom Penh Domestic Service in Cambodian 0400 GMT 26 Jun 81]

KAMPOT POLITICAL COURSE--On 15 June 1981 the first phase of the third political course was opened for 130 trainees at the Kampot Political Orientation School. Present on that occasion were Koy Luon, provincial party committee secretary; Hang Samoeun, chairman of the provincial people's revolutionary committee; as well as many cadres representing different offices in the province. Hang Samoeun and Koy Luon presented their speeches in which they hailed the KPRP and the KPRAF in their struggle to liberate the country from the genocidal Pol Pot-Ieng Sary-Khieu Samphan clique. [Phnom Penh Domestic Service in Cambodian 0400 GMT 27 Jun 81]

VIETNAMESE SELLING POISONOUS MEDICINE--In order to further massacre and exterminate the Kampuchean people, the Vietnamese aggressors in Phnom Penh are selling medicine mixed with poison to the people. For example, on 25 June some of our people in Kbal Thnal were sick after taking medicine bought from the Vietnamese aggressors. After the people asked them why they were selling medicine mixed with poison, the Vietnamese aggressors threatened the people and told them not to complain about this matter. In this connection, we call on our people in Phnom Penh and other areas under the temporary control of the Vietnamese enemy to be careful. You should not use anything produced or sold by the Vietnamese because you might be poisoned by it. The Vietnamese are very cruel and barbarous. They are only looking for an opportunity to massacre our Kampuchean people in accordance with their genocidal policy so they can plunder and annex our territory as they did in Champa City and our Kampuchea Kraom territory. [Text] [BK031135 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 1 Jul 81]

CAVALRY'S BATTALION 86--The cavalry's battalion 86 has just summed up its emulation drive to mark the 30th anniversary of the KPRAF. Thanks to good training and because of their determination to carry on the glorious revolutionary struggle

tradition of the Issarak army, the battalion's cadres and combatants have achieved excellent results in learning combat theory and performing drills. The second company obtained 80 percent marks, the first company 75 percent and the third company 73 percent in night shooting practice on the tank-mounted K53 guns. So far, the battalion's cadres and combatants have proved to be skillful in operating the TO-model tanks and have grasped the technical aspects and tactical use of various types of tanks. They have also engaged in production efforts by planting 445 banana trees, 1 ha of green beans, 85 coconut trees, 10 mango trees and 400 beds of vegetables and raising 8 pigs and dozens of chickens. [BK111341 Phnom Penh Domestic Service in Cambodian 1200 GMT 4 Jul 81]

KOH KONG-KOMPONG SOM BATTLE REPORT--Last June, our comrades in arms on the Koh Kong-Kompong Som battlefield killed 331 Vietnamese aggressors and wounded 298 others for a total of 629 losses. Among the killed were 3 lieutenants and a platoon commander. We destroyed a pistol, 2 DK-82's, a 60-mm mortar, a 12.7-mm machine gun, an M-30 machine gun, 8 B-40's, 3 M-79's, 51 AK's, 4 trucks, 3 boats, 7 barracks, 3 trenches, 5 telephones and a quantity of materiel. We seized 5 AK's, 3 crates of AK ammunition and 37 A-2 land mines. We cut 500 meters of telephone wire and seized a quantity of materiel. We attacked and liberated 4 independent Vietnamese positions--one of platoon size, two of company size and one of battalion size--and routed 5 Vietnamese operations--four by platoons and one by a company. Concerning the production of primitive weapons, we made and planted 65,000 punji stakes, dug 120 punji pitfalls and set 100 new snares and 95 new automatic bows. [Excerpt] [BK100818 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 9 Jul 81]

WESTERN LEACH DISTRICT BATTLE FIGURES--Last June, our comrades in arms on the Western Leach District battlefield put 835 SRV troops out of action. We destroyed a B-40, a Goryunov gun, nine AK's, five military barracks and a trench. We seized an AK, 10 A-2 landmines, 1,970 m of telephone cable and a quantity of other materiel. We raided and liberated four independent Vietnamese positions which included a platoon-sized position and three company-sized positions. Concerning the production of primitive weapons, we made and planted 154,000 new spikes, dug 9,800 punji pitfalls, and set 100 snares and 500 automatic bows. [Excerpt] [BK110617 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 10 Jul 81]

SAMLOT BATTLEFIELD REPORT--Last June, our comrades in arms on the Samlot battlefield in Battambang Province killed 385 Vietnamese aggressor troops and wounded 429 others--a total of 814 enemy casualties. They destroyed an 82-mm mortar, an M-30, 4 AK's, an ammunition depot, 16 military barracks, 7 trenches and a quantity of war materiel. They also seized an AK, 500 AK rounds, 200 meters of telephone cable and various other items. Compared with the 800-enemy-loss-a-month-plan, our comrades in arms fulfilled 101.75 percent of the target, overfulfilling the plan by almost 2 percent. Our comrades in arms also routed a platoon-strong Vietnamese intervention unit. With regard to the production of primitive weapons, our comrades in arms made and planted 750,000 new punji stakes, dug 190 punji pitfalls and set 100 automatic bows. [Excerpt] [BK120834 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 11 Jul 81]

BATTAMBANG BATTLEFIELDS REPORT--In June, our comrades in arms on Route 10, Pailin battlefield, killed 355 Vietnamese troops and wounded 360 others, for a total of 715 casualties. Among those killed were three company commander lieutenants and two platoon commanders. We destroyed a pistol, a B-40, an M-79, 9 AK's, 10 barracks, 5 trenches and a quantity of other materiel. We seized a 60-mm mortar, 14 AK's, 630 rounds of AK ammunition and a quantity of other materiel. We cut 1,500 meters of telephone wires. Compared with the monthly plan to inflict 700 casualties on the Vietnamese enemy troops, our comrades in arms achieved 102.14 percent--2 percent more than planned. We smashed and routed a platoon intervention force. Concerning the production of primitive weapons, we made and planted 770,000 new spikes, dug 180 new punji pitfalls and set 260 new automatic bows. [Excerpt] [BK130801 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 13 Jul 81]

ROADS CUT--On 2 July our army and guerrillas attacked and cut a 2-km portion of the road leading from Samlot to Treng, Samlot District, Battambang Province. They took control of this road portion and are continuing to attack and cut more portions of it. Long live our valiant and courageous army, guerrillas and people on the Samlot District battlefield in Battambang Province! [Text] [BK140826 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 13 Jul 81]

BATTLE ACTION REPORTS--On 6 July our army and guerrillas attacked and cut two bridges between Treas Village and Thmar Puok. The first bridge was 25 meters long and the second 9 meters long. On 7 July our guerrillas attacked and cut a 6 meter-bridge between Svay Chek and Treas Villages, and ambushed Vietnamese enemies moving from Bek Chan to Khvav on the sisophon-north of Route 5-Thmar Puok battlefield. The Vietnamese soldiers fell into our ambush only 100 meters from Bek Chan. Three of them were killed and five others wounded, for a total of eight casualties. We destroyed 3 AK's and a B-40. In sum we inflicted eight Vietnamese casualties, destroyed three AK's, a B-40 and cut three bridges with a total length of 38 meters [figure as heard]. Long live our valiant army, guerrillas and people of the sisophon-north of Route 5-Thmar Puok battlefield! [Text] [BK140310 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 13 Jul 81]

SISOPHON BATTLE FIGURES--In June, our comrades in arms on the battlefield of sisophon-north of Route 5--which includes Thmar Puok, Phnum Srok and Preah Net Preah--killed 354 Vietnamese aggressor troops and wounded 372 others, for a total of 726. We destroyed a T-54 tank, a 10-wheel truck, a Goryunov gun, a B-40, eight AK's, four military barracks, three trenches and a quantity of military materiel. We seized 10 DK-82 rounds, 20 82-mm mortar shells, 20 60-mm mortar shells, 4,700 rounds of AK ammunition and a quantity of other materiel. Compared with the 700-casualty target for the month, we achieved 103.71 percent or almost 4 percent above the plan. As for the routing of positions and crushing of suppressive drives, we destroyed an independent company-sized position and crushed three suppressive drives--twice of [words indistinct] and once for a company. Concerning the production of primitive weapons, we made and planted 137,000 new spikes, dug 210 punji pitfalls and set 190 automatic bows. [Excerpt] [BK150236 (Clandestine) Voice of Democratic Kampuchea in Cambodian to Kampuchea 2330 GMT 14 Jul 81]

HENG SAMRIN RECEIVES THANKS--On 10 July, Comrade Samora Moises Machel, president of the People's Republic of Mozambique, sent a message thanking Comrade Heng Samrin, chairman of the PRK Council of State. The message reads: On behalf of the Frelimo party, the Government of the People's Republic of Mozambique and in my own name, I extend my most sincere thanks to you for your warm greeting on the occasion of the 19th anniversary of the founding of the Frelimo party on 25 June 1981 and on the occasion of the 6th anniversary of the People's Republic of Mozambique. I take this opportunity to affirm my firm confidence that the good relations and cooperation between our two countries will contirbute to promoting our mutual prosperity of our two countries. [Text] [BK191007 Phnom Penh Domestic Service in Cambodian 1230 GMT 18 Jul 81]

USSR HEADS GREET HENG SAMRIN, PEN SOVAN--Phnom Penh, 13 Jul (SPK)--The leaders of the USSR have sent their congratulations to Heng Samrin and Pen Sovan on the occasion of the latter's elections respectively to the posts of chairmen of the Council of State and Council of Ministers of the PRK. In their messages, Leonid Brezhnev, chairman of the Supreme Soviet Presidium, and Nikolay Tikhonov, chairman of the Council of Ministers of the USSR, pointed out that the completion of the process to establish the Kampuchean state structure marked an important stage in the strengthening of the people's power, the vital force of the new regime. It also marked the successful development of independent Kampuchea under the leadership of the KPRP, the vanguard of Kampuchean society. The Soviet leaders expressed their conviction that the cooperation and friendship between the Soviet Union and the PRK, based on the unalterable principles of Marxism-Leninism and proletarian internationalism, will be developed and strengthened for the good of the two peoples and in the interest of peace and security in southeast Asia and the world. CULTIVABLE ACREAGE STATISTICS, COOPERATIVIZATION OF FARM LAND

[The following information was extracted from Vientiane publications SIANG PASASON [SP], VIENTIANE MAI [VM], KHAOSAN PATHET LAO [KPL] as indicated. The remarks include a brief summary of the salient information available in the news item.]

Location	Remarks
Paksan District, Vientiane Province	5,625 hectares of rice fields, 50 percent plowing completed (SP 25 Jun 81 p 2)
Saithani District, Vientiane Province	16,400 hectares of rice fields. District Administrative Committee Chairman in charge of promoting production (SP25 Jun 81 p 2)
Oudomsai Province	Has 9,712 hectares of wet rice fields of which more than 8,000 are in cooperatives (SP 1 Jul 81 p 2)
Ngoi District, Luang Prabang Province	One cooperative established with 47 families, land area not given (KPL 1 Jul 81 p A 3)
Nga District, Oudomsai Province	One cooperative set up with 72 families, 27 hectares of rice fields. Oudomsai Province now has 93 agricultural cooperatives (SP 30 Jun 81 p 1)
Kasi District, Vientiane Province	50 percent of the plowing finished, on total of 4,750 hectares of rice paddies. Labor exchange teams basic form of labor; some localities have gone to complete agricultural cooperatives (VM 30 Jun 81 p 1)
Phon Hong District, Vientiane Province	9,000 hectares of paddy rice to be planted this season according to plans (SP 29 Jun 81 p 2)
Phon Hong District, Vientiane Province	80 percent of paddy area transplantation completed (VM 29 Jun 81 p 1)
Champhon District, Savannakhet Province	Sowing of rice paddies 95 percent complete with more than 700 tons of seed (KPL 25 Jun 81 p A4)

Saithani District, Vientiane Province	Another six cooperative units established, involving 159 families, 199.8 hectares of paddy fields (SP 8 Jun 81 p 1)
Sam Tai District, Houa Phan Province	During this production season two cooperatives formed with 62 families, 450 people, 20 hectares of rice paddies (KPL 3 Jul 81 p A 1)
Luang Prabang District, Luang Prabang Province	More than 3,000 hectares of rice sown with more than 100 tons of seed (KPL 3 Jul 81 p A 2)
Chanthabouli District, Vientiane Province	More than 50 percent of the 656 hectares of rice paddies transplanted (VM 4 Jul 81 p 1)
Saisettha District, Vientiane Province	Plowing completed on 417 hectares of paddies and the transplanting is finished on 95 percent of the lowland, 70 percent on the higher land (VM 4 Jul 81 p 1)
Pathoumphon District, Champassak Province	Recently three more cooperatives formed with total of 124 families (KPL 4 Jul 81 p 4)
Thoulakhom District, Vientiane Province	Transplantation completed on 75 percent of 4,057 hectares of rice paddies (VM 7 Jul 81 p 1). District has total of 5,501 hectares of rice fields plus 1,921 hectares of upland fields (SP 8 Jul 81 p 2)
Saithani District, Vientiane Province	Completed transplanting on 1,067 hectares of a total of 14,198 hectares of rice paddies (VM9 Jul 81 pp 1, 2)
Champassak District, Champassak Province	During this production season, another 36 cooperatives have been set up. They include 2,220 hectares of rice paddies, 4,342 members, 870 draft animals (KPL 9 Jul 81 p A1)
Sikhottabong District, Vientiane Province	Transplantation, begun in June 1981, is now 65 percent complete out of a total rice paddy area of 19,860 hectares (VM 10 Jul 81 p 1)
Sanasomboun, Champassak Districts, Champassak Province	Completed transplantation of more than 11,000 hectares of rice paddies. This is 46 percent of the total. Sanasomboun District has transplanted 60 percent of its 13,113 hectares (KPL 13 Jul 81 p A4)
Nga District, Oudomsai Province	During this production season, another cooperative has been established with 65 families, 37 hectares and 63 draft animals (KPL 13 Jul 81 p A 5)

HOME MINISTER SEES PRC, USSR AS EQUALLY DIABOLICAL FORCES

Kuala Lumpur BUSINESS TIMES in English 3 Jun 81 p 20

[Text]

NOTING the Chinese communist threat to Malaysia and its neighbours, the Home Affairs Minister yesterday warned the free world leaders against making China "the sole restraining hand" against the Soviet Union in safeguarding South-East Asia's freedom.

For the United States and other world powers to fall for the Chinese ploy, Tan Sri Ghazali Shafie said, would be "letting the fox among the chickens" and a cause for despair in this region.

Speaking on the possible sources of insecurity during the Fourth Malaysia Plan at a business opportunities seminar in Kuala Lumpur, the Minister reminded the audience that China is dedicated to establishing a Marxist-Leninist proletarian dictatorship spiced by Mao Zedong's thoughts under the leadership of the Chinese Communist Party.

Any interactions with the outside world will continue to be regulated by the political system in spite of Mr Deng Xiaopeng's new "economics in command" motto, he argued.

"The only converging interest which the US and the West have with China is the Soviet factor," he stressed.

Admitting the "overwhleming" importance of this factor, he nevertheless hoped it would not be so blinding as to cause miscalculations over the true aims of China's hegemonism "and future unpredictable changes in China's policies."

In this light he said the transfer (by the US) of military equipment and high technology to China may be desirable "but it will have to be done with prudence without fostering a security threat to friends and allies (of the free world) in this region."

He pointed out that in dealing with the Communist powers, the US had obviously learnt a number of bitter lessons particularly over the period of the so-called detente "when among other things the assembly line for sophisticated diesel engines was shipped to the Kama River plant which produced the trucks and perhaps the tanks that recently rolled into Afghanistan."

Turning to the activities of Russia as another external source of insecurity in Malaysia and South-East Asia, Tan Sri Ghazali said like China, the Soviets too have their potential assets "ready-made for conspiratorial exploitation with their specialised methods for deception, disinformation, manipulation and penetration".

"The Soviets cannot be expected to sit idly while the Chinese Communist Party with its "sweet and sour fish" policy is making efforts at building its strength and influence in the region," he warned.

He continued: "Because of our awareness of the dangers to national security (posed by these) equally diabolical forces committed to the destruction of our free enterprise way of life, the government (despite its major successes) could never be complacent.

Tan Sri Ghazali added that together with such precautions, Malaysia has need for the best in the conduct as well as the substance of its foreign policy such as Zopfan (zone for peace, freedom and neutrality) and the Suharto-Hussein Kuantan declaration.

On threats from within the country, he outlined these in terms of overt as well as covert Communist activities, the extremist groups, dadah or drug addiction, crime and the isolated outbreaks of "the lunatic fringe" like the desecration of the Hindu temple at Kerling and the attack by Muslim extremists on a police station in Batu Pahat.

He gave the assurance there were no internal factors which should give rise to concern or feelings of insecurity during the period of the Fourth Malaysia Plan.

NO JOINT MILITARY OPERATIONS AGAINST MUSLIM REBELS IN THAILAND

Kuala Lumpur BUSINESS TIMES in English 15 Jun 81 p 6

[Article by Thaung Myine in Bangkok]

[Text] RECENT high-level meetings between Thai and Malaysian officials appear to have removed suspicions between the two neighbours on the prickly issue of minority Thai Muslims who had been fleeing across the border into Malaysia.

Two small groups of Muslims returned home over the weekend from the Malaysian frontier district of Kroh following a border meeting between Thai Prime Minister Prem Tinsulanonda and Malaysian Inspector-General of Police Tan Sri Haniff Omar.

Thai officials said later that more such groups would return to their homes soon.

Some 2,000 Thai Muslims fled to Malaysia last April to escape from frequent clashes between Muslim separatist rebels of the Pattani United Liberation Organisation (Pulo) and mainly ethnic Chinese guerillas of the Communist Party of Malaya (CPM) in Thailand's Betong salient.

The Muslim refugees also said they had been harassed by some Thai local officials who suspected them of supporting Pulo rebels who want a separate Muslim state in the border area.

Insistence of the Muslims that their safety be guaranteed by Thai authorities on their return home held up the repatriation until General Prem's visit to Betong and his meeting with the Malaysian police chief.

General Prem later told reporters that the problems in border provinces affecting both Thailand and Malaysia were caused by long-standing racial animosity between ethnic Chinese and Thai Muslims and by the activities of CPM guerillas and Muslim rebels.

He also acknowledged that the Muslims had been harassed by some Thai officials and promised to see that the officials changed their ways.

Thailand's population of 47 million is predominatly Buddhist. Its 4.5 million Muslims live mostly in southern Thailand in an area which was once a Malay sultanate.

General Prem expressed the hope that his trip to Betong might make the Malaysian government focus more attention on these problems in Thailand's border provinces.

He said that if left unresolved, the Muslim issue would lead to ethnic and religious polarisation in Thailand and also cause friction with Malaysia.

Thailand and Malaysia have a general border agreement which defines CPM guerillas as the common enemy to be jointly suppressed but the pact is silent about Muslim rebels.

The reason is that Malaysia considers the Muslim rebellion as strictly an internal affair to be dealt with by the Thais. Malaysia has taken this stand to resist pressure from militant Islamic groups to help the cause of Thai Muslims.

Malaysian Home (Interior) Minister Tan Sri Ghazali Shafie came here recently to attend an annual conference of the Thai-Malaysian Border Committee and said that Malaysia would not support any group working for dismemberment of any country.

But, he made it clear that Malaysia could not join Thailand in combined military operations against Muslim rebels. The armed forces of the two countries have mounted several joint drives against CPM guerillas.

"There are certain things which Malaysia can do and some things which it cannot do. Thailand had never asked Malaysia to do what we cannot do," Tan Sri Ghazali told reporters.

He reaffirmed that Malaysia was committed to helping Thailand resolve the Muslim minority problem but that to fulfil the commitment his country must have full options.

"Malaysia must have the credibility to speak outside, in the Muslim conferences and everywhere, to tell the story of Thailand," Tan Sri Ghazali said.

He disclosed that he had held detailed discussions with Thai Foreign Minister Siddhi Savetsila on how Malaysia could play an effective role in helping Thailand on the Muslim separatist problem in international forums.

Malaysia has so far helped block attempts to raise the Thai Muslim issue at gatherings of Islamic countries. — Reuter

ROYAL MALAYSIAN AIR FORCE MARKS 23RD ANNIVERSARY

Growth of Air Force

Kuala Lumpur NEW STRAITS TIMES in English 1 Jun 81 p 4

[Text]

THE Royal Malaysian Air Force had a humble beginning with just a Twin Pioneer aircraft named *Lang Rajawali* on June 1, 1958.

The force then had only 12 officers. It has now grown into a powerful arm of the Armed Forces with about 10,000 personnel serving in various bases throughout the country.

More than 100 aircraft of at least a dozen types are in service at present.

The force is expected to be strengthened to 18,000 by 1983.

The first pilots received their training in Chipmunk aircraft at the base in Sungei Besi, Kuala Lumpur in December 1958.

The base became fully manned by Malaysians in 1960, a year after the Chipmunks were replaced with Provosts.

As the defence needs of the country grew, five more bases were set up all over the country.

The base at Alor Star was set up in 1964 together with an aviation school where the Provosts from Sungei Besi were used for training flights. These aircraft were used from 1961 to 1975.

From 1971, the Bulldog proved useful for basic traning courses while the Cessna was used from 1975 for advanced courses.

Other bases sprang up in Labuan (1965), Kuching (1967) and Kuantan (also in 1967).

The Butterworth base was started under the watchful eyes of the Royal Australian Air Force in 1969.

In 1964, an engineering school was opened at Kinrara, Kuala Lumpur, to train personnel in aircraft maintenance.

Strategic

These were vital as they monitored the skies, for any sign of an air invasion, every minute of the day.

The schedules of all aircraft are decided at the Air Headquarters in Mindef, which is in constant contact with the aircraft.

A helicopter pilot training school came up in Kuala Lunpur in 1975 to train personnel using the Bell 47G Chopper.

Three years later, the school was transferred to Kluang, Johore, where it now turns out Chopper pilots and quatermasters.

As the number of aircraft grew, a depot for overhauling aircraft was set up at Subang in 1976.

The depot has advanced rapidly and is now able to produce its own spare parts for overhauling even supersonic aircraft. The RMAF will hopefully be making its own aircraft by 1985.

Presently there are at least a dozen major types of aircraft in active service.

The Bulldogs and Cessnas are used for training while the F1S fighter jets and Tebuans are for advanced flying courses.

The F28 jets are used for transporting VIPs both withing the country and outside.

The Hercules Charlie C130H has a daily shuttle service between Kuala Lumpur and Kuching and Kota Kinabalu.

It transports troops (92 passengers) and cargo up to 42,000 pounds on short legs. Six aircraft were purchased for $93.4 million.

The Caribou is a transport plane dropping supplies to troops while the Hercules PC130 is a maritime aircraft mainly used for patrols. It can stay airbourne for 19 hours.

The F1E are fighter jets capable of great speeds.

There three types of choppers in the force — the Alouette III being the most versatile and is mainly used for transporting VIPs and others from ship to ship or ship to land and is also useful for reconnaisance work.

Mercy

It is also a gunship and usually escorts the bigger Nuris.

Pilots receive four months training on the Alouette after finishing an eight-month course on the Bells.

The Nuris are very important for carrying troops to operational areas and transporting supplies.

They are also in demand for mercy flights, medicare and during disasters like floods where people have to be evacuated to safer areas.

These aircraft form the 14 squadrons of the force. They are named Squadron 1 to 14 and there is no Squadron 13, probably because of the obvious reason.

Here is a look at the various squadrons.

Squadron 1 (formed in 1958) grew up side by side with Britain's Royal Air

Force in Kuala Lumpur. They had 14 Twin Pioneers, which were later replaced by the Caribous in 1969.

Squadron 2 (formed in 1960) also in Kuala Lumpur had Doves (1960) and Herons (1963). These aircraft were scrapped in 1976.

The HS125 (Merpati) communications jet joined the squadron in 1970, followed by the F28s and the Cessna 402 in 1975.

Souadron 3 (1963) was initially set up in Kuala Lumpur but operations have now been transferred to Butteroworth. They have the Alouette III choppers.

Squadron 4 (1964) also in Kuala Lumpur used the Dart Herald planes until they were scrapped due to old age several years ago and the division dissolved.

Squadron 5 (1964) based in Labuan has more Alouette III helicopters.

Squadron 6 (1967) is based in Kuantan with the Tebuan jets (formely known as Canadair CL41G).

Squadron 7 (1968) is based in Kuching with the Nuri (Sikorsky 961) choppers. Seven of the aircraft were bought at $6.5 million each.

Squadron 8 (1966) has the Caribous based in Labuan.

Squadron 9 (1967) has Tebuans based in Kuantan.

Squadron 10 (1967) has nine Nuris based in Kuantan.

Squadron 11 (1969) was formed in Butterworth with Sabre jets which were later replaced with F1Es.

Squadron 12 (1975) has F5E and F5B jet planes based in Butterworth.

Squadron 14 (1976) consists of the Hercules Charlie C130H.

Training Center Under Construction

Kuala Lumpur NEW STRAITS TIMES in English 1 Jun 81 p 4

[Text]

THE RMAF's biggest and premier training centre is being built at Gong Kedak, near Pasir Puteh, Kelantan, at a cost of $1.4 billion under the Fourth Malaysia Plan.

Once completed in 1984, it will have a population of nearly 12,000.

When it is fully operational, the Kinrara aircraft engineering school in Kuala Lumpur will concentrate on technical training while the Gong Kedak base would offer advanced training in all military aspects, including supply, administration and flying courses.

The Kinrara school, which was set up 1963, now trains personnel in aircraft engineering, engines, radio engineering and administration.

At present it also trains police personnel in aeromechnanics to help them maintain the aircraft just acquired by the force.

The Ipoh based training programmes are also expected to be transferred to Gong Kedak in 1987.

Besides this ambitious Gong Kedak project, the overhaul depot at Subang is also to be expanded under a $50 million programme.

The base is being built on a 200 acre site.

Objective

The RMAF's main objective is to provide a sound foundation for the development of a future national aeronautical industry in our country.

A manufacturing workshop would be set up to fabricate airframe and aircraft parts as well as components while aircraft assembly facilities are also on the drawing board.

Eventually the depot is expected to be capable of designing and manufacturing light aircraft and helicopters.

The depot would be expanded to do repair and overhaul of more engines and aircraft equipment, including major airframe refurbishing repair and modification tasks.

The A-4 Skyhawks are expected to be assembled locally there in the near future to increase the technical competence of the RMAF personnel.

Overseas

It was also reported recently that four major aircraft manufacturers were competing to set up an aircraft assembling plant at the Subang base.

The Subang base will have more operations because the Sungei Besi base is becoming hazardous for operating bigger aircraft.

However, the Air Headquarters and Air Support Command controlling movement of RMAF aircraft would continue to be stationed at Sungei Besi, Kuala Lumpur.

The RMAF training school in Kluang will also become another full-fledged airforce base.

An initial $5.5 million has been received for the carrying out various projects there.

The helicopter training centre set up in Kluang in 1979 is the first of its kind.

About $2 million has been allocated for expansion of facilities at the Kepala Batas (Alor Star) training school as well and more men are also being sent overseas for training as part of the expansion project.

About $2.2 billion is expected to be spent on strengthening the force during the Fourth Malaysia Plan.

Part of the amount will be used to equip our airmen with the latest knowledge of piloting new planes and improving their technical skills.

More than 500 men are now in the United States studying aircraft maintenance and attending other courses. Another 100 to 300 are in the United Kingdom, Autralia, India and Pakistan.

Last year the Air Force recruited 200 women for the first time. They form only one per cent of the total strength.

The RMAF expects to take in 1,200 women this year and hopes to increase the woman's participation to four per cent of the total strength.

Quality

About 2,400 recruits are being churned out at the training centre in Kuala Lumpur. Others are being trained at Port Dickson and other RMAF installations.

However as the Chief of Defence Forces Jen. Tan Sri Ghazali Mohamed Seth has said, we must keep in mind not to overlook quality in our drive to train more men.

Pains are being taken to ensure that the traning standards are kept high and that there is strict discipline among all members of the force.

Purchase of Skyhawks

Kuala Lumpur NEW STRAITS TIMES in English 1 Jun 81 p 5

[Text]

THE RMAF will be the first to engage the enemy if the country is attacked from outside.

Therefore it is essential that the country has a modern, well equipped and efficient force to face the challenge of the future.

With this in mind, the Government has announced it would spend $2.2 billion on expansion of the air force during the Fourth Malaysia Plan period from now until 1985.

This will include the purchase of the US-made Skyhawks.

Malaysia hopes the withdrawal of the 38 Mirage jet fighters from Butterworth by the RAAF would coincide with the setting up of the A-4 Skyhawk fighter bomber squadron.

Although Canberra has informed us about its decision to withdraw its Mirage squadorons, the withdrawal schedule has yet to be decided.

The Defence Ministry has said the withdrawal will not affeect Malaysia's air defence system.

Two bids

A large part of the country's defence capability is based on the Integrated Air Defence System (IADS) under the five-power defence pact still in effect.

Malaysia is reported to be buying the aircraft at a cost of $1.039 million and the first delivery is expected later this year.

The first Skyhawk squadron is expected to be based in Kuantan.

The *Asian Aviation* magazine said in April that two American aerospace companies were vying for the $440 million contract to refurbish and equip 68 ex-US Navy Skyhawk fighters for the RMAF.

The magazine added that it would take several months for the Malaysian Government to evaluate the two bids and a decision was expected only later this year.

The contract involves the conversion of 88 Skyhawks into 54 single-seat fighters and 14 two-seat trainers over a 3½ year period, followed by a 12-year commitment to provide technical and maintenance support for the aircraft.

The Skyhawks are at present mothballed at the US Air Force base in Arizona.

The work, according to the magaizine, is to be carried out in two phases.

The first includes the turning out of 48 aircraft — 34 fighters and 14 trainers — over a 2½ year period.

During this time, the RMAF will send 75 technicians to the U.S. to work on the air frames and engines, plus trainee pilots and a technology transfer team.

The second part could require an additional 20 aircraft to be assembled from refurbished parts at the RMAF's overhaul and maintenance base at Subang.

New Skyhawaks would cost between $14 and $15 million, compared to only $7.5 million for the refurbished ones.

The first Skyhawk squadron would replace the old Tebuans by next year while another squadron of the fighter jets would operate in 1983 or 1984.

Studies have shown that the 14-year old Tebuans were still safe for training and the RMAF cannot stop using them at once as it would affect their pilot training programme.

The Tebuans (eight have crashed since 1967) costing $2 million each, will be phased out in stages by 1983.

The RMAF would purchase six advanced jet trainers up to 1983 and six more after that.

The Bulldog aircraft would be replaced by more modern turbo trainers for basic flight traning purposes by 1983.

These will have better training facilities including armament equipment now lacking in the Bulldog.

The RMAF hopes to train about 120 pilots yearly to cope with its expansion plans.

In April the RMAF took delivery of another Hercules C130H aircraft. It will join two other similar aircraft being used in maritime patrol operations.

The Hercules is operated by a seven-man crew, with equipment for detection, identification and interception of maritime surface patrols.

The aircratf can ply at high altitudes to search large areas or at low altitudes for detailed surveillance to intercept "questionable" inbound vessels.

The RMAF also has a fleet of six transport Hercules C130 delivered in 1976.

Overhaul Depot

Kuala Lumpur BUSINESS TIMES in English 4 Jun 81 p 6

[Excerpts]

MANY may have noticed the hive of constructional activities which will culminate in a giant military complex next to the Subang International Airport.

The 55-acre complex accommodates the RMAF overhaul depot which will be officially opened on June 6.

Also known as Airod, the depot will provide support to the RMAF's operational activities by overhauling and repairing engines including airframe, avionics and specialist vehicles.

It is also one of the logistics units under the newly-formed RMAF Support Command specially designed to enhance the RMAF's capabilities to support itself in the areas of training and logistics.

Growing rapidly since it began operations in 1976, the depot is acquiring more land for its expansion programme designed to make it self-reliant.

Under the programme, a manufacturing division has been established to produce specific spares for RMAF aircraft.

It is also expanding the capabilities of all production divisions to encompass more component and item types. For instance, more types of aeroengines will be inducted into the aeromechanical division for overhaul and repair.

Before the formation of Airod, the RMAF was completely dependent on overseas facilities for major repairs and overhaul of its aeroengines, airframe and other electrical components.

When sophisticated aircraft were introduced into the RMAF the maintenance costs became increasingly prohibitive.

This was mainly due to the escalation of expertise and labour costs abroad and freight and handling charges which cost the government millions of dollars.

Even the planning and development of the depot was undertaken entirely by RMAF personnel.

At present the depot is an independent unit within the RMAF under the command of an engineer who holds the rank of colonel.

It has four divisions — the aeromechanical aircraft, electronic and aerospace ground support divisions.

The aeromechanical division is equipped with modern facilities for the repair and work of parts to support aeroengine and airframe components overhaul.

It is also equipped with sophisticated testing equipment and a variety of precision measuring equipment to test and accomplish the visual and dimensional inspection of parts to ensure that various tolerances and limits are set.

With these facilities, the aeromechanical division has the full capabilities to repair and overhaul general electric engines as well as the Alouette III and Sikorsky.

Since its inception, the division has overhauled and repaired more than 400 engines and 1,200 components.

Plans are under way to undertake the repair and overhaul of Hercules aircraft, aircraft propellers and hydraulic components.

The electronics division, already in full operation, was established to cater for the repair and overhaul of aircraft electrical instruments, communication and radar equipment.

The precision measuring equipment laboratory at the RMAF base, Kuala Lumpur, is responsible for the calibration and repair of all electrical and mechanical precision measuring equipment in the RMAF.

The ground radio overhaul flight has been upgraded and is now responsible for the repair, overhaul, on-site servicing and calibration of airfield navigational aids and communication equipment.

The division is undertaking the overhaul of most of the RMAF avionic equipment.

On the other hand, the aircraft division, otherwise known as the technical support unit, was established in 1967 with limited functions such as straightforward assembly of aircraft and trial installation.

The division is now able to provide a side range of in-depth engineering support to the RMAF fleet of aircraft.

Among its functions are aircraft crash recovery and salvages, refurbishment of old aircraft, fuel tank repair or non-destructive testing of aircraft structures.

Plans are afoot for the division to undertake manufacturing of the non-stressed frames and spares. A new hangar is being built for this division in Subang.

The aerospace ground suppport division is a newly-established division which will undertake, for the first time, the repair and overhaul of RMAF aerospace ground equipment such as aircraft starting trolleys, hydraulic test rigs and the like.

With the establishment of this division, prolonged and more economic usage of these types of ground equipment and vehicles is ensured.

ANNUAL OPENING OF OFFSHORE AREAS FOR OIL EXPLORATION

Kuala Lumpur BUSINESS TIMES in English 12 Jun 81 pp 1, 20

[Excerpt]

PETRONAS plans to open up two or three new offshore areas for exploration each year to locate additional petroleum reserves so that the country will be able to postpone the day when it becomes a net importer of crude oil.

Without additional reserves, Malaysia is expected to become a net importer of oil by about 1985, according to Encik Hashim Salleh, special projects department's manager of Petronas. As at Jan. 1 this year, the country's oil reserves were estimated at 1.97 billion barrels and about 30 trillion standard cu ft of natural gas.

Encik Hashim outlined these and other programmes when presenting a working paper at a seminar on industrial development in Trengganu in the state capital. The seminar ended on Wednesday.

He said that in Trengganu alone, approximately $3 billion will be spent on gas related projects in the next 10 years. Encik Hashim called on local and foreign investors, in particular Bumiputras, to take advantage of these massive developments.

Elaborating on oil and gas exploration activities, Encik Hashim said in view of the importance of drilling rigs, the national oil company is presently examining the feasibility of purchasing them.

For a start the company hopes to purchase a jack-up rig and a drillship.

Due to the complex nature of the business and high technology involved, said Encik Hashim, it may be necessary for Petronas to invite foreign capital and expertise.

But for simpler activities like the operation of supply vessels, priority will be given to local entrepreneurs. Encik Hashim noted that at present supply vessels servicing Malaysia's offshore oilfields are foreign-owned.

The major oil and gas related projects earmarked for Trengganu include a gas-fired power station, whose construction is being handled by the National Electricity Board, a crude oil terminal, a supply base and an oil refinery.

With the development of gas, Trengganu also holds the potentials of hosting such industries as methanol and ammonia plants, ceramics, cement manufacturing, glass and brick making and the manufacture of carbon ck and nitroparaffins.

As some of the projects currently being planned or undertaken will come on stream before the completion of the NEB power station in 1984, Petronas will build and operate its own power station to meet the requirement.

The fuel for the proposed power station will be the "boil off" gas derived from the crude oil terminal.

At the retailing end, Petronas which entered the kerosene, diesel and LPG market in 1979, is expected to start marketing motor gasoline (petrol) as well. Its first permanent station is likely to be opened this month.

Altogether Petronas is planning to open 146 stations by 1985. (Oil marketing companies had claimed that unless Petronas made clear its stand on oil product retailing, they might not be able to plan their own expansion).

Referring to Trengganu, Encik Hashim said that large scale development of gas will act as catalyst for the industrial development of the state.

CARIGALI'S AGREEMENTS WITH FOREIGN OIL COMPANIES

Kuala Lumpur BUSINESS TIMES in English 15 Jun 81 p 6

[Article by A. Kadir Jasin]

[Excerpts] A CASUAL observer taking a look at Petronas Carigali Sdn Berhad, a wholly-owned exploration and development company of Petronas, may conclude that it is moving backward.

This is because with each new venture it enters into, its participation becomes smaller and smaller. But both Carigali and its parent company have a good reason for adopting this course.

Immediately after it was formed in 1978, Carigali was faced with the task of having to take over a 7,400-sq mile exploration area relinquished by a consortium headed by Continental Oil Company (Conoco) in August that year.

The speed with which it all happened forced Carigali to undertake the development of the contract area all by itself. The company is committed to land the gas by 1984.

Therefore, in the subsequent contracts, Carigali has sought to cover itself from the high risk of oil exploration and development by not only reducing its participation but also by seeking the best possible financial and monetary terms.

This has resulted in Carigali deciding to become an equal partner in a joint operating arrangement with British Petroleum (BP) further to explore and develop a 1,000-sq mile contract area initially held and explored by Oceania off the coast of Sabah.

In a more recent development, Carigali is believed to be planning to acquire a 15-per cent "riding interest" in two exploration blocks that Petronas is offering to three foreign oil contractors.

Petronas chairman Tan Sri Abdullah Salleh, said recently that exploration Block 1 would be awarded to Cities Services of the US and Idemits of Japan and Block 3 to Elf Aquitaine of France. Production sharing agreements for these blocks are expected to be negotiated soon.

Block 1 covers 6,280 sq miles and Block 3 extends over 4,884 sq miles. They are situated to the north of Kuching. Block 3 shares its eastern boundary with Central Luconia gas fields belonging to Sarawak Shell.

By riding interest it is understood that Carigali does not have to contribute funds to explore the two areas. But if oil or gas is discovered, Carigali will be eligible to share 15 per cent of the output.

In the search of appropriate technology, Carigali has entered into several technical and engineering agreements with a number of international companies.

It's earliest known cooperation was with British National Oil Corporation (BNOC) which assited in pre-planning of oil and gas drilling to confirm the potentials of the two commercial discoveries made by Conoco.

For actual drilling of the fields — Duyong (gas) and Sotong (oil/gas) Carigali is being assisted by BP under a technical agreement. Four confirmation wells have been completed and the drilling rig *Ocean Digger* has moved to Sotong.

More recently, Carigali appointed Crest of the US as its engineering consultant for the gas production facilities. Crest is presently doing conceptual engineering to determine the type of design most suitable for the kind of gas found at Duyong.

The first customer for the gas is the National Electricity Board which is building a gas fired power station at Paka in Trengganu. The proposed power plant will have an initial capacity of 450mw and an ultimate capacity of 900mw.

To produce the gas from Duyong, several platforms and infield pipelines will have to be established. Similar facilities will be required for Sotong which, although an oilfield, has extensive reserves of associated gas.

The gas tapped from these fields will be transported to the coast of Trengganu via a 100-mile pipeline. To economise the use of resources, negotiations are in progress on the proposed link-up of the Carigali production facilities with the one being planned by Esso Production Malaysia Incoporated (EPMI), which holds a contract to the area in the north.

The proposal calls for the establishment of a gas collection network within the EPMI contract area. This network will then be connected to that of Carigali and subsequently to the shore facilities.

The shore facility will include a gas processing plant capable initially of treating 130 million standard cu feet per day of natural gas and ultimately 400 million cu feet a day. This plant is expected to cost $200 million.

A similar arrangement is being considered for crude oil as EPMI, which is currently producing in excess of 100,000 barrels a day from offshore Trengganu, plans to construct a pipeline to the land the oil.

Crude oil from EPMI contract area is currently loaded onto a storage tanker. But with rising production, an onshore storage facility is deemed essential. If this materialises, oil from the Sotong field could be transported through the EPMI system.

The proposed pipeline will be about 127 miles long and will have at the end of it a storage facility capable of handling two million barrels. These facilities are expected to be ready by the end of 1982.

SOUTH KOREAN FIRM WITHDRAWS FROM SABAH SPONGE IRON PROJECT

Kuala Belait BORNEO BULLETIN in English 13 Jun 81 pp 1, 52

[Excerpts] KOTA KINABALU.—Labuan's $450-million sponge iron project is going ahead, despite disclosures that South Korea's Daewoo Industrial — one of the original major partners in the scheme — is pulling out.

Last week's Bulletin described how Daewoo was to take 30 percent of the shareholding in the Sabah Iron and Steel Company, the firm that will run the industry and was to buy half the factory's output as raw material for conversion into steel in its Korean mills.

A government spokesman for the project confirmed for the Bulletin this week Daewoo did tell Sabah officials of its intention to withdraw at a recent meeting — although the decision has yet to be put in writing.

A memorandum of understanding between Daewoo and the Sabah government last year gave the South Korean company the option to take up to 30 percent of the shares and and half the output if the project proved viable and if both Daewoo and Sabah still wished to be partners.

But Daewood subsequently lost interest after losing out to Voest Alpine, of Austria, in the bid for the $326m contract to build the sponge iron plant at Rancha Rancha on Labuan.

The choice of Voest Alpine was announced on April 10 and the contract between the company and the Sabah government was signed on Mav 19.

The deadline for Daewoo to take up its option has now passed and the South Koreans will no longer be given preference if they want to buv the sponge iron, said the spokesman.

He added that replacing Daewoo with other investors and buyers "should not be a problem."

The Heavy Industries Corporation of Malavsia (known as Hicom), owned by the federal government, has already said it will take at least some of the shares turned down by Daewoo. Hicom has been seen as a minor investor since the early planning stages but now seems to be a major one, although its share of Sabah Iron and Steel has yet to be determined.

The corporation will make a natural partner for the Sabah government (which owns 51 percent of the sponge mill scheme) as Hicom was created to operate an integrated steel mill in Peninsular Malavsia.

That project includes a sponge iron plant in Trengganu with the same capacity as the Labuan operation to provide all the raw material needed by its associated steel-producing mills.

The Trengganu project is scheduled for completion in mid-1984, just half a year after Sabah's effort is due to start producing.

The spokesman said that if Hicom does takes 30 percent ownership of Sabah Iron and Steel, the state government must still find buyers for 14 percent of the equity (the other five percent has already been taken by Voest Alpine).

That 14 percent is likely to be taken by investors from Singapore, Thailand, Japan and the Philippines, added the government official.

He mentioned that the problem of finding buyers for the sponge iron could be solved soon if negotiations with a European trading company succeed. This company has indicated it would like to buy the mill's entire output for resale to steel-makers world-wide.

If these negotiations break down, there are several other potential customers each interested in 20 to 30 percent of the output.

TIN INDUSTRY NEEDS ALL THE HELP THE GOVERNMENT CAN AFFORD

Kuala Lumpur BUSINESS TIMES in English 2 Jun 81 p 6

[Article by Ho Sook Han]

[Excerpts]

AT LAST week's annual general meeting of the States of Malaya Chamber of Mines, chamber president Rahim Aki left little doubt that the tin industry was in bad shape, reeling from the twin blows of rising costs and declining prices.

Tin prices have indeed been falling since March last year but amid the current gloom, it seems forgotten that the long-term price of the metal, unlike those of other mineral commodities such as lead, zinc, iron ore and manganese, has been going up.

In view of the favourable long-term price trend, tin consumers — mainly the developed countries — argue that producers should stop agitating for higher prices; they should take the lean years with the fat.

But producers — all except Australia are developing nations — counter that tin, like oil, is a non-renewable resource and prices should reflect this fact. Producers are worried by the fact that tin reserves will be fully depleted by the year 2020.

Malaysia, the largest producer, accounting for 44 per cent of the production of the seven tin majors, is expected to have reserves which will last only 34 years more, according to estimates by the International Tin Council.

In Malaysia, tin's contribution to government revenue through foreign exchange earnings last year rose to $2,505, about eight per cent up from the previous year's $2,315 million.

Taking into accounts the $545 million collected through export duty, the industry accounted for 21 per cent of the country's total revenue. Its share in the total of merchandise exports has declined, however, from 19.6 per cent in 1970 to 8.8 per cent in 1980.

Producing countries have to contend with the fact that tin mining is becoming more and more uneconomic as a result of the narrowing gap between production cost and selling price.

While prices have fallen to the lower reaches of $1,650-$1,815 range, production costs of the energy-intensive mining industry continued to rise.

In Malaysia last year, the average production cost rose by more than a third to $1,627 per picul for gravel pump mines which account for more than half the country's production.

With the inclusion of export duty, the average production costs rose to $2,112 per picul. These figures, however, have yet to reflect the higher charges for electricity which account for more than a quarter of the production costs for gravel pump mines.

In order to develop Malaysia's tin and other mineral resources fully, miners want the government to dispense with the export duty and implement a tax system based entirely on profits.

The idea is conceptually sound but is less appealing when weighed against the benefits of an export duty, which is based on fact that tin is a depleting resource.

The government is seeking not just a share of the profits from tin but also a premium from the buyers in the developed countries in return for selling a non-renewable resource.

Last year, the government also helped the industry by raising the threshold price for calculating the tin export duty from $1,200 to $1,400.

Miners have frequently appealed for subsidised power rates, arguing for a 20 per cent discount on electricity charges in view of the importance of their industry to the national economy.

But such concessions should not be granted in view of the fact that the end product is almost wholly exported.

Why should Malaysia indirectly subsidise tin consumers of the developed countries, particularly when they themselves have partly contributed to higher production costs through more expensive capital equipment such as dredges?

While there is no reason for giving subsidies, the government could offer other incentives and reliefs to encourage the exploration for tin and other minerals.

There is scope perhaps for reducing the tax on tin profits to a flat rate of 10 per cent, as miners have suggested. The rate was increased last year from 12-and-a-half per cent to 15 per cent because the government thought that the new "cost plus" formula for export duty would lead to a fall in the duty revenue. (Under the formula, duty would be imposed only at prices above the prevailing cost of production.) This, Encik Rahim pointed out, did not happen and revenues from the duty went up to $545 million.

And, unless fiscal incentives are adequate, investors will not commit themselves to the high risks and large capital outlay involved in prospecting and mining mineral deposits in general and non-alluvial deposits, in particular.

The future of the mining industry, as Encik Rahim said, lies in the development of lower-grade ores and less-accessible mines.

As the cost of finding and exploiting new mineral deposits will be high, miners will have to be given all the aid the government can afford.

AFGHAN REFUGEES BECOMING PERSISTENT PROBLEM

Paris LE MONDE in French 7 Jul 81 p 5

[Article by Patrick Frances]

[Text] Today more than 2 million Afghan refugees have arrived in Pakistan since the communists took power in Kabul on 27 April 1978 and Soviet forces entered Afghanistan on 27 December 1979.

Following the failure of the alliance formed at the prompting of the Islamic Conference, the groups of Afghan underground fighters based in Peshawar in Pakistan, who represent only a part, and not the most progressive part, of the resistance movement--which incidentally is very fragmented in the field--are currently trying to unite in their efforts to drive out the Soviet "invader." There are still great differences between the two main lines of thought currently prevailing among the leaders in exile--the moderates and the Moslem fundamentalists--and they concern in particular the issue of American aid.

Our special correspondent in Pakistan, Patrick Frances, presents in a series of three articles the problems raised by the arrival of such a high number of displaced persons and the organization of the resistance movement.

Peshawar--On 31 May 1981, a census showed nearly 1.7 million Afghan refugees officially registered by Pakistani authorities in North West Frontier Province. On that same date, there were about 400,000 in neighboring Baluchistan Province. Those figures back up Pakistan's claim to have the heaviest concentration of officially registered refugees anywhere in the world, and the situation represents an increasingly heavy financial burden for Pakistan.

F.R. Safi, assistant commissioner for Afghan refugees, says: "It's a race in which we are always behind." The day before in Islamabad, Brigadier General Azhar, the chief commissioner, had been commenting to us concerning the graphs and statistics decorating the walls of his office. From November 1979 to November 1980, the number of Afghan refugees rose from 314,600 to 1,309,500--an increase of nearly 1 million in 1 year. On an average, the monthly increase at the time was 83,660. During the first 2 weeks of January 1981, the figure was over 72,000 for the two provinces taking in the most refugees.

There is no better illustration of the extent of the problem than those graphs we saw in an office of the UNHCR (UN Office of High Commissioner for Refugees) in Peshawar. Those for the districts of Peshawar and North Waziristan, for example, are literally "exploding."

In the field--in the district of Peshawar, for example, which is sheltering the largest number of refugees (more than 300,000) and where Pakistani authorities have decided to suspend registrations in order to encourage new arrivals to settle elsewhere--the runaway tide is generating discouragement but also a certain amount of pride.

Safi said: "Elsewhere in the world it may be possible to cope, but here the situation is uncontrollable." He admits: "Our plans are constantly out of date, and due to the lack of personnel and administrative sluggishness, the number of refugees has already doubled before those plans go into effect. But even so"--and here visible pride shows through--"foreign visitors generally acknowledge that, given the means at our disposal, we are working miracles."

Fraud and Corruption

Fraud? Corruption? "There is no country without such unfortunate occurrences when aid as sizable as this is involved," noted Roman C. Kohaut, head of mission, but he immediately deplored the fact that such an issue was being made of facts that could just as well be true of Thailand or Somalia.

People at the Peshawar office of the UNHCR are both more annoyed and even more pragmatic: "The words 'fraud' and 'corruption' are totally inadequate for describing a situation in which underadministration and tribal hierarchy explain and excuse many things." That is the substance of what they say.

The same realism exists on the Pakistani side. Brigadier General Azhar admits: "It would be dishonest of me to tell you that such schemes are not going on." But he denies that there is fraud or corruption "on a large scale."

Asking the same question of Safi in Peshawar brought a long silence and an icy look. Was it an embarrassing question? No, an insulting one, because let us not forget that here we are among Pathans, whether they be Pakistanis or Afghans. His answer had two parts. First the thunder: "With respect to those found guilty of fraudulent activities, we will make no compromise. They will be answerable to military justice--to courts-martial--and they deserve to go to jail and to receive a few blows with the whip."

Then came the speech for the defense and the mitigating circumstances. "Don't forget that at the beginning, we had to cope with this sizable influx with just a handful of government officials who were already overburdened with the tasks assigned to them." There was the case, for example, of a single official, helped by two assistants, who was put in charge of from 30,000 to 40,000 refugees. "In those conditions, how can you expect to exercise effective control over registration and detect double registrations?" Safi went on: "So we decided last September to reorganize the refugee administration completely so as to have the situation totally under control within 6 months--including both registration and the distribution of Pakistani and international aid."

It was decided, first of all, to beef up the staff considerably: from 5,000 to 6,000 people were specially recruited. The second decision was to set up smaller basic units--that is, villages or tent cities with a maximum of 5,000 people or 1,000 families, each of which will be administered by about 30 people. The objective: to know each refugee personally within those units.

Parallel with that important administrative reform, there will be a policy aimed at preventing the establishment of refugee camps less than 10 kilometers from the Afghan border. It is recognized, of course, that refugees have settled in tribal areas where the Pakistani central government cannot intervene, but it is asserted that in such cases, they receive no aid. Spokesmen for the UNHCR are more moderate in their remarks. While they understand the Pakistani concerns (to prevent the refugees from being the victims of reprisals), they say they are incapable of simply cutting off food supplies for the women and children living in those areas. The United Nations has decided, however, to give the Pakistani Government financial assistance to help it enforce that policy. A subsidiary problem, but one which is nevertheless a matter of growing concern to Pakistani authorities, is the presence of some 3 million animals belonging to the refugees. The damage they do constitutes a serious threat to a natural environment that is already very fragile. The UNHCR acknowledges the gravity of the problem but admits that it is powerless on that particular point.

The same powerlessness, or something close to it, exists with respect to another problem that Afghan adults[1] are becoming more aware of every day: that of employment. One official at the UNHCR observed: "As time passes, they realize that they are not going to go home tomorrow and that they will consequently have to find work. It is up to us to support all their efforts, but we must also take local Pakistani unemployment into account and avoid creating problems. This considerably limits our action." He explained that generally speaking, "whatever we offer to the refugees, we must also offer to the local population. That is what we are doing, for example, in the health field."

Since the number of Afghan refugees is increasing constantly (and it is emphasized that "it is one-way traffic"), the financial burden being imposed on the Pakistani Government is growing steadily greater. The average monthly cost of a family of refugees (about 10 persons) amounts to $150. In 1980, an overall sum of $200 million was spent, half of it provided by contributions from the international community--that is, the UNHCR, the World Food Program, and national and private humanitarian organizations.

Of the approximately $100 million thus expended by Pakistan, the lion's share consisted of the payment to each officially registered refugee of a monthly allowance of 50 rupees.[2] That allowance cannot exceed 500 rupees per family. It was reduced from an initial amount of 120 rupees after the World Food Program went into operation, since that program now provides each refugee with a monthly ration of food.

---

1. According to official statistics, 28.3 percent of the Afghan refugees registered as of 15 January 1981 were men, 28 percent were women, and 43.7 percent were children under 12 years of age.

2. One Pakistan rupee = 0.45 French franc.

While those rations seem to be distributed quite regularly, especially in the case of wheat and sugar, the same is apparently not true of the Pakistani monthly allowance. The latter had not been paid for several months at the Kacka Garhi camp on the northern outskirts of Peshawar (18,000 persons) when we visited there. But it is true that while the Pakistani Government intends to respect its generous commitments, doing so is going to cost it a cool $90 million in 1981. So it is easy to understand the urgent appeals being made by Pakistan to the Islamic community.

In addition to the payment of that allowance, the Pakistani Government is also in charge of forwarding international aid, most of which arrives at Karachi: some 500,000 tons of miscellaneous products in 1980. That represents a sizable expenditure, since Quetta and Peshawar, the two main distribution centers, are located 500 and 1,000 kilometers respectively from that port.

Lastly, Pakistani authorities are thinking of paying financial compensation to the owners of land occupied by the Afghan refugees.

Some people say that such a measure is indispensable if the government does not want a feeling of hostility toward the refugees to develop among the local inhabitants.

In one office, some of the figures posted on a board--the highest--show the percentage of refugees in relation to the total population of the receiving districts. In some cases--Kurram and North Waziristan, for example--it is on the order of one-third. In Baluchistan, in the district of Chapai, it exceeds 40 percent.

When one examines the figures, confides one UNHCR official, one always expects problems to appear at some point, but what is thought to be the "critical threshold" is passed every time. One is forced to note that so far, Islamic hospitality and Pathan fraternity ("they have never stopped fighting among themselves, but they form a common front in adversity") have been more than words.

RELIEF TO AFGHAN REFUGEES ESTIMATED AT RS 400 CRORE

Karachi MORNING NEWS in English 22 Jul 81 p 1

[Text] Rawalpindi, July 21: An annual amount of Rs. 400 crore is being spent on humanitarian relief to Afghan refugees in Pakistan, half of it provided by international agencies and the rest met by Pakistan from its own limited resources, the Chief Commissioner for the Refugees, Brig. Saeed Azhar was quoted as saying today.

The PTV quoted him as saying in an interview that there were about 23 lakh Afghan refugees in Pakistan and their number continued to grow. This number is confirmed by the United Programme and other international organisations, he added.

Brig Azhar said the average monthly increase in the number of Afghan refugees last year was 80,000 while this year it had doubled.

The Afghan refugees are lodged in more than 300 tented villages in the North West Frontier and Baluchistan provinces, he said, adding that besides accommodation and clothing, they are provided with edibles, including wheat, edible oil, dried milk, sugar and tea, monthly allowance of Rs. 50 per head to meet other necessities, drinking water facilities, medical treatment, educational facilities and limited opportunities for employment.

He said adequate arrangements had been made to distribute relief among the refugees, and efforts to guard against any pilferage had produced satisfactory results.

The international organisations are fully satisfied with the relief distribution work and they have praised the spirit and services of Pakistan Government, he added.--APP.

EXPENDITURES PLANNED FOR TRIBAL DEVELOPMENT

Karachi DAWN in English 22 Jul 81 p 3

[Text] PESHAWAR, July 21: Over Rs 83.36 million will be spent by the Federally Administered Tribal Areas Development Corporation on the implementation of various socio-economic development schemes, during the current financial year.

The current year's allocation shows an increase of 22 per cent over the last year's budgetary development provisions. Over Rs 66.1 million will be spent on the water sector in which 22 schemes, including sinking of 75 tubewells will be implemented.

The break up of this allocation under various sectors is as follows: Water Sector Rs 66.100 miillon; industriai sector Rs 8.730 million mineral sector Rs 3.150 million; physical planning and housing Rs 4.882 million, and agriculture sector Rs 0.500 million.

Under the water sector 22 schemes including 75 tubewells would be completed bringing 4121 acres as of new area under irrigation besides supplies to 5737 acres as of existing irrigated areas.

INDUSTRIAL SECTOR

Under the industrial sector, oil-expelling and refining plant in Bajaur Agency would be completed. Survey and investigation for preparing industrial projects continue and work on a few new industrial units would be started.

Investigation for minerals will continue and economic minerals would be exploited.

Accommodation, both residential and office, would be provided where it is not available at present.

Under the agriculture sector feasibility for establishment of agriculture and livestock farms would be examined. Such venture would be undertaken in case feasibility is determined.

The Corporation has already utilized Rs 64.174 million out of an allocation of Rs 68.524 million in the last financial year on irrigation, industries and minerals development schemes, 28 irrigation schemes were completed at a total cost of Rs 55.011 million.—APP.

KUWAIT AID FOR PAKISTAN PROJECTS NOTED

Karachi DAWN in English 21 Jul 81 p 10

[Text] ISLAMABAD, July 20: The Kuwaiti Government recently agreed to finance several social sector projects in Pakistan's backward areas by extending loans amounting to about 70 million dollars. This is apart from 144 million dollars in three other major projects, including a joint venture — Kuwait-Pakistan Holding Company and 130 million dollars as support to Pakistan's balance of payment position.

It was authoritatively stated here today that the Kuwaiti Government offered loans for several social, sector projects, including three for Pakistan's under-developed areas, following the discussion the Amir of Kuwait had held here last year. This covers part of the Baluchistan development programme requiring foreign assistance.

The Kuwaiti Government had provided 44 million dollars for Guddu-Karachi Power Transmission lines and 25 million dollars for consultancy to the railways. Three projects for which the Kuwaiti Government has pledged assistance relate to provision of natural gas pipeline to Quetta, rural electrification programme and drinking water facilities for Quetta. It has also offered 11 million dollars for a Fauji Foundation fertilizer factory in Punjab.

The Quetta gas pipeline project is expected to get assistance of 34.7 million dollars and the rural electrification project, which will provide power to 150 villages, 500 tubewells and small scale industrial units, will receive 15 million dollars out of the Kuwaiti Development Fund. An agreement for the 11 million dollars Kuwaiti loan for water supply from Gaddani to Quetta is expected to be signed in September this year.

Kuwaiti Government had extended balance of payments support to Pakistan to the tune of 130 million. The Kuwait-Pakistan Holding Company, launched with initial Kuwaiti capital of 25 million dollars, has now a paid-up capital of 100 million dollars and 200 million dollars authorised capital, equally divided between the two countries.

SEVERE MEASURES PLANNED AGAINST 'UNSCRUPULOUS' TRADERS

Karachi MORNING NEWS in English 21 Jul 81 p 1

[Text] The Martial Law Administration in Sind has taken a serious view of the steep rise in the prices of essential commodities and is contemplating the imposition of severe punishments on those responsible it was reliably learnt here yesterday.

The ML authorities were especially perturbed over the sharp hike in prices of such foodstuffs as meat, vegetables and fruits.

Action is to be taken against those merchants and middlemen who are taking advantage of Ramazan to make huge and unjustified profits by fleecing the public.

According to reliable sources the authorities cannot permit some black sheep in the business community to gouge the public by creating artificial shortage and raising the prices of essential commodities to astronomical levels the sources added.

They said since all sorts of appeals and reasonable words as well as attempts to control the prices of essential commodities through normal means had failed the authorities intended to take some drastic steps soon.

The sources stated that these measures would include some sort of public punishment aside from the fines and other penalties provided for under the existing laws against hoarding and unjustified rise in prices of commodities of daily use.--APP.

RASH OF LABOR STRIKES FOLLOWS LIFTING OF MARTIAL LAW

Kuala Lumpur BUSINESS TIMES in English 3 Jun 81 p 6

[Article by Lysander Garcia in Manila]

[Text] FILIPINO workers have increased demands for a full restoration of the right to strike, and even employers support them, provided they have proper safeguards.

The demands of labour unions and managements were aired at a public hearing on a new labour code now being considered by the Philippines National Assembly.

Strikes in officially-designated "vital industries" have been officially banned since the imposition of martial law in 1972 by President Ferdinand Marcos.

The ban was not ended with the lifting of martial law in January, yet there have been a rash of strikes accompanied by some violence.

The hearings, held by Labour Minister Blas Ople, arose from the assembly's finding in April that more discussions were required on a government bill which would have restored the right to strike under certain conditions.

Felixberto Olalia, chairman of the Militant Union of Filipino Workers (PMP) told the hearing "the right to strike must be restored immediately, if only to stop company officials from shooting and killing workers on strike and from beating up even pregnant women."

"Let President Ferdinand Marcos restore this right now and then let us sit down to our labour laws," Mr Olalia said.

Leaders of two major trade unions accused company officials of paying soldiers and hooligans to intimidate striking workers, resulting in seven deaths in the last two months.

On the management side, Benildo Hernandez, said the Employers Confederation, of which he is acting president, agreed that the right to strike and the right to lock-out be restored.

But there must be proper safeguards so the economic gains of the country in the past several years will be preserved, Mr Hernandez said.

He said vital industries must be exempted from strikes as the Philippines could ill-afford a continuing loss of production man-hours. The private interests of citizens should be subordinated to the interests of the nation and the economy, he added.

Manuel Dia, dean of the Asian Labour Education Centre, a unit of the University of the Philippines, asked the national assembly to restore to government workers the right to organise unions, also banned under martial law.

Labour leader Antonio Policarpio questioned the morality of having a list of vital industries where strikes would be illegal under any circumstances.

The list is long and covers almost all important economic activity and labour leaders say, in effect, the total strike ban remains.

However, the ban has not stopped workers from going on strike. In the four months since martial law was lifted, a total of 123 strikes have hit big industries throughout the country, according to a Labour Ministry report.

The number of strikes is said to be far greater than in any year before or after the declaration of martial law. About 45,000 workers were involved, with the loss of more than one million man-hours.

Among other industries, the strikes paralysed six luxury hotels, two major commercial banks, two large bus companies, lumber yards, textile mills, and two mining firms.

Four out of five strikes hit firms in the capital city. Almost half were over alleged violations of wage laws and management refusal to negotiate new collective agreements.

Most strikes have been settled in about a week, but workers at the Construction and Development Corp of the Philippines, the country's biggest construction company, have been out for nearly three months.

At least four of the strikes were "not peaceful," a Labour Ministry report said.

In one incident on May 11, three union officials were shot and killed by men believed to be company guards or officials of a textile firm in Calamba, south of Manila. Of nine suspects, eight are still at large. — Reuter

INTEREST RATES A PROBLEM FOR CENTRAL BANK

Kuala Lumpur BUSINESS TIMES in English 11 Jun 81 p 16

[Text]

MANILA, June 10

THE Philippines Central Bank may find it difficult maintaining interest rates at reasonable levels after July 1 without fanning inflation and without going beyond growth targets of monetary aggregates stipulated by the International Monetary Fund.

This view seems to be the general opinion of many bankers who are now busy preparing for the lifting of interest rate ceilings which will take effect on July 1.

CB Gov. Jaime C. Laya has promised to maintain interest rates at reasonably low levels once the ceilings are lifted.

The CB hopes to do this through a more active open market trading operation, whereby the CB would buy government securities now in circulation in order to infuse more funds into the financial system. This infusion of fresh funds is intended to make enough available funds for credit and thus lower the rates.

Conversely, the CB would sell government securities, particularly its certificates of indebtedness (which may be redesigned) when interest rates are too low.

At this point, the banking system still does not know the level of interest rates which the CB would consider too high or too low.

The present fixed rates are 16 per cent for short-term loans secured by real estate and 18 per cent for loans backed by other types of collaterals. For over two-year loans, the interest rate is 21 per cent.

The bankers' belief that keeping rates low would be at the expense of inflation is based on the economic thinking that expanding the money supply without a corresponding increase in production would trigger price increases. This economic theory is otherwise known as "too much money chasing the same amount of goods."

At present, inflation — although still double-digit — is not much of a problem, averaging 14.1 per cent for the first quarter this year.

Interest rates versus inflation could become a thorny problem once the inevitable increase in prices of petroleum products comes again.

Additionally, the bankers said, the CB is constrained from infusing all the funds needed to keep interest rates low since the country has agreed to abide by certain conditions with the IMF for availing of the latter's credit facilities.

One such IMF credit facility is the two-year standby facility and also the supplemental financing facility (SFF), obtained last year to enable the country to ride out last year's and this year's expected payments deficits.

The balance of payments this year is projected to be negative by US$300-US$350 million. For the first quarter, the deficit already stood at US$188.81 million.

These conditions stipulated by the IMF range from allowable growth rates for domestic credits, money supply, new foreign commercial borrowings, and the BOP.

Thus far, money supply, for instance, has been allowed to increase by 10 per cent annually. As of March, money supply, consisting of pesos in circulation and also those in chequing accounts, totalled P21,655 million. The 10 per cent annual growth rate was well within the 15 per cent benchmark ceiling set by Republic Act No. 265, as amended (otherwise known as the CB charter).

With such conditions, bankers believe the CB may find it difficult abiding by the stipulations while trying to maintain interest rates at reasonable levels. — Business Day

INVESTMENT BANKS BARE 20 PERCENT DROP IN ASSETS

Manial BULLETIN TODAY in English 4 Jul 81 p 9

[Text] **TOTAL** resources of the country's investment houses dropped by nearly 20 percent during the first quarter of 1981. An industry study showed that assets of the 12 operating investment houses shrank to P6.9 billion from January to March from P8.6 as of year-end 1980.

Among those which reported declines in assets were State Investment, PAIC, AEA Development Corp., Philippine Pacific Capital Corp. and First Metro Investment Corp.

Some investment houses, however, registered increases in assets. Among them was Merchants Investment Corp. which reported first quarter resources of P341 million, up from P332 million at the end of the previous year.

According to Ernesto Rufino, MIC president, Merchants also showed an increase in receivables and loans despite a restrictive credit environment prevailing in the financial system.

* * *

AMONG the investment houses, Private Development Corp. of the Phils. ranked first in terms of assets with resources of P1.54 billion, followed by Bancom with P1.15 billion and Ayala Investment and Development Corp. with P1.08 billion.

The industry average, based on total assets of 12 investment houses, was P576 million. Only four companies had assets over the industry average. These are PDCP, Bancom, State Investment and AIDC.

In terms of receivables and loans, a minimal increase of 3.7 percent was noted or P2.7 billion in the first quarters as against P2.6 billion during the last quarter of 1980.

Ranked first was PDCP with P1.1 billion, Bancom came in second with P343 million, State Investment with P276 million, PISO with P220 million and AIDC with P144 million.

The minimal growth reflected extreme cautiousness in lending operations precipitated by the P643-million Dewey Dee scandal.

SWITCH TO COAL WILL ALLEVIATE ENERGY PROBLEMS

Kuala Lumpur BUSINESS TIMES in English 4 Jun 81 p 6

[Article by Manolo B. Jara in Manila]

[Text] COAL is set to regain its status as a major factor in the remodelled Philippine energy strategy.

And the pace is being accelerated by the government's determined attempt to reduce the country's heavy dependence on imported petroleum in just five years. Last year, its oil bill was estimated to have reached a staggering US$2.8 billion.

Not even a critical World Bank confidential report could seem to dissuade officials from pursuing the ambitious energy development programme.

The programme stresses the use of three indigenous energy resources — coal, hydroelectric and geothermal — to cushion the impact of the energy crunch. These are expected to account for 45 per cent of the country's energy requirements by 1985.

However, the World Bank, in a confidential report completed last January, said the Philippines had grossly overestimated the amount of energy it can generate in the 1980s from these three sources.

The report also criticised the government's emphasis on non-conventional energy, saying it was not geared to satisfy the market demand for these products.

In the Ministry of Energy's reckoning, coal will get the lion's share of the country's non-oil energy sources in the next five years.

Energy Minister Geronimo Velasco said that by 1985 coal production would reach 17.9 million barrels of oil equivalent representing 13.4 per cent of the country's energy needs.

Minister Velasco's optimism is based on the "increasingly tangible proof of the country's excellent coal potential." According to the latest energy ministry figures, the country's proven coal reserves have jumped from 175 million tons to 186 million tons of which 134 million tons are "mineable."

Some "forward-looking" policies have been implemented to encourage coal production and development. This includes the creation of the National Coal Authority (NCA) mainly to assure various industries shifting from oil to coal of adequate and stable supply.

Toward this end, the NCA is entrusted with the task of establishing an integrated system for coal handling, including importation, storage, blending and transportation facilities.

Under the government programme, the cement industry — one of the biggest oil users — will be the first to shift from petroleum to coal. Target date for the complete shift of the country's 18 cement plants is 1982.

By that time, according to estimates, the oil savings would total US$100 million a year. The amount is equivalent to about three million barrels of oil which the cement industry consumes annually.

But this is easier said than done. In fact, doubts have already been expressed not only by the World Bank but also by responsible cement industry officials about meeting the 1982 target date and other related problems.

For instance, the World Bank said the Philippines "set a very high target for the expansion of domestic coal production, hoping that the output could be increased over 20-fold during the decade, from a quarter of a million tons in 1979 to over six million tons by 1989."

Actual production, however, will only be in the range of 2.5 million tons, according to the bank. And the reason is simple. Although the country has good quality coal, its production technology is primitive.

The coal industry, the bank added, is dependent on underground mines which produce an average of 26 tons daily or 8,000 tons annually. About 80 per cent of the total output comes from the Central Philippine island of Cebu where 32 of the country's 37 coal mines are located.

At the same time, local cement industry officials have expressed fears that the government was not moving fast enough to meet the demands of the switch-to-coal programme. Right now, these officials said, only four cement plants have been using coal and at minimal quantity at that.

Besides the infrastructure for the shift has to be set up fast. The government is investing about one billion pesos (US$135 million) for a nationwide coal distribution network to be completed by 1985.

The project involves the construction of coal terminals to receive and blend the product and mine outloading ports where coal from the mining sites will be housed before these are transported to the terminals.

But government officials are confident of meeting these problems by 1985, the end of the accelerated five-year energy development programme.

They emphasise that the switch-to-coal programme is so far the only logical answer to the manifold problems besetting the cement industry.

"What the country needs is to try to correct those uneconomic operating practices developed during the bygone days of cheap fuel," said an energy ministry official.

And in this regard, coal offers a way out of the energy squeeze. But time is of the essence if the government wants to achieve its ambitious programme of reducing its heavy dependence on imported petroleum in just five years. — Depthnews

BRIEFS

FURTHER ANTISMUGGLING ACTION--Philippine customs authorities have started rigid inspection of diplomatic and government shipments to stop the use of these facilities for smuggling. This move was begun yesterday by Customs Commissioner Ramon Farolon, ending the traditional leniency on government importation and diplomatic shipments. The action was in line with the order by President Marcos for a strict inspection of all cargoes coming to all Philippine ports of entry. The order intensified the government campaign against all forms of smuggling. Customs authorities say there are several cases in the past where diplomatic and government cargoes were found to contain contraband. [Text] [HK210038 Manila FEBC in English 2330 GMT 20 Jul 81]

EFFORTS TO REHABILITATE RUBBER INDUSTRY

Kuala Lumpur BUSINESS TIMES in English 11 Jun 81 p 6

[Text] SRI LANKA, trailing far behind Malaysia as a bulk exporter of natural rubber could be leading the world in the search for higher yielding strains, in the race for high quality sheet and block rubber and in the pursuit of new applications for the product both at home and abroad.

Rubber was for long years Sri Lanka's second largest export earner but it has along with other major crops, shown a decline in production over the past few years.

The decline stemmed partly from the nationalisation of all major estates by the former government. It is believed that owners, agency houses and planters alike, fearful of expropriation for several years, cut down on fertiliser, replanting, weeding and plant care. The adverse effects of the neglect were compounded by adverse weather conditions.

Business circles fear Sri Lanka's rubber production will continue to drop to around 100,000 tonnes by the middle of the present decade from 160,000 tonnes in 1970.

But the Central Bank of Ceylon has forecast increases in production of 12 per cent by 1984.

Thus Sri Lanka's weather proof latex bowl and protected tapping lines ingeniously mainpulated by the Sri Lanka Rubber Research Station are facing the lash of other storms with its sheltering cover.

Natural rubber in Sri Lanka, in line with the pattern throughout producer areas in the world, is primarily a smallholder's crop. Some 70 per cent of Sri Lanka's natural rubber is grown in blocks of 10/15 acres or less. Its fortunes thus have immediate consequences for the rural population who make up three quarters of the island's inhabitants.

Alive to the issues involved, the government now headed by President J.R. Jayewardene is exerting itself to stabilise the position of rubber, indeed to effect a rise in yield and price if possible.

Unlike Malaysia and some of the other rubber growing countries, Sri Lanka faces the handicap that it is without new areas to bring under rubber.

It has, therefore, to stimulate its crops to higher levels: to make the most of land already planted in rubber to push up its yields rather than the acreage, and above all to push up its quality.

Earlier in the year, the Rubber Control Department stepped up its campaign to rehabilitate the industry by announcing a scheme to supply budded rubber stumps on credit to all holdings less than 50 acres in extent in a number of districts.

Replanting subsidies have been provided for several years now. It is now at the level of Rs 6500 ($810) per acre. This is to be treated as a non-repayable grant if the replanting is satisfactorily completed within a stipulated period.

Apart from high yielding planting material, fertilizer is also provided on concessional terms. Finally the current programme seeks also to encourage inter-cropping with cash crops such as bananas, passion fruit and coffee in replanted areas.

Meanwhile, the Sri Lanka Rubber Research Institute has launched a revived advisory services programme to ensure the rapid transference of scientific advances to smallholdings.

With tremendous development projects under way, with inflation buffeting the nation's cherished hopes, the authorities have recognised that as a potential exchange earner, rubber cannot be neglected. The government is relying heavily on the SLRRI to restore rubber's bounce.

By using yield stimulants local scientists have been able to effect a 20 — 30 per cent increase in yield.

The use of special rainguards over the tapping cut has made it possible to tap even in rainy weather. The SLRRI is also developing methods designed to bring new plantations into early production. Hitherto, local rubber has taken 6 — 7 years to come into tapping.

By the introduction of a nursery system followed by transplantation the Institute hopes to reduce this period by half. Highly complex studies in soil treatment are also being steadily pursued.

Beyond the area of cultivation and production, Sri Lanka has inaugurated its own rubber auctions in Colombo to counteract the manipulation of overseas vested interests. Besides, new incentives in the form of reduced duties are being offered to exporters.

Today Sri Lanka has embarked on a replanting plan covering 47,000 acres of old rubber, over a period of five years. World Bank assistance to the extent of US$16 million has been obtained to meet this target.

Last but not least is Sri Lanka's dream of emerging as a manufacturer of finished rubber goods. Already the country's tyre corporation has linked up with Goodrich Tires of the US.

More rubber from better trees on revived soil, and using some of the rubber to export value-added manufactures — that is the guideline along which Sri Lanka is proceeding.

COL PRACHAK SUPPORTS KRIANGSAK IN ROI ET ELECTION

Bangkok THE NATION REVIEW in English 14 Jul 81 p 3

[Text]

TWO Young Turk military officials yesterday threw their support behind former Premier Gen Kriangsak Chomanan, now contesting the by-election in Roi Et.

"Gen Kriangsak is the most appropriate person to run the government under the current situation," said Col Prachak Sawangchit who is one of the most outspoken Young Turks.

He said that the longer the government remained in office, the more divided the country would become as the people were getting fed up with the repeated failure of the government intacklingthe deteriorating economic andpolitical problems.

The current government has been too slow in tackling the problems besetting the country and only Gen Kriangsak is capable enough to avert the problems now surrounding the country in both home and foreign affairs.

Prachak also urged the former premier to join hands with former Deputy Premier Boonchu Rojanasatien in setting up a coalition to tide over the political and economic woes.

Refusing to estimate the possibility of his proposal, the Young Turk said he would like the duo to overlook their own prestige and jointly work for the good of the nation.

He also said that he was ready to throw his lots behind Gen Kriangsak in his election campaign on grounds that "the ex-premier is treading the democratic path."

He said, however, that he has not yet decided to travel to Roi Et to canvass for Gen Kriangsak. "The time is not ripe for me to do so and after all, there are other means to canvass for Gen Kriangsak," he added.

Meanwhile in Roi Et, another Young Turk said that he and his relatives and friends in the northeastern province would vote for Gen Kriangsak in the poll scheduled for August 9.

Lt Col Ronnachai Srisuworanan, a native of Roi Et, said that he would throw his full support behind the ex-premier in the by-election on similar grounds.

He said that should Gen Kriangsak win the by-election to the House, the domestic politics would undergo a drastic change, but he did not elaborate.

Most Young Turks, who had been dismissed for their roles in the April 1-3 abortive coup, were still quiet and neutral over the political situation because their political activities might affect their attempts to be reinstated in the military service.

PAPER VIEWS NGUYEN CO THACH'S PARIS COMMENTS

BK270215 Bangkok NATION REVIEW in English 27 Jul 81 p 4

[Editorial: "Phichai-Thach Talks Reveal a Few Key Points"]

[Text] It is of great significance that Vietnamese Foreign Minister Nguyen Co Thach and former Foreign Minister Phichai Rattakun held talks in Paris for two days just before the conference in New York convened to find a political solution to the invasion and occupation of Kampuchea by the Vietnamese and the guerrilla war that is being fought to oust them. The unofficial talks were of course extremely useful to Thailand but both Hanoi and Bangkok have still to assess how much mileage Vietnam got out of it. The talks, from Thailand's point of view, confirmed the ASEAN line of thinking about Vietnamese objectives.

It would have been very easily possible for Thach to meet Foreign Minister Sitthi Sawetsila in Bangkok or Hanoi or any other place. From the Vietnamese point of view Phichai was an obvious choice because he was the man who went to Hanoi and formalized diplomatic relations between Thailand and that country in 1976. There was also a seven point joint communique which, as almost all other agreements, Vietnam has consiged to limbo. Further, Thach might have thought that he would be able to influence Phichai's thinking who in turn might have some influence on both the Thai Government and on public opinion.

In this line of thinking the leaders in Hanoi were correct, but they failed to assess what sort of influence Phichai will have. Possibly they did not know that Phichai is one of the very few in Thailand who can be called an expert on foreign affairs and is nowhere near as naive as some American congressmen and senators manipulated by Hanoi during the Vietnam war. In the two-day talks in Paris, it appears that Thach wanted to convince Phichai, and through him the Thai Government and Thai public opinion, of Vietnam's genuine desire to bring peace to Kampuchea and even threw a sop in the form of going back on a regional conference--the effort was obviously made in vain and it also revealed that it was miscalculation on the part of Thach.

However, two basic assumptions held by ASEAN leaders were confirmed indirectly during the Paris talks. 1. Vietnam is hurting; 2. Vietnam wants to talk. That was why Thach proposed regional consultations, agreement on major points, and then an international conference. This is not a comedown on the part of Vietnam since the major points were only hinted at, one of them being Chinese leaving Paracels,

Americans leaving Subic Bay, Indonesians leaving East Timor, etc. And as usual the "Chinese threat" was always there. Phichai, of course, as a private citizen who is also a foreign affairs expert, suggested some lines for regional consultations which must have been quite unpalatable to Thach.

The Phichai-Thach talks also reveal that the approach taken by the 92 countries attending the New York conference on Kampuchea less than a fortnight ago was correct. It has been interpreted by Singapore Prime Minister Lee Kuan Yew as the hard-line approach by China and the U.S. and the soft-line face-saving approach by ASEAN and Japan. We agree with Lee's conclusion, that Vietnam needs to make peace with her neighbours and call off her confrontation with China, on the condition that the operative word in that sentence is needs. It is altogether another question whether Vietnam will act according to her needs. To some extent the Phichai-Thach talks reveal that Vietnam is beginning to realize her needs.

PIRACY SEEN AS DETERRENT TO REFUGEE MIGRATION

Paris LE MONDE in French 9 Jul 81 p 5

[Article by Jacques de Barrin]

[Text] Song Khla--"They did the stupidest things," one Vietnamese refugee says simply, as if there were no need to say more in order to be understood. And indeed, the violence to which the boat people are subjected when they fall into the hands of the pirates before reaching land is a well-known fact. "We were very lucky," a doctor from Ho Chi Minh City says. "We were attacked only three times." It is true that the crossings are sometimes much rougher. During the first five months of this year, out of the 323 boats that reached Thai shores and unloaded 10,963 refugees, 239 had been stopped by pirates. During that same period, there were 364 deaths or murders, 461 rapes and 134 kidnappings.

However precise these figures may be, they must be viewed cautiously insofar as they are based only on the accounts of the boat captains, gathered by officials from the UN High Commission on Refugees (HCR). The boat people are naturally tempted to exaggerate their accounts in the secret hope that the tale of their trials will bring them favorable treatment, priority settlement in a third country.

The exodus of Vietnamese refugees gives special emphasis to the scourge of piracy that has never ceased to run rampant in the region. Here, the sea is safe for no one. In April, a 160,000-ton oil tanker anchored only 3 miles off the coast of Singapore was attacked by six armed men, who managed to board it and then get away in a motorboat.

Organized into syndicates, the real professionals who enjoy a disturbing immunity "work" the high seas on big trawlers. Others are content to patrol the coasts. There remain the run-of-the-mill pirates: the Thai fishermen. A number of them, tired of putting down their nets into waters that yield fewer and fewer fish when the price of fuel makes it increasingly costly to operate their fleet (there are some 15,000 boats), do not hesitate to make up their losses on the backs of the boat people, if only by going to help vessels out of fuel or having suffered a breakdown and then demanding in return a "remuneration" out of all proportion to the service rendered.

The material means which the Thai Task Force has to fight piracy might appear ludicrous: one patrol boat equipped with machine guns and two small reconnaissance planes. One goes out to sea 4 days a week and the others fly 4 hours a day.

This six-month-old program, which began in February, was financed by a gift from the United States of $2 million. Discussions are underway to renew it.

In addition, local authorities have repaired a Vietnamese boat which they use as a trap in which armed soldiers put to sea. Since the beginning of the year, they have captured three gangs of pirates. Sailors have also been posted on Kra Island, where pirates were previously used to relaxing with their victims.

Deterrent Effect

Playing cops and robbers is not a pleasure game for the cop when one knows the area of the Gulf of Thailand, slightly larger than half that of France. Bangkok has therefore drawn up an exhaustive list of equipment, from boats to binoculars, which it would need to be able to handle the situation. The tab amounts to $34 million. The United Nations transmitted the request to member countries, who do not seem to be in any hurry to answer it.

Things would perhaps go a little better if the local authorities would control the activities of fishermen a little better. However, the absence of any registration of equipment, the lack of any knowledge about the destination of the boats and the dubious reliability of registrations of vessels complicate the task of finding the authors of violations or crimes, who are essentially of Thai nationality, although in the beginning of their adventure, the boat people sometimes have to deal with Vietnamese.

Some 20 Thai are now behind bars, accused of robberies, rapes or murders. Six trials are underway, but justice moves forward with often strange and exasperating delays. For the time being, one case seems to attract more than the usual amount of attention. It concerns 19 refugees suspected of having killed Thai fishermen who attacked them. Not sure of their rights, the two survivors, summoned as witnesses, preferred to flee (LE MONDE, 22 April).

In this regard, others state that excessively harsh repression of piracy may have -- has already had, according to some -- unexpected results, such as an increase in the number of murders and disappearances. In order to avoid run-ins with justice, the pirates are in fact inclined to simply do away with the subject of the litigation. No witnesses; no trial.

Worried about their country's image, Thai authorities fear that in the long run, these cases of piracy may tarnish their reputation. They therefore seek to fight the problem with the means on hand. And they must not be too zealous for fear of offending public opinion. In this case, public opinion would willingly take the side of the thief against the victim because of the solid antipathy for the Vietnamese, even if they are harmless refugees. Many Thai people have come to think that in a way, pracy is good insofar as it deters a certain number of Vietnamese from taking to the sea. "If the crossing were without risk," they say, "you can bet that countless boat people would come to our shores." Bangkok's concern, like that of the neighboring countries, which is expressed more loudly than ever today, is precisely to stop the flow that appears to be endless.

"The problem has to be solved at the source, in Vietnam," the Thais insist. Foreign affairs ministers from the Association of Southeast Asian Nations (ASEAN) meeting in Manila once again asked Hanoi to organize the departure of its natives legally instead of letting them flee haphazardly and exposing them to the stupidities of the pirates.

RTA ORGANIZATIONAL STRUCTURE REPORTED

Bangkok SIAM RAT SAPPADA WICHAN in Thai 14 Jun 81 pp 17-22

[Text] The Thai armed forces have permeated every aspect of the life of the people, whether in defense, political, social or economic affairs, but nevertheless are almost "taboo." There are few people who know and clearly understand the Thai armed forces in the matter of structure, personnel, regulations, or duties.

SIAM RAT SAPPADA WICHAN itself has published very little on the Thai armed forces when compared to other similar categories. Therefore, on this occasion it wishes to present general data on a broad scale relating to the Thai armed forces, with emphasis on the army.

It Begins at the Ministry of Defense

Under the 1960 Act Regulating the Ministry of Defense, the Ministry of Defense, to which the Thai armed forces are responsible, has powers and duties relating to the defense of the kingdom, by organizing military forces "to protect national independence and interest". The Minister of Defense gives the orders.

The Minister of Defense is responsible for employing the military forces according to the national defense plan, with the approval of the Cabinet. He has the power to designate any area as a military sector and/or a restricted zone when there is a war situation or a proclamation of martial law. This Act authorizes the Minister of Defense to stipulate units in the Ministry of Defense and appoint officials, defining new duties for those units as appropriate. This Act specifies that when a war situation is over or martial law is lifted, the Minister of Defense may abolish those government units and dismiss those officials.

Defense Council

This Act established a "Defense Council" to advise the Minister of Defense, with the following members.

1. Minister of Defense

2. Under Secretary, Ministry of Defense

3. Deputy Under Secretary, Ministry of Defense

4. Supreme Commander

5. Deputy Supreme Commander

6. Assistant Supreme Commander

7. Chief of Staff, Supreme Commander

8. Deputy Chief of Staff, Supreme Command

9. Commander-in-Chief, Royal Thai Army [RTA]

10. Deputy Commander-in-Chief, RTA

11. Assistant Commander-in-Chief, RTA

12. Chief of Staff, RTA

13. Commander-in-Chief, Royal Thai Navy [RTN]

14. Deputy Commander-in-Chief, RTN

15. Assistant Commander-in-Chief, RTN

16. Chief of Staff, RTN

17. Commander-in-Chief, Royal Thai Air Force [RTAF]

18. Deputy Commander-in-Chief, RTAF

19. Assistant Commander-in-Chief, RTAF

20. Chief of Staff, RTAF

21. Not more than three officers of general rank or above whom the Minister of Defense will appoint.

When there is a Deputy Minister or an Acting Minister he will be a member of the Defense Council also.

The Minister of Defense is chairman of the Defense Council ex officio. He will appoint the secretary and deputy secretary of the council.

The Defense Council has the duty to advise the Minister of Defense on the following subjects.

1. General military policy

2. Policy on complete mobilization to aid military

3. Administrative policy and command within the ministry

4. Military budget review and budget allocation for ministry

5. Review of draft laws dealing with the military

6. Any matter on which the Minister of Defense consults it

Divisions of the Ministry of Defense

The Ministry of Defense has these divisions:

1. Office of the Secretary to the Minister

2. Office of the Under Secretary, Ministry of Defense

3. Supreme Command Headquarters

1. Office of the Secretary to the Minister

The Office of the Secretary to the Minister has duties dealing with political affairs. The Secretary is the responsible official. The office is divided into a political section and an inspection section. The political section handles political matters that concern the Ministry of Defense and has a section chief in charge. The inspection section examines files, finances, and quartermaster functions of the office. A section chief is in charge.

2. Office of the Under Secretary, Ministry of Defense

The Office of the Under Secretary handles general routine functions of the Ministry and any not assigned to other units. The Under Secretary (at present Gen Thep Kranloet) is the responsible officer.

The Office of the Under Secretary is divided into:

1. Secretariat Department (Lt Gen Sangiam Rotthong, chief)

2. Judge Advocate General Department (Lt Gen Prathin Phatthanatham)

3. Finance Department (Lt Gen Phat Trakunladit)

4. Royal Aide-de-camp Department (Adm Niran Sirinawin)

5. Defense Energy Department (Lt Gen Chitrayut Kraisaraphong)

6. Armed Forces Industrial Department (Lt Gen Kamchon Phromyothi)

The duties of the departments follow.

The Secretariat Department handles correspondence, personnel, recruitment, and business of the Defense Council as well as routine functions of the ministry. The director is the responsible officer.

The Judge Advocate General Department is concerned with military courts, military prosecutors, judge advocate officers, and matters of administration and expertise in legal and sociological affairs. The Judge Advocate General is the chief of the department.

The Finance Department deals with the budget, finance, government and ministry accounts, under a department chief.

The Royal Aide-de-Camp Department has duties under the aide-de-camp law, with the chief aide-de-camp to the king as director.

The Defense Energy Department functions in planning, operations, supervision, research, development, procurement, storage, and services dealing with fuel oil or petroleum products and other types of energy, in accord with ministry policy. It supervises and promotes the activities of organizations that produce or market fuel oil or petroleum products, as it has received such assignments. A Director-General is in charge of the department.

The Armed Forces Industrial Department plans and operates industry related to the military, in accord with ministry policy, coordinating with other ministries involved in industry, which might be useful for the military. It supervises and promotes the activities of various industrial organizations, as it is assigned. The director is the responsible officer.

3. Supreme Command Headquarters

The Supreme Command Headquarters is responsible for preparing fighting forces and defending the kingdom. The Supreme Commander (at present Gen Soem na Nakhon) is in charge.

The Supreme Command Headquarters may appoint committees, sub-committees, or any individuals to pursue any subject concerning plans for protecting the independence and interests of the nation. The Supreme Command Headquarters is divided into: 1. Royal Thai Army 2. Royal Thai Navy 3. Royal Thai Air Force 4. Other departments as set forth by law.

The powers and duties of the services under the Supreme Command Headquarters are as follows.

The RTA prepares land forces and defends the kingdom under a commander-in-chief.

The RTN prepares naval forces and defends the kingdom under a commander-in-chief.

The RTAF prepares air forces and defends the kingdom under a commander-in-chief.

The Supreme Command Headquarters, the RTA, RTN, RTAF have status as juristic entities.

The 1963 Decree on the Divisions and Duties of Units of the Supreme Command Headquarters, Ministry of Defense, named other sections as follows.

1. Office of the Supreme Command (Gen Rian Ditbanchong)

2. Adjutant-General's Department (Lt Gen Banchoet Khongkhachan)

3. Directorate of Joint Personnel (Vice Air Marshal Sansoen Wanit)

4. Directorate of Joint Intelligence (Lt Gen At Chatinakrop)

5. Directorate of Joint Operations (Lt Gen Phin Kasen)

6. Directorate of Joint Logistics (Maj Gen Thawip Ratthanon)

7. Directorate of Joint Communications (Vice Adm Panya Khachasangsi)

8. Survey Department (Lt Gen Sawat Patchimsakun)

9. Directorate of Education and Research (Vice Adm Praphat Chanthakhet)

10. National Defense College (Lt Gen Nuan Hinchiranan)

11. Armed Forces Staff College (Air Vice Marshal Kiat Fuangwuthiran)

The functions of these units are as follows.

1. The Office of the Supreme Command conducts public relations, budget matters and performs other duties not assigned to special units in the Supreme Command Headquarters [SCH].

2. The Adjutant General's Department carries out duties regarding business, administration, finances, procurement of goods and services, transportation, lawsuits, and legal instruments.

3. The Directorate of Joint Personnel reviews and makes proposals on personnel policy and plans for assignments, promotions, discharges, and transfers. It considers plans and coordinates the plans of the RTA, RTN, and RTAF on recruitment of personnel, replacement of forces, discharges, observance of regulations, discipline, military police, preservation of tradition, and maintenance of morale.

4. The Directorate of Joint Intelligence reviews and makes proposals on intelligence policy and planning to protect national security. It directs and implements plans, coordinates the intelligence operations of the RTA, RTN, RTAF, and keeps in touch with the intelligence work of other government divisions. It administers and maintains the security of SCH. It coordinates and directs intelligence training and meteorology. It designates the distribution of military maps and coordinates requests. It reviews, assigns, and coordinates secret intelligence.

5. The Directorate of Joint Operations reviews and makes proposals on military policy and strategic planning. It coordinates the operational plans of the RTA, RTN, and RTAF. It plans joint defense under international treaties and military treaties. It coordinates national security activities with the Interior Ministry. It coordinates plans for air defense with the civilian sector. It carries out matters with foreign forces. It proposes policy and plans for joint training, combined training, special operations, and protection in war time.

6. The Directorate of Joint Logistics reviews and makes proposals on logistical policy and strategic planning for supply. It coordinates the logistical plans of the RTA, RTN, and RTAF, and logistical planning for joint defense under international treaties and military treaties. It coordinates logistical activity with other government units. It coordinates foreign military assistance. It collates evidence and statistics on resources which are useful in supporting operations aside from statistics on personnel.

7. The Directorate of Joint Communications directs and operates communications, communications intelligence, and war communications. It reviews communications plans to support military operational planning in national defense. It coordinates the communication plans of the military and civilian sectors. It operates the communications for the SCH in peace and war time. Besides the communications of the RTA, RTN, and RTAF it conducts communications with foreign countries under the international and military treaties.

8. The Survey Department makes land and aerial surveys to produce maps within the country for government use. It trains survey personnel and map experts for government service. It engages in geodetics and geophysics work.

9. The Directorate of Education and Resaerch reviews and makes proposals on military education and research on national security in military fields. It disseminates military knowledge. It keeps in touch and coordinates with educational and research institutions of other government sections and of foreign countries. It implements the work of the Military Education Council. It studies and collects military history, organizes and operates museums and libraries. It directs schools for the military as ordered by the Minister of Defense.

10. The National Defense College instructs high ranking officials, both military and civilian, in the science of national defense to impart an understanding of their joint responsibility in maintaining national security, useful in making policy for planning and administering national security.

11. The Armed Forces Staff College instructs high ranking military officers in joint operations combined operations and other knowledge profitable for planning and directing operations.

Main Element--the RTA

The army prepares land forces. It has a commander-in-chief (at present Gen Prem Tinsulanon).

The 1970 Decree on the Divisions and Duties of the Units of the RTA, SCH, Ministry of Defense, named these sections.

1. Office of the Secretary, RTA (Col Wichit Bunyawat)

2. Directorate of Personnel (Maj Gen Nop Phinnasaikaeo)

3. Directorate of Operations (Maj Gen Chawalit Yongchaiyut)

4. Directorate of Intelligence (Maj Gen Kamhaeng Khanthawirat)

5. Directorate of Logistics (Maj Gen Wichit Chittasewi)

6. Office of the Comptroller (Lt Gen Phaichit Somsuwan)

7. Reserve Affairs Department (Maj Gen Mana Rattanakoset)

8. Finance Department (Maj Gen Chot Mankhong)

9. Provost Marshal General Department (Maj Gen Pringkrai Krairik)

10. Inspector-General Department (Maj Gen Urai Sukhanthanak)

11. Special Services Department (Maj Gen Atsani Samutsen)

12. Adjutant-General's Department (Maj Gen Yongyut Kunladan)

13. Transportation Department (Maj Gen Phingkhan Sutcharitkun)

14. Engineering Department

15. Signals Department (Maj Gen Chaloem Karinayawat)

16. Veterinary and Remount Department (Maj Gen Prasat Chinerawat)

17. Quartermaster's Department (Maj Gen Chania Karunyawanit)

18. Medical Department (Maj Gen Yong Wirakhup)

19. Directorate of Army Construction (Maj Gen Fangphon Bunliang)

20. Ordnance Department (Lt Gen Thong-at Suphamat)

21. Chemical Department (Maj Gen Prayut Sutchaplum)

22. Army Area 1 (Lt Gen Athit Kamlang-ek)

23. Army Area 2 (Lt Gen Lak Salikhup)

24. Army Area 3 (Lt Gen Sima Panikkabut)

25. Army Area 4 (Lt Gen Chuan Wannarat)

26. Army Field Forces Department (Lt Gen Sak Buntrakun)

27. Army Institute (Lt Gen Sup Aksanranukhro)

28. Chulachomklao Royal Military Academy (Maj Gen Yutthasak Khlongtruatrok)

29. Territorial Defense Department (Lt Gen Thaimchai Sirisamphan)

30. Special Warfare Center (Maj Gen Anek Bunyathi)

31. Other military units which have status comparable to company, battalion, regiment, or division, directly under the army (previously for example, Division 9, which has now been transferred to the command of Army Area 1)

The functions of the 31 sections are as follows.

1. The Office of the Secretary, RTA, handles the routine administrative work of the commander-in-chief, the deputy commander-in-chief, the assistant commander-in-chief, the army chief of staff, and others, as designated by the commander-in-chief. It plans, directs, and coordinates army public relations.

2. The Directorate of Personnel plans, directs, coordinates, and controls all personnel action, that is, preparation of personnel, determination of needs, supervision, administration, and morale support. It advises and supervises the Reserve Affairs Department, the Provost Marshal General Department, the Special Services Department, and the Adjutant General Department on personnel matters.

3. The Directorate of Intelligence plans, directs, coordinates, and controls action concerning intelligence. It operates in affairs of intelligence, security, secret intelligence, and Thai military attaches abroad. It maintains contact with foreign military attaches in Thailand. It supervises diplomatic ceremonies in which the army must participate, the training and education of intelligence officers, and the preparation of intelligence operation teams. It determines the needs and supervises the distribution of military maps.

4. The Directorate of Operations plans and directs military strategy and operations. It plans the utilization of forces, as assigned, determines the organization and places the military units. It makes plans and policy in training, mobilization, demobilization, army aviation, special warfare, and war time administration. It carries on the work of military history and museums. It is in charge of and coordinates work in accord with plans and policy already set. It implements mutual defense treaties as they apply to the army. It directs, plans, coordinates, and controls army research. It supervises edcuational activities of the army.

5. The Directorate of Logistics plans, directs, and sets policy for programs and budgets concerning logistics. It establishes policy, coordinates, and controls requisitions and procurement of goods and military supplies. It supervises and controls storage, distribution of medical supplies, shipping, transportation, logistical services. It manages property. It coordinates, supervises, and oversees operational services in determining responsibilities, establishing regulations for operations, personnel action, logistical technical training, budget for research and development, including setting policy for business and industry that are involved.

6. The Office of the Comptroller collates and analyzes the results of inspection and analysis of army programs as whole. It handles, coordinates, and controls the budget, financial accounts, and audit. It stipulates the reporting system according to the program and the statistical reports. It supervises the reports. It makes inspections to improve management and operations in general. It sets standards for administration in the army. It supervises the Finance Department, defining responsibilities, regulations for operation and financial administration.

7. The Reserve Affairs Department coordinates, advises, and controls preparation, determination of needs, supervision, administration, morale support, training and education for all reserve forces. It coordinates, advises, and is in charge of setting standards, preparing texts, directing training and education for civil affairs and military administration. It works with recruiting officers and cooperates with the Adjutant General's Department in teaching recruitment techniques.

8. The Finance Department draws, receives, disburses, and maintains funds and financial accounts of the army in accord with government regulations. It trains finance officers.

9. The Provost Marshal General's Department plans, coordinates, and controls matters concerning the maintenance of disciplinary regulations, the arrest of military malefactors, prisons, military traffic, security maintenance, military police training, criminal investigation which is under the authority of the military courts, prevention and investigation of crime in the army. In wartime it is in charge of deserters, prisoners of war, aliens, enemies, and refugees.

10. The Inspector General's Department carries out government inspection, inquiries, and investigations concerning efficiency and activities of various army units.

11. The Special Services Department deals with welfare, promoting well-being, both in assets and consumer goods. It advises and develops vocations and sports, both for the military, civil servants and families in the army.

12. The Adjutant-General's Department handles routine business, the official paper work, ceremonies, procurement and distribution of printed material. It deals with personnel management, laws, and the training of adjutant officers.

13. The Transportation Department plans, directs, coordinates, advises, controls, conducts research and development on procurement, shipping, repair, and service. It sets standards, produces texts for training, on activities and supplies for transportation units.

14. The Engineering Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, repair and maintenance, and service. It sets standards, produces training texts for activity and supplies of engineering units.

15. The Signals Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, maintenance, and service. It sets standards and produces training texts for the activity and supplies of the signals units.

16. The Veterinary and Remount Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, maintenance, service, disease prevention, medical care, breeding, and animal feed. It sets standards and produces training texts on activity and supply of veterinary units.

17. The Quartermaster's Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, maintenance, and service.

It sets standards and produces training texts.

18. The Medical Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, maintenance, service, disease, preventative medicine, dentistry, and nursing care. It sets standards and produces training texts on activity and materiel for medical units.

19. The Directorate of Army Construction plans, directs, coordinates, advises, controls, conducts research and development on procurement, transport, construction and maintenance concerning army buildings and property.

20. The Ordnance Department plans, directs, coordinates, advises, controls, conducts research and development on production, procurement, transport, maintenance, and service. It sets standards and produces training texts on activities and materiel for ordnance and chemical warfare units.

21. The Chemical Department plans, directs, coordinates, controls research and development on production, transport, maintenance, and service. It sets standards and produces training texts on operations and chemical, biological and radiological protection, including the scientific activities.

22. Army Area 1 commands Army Circle 1, Army Circle 2, the Lop Buri military province, and military units designated by the Defense Ministry.

23. Army Area 2 commands Army Circle 3, Army Circle 6, the Udon military province, and military units designated by the Defense Ministry.

24. Army Area 3 commands Army Circle 4, Army Circle 7, and military units designated by the Defense Ministry.

25. Army Area 4 commands Army Circle 5 and units designated by the Defense Ministry.

26. The Army Field Forces Department coordinates, advises, controls, and inspects the training and education of individuals and units inside and outside the army and abroad. It directs the training of the infantry, cavalery, artillery, and army air units, and army chaplains. It commands units designated by the Defense Ministry.

27. The Army Institute trains commissioned officers in strategy, tactics, campaign, and staff work for units of division level and up, so they can perform the duties of a commander. It sets standards and conducts research and development in the areas concerned.

28. The Chulachomklao Royal Military Academy instructs and trains officer cadets.

29. The Territorial Defense Department develops army forces to protect the nation. It plans, directs, coordinates, and conducts training for commanders of reserve and volunteer defense forces.

30. The Special Warfare Center plans, directs, controls, and conducts training in special warfare, airborne troops, and airborne operations. It engages in research and development. It sets standards and produces texts in the field of knowledge concerned. It commands units designated by the Defense Ministry.

31. Other units which have a status comparable to company, battalion, regiment, or division, directly under army command, have duties as designated by the Defense Ministry.

Army Components

In brief, the army components are divided into five main groups: 1. Command 2. Field 3. Support 4. Provincial 5. Training

These components have the following divisions.

1. Command

a. Command headquarters: commander-in-chief, deputy commander-in-chief, two assistant commanders-in-chief, chief of staff, two deputy chiefs of staff, five assistant chiefs of staff.

b. Office of the Secretary

c. Staff departments: Directorate of Personnel, Directorate of Intelligence, Directorate of Operations, Directorate of Logistics, Office of the Comptroller.

d. Special activities departments: Finance Department, Reserve Affairs Department, Provost Marshal General's Department, Special Services Department, Adjutant General's Department, Inspector General's Department.

e. Military service departments: Engineering Department, Signals Department, Veterinary and Remount Department, Transportation Department, Medical Department, Quartermaster's Department, Directorate of Army Construction, Chemical Department, Ordnance Department.

2. Field

a. Army Area 1 is made up of:

1. Div 1 King's Guards, Inf 1 King's Guards, 11 King's Guards
2. Div 2, Inf 21 King's Guards, RCT 2

b. Army Area 2 is made up of:

1. Div 3 divided into RCT 3, RCT 6, RCT 13, RCT 23

c. Army Area 3 is made up of:

1. Div 4 divided into RCT 4, RCT 7

d. Army Area 4 is made up of:

1. Div 5 (RCT 5), RCT 15

e. Cavalry Division consists of:

1. Cavalry Regiment 1 2. Cavalry Regiment 2

f. Anti-aircraft artillery division consists of:

Anti-aircraft artillery regiment 1
Anti-aircraft artillery regiment 2

g. Division 9 consists of:

1. Inf Reg 9 2. Inf Reg 19

At present transferred to Army Area 1 command

h. Other support units

3. Support

Army logistics are the responsibility of nine service departments. There is a support headquarters for each army area (except Army Area 1). The service departments consist of units that support other units under army jurisdiction and warehouses (except Construction has a warehouse alone).

4. Provincial

a. Army Area 1

1. Army Circle 1 Bangkok military province (not full strength), Rat Buri military province, Rat Buri military province (Kanchanaburi section), Phet Buri military province, Sara Buri military province.

2. Army Circle 2 Chon Buri military province, Prachin Buri military province (under strength), Prachin Buri military province (Aranyaprathet section).

3. Lop Buri military province
Military units at strength stipulated by Defense Ministry

b. Army Area 2

1. Army Circle 3 Nakhon Ratchasima military province, (under strength), Khon Kaen military province, Surin military province.

2. Army Circle 6 Roi Et military province, Ubon military province

3. Udon military province, Udon military province (first section Sakon Nakhon), Udon military province (second section Nakhon Phanom)

c. Army Area 3

1. Army Circle 4 Nakhon Sawan military province (under strength), Phitsanulok military province, Uttaradit military province (under strength).

2. Army Circle 7 Chiang Mai military province, Chiang Rai military province, Lampang military province.

3. Military units as designated by Defense Ministry

d. Army Area 4

1. Army Circle 5 Chumphon military province, Nakhon Si Thammarat military province (under strength), Songkhla military province, Songkhla military province (Pattani section)

2. Military units designated by Defense Ministry

In summary, the provincial segment consists of 4 Army Areas, 7 Army Circles, and 22 military provinces.

5. Training

Army Field Forces Department

a. Infantry Center, Cavalry Center, Artillery Center, NCO School (under command of Infantry Center)

b. Army Institute, Army College, Army Staff College

c. Chulachomklao Royal Military Academy
Territorial Defense Department

d. Special Warfare Center

Summary

Most of the material in this article came from the Government Gazette, which included laws, Acts, Decrees, and royal appointments of officers.

These documents are all open to the public. SIAM RAT SAPPADA WICHAN simply collated them.

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

PARLIAMENT DISCUSSES POLLS, FORM OF GOVERNMENT

Prime Minister's Speech

Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 p 1

[Text] Prime Minister Shah Azizur Rahman called upon the Opposition parties to go to the people in the coming election and seek their mandate on their political programmes.

Taking part in the general discussion on the National Budget for 1981-82 in the Jatiya Sangsad on Thursday the Leader of the House said that the Opposition parties had a greater responsibility to ensure the proper functioning of a democratic system. The Government believes in peaceful transfer of power through periodic elections and not through adventurism he noted.

He defended the announcement of the date for the presidential elections and observed that there was no need for any discussion with the Opposition parties on the issue since it was a routine affair of the Government.

He commended the role of the Opposition parties in extending support for upholding the constitution and the democratic order following the assassination of President Ziaur Rahman.

Prime Minister termed the debate over the presidential system versus the parliamentary democracy as a healthy one. But he felt the sweeping observation of the Opposition parties about the presidential system as baseless. The presidential system is also democratic and the parliamentary form can as well degenerated into an autocratic rule he maintained. He cited examples from the USA and France to point out the democratic character of the presidential system. He referred to the instances from Pakistan India and Sri Lanka where parliamentary form of Government debased itself into a despotic rule.

He stated that there were merits and demerits of both forms of Government. The seizure of power by extra-constitutional methods through coups can take place under both parliamentary and presidential systems he said.

The Prime Minister observed that the form of Government was an electoral issue during the last presidential election. He contended that nowhere the legislative powers of the Parliament irrespective of the form of Government was absolute. He further observed that the Parliament in Bangladesh under the existing constitutional order was more democratic than the legislature in the USA or France

since the President had no veto power over the legislation enacted by the Jatiya Sangsad.

He stated that the common people were not really bothered about the system or form of Government. What they are interested in relates to peaceful living continuing stability and progress of the nation.

Referring to the Awami League (Hasina) demand for parliamentary form of Government Shah Azizur Rahman noted that it baffled all [word illegible] to find the member of the AL (Hasina) demanding [word illegible] introduction of the parliamentary system which was not compatible with Baksal philosophy. He urged the concerned party members to change their party manifesto first and then raise demand for parliamentary form of Government to make their stand on the issue a logical and consistent one.

Justifying the proclamation of the state of Emergency, he felt that it was proclaimed at a time when there existed an imminent danger to internal security following the assassination of President Ziaur Rahman. He, however, stated that the proclamation was only an enabling provision and observed that in case the Government decided to formulate the Emergency Rules, it would move a bill for enactment of such rules in the Jatiyo Sangsad. No fundamental rights of the individual citizens have as of now been suspended in effect under the Emergency Proclamation Order, he added. There is either no restriction on processions, demonstrations and meetings, he observed while pointing out that the last presidential and parliamentary elections were held also under a state of emergency.

Shah Azizur Rahman defended the Fifth Constitutional Amendment which, he claimed, ensured the continuity of Martial Law Regulations proclaimed between August 15, 1975 till April 19, 1979. He observed that the transition from Martial Law to democracy including the functioning of the present Parliament, the restoration of the fundamental rights and the formation of a Supreme Judicial Council were all covered under the Martial Law Regulations. This has ironically the case with us, he maintained.

He maintained that President Ziaur Rahman did neither proclaim Martial Law nor dissolve the Parliament. The Martial Law was proclaimed by the Government which came to power after the revolution on August 15, 1975 and the Parliament was dissolved by President Sayem on November 6, 1975, he noted.

He said that the Fourth Constitutional Amendment enacted during the Awami League regime had abridged the fundamental rights of the citizens and had given the President the absolute powers in all matters including the "hiring and firing of judges".

The Leader of the House felt that no analogy could be drawn between the killing of Sheikh Mujibur Rahman and that of President Ziaur Rahman. The coup in which Sheikh Mujib was killed a successful one and all successful coups have been taken cognizance of by the higher judicial institutions like the High Court and the Supreme Court, he said. The rebellion against President Ziaur Rahman that led to his assassination was the act of some miscreants and that was crushed, he added.

He termed the allegations of Mr. Sirajul Islam (AL-Hasina) about President Zia's having 472 pieces of "safari suits" as utterly false and baseless. He said that

late President Ziaur Rahman had only five pieces of safari suits made of cloths available in Dacca and made by a local tailor. The similar allegations made by the AL (Hasina) about the late leader's personal assets were also wild and figment of imagination, he added while pointing out that the total bank balances of President and Begum Zia would not exceed Taka 40,000. He noted that the three-roomed house where the late President living had no capacity to contain goods worth Taka 25 crore as alleged by Mr. Sirajul Islam.

Opposition Leader's Speech

Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 pp 1, 8

[Text] Mr. Asaduzzaman Khan, Leader of the Opposition (AL-H) called for introducing the parliamentary form of government in the country. He suggested that the government should invite all Opposition parties in a meeting to jointly evolve ways for transition to parliamentary democracy.

Participating in the general debate on national budget for the year 1981-82 Mr. Asaduzzaman Khan said that after the death of President Ziaur Rahman a big void had been created in the country and the nation had been plunged into a deep crisis. The crisis has been created due to concentration of all powers in the hands of one man under the presidential system.

The Leader of the Opposition regretted that the government had announced the election date without consulting the Opposition. He said that on May 30 last all the Opposition parties extended full cooperation to the government for upholding the Constitution and the democratic process in the country. He said that due to united efforts of the people, Armed Forces, BDR, Police and Ansars the country was able to overcome the crisis. "The entire credit goes to the nation as a whole for overcoming the crisis" he added.

Mr. Asaduzzaman Khan said that if all the political parties agree to amend the Constitution, the referendum will not be any problem. Earlier he said late President Ziaur Rahman had introduced the system of referendum which was a costly affair.

Mr. Asaduzzaman Khan alleged that the government has launched a propaganda to tarnish the image of Bangabandhu Sheikh Mujibur Rahman. He said that propaganda on the inventory was motivated and false. He also said that to undermine the role of Sheikh Mujibur Rahman the Treasury Bench had claimed that late President Ziaur Rahman had proclaimed the independence.

Quoting from the book written by Freedom Fighter and the then Major of EPR Major Rafiq, Mr. Khan said that President Zia read out the proclamation of independence announced by Sheikh Mujibur Rahman on March 26. Mr. Asaduzzaman Khan said that the message of independence was passed on to Chittagong which was first announced by late Mr. Hannan, an Awami League leader.

Mr. Khan termed President Ziaur Rahman as the killer of democracy. He claimed that President Ziaur Rahman while he was Deputy Chief Martial Law Administrator had dissolved the Parliament. Later replying to Mr. Asaduzzaman Khan, Leader of the House Prime Minister Shah Azizur Rahman said that the Parliament dissolved

by a Martial Law proclamation on November 6, 1975 when late Maj. Gen. Khaled Musharraf was in power. Ziaur Rahman became Deputy Chief Martial Law Administrator on November 7, 1975.

Mr. Asaduzzaman Khan criticised the government for retaining emergency in the country. He said that under the emergency the Opposition political workers were being harassed. He also demanded fresh enrolment of the voters.

Mr. Asaduzzaman Khan demanded release of all persons convicted under Martial Law and to allow the convicted persons the right of appeal. Mr. Asaduzzaman Khan urged the government not to arrest and harass the political workers. He alleged that even the people of a particular community whom the BNP say vote for us are also being harassed.

Commenting on the budget the Leader of the Opposition said that the budget would benefit only 15 per cent people of the country which include high civil and military officers, industrialists and rising capitalists. He said that the rural development has been ignored in the budget and there was no provision for checking the increase of the number of landless in the country. He claimed that the number of landless people were increasing.

Speaking on the Second Five Year Plan Mr. Asaduzzaman Khan said that the plan was dependent on foreign aid and the aid oriented plan cannot be implemented. He criticised the aid received from the western capitalists adding that the western aids are not without strings. He also said that for the petro-dollars this government had compromised the values of the Liberation War. He demanded that all aid agreements should be placed in the Jatiya Sangsad. Mr. Khan said that the multinational companies were exploiting the country.

EPZ Criticised

The Export Processing Zone was also an instrument for exploitation. Mr. Asaduzzaman Khan criticised the price spiral and inflation in the country. He said that the government had resorted to deficit financing which had aggravated the price situation. He said that the government had failed to achieve the production target in all fields. He, however, said that the food production had increased and that was due to favourable weather. He demanded fair price for agricultural produce and urged the government to fix the jute price at Taka 200.

Mr. Asaduzzaman Khan expressed concern over the deteriorating law and order situation in the country. He said that crimes had increased and there was political and secret killings. The government had failed to tackle the situation, he claimed.

The Opposition Leader demanded dissolution of the Newspaper Management Board and opposed the idea of keeping the newspapers under government control.

Speaking about the foreign policy Mr. Khan alleged that the government had failed to get the due share of the Ganges water and resolving the Talpatty crisis. He said that it was not true that he had said to all India Radio that the island belongs to India. "Talpatty is ours and we must have it," he added. He emphatically said that the government says the island is disputed, I say it is ours.

He, however, said that the Talpatty issue must be resolved peacefully and not by creating chaos.

Mr. Asaduzzaman Khan said that the government had also failed to get the assets from Pakistan and to resolve the problem of stranded Pakistanis. "We are spending Taka six crore every month for them," he added.

Criticising the tax proposals, Mr. Khan said that the new tax would affect the lower income group and the incidence of the taxes would fall on the poor people.

KRISHAK SRAMIK LEADER DISCUSSES ELECTION, GOVERNMENT

Dacca THE BANGLADESH OBSERVER in English 29 Jun 81 pp 1, 12

[Text] Mr. A. S. M. Solaiman, MP and Chief of Krishak Sramik Party, on Sunday urged the government to defer the date of Presidential election till November to facilitate participation of the Opposition parties in the polls, reports BSS.

He, however, spelt out a 10-point precondition, which includes the formation of Electoral College for elections of President and Vice-President for his party's participation in the election.

Addressing a Press conference in Dacca at the Jatiya Press Club, Mr. Solaiman said that the electoral College should comprise nine members from each union who would be elected through adult franchise.

Replying to a question, he said that the Electoral College should be automatically dissolved after the Presidential election and so it was not like the basic democracy system which was once introduced by General Ayub Khan, he pointed out.

The KSP leader said that this system was needed to make the Presidential election simple as it would not be possible for the Opposition to organise the four crore voters.

Mr. Solaiman demanded that the functions and responsibilities of the Prime Minister under a democratic system should be well defined and said that the Prime Minister must have the right to advise the President about formation of the Cabinet.

He said the present system in the country was neither Presidential nor Parliamentary".

The KSP Chief said that there should be provision to make the Minister's responsible to Parliament and the Parliament should have the power to move no confidence motion against the Cabinet.

Mr. Solaiman said that the appointment of the Ministers had to be approved by the Jatiya Sangsad.

He demanded release of all political prisoners irrespective of party affiliations.

The KSP leader told a questioner that his party would not participate in the Presidential election if those demands were not met.

He said that constitutional amendments would be required to meet his demands but there would be no need of referendum.

Mr. Solaiman said that a statement of Syed Azizul Huq Nanna Mia had created confusion about the KSP's joining with the 18-party alliance.

He pointed out that Syed Nanna Mia had no connection with KSP. The decision of the party regarding joining with the 18-party alliance would be taken at its Council Session to be held on August 2.

Mr. Solaiman described as "false" the claim of Nanna Mia that he (Nanna Mia) was elected KSP President at a meeting of the party's national committee on May 26.

He said that Syed Nanna Mia had joined BNP and had tried to seek the BNP nomination in 1979.

THREE-PARTY ALLIANCE TO TAKE PART IN ELECTIONS

Dacca THE BANGLADESH TIMES in English 26 Jun 81 pp 1, 8

[Text] Leaders of the three-party opposition alliance at a public meeting at the Baitul Mukarram Square on Thursday announced that they would take part in the coming presidential election.

Presided over by Major (Retd.) M. A. Jalil President, Jatiya Samajtantrik Dal (JSD), the meeting was also addressed by JSD General Secretary, A. S. M. Abdur Rab, Mr Shahjahan Siraj MP, Mr Rashed Khan Menon MP, Mr Haider Akbar Khan Rono, General Secretary, Bangladesh Workers' Party, First Secretary of Sramik Krishak Samajbadi Dal, Siddiqur Rahman and another member of the Party Khan Saifur Rahman.

The leaders of the three-party alliance appealed to all the progressive political parties to sit together, confer on election issue and decide a unified programme. "If there is no response from other parties, the three-party alliance will not allow the presidential election to go unchallenged," they declared.

They urged the Government to withdraw the emergency law, repeal all black laws and create conditions for holding of free and fair polls.

Major (Retd.) M. A. Jalil said that they did not want to enter into any debate on the system of Government at present. He said that the alliance considered both the presidential form and parliamentary form as unsuitable for the country. It was only a Parliament, duly represented by professional groups, could solve the problems of the people.

Abdur Rab

Mr A. S. M. Abdur Rab said that the alliance was not afraid of election but it must be free and fair. He said that there was no constitutional crisis in the country. "There is political crisis and it is yet to be over," he said.

He criticised the nomination of Mr Justice Abdus Sattar as a presidential candidate.

He urged the Government to hold enquiry into the killing of Major General Manjoor in order to correctly investigate the case of President Zia's assassination. He said that the three-party alliance was opposed to any killing.

Mr Shahjahan Siraj said that under the present Government the country did not make any progress in the economic fields. He criticised the Government for spending huge sums of money for non-productive sector.

Menon

Mr Rashed Khan Menon said that President Ziaur Rahman was assassinated when the three-party alliance was going to launch a massive movement against his Government. He described the assassination as a part of international conspiracy to divert the attention of the people from real problem.

He said that the people fought the War of Liberation to establish an exploitation-free society with a socialist economy. The hope of the people was frustrated by the betrayal of the Awami League Government he said.

He said that the Awami League which had fought for democracy for years killed democracy and imposed a one-man rule in the country against the wishes of the people.

Haider Rano

Mr Haider Akbar Khan Rano said that the root of the conspiracy which killed President Zia was deep-rooted and far away from the common man's imagination.

Siddiqur Rahman

Mr Siddiqur Rahman said that President Zia was killed because the super powers wanted to make Bangladesh subservient to them. 'Such killings take place whenever a leader tries to lead his country towards progress and tries to pursue independent policy' he said.

AMENDMENT TO ENABLE SATTAR ELECTION INTRODUCED

Dacca THE BANGLADESH OBSERVER in English 2 Jul 81 pp 1, 8

[Text] The Constitution (Sixth Amendment) Act, 1981 was introduced in the House by Prime Minister and Leader of the House Shah Azizur Rahman on Wednesday.

The entire Opposition excepting Mr. Rafiqullah Chowdhury of Gono Front staged a walk out protesting the introduction of the Sixth Amendment Bill.

In the objective of the Bill it is said that the Amendment seeks to remove certain anomalies in the Constitution regarding the eligibility of a sitting President and Vice-President for election to the office of the President. Under the Amendment of Article 51 for Clause (4) the following shall be substituted, namely "if a Vice-President is elected as President, he shall be deemed to have vacated his office on the date on which he enters upon the office of President." The Amendment of Article 66 in clause (2a) when passed will read as follows for the words "he is a Prime Minister", the words and commas "he is a President, Vice-President and Prime Minister" shall be substituted.

Replying to the objection and protest of the Opposition, Prime Minister Shah Azizur Rahman said that the Amendment was not "substantial but technical." He said that even if President Ziaur Rahman were alive this Amendment would have been necessary. This "certain anomaly" did not come before the notice of President Ziaur Rahman and so it was not amended when President Zia was alive the Prime Minister said. This anomaly, he further added, was an "inadvertent lapse" when the Constitution was "democratised" in 1978.

The Prime Minister refuted the Opposition's charge and said that the Amendment was not introduced for Acting President Mr. Justice Sattar or for BNP but for the institution and the nation. He said that Constitution is not a closed chapter and, if necessary more Amendments would be introduced.

Replying to the comments on the fitness and health of BNP presidential candidate, Acting President Mr. Justice Abdus Sattar, the Prime Minister said that such comments on an "honest and able person like our candidate were unfair". He told the Opposition members "if you meet our candidate you will find him quite fit." He assured all that Mr. Justice Adbus Sattar with his present health could give leadership to the nation for a long time. He told the Opposition that not only the old ones had diabetes but the younger ones could also suffer from the disease. He said that the Opposition was afraid of Mr. Justice Abdus Sattar's

nomination and so the Opposition members were trying to raise a storm over a cup of tea by protesting the introduction of the Amendment.

Referring to Awami League (Hasina) members, Prime Minister Shah Azizur Rahman said that if the Bangabandhu were alive such Amendments for reelection would have been necessary. 'Bangabandhu has no substitute and he does not come in every decade,' the Prime Minister said.

Earlier, the Opposition members raised a point of order objecting to the introduction of the amendment without the stipulated seven-day notice. They said that no bill could be introduced without this notice and the Speaker should not also waive this procedure. They also argued that the Leader of the House did not give reasonable explanation for the necessity of introducing the amendment. They accused the Government of introducing an amendment of the Constitution which is the sacred document of the nation only to "suit the interest of one single person and his election".

Leaders of the Opposition Mr Assaduzzaman Khan Mr. Yusuf Salahuddin Mr. Sudhangshu Shekhar Haldar of Awami League (Hasina), Mr. Mizanur Rahman Chowdhury (AL-Mizan), Mr. M. A. Matin (ML-Sabur) Mr. Salahuddin Quader Chowdhury (ML-Siddiqui) Mr. Suranjit Sen Gupta (Ekota Party), Mr. Rashed Khan Menon (Gonotantrik Andolan) Mr. Shahjahan Siraj and Mirza Abdul Latif of JSD, Mr. A. S. M. Solaiman (Gono Front) and Mr. Rezaul Alam Khondokar (IDL) talked on the point of order objecting to the introduction of the bill without proper notice.

Replying to the objection of the Opposition members Prime Minister Shah Azizur Rahman said that the Speaker had the right to waive the rule for seven days' notice in introducing a bill. He said that in 1975 the Fourth Amendment was introduced without proper notice and that set a bad precedence in the Parliament. At that time there was no discussion on the amendment but, he assured this time we would allow any discussion on the Sixth Amendment Bill.

The Opposition members retorted back and told the Leader of the House that one bad precedence does not justify creation of another. They said that history had ample evidence that no bad precedence could do anything good for the nation. They warned the ruling party of the same consequences of the bad precedence.

Deputy Speaker Mr. Sultan Ahmed Chowdhury who was in chair during the session in his ruling said that the Speaker was satisfied with the reasons for introducing the bill. He ruled out the point of order of the Opposition and advised the Opposition members to speak if they wanted to oppose the introduction of the bill.

Opposing the introduction of the bill Leader of the Opposition termed the amendment as malafide. He said the BNP always talks of upholding the ideals of their late leader President Ziaur Rahman but in their deeds the BNP members were violating his policies. President Ziaur Rahman, he said, had given the Fifth Amendment of the Constitution in which the Vice-President is not eligible to contest the presidential election as he holds a post of profit. While BNP was mourning the death of President Ziaur Rahman it was trying to amend the Constitution of the late President only in the "interest of one single person". He said that the BNP had introduced the amendment when the Election Commission had already announced the election schedule and the ruling party had nominated the Acting President as their

Presidential candidate. The BNP, he observed, was trying to legalise the nomination of the Acting President by amending the Constitution. He criticised the BNP for not moving any Amendment for a parliamentary form of government which the people wanted now.

Mr. Sudhangshu Shekhar Halder said that the structure and the very substance of the Constitution was going to be changed by the amendment. He said that no amendment should be introduced only to suit the interest of a single person.

Mr. Yusuf Salahuddin said that there was no need to bring this amendment. He observed that the amendment was not for the nation but for "one man".

Demanding the withdrawal of the Bill Mr. Shajahan Siraj said that the BNP members who took the oath to uphold the Constitution their leader President Ziaur Rahman had given were now trying to amend it in the interest of one single person. He demanded a referendum on the amendment.

Mr. Rashed Khan Menon said that the amendment had been moved only to legalise the nomination of a particular person totally ignoring the interest of the people.

Mr Mizanur Rahman Chowdhury advised the ruling party not to introduce any amendment in the interest of one single person. He said that the Opposition would support any amendment if it was aimed at introducing parliamentary form of Government.

Mr Salahuddin Quader Chowdhury termed the amendment as a personalised bill for "one man's interest and one man's election". He criticised the ruling party of creating another bad precedence only to remain in power.

Mr. Suranjit Sen Gupta said that the amendment had become necessary not for the interest of the nation but to suit the interest of the BNP presidential candidate. He challenged the BNP candidate to resign the post of Acting President and see how he could save his deposit money in the election. He observed that the Amendment was introduced to meet the crisis in BNP regarding the nomination of its presidential candidate."

Mr. Mohammad Toaha (Samyabadi Dal) said that no constitutional amendment should be introduced "only to meet the crisis in BNP". He demanded amendment for introducing parliamentary system and he said that both the Government and the Opposition should move a joint amendment on this.

IDL member Mr Rezaul Alam Khondokar said that the Sixth Amendment would meet the same fate of the Fourth Amendment. He termed the amendment for perpetuating the rule of one man of the ruling party.

Professor Muzaffar Ahmed said that while the Government was not eager to introduce any amendment for parliamentary system it did not hesitate to move an amendment to serve the interest of its candidate.

After the Opposition members spoke opposing the amendment the Leader of the Opposition declared that they were staging a walk out in protest against the introduction of the bill. Opposition members followed him.

IDL leader Moulana Abdur Rahim who entered the House minute before the walk-out took over the microphone and announced his party decision to walk out in protest against the introduction of the bill. He said that when all Opposition parties and people were demanding amendment for parliamentary system the ruling party had totally ignored their sentiment and moved this amendment only to elect its candidate". With these words he walked out of the House with his members.

The Deputy Speaker allowed the Leader of the House to introduce the bill. The Leader of the House sought the permission of the House to introduce the bill and in the absence of the Opposition and Independent Members he introduced the Bill.

As soon as the Leader of the House introduced the Bill the Opposition members led by the Leader of the Opposition re-entered the House and Mr. Asaduzzaman Khan told the Leader of the House and BNP Members that the Opposition would not allow the Government to pass the Bill without challenge.

Without allowing the session to continue further the Deputy Speaker adjourned the House till this (Thursday) morning.

BNP NOMINATES ACTING PRESIDENT SATTAR FOR PRESIDENT

Dacca THE BANGLADESH OBSERVER in English 23 Jun 81 p 1

[Text] Bangladesh Nationalist Party (BNP) has unanimously nominated Acting President Mr Justice Abdus Sattar as the presidential candidate for the ensuing election scheduled to be held on September 21.

The National Standing Committee of the Party which is the highest policy making body of BNP has endorsed the recommendation of the extended meeting of BNP held on Monday morning. The extended committee recommended the lone candidature of Mr. Justice Abdus Sattar as the party's presidential nominee.

The National Standing Committee meeting was attended by Dr. A. Q. M. Badruddoza Choudhury, State Minister Mr. Jamiruddin Sirker Dr A. F. M. Yusuf, Sheikh Razzak Ali, M. P. Prof. Md. Ekramul Huq, State Minister Syed Mahibul Hasan, Mr. Abdur Razzak Choudhury Dr. Mrs. Amina Rahman M.P. and Barrister Nazmul Huda.

Shah Azizur Rahman, Vice-Chairman of the Party who is also the member of the standing committee presided over the Standing Committee meeting.

Earlier in the morning the extended committee of the BNP consisting of Speaker, Deputy Speaker members of the National Standing Committee, office-bearers of the BNP Executive Committee, all members of the Council of Ministers, all members of the BNP Parliamentary Party, Presidents of all district units of the party and President and Secretaries of all front organisations unanimously recommended the candidature of Mr. Justice Abdus Sattar as the BNP Presidential candidate to the National Standing Committee for nomination. The name of Justice Abdus Sattar was proposed by State Minister for Youth Development Mr Abul Kashem and was seconded by Mr S. A. Bari A. T.

Talking to newsmen at his chamber at the Jatiya Sangsad Prime Minister Shah Azizur Rahman said there was no dissenting voice and the decision was unanimous. He said if there is any group against this decision within the party they were free to make a statement.

He further said that the mechanism for nominating the Presidential candidate was discussed in the meeting and it was decided that the extended meeting would recommend the candidature of the presidential candidate to the National Standing Committee which will act as the Parliamentary Party.

Replying to another question Shah Azizur Rahman ruled out the possibility of changing the polls date.

When asked if some other parties would support BNP candidate Shah Azir said "we will discuss this with different parties".

BSS adds: The decision to nominate Justice Sattar who is also the acting chairman of the party was approved at a meeting of the National Standing Committee of the BNP presided over by party Vice Chairman Prime Minister Shah Azizur Rahman.

Life Sketch

Born in 1906 Mr. Justice Abdus Sattar received his education in Calcutta. He obtained M. A. and B. L. degrees in 1928 and 1929 respectively and started legal career. He was Councillor Calcutta Corporation in 1939 and Assessor Member, Calcutta Improvement Tribunal from 1940 to 1942. He was enrolled as an Advocate in the Calcutta High Court in 1941. He was appointed Chief Executive Officer Calcutta Corporation in 1945.

Mr. Justice Sattar joined the Dacca High Court as an Advocate in 1950. He was elected Member of the second Constituent Assembly of Pakistan in 1954.

Mr. Justice Sattar was Minister for Interior and Education of Pakistan in 1956. He was appointed a Judge of the High Court of East Pakistan in 1957 and of the Supreme Court of Pakistan in 1968. He was appointed Chief Election Commissioner of Pakistan in 1969.

Mr. Justice Sattar was Chairman of the Board of Directors of Bangladesh Life Insurance Corporation in 1973 and Chairman of the Bangladesh Journalists Wage Board in 1974. He was Convener, Bangladesh National Group for Nomination of Members to the International Court of Justice. He is President of Bangladesh Institute of Law and International Affairs.

Mr. Justice A. Sattar had been Special Assistant to the President since 1975 and was in charge of Ministry of Law and Parliamentary Affairs till his appointment as Vice President of the People's Republic of Bangladesh on June 3 1977. Mr. Justice Sattar took active part in politics and was closely associated with Sher e Bangla A. K. Fazlul Haque and Mr. H. S. Subharawardy.

Mr. Justice Sattar has performed the Haj. He has visited a number of Asian and European countries. He takes interest in special work. His hobbies are reading and gardening.

MUSLIM LEAGUE NOMINATES SABUR FOR PRESIDENT

Dacca THE BANGLADESH OBSERVER in English 29 Jun 81 pp 1, 12

[Text] The Central Working Committee of Bangladesh Muslim League (Sabur) in its meeting on Sunday decided to contest the ensuing Presidential election and nominated party chief Khan A Subur as party candidate. Kazi Abdul Kader Party's General Secretary announced this decision in a Press release on Sunday.

The meeting demanded shifting of the date of Presidential election to November 23 instead of September 21. The resolution said that due to month of Ramadhan and rainy season election campaign would be difficult. The meeting called upon the people irrespective of caste and creed to extend support to ML "to establish Islamic Republic a welfare state". It may be mentioned that Muslim League (Sabur) is not a component of the 18 party alliance. Party's other faction led by Mr. Justice B. A. Siddiky is a component of the 18 party alliance.

COMMUNISTS, OTHERS SCORE ELECTION ANNOUNCEMENT

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 12

[Text] The Communist Party of Bangladesh which had only the other day called upon the political parties not to raise any controversy on the form of Government at this juncture joined eight other parties in criticising the Government for its "unilateral" action in announcing the date of the coming presidential election.

A statement issued on Saturday by the leaders of nine political parties said that the announcement of the election date reflected the "autocratic" character of the Government. The statement said the Government had by-passed the Opposition demand for switching over to parliamentary form of Government. The announcement of the election date the nine party feel had only demonstrated the narrowness of the Government. The nine parties also feel that the present situation was not conducive to the holding of election. By announcing the date of presidential election the Government had only vindicated its anti-people stand. The nine party warned the Government that it would have to bear the responsibility for all the consequences arising out of the Government's decision.

The signatories to the statement were leaders of AL(H) JSD NAP (Muzaffar) Ekota Party Workers Party CPB NAP(H) Samajbadi Dal and Gano Azadi League.

A political scientist asked to comment on the Opposition stand on the announcement of election date said he did not know of any instance where a Government in office had sought Opposition's view before announcing the date of election. He said the announcement of election date had always been the prerogative of the Government.

The political scientist said he had never come across a situation like the present one in which the Opposition is objecting to the holding of elections.

DEPUTY PRIME MINISTER SPEAKS AT CHITTAGONG PORT

Dacca THE BANGLADESH OBSERVER in English 29 Jun 81 pp 1, 12

[Text] Chittagong, June 28:--Deputy Prime Minister Mr. Jamaluddin Ahmad disclosed today that a urea fertilizer plant costing Taka 800 crore would be set up here under the private-sector, reports BSS.

The proposed plant would have an annual production capacity 5,60,000 tons.

He was inaugurating Taka 1.35 crore newly built lighterage jetty of Chittagong Port at Sadarghat here this morning. The Jetty with four hundred feet in length and about 42 feet breadth will facilitate berthing of small coasters for lighterage purpose. Syed Mansurul Huq, Chairman of Chittagong Port Authority also spoke in the function.

Mr. Jamaluddin Ahmad said that Taka 750 crore urea fertilizer plant now under construction on the other side of the River Karnaphuli would be completed by 1984. The plant with an annual production capacity of five lakh tons is being constructed under public sector.

The Deputy Prime Minister said negotiations are on, with some foreign countries regarding the setting up of the urea plant under private sector. He hoped that the negotiations would be fruitful.

Mr. Jamaluddin Ahmad said that a new steel mill based on natural gas would be set up in Chittagong in the near future. The mill, he said, would produce sponge iron. He said that the existing Chittagong Steel Mills would be expanded to enable it to increase its production for this purpose, he added. Necessary allocation has been made under the Second Five-Year Plan.

He said that there was an increasing pressure on the Chittagong Port with the increase in the volume of trade as well as cargo handling. The port, he said, has to be expanded and modernised to meet the increasing need. Under the Second Five-Year Plan Tk. 200 crore has been allocated for expansion and development of Chittagong Port. He further added, the entire expenditure for port expansion would be met from its own resources he said.

He said that the development of national economy was inextricably linked with the development of Chittagong Port as it is regarded as the economic gateway to Bangladesh.

Mr. Jamaluddin Ahmad said that the late President Ziaur Rahman had introduced a massive development programme in the country because he was anxious to bring about peace and happiness for the teeming millions. We will never lag behind in implementing the development programmes left before us by our beloved late President, he said.

The Deputy Prime Minister called upon the people to extend whole-hearted cooperation to the Government to carry on economic, social and political programmes at its hand. He hoped that there would be no hindrance on our onward march. He said that the commissioning of the lighterage jetty at Sadarghat was yet another achievement for Chittagong Port Authority.

Earlier, on Saturday Mr. Jamaluddin Ahmad addressed three condolence meetings at Situkunda Mirsaraj and Ramgarh. In these meetings he explained to the people the massive development programmes implemented during President Zia's rule. He urged the people to remain united and extend whole hearted cooperation to the Government in carrying on its uplift programmes.

DEMOCRATIC LEAGUE NATIONAL EXECUTIVE COMMITTEE MEETS

Dacca THE BANGLADESH OBSERVER in English 30 Jun 81 pp 1, 8

[Text] Democratic League at its national executive committee meeting held on Sunday demanded Parliamentary form of Government with sovereignty of the Parliament.

The meeting held under the chairmanship of Khondakar Moshtaq Ahmed at his residence at Agamasih Lane hailed the 18-party alliance and said that it has been formed for the greater interest of the nation at this hour of crisis.

The meeting in a resolution demanded repeal of black laws including Press and Publication Act release of all political prisoners now under detention and those convicted under Martial Law. It also criticised the Government for ignoring the Opposition political parties on the announcement of presidential polls date.

In another resolution, the meeting expressed its concern over the presence of Indian warships at South Talpatty and recent airport incident involving the illegal import of electronic equipment by the Embassy of USSR.

The meeting also expressed its deep condolence at the assassination of President Ziaur Rahman and conveyed its sympathy to the members of the bereaved family.

APPOINTMENT OF ELECTION RETURN OFFICERS ANNOUNCED

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 1

[Text] The Election Commission in a Gazette notification issued on Friday has appointed the Secretary of the Election Commission the Returning Officer and all Sub-Divisional Officers of the country Assistant Returning Officers for conducting the presidential polls to be held on September 21. The Assistant Returning Officers have been entrusted with the responsibility of the areas falling within their respective jurisdiction for the purpose of election to the office of the President, says an Election Commission Press release.

It further says the above mentioned appointments have been made in pursuance of the provisions of Sub-section (1) of Section 4 of the Presidential Election Ordinance, 1978 (Ordinance No. XIV of 1978).

It may be mentioned here that the Election Commission has already announced the schedule for the ensuing presidential election and this was disclosed by the Chief Election Commissioner, Mr. Justice A. K. M. Nurul Islam, on Wednesday in a nation-wide radio and television address.

As per the schedule, nomination papers will be received by the Returning Officer on August 10 and scrutiny of the nomination papers filed will be held on August 11, while the last date for withdrawal of candidature remains on August 17, 1981.

GANOTANTRIK CENTRAL COMMITTEE MEETING REPORTED

Dacca THE BANGLADESH TIMES in English 25 Jun 81 p 3

[Text] The three-day meeting of the Central Committee of Ganotantrik Party which concluded in Dacca on Monday said that the landing of troops on South Talpatty island by India backed by Soviet hegemonism the coup attempt at Chittagong and the assassination of President Ziaur Rahman within three weeks of the incident were not isolated events.

Presided over by Mr. Nurul Huda Mirza, Chairman of the Party, the meeting in a resolution said that although timely steps by patriotic people and the armed forces foiled the attempt by the identified local and foreign enemies of independent national existence to capture power, the planned and surprise attack had depended the political crisis in the country. Under such situation it has become clear that the present political system based on centralisation of powers in one hand was not suitable for the country, the resolution said.

In another resolution the meeting said that the occupation of South Talpatty by expansionist India was still continuing. And although the identified enemies of independence and sovereignty temporarily stepped back, they were yet to be suppressed. Under such situation the people have become more vocal about the demand for establishment of a sovereign parliament. The meeting criticised the hurried and unilateral announcement of the date of Presidential election by which, the meeting aid, effort had been made to continue the autocratic system. Such lack of foresightedness would further deepen the crisis instead of solving it, the meeting said.

The meeting called upon all patriotic and democratic-minded people to build united resistance against hegemonism expansionism, aggression and conspiracies for upholding national independence and for establishing the political and economic rights. The meeting also demanded immediate withdrawal of emergency, said a press release.

OPPOSITION COALITION CALLS FOR SHIFTING POLL DATE

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 pp 1, 12

[Text] Leaders of the 18-party alliance at a public meeting at Baitul Mukarram on Tuesday called for switching over to parliamentary form of government. They held that only a democratic government responsible to the Parliament could ensure solution of all national issues.

The leaders said that it is possible for the Government to hold a parliamentary election on the basis of adult franchise within 180 days by bringing necessary amendments to the Constitution through the present Jatiya Sangsad.

The meeting of the 18 party alliance held under the chairmanship of Mr. Ataur Rahman Khan MP, President of the Bangladesh Jatiya League, made six demands including shifting of the date of presidential election to the third week of November from September 21, offering of equal rights and facilities to all the Opposition political parties in all the publicity media including radio and television withdrawal of emergency, barring the ruling party candidate in the election from using government funds and vehicles for electioneering repeal of all black laws including the Press and Publication Act Special Powers Act, present labour laws and lastly release of all political prisoners.

The public meeting was addressed by Khondakar Mustaq Ahmed, Mr. Justice B. A. Siddiky Maulana Abdur Rahim of IDL, Kazi Zafar Ahmed of UPP, Shafiul Alam Prodhan of Jatiya Ganatantrik Party Nurur Rahman of NAP (B), Maulana Abdul Matin of Labour Party, Mrs. Amena Begum of Bangla Jatiya League M. Formanullah Khan of Bangladesh Islamic Party, Nurul Huda Mirza of Ganatantrik Party Syed Azizul Huq (Nanna Miah of KSP, Mr. Nurul Huq Mehdi Mr. Abu Nasser Khan Bhashani (NAP) Mr. T. Ali of Muslim League Mr. D. Barua of Samyabadi Dal Syed Manzurul Ahsan of Nezam-e-Islam.

Addressing the meeting Khondakar Mushtak Ahmed demanded of the government to hold a parliamentary election on the basis of direct franchise. He said that presidential form of government cannot bring welfare to the people as it leads to dictatorship.

He said that the present Government was sitting on a living volcano as it did not take lessons from the past. The Democratic League chief criticised the Government for unilaterally announcing the date of presidential election hastily only to stay in power. He termed it as a selfish trick by the ruling party.

Criticising the nomination of Mr. Justice Abdus Sattar by BNP, as presidential candidate Khondakar Mushtaq Ahmed said that the Acting President could not seek election constitutionally as he was holding the office of profit.

Slating the move of the ruling party to amend the Constitution to legalise the nomination of Mr. Justice Abdus Sattar, the DL chief said if it is done, it will be audacity of the ruling party.

Kazi Zafar Ahmed, Chairman of the United Peoples Party in his address criticised the Foreign Policy of the Government. He termed the present Foreign Policy as "submissive". He was also criticial of the illegal import of specialised electronic equipment by the Soviet Embassy in Dacca recently. He said that such equipment were very much dangerous for our sovereignty.

Mr Ataur Rahman Khan in his presidential speech, strongly favoured parliamentary form of government. Mr Khan alleged that the Constitution of the country was being defied for legalising the candidature of Mr Justice Abdus Sattar by the ruling party. He demanded shifting of the date of presidential election to November as the Ramzan and the rainy season would make it difficult for electioneering.

Criticising the weak Foreign Policy he said the country's sovereignty was in danger in the wake of Indian aggression at Talpatty.

ACTING PRESIDENT GREETS NEW CCP CHAIRMAN

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 pp 1, 12

[Text] Acting President Mr. Justice Abdus Sattar has sent the following message of warmest felicitations to Mr Hu Yaobang, Chairman of the Central Committee of Communist Party of the People's Republic of China on his assumption of the high office of the Chairmanship of the Party says a PID handout, issued on Tuesday.

In his message the Acting President said that under Mr Hu Yaobang's able guidance and leadership the friendly people of China will continue their onward march towards peace, progress and prosperity.

The Acting President said that as close neighbours China and Bangladesh are bound by ties of friendship dating back to centuries. He also said that during Mr Hu Yaobang's term of office Bangladesh looks forward to further widening and deepening of these friendly ties and increasing cooperation between these two countries in all fields.

On behalf of the Government and the people of the People's Republic of Bangladesh and on my own behalf I have pleasure in extending to your excellency our warmest felicitations on your assumption of the high office of the Chairman of the Central Committee of Communist Party of the People's Republic of China.

We are confident that under your able guidance and leadership the friendly people of China will continue their onward march towards peace, progress and prosperity.

As close neighbours China and Bangladesh are bound by ties of friendship dating back to centuries. During your term of office we look forward to further widening and deepening of these friendly ties and increasing cooperation between our two countries in all fields.

"I avail of this opportunity to wish your excellency happiness, long life and success and the friendly people of China continued progress and prosperity.

UNITED PEOPLE'S PARTY CHAIRMAN RESIGNS FROM PARTY

Dacca THE BANGLADESH OBSERVER in English 2 Jul 81 pp 1, 8

[Text] Mr A. K. M. Golam Kabir, Vice-Chairman of the United People's Party, on Wednesday resigned his post and primary membership of the party condemning the "anti-state and anti-people" stand taken by the party. The evaluation by the UPP of late President Zia was totally wrong and biased the statement added.

Mr Kabir in his statement said that the leadership of UPP wants to hide the truth and is afraid to announce the party decision for the fear of the people. Such attitude on the part of the party leadership was nothing but hypocrisy he added "I consider the present role of the UPP as being devoid of political honesty, dubious and deceiving" he pointed out.

The statement said that "during my long association with the UPP I have found that the party gives importance to tactics rather than principles. At the time of joining the Jatiyatabadi Front it was said that it was for tactical reasons and similar argument was advanced while quitting the Front. Mr Kabir reasoned that the condolence resolution sent to Begum Zia by the Central Committee of the party was also tactical. And it was not possible to accept such series of tactics obviously adopted to fulfil somebody's personal gain and ambition Mr Kabir asserted.

Mr Golam Kabir in his statement viewed that he was concerned about the adventurism and wrong politics of UPP following its underestimation of late President Ziaur Rahman at the party Central Committee meeting on May 30 and May 31. "I became disrespectful of the party and its leadership when I saw that they were unconcerned and jovial while the whole nation was mourning and anxious after the tragic death of President Ziaur Rahman. I feel that personal vengeance was given priority over the uncertain future of the people and the country and this was no honest political thinking" the statement pointed out.

AGREEMENT FOR JAPANESE AID SIGNED IN DACCA

Dacca THE BANGLADESH OBSERVER in English 23 Jun 81 pp 1, 12

[Text] Japan will provide Bangladesh 3.44 billion yen (over Tk. 26 crores) as grant for the establishment of a college of agricultural science and a national broadcasting house under two separate exchange of notes signed in Dacca on Monday reports BSS.

The grant of two billion yen (Taka 15.24 crore) for Bangladesh college of agricultural sciences to be set up at Joydevpur will be utilised by Bangladesh Agricultural Research Institute. The other grant of 1.44 billion yen (about Taka 11 crore) for national broadcasting house to be built at Sher-e Banglanagar will be used by Radio Bangladesh. The grants will be tied for procurement of equipment materials and services.

Japan which becomes the single largest contributor of bilateral aid to Bangladesh during the current financial year has provided about 226 million dollars as loans and grants. She (Japan) has been providing substantial economic assistance both in the form of grants and loans in vital sectors of the economy also topped the list of bilateral donors in 1978-79 with an aid amounting to 192 million U.S. dollars.

The exchange of notes were signed by Mr. A. K. M. Muhith Secretary External Resources Division Ministry of Finance and Mr. Hirohiko Otsuka Ambassador of Japan to Bangladesh on behalf of their respective governments.

Some of the projects recently financed under Japanese Government assistance are the Institute of Cardiovascular diseases BRTC central workshop Foodgrain Store House and the Central Extension Research Development Institute (CERDI). The projects which were either executed or under execution are Sonargaon Hotel Goalpara-Mongal-Barisal 132 K. V. transmission line procurement of 4 ocean-going vessel barge mounted power plant at Khulna Bheramara-Faridpur Barisal 132 K.V. transmission line BMR and E of Karnaphully Rayon Mills and Bakhrabad [word illegible] Field Development. Besides Japan will also be one of the largest co-financiers of the proposed Chittagong Urea Fertilizer Plant.

With the signing of notes on Monday total Japanese aid to Bangladesh since its birth rose to 222.196 billion yen (1058.07) million U.S. dollars) making her (Japan) the 2nd largest bilateral donor to this country.

The Japanese Ambassador said the signing symbolised Tokyo's continued determination to cooperate fully with the people and the Government of Bangladesh at its hour of difficulties. He said it also reflected Japan's eagerness to help build new Bangladesh a policy pursued by late President Ziaur Rahman. He assured that Japan would not spare any effort to assist Bangladesh in her development endeavours.

Mr. Otsuka said during the last three years Japan has increased its global economic assistance by 100 per cent and Bangladesh became the second recipient country. Paying high tributes to the leadership of President Ziaur Rahman the Japanese envoy said the late President was a great friend of Japan and visited his country twice.

Reciprocating Japanese gesture of goodwill Mr. Muhith said the signing demonstrates continuity of economic activities with that country. He said it indicates that economic cooperation with various other countries will grow.

DOCUMENT DETAILS APPROVED CHANGES IN '81-82 BUDGET

Dacca THE BANGLADESH OBSERVER in English 30 Jun 81 p 8

[Text] Notifications for implementing the announcement of the Finance Minister Mr. Saifur Rahman on Friday regarding some taxation proposals will soon be issued by the Internal Resources Division of the Finance Ministry an official source said on Monday reports BSS.

The notification will cover realignment of fiscal measures on various items.

A Press release issued on Monday said in his reply on June 26 at the end of the general discussion on the Budget proposals of 1981-82 Minister for Finance announced the following changes in the budgetary proposals after discussion with the Ministry of Law and Parliamentary Affairs about the legal aspects. The manner of giving effect to the announcements of the Finance Minister has been decided upon and necessary notifications are being issued.

Customs: (1) announcement of the Finance Minister: The proposal regarding the conversion of specific rate into an advalorem one and enhancing the same to 125 per cent adval from Taka 11.00 per KG, on betelnuts is withdrawn.

Implementation: an amendment notification is being issued subjecting betelnuts to the specific duty of Taka 11.00 per KG, as before giving effect on and from the 6th June 1981 (the date of announcement of budget).

(2) announcement of the Finance Minister: Withdrawal of the duty concession and sales tax exemption from the machinery and spares imported subsequent to the initial installation BMR and E will be modified subjecting these articles to a concessional duty rate of 40 per cent plus normal sales tax.

Implementation: a notification is being issued in implementation of the above announcement giving effect from the 6th June 1981 the date of budget announcement.

(3) announcement of the Finance Minister: The proposal regarding unifying the rates of duty at 40 per cent from 30 per cent 75 per cent and 15 per cent on fabrics having 85 per cent or more by weight of cotton in which the constituent year is below 57 counts (excepting jeans broken jeans, cord denim twill etc.) is withdrawn.

Implementation:--A notification going back to the tariffs of 30 per cent 75 per cent and 150 per cent depending on the counts of such fabrics as prevailed prior to the Budget proposals (except jeans cord etc.) is being issued.

Excise:--(4) announcement in Budget speech of the Finance Minister: It was proposed to impose 10 per cent adval duty on wooden furniture. Accordingly a new item 12.04 wooden furniture all sorts with 10 per cent duty was inserted in the First Schedule to the Excises and Salt Act, 1944 vide Second Schedule of the Finance Bill, 1981.

The Finance Minister also declared in the Parliament on June 26 that furniture of value up to Taka 250.00 per piece would be Exempted from excise duty.

Implementation:--An exemption notification is being issued under Section 12A of Excises and Salt Act 1944 with the concurrence of the Ministry of Law who have agreed to this procedure.

(5) announcement of Finance Minister's Budget speech: aluminium fittings and fixtures were subjected to duty of 20 per cent under heading No. 10.07 in the First Schedule to the Excises and Salt Act 1944 vide Second Schedule of the Finance Bill, 1981. The Finance Minister declared before the Parliament on June 26 reduction of rate of duty from 20 per cent to 10 per cent.

Implementation:--This is being implemented through an exemption notification under Section 12A of the Excises and Salt Act 1944 being issued with the concurrence of the Ministry of Law.

ISRAELI RAID ON IRAQI NUCLEAR PLANT CONDEMNED

Dacca THE BANGLADESH OBSERVER in English 23 Jun 81 p 1

[Text] United Nations, June 22.--Bangladesh has condemned the Israeli bombing of a nuclear plant in Iraq as "an unprovoked act of aggression", reports BSS.

Speaking at the United Nations Security Council debate on Wednesday last Bangladesh permanent representative K. M. Kaiser said the international community must condemn with one voice the irresponsible act of Israel and ensure that it was not repeated.

He said, "we view the situation with grave alarm". He said that on a stunned world the news broke of the sneak attack of Israel creating chaos and anarchy and sabotaging the attempts to establishment of rule of international law and efforts to control the demon of brute and naked use of military might in the region.

Bangladesh has repeatedly pointed at the root cause of the Middle East problem was Israel's greed for dominance, its arrogance, and its utter contemptuous disregard of all legal and human rights of other people of the region.

He said that the growing armed might of Israel poses a threat not only to the Middle East but also to the international peace and security and the principles and values which the international community is committed to uphold and defend.

Mr. Kaiser said that the denial of the inalienable rights to homeland to the Palestinians in their own land, usurpation of Arab and Palestinian territories by force and Israel's repeated aggressive activities in Lebanon were causing repeated set-back to establishment of peace in the region.

AWAMI LEAGUE HEAD URGES PARLIAMENTARY GOVERNMENT

Dacca THE BANGLADESH OBSERVER in English 27 Jun 81 p 12

[Text] Chittagong: June 25:--Mr Mizanur Rahman Chowdhury Chief of Awami League (M) today reiterated his call for introduction of Parliamentary democracy in the country to avoid confusion and constitutional crisis; reports BSS.

Addressing members of the Chittagong District Bar Association at the Bar Library Hall here in the afternoon he said that decentralisation of administrative power was necessary in the interest of the people.

The elected representatives of the people should have power and authority while the officers and employees of the government should be made responsible to the people's representatives for quick solution of problems.

Mr. Chowdhury said that many laws introduced during the colonial rule were still in vogue and that those were meant for oppression and divide and rule. He called for introduction of new laws to save the people from harassment in an independent and sovereign country colonial laws should not be allowed to function said adding that the people who are the source of power should also exercise authority otherwise their power would be meaningless.

The Awami League (M) Chief was critical of the Presidential system of government and said that under this system power concentrates in one hand for which administration can not be run smoothly. He said that 1972 making provision for Presidential system he pleaded for restoration of 1972 constitution and said that his party would continue to reiterate the demand.

Mr. Mizanur Rahman Chowdhury also called for evolving a welfare state by taking all good principles from different systems there is no harm in accepting good principles from different systems. There is no harm in accepting good things from any economic or political system he said. He opined that problems facing the country cannot be solved by increasing number of officers and employees but through evolving a system for quick solution of the problems.

Paying tributes to Mr. H. S. Suhrawardy Maulana Bhashani and Sheikh Mujibur Rahman Mr. Chowdhury said that the contributions of the late leaders should have to be acknowledged by one and all. He said that he had no hesitation in acknowledging the contributions of late President Ziaur Rahman as a freedom fighter for as President of the country.

Regarding the present constitution of the country he said it can be amended through an elaborate discussion with the Opposition or by holding a referendum.

ISLAMIC DEMOCRATIC LEAGUE TO TAKE PART IN POLL

Dacca THE BANGLADESH OBSERVER in English 28 Jun 81 pp 1, 12

[Text] Islamic Democratic League on Saturday announced its decision to participate in the ensuing Presidential elections scheduled to be held on September 21 next. The decision to participate in the election has been taken as part of the party's programme to implement Islamic ideology and introduce parliamentary democracy in the country.

Addressing a Press conference on Saturday the Chairman of IDL Moulana Abdur Rahim, MP said that the country was now facing grave political and constitutional crisis after the tragic death of President Ziaur Rahman. The neighbouring country in collusion with foreign power is trying to undo our independence and national sovereignty to fulfil expansionist design he added.

The chief of IDL, a component of the 18 party alliance, told the Press conference that India has forcibly occupied South Talpatty Island and the Indian troops and warships have entered the territorial waters of Bangladesh. Such Indian aggression amounted to undeclared war against Bangladesh he viewed.

Moulana Abdur Rahim said that an eleven member subcommittee has been formed by the Executive Committee of IDL to discuss about nominating a Presidential candidate and exchange views with like minded parties.

LEADERS DISCUSS DEFENSE BUDGET IN PARLIAMENT

Dacca THE BANGLADESH OBSERVER in English 28 Jun 81 pp 1, 12

[Text] Prime Minister Shah Azizur Rahman on Saturday stressed that consolidation and stabilisation of democracy was the strongest bulwark against any adventurism in the country reports BSS.

He further pointed out that the best way to keep the country free from the curse of Martial Law was to uphold the democracy and democratic values and discourage strictly the politics of terrorism and destruction.

The Prime Minister who was speaking on the demand for grant for the Defence sector in the Jatiya Sangsad in the evening made it clear that Martial Law was imposed in the country in the past only when some one had indulged in capturing power through the act of destruction and terrorism throwing away all democratic values to the wind.

He reiterated that democracy was like a child. We should nourish and nurture democracy with care and exercise utmost tolerance to the views of others so that it could consolidate and stabilise in the country to withstand all onslaughts against it.

Shah Azizur Rahman who is also the Leader of the House was happy to note that late President Ziaur Rahman during his tenure had been able to make our Armed Forces respectful to democracy. He was confident that the country would not be taken over by Martial Law in future "if we do not deviate from the path of democracy."

He therefore laid emphasis on the stabilisation of democracy in the country saying "it is the earnest desire of our Armed Forces that democracy sovereignty of people and sovereignty of Parliament are upheld in our country".

The Prime Minister emphatically dismissed the allegation of some members of the Sangsad that the Armed Forces were indulging in politics. He declared "They were not involved in any kind of politics and they are playing their patriotic role".

Paying tributes to the Armed Forces Shah Azizur Rahman said that they had earned the admiration of the people for their allegiance to our Constitution during the most turbulent time of the country.

He stated that the entire Armed Forces could not be blamed for the act of a handful of miscreants who had killed our President Ziaur Rahman. He appealed to all not to make any comment that amounted to aspersion on the whole Armed Forces and could create despondency in the minds of our people. The way our Armed Forces had expressed their allegiance to democracy Constitution and to the constitutional Government would be written in letters of gold in our history. He once again clarified that our armed forces were never involved in political affairs and "they are not doing them now."

The Leader of the House dismissed as sheer untrue the allegation that two Cabinet Ministers had recently been relieved of their duties at the behest of the Cantonment. There was no iota truth in it he said adding such rumour was being circulated by some quarters to create confusion.

Quoting constitution he told the Sangsad that the Ministers held office at the pleasure of the President alone.

Referring to the criticism of some members against the Acting President for his visit to Cantonment Shah Azizur Rahman noted that the Acting President had to visit Headquarters of Army Navy and Air Forces as a routine work to perform his function as the Supreme Commander of the Defence Forces. Such allegation was motivated to confuse the people he added.

The Leader of the House refuted the charge of Prof. Muzaffar Ahmed (NAP-Muzaffar) that sovereignty lies with the armed forces in Bangladesh. He declared that "sovereignty lies with the people and the Jatiya Sangsad which was the custodian of the people's sovereignty exercises the absolute power on behalf of the people".

Mr. Asaduzzaman Khan Leader of the Opposition said that people never sought any dictation from the army but would always hail such role as had been played by the Armed Forces during the national crisis following the killing of President Ziaur Rahman.

The people unitedly demonstrated their pledge to continue to uphold democracy when the Armed Forces lent their support which drew admiration of the people for them. The Opposition Leader said adding that they should stay in their own area and field.

The Armed Forces must not be utilised by anyone as "power base" he warned.

The necessary allocation for the Armed Forces will have to be provided with the hope that they would play their due role from their own locus standi Mr. Asaduzzaman Khan further told the Sangsad.

The Opposition Leader referred to Article 61 of the Constitution and said that with the changed circumstances laws regulating the Armed Forces should also be changed.

In this connection he mentioned how Bangobandhu Sheikh Mujibur Rahman had started building up the country from the ravages of a war when he even went for raising and building up the country's Armed Forces. But conspirators within the country with

the help of the imperialists finally succeeded in killing Bangobandhu Sheikh Mujibur Rahman who had resisted the cliques and conspiracies of the imperialists.

The situation was then driven by enemies of the country to a pass through machinations following the scourge of flood and its resultant afterrath refusal by America to supply food with the intention to prove to the world that Sheikh Mujib's Government was not capable of running the country Mr. Asaduzzaman Khan recalled. Besides Mr. Khan recalled the country faced inimical posture adopted by China which did not support our freedom struggle and the natural calamities. The Bangobandhu was killed and no trial could be held he regretted saying such thing must be opposed.

Mr Khan thanked the Armed Forces for its role in upholding the supremacy of democratic rule during the recent crisis.

PAPER GIVES DETAILS ON ILLEGAL SOVIET SHIPMENT

Airport Incident Described

Dacca THE BANGLADESH TIMES in English 22 Jun 81 pp 1, 8

[Text] The Soviet Embassy which imported sophisticated electronics equipment on Tuesday last under the label of construction materials was not given clearance to take them out of the airport till Sunday night.

The Embassy earlier tried to remove them from the airport without valid clearance and in the process assaulted security personnel of the airport.

When contacted Foreign Secretary Mr Humayun Rashid Chowdhury said that he was awaiting a report of the incident which he expected today (Monday). Official reaction would be given then, he said.

Asked if the Soviet Embassy imported these materials with the clearance of the Government Mr Chowdhury mentioned the Geneva Convention. Und the Geneva Convention any foreign embassy is under obligation to submit a list of things they propose to import for getting clearance. Normally embassy imports are not customs-checked if there is prior clearance by the Foreign Ministry.

But the Foreign Ministry can order customs check if it considers that imports contained contraband items. In this particular case the Soviet Embassy did not submit nor inform the Foreign Ministry about the import of these materials. Therefore, the question of Foreign Ministry's clearance did not arise.

Foreign Secretary Mr Chowdhury said "I have every intention to enforce the Geneva Convention as we are a sovereign and independent country."

According to airport sources, a special Aeroflot cargo flight brought in hundred forty crates of cargo on Tuesday night. On Saturday Soviet Embassy officials with their own trucks and pick-ups entered the airport forcibly brushing aside security guards at the gate. Then they tried to load the trucks and pick-ups. When airport employees asked them to produce documents they failed.

Meanwhile, other employees of the airport arrived and asked the Soviet embassy officials to produce the clearance by Foreign Minister before they could remove the crates.

Later, they were asked to get these crates which were supposedly carrying building materials checked by the airport customs. At the checking Soviet diplomats and Foreign Ministry representatives were present.

It is learnt that when a crate was opened it was found to contain sophisticated communication equipment. A National Security Intelligence official tried to take photographs of these items which is normal for keeping record. At this a Soviet diplomat reportedly punched upon him and snatched the camera and banged it on the floor. The NSI official also got hurt, it is learnt.

According to reports, the communication equipment include highly sophisticated frequency analyser which can be used to listen to any wireless communication around the region. Besides, there are signal generators, transmitters and other equipment weighing ten tonnes.

Party Leaders React

Dacca THE BANGLADESH TIMES in English 22 Jun 81 pp 1, 8

[Text] Political parties on Sunday condemned the activities of the Soviet Embassy officials in Dacca and expressed concern over the import of "prohibited goods" such as highly-sensitive electronics equipment used for espionage" by them.

They demanded expulsion of Soviet Embassy personnel who were engaged in espionage. While condemning the assault on security officials on duty at Dacca International Airport, Kurmitola, the political leaders expressed concern that such activities could not but be a part of a deep-laid conspiracy.

Ganotantrik Party

The Central Committee of the Ganotantrik Party which was in session since Saturday was of the opinion that these items were imported for exchange of secret information affecting the security of Bangladesh and said that such activity by the embassy of an expansionist power at the present situation was unholy and significant."

The Central Committee of the Party said that import of such wireless equipment under the guise of construction materials was a misuse of diplomatic privileges and demanded appropriate action against such activity.

Samyabadi Dal

Messrs Mohammad Toaha, Chairman and Prof Yusuf Ali, General Secretary of Bangladesher Samyabadi Dal in a joint statement to the Press urged the Government to publish a white paper as to when the Soviet plane landed at Kurmitola Airport without prior permission and what "secret arms" were brought in by it.

They also urged the nine crore people of the country to resist any conspiracy of "social imperialists."

They alleged that the Government had failed to tackle the incident. They said that the conspiracy at the airport and the attack on security officials by the

embassy employees amounted to open threat to the independence and sovereignty of Bangladesh.

UPP

Kazi Zafar Ahmed, Chairman and Mr. Mostafa Jamal Haider, General Secretary of United Peoples Party in a similar joint statement to the Press demanded immediate publication of a white paper on the "dubious activities by the Soviet Embassy in Bangladesh."

They said that the Embassy which imported wireless items in the name of importing construction materials by taking advantage of diplomatic privileges even employed physical force to get those items transferred from the airport by receiving the airport security staff.

They said that these activity leave enough reasons to doubt that social imperialists were engaged in a "deep-laid all-out conspiracy."

The UPP leaders said that such doubt had been deepened because of threat of "Afghan style revolution in Bangladesh" and the recent activities of the "identified lackeys of Indo-Soviet axis" said a Press release.

Jamaat-e-Islami

Mr Abbas Ali Khan Acting Amir, Jamaat-e-Islami in a similar statement said that the import of prohibited items by the Soviet Embassy by passing diplomatic norms was dubious and conspiratorial to the independence and sovereignty of Bangladesh.

He said that the entrance to the prohibited zone of the airport without permission, attempt at loading imported goods on trucks without necessary Customs clearance and the attack on security officials and then breaking his camera by the embassy employees were dubious, mysterious and audacious.

While protesting against such activity on the part of the embassy; he urged the Government to lodge strong protest against this and to stop such antidiplomatic, dubious and conspiratorial activity. He said that the people of Bangladesh were determined to resist any conspiracy by imperialist and expansionist forces, said a Press release.

Mr Garib Newaz Chairman Bangladesh People League (Newaz) expressed his deep concern over the import of prohibited items by the Soviet Embassy and said this amounted to threat on the independence and sovereignty of Bangladesh.

He demanded expulsion of the Soviet diplomats in Dacca saying that it could not be beyond doubt whether the embassy did not import such prohibited items in the past and that the continuance of the status quo might further endanger national security.

IDL

Moulana Abdus Sobhan Secretary General Islamic Democratic League in a similar statement to the Press condemned the import of prohibited items and urged the

Government to take appropriate action against such "serious espionage under the cover of diplomatic activities."

He said that detection of the import of "sensitive equipment" in the name of bringing construction materials was a cause of concern and highlighted fact that such "espionage equipment were imported by the embassy in the past."

Moulana Sobhan said that a large numbers of diplomats and cars of the Soviet embassy in Bangladesh and the establishment of a large consulate at Chittagong by it was a proof of a network of espionage. He urged the Government to expel diplomats engaged in espionage and called upon the people to organise resistance against such activities.

Tanzim-ul Ulema

In a similar statement the Members of the Central Convening Committee of Tanzim-ul-Ulema Bangladesh condemned the activity of the Soviet embassy in Dacca and urged the government to take appropriate steps against such activities.

More Reaction Reported

Dacca THE BANGLADESH OBSERVER in English 23 Jun 81 pp 1, 12

[Text] Different political and students organisations on Monday condemned the illegal import of specialised electronic equipment by the Soviet Embassy in Dacca in the name of building materials and behaviour of some of the Embassy officials defying the diplomatic norms at Dacca International Airport on Saturday.

Mr. Atiqul Islam General Secretary of Jubo Muslim League and Mr. Mamunur Rashid Convener of Dacca City Jubo Muslim League in a statement on Monday condemned the illegal import of high powered electronic equipment by the Soviet Embassy in Dacca. They said that the attempt of some Soviet Embassy officials to get those equipment released forcibly was equally unfortunate and devoid of normal diplomatic behaviour.

The National Awami Party (Bhashani) condemning the illegal import of electronic equipment in the name of building materials demanded of the government to keep watch on the activities of the Soviet Embassy officials in the interest of the nation.

Mr. Matiur Rahman and Principal Sirajul Huq President and General Secretary respectively of the Progressive Democratic Force demanded of the Government to investigate into the activities of the Soviet Embassy in Dacca and publish a White Paper in this regard. They also condemned the illegal import of electronic equipment in the name of building materials by the Embassy.

Other organisations which expressed their concern over the airport incident were Banglaldesh Jubo Muslim League Farakka O Simanta Hamla Protirodh Committee Jamiat e Ulama e Islam Bangladesh Mr. Shamsul Huda Chairman Gono Muslim League Mr. Shafiqur Rahman (IDL) Major (Retd.) Afsaruddin President NDP, Dr. K. N. Islam Convener Jatiya Sevak Dal Mr. Abdul Khaleque Joint Convener NAP (Bashani) Advocate Golam Mohiuddin Convener Jatiya Dal (Mohiuddin) Sarafat Hossain Chairman Rep Republican Party Syed Sirajul Huda President Jatiya Dal (Huda) and Hazrat Ali Sikdar of Jatiya Sevak Dal. These organisations also demanded closure of Soviet Consulate in Chittagong.

NURUL ISLAM LEAVES CABINET POST, JOINS BNP

Islam, Hossain Relieved

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 1

[Text] Major General (Retd) Nurul Islam and Lt. Col (Retd) Akbar Hossain have been relieved of their duties as Ministers with immediate effect, an official announcement said, reports BSS.

The announcement made on Saturday night from Bangabhaban said: "The Acting President Justice Abdus Sattar has been pleased to relieve Major General (Retd) Nurul Islam and Lt. Col. (Retd) Akbar Hossain of their duties as Ministers with immediate effect".

Islam Joins BNP

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 1

[Text] Major General (Retd) Nurul Islam, Minister for Agriculture and Forest on Saturday formally joined the Bangladesh Nationalist Party (BNP) reports BSS.

Disclosing this the Joint Secretary General of the BNP, Mr. Ferdous Ahmed Quoreshi said that General Islam had formally signed the membership form on Saturday morning.

Later in a statement, General Islam said "I have thought myself as an integral part of the BNP right from its inception and even before its inception. At the request of the respected Secretary General, Dr. Badruddoza Chowdhury, Joint Secretary General Messrs Ferdous Ahmed Quoreshi and Julmat Ali Khan, and other well wishers in the party and in the front organisations, I have formally signed the membership form today. In fact, I have only formalised my emotional attachment with the party its philoosphy and its late great leader Ziaur Rahman.

The late President was the source of inspiration behind all my activities for the last five and a half years and today his memory is my basic strength and most significant inspiration."

NURUL ISLAM CONGRATULATES SATTAR ON NOMINATION

Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 pp 1, 8

[Text] Major General (Retd.) Nurul Islam congratulated Acting President Mr. Justice Abdus Sattar for being nominated by Bangladesh Nationalist Party (BNP) as Presidential candidate. He pledged all his support in the victory of Justice Sattar in the next election. He also admired the Acting President Mr. Justice Sattar for tackling the crisis successfully after the death of President Zia.

Following is the full text of the statement issued by Major General (Retd) Nurul Islam.

"I congratulate the Acting President Mr. Justice Abdus Sattar for being nominated by Bangladesh Nationalist Party as a candidate for the next Presidential election. As a member of the Party, I sincerely pray to the Almighty God for his good health and victory in the elections. It is indeed creditable that in spite of being ill at the time of the tragic death of our late President Acting President Abdus Sattar has steered the country admirably towards a constitutional transition. The Acting President during the last five years in his capacities as Special Assistant and Vice-President has provided invaluable support to all the political and economic programmes of our beloved late President.

"I would like to express my deep personal gratitude to him for all the support cooperation and affection that I enjoyed from him in the last five years and a half during my association with the Government in different capacities. I pledge all my support to his victory to the ensuing election. In the interest of democracy and in the interest of a continued economic development programme, which is so vital to our people majority of whom are still living below the subsistence level we should all pray for his victory and work wholeheartedly towards that goal".

SATTAR MESSAGE TO U.N. ON AFRICAN SOLIDARITY REPORTED

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 1

[Text] Bangladesh has reaffirmed once again its "total and unflinching support" to the just struggle of the people of Southern Africa for the elimination of all forms of racial discrimination and apartheid, reports ENA.

The Bangladesh stand was reiterated in a message sent by Acting President Abdus Sattar to a meeting in New York held recently in observance of the International Day of Solidarity with the people of South Africa.

The message which was available here today was read out at the meeting by the Bangladesh Permanent Representative at the UN.

It said "we salute the countless victims of apartheid who have to suffer daily humiliation and indignation under the repressive laws of the racist regime".

"Year after year the special committee against apartheid had catalogued the extent and escalation of the policy of discrimination based on apartheid and racial discrimination. The policy of apartheid has meant denial of representation to the overwhelming majority of the people which has perpetuated economic discrimination on an unprecedented scale and dispossession and forcible transfer of millions of Africans under restrictive laws curtailing their elementary freedom in their own country.

Thousands of Africans have been tortured or murdered. Intimidation and harassment has been sanctioned by law. The humanitarian and the political dimension of apartheid needs no elaboration. It has rightly been termed by international community as a crime against humanity.

The message said the people of Africa have secured remarkable achievements in their struggle against colonial domination and racism. The final elimination of the last vestige of colonialism racism and apartheid in the Southern Africa is inevitable it added.

Our support to the legitimate rights and aspirations of the struggling people of South Africa is total and unequivocal. We believe that the universal commitment of the international community as demonstrated by the international conference on sanctions against South Africa will provide a fresh impetus to the continued struggle of the people of South Africa for the final elimination of all forms of colonial and racist oppression in Southern Africa" the message said.

ZIA'S WIDOW DENIES MEETING WITH BEGUM MANZOOR

Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 pp 1, 12

[Text] Begum Khaleda Zia on Saturday described as "fabricated and motivated" the report published in the weekly ITTEHAD that she had "secretly met with Begum Manzoor and none of them believed that Manzoor had killed Zia" reports BSS.

The widow of the late President in a statement said at a time when the whole nation was passing through a critical juncture following the tragic assassination of her husband publication of such baseless and confusing story is not only against honest journalism but also a sign of mad taste.

Begum Zia said: "The rumour-based report connecting my name which was published in the June 19 issue of the weekly ITTEHAD has come to my notice. It said I had a secret meeting with Begum Manzoor and neither Begum Zia nor Begum Manzoor believes that Manzoor had killed Zia". The report in ITTEHAD further mentioned that "they met on Friday in a house in the Cantonment".

Although this imaginary story was described as rumours yet attempt is being made to pass it as a true story.

"When the whole nation is standing at a critical juncture following the tragic assassination of my husband and when I and my two minor sons are in deep grief publication of such baseless and confusing report is not only against the policy of honest journalism but also a sign of bad taste.

I want to make it clear for the information of the people of the country that the report published in the ITTEHAD is totally fabricated and motivated and I have no language to condemn it.

I do not know what action Government will take against such misleading propaganda. I also do not want to make a comment in this regard. However I believe that Government will take appropriate steps to check a repetition of such things.

In this connection I appeal to all the newspapers as well as the people of the country to refrain from involving my name with such imaginary stories in the greater interest of the nation.

AMENDMENT TO ENABLE SATTAR ELECTION RECOMMENDED

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 p 1

[Text] The BNP Parliamentary Party unanimously recommended introduction and consideration of the Constitution 6th Amendment during the current session of the Jatiya Sangsad at its meeting held on Tuesday morning with the Leader of the House and Prime Minister Shah Azizur Rahman in the chair.

The proposed Amendment to the Constitution will be to remove anomaly for the eligibility of the Acting President to seek the presidential election the Prime Minister Shah Azizur Rahman told BSS.

The proposed Constitution Amendment Bill is likely to be introduced in the House today (Wednesday).

At the end of two-hour-long meeting the Prime Minister said the Parliamentary Party which constituted a committee to suggest "any further Amendment" to the Constitution also set up another committee to prepare a draft of the privileges of the members and enactment of a law for establishment of the District Development Boards.

Headed by the Leader of the House Shah Azizur Rahman the BNP Parliamentary Committee formed to suggest amendments to the Constitution comprises among others Dr A. Q. M. Badruddoza Chowdhury Secretary-General of BNP and Deputy Leader of the House two Deputy Prime Ministers Mr Jamaluddin Ahmed and Mr S. A. Bari A.T. Civil Aviation Minister Mr Obaidur Rahman Mr Moudud Ahmed the Railway Minister Mr Abdul Alim Begum Taslima Abed Mr Anisul Islam Mahmud and Mr Nur Mohammad.

The BNP Parliamentary Committee to prepare the draft of the privileges of members will be headed by Mr Justice T. H. Khan as Convener.

PRELIMINARY REPORT ON 1981 CENSUS RELEASED

Dacca THE BANGLADESH TIMES in English 28 Jun 81 pp 1, 12

[Text] The total population of Bangladesh now stands at 8 crore 99 lakh and 40 thousand, according to the preliminary report on the Population Census of Bangladesh, 1981, formally released at a Press conference in Dacca on Saturday.

Planning Minister Dr. Fasiduddin Mahtab addressed the Press conference held at the state guest house 'Meghna'.

Dr. Fasihuddin Mahtab pointed out that on the basis of the preliminary count, the total population of Bangladesh comes to 87,052,024 with 44,849,973 males and 42,202,051 females. He said that since under-count of population was common in all national censuses, a post enumeration check (PEC) was undertaken which indicated that there had been a national under count of 3.3 per cent. After adjusting the estimated undercount, the population of Bangladesh was shown at 89,940,000.

Dr. Mahtab told the news conference that about 206,000 enumerators and 46,000 enumerator's supervisors (including a 5 per cent reserve in both categories) were engaged during the enumeration conducted on March 6, 7 and 8, 1981. He said that the preliminary report of the census was formulated on the basis of manual tabulation.

The Planning Minister announced that the final report of the census would be published sometime in June, 1982--although efforts were underway to publish it earlier.

Sex Ratio

According to the preliminary report, the sex ratio (males against 100 females) is 106, the number of households is 15,135,000. The density of population per square mile, including river area has been shown at 1566 (excluding river area--1,675). Per capita availability of land is estimated at 0.38 acres.

The report shows that on the basis of adjusted population of 1961, 1974 and 1981 the computed growth rates were as follows: from 1961 to 1974 2.70 per cent, from 1974 to 1981 2.36 per cent and from 1961 to 1981 2.59 per cent.

Sample Survey

The Planning Minister told a questioner that a detailed sample survey would be conducted in November this year to gather data on housing, income, assets,

profession and cultural patterns in rural Bangladesh. The sample survey would form a part of the census and would cover about one per cent of the total households in the country.

Dr. Mahtab said that the sample survey would provide answers to 59 questions which are not covered by the census.

Cost of Census

He told another questioner that the total cost of the national population census would run into Tk. 15.7 crore, of which Tk. six crore would come from the UNFPA. The remaining portion would be funded by the government of Bangladesh.

The Planning Minister pointed out that urbanisation was a relatively new phenomena in Bangladesh--the rate of urbanisation being between 12 to 13 per cent. He said that in the neighbouring countries like India and Burma the rate of urbanisation was above 30 per cent.

Growth Centres

He disclosed that the government had taken up a scheme to build up 1200 growth centres in the country where attempts would be made to stimulate non-agricultural economic activities.

He added that these growth centres would be provided with basic infrastructural facilities like electricity and road communications with a view to setting off a multiplier effect. This, he went on, would take off the undesired pressure on the existing urban areas where all the non-agricultural economic activities are concentrated.

79 Municipality

The 1981 population census covered 79 municipality (poura shava) locations. The population of the Dacca Statistical Metropolitan Area (SMA) was shown to be 3,458,602 including 73,788 floating and transient persons (counted on March 5 night). The population of Chittagong SMA was found to be 1,388,475 including 24,883 floating and transient persons.

The population of Khulna SMA is 623,184 which includes a floating and transient population of 8,175. The Rajshahi SMA has a population of 171,600 including a floating and transient population of 2,117.

Sunderbans

For the first time, an attempt was made to enumerate the population in the Sunderbans during this year's census. The entire population of the Sunderbans area was divided into two groups viz floating persons who go there temporarily and the household persons who generally live inside the forest.

Total population recorded during the census night in the Sunderbans area is about 20,682 of which 17,853 belong to the floating group and 2,829 are household group. Almost all the floating people are male.

Dahagram

The Planning Minister told a questioner that census would be undertaken in the Bangladeshi enclaves of Dahagram and Angorpota between July 6 and 13, as per an agreement with the Indian authorities.

65487 Villages

The preliminary report showed that there were 65487 villages--with 50 or more households--in the country (with an average population of 1276). There were also 20163 smaller settlements around the villages (whom the local people called villages) with less than 50 households each (and an average population 172 each). The report explained that according to the 1974 census "there were 68385 villages and subsequently some of the large villages were split into "Paras" or hamlets as new settlements came up".

The census report showed the number of police stations to be 469 (excluding five new ones created after the census) with an average population of 185000.

The number of unions (rural) was shown as 4365 with an average population of 17820.

Highest Population

BSS adds: The District of Dacca has the highest population of 1 crore 49 thousand according to the preliminary report of the census.

The report revealed that the population of Comilla district is 6880000 followed by Mymensingh 6543000 and Rangpur 6490000 Chittagong Hill Tracts with 746000 population is the smallest district.

The growth rate over 1974 in Chittagong Hill Tracts is the highest (46.85 per cent). This is mainly due to in migration from other districts. Dacca with 32.02 per cent and Chittagong with 26.91 per cent have the second and third largest growth mainly due to rapid urbanisation in and around the two metropolis where population increased very sharply according to the report.

Growth rates in Faridpur (17.44 per cent) Tangail (17.62 per cent) and Noakhali (17.90 per cent) are among the lowest growth rate areas of Bangladesh the report said.

OPPOSITION LEADERS SPEAK IN HOUSE BUDGET DEBATE

Dacca THE BANGLADESH OBSERVER in English 20 Jun 81 pp 1, 12

[Excerpt] The general debate on national Budget for 1981-82 continued at the Jatiya Sangsad for the third consecutive day on Friday. The Opposition members participating in the discussion mostly concentrated on political issues and paid little attention to Budget.

Some Opposition members interrupted the proceedings a number of times and drew the attention of the Speaker to the announcement of presidential election date without what they called consulting the Opposition political parties. The Leader of the House Shah Azizur Rahman referred to his statement made at the Sangsad on Wednesday about the announcement of election date. He called upon the members to go through his statement.

It may be mentioned here that the Prime Minister and Leader of the House Shah Azizur Rahman made it clear on Wednesday's session of the Parliament that the fixation of a date for presidential election was not a national problem but the fulfilment of a constitutional obligation by the Government. He informed the House that leaders of each political party will be invited by the Acting President for discussion about the presidential election to be held on September 21.

Participating at the debate Professor Muzaffar Ahmed (NAP-M) viewed that the 84 per cent of the total population of Bangladesh who are below the poverty level are not interested in the form of government. Their main problem is poverty and they want a better life he added. Criticising the demand by certain quarters for a national government Professor Muzaffar Ahmed said that the national crisis was over and there was no need for a national government now. He said that many are interested in grabbing power. Professor Ahmed said that he was in favour of parliamentary form of government. Calling for forging greater national unity he said that the struggle over the issue of freedom fighters and non-freedom fighters should have ended by this time.

Turning to the social system he said that production was going on but there was no equitable distribution of wealth. Exploitation of the Third World nations by the imperialist countries was going on. And the Third World countries must continue the struggle against the imperialist powers he added. He opined that Islam in its true form can be established through socialism. Islam was a religion of peace he said.

On the new Budget Professor Ahmed said that it would protect the interest of the rich and not the interest of the peasants and workers who constitute 95 per cent of the population.

Professor Ahmed demanded the release of Mr. Mohammad Farhad General-Secretary of the Communist Party of Bangladesh.

Participating in the discussion Mr. Salauddin Yusuf (AL-H) said that the BNP has been formed by left over elements of other political parties. He however admitted that there were also some good and talented people in the BNP. Mr. Yusuf said that people have no confidence in BNP. He said that the BNP came to power because people had confidence in late President Ziaur Rahman and since he is dead the Parliament should be dissolved and fresh election be held.

Mr. Yusuf criticised the Government for its Foreign Policy. He felt that the Foreign Policy pursued by the Government was biased towards the United States.

Mr. Yusuf termed the new Budget as dependent on foreign aid through which exploitation aid could continue by the imperialist powers. The number of landless peasants was increasing day by day and the Government has failed to set up mills and factories he added. On the other hand he said that luxury and electronic goods have flooded the market.

OPPOSITION LEADERS REACT TO ELECTION ANNOUNCEMENT

Dacca THE BANGLADESH OBSERVER in English 17 Jun 81 pp 1, 12

[Text] The Jatiya Janata Party chief General (Retd) M. A. G. Osmani in a statement on Tuesday night said "the Government should have consulted the opposition political parties before the announcement of the date for holding the presidential elections by Acting President Mr Justice Abdus Sattar reports ENA.

In his statement M. A. G. Osmani said this is in violation of what Prime Minister Shah Azizur Rahman committed in the Jatiya Sangsad that the opposition political parties will be consulted in matters of taking any decision.

He said the announcement of election date proves that the Government has no intention to seek cooperation from the opposition parties to overcoming the present crisis.

Democratic League President Khandkar Moshtaque Ahmed on Tuesday night said 'it was expected of the Acting President to discuss the leaders of political parties before announcement of date for presidential polls.

He was commenting on the announcement of the presidential polls. He said all political parties irrespective of differences of opinion had extended their cooperation in facing the national crisis on May 30.

Major (Retd) M. A. Jalil and Mr. A. S. M. Abdur Rab President and General Secretary respectively of Jatiya Samajtantric Dal on Tuesday said unilateral decision on the question of holding presidential elections by the Government is the reflection of 'obduracy' on the part of it.

In a joint statement to the Press on Tuesday night the JSD leaders said that they urged the Government to consult the opposition parties before taking any decision to hold presidential elections as it did not overcome national crisis following assassination of President Ziaur Rahman.

PARLIAMENT DISCUSSES BORDER CLASHES, OTHER PROBLEMS

Dacca THE BANGLADESH OBSERVER in English 20 Jun 81 p 1

[Text] Indian Border Security Forces (BSF) came into clash with Bangladesh Rifles (BDR) seven times along the border last year Home Minister A.S.M. Mustafizur Rahman informed the Jatiyo Sangsad on Friday reports ENA.

Replying to a question from Treasury Bench member Jahangir Mohammad Adel the Home Minister said five persons were injured in these clashes. He however denied that the BSF and organised gangs of Indian citizens enter into Bangladesh territory and take away cows cattles buffalos and other things.

In reply to another question from Muslim League member Mohammad Almas Hossain Mustafizur Rahman said the authorities of Bangladesh and India held 22 meetings to establish law and order along the border from 1975 till May this year. He said these meetings succeeded in stopping exchanges of fire checking of smuggling illegal infiltration and forcible harvesting of paddy etc.

1729 Smugglers Held

Meanwhile BSS adds: Smugglers numbering 1,729 were arrested and smuggled goods worth Taka 2.85 crore were recovered by the Bangladesh rifles (BDR) in the border areas in the last five months (January to May) this year the Home Minister Mr Mustafizur Rahman told the Jatiyo Sangsad.

Replying to Md. Asaduzzaman (AL-H) the Home Minister informed the House that the smuggled goods recovered by the BDR included cattle head cloths yarn churi medicine sugar Bangladesh currency machinery parts spiies old clothes fish jute cassette recorder and powder milk. [As published]

NEW LEADER'S FOREIGN POLICY CONSISTENT WITH ZIA

Dacca THE BANGLADESH TIMES in English 16 Jun 81 p 5

[Editorial]

[Text]

Soon after the Bangladeshis won the struggle for their independence they had announced their solidarity with the rest of the world, especially the oppressed and liberation-seeking peoples. Working on the plank of peace and fraternity this country gradually found acceptance by all. Those experiences had remained a beacon in guiding our foreign policy. More than that it lent a sincerity of purpose in our endeavours to seek peace in this strife-torn world.

Late President Ziaur Rahman, with his experiences gained in the War of Independence and later the insight earned into the sufferings of a poverty-stricken people, felt the needs of kindred masses all over the world in a way which it is not possible to understand by many. So he took the urgent messages of the Third World to the rest of the globe with undiminished fervour till the very last moment of his life. This championing of the cause of the under-developed earned respect and love for Bangladesh and its people in countries far and wide.

Under the guidance of President Zia Bangladesh went to the Security Council, the crucial meetings of the Non-Alignment Movement members, the Islamic Conference and the Commonwealth taking principled stand on issues, championing the cause of independence and sovereignty and canvassing for peace and cooperation. It would have been so much a matter of satisfaction had he been able to see the end of the Iraq-Iran war.

But even so, it is a fact that he and thus Bangladesh came to be trusted in the capitals of both the warring nations. May be the ground that he did with the other members of the OIC peace mission will soon produce beneficial results.

One dream of the late President was that Bangladesh come to be considered as a bridge between South Asia and South East Asia. A part of the strategy adopted by him was a relentless pursuit of friendship with our neighbours while retaining the basis of sovereign equality in such relationship. At his untiring and undaunted efforts the idea of regional cooperation in South Asia was beginning to take shape. Bilaterally, our cordial relationship stretches from western Africa to Japan, from West Europe to the Americas across the Atlantic.

We recall these facts today to emphasise that these fundamental characteristics of our international relations and foreign policy will continue to be nurtured as the Acting President Mr. Justice Sattar and Foreign Affairs Minister Professor, Shamsul Huq have assured.

REPORT ON VISIT OF AUSTRALIAN SPECIAL EMISSARY

Dacca THE BANGLADESH OBSERVER in English 16 Jun 81 pp 1, 12

[Text] The special emissary of the Australian Prime Minister, Mr. Ian Macphee, called on the Acting President, Mr. Justice Abdus Satter, at Bangabhavan on Monday afternoon, reports BSS.

Mr. Macphee delivered to the Acting President a personal invitation from the Australian Prime Minister Mr. Malcolm Fraser to attend the Commonwealth summit meeting to be held in Melbourne towards the end of September this year.

During the meeting the special emissary reiterated Australia's continued cooperation with Bangladesh.

Earlier, Mr. Ian Macphee discussed the agenda of the forthcoming Commonwealth summit meeting with Foreign Minister Prof. Muhammad Shamsul Huq.

Mr. Macphee called on the Foreign Minister at his office.

The special emissary and the Foreign Minister exchanged views of contemporary economic issues of concern to the two Commonwealth Nations.

They noted with satisfaction the growing bilateral relations between Australia and Bangladesh. He assured the Foreign Minister of continuing cooperation of his country, to Bangladesh.

The special emissary said that the untimely death of President Ziaur Rahman was not only a loss for Bangladesh but also for the Commonwealth and the international community.

Mr. Macphee said that late President Ziaur Rahman was held in high esteem not only for the valuable leadership that he provided for economic development of Bangladesh and establishment of democratic institution in the country but also for his outstanding contributions in the cause of peace and progress of international community including the Commonwealth.

Mr. Macphee is in Dacca as special envoy of Prime Minister Mr. Malcolm Fraser carrying a personal invitation for Acting President Mr. Justice A. Sattar for the Commonwealth summit meeting to be held in Melbourne beginning September 30.

He also conveyed the condolence of the people and Government of Australia at the tragic assassination of President Ziaur Rahman.

The visiting Australian Minister had an hour long meeting with the Speaker, Mirza Gholam Hafiz at the Sangsad Bhaban in the morning.

The Speaker informed the visiting dignitary the working of the Bangladesh Parliament multi-party representation in it and the system of elections. He stressed the need for development of closer relations among the people's and parliaments of the Commonwealth countries.

MINISTER NOTES INDIAN'S ARREST, PASSPORT STATISTICS

Dacca THE BANGLADESH TIMES in English 20 Jun 81 p 8

[Text] Home Minister Mr A. S. M. Mustafizur Rahman told the Jatiya Sangsad on Friday that a total of about 15.64 lakh passports were issued since the independence of the country till April 30 this year.

Replying to a written question by Mr S. A. Khaleq (BNP) the Home Minister said that so far 558 cases related to forging of passports were initiated. Of these 296 cases were proved he said.

Replying to a separate written question by Mr Ukil Shahdat Hossain (BNP) the Home Minister said that a total of 1.80 lakh passports were issued from July 1 1980 to April 30 1981. He said that Tk 4.25 crore was earned as fees by issuing these passports.

Replying to a separate written question by Sheikh Selim (AL-H) Mr Mustafizur Rahman said that a total of 9228 foreign nationals were at present living in Bangladesh. Of them 717 were working in the foreign diplomatic missions he said. These included 385 diplomatic and 332 non-diplomatic personnel.

Replying to a separate written question by Lt. Commander (Retd) Mahbubul Islam (BNP) the Home Minister said that it was true that one youngman was arrested on the night of May 7 last from a Indian vessel--M. V. Biswa Parimal--anchored at Chalna Port with a special type of wireless set. He said that the arrested person was Shahjahan Choudhury son of Abdul Barek Choudhury of Savar Dacca. He said that the name of the set was Tagblock (telecommunication apparatus). He said that the motive of the arrested person was not yet known.

SHEIKH HASINA SHOWS NEWSMEN OVER MUJIB'S HOUSE

Dacca THE BANGLADESH TIMES in English 20 Jun 81 pp 1, 8

[Text] Mrs Sheikh Hasina Wazed, President of Bangladesh Awami League (Hasina) said on Friday that she had signed the government prepared inventory without physical verification when the house of her father, Sheikh Mujibur Rahman, was formally handed over to her on June 12.

She told newsmen that it appeared that many articles had been missing including gold ornaments, other valuables and books. She did not elaborate on the missing list.

Newsmen were invited on Friday to see the condition of the house particularly the first and second floor of the three-storied building. The doors of the rooms in the first and second floor were "formally opened" in front of the newsmen at 11-30 a.m. on Friday. Sheikh Hasina claimed that these rooms were not opened by them since the house was under government custody.

A large number of Awami League leaders were present when the newsmen were shown the rooms. They included Messrs Abdul Malek Ukil, Abdur Razzak, Abdul Manan, Abdul Momen Talukder, Abdus Samad Azad, Tofael Ahmed, Amir Hossain Amu, Syed Ahmed and Mrs. Ivy Rahman. Mr. Syed Hossain an uncle of Sheikh Hasina was also present.

When the rooms were being opened one after another, Mrs. Hasina was visibly moved and wept profusely.

The living rooms of Sheikh Mujibur Rahman, Mrs. Hasina Wazed. Sheikh Rehana and Sheikh Jamal were on the first floor while the rooms of Sheikh Kamal and sitting rooms of Sheikh Mujibur Rahman were located on the second floor. The sitting rooms could not be opened owing to problem in the lock.

Mr. Abdur Razzaque showed the newsmen marks of bullet shots and stains of blood in some rooms and the bathroom of Sheikh Jamal. A portion of the staircase was found covered by a national flag. The Awami League leaders said that the body of Sheikh Mujibur Rahman lay there after he was shot dead on August 15, 1975.

Later talking to the newsmen Sheikh Hasina Wazed said that she was mentally disturbed when the house was handed over to her on June 12. As such she said, she did not have the chance to see ornaments and other valuables by opening all the boxes.

According to the inventory, there were 503 tolas of gold diamond and platinum ornaments and 4,054 tolas of silver in the house. Sheikh Hasina received these ornaments by signing the inventory in presence of her relations and party leaders.

Mrs. Hasina said that only one box of jewellery was opened in her presence. She said that these ornaments were weighed by a goldsmith engaged by the government.

Justifying the presence of huge gold and other ornaments in the house, Sheikh Hasina said that all these things belonged to the families of her father her two brothers, her sister and also to herself. She said that even some of their relations had kept their ornaments in that house for safe custody.

She said that the family had received large presentations on various occasions. "Even Shah Azizur Rahman presented one gold guines either to me or to Russel on a birth day function", she said.

She said that she was not at all prepared to receive the articles in her father's house. She said that she thought that the entire house had been looted and robbed. "However", she said; "we have not received whatever we were supposed to receive".

Sheikh Hasina said that she was never interested in goods. "I only wanted the house back. I signed the inventory list when I was told that without signing the list I shall not get the house", she said.

In reply to a question, Sheikh Hasina Wazed said that some of her relations were present when the house was handed over to her. She said that she was mentally very disturbed and did not notice as to who among the Awami Leaders were present on the occasion.

Mrs. Sheikh Hasina Wazed repeated that she did not want the list of goods but the list of those killed on August 15. "I have not been furnished with that list despite reminders", she said.

When the Awami League President was reminded that it was the Awami League that had formed the government after the killing of her father and she could obtain the list from the Awami League leaders she said, "I want the list from them. I want the list from you. I want the list from the people of the country".

Sheikh Hasina said that she was yet to decide about the future of the house and the property.

Asked whether she had any plan to convert the house into a museum in memory of her father, Sheikh Hasina said that she had not thought over the matter as yet. "Rehana is there. I shall discuss with her about the house and the goods received and take a decision subsequently", she said.

The newsmen were interrupted on several occasions by some Awami League leaders present on the plea that Sheikh Hasina was not holding any Press conference.

In all the rooms, the fixtures and furniture were not in order dirt, accumulated in years was found on the floors and soots in the ceilings.

JOURNALIST UNION LEADERS PROTEST CENSORSHIP

Dacca THE BANGLADESH OBSERVER in English 3 Jul 81 p 8

[Text] The following statement issued by Mr. Ahmed Humayun and Mr Reazuddin Ahmed President and Secretary General of Bangladesh Federal Union of Journalists (BFUJ) and Mr Iqbal Sobhan Chowdhury and Mr Amanullah Kabir President and General Secretary of Dacca Union of Journalists (DUJ) on Thursday reports BSS.

"We are constrained to note that the Government has imposed pre-censorship upon some weeklies under the provisions of the infamous Special Powers Act. We note with regret that this step has been taken at a time when the Parliament is in session, the Press Council is in operation and the whole nation is committed to uphold the democratic process in the country.

The government measure militates against the fundamental principles of democracy, Press freedom and the people's right to know. We resolutely demand that the pre-censorship order of the Government should be withdrawn immediately in the greater interest of the nation at this critical juncture.

We also like to reiterate the demand of the journalists community for repeal of all black laws including the infamous Special Powers Act for ensuring freedom of Press and restoring fundamental rights of the people.

'OUT OF ORDER' CONSTITUTIONAL QUESTION ANSWERED

Dacca THE BANGLADESH TIMES in English 23 Jun 81 pp 1, 8

[Text] Speaker Mirza Galom Hafiz on Monday ruled a constitutional question raised by Moulana M A Rahim of Islamic Democratic League out of order as the chair was not competent to give explanation on it.

Moulana M A Rahim demanded the explanation of the chair as to what would be the fate of the Parliament if a man belonging to a party which was in minority in the Parliament was elected the President of Bangladesh in the next election.

He said that it was also to be clear what would be the position of the existing Parliament if an independent candidate was elected to the presidency.

After the question was ruled out, Prime Minister Shah Azizur Rahman, upon permission from the chair said that Moulana M A Rahim had raised a hypothetical question.

The Prime Minister, however said that the Parliament would continue to function if it was not dissolved. He said that the next elected President would do whatever was necessary in keeping with the powers vested in him by the Constitution. But it was not necessary that the Parliament would have to be dissolved after election of a new President.

PAKISTAN PRESIDENT SENDS MESSAGE ON ZIA DEATH

Dacca THE BANGLADESH TIMES in English 3 Jul 81 pp 1, 8

[Text] Mr Mahmood A Haroon Interior Minister of Pakistan who arrived in Dacca on Tuesday night leading a five member delegation of his country to pay homage to Shaheed President Ziaur Rahman on Wednesday handed over a message from President Ziaul Huq to Acting President Mr Justice Abdus Sattar, reports BSS.

The message was handed over to the Acting President when the delegation members called on him to express condolences on behalf of the Government and People of Pakistan at the martyrdom of President Ziaur Rahman.

The goodwill delegation included Pakistan's Information and Broadcasting Minister Raja Zafarul Huq Local Bodies and Rural Development Minister Mr Fakhre Imam Minister for Culture and Sports Mr Niaz Muhammad Abbas and Minister of State for Health and Social Welfare Mrs Afifa Mamdot.

Foreign Minister Prof Muhammad Shamsul Huq the counterparts of Pakistani Ministers and the Foreign Secretary were present at Bangabhaban when the delegation called on the Acting President.

The goodwill delegation came for offering Fateha at the Mazar of Shaheed President Ziaur Rahman.

In his message the Pakistan President said 'the agony of Bangladesh in the wake of the tragic death of President Ziaur Rahman and the courageous response of its government and people have moved us deeply.'

President Ziaul Huq said "Our prayers and good wishes have always been with you and we are filled with admiration for the manner in which your Excellency and your colleagues have faced the aftermath of a national calamity of such magnitude'.

He said 'it is reassuring for us to know that the institutions founded by the Late President and nursed by him and his dedicated associates like yourself have stood the strain of circumtances and will by the grace of Allah almighty steer Bangladesh safely through all difficulties.

The President of Pakistan in his message said that he had decided to send a five member delegation to pay a goodwill visit to Dacca.

He said "it is my wish that the leader of the ministerial delegation conveyed to you personally my sentiments and feelings for your excellency and for the people of Bangladesh."

President Ziaul Huq expressed the earnest hope that the visit of the ministerial delegation would contribute towards further strengthening of brotherly relations between the two countries.

Visits Smrity Shoudha

The Pakistani goodwill delegation on Wednesday morning offered Fateha and laid wreaths at the Mazar of Shaheed President Ziaur Rahman.

The Pakistani Ministers in the delegation in white sherwani and pajama wore black bands.

Earlier the delegation laid wreaths at the Jatiya Shaheed Smrity Shoudha at Savar.

The Pakistani delegation members stood in silence before the memorial of martyrs of the War of Independence as the National Flag was lowered and there raised to the tunes of the lust post and reveille played by the Army band.

Bangladesh Additional Foreign Secretary Mr Abdul Bari and Pakistan Ambassador Dr. Humayun accompanied the delegation.

Meets Begum Zia

The Pakistani goodwill delegation comprising five ministers on Wednesday called on Begum Ziaur Rahman to express condolences of the government and people of Pakistan at the martyrdom of President Ziaur Rahman.

Foreign Minister Prof Muhammad Shamsul Huq was present at the residence of Begum Zia when the delegation called on her.

MINISTER TALKS TO PRESS ON IMPORT, EXPORT POLICIES

Dacca THE BANGLADESH OBSERVER in English 3 Jul 81 pp 1, 8

[Text] The overall performance of the import substituting and the export-oriented industries will be reviewed by the Government from the current financial year on a continuing basis. The review to be undertaken jointly by the related agencies of the Government, will be aimed at assessing the actual contributions of the concerned agencies in the field of import substitution and export promotion.

Disclosing this at a Press conference, Chaudhury Tanbir Ahmed Siddiky Minister of State for Commerce said on Thursday that the monitoring of the performance on effective lines would enable the Government to examine all details relating to import entitlements, capacity utilisation, growth of physical output of the concerned industrial units and to assess the real impact of various concessions given to such units on their actual operations.

The State Minister observed that the Government would provide adequate safeguards to the local industries by way of either tariff protection or banning the import of items which were locally manufactured. But he added the local industries must convince the Government first of all that they were capable of meeting the domestic requirements out of their production in their respective fields. He stressed that the local industries must also make effective efforts to improve the quality of their products and also to ensure the availability of the same at the fair price to the consumers.

He assured the local manufacturers of spare parts that they would be given all protection provided they would ensure the availability of their products in the local markets at fair prices.

Dilating on the salient features of the new Import Policy, he noted that the allocation under it had been raised by about Taka 350 crore over the allocation made in 1980-81 with a view to ensuring the wider availability of various imported consumer goods and to accelerating the pace of performance in the industrial sector through adequate imports of raw materials and spares. He felt that another important objective of the Import Policy for 1981-82 was the protection given to the local industry by way of banning the import of some categories of spares and cotton yarn.

Chaudhury Tanbir Ahmed Siddiky gave a detailed breakdown of the funding pattern for the import programme of Taka 2950 crore in 1981-82. The cash resources for

the programme will be sized at Taka 1550 crore, the commodity assistance at Taka 530 crore and the remittances under the Wage Earners Scheme at Taka 600 crore. A sum of Taka 220 crore will come from the barter STA (Special Trade Agreements) sources. The rest Taka 50 crore will be mobilised through subsequent adjustments of funds from all the available sources such as cash, commodity assistance, WES barter STA.

The State Minister said that the industrial imports (raw materials and spares) would account for 79 per cent of the total import allocation in 1981-82. The finished and semi-finished items i.e. the commercial imports in 1981-82 will be about 21 per cent of the total allocation.

Commenting on the resource allocation pattern between the industrial imports and the commercial imports, he observed that the actual picture would amply bear out the fact that the bulk of the imports in the country were made for meeting the needs of the local industries for raw materials and spares. The criticism that the Import Policy has been responsible for the "flooding" of consumer goods in the country much to the detriment of the local industrial growth is not founded on facts, he added.

He stated that the Government was determined to stop the entry of smuggled goods into the local markets. Such smuggled goods in huge quantum have been responsible for the "flooding" of the markets with luxury goods he added.

He told the newsmen that the agencies of the Government carried out 'a mild operation' on July 1, '81 after the new Import Policy was announced to seize the smuggled goods and the operation succeeded to detect about 5,000 pieces of smuggled sarees from one marketing centre in the city. The drive against the smuggled goods would be strengthened further, the State Minister added while appealing to all sections of people to extend all-out co-operation in making it a success.

Choudhury Tanbir Ahmed Siddiky noted that the share of public sector in the overall import allocation in 1981-82 would stand at 63 per cent and the private sector, at 37 per cent. The public sector will import about 53 per cent of the industrial raw materials and spares and the private sector about 26 per cent, the overall share of the industrial raw materials and spares being 79 per cent of the total import allocation. In the case of import of finished and semi-finished goods which would account for 21 per cent of the total allocation, the private sector will be responsible for eleven per cent of the related imports and the public sector for ten per cent of the same he added.

He said that about 9800 new importers, mostly from the under-developed regions like Khulna and Rajshahi Divisions would be able to participate in the import trade in 1981-82.

The Minister of State for Commerce pointed out that the small-scale industries, having their import entitlements at Taka 50,000 or below, would be getting their licences at a time under the new Import Policy. This provision has been made with a view to helping the units to make viable operations he added. He stated that a block provision of Taka five crore had been made under the Import Policy for export-oriented industries in 1981-82.

He disclosed that the importers of palm oil would require to obtain valid certificates from the Ministry of Health and the Chamber of Commerce & Industry of the exporting countries with a view to dispelling any doubt in public minds about the quality of imported palm oil in the country.

Chaudhury Tanbir Ahmed Siddiky noted that instructions had already been given to the office of the Chief Controller of Imports and Exports to issue licences forthwith for the import of "sensitive" consumer goods.

He pointed out that the import bill on account of petroleum imports would be about Taka 902 crore in 1981-82.

Giving a review of the export performance in 1980-81, the State Minister said that the country had succeeded to raise its physical quantum of exports in case of all major items during the year but the sharp decline in the export prices in the international markets had caused lower level of export earnings. This resulted in a shortfall of about 300 crore Taka in the projected level of export earnings at Taka 1500 crore in 1980-81.

He stressed the need for more vigorous efforts to attain the export target of Taka 1500 crore in 1981-82. He felt that the emphasis should be placed on diversification of the country's export markets with a view to stabilising the export earnings.

He estimated that the country's cumulative trade deficit--the gap between the payments made on account of merchandise imports and the receipts earned through exports of commodities--would stand at about Taka 5315 crore during the last four-year period ending in 1980-81. Besides a vigorous export drive the promotion of industrial growth basing on local resources and raw materials should be encouraged to meet such huge trade imbalances, he observed. The more industrial units based on local raw materials and resources are set up in the country the less will be the import burden, he felt while pointing out that the existing industrial units with their production based on the availability of imported raw materials and spares as of now accounted for about 80 per cent of the total import allocation.

MINISTER ANNOUNCES IMPORT POLICY FOR '81-82

Summary of Radio Speech

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 pp 1, 12

[Text] The new Import Policy for 1981-82 envisages a total allocation of Taka 2950 crore as against the provision of Taka 2600 crore for 1980-81. The increased allocation under the new Import Policy has been made with the aim of ensuring the wider availability of imported goods in the market for maintaining price stability.

Announcing the Import Policy for 1980-82 over the national radio and television on Tuesday Chaudhury Tanbir Ahmed Siddiky, Minister of State for Commerce stated that the new Import Policy had been formulated with its main theme focused on expediting the process of national development through adequate imports of essential consumer goods and industrial raw materials and spares.

The Import Policy for 1981-82 provides for continuing sanction of licences at 150 per cent of entitlements for the pharmaceutical industry. The industries in the Priority List I and II will get licences at the rate of one hundred per cent and 70 per cent of their entitlements while the new industries will be provided with licences at 30 per cent of their entitlements on a primary basis.

The import of spares which are manufactured in the country has been banned under the new policy. The usual importers will get the licences for the import of spares at the rate of only 50 per cent in 1981-82 of their requirements in place of the rate of 75 per cent in 1980-81. The import-substitution industries will get licences in proportion to their actual production during the last two years and their aggregate contribution (as per the recommendation) to the import-substituting sectors.

The Minister of State for Commerce noted that the new ban on import of such spares as weilding electrodes some bicycle, jute and textile spares etc had been imposed to protect the domestic industry. He added that arrangements had also been made to offer tariff protection to some local industries. The process for giving protection to the domestic industry will continue, he noted while urging the owners of the domestic industries to improve the quality of their products and to ensure fair and reasonable price for such products.

Under the new Import Policy the export-oriented industries must submit their account about the utilisation of import licences and the aggregate contributions

to the export earnings in 1980-81 for the sanction of licences in 1981-82. Such industries must also give undertaking to the effect that they would export at least 15 per cent of their total production in 1981-82.

The export-oriented industries will continue to enjoy the facilities of advance import licences and XPL. Some new items have been included for import in the XPL list. The import allocation under the XPL list has been raised from Taka 45 crore to Taka one hundred crore. The importers under the Wage Earners' Scheme will also be eligible to utilise the XPL licences.

As a promotional measure for small and cottage industries the small-scale industrial units having import entitlements below Taka 50000 will get their licences at a time.

The target for import under the Wage Earners' Scheme in 1981-82 has been set at Taka 600 crore. The actual import under the WES in 1980-82 stood at Taka 475 crore as against the target of Taka 350.

About the commercial imports in 1981-82 the Minister of State for Commerce announced that the OGL system would continue but imports of some spare parts had been banned to protect the domestic industries. The allocation for the import of pesticides has been raised, he added.

The procedure for the time-limit set for opening the letters of credit has been simplified under the new policy. The commercial importers will be allowed to arrange the shipment within six months after registration of the L/Cs. In case of industrial importers, the time-limit as such would remain valid up to nine months. The shipment of machinery and spares needed for manufacturing and assembling will be allowed within the 12 months after the registration of L/Cs.

The minimum import allocation for the commercial importers has been set at Taka 30,000. The importers will however be allowed to form groups both after and before the registration of L/Cs. The importers from Rajshahi and Khulna Divisions which are the under-developed regions will be eligible to form groups with importers in their respective divisions.

The private importers have been given the last opportunity to utilise their licences for the import of cement. Such importers have not succeeded to utilise their licences for the import of cement in the previous years, the Minister of State noted.

Giving a review of the overall import performance in 1980-81 Chaudhury Tanbir Ahmed Siddiky stated that the utilisation was made in full to the amount of allocation at Taka 2600 crore during the year. The cash resources to the tune of Taka 1500 crore for funding the import programme were provided by the middle of the year, 1980-81. Effective measures were also taken for the import of milk food, pulses chillies onion ginger salt etc. to meet the temporary shortfalls in domestic supply. Besides the import by the private sector to improve the availability of some essential items, the Government arranged the import of such items through its interventionist policy during the year, he added.

The State Minister pointed out that many industrial units were given advance allocation to build up advance reserve in the industrial sector. Additional

funds were provided for the import of petroleum and petroleum products by way of implementing the related import programme he added.

Chaudhury Tanbir Ahmed Siddiky observed that the new Import Policy for 1981-82 had been formulated against the backdrop of world wide recession and inflation resulting in deteriorating terms of trade for the country. He felt that the new policy within the existing operational constraints had been a liberal, production oriented and pro-people one.

Highlights of Policy

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 pp 1, 12

[Text] Following are the highlights of the Import Policy for fiscal 1981-82 announced by the State Minister for Commerce Chowdhury Tanbir Ahmed Siddiky over Radio and Television on Tuesday evening reports BSS.

Total import under the Wage Earners Scheme (WES) has been raised from Taka 350 crore to Taka 600 crore in the new Import Policy. Educational toys and silk yarn have been withdrawn from the WES.

Pharmaceuticals industries put on priority list and will continue to get licences worth 150 per cent of their entitlements. Industries under priority list number one and two will continue to get licences respectively worth 100 per cent and 75 per cent of their entitlements. But the new industries would get licence worth 30 per cent of their entitlements.

Minimum share of commercial imports of Taka 30,000 to continue. Import under Open General Licences to continue.

Imports of over four feet lathe machines, low lift pumps and shallow tubewells have been banned. Nylon rope has been withdrawn from the import list.

Imports of GI wire up to 30 SWG welding electrodes some spares of bicycles and those of jute and cotton mills have also been banned.

Licence allocation under Export Performance Licences (XPL) has increased to Taka 100 crore from Taka 45 crore. Importers under WES will get XPL facilities along with commercial and industrial importers.

BNP NOMINEE WINS IN COMILLA BYELECTION

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 p 1

[Text] The BNP nominee, Al-Haj Munshi Abdul Ali on Tuesday won the Comilla bye-election to a Jatiya Sangsad seat defeating his lone rival, an independent candidate by a huge margin according to results available in Dacca on Tuesday midnight.

The Election Commission sources told BSS that the BNP candidate was leading by 63 thousand 959 votes against his rival, Dr. Md. Mujibur Rahman (Independent) in 91 polling centres out of total 93 centres. Results from remaining two polling centres are yet to be available.

Out of total one lakh 63 thousand 276 votes in the Jatiya Sangsad Constituency Comilla 8, Al-Haj Munshi Abdul Ali polled 80 thousand 711 votes while his rival Dr. Mujibur Rahman secured 16 thousand 752 votes in 91 centres.

The seat fell vacant with the resignation of JSD member Mr. Abdur Rashid Engineer on April 30 last.

With the victory of Al-Haj Munshi Abdul Ali the Bangladesh Nationalist Party (BNP) will have 250 members in the 330 member Jatiya Sangsad.

PAKISTAN GOODWILL TEAM ARRIVES IN DACCA

Dacca THE BANGLADESH OBSERVER in English 1 Jul 81 pp 1, 12

[Text] A five-member Ministerial goodwill delegation of Pakistan led by Mr Mahmood A Haroon, Interior Minister arrived in Dacca on Tuesday night "to share the tragic loss and grief" with Bangladesh at the martyrdom of President Ziaur Rahman, reports BSS.

Talking to newsmen at Kurmitola Airport Mr Haroon said that President Ziaul Huq would have come himself to share the tragic loss and shock with Bangladeshis and added he could not come for some preoccupations at home.

The delegation included Raja Zafarul Haq, Minister for Information and Broadcasting Mr Fakhre Imam, Minister for Local Bodies and Rural Development, Mr Niaz Muhammad Arab, Minister for Health and Social Welfare.

Home Minister Mr A. S. Mustafizur Rahman, Information Minister Mr Shamsul Huda Choudhury, State Minister for Women's Affairs Mrs Taslima Abed and Deputy Minister for Local Government and Cooperatives Mrs Qamrunnahar Zafar received the Pakistani delegation at the airport.

Mr Haroon said that President Ziaul Huq had conveyed his feelings on the loss of Bangladesh and added he was carrying a special message from the President of Pakistan to the Acting President Mr Justice Abdus Sattar.

SEIZED COMMUNICATIONS GEAR FLOWN BACK TO MOSCOW

Dacca THE BANGLADESH TIMES in English 30 Jun 81 p 1

[Text] Sophisticated communication equipment that were brought by the Soviet Embassy in Dacca illegally were flown back to Moscow by Aerofloat aircraft on Monday according to a source.

The communication equipment that included signal generator multimeter, frequency analyser and electric filter were brought in here in boxes along with construction materials. The airport customs seized both construction materials and communication equipment when some Soviet Embassy officials tried to take away them without going through normal customs check.

Bangladesh lodged strong protest with Soviet Union for bringing the equipment in an unauthorised manner and the issue was discussed in the Bangladesh Parliament which is now in its Budget Session.

Earlier, the head of the Press Information Department of the Soviet Embassy in a Press conference claimed that there was nothing other than construction materials brought by Soviet airliner. He said "enemies of friendship between Bangladesh and Soviet Union have raised the question about Soviet communication equipment".

SEMINAR DISCUSSES INDIAN AGGRESSION AT TALPATTY

Dacca THE BANGLADESH OBSERVER in English 29 Jun 81 pp 1, 12

[Text] National politics must be geared to face a growing but crucial challenge posed by external expansionist powers which threatened to foil the independence and sovereignty of smaller countries of South and South East Asia, reports BSS.

This was observed by speakers at a seminar entitled "Indian aggression on South Talpatty and our national politics" held at the Dacca District Sports Association auditorium under the auspices of the Research Bureau of United People's Party (UPP) on Sunday.

Speakers at the seminar observed that in view of the recent development in Afghanistan and Kampuchea and the mounting tensions generated elsewhere in the world the sovereignty and independence of smaller countries were at stake as never before.

The speakers condemned the incident in which neighbouring India had violated the territorial waters of Bangladesh and forcibly occupied the South Talpatty island which belonged to Bangladesh.

The seminar was addressed among others by Kazi Zafar Ahmed Chairman of the UPP. Mr. Justice B. A. Siddiqui President of Bangladesh Muslim League Mr. Nurur Rahman President of NAP Kazi Mujibur Rahman Vice Chairman of UPP, Mr. Mostafa Jamal Haider General Secretary of UPP and Mr. Gias Kamal Choudhury an eminent journalist Dr. Syed Safiullah Director of the Research Bureau of UPP conducted the seminar.

Speaking at the seminar Kazi Zafar Ahmed was highly critical of the Government for what he said "its kneel down policy" in dealing with the Indians with regard to the South Talpatty island. He alleged that it was due to this policy that "we are about to lose the island."

The UPP chief alleged that during the tenure of the present Government the country's independence and sovereignty had been at stake at different times in different forms.

He said India wanted to grab "our land and capitulate our country to make it a market and a protectorate."

Kazi Zafar said that because of her geopolitical situation in the region, Bangladesh was important to the Indo Soviet axis which he alleged, was engaged in a conspiracy to transform the country into a sphere of influence.

He also condemned a recent incident at Dacca International Airport where security personnel unearthed an illegal attempt by the Soviet Embassy to import radio equipment and described it as part of a greater Soviet hegemonistic design to extend her sway around the world.

Justice B. A. Siddiky in his speech expressed gratitude for Indian help during the War of Liberation at the same time lambasted "their unfriendly activities afterwards."

After the Independence of Bangladesh India had looted the country and tried to cripple "our economy", he said that the Farakka might be an Indian installation against Pakistan but today. It proved as a great threat to Bangladesh's very existence.

Justice Siddiky strongly criticised the present Government for what he said failure in establishing Bangladesh sovereign rights on the South Talpatty island the possession of which should have been taken in 1977, he observed.

National Awami Party leader Nurur Rahman addressing the seminar observed that the White Paper issued by the Bangladesh Government was not properly drafted which rather confused the people. He said that the failure on the part of the Government had proved its total apathy and independence to the vital issue.

Mr. Rahman observed that today the country need a Government which could defend the country against external aggression.

In his address, Mr. Mostafa Jamal Haider said that in the last few years, India had at least twenty times violated Bangladesh's territory. Talpatty was the latest in a series of such aggressions against the country's sovereignty.

He alleged that "the Soviet social imperialists" in collusion with the "Indian expansionists" were preparing to divide between themselves the sovereignty of the smaller countries in the periphery of the Indian Ocean.

Describing South Talpatty as "a test case" for probably future designs of the Indian expansionists to grab our land" and make it a sphere of influence Mr. Haider stressed the need for generating a greater political consciousness among the people and political parties to guard against such evil designs.

The UPP leader suggested that in the national politics there was need for identifying the agents of the expansionist powers to fight them out to save national independence and sovereignty.

In his speech Mr Gias Kamal Chowdhury stressed the need for unity among the smaller Third World countries to protect their sovereignty from the evil hands of the expansionist powers.

WITHDRAWALS, REDUCTIONS IN TAXES, DUTY ANNOUNCED

Dacca THE BANGLADESH OBSERVER in English 27 Jun 81 p 1

[Text] Finance Minister Mr. Saifur Rahman announced on Friday the withdrawal of the new tax proposal on betel nuts in the Budget for 1981-82.

He also stated that the duties proposed on the import of industrial spare parts, cotton yarn, aluminium goods and also on the sale of wooden furniture had been reconsidered and the rates of such duties had now been proposed at a level lower than the ones proposed earlier.

His announcement on the withdrawal of proposed duties on betel-nuts along with the reconsideration of the original tax proposals on the import of industrial spare parts, cotton yarn, aluminium goods and also on wooden furniture came in the course of his winding-up speech in the Jatiya Sangsad on the day.

He stated that the reconsideration of the new tax proposals including the withdrawal of duty on betel-nuts had been made as a mark of respect to the suggestions made by the members from the Treasury as well as the Opposition benches.

The Finance Minister said that duty on import of industrial spare parts had been reduced to a concessionary rate of 40 per cent in view of the demands made by most members of the House. He said all items of spare parts would now be subject to only 40 per cent of duty. Earlier the Budget proposed withdrawal of concessionary duty rate of 20 per cent and fixation of 50, 75, 100, 25 and 150 per cent duties on various items of spare parts to encourage the local engineering industries. With the withdrawal of the new tax proposal on import of spare parts, the Government will loose a revenue of Taka 6 crore.

On the aluminium door and window frames 20 per cent duty had been proposed in the Budget. The Finance Minister said that in view of the request made by the Ministry Industries it had been decided to reduce the proposed rate from 20 to only 10 per cent.

The Finance Minister Mr. Saifur Rahman announced that the wooden furniture valued less than Taka 250 would not be subjected to new proposal to impose excise duty of 10 per cent. This meant that wooden furniture costing above Taka 250 would be subjected to excise duty of 10 per cent.

The Finance Minister also made strong defence of the reduction of excise duty on colour television to Taka 2,000 and Taka 3,000 per set from Taka 3,000 and Taka 4,500 respectively. He said that colour television should not be owned by the richer section in the society only. He said the reduction of duty had been proposed so as to give the common people easy access to colour T.V.

MINISTER INAUGURATES NEW PETROBANGLA DRILLING PROJECT

Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 p 1

[Text] Zakiganj (Sylhet) June 25:--Petrobangla today embarked on yet another drilling project as part of its country-wide search for oil and gas with the spudding of Atgram Test Well No. Nine reports BSS.

Kazi Anwarul Huq Minister for Power and Water Resources who is also in charge of the Minister of Petroleum inaugurated the drilling near here today.

In a brief speech at the drilling site Kazi Anwarul Huq listed political stability and smooth administration as the two basic preconditions for uninterrupted and successful implementation of national development programmes.

Given the two preconditions hard work and honest conviction can achieve the goals of national development he said "Even it would not be difficult for us to dig out the hidden wealth which Allah has bestowed for us beneath the earth".

The Atgram Test Well previously known as Zakiganj Drilling Project is being implemented under Petrobangla's Multi-well Drilling Programme (MDP) with a major West German grant.

Kazi Anwarul Huq referred to the optimism and convictions of late President Zia who always believed that there was an untold and invisible reserve of resources beneath our land which "we must dig out" with all sincerity and hard work.

He called upon the Petrobangla experts and technicians to be inspired with the enthusiasm and zeal of the late President in exploring and exploiting the country's natural resources to step up national development.

The function was also addressed among others by Mr. Sunil Kumar Gupta, State Minister for Petroleum and Mineral Resources Syed Muhibul Hasan State Minister for Social Welfare and Manpower Mr S. Hasan Ahmed Chairman of Petrobangla and Mr. Umbruster, Economic Counseller of the FRG Embassy.

The Atgram test well being drilled at an estimated cost of about Taka 28 crore, is scheduled to be completed by the middle of September this year. It is the second well under the multiwell drilling project the first being Beanibazar which has yielded commercial quantity of natural gas and liquid hydrocarbon.

The Atgram Drilling Project at Zakiganj is said to be one of the promising ventures in the Surma Basin and "there is a good possibility of striking oil" as some experts believed. The target is to drill up to a depth of 16,500 feet although experts are expecting to encounter gas and condensate from 5,000 feet and downwards.

The success at Beanibazar has led the experts to believe that positive results would be yielded at the Zakiganj structure since it was located in the similar oil and gas prone area on the north eastern periphery of the Surma Basin.

A total of 10 wells will be drilled under the Multiwell Drilling Project for which the West German Government has so far committed nearly Taka 78 crore as grant.

EXPORT POLICY FOR '81-82 PRESENTED TO NATION

Summary of Radio Speech

Dacca THE BANGLADESH OBSERVER in English 2 Jul 81 pp 1, 8

[Text] The Export Policy for 1981-82, announced on Wednesday has set the target of export earnings at Taka 1500 crore for the year as against the anticipated level of foreign exchange earnings through exports at Taka 1200 crore in 1980-81.

With its main focus put on an all-out drive for producing more exportable surpluses in the country the policy for its smooth implementation will rely mainly on 'improving the existing procedures and formalities involved in the export trade, strengthening the facilities and incentives to the exporters raising the levels of investments in export-oriented industries and expanding the base of export-biased activities'.

Announcing the new Export Policy over the national radio and television on the day, Chowdhury Tanbir Ahmed Siddiky Minister of State for Commerce stressed the need for continuing the export drive at a faster scale to counter the adverse balance of trade of the country. He felt that the rate of import growth had exceeded that of exports over the last few years resulting in huge trade imbalance on a recurring basis with many adverse consequences for the economy. He called for vigorous efforts on the part of all producers, suppliers and exporters along with persistent endeavours of the Government to reduce the continuing huge gap between the import payments and the export earnings of the country.

The new Export Policy projects that the jute sector including raw jute, jute goods jute carpets, jute yarn and rope etc would contribute to the national exchequer Taka 915 crore in 1981-82 which would be 61 per cent of the overall projected export earnings. The commodity-wise export target for other items has been set in the following manner: naptha furnace oil and bitumen Taka 66 crore; hides and skin Taka 120 crore; frozen food Taka 90 crore; tea Taka 77 crore; vegetables fruits betel leaves tobacco potato and other agricultural commodities Taka 113.50 crore newsprint paper and other paper products Taka 27 crore readymade garments Taka 14 crore; handicrafts Taka nine crore; electric cables, telephone wires, G.I. pipe super enamel cooperwire and other engineering products Taka three crore specialised textile household linen and cotton fabrics Taka three crore and animal fodder animal casings, molasses crude fertiliser glycerine, dried and salted fish etc. Taka 53 crore.

The Minister of State for Commerce maintained that the export target for 1981-82 had been set on a realistic basis after taking into consideration the prevailing situation in the international market, the prospects for production supply and domestic surpluses of export items, the proposals and recommendations of public and private trading circles Export Development Council, and the approval of the Government. The Government he said sincerely hopes that all agencies, both in public and private sectors will put in their best of efforts to attain the target and to help reduce the existing imbalances in the country's overall balance of trade position.

Under the new Export Policy two separate lists under the Export Performance Licencing (XPL) schemes at the amended rates of 60 and 40 per cent respectively would continue. Four new items--animal hooves and horns betel leaves, rice bran and wheat bran extracts and frozen frogs will be added to the XPL list and these items will get the licences under the scheme at the rate of 40 per cent of the respective export earnings. With the inclusion of four new items in the XPL list the total number of items in the related list will stand at 85.

The existing facilities for the exporters like customs rebate and duty refund income tax rebate, allocation of foreign exchange funds for meeting the business tours of the exporters abroad provision of concessional bank credit facilities at the rate of 12 per cent interest, etc will continue under the new Export Policy for 1981-82.

Chowdhury Tanbir Ahmed Siddiky stated that the concerned authorities was examining the issue of withholding fresh sanction to any new cold storage plant until the existing cold storage capacity for preservation of fish and shrimps was fully utilized. Similar step for ensuring the optimum utilisation of existing export-oriented industries by way of withholding sanction to creation of any new capacities is also under the active consideration of the Government.

He stated that more lands would be allocated for raising of shrimps and frog production on a priority basis. The cold storage units will get the preference in matter of sanction for the purchase of trawlers for deep-sea fishing he added.

Two More Export Zones Planned

The Minister of State observed that efforts must be continued to attract more joint venture projects in the export-oriented sectors. The work on the Export Processing Zone at Chittagong is in progress and projects for setting up two more export processing zones have been taken up he added. He called upon the private investors to avail themselves of the liberal facilities of the Government for the export-oriented industries. He also stressed the need for stepped-up efforts on the part of all concerned to improve the quality and standards of all exportable items.

Giving a review of the export performance in 1981-82 he said that the extreme form of recessionary and anarchial situation in the international markets and the drop in the demand for and the prices of export items had been responsible for our export earnings at a level below the related target. He observed that the prices of our principal export items registered a fall within the range of seven to 52 per cent depending on the nature of export items. Under such circumstances, the

country had earned less in financial terms during the year under review from her exports although the export trade in terms of physical volume in the case of some main export items had recorded an increase.

Chowdhury Tanbir Ahmed Siddiky stated that if the country's export items would have fetched the same prices as those of 1979-80, the export earnings would have increased by about more Taka 210 crore over the level of actual earnings in 1980-81. He added that the actual export earnings of the country during July-May period of 1980-81 totalled Taka 1059.16 crore. The overall yearly export earnings during the year would be around Taka 1200 crore which would be 20 per cent lower than the related target for the year, he mentioned.

Giving an item-wise breakdown of export earnings he stated that the share of primary products in the overall export earnings during July '80 to May '81 would be around 28.49 per cent while that of the industrial products at around 70.51 per cent. He pointed out that the export earnings from jute and jute goods would total Taka 718.76 crore and those from non-jute items, Taka 340.40 lakh during the same period of the last fiscal year.

Enumerating the export-promotional arrangements during 1981-82, he pointed out that the national export fair like the practice in the previous years would be held in this year. Besides, the practice for the award of the President's Export Trophy and awards will also be continued.

He announced that a high-level national committee had been formed to hold the second international Islamic Export Fair in Dacca. He noted that the decision to hold the fair in Dacca was taken at the Islamic Foreign Ministers' Conference.

Highlights of Policy

Dacca THE BANGLADESH OBSERVER in English 2 Jul 81 p 1

[Text] Following are the highlights of the Export Policy for fiscal 1981-82 announced by the State Minister for Commerce, Chowdhury Tanbir Ahmed Siddiky over Radio and Television in Dacca on Wednesday, reports BSS.

--Export target Taka 1500 crore.

--Share of jute and jute goods Taka 915 crore or 61 per cent.

--Share of non-jute products Taka 585 crore or 39 per cent.

--A new export baggage rule providing tourists to take local products mainly jute carpets and handicrafts after buying them in foreign currency to be introduced.

--Four new items included in the new export policy under XPL schemes.

--Second International Export Fair to be held in Dacca during the Islamic Foreign Minister's Conference.

--Bangladesh to participate in 17 export fairs including 13 international fairs.

--President's trophy for export to continue.

CSO: 4220/7243

COMMERCE MINISTER REPORTS PROGRAM TO STOP PRICE HIKES

Dacca THE BANGLADESH OBSERVER in English 17 Jun 81 pp 1, 12

[Text] An elaborate action programme has been chalked out by the government to improve the availability of critical consumption items with a view to containing the price pressures. The programme would include measures to augment supplies of items of daily consumption through imports by both Trading Corporation of Bangladesh (TCB) and the private sector, extended sales operation by the Consumers Supplies Corporation (COSCOR), increased quota for items for distribution through the public rationing system, effective monitoring of price movements throughout the country, etc.

Addressing the programme at a Press conference at his office chamber, Chowdhury Tanbir Ahmed Siddiky, Minister of State for Commerce, said in Dacca on Tuesday that the government attached special importance to the maintenance of adequate supply and stable prices of critical items of consumption, especially during the month of Ramzan. Mr. Abul Hasnat, Mayor, Dacca Municipal Corporation, was also present at the Press conference.

Detailing the programme, the Minister of State for commerce said that supply of sugar, edible oil and salt for distribution through ration shops in the statutory rationing area would be doubled for a period of six weeks commencing--from June 27, '81'. Additional quantities of edible oil, sugar and salt would be released for distribution in the modified rationing area. Besides, both sugar and edible oil will be available on free sale and in COSCOR shops at fair price, he added.

Mr. Siddiky noted that the supply of kerosene through the normal distribution network would be raised by about 20 per cent to make available this essential item available to the people at reasonable and fair price. The sale operations through the COSCOR will be strengthened and items like chilli, onion, pulses, gram etc would be supplied in increasing quantum for sales through the COSCOR shops in the country, he added.

He stated that supplies of meat, poultry and fish would be augmented in Dacca city and some principal consumption centres like Chittagong, Khulna and Rajshahi. He pointed out that the Dacca Municipal Corporation (DMC) would take measures to ensure the availability of mutton and beef in an increasing proportion during the month of Ramzan and also refix, the prices of the same items. Arrangements have also been made to augment supply of vegetable growth in four agriculture development estates in the country, he observed while pointing out that Bangladesh

Fisheries Development Corporation (BFDC) would concentrate its efforts on making arrangements for availability of fish in increasing quantum. BFDC will also reduce the price of some varieties of marine fish during the month of Ramzan, he added.

The state Minister said that the distribution chain of agencies like BFDC and BADC would be expanded as a part of the governmental action programme for stabilising the prices of essential items. Directorate of Livestock has taken up a programme for the first time, to arrange the sale of beef in packets at fair-price, he observed. In addition to COSCOR outlets all over the country, municipal community centres may also be utilised for the purpose of distribution of critical items of daily consumption, he added.

About milk food, he stated that TCB and COCSOR would put additional quantities of milk food on sale. While noting that a sufficient quantity of milk food has also been imported by the private sector, he said that Milk Vita would increase the supply of liquid milk and distribute increased quantities of powdered milk received from BEC through its dealers throughout the country.

Mr. Siddiky ruled out the possibility of any rise in the price of rice and noted that the government had adequate stocks of foodgrains. If the price of rice registers any rise in the market, the government will release additional supplies from its stocks, he said.

He admitted that damage to the production of onion, chillis, ginger, etc was due to off-season excessive rainfall and that of pulses due to the alternative use of land for wheat production. The ICB is importing sufficient quantities of chillis, onion, dal etc to meet the shortfall for distribution through COSCOR and ration shops, he pointed out. The Private Sector importers have been allowed to import chillis, onion dal ginger and salt free of duty and sales tax under the Wage Earners scheme, he added. When asked about the additional quantum of foreign exchange likely to be involved because of such imports to improve the domestic availability he said that it was not possible to answer this off-hand. He however assured there would no shortfall in foreign exchange for arranging needed imports of these critical items of consumption.

Replying to a question, he said COSCOR had as of now 164 sales centres throughout the country. The number of such sales centres in Dacca is 17, he added.

ANNIVERSARY OF 1975 NEWSPAPER CLOSINGS OBSERVED

Dacca THE BANGLADESH OBSERVER in English 17 Jun 81 pp 1, 12

[Text] The journalists all over the country observed the Black Day on Tuesday in response to a call by Bangladesh Federal Union of Journalists. On this day in 1975 all the newspapers of the country except four government controlled dailies and some weeklies were closed down by a stroke of pen by the then Baksal Government. Hundreds of newsmen and other employees of the industry were thrown out of employment.

The newspapers were closed down to gag the freedom of Press and to suppress expression of multi-party opinion in the society.

The Dacca Union of Journalists with Mr. Iqbal Sobhan Chowdhury in the chair held a discussion meeting on the day at the National Press Club on Tuesday. The speakers at the meeting vowed to resist one-party rule in the country and to uphold the freedom of Press. They also said that the journalists of the country were committed to multi-party democracy and opposed to fascist rule.

The speakers demanded the abolition of Management Board and decontrol of the government owned newspapers. They criticised the present government for protecting the Baksal law which aimed at gagging the Press and controlling the newspapers.

ENA adds: Mr. Ahmed Humayun speaking at the meeting said the Journalists Union could not take stand against the annulment of newspapers and gagging of freedom of Press in 1975, but that did not imply that they would not be able to resist any move against freedom of the Press now.

He said the journalists union stood for the freedom of expression of all political views, irrespective of party affiliations and this must be ensured for healthy growth of multiparty democratic system in the country.

The BFUJ leader said the incident that took place on Jun 16, 1975 was a manifestation of "one party fascist politics" and no amount of "white wash" could conceal that stain". He said after the changes of 1975, the journalists union had upheld the cause of freedom of the Press and expression and continued their struggle uncompromisingly. He pointed out that when the government had cancelled the declaration of the weekly REPORTER the journalists union took up the issue and declaration was restored.

Mr. Enayetullah Khan said annulment of newspapers in 1975 by the then government was not an isolated event but part of its politics to suppress the democratic rights of the people and as such it must be condemned by all democratic forces.

Mr. Reazuddin Ahmed said the journalists would resist if there any fresh move to suppress the freedom of the Press or to impose an one party rule. He said the journalist community did not back out from its commitment to bring an end government control over newspapers. He pointed out that the journalists union was fighting for dissolution of Newspaper Management Board.

Mr. Iqbal Sobhan Chowdhury said the journalist could not be complacent only by government assurance of uphold the freedom of the Press, he said "freedom of press cannot be secured unless it was institutionalised".

Mr. Amanullah Kabir said journalists community alone could not uphold the democratic values in the face of all powerful political force but it can very well serve as an "auxiliary force" to resist any anti democratic and anti people move. He hoped the journalist community will play its role unitedly to safeguard the democratic rights of the people in future.

OIL MINISTER SPEAKS AT GAS WELL OPENING

Dacca THE BANGLADESH OBSERVER in English 17 Jun 81 pp 1, 12

[Text] Brahmanbaria, June 16:--The fifth well of Titas gas field with a capacity to produce an additional 30 million cubic feet daily was commissioned here today reports BSS.

This will bring the total production capacity of the Titas field to 150 million cubic feet daily.

The project was implemented under a British grant worth over Taka eight crore. The British grant helped finance the foreign exchange component of the Taka 10 crore project.

Petroleum Minister Akbar Hossain inaugurated the Titas well no 5 at a simple function at the site near Brahmanbaria town.

Work on the project started in October last year and the drilling was completed in January.

Inaugurating the production well and its dehydration plant, the Petroleum Minister said that economic constraints in the field of exploration stood in the way of implementing different projects.

But he thanked the British Government as well as the governments of Federal Republic of Germany (FRG) USSR, Belgium Holland France and other countries which had been supporting Bangladesh's oil and natural and exploration efforts and development programmes.

The Minister said that the new well at Titas would produce as a by product 45 barrels of condensate oil, besides the Minister disclosed that the Titas well no. 5 would enable an additional sale of gas worth Taka 14 crore providing oil import replacement worth Taka 70 crore.

The function was addressed among others by Mr. S. S. Hasan Ahmed, Chairman Petrobangla Mr. Charles Clift First Secretary of the British High Commission Mr. Charles Whitbourn, British Petroleum Project Coordinator and Mr. Anwarul Islam Chairman of Bangladesh Gas Fields Company Limited which own the Titas gas field.

Paying tributes to late President Ziaur Rahman, the Minister described him as the main driving force behind all exploration and development projects in the oil and gas sector of the country.

He said the late President had the farsight and prudence about the potentials of the country's natural resources particularly in the energy sector and that was why he had always emphasised the need for quickly exploring them for the benefit of the people.

FOOD MINISTER ANSWERS MP'S QUESTION ON RATIONING

Dacca THE BANGLADESH TIMES in English 25 Jun 81 p 1

[Text] Food Minister Mr Abdul Momen Khan told the Jatiya Sangsad on Wednesday that the Government had no plan to withdraw the present rationing system.

He was replying to a question by Kazi Mohammad Abu Yousuf, in reply to a separate question by Mohammad Joynal Abedin Bhuiya, the Food Minister said that the Government had given a total subsidy of Tk. 46.15 crore for the items under ration during 1979-80.

Mr Momen Khan said that at present six cities and towns were covered by full rationings system. A total of 2.46 lakh tons of rice, 2.46 lakh tons of wheat, 47 thousand tons of sugar, about 11 thousand tons of salt and 24 thousand tons of edible oil were distributed in the rationing areas during 1979-80.

The Food Minister said that a total of 4.47 lakh tons of rice, 14.62 lakh tons of wheat, 36 thousand tons of sugar, 51 thousand tons of salt and 14 thousand tons of edible oil were distributed in the rural areas and the areas outside the statutory rationing areas in 1979-80.

Mr Momen Khan said that the Government had plans to reduce the subsidies on the rationed items in phases.

Food Stock

Mr Momen Khan told the Sangsad that a total of 12.71 lakh tons of foodgrains was in the Government stock on May 31, 1981. The stock included 7.31 lakh tons of rice and 5.40 lakh tons of wheat, he added.

The Food Minister said that agreements were signed with 11 countries and international organisations to import 6.72 lakh tons of foodgrains during 1980-81 to meet the deficit.

Replying to a separate question by Mr Awsafur Rahman, the Food Minister said that the Government had purchased 2.51 crore maunds of paddy from the growers and others during 1980-81 (till June 16) at a cost of Tk. 284 crore. Of this, he said, 1.76 crore maunds were stored in Government godowns 73 lakh maunds were stored in hired godowns and 1.75 lakh maunds were kept outside the godowns.

Indian Rice

Mr Momen Khan also revealed that the Government made final arrangements to give back 50,000 tons of rice to India during the current financial year.

Replying to a question by Mr S A Khaleq (BNP) in the Jatiya Sangsad during the question hour, the Food Minister said that 1.5 lakh tons of rice was imported from India in 1978-79. He said that the remaining one lakh tons would be given back during the next financial year (1981-82).

Profit Bonus for Workers

Labour and Industrial Welfare Minister Mr Reazuddin Ahmed told the Jatiya Sangsad on Wednesday that the Government was actively considering to increase the existing two and a half per cent profit bonus to the industrial workers.

He was replying to a written question by Mr Mohammad Toaha (BSD) during the question hour. Replying to a separate written question by Mr Mahbubur Rob Sadi Choudhury (JSD), Mr Reazuddin said that there was a provision under the present Labour Law to form "participation committee" comprising equal number of members of the management and the workers representatives in nationalised industries where the number of workers were 50 or above. Replying to another question by Al-Haj Shafiqullah he said that arrangements were made to settle labour cases in the labour courts within 60 days.

Aid for Flood Victims

Mr Emran Ali Sarkar, Minister for Relief and Rehabilitation told the Jatiya Sangsad on Wednesday that the Government had sanctioned Tk. 12 lakh as house building grant, 33,149 maunds of wheat as free distribution and another 28,500 maunds of wheat for test relief for the victims of recent tornado, cyclone and sudden floods in the country.

He was replying to a question by Mr Abdul Matin.

BRIEFS

BRITISH HIGH COMMISSIONER--Mr. Frank Mills, CMG, has been appointed British High Commissioner to Bangladesh, according to a Foreign Office announcement in Dacca on Thursday, reports BSS. Mr. Mills will succeed Sir Michael Scott, the present British High Commissioner at Dacca. An experience career diplomat, Mr. Frank Mills was born in 1923, joined British Commonwealth Relations Office in 1948 and served in various capacities both in Commonwealth Relations Office and in different British missions abroad. He was appointed British High Commissioner in Ghana in 1975. At present he is an Assistant Under-Secretary of State, Commonwealth Relations Office in London. Mr. Frank Mills is married and has three children. [Text] [Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 p 1]

FOOD WAREHOUSES--Chittagong, June 25:--Mr. A. S. Prue Chowdhury, Minister of State for Food, said here on Wednesday that concerted efforts had already been made to ensure godown facilities in every procurement centres says a PID handout. The Minister was visiting a number of newly constructed food godowns at Hathazari and Dewanhat, in Chittagong on Wednesday. He was addressing a cross section of people on Wednesday at Dewanhat Central Storage Depot. Explaining the measure taken to expedite setting up of food godowns, the Minister said that about 100 food godowns had already been constructed in Chittagong Division during this financial year and 100 more will be completed soon. Referring to the role of internal procurement to ensure fair prices to the farmers the Minister said that Government had already intensified internal procurement and 10 lakh tons of foodgrain had so far been procured during this year he added. He urged the officials to work honestly and sincerely to achieve the objective of procurement drive so that the growers are benefited. [Text] [Dacca THE BANGLADESH OBSERVER in English 26 Jun 81 p 8]

FOREIGN AID UTILIZED--Bangladesh utilised 7,800 million US dollar out of a total 10.700 million dollars mobilised as external assistance during the current financial year, the Prime Minister Shah Azizur Rahman told Jatiyo Sangsad on Thursday night reports BSS. Speaking on the coming year's Budget the Prime Minister told the House that the commitment of foreign aid was 1.710 million dollar and disbursement was 1200 million dollar. The commitment for the coming 1981-82 year was estimated at 2.300 million dollar while disbursement at 1.400 million dollar. The Prime Minister said the net inflow of foreign aid in Bangladesh was "very low" in comparison to other developing countries. The per capita inflow of foreign aid to Bangladesh is 10 US dollar this compares with Indonesia at 20 dollar Kenya at 21 dollar Egypt at 60 dollar Tanzaniq at 38 dollar Sri Lanka at 16 dollar and Philippines at 25 dollar. [Text] [Dacca THE BANGLADESH OBSERVER in English 27 Jun 81 p 12]

HEALTH MINISTRY CHANGE--The Acting President Justice Abdus Sattar on Monday assigned the charge of the Ministry of Health and Population Control to Dr M A Matin also in addition to Ministry of Youth Development according to an official announcement in Dacca on Monday night reports BSS. [Text] [Dacca THE BANGLADESH TIMES in English 30 Jun 81 p 1]

SOCIAL RECONSTRUCTION ORGANIZATION--A new organisation under the name of Social Reconstruction Organisation was formed at a meeting of people representing different shades of opinion on Sunday at Abu Dhar Giffary College premises. Presided over by Mr Mohammad Mozammel the meeting was largely attended. A 37-member convening committee with Mr Abdul Gaffur as the Convener was formed at the meeting. [Text] [Dacca THE BANGLADESH OBSERVER in English 3 Jul 81 p 8]

ELECTION DATE PROTEST--An emergency meeting of Bangladesh Workers Party held on Tuesday demanded of the Government to shift the date of presidential polls, lift emergency, stop arresting political workers and ensure neutrality of the mass media. The meeting presided over by Mr. Haider Akbar Khan Rano, General Secretary, expressed its opposition to any amendment to the constitution that sought to serve the interests of "any individual" and demanded re-introduction of the constitution of 1972. [Text] [Dacca THE BANGLADESH TIMES in English 3 Jul 81 p 3]

AMBASSADOR TO SYRIA--The Government has decided to accredit concurrently Mr Humayun Kabir at present Bangladesh Ambassador in Teheran; as Ambassador to Syrian Arab Republic; says an official announcement in Dacca on Wednesday. [Text] [Dacca THE BANGLADESH TIMES in English 3 Jul 81 p 3]

NEW MEXICAN AMBASSADOR--Mrs Graciella De La Lama has been appointed Ambassador of Mexico to Bangladesh with residence in New Delhi. She held important positions in the Government of Mexico prior to her appointment as Ambassador to India, according to an official source. Born in 1933 Mrs Graciella obtained her Master's Degree in Philosophy from National Autonomous University of Mexico and Phd from Sorbonne University, Paris. Mrs Graciella is a reputed scholar and noted author of many publications. She knows English, French, Sanskrit and German. [Text] [Dacca THE BANGLADESH TIMES in English 3 Jul 81 p 3]

PRESIDENTIAL CANDIDATE--Bogra, July 2: Mr. Zillur Rahman an advocate declared his candidature for the coming presidential poll. He is son of one jute traders of Tallatola village under Gabtali PS. Mr. Rahman claimed that he had been supported by large people and the members of Bogra Bar. [Text] [Dacca THE BANGLADESH TIMES in English 3 Jul 81 p 8]

SRAMIK DAL EXPELLEES--A meeting of the Executive Committee of the Tongi regional unit of Bangladesh Jativatabadi Sramik Dal has expelled Mr Mohammad Hossain Mr Abul Kalam and Mr Kasim Uddin Vice-President Joint Secretary and Sports Secretary respectively of the unit from the organisation and stripped them of their official positions. According to a Press release the action was taken against them in view of their anti-organisational and anti-people activities. [Text] [Dacca THE BANGLADESH TIMES in English 29 Jun 81 p 8]

ELECTION COMMISSION SECRETARY--Mr. Hossain Ahmed formerly Secretary Ministry of Fisheries and Livestock has taken over-charge as Secretary Bangladesh Election Commission on Tuesday an official handout said in Dacca reports ENA. Md. Khorshed Anwar, former Secretary of the Election Commission has assumed the charge of the office of the Secretary Ministry of Fisheries and Livestock on Tuesday. After assuming the charge of his office in the Election Commission on Tuesday Mr. Hossain Ahmed met the officers of the Election Commission where the Chief Election Commissioner Mr. Justice A. K. M. Nurul Islam and the Election Commissioner Mr. A. M. Choudhury were also present. [Text] [Dacca THE BANGLADESH TIMES in English 25 Jun 81 p 8]

BNP EXPELLEE--Dr. Md. Muibur Rahman member of Comilla Sadar North political district of BNP, has been expelled from the party for violation of discipline, a BNP press release said, reports BSS. The decision of expulsion was taken unanimously at a special meeting of the National Standing Committee of the BNP on Monday. The Press release said Dr. Rahman had been expelled because of the violation of party discipline by contesting in the coming by-election of Comilla-8 as independent candidate without the approval of the party. [Text] [Dacca THE BANGLADESH OBSERVER in English 16 Jun 81 p 1]

BURMESE JUTE PURCHASE--Bangladesh will export jute goods worth about Taka five crore to Burma, reports BSS. According to a report reaching Dacca on Monday, the two countries signed an agreement Saturday in Rangoon under which Bangladesh will sell gunny bags worth 12 lakh 74 thousand three hundred and 20 Pound sterling (about Taka five crore). The agreement was signed between Myannma Export Import Corporation of Burma and Bangladesh embassy in Rangoon on behalf of Trading Corporation of Bangladesh. [Text] [Dacca THE BANGLADESH OBSERVER in English 16 Jun 81 p 12]

ILO MEMBERSHIP--Bangladesh has been elected a member of the Governing Body of International Labour Organisation (ILO) for another three year term getting the highest number of votes among the Asian Group according to a message received in Dacca on Tuesday says a PID handout. Elections to the ILO Governing Body were held at the 67th Annual Conference of the ILO now in session in Geneva. Minister for Labour and Industrial Welfare Mr Reazuddin Ahmed led Bangladesh delegation to the conference which commenced on June 3. Mr. Ahmed returned to Dacca on June 5. Election of Bangladesh to the ILO Governing Body for another three year term is a testimony to the prestige earned for the country by the dynamic leadership of late President Ziaur Rahman the source added. [Text] [Dacca THE BANGLADESH OBSERVER in English 17 Jun 81 p 12]

IRAQI AID--Iraq has donated an amount of US $3,60,000 for same Islamic projects and organisation in Bangladesh, says a PID handout. Cheques for this amount was handed over to Religious Affairs Minister Mr. Abdur Rahman by the Iraqi Ambassador Mr Arif Mohammed Ali Karim on Friday. Out of this total amount US $2,50,000 has been provided to the Ministry of Religious Affairs for same projects of the Ministry. The remaining US $1,10,000 will be received by the Institute of Islamic Education and Research, Gulshan Central Mosque and Eidga and the World Islam Mission. The Iraqi donation has been made as per discussion held between Religious Affairs Minister Mr Abdur Rahman and Iraqi Minister for Awqaf and Religious Affairs Mr. Noori Faisal Shahir during the latter's visit to Bangladesh last month. [Text] [Dacca THE BANGLADESH OBSERVER in English 20 Jun 81 p 3

AMBASSADOR TO NEPAL--The Government has decided to appoint Mr. Harunur Rashid at present Deputy High Commissioner of Bangladesh in Calcutta as Ambassador of Bangladesh to Nepal said an official handout on Saturday says ENA. [Text] [Dacca THE BANGLADESH OBSERVER in English 21 Jun 81 p 1]

ELECTION DATE PROTESTED--Eighteen political parties on Monday jointly called for refixing the date of Presidential election in the third week of November, reports ENA. The meeting was presided over by elderly leader Ataur Rahman Khan. In a resolution they said the "hastily" announced election date by the government without any consultation with opposition parties was designed to hold the election anyway to remain in power. Moreover, the resolution said the election date has been fixed without taking into consideration the practical difficulties which will arise because of coming Ramazan and rainy season. The resolution said when there is Constitutional provision for holding election within 180 days the Government could refix the date on a more favourable date ensuring larger popular participation in the polls. [Text] [Dacca THE BANGLADESH OBSERVER in English 23 Jun 81 p 12]

UNICEF AID AGREEMENT--An agreement for 1.4 million U.S. dollar for development of social services in Bangladesh was signed in Dacca on Monday between the government of Bangladesh and the United Nations Children's Emergency Fund in Dacca, says an official announcement. The programme of operation will cover the areas of activities of basic functional education and income generation skill training in children's homes and Care Protection Centres, training in different trades and skills for women belonging to disadvantaged families in rural and poor urban locations. Mr. A B S Safdar, Secretary, Ministry of Manpower Development and Social Welfare signed the agreement on behalf of the government of Bangladesh while Mr. Yoon Gu Lee, Officer-in-Charge of Dacca Office, on behalf of the UNICEF. UTTAR PRADESH CHIEF MINISTER RESHUFFLES CABINET

New Delhi PATRIOT in English 8 Jul 81 p 1

[Text] Lucknow, July 7.

In a sudden move today Chief Minister V. P. Singh divested his senior-most colleague Brahma Dutt of his portfolio of Power, leaving with him planning and Finance.

During her last visit to Lucknow, Prime Minister Indira Gandhi had criticised the poor performance of the power department.

In the reshuffle of portfolios, a surprise change was withdrawal of Information, National Integration, Cultural Affairs, Panchayat Raj and Rural Development from Mr Ammar Rizvi, who was supposed to be very close to the Chief Minister. Mr Rizvi was, however, allotted the important portfolio of PWD.

Mr Jagdish Prasad, who was so far Minister for PWD has been allotted Law and Justice.

Another senior Minister, Mr Brahma Singh, has lost Agriculture. He has been allotted Rural Development and Panchayat Raj.

Mr Bhanu Pratap Singh, who was so far holding the portfolio of Cane Development has been given Agriculture. The other portfolios have been retained by the Chief Minister himself.

The Chief Minister inducted only two Ministers of States Bachcha Pathak and Ram Naresh Shikla in the Council of Ministers. They are said to be close to former Union Minister Kamlapati Tripathi.

Governor C P N Singh administered the oaths of office and secrecy to the two new entrants at a simple but impressive ceremony at Raj Bhawan, add agencies.

With the swearing-in of the two new Ministers of State, the strength of the Vishwanath Pratap Singh Ministry has risen to 44 including 19 Ministers of State and eight Deputy Ministers.

The Chief Minister told newsmen that expansion of the Ministry was a continuous process.

Chief Minister V P Singh was today sworn in as a member of the State Vidhan Sabha.

Mr Singh was elected to the Vidhan Sabha in the by-election from Tindwari Assembly constituency last month.

Seven other newly-elected members who were sworn in by the Speaker are: Mr Krishan Veer Singh, Mr Jagdish Narain, Mr Daljeet Singh, Mrs Pushpa Chauhan, Balik Mohammed Zahir Ahmad and Mr Siamder Ali Khan, all belonging to Cong-I and Mr Virendra Pratap Shahi (Ind).

MANIPUR PLA REPORTED ALMOST TOTALLY CRUSHED

New Delhi PATRIOT in English 8 Jul 81 p 1

[Text] Calcutta, July 7.

In a major swoop by the security forces, seven top activists of the outlawed Peoples Liberation Army of Manipur were killed and its leader N. Bisweswar Singh arrested last night.

According to a spokesman of the Eastern Command, with this operation, the PLA in Manipur has almost been totally crushed.

This great success was achieved after a 2-hour gunbattle at a tiny village called Tekcham, about 40 kms from Imphal.

Eastern Command BGS Brig V K Sood told a hurriedly called press conference at Fort William this afternoon that during special operations launched in areas around Thoubal, about 30 kms from Imphal on the same day Bisweswar Singh was apprehended along with another extremist.

Bisweswar Singh is the undisputed leader of the banned revolutionary government of Manipur and has been the brain behind the activities of the People's Liberation Army (PLA) in that State.

In all there were 19 hardcore extremists in PLA, who got training in Lhasa in 1978-79. Now only one of them, Kunja Behari Singh, still remains in large. Brig Sood said the most significant success was the capture of Bisweswar Singh, who is a committed Maoist and a legendary figure in Manipur and had a prize of rupees one lakh over his head.

Brig Sood said one contingent of Jammu and Kashmir Rifles went into operation after receiving secret information about the group's whereabouts. There was heavy exchange of fire between the security forces and the extremists, and the commander of the operation himself got injured.

Four among the seven extremists killed in the encourter were identified as Thougan Kobi Charan Singh, Althokpam Rajan Macha Singh, Ladegram Indrajit Singh and Khoijan Bir Mangal Singh.

In reply to a question, Brig Sood said there was no doubt about the identification of Bisweswar Singh. It was cross-checked from many sources. He is a sick man suffering from tuberculosis he added.

GANDHI ALLEGED TO PLAN PRESIDENTIAL GOVERNMENT

New Delhi PATRIOT in English 8 Jul 81 p 1

[Text] Allahabad, July 7 (PTI)--Democratic Socialist Leader H N Bahuguna alleged today that Prime Minister Indira Gandhi was secretly continuing an exercise to introduce the presidential form of government and dispense with the Parliamentary system of democracy.

On the on-going exercise, Mr Bahuguna told newsmen here some foreign constitutional lawyers and jurists had also been involved by Mrs Gandhi.

Mr Bahuguna said the current study covered political systems of such countries as that of Philippines, Japan and Australia in the eastern hemisphere and France, West Germany, Ireland, USA, Canada and some Scandinavian countries.

But Mr Bahuguna said he was confident that a section of Congress-I members of the Lok Sabha would foil Mrs Gandhi's bid to 'foist' on the country 'a hodgepodge' presidential system.

He said he had already got assurances from them as from certain opposition groups supporting her at present that they would come out openly whenever a motion was made.

Mr Bahuguna called for opposition unity in preserving the right of vote which he said was now in 'grave peril.'

Mr Bahuguna indicated that the efforts now 'under way to bring together opposition parties on the limited issue of safeguarding the Parliamentary system of democracy in the country would take a 'concrete shape' by the end of the month.

STUDY ON FREEDOM OF PRESS IN INDIA SUMMARISED

New Delhi PATRIOT in English 8 Jul 81 p 5

[Text] A indepth study undertaken at the request of the Press Council of India has pinpointed provisions of certain existing statutes as being inconsistent with the concept of freedom of the press in India reports UNI.

The study has also highlighted certain other provisions which need to be amended as these have a tendency to fetter the free flow of information.

The study was undertaken by the Indian Law Institute New Delhi to find out the damage done to the freedom of the press by the Official Secrets Act, the Contempt of Courts Act, parliamentary privileges and other statutory provisions.

The study has called for liberalisation of the present strict rules of Official Secrecy "to enable the press to discharge its social function of informing the public about the policies and programmes of the government"

It says: "The two wings of the Government, namely, the legislature and the judiciary, function in the open....on the other hand, the executive does its business in its secret chambers to which the people have hardly any access.

"India with its pattern of mixed economy and socialistic state is one of the most governed nations in the world: the state fixes prices, acquires goods and property, regulates sale, purchase and distribution of goods through licensing and other means, carries on trade and business, runs industries and other services controls regulates and gives credit and money, gives bounties of various kinds detains persons in preventive detention affects personal liberty in various ways and regulates the economic and social life of the people".

It warns there is an inherent danger that the vast powers of the executive may not be used for public welfare but used for private gain or with corrupt motives or arbitrarily and capriciously. In this context it is essential for the public to know what the Government is doing.

PROPER BALANCE

While stressing that openness is essential to the functioning of a democratic society, the study concedes that secrecy is also necessary to protect certain vital national interests such as defence, national security, foreign relations, criminal law, personal privacy and trade secrets.

It is however, of the view that while a proper balance has to be drawn between the needs of openness and the requirements of secrecy, this balance has to be tilted in favour of openness than it has been hitherto.

The study says "innumerable instances can be given where the most trivial matters are treated as secret which do not serve any interest of the nation except saving the government from embarrassment. The reports of various inquiry committees and commissions (like plane crashes or accidents) are treated as secret. The recent reports of the Bihar CID and DIG into Bhagalpur blindings of the undertrials are being treated as secret and all kinds of subterfuges are being used by the Bihar Government to withhold their production before the Supreme Court".

Another extremely odd instance of government secrecy is that by an administrative order issued on 30 April, 1976 the government directed its departments not to submit confidential files of policy questions to the Comptroller and Auditor General of India. The idea was to stall the possible adverse comments of the Comptroller on the very large amounts spent on 'populist programmes' by the Government. Fortunately, these instructions were later withdrawn.

DISMAY

The study has expressed dismay that quite often the Government uses the weapon of "official secrecy" to prevent investigation by the press, or publication of a news. This may be by way of threat which takes place quite often, or even prosecution. Even in England with its traditions of individual liberty and press freedom the government has behaved similarly.

A study of the public prosecutions and private pressures applied in Britain to newspapers under the Official Secrets Act during the last 50 years shows all too clearly that this law has often been used to restrict free expression and investigation on the activities of the government. It says the position is the same in India. In India for giving communication to the press there is the government's Press Information Bureau (PIB).

"Its original idea was to supply news to the press, but according to one journalist, PIB

has failed to discharge its function of providing news and has deterred access to information. It acts as a good public relations office on behalf of the Government by highlighting its good performance or only giving 'development news' aimed at projecting the good work. "Uncomfortable facts are not allowed to be checked. This is true in particular of news concerning foreign relations, nothing that the South Block does not consider 'news' is accessible to newsmen. Both the timing and context are decided by it. And quite often journalists are supposed to publish the official line but make it appear as their own. This is considered to be in national interest.

The judiciary has not yet taken the view that if disclosure is justified in the public interest no prosecution can be launched against the persons concerned.

The fact that the Official Secret Act has hitherto been reasonably administered is no guarantee that it will continue to be so administered in future.

The study feels that Section 5 of the Official Secrets Act is a catch-all provision and hinders the publication of information which is not prejudicial to legitimate national or private interests but whose publication may be in the interest of the community as against the interests of the political party in power. It is therefore essential to restrict its operation by specifically defining the types of information which need protection from disclosure.

ANOTHER SAFEGUARD

The study feels it is essential to have another safeguard for the individual and this pertains to control of prosecutions. In England the Attorney General exercises control over prosecutions under the Official Secrets Act. But this has been subject to criticism. The Attorney General is a politician and a member of the Government and this creates a doubt in his objectivity. In India though the Attorney General is not a politician or a member of Parliament yet he is a political appointee and he is more concerned with protecting the interests of the party in power than the individual.

Giving of control over prosecutions to the Attorney General does not seem to be a satisfactory solution. Alternatives should be explored. It may be appropriate to entrust the task to a committee consisting of the Attorney General the chairman of the Press Council and another nominated member of the Council.

REPORT ON PAPER TO BE PRESENTED AT UN ENERGY MEET

New Delhi PATRIOT in English 8 Jul 81 p 5

[Text] Orthodox kitchen traditions are as much a handicap in harnessing the sun the wind or organic waste as high capital cost and the still inclusive search for a package of alternate energy sources for a particular area.

The Indian experience is highlighted in a paper prepared by the Department of Science and Technology's special commission for alternate sources of energy for presentation at the UN conference to be held in Nairobi in August.

The National Paper, as it is called, stresses the importance of a massive public relations programme to bring home the advantages of harnessing renewable energy sources even as the research continues to make the projects economical and efficient.

Towards this composite goal, India feels that while developing countries will have to do much work themselves, the developed countries, who are the major consumers of oil and coal should take the initiative.

It calls for eliminating tariff and non-tariff barriers against products relating to alternate energy technologies exported by developing countries, subsidies for research and development and bilateral and multi-lateral arrangements for transfer of technology.

The paper surveys the progress made by India in various fields — including solar energy, wind energy, hydel energy and researches in even tapping energy of the seas.

In a special section, the National Paper analyses the factors that have slowed down the development and adoption of these technologies.

CONSTRAINTS

The most important constraints in the wider utilisation of renewable energy systems are the high initial capital costs. The cost of a solar or wind device today is considerably higher than that of the product based on conventional fuels. In a country like India, where capital is relatively scarce and where individual earnings are not high, this indeed is a deterrent to most potential users of renewable energy systems.

The low level of production on account of this in turn inhibits any cost reduction that may be achieved through a large volume of production. Once again it is developing countries which are more seriously affected by this vicious circle.

Even in the case of hydropower where the technology is already well developed, large initial investments are required to fully exploit the hydroelectric potential in addition to long gestation periods for hydroelectric projects. Relatively simple unit such as biogas plants are also beyond the reach of a large percentage of farmers.

The problem of high cost of renewable energy system can only be overcome through technology improvement, material and manufacturing development, and a package of fiscal and other promotional measures, the paper says.

For example, a breakthrough in solar photovoltaic systems can be expected if the costs of producing solar grade silicon and solar cell manufacture are brought down to a fraction of the current levels. Cheaper windmills and accessories will become available when material and component costs are brought down.

Likewise, developments in technology are necessary to bring down the cost of batteries for energy storage or electric vehicle applications, mini and micro hydro sets and other devices' systems for the utilisation of renewable energies.

India points out that there is a fear that developing countries will not be able to benefit from advances in technology as long as there are difficulties in having access to these advances.

NEED FOR SUBSIDY

The conventional energy structure is artificially priced in many countries including India. The capital investment in conventional energy supply is borne by the energy supplies (in India, largely the public sector) while for renewable energy utilisation, the user has to incur the initial investment also.

It is therefore essential that a system of subsidies and inventives is introduced at least in the initial stages so that renewable energy systems become economically competitive. Such a scheme is already in vogue in India in the case of biogas plants. This calls for action largely at the national level though international agencies and financial institution may have a role here.

As the use of conventional fuels increased in the past decades, a vast infrastructure for manufacture, distribution, supplies, maintenance and servicing has been built up in most countries. Even in India where only 25,000 out of the total 5,70,000 villages have been electrified, there is a significant infrastructure for the generation, transmission and distribution of electricity and for the manufacture, sales and servicing of devices which run on electricity.

This infrastructure will expand further during the sixth Plan when an additional 100,000 villages are expected to be electrified.

Also, in spite of certain shortcomings, a distribution network has been built up for the supply of conventional fuels such as coal, kerosene and diesel oil. There is no such infrastructure to match in the renewable energy sector. Any widespread utilisation of renewable energies will require a suitable infrastructure for the manufacture, installation and servicing of renewable energy systems.

This is even more important when decentralised autonomous installations are to be propagated, India notes.

INADEQUACY

The inadequacy of institutional framework has been felt even in the case of biogas where the technology has been commercialised for long time in India and the plants are basically simple. A socio-economic evaluation of biogas systems in India carried out under the sponsorship of Department of Sciences and Technology has brought out many issues related to technical information, promotional agencies, manpower, manufacture and maintenance. For instance, out of 173 plants surveyed in four States 96 were located in villages which had no repairing centre. Only about 22 per cent of the plants had a service centre within a distance of five km.

The problem of infrastructure development obviously related to economic considerations, socio-cultural parameters and general awarences. Special efforts will be needed for the development of infrastructure for the expected to pose serious maintenance problems, the paper says. If community biogas plants and integrated energy systems are to be installed in village, trained workmen will be required to operate and maintain them.

The problem of spreading awarences of renewable energy systems is common to many countries of the world. Even in India where there have been certain traditional ways in which renewable energies have been used, awareness have to be promoted for new techniques for efficient utilisation of solar energy. Even in industry, the paper notes, a large section not aware of the need for, or the ways of, conserving energy and utilising renewable sources.

STRESS ON PUBLICITY

India stresses the need for an organised programme of publicity and promotion which can lead to useful results. Most owners of biogas plants became aware of such plants only during the 1970s' when significant efforts in this direction were launched. Owners decided to install the gas plants the same year in which they became aware of such plants. Significantly, this is true irrespective of the level of education of the owners (at the same time only 5 per cent of the plant owners surveyed were illiterate, the paper says.

The spread of modern renewable energy may also be limited by the fact that large percentage of the population is illiterate and the people themselves divided into a large number of languages and dialects; these two factors affect communication which is essential for any awarences programme.

Any technical literature will have to be prepared in as style that is easy to understand and translated into various languages. Enough experience in this regard is however available through other national programmes relating to agriculture and health.

DECLINE IN REMITTANCES FROM INDIANS ABROAD NOTED

New Delhi PATRIOT in English 8 Jul 81 p 8

[Text] Madras, July 7 (PTI).

Remittances from Indians residing in the West Asia countries of late has shown a marked decline and the trend is likely to continue owing to the war raging in that region, according to the additional secretary, Union Commerce Ministry C Venkataraman.

In a paper placed before the two-day seminar on import policy organised by the Delhi based Indian Institute of Foreign Trade (IIFT) here, Mr Venkataraman has voiced concern at this trend, which will erode the country's foreign exchange position.

Mr Venkataraman has said "our import bill will increase rapidly, rather dangerously on account of further hikes on oil prices. In such a situation, it might be difficult to keep up the tempo of liberalised imports".

The paper was submitted before the conference in absentia by Mr Narayan Datt, assistant chief of IIFT.

Mr Venkataraman, however, pointed out that "imports have necessarily to be liberal not only for our industrial development but also for export production".

He said under the circumstances the best source for financing the imports was through physical exports of commodities and invisible exports of skills and services. "In the eighties, India is likely to launch a massive export drive to earn foreign exchange for meeting the requirements of its liberalised imports".

In the context of the growing protectionist trends by developed countries, India's liberal import policy would be an eye opener. If a developing country like India could keep up the tempo of liberalised imports, it was quite likely that the protectionist trends presently apparent in some of the developed countries would slowly diminish, he said.

FLOW OF SMUGGLED GOLD FROM DUBAI INTO INDIA REPORTED

Calcutta THE STATESMAN in English 20 Jul 81 p 9

[Text]

DUBAI, July 19.—More than 5,000 tolas of gold is being smuggled into India every day from this West Asian trading post, reports UNI. Business sources say that due to the recent fall in the international prices of gold substantial quantities of the yellow metal are being imported from London and Zurich and then sent to India via Pakistan.

The difference between the prices of gold in India and Dubai averages about Rs 30 to Rs 40 a gramme, making smuggling lucrative. At the same time, India offers the best market for gold because of the traditional habit of its people to hoard the metal as a measure of security.

The staggering damage being done to the Indian economy by this smuggling is indicated by the fact that in May alone, Dubai traders imported 3,000 kg of gold, most of which found its way into India in return for silver. Reports from London suggest that in the same month, Dubai traders supplied the bullion market there with 51,000 kg of silver, while 9,000 kg and 8,000 kg respectively were supplied to the markets in Zurich and France. Western countries require large quantities of the white metal for industrial consumption

Sources said that in January 1980, when international prices of silver had gone up substantially than those in India, more than 9,000 kg of silver was smuggled out of the country. Silver has always been cheap in India, where even the poor maintain good stocks. Sources said that certain factors were responsible for the smuggling into and from India.

THIRST FOR GOLD

Smuggling is not considered a crime, morally or legally West Asian countries. Secondly, Indians have an unquenchable thirst for gold "consider the number of marriages in a year and calculate the demand even at the rate of one tola a family", said one source.

Sources said that because of the legitimacy given to smuggling here operations were often supported by banking consortiums "if a consignment is intercepted by the Customs, it is considered a normal business risk and another despatch is sent immediately to keep the commitment with the Indian counterpart".

About the modus operandi, sources said that the hideouts along the vast Indian west coast were known well to the smugglers. Care is taken to ensure that the crew of the dhows can mix with the local population in India and accordingly, most of the smuggling boats are now manned by Pakistanis, who not only speak Indian languages well but also have relatives in the coastal and other towns.

After lifting the consignment from Dubai or a neighbouring point, a dhow first goes to Pakistani points and then to international waters near the Indian coast. On a predetermined date and time, the dhow touches the rendezvous point on the Indian coast and makes the "switch" — gold for silver and currency.

In case the Indian contacts do not show up, the dhow retreats to international waters after a couple of hours and tries to make the switch again, normally, at another predetermined place. The process continues till the operation is complete.

Modern dhows have speeds up to 40 knots and are equipped with enough fuel and refrigerated food to stay at sea for several days. The speedboats with the Indian Customs, obtained from Norway in 1974, are slower than the dhows.

Asked how it could be said that Pakistanis were manning the dhows, the sources replied that by and large the Arabs did not like to take risks themselves also, now that the West Asian countries had become highly affluent, there was little need for an Arab to involve himself directly.

CANADIANS, SOVIET TO REPAIR GUJARAT OIL WELLS

New Delhi PATRIOT in English 8 Jul 81 p 5

[Text]

Oil and Natural Gas Commission has reached an agreement with a Canadian firm — Nowsco for stimulation of sick wells in Gujarat, according to ONGC sources, reports UNI.

The agreement is for a period of two years and Nowsco will start work very soon.

Nowsco will supply stimulation equipment and after the expiry of the agreement, the Canadian firm will leave back the equipment.

The import cost of equipment and the consultancy fees together are worked out at seven million dollars.

The Canadian International Development Agency (CIDA) has offered 15 million dollars of credit to India. Fifty per cent of this will be made available to the ONGC for revival of sick oil wells in Gujarat, the sources told UNI.

The ONGC has over 250 sick wells in the Gujarat region. Of the 200 sick wells in Gujarat, some would be entrusted to the Canadian firm for stimulation work and increasing the oil production.

The remaining sick wells would be taken up for repair by the Soviet experts. The ONGC sources said the Soviet Union would soon be sending two teams for the purpose.

The reactivisation programme is part of a four-year-plan — drawn up by the ONGC to increase oil production.

The ONGC, however, could not exactly specify the additional quantity of oil which would be made available after the stimulation and repair works.

However, the additional availability of oil from these wells would help make good the depletion of oil in the Ankleshwar fields.

The sources denied reports appearing in a section of the press that it had drawn up a programme in collaboration with a Mexican oil exploration company PEMEX — for conducting seismic surveys in Saurashtra off-shore areas.

BRIEFS

SIKKIM PARISHAD MERGER--The ruling Sikkim Parishad led by Chief Minister Nar Bahadur Bhandari on Tuesday merged in the Congress-I at a simple function held at the Prime Minister's residence. The Parishad has 22 members of the 32-member Sikkim Assembly. Welcoming the 47-member delegation of the Parishad, including its president Loden Tsering, Congress-I president Indira Gandhi hoped that the new unit would work for the betterment of the people of the State. Mr Bhandari later told newsmen that the Parishad was virtually functioning as a unit of the Congress-I right from February, 1980. [Text] [New Delhi PATRIOT in English 8 Jul 81 p 1]

BENGAL HILLS MINISTER--Calcutta, July 7--Mr Tamang Dawa Lama was today sworn in as Minister of State for Hill Affairs of the Planning and Development Department. Governor T N Singh administered the oath of office in Nepali. Chief Minister Jyoti Basu along with other Ministers and dignitaries were present at the ceremony. Mr Lama will function under the Chief Minister. He will function mainly from Darjeeling, according to a Government pressnote, for ensuring better monitoring and quicker implementation of the development programmes for the hill sub-divisions of Darjeeling district. The Government has also decided to nominate Mr Lama as one of the vice-chairmen of the Darjeeling Hill Areas Development Council of which the Chief Minister is chairman. FINANCE MINISTER IN MEETING WITH PARLIAMENT'S COMMITTEE

Fuel Oil Subsidy Up

Jakarta KOMPAS in Indonesian 3 Jun 81 pp 1, 9

[Excerpts] The fuel oil subsidy for 1981/82, which was planned at Rp 1.5 trillion, will be more than that, it is believed. This means that the actual subsidy is expected to be larger.

Concern regarding the size of the fuel oil subsidy during this fiscal year was expressed by Minister of Finance Ali Wardhana during a working meeting with the Parliamentary Budget Committee on Tuesday [2 June]. The meeting, which was presided over by Committee Chairman Sugandi, was reviewing actual budgetary expenditures have tended to increase also."

In fiscal year 1980/81 the fuel oil subsidy was planned to amount to Rp 828.5 billion, but actual expenditure was Rp 1,021.7 billion, with a volume of 22 million kiloliters covered by the subsidy. According to the minister of finance, of the eight types of fuels, four of them bring in a profit to the government, while the other four types must be subsidized.

The four types of fuels which bring in a profit are aviation gasoline which, in fiscal year 1980/81, brought in a profit of Rp 679 million for 20,938 kiloliters sold; jet fuel brought in a profit of Rp 17.155 billion for 515,900 kiloliters sold; high octane gasoline brought a profit of Rp 6.369 billion for 77,700 kiloliters sold; and regular gasoline brought in a profit of Rp 101.1 billion for 3.7 million kiloliters sold.

The oil products which had to be subsided were kerosine, whose subsidy was Rp 551 billion for 7.8 million kiloliters sold; automotive diesel fuel, whose subsidy was Rp 366.8 billion for 6.3 million kiloliters sold; industrial diesel fuel, whose subsidy was Rp 76.5 billion for 1.2 million kiloliters sold; and fuel oil, whose subsidy was Rp 152.5 billion for 2.4 million kiloliters sold.

On this occasion the minister of finance also stated that during the first 5 months of 1981 (January-May) the inflation rate was only 3.79 percent. In the same period last year the rate was still from 7 to 8 percent. From month to month in 1981 the inflation rate has always been under 1 percent, except for January, when it was

1.3 percent. In February it was 0.7 percent; in March, 0.7 percent; in April 0.9 percent; while in May it was very low at 0.15 percent.

Answering questions about the sale of government obligations abroad, Minister Ali Wardhana said that the Indonesian government on six occasions has carried out the sale of obligations abroad. The first occasion was in Japan on 6 July 1978, when the total sold was 10 billion yen, at an interest rate of 7.5 percent and 10 years for redemption. The second occasion was in the Federal Republic of Germany on 29 September 1978, when the total was 100 [amount not fully given, but must have been 100 million] West German marks, at an interest rate of 7 percent per year and a period of maturity of 6 years. The third occasion was in the Netherlands on 17 March 1979, when the total was 75 million guilders at an interest rate of 9.25 percent and a maturity period of 10 years. The fourth occasion was in Kuwait on 11 July 1979, when the total was 7 million Kuwaiti dinars, at an interest rate of 8.75 percent and a period of maturity of 12 years. The fifth occasion was in Switzerland on 26 September 1980, when the total was 75 million Swiss francs, at an interest rate of 6.5 percent and a period of maturity of 5 years. The sixth occasion was again in Japan, for a total of 10 billion yen, at an interest rate of 8.6 percent and a maturity period of 10 years.

Revenue from Oil Taxes

Jakarta KOMPAS in Indonesian 6 Jun 81 pp 1, 9

[Excerpts] With the establishment of an OPEC consensus state receipts from the oil sector apparently will decline but will still be within the limits of financial security. This was stated by Minister of Finance Dr Ali Wardhana in his working meeting on Friday [5 June] with the Budget Committee, presided over by Soedandi, the chairman.

The OPEC conference held in Geneva on 28 May resulted in a consensus which will be applied by all members, except for Saudi Arabia. The OPEC consensus provided for a decrease in production of 10 percent until the next OPEC meeting in December,11981.

The statement by Minister of Finance Ali Wardhana was in answer to questions from committee member Soesanto regarding the influence of the OPEC consensus on state receipts. The minister stated that the figures on Indonesian oil production, according to the Ministry of Mining and Energy, show production at 1.64 million barrels per day. Of this total not everything is exported, as domestic consumption accounts for 500,000 barrels per day.

In the minister's reply to Siregar, a member of the committee, some details were provided on the company tax and on the tax on oil dividends. He said that the company tax and the tax on oil dividends included in the budget are a part of the profits from contracts of work (KK), production sharing contracts (KBH), and others. The increase in tax receipts from the oil sector resulted not only from increased production but also from the higher oil prices on the world market.

During the period from January to 19 May 1980 receipts from contracts of work were $29.50 per barrel and from production sharing contracts were $31.19 per barrel.

Later, during the period from 20 May up to and including 31 December 1980 receipts from contracts of work were $31.50 per barrel from contracts of work and $32.52 per barrel from production sharing contracts. During the period from January to 31 March 1981 there was a further increase: receipts from contracts of work rose to $35 per barrel and from production sharing contracts rose to $36.50 per barrel.

Later, Minister of Finance Ali Wardhana referred to the 7 percent growth per year in our economy. He provided details, sector by sector. He said that in the agricultural sector alone the increase was 5 percent. In the sub-sector of food plantings the increase was 6.9 percent, while in other agricultural sub-sectors the increase was 2.3 percent. This was followed by mining, with an increase of 1.5 percent; industry, with 11.5 percent; electricity, gas, and aluminum, 7.8 percent; transportation and communications, 9.9 percent; and trade and services, 9.1 percent.

Answering a question from Mustofa Hafas, the minister said that small investment credits (KIK) and permanent working capital credits (KMKP) increased by leaps and bounds. Later, he gave comparative figures which were astonishing. In 1978 total KIK/KMKP credits extended were Rp 80 billion. However, now they total Rp 1.6 billion per day.

The rate of development of our economy continues to increase. Apart from the results in the oil sector, the results from the non-oil sector show a sharp increase. On this basis the provision of credit to the economically weak sector can also be expanded on a large scale.

In the sector of non-oil commodities over the next 3 years which are expected to show explosive growth are the estate-produced commodities. According to Minister of Finance Ali Wardhana, the handling of this sector should be on a wider and more serious basis. He later gave an example regarding the activity of the PRPTEI program [Program for the Rejuvenation, Rehabilitation, and Expansion of Indonesian Agricultural Exports], as a result of providing funds totaling Rp 165 billion. Later, he referred to the PIR program (People's Estate Nucleus). The PIR local program was provided with Rp 13.7 billion; the PIR special program was provided with Rp 31.2 billion; and the PIR assistance program was provided with Rp 37.9 billion. All of these funds total Rp 248 billion. This does not include foreign assistance in the same sector, which totals Rp 39.4 billion. If all of this is added up, it will amount to something approaching one-third of a trillion rupiahs. This is a very large figure, and it is expected that its impact will result in an explosion in estate production.

SHARP INCREASE IN TRANSPORTATION FACILITIES PLANNED

Purchase of Trucks, Ships

Jakarta PLEITA in Indonesian 3 Jun 81 pp 1, 7

[Excerpts] In the next 2 to 3 years the government will buy a large number of trucks and ships in order to ensure the transportation of domestic production goods which, it is believed, will rise sharply.

Without stating a definite figure Minister of State and State Secretary Sudharmono said that the land and sea transport units that will be purchased include railroad cars, ships, and trucks in a large number. "Because our production will be large later on, the transportation facilities required will also be large," Sudharmono said, answering a question on how many ships, railroad cars, and other items will be pruchased.

Minister of State and State Secretary Sudharmono discussed this matter with reporters on Tuesday [2 June] outside the Bina Graha offices, after President Soeharto had received the cabinet ministers from the economic and financial sectors. He said that the funds provided for the purchase of the equipment would be more than Rp 85 billion. Regarding the acquisition of the equipment, Sudharmono said that invitations to bid were now being prepared.

Restructuring of Transport System

Jakarta KOMPAS in Indonesian 8 Jun 81 pp 1, 12

[Excerpts] The coordination of production activity with the distribution system will become a major problem which will be faced in carrying out development activity over the next 2 to 5 years. The two forms of activity must be coordinated and synchronized, because if not, there will be undesirable confusion. Industry will produce goods, but the production will not be transported or sold.

Minister of Industry Abdoel Raoef Soehoed made the foregoing statement to KOMPAS as a further explanation of the policy of the government which was made public by Minister of State and State Secretary Sudharmono after a meeting between the president and a number of ministers from the economic and financial sectors last Tuesday [2 June].

The coordination effort, according to Soehoed, will begin with large-scale industry or basic industry. Ideally, the coordination of production and distribution activity should be for all categories of industry, including large-scale, medium-sized, and small industry. However, in accordance with the principle of developing industrial growth centers, this effort always begins with large-scale industry, everywhere in the world. One or two large-scale industrial plants in a growth center will encourage the growth of several medium-sized and small industries. For that reason the principle of managing distribution also follows that concept.

Minister Soehoed said that the provision of adequate transportation and the construction of highways, ports, terminals, and freight depots, all of which constitutes physical infrastructure, constitutes the beginning phase of this effort. This must be followed by the creation of administrative infrastructure or trade patterns, including the development of "trading houses" assisted by banking infrastructure and several other forms of support facilities.

In his speech at Surakarta City Hall before the Central Java branch of the Association of Indonesian Engineers on Friday [5 June] the minister of industry gave a picture of the extent of the problem of distribution as a consequence of the increase in production which will take place in the next 2 to 5 years. He said, "If the basic industrial sector only produced 2 to 5 million tons of goods per year, perhaps there would be no problem."

He estimates that, in the next 2 to 5 years, from Lhokseumawe in Aceh, it will be necessary to transport 6 to 8 million tons of freight (fertilizer, paper, plastic materials, etc); from Padang, 4 to 5 million tons (cement); from Cilegon and other areas of South Sumatra, 4 to 5 million tons (steel, fertilizer, and cement); from Cilacap in Central Java, 2 to 3 million tons (cement); from Gresik, East Java, 4 to 5 million tons (cement, fertilizer); and from Cibinong, West Java, 7 million tons (cement). "For the raw materials required by these industries a transportation capacity of 30 to 40 million tons will be needed," Soehoed said. [Sic; not stated whether these tonnages must be transported in one month or one year, but probably it is the latter]. These figures do not include transportation of fuel for these industries and the production of agricultural commodities like rice, palm oil, and other items. "For that reason, in the future we need a large-scale logistics system with the backbone in transportation," he added.

However, to resolve this problem it is not enough simply to provide any number of trucks and ships, Soehoed said. He pictured the consequences if only this were done, taking as an example the transportation of cement from Cibinong in West Java. The cement can no longer be placed in sacks at the factory and then transported away by truck. "Why the Jagorawi highway would be filled with trucks. Just imagine, 3 million tons of cement! Put it all in sacks, each truck carries 10 tons. How many truckloads would be needed to move this tonnage? About 30,000 truckloads," Soehoed said.

Because of that the cement is not transported in sacks to the consumer but in the form of slurry to the terminal or storage depots built from 50 to 100 km around the factory. It is only at the terminals that the cement is put into sacks and transported to the consumer. "This is why in the developed countries there are

depots for important products. If the commodity is in the form of slurry, storage can be handled in siloes and not in an ordinary warehouse, he said.

The minister of industry used the terms "trunk lines," "feeder lines," terminals, and depots to make his meaning clear. "Trunk lines" are transportation lines from the factory to the terminals or depots. "Feeder lines: are transportation lines from the terminals to the consumer.

In increasing production, Soehoed said, the whole transportation system in Indonesia must be reorganized with networks of "trunk lines" and "feeder lines."

In handling transportation by ship, arrangements must be made so that the ship sails with a load of cargo and returns also loaded with cargo. "We don't tell Minister of Communications Roesmin, 'Here is my product, please move it,'" Soehoed said. "We must try to locate our factories so that Roesmin's ships can get there with a full load and leave from here with a full load also."

The ministry of industry gave the example of what will be done in this direction by pointing out that the plastic materials factory in Lhokseumawe needs chlorine, while the aluminum factory at Kuala Tanjung in Asahan needs caustic soda. The two products are made from salt. For that reason it is planned that salt produced in Madura, East Nusa Tenggara, or West Nusa Tenggara will be transported to Lhokseumawe by ship. From Lhokseumawe the ships will carry plastic materials or aluminum from Kuala Tanjung, or possibly also carry rubber or palm oil.

TRADE COOPERATION WITH SOVIET UNION TO IMPROVE RELATIONS

Jakarta HARIAN UMUM AB in Indonesian 6 Jun 81 p 3

[Excerpts] Trade cooperation has been arranged between the Indonesian Chamber of Commerce and Industry [KADIN] and the Soviet Union Chamber of Commerce and Industry. The cooperation will be important for the later improvement of relations. The Soviet foreign trade organization and Indonesian business circles have tried to raise the volume of trade in both directions in general.

The beginning of trade transactions between Indonesia and the USSR goes back to the early years of the 1950's. In August, 1956, the USSR and Indonesia signed their first trade agreement. The signature of a new trade agreement by the two countries in March, 1974, provided encouragement to continue the development of trade on the principle of mutual benefit. According to the 1974 trade agreement, the two countries promised to accord each other the same treatment and to pursue mutual benefit in the fields of trade and navigation.

According to statistical data the volume of trade between the USSR and Indonesia in 1974 amounted to 27.9 million rubles, or about $37 million. This means that trade had increased by four times, compared with 1973. In the following years the volume of trade between the two countries continued to increase. In 1975 it amounted to 28.6 million rubles or more than $38 million. In 1976 and 1977 trade was about 32 million rubles (more than $45 million) per year. In 1979 the level reached 49.3 million rubles, or more than $70 million. In 1980 it amounted to 59.9 million rubles or about $86 million.

The volume of trade in the last 2 years is the maximum of trade between the two countries during the past 15 years. This proves that after the signature of the 1974 trade agreement trade relatinns between the two countries have become firmer.

The level of Soviet imports from Indonesia in the last few years far exceeded the level of its exports to Indonesia. In 1974 the trade surplus for Indonesia in its trade with the Soviet Union amounted to about $16 million. In 1975 the surplus for Indonesia was $18 million. In 1976 the surplus amounted to $33 million. In 1977 the surplus for Indonesia was $41 million. In 1980 Soviet exports to Indonesia were valued at more than $21 million, while Soviet imports from Indonesia totaled $64 million. This means there was a surplus for Indonesia of $43 million.

The principal item imported by the USSR from Indonesia is natural rubber. Apart from that the Soviet Union also has imported black pepper, coffee, semi-processed hides, essential oils, latex, and several other kinds of goods from Indonesia.

WORKERS' WAGES IN INDONESIA REMAIN MATTER OF CONCERN

Jakarta HARIAN UMUM AB in Indonesian 2 Jun 81 pp 1, 2

[Excerpts] Medan--The All-Indonesian Labor Federation (FBSI) considers that the average worker's income in Indonesia is a matter of concern because it is not enough for the workers' daily needs.

The deputy general chairman of the Executive Council of FBSI, Dr Sukarno, said, "We call on employers to raise the workers' wages or salaries from 20 to 40 percent." He was speaking at a ceremony commemorating the eighth anniversary of the foundation of the federation, in Medan on Sunday [31 May]. Such an increase, he said, was proper and just when it is recalled that workers' purchasing power declined by up to 60 percent in 1980.

Violations of Law Stimulate Inflation

Sukarno refuted the view that raising workers' wages amounted to increasing the inflation rate. He declared that it is violations of the law, leaks in the system, and hidden costs which really promote inflation in this country. His opinion was based on an analysis which showed that labor costs in Indonesia were still very low, amounting from 0.5 to 10 percent of the cost of production. This was far below the corresponding labor costs in other ASEAN countries or in the developed countries, where the labor costs reach 20 to 30 percent.

He said that the concept of labor relations in the Pancasila (HPP) is the way to resolve all aspects of labor questions in Indonesia. Restlessness and strike activity on the part of labor in recent years occurred only because labor's basic needs were not satisfied.

He noted that workers increasingly knew their rights and duties as a consequence of the rapidity of national development in the field of education. The dynamic spirit of 45 percent of the young workers (14 to 20 years old) out of the 59.5 million members of the working force in Indonesia finally will give shape to a variety of labor demands.

Sukarno said that present problems will be quickly resolved if the concept of labor relations in the Pancasila is fully applied, that is, by treating the workers as associates in enterprise, with all of the difficulties and advantages involved, rather than by treating them simply as a factor of production.

LEADING FIGURES CALL FOR MUTUAL TRUST

Jakarta KOMPAS in Indonesian 6 Jun 81 pp 1, 12

[Article: "Reaction to the President's Appeal: Mutual Trust Must Begin With the Government Itself"]

[Excerpts] Several observers feel President Suharto's pronouncement during the celebration of Isra Mi'raj on 31 May at the Istiqlal Mosque, which stressed the need to develop an atmosphere of mutual trust among us as a people, is "precisely what's needed."

Dr Frans Seda, former member of the cabinet, said, "The pronouncement by Pak Harto is precisely what is needed. It points up the present social crisis which has occurred as we are improving economically. If we are not all mistaken, the social crisis could turn into social disintegration," Frans Seda said.

Jusuf Hasjim, member of parliament from the Development Unity faction, felt the president had presented "a clear view." He is of the opinion that the president's challenge must be received favorably to "continue to develop an atmosphere of mutual trust and openness as well as mutual riddance of suspicion."

Dr Sarlito Wirawan Sarwono, a psychologist from the University of Indonesia, confirmed President Suharto's statement that there is mutual distrust and suspicion in our society.

Dr Frans Seda pointed out that historically mutual suspicion is a new phenomenon. In the history of the republic, from the Proclamation to Bung Karno's regime, little distrust developed. This is now a general phenomenon as politics have developed. "Politics are the source of the mistrust," Seda said.

Recently a student came to Seda and told him, "Pak, I am afraid of the government." Seda then replied, "Not only are you afraid of the government but the government is also afraid of you."

Even though the interviews were held separately, Dr Sarlito, Dr Alfian, and Jusuf Hasjim held the same opinions in regard to the relationship between the government and the people, to the effect that the disparity between what the government says and what it does creates mutual distrust.

"Actions which are not consistent with what is being said will only aggravate mutual distrust," said Dr Alfian, director of the National Cultural Research Institute of the Indonesian Science Institute.

"This means that what the leadership tells the public as well as what the government says must be followed with measures which parallel their statements so they reflect the desires behind those statements," repeated Jusuf Hasjim. Dr. Salito said trust in an individual increases if he takes consistent steps. Consistency between what is said and what is done is right and this holds no less for promises. "The more an individual is inconsistent, the more he is distrusted," Sarlito said.

Dr Frans Seda felt public participation in all political fields must be expanded to erase distrust. "And the government must begin by trusting the people. Our trouble now," Seda said, "is that although we support the government, we are considered 'opponents' or 'anti-government' if we criticize it."

Meanwhile Dr Sarlito felt the government could take two steps as a way out of this distrustful state. First, the government should not be embroiled in considering that anything contesting it is done in "opposition" but it would be desirable if the government considered this as a suitable alternative which should be taken into consideration. Second, the government should not be embroiled in taking police measures to settle all sorts of public matters. "Believe in the people and don't start distrusting them. This is the beginning of the growth of mutual trust for allying us as a people," said Dr Sarlito.

Sarlito used the example of a well-known group in the past whose opinions should have been viewed as an alternative but apparently the group was considered to be opponents.

Mutual trust, Frans Seda said, can grow, among other ways, by expanding the avenues for public participation, that is, by creating five political parties: GOLKAR, two Islamic parties, and two national parties. At present these have been narrowed down to only three political forces: GOLKAR, PPP [Development Unity Party], and PDI [Indonesian Democracy Party].

Further, there must be a "LUBER" (direct, public, free, secret) guarantee for the general election. ABRI [Indonesian Armed Forces] must actually be above all groups. It must not be a "cover" for any group. "If ABRI wants to be one with the people, then ABRI also must be one with the /rights/[emphasized] of the people in the general election is a reflection of the people's right to elect, /not/ the right of the official to be elected," said Frans Seda.

Jusuf Hasjim also said the rules of the game, which are strict and clear, must be adhered to in politics.

Concerning the rules of the game mentioned above, Jusuf approached the problem from the aspect that there are two systems in society: the "formal authority" system and the "informal authority" system. The first is formed by the state political body with its bureaucracy, with a monopoly on despotism as well as a "top to bottom" heirarchical order. The second consists of the various social organizations and forces that exist in a nation.

The second system, according to Jusuf Hasjim, has its own protocol. "Therefore, if an element of the formal authority system operates in the informal authority system, that element must act as a 'visitor,'" Jusuf said.

This principle is often violated so what happens is that one system "intervenes" in the other. "This must be mended," Jusuf Hasjim remarked. "The impression gained now is that the formal system is the dominant one and dominates the informal system. Conversely, the informal system tries to prevent this domination. So, there is a continuous 'display of muscles,'" Jusuf remarked.

The government, Sarlito said, has opened up and knows the conditions in society, but often this openness doesn't go as far as strategic matters.

For instance, many state institutions such as LEMHANAS [National Defense Institute] and others invite public figures to speak in their institutions. It appears that frequently decisions are taken subsequently which differ from the opinions that were delivered in those speeches. So, the government has its own opinions. Strategic points are not presented openly to the public, he said.

PROFESSOR CALLS ENERGY CONSERVATION ESSENTIAL

Jakarta KOMPAS in Indonesian 1 Jun 81 pp 1, 9

[Article: "Prof Johannes Warns: Several Years Hence Indonesia May Be Expelled From OPEC"]

[Excerpts] Without serious efforts to conserve oil in the coming years, Indonesia may lose its membership in OPEC, Dr Herman Johannes warned. The Gadjah Mada University professor presented graphs showing the annual increase in Indonesian energy consumption, which averaged 12 to 14 percent.

With only a 12 percent annual increase, energy consumption will be doubled in the next five and one-half years. This means that daily energy consumption is estimated to be the equivalent of 900,000 barrels of oil before the 1990s.

Using a stern voice, Prof Johannes said that if we are unable to export oil, we will definitely be expelled from OPEC because OPEC is a grouping of oil exporting nations while we, in these later years, may no longer be an oil exporting but rather an oil importing nation in order to meet our domestic energy requirements.

Addressing this problem on Friday evening [29 May] in a lecture on the "Use of Non-conventional Energy to Conserve Oil" in Yogyakarta, Prof Johannes presented a gloomy picture of what may be in store for us in the coming years. He said that we in Indonesia actually are in an alarming and serious situation.

To clarify the picture Johannes noted that although the graphs show that our energy consumption could increase at an annual average rate of 12 to 14 percent, our rate of oil production as yet does not register a comparable increase. In 1977 Indonesian oil production totaled 1.7 million barrels a day. In the next 2 years it dropped to 1.6 and 1.5 million barrels a day. It amounted to about 1.5 million barrels a day in 1980 and is estimated to rise again this year only to 1.6 million barrels a day.

Touching on the statement of Eng Wahjoedi Wisaksono, chairman of the Oil and Natural Gas Technological Research Center (PPTMGB) of the Oil and Natural Gas Institute, during an opinion sharing session with Commission X which covers the research and technology sector in parliament, to the effect that Indonesia had oil reserves of more than 50 billion barrels scattered throughout 40 inland and offshore reservoirs, Prof Johannes said all of us hope that these reservoirs have a potential for producing oil.

Then he added that we all, nevertheless, must be aware of the potential danger if no serious efforts are made to economize on the use of energy. Our requirements continue to increase but are not balanced by a similar increase in oil production. We now import diesel fuel and sell it in the market place at a price far lower than the actual cost of production. "What will happen when the subsidies are withdrawn and we must face the truth?" Johannes asked.

The professor, former rector of Gadjah Mada University and member of the DPA [ASEAN Oil Council], reminded his audience that oil and natural gas are far more valuable as a raw material for the petrochemical industry than as a fuel. Obviously oil should not be used as a source of energy but for the sake of economy should be replaced with some sort of nonconventional energy. Economic use of oil is an absolute necessity because oil and natural gas are nonrenewable fossil fuels which can only be extracted once from the earth.

Referring to this year's RAPBN [draft budget], Dr Johannes noted that about 200 million cubic feet of natural gas are unused (978.5 million cubic feet are produced and 771 million cubic feet are used). Prof Johannes said at present associated natural gas is being burned off uselessly by the oil companies at a cost of more than $1 billion a year!

In regard to ethanol production, Dr Herman Johannes remarked that the government plans to build thousands of ethanol factories using sweet potatoes (Impomoe batata) and cassava (Mahinot utilissima) as raw materials. "Actually I don't quite agree with Pak Habibie's plan," Johannes said frankly. Preparations must be made to plant hundreds of hectares on tuber estates and to provide fertilizer and water. "Why don't we use the hundreds of thousands of hectares of existing nipah [thatch palm] forests which can produce ethanol without irrigation, fertilizers, or special care?" he said. Producing ethanol from nipah palm is easier than producing it from tuber powder. Moreover nipah can produce 24,800 liters per hectare of ethanol while cassava can only produce 4,300 liters per hectare.

Waving his notes in the air, Dr Johannes concluded by saying local governments report 350,000 hectares of nipah forests are already available in the East Kalimantan region alone. "Why don't we use these forests first rather than setting up cassava and sweet potato estates to produce ethanol?"

In a calmer voice and raising both hands, the high spirited old professor continued, "I don't know why not."

PEKANBARU AIR FORCE BASE TO HAVE SKYHAWK SQUADRON

Jakarta HARIAN UMUM AB in Indonesian 2 Jun 81 p 1, 3

[Article: "Pekanbaru Air Force Base to Be on Same Level As Halim Perdanakusuma"]

[Excerpts] Pekanbaru (AB)--The commander of Air Region I, Air Commodore Ibnu Subroto, stated that in the near future a squadron of Skyhawk aircraft will be stationed at Pekanbaru Air Force Base. With the stationing of these U.S. made aircraft there the Indonesian Air Force unit in this region will have awesome striking power.

According to the Air Commodore, on 19 May the aircraft arrived in Medan, North Sumatra. Their stationing at Pekanbaru Air Force Base can only take place after the construction of the required facilities is completed over the next 2 years, at a cost of Rp 2 billion from the 1981/82 budget. This statement was made by Air Commodore Ibnu Subroto last week in Pekanbaru when he was making a one day working visit to Pekanbaru Air Force Base. According to Ibnu Subroto, when he was appointed commander of Air Region I at the time only involved 11 work unit projects, with a value of Rp 149 million.

However, after the Air Region I defense concept was revised, it turned out that there were many air bases which were very much needed, in the Natuna, South China Sea, Riau Archipelago area. With this defense concept the Headquarters of the Indonesian Air Force and the Ministry of Defense and Security developed it further. As a result the budget which only amounted to Rp 149 million in fiscal year 1978/79 was raised to Rp 279 million in fiscal year 1979/80 and to Rp 2.7 billion in 1980/81, including funds for construction at Natuna Air Force Base.

In fiscal year 1981/82 Air Force facilities amounting to Rp 2 billion will be built at Pekanbaru, with Rp 5 billion already allocated for construction at Natuna.

With the future stationing of a squadron of Skyhawk aircraft at Pekanbaru, this means that Pekanbaru will be at the same level as Halim Perdanakusuma and Abdurachman Saleh Air Force Bases.

PRAMOEDYA ANANTA TOER BOOKS BANNED

Jakarta KOMPAS in Indonesian 1 Jun 81 pp 1, 12

[Article: "Bumi Manusia' and 'Anak Semua Bangsa' Written by Pramoedya Are Banned From Circulation"]

[Text] Two books written by Pramoedya Ananta Toer, "Bumi Manusia" and "Anak Semua Bangsa," were banned from circulation by the Republic of Indonesia attorney general as of 29 May 1981.

His decision No Kep-052/JA/5/1981 states the books, published by PT "Hasta Mitra" on PLN 36 Pancoran Street, South Jakarta, are prohibited from being stored, owned, or sold in Indonesia. Anyone storing, owning, or selling these books is obligated to turn them over to the chief of the public prosecutor's office or the chief of the district attorney's office for forwarding to the attorney general.

This decision was issued after the decision of the commander of the Security and Order Command No K-22/kopkam/V/1981 was read. It concerns the banning of any circulation of "Bumi Manusai" and "Anak Semua Bangsa."

In the opinion of the decision makers, the books written by Pramoedya Ananta Toer and printed by "Ampat Lima" in Jakarta had "created certain reactions in various circles of the public and had promoted and influenced a public security and order (KAMTIB) situation."

The decision said that "subtly and insidiously, through skillful and flowing use of his pen, and in the guise of presenting historic data, the author inserted Marxist-Leninist teachings."

According to the decision, the books' contents definitely contravened MPRS Regulation No. XXV/MPRS/1966, dated 5 July 1966, on the Abolition of the Indonesian Communist Party juncto article 3 of MPR Act No. V/MPR/1973, dated 22 March 1973.

By Saturday afternoon [30 May] Pramoedya Ananta Toer and the publisher PT "Hasta Mitra" said they had not received the attorney general's decision that banned the books. Yoesoef Iskak, publisher of PT "Hasta Mitra," therefore, intended to call on the attorney general that afternoon.

Anak Agung Gde Ngurah, chief of the Information Service of the Attorney General's Office, said the decision regarding the banning of the two books "is on its way" to the publisher.

Regarding a meeting between the publisher and the attorney general, A. A. G. Ngurah said, "It usually must be done according to protocol!" The chief of the Information Service had not yet heard that any such meeting was planned.

Yoesoef Iskak said he had frequently been requested to stop publication of the two books written by Pramoedya even before he heard of the attorney general's decision.

"Bumi Manusia" was reprinted five times and "Anak Semua Bangsa" twice. Each printing consisted of 5 to 10,000 copies. The two books were part of a series entitled "Tetra Logi" by Pramoedya, which was to consist of four volumes. As planned, books three and four were entitled "Jejak Langkah" and "Rumah Kaca."

The publisher could not say whether the two books still to be published will meet the same fate as the first two volumes.

PLANNED COAL PRODUCTION, PETROCHEMICAL PROJECTS DESCRIBED

Jakarta KOMPAS in Indonesian 5 Jun 81 p 2

[Article: "Minister Subroto Says Coal Will be Used Solely for Domestic Purposes"]

[Excerpt] Mining and Energy Minister Subroto pointed out that in the coming period coal will be used solely for domestic purposes, replacing oil, so that oil can be used for more important purposes such as export and as a basic material for the petrochemical industry.

In making this clarification during a working meeting with parliamentary Commission VI, chaired by Rahmat Witular, on Thursday [4 June], Minister Subroto said coal will be used mainly in cement projects. Only if it cannot be used there, will natural gas be used, or if necessary [another type of] coal will be imported.

The role of coal is becoming increasingly important for the coming period as attempts are made to diversify energy resources to reduce the use of oil as the primary energy source.

Increased domestic coal production is linked to these efforts, Minister Subroto said. Indonesia now has three main sources of coal. The largest fields are located in Ombilin, Bukit Asam, and in the East and South Kalimantan regions.

Bukit Asam production is handled by PT Bukit Asam. The [illegible]ction of some 225,000 tons of coal will be doubled to 500,000 tons by 1984 [illegible] about 3.3 million tons by 1990.

Ombilin coal mines, which produced about 205,000 tons in 1981 [as published] will be producing about 435,000 tons by 1981 and about 1,352,000 tons by 1990.

Meanwhile coal mines are being developed in East and South Kalimantan jointly with foreign contractors under production sharing agreements. Cooperative projects are being pioneered with Utah and Arco. For this region in particular, bids are awaited from other contractors who might be interested in production sharing contracts with Indonesia such as Agip, Riotinto, Sumitomo, and other companies. It is planned that 4.5 million tons will be mined by 1990 from fields which are believed to have good potential reserves. It is anticipated that 5,000 tons of coal will be produced from various small mines scattered throughout West, Central, and East Java and South Sulawesi by 1982. Production should increase to about 100,000 tons by 1990.

Production of anthracite coal alone, which will be about 47,000 tons in 1981, will increase to about 115,000 tons by 1990. This coal will be used mainly as a basic material for metallurgical processes and for firing in mini-cement plants.

Total coal production in the coming ten years is planned to increase from about 430,000 tons in 1981 to about 10,252,000 tons by 1990. Among efforts at cooperation with foreign companies, the project pioneered with Utah and Arco under a production sharing agreement will be a model project.

In addition to presenting information on major oil and gas projects handled by the Department of Mining and Energy, the minister also said the petrochemical industry uses oil and gas as basic materials.

The Oleifin Center, which is to be built in Lhoksemawe, Aceh, is included among these projects and will use natural gas from Arun. The project will manufacture plastic for domestic requirements. Two companies, from France and the United States, have indicated their interest in a joint venture with Pertamina. The government is still conducting investigations in search of a suitable partner that would hold 70 percent of the company's shares. A 60-month construction period is needed for this enterprise which would begin commercial operations in 1986. About 1,800 workers would be employed per day and about 4,500 per day at peak production.

Another project is the Aromatic Center in Plaju, South Sumatra, to produce primary materials for the domestic textile industry, using naptha as a raw material. Capital investment is about $800 million, and it should be completed in about 1985. This project will employ 1,800 to 4,500 persons per day.

The carbon black project will use residues from the oil refineries. The product of this company will be used in tire and paint manufacture. Planned production is 20,000 tons a year. This material is being imported from overseas at present.

This project will be a joint venture between Indonesia and an overseas company. Costs of construction are about $20 million, and the project will be located in Cilegon. It will employ 500 workers per day. The project is expected to be moving along well by 1983.

The methanol project will use natural gas from Bunyu Island in East Kalimantan and is expected to begin operations in July 1989. Negotiations for this project, which will employ about 900 workers at peak production, are still underway with a foreign contractor.

OMBILIN COAL MINE INVESTMENT SET AT $100 MILLION

Jakarta HARIAN UMUM AB in Indonesian 5 Jul 81 p 5

[Article: "$100 Million for Development of Ombilin Coal"]

[Excerpts] Padang, AB--The secretary general of the Ministry of Mining and Energy, Sutarjo Sigit, has stated that the development of the first phase (1981/82) of the Ombilin coal project will be undertaken at a cost of $100 million (Rp 62.6 billion). Assurances of export credits from the countries belonging to IGGI [Inter-Governmental Group on Indonesia, an aid coordinating body] for the development of the Ombilin coal project have been received from the Nationsl Planning Body [BAPPENAS], he added.

He stated the foregoing to the press on the occasion of the installation in office of Dr Syahrial Husein as chief of the Regional Office for Sumatra, Riau, and Jambi of the Ministry of Mining and Energy, in Padang on Saturday [30 May].

In the development of this first phase the firm PN T B O Sawahlunto must be able to mine 200,000 tons of coal in 1982, which will later rise to 400,000 tons in 1983 and 725,000 tons in 1985. For that purpose studies on the implementation and preparation of operations have been undertaken well in advance, with the cooperation of Canada and by using equipment from the former Polish credit, which was used to increase the capacity for mining and transporting coal.

Mining coal these days is not just carried out in underground mines but also on the surface of the ground, in the form of open pit mining.

With the entry into operation of the 12 megawatt steam electric generator (PLTU) at Solok, Sawahlunto, the firm PN T B O Sawahlunto has enough power for mining, transportation, and exploration for coal. Indeed, there is an excess of about 6 megawatts left over from current operations which, according to present plans, will be transmitted to Padang via a high tension network.

The secretary general of the Ministry of Mining and Energy went on to say that in the second phase of mining operations in the late 1980's T B O Sawahlunto must be able to produce 1.3 million tons of coal per year. For that purpose the government will seek credits both in the form of export credits from IGGI countries as well as from other financial groups such as the World Bank, the Asian Development Bank, or from the national budget itself.

He declared that the coal produced, either from the Ombilin mine or from the Bukit Asam, Mahakam, and other mines will be used for domestic requirements, such as cement factories, electricity generation, and other purposes. He said that we will get more benefit out of exporting oil than exporting coal. For that reason fuel requirements within the country will be met primarily from coal. One ton of coal will produce energy equivalent to 3.5 barrels of oil, and for the Ombilin coal the ratio is 1.4.

In that connection Sutarjo Sigit stated that if oil exploration being carried on by two Caltex contractors in West Sumatra is successful, the area will be the best situated in Indonesia from the point of view of energy. There are four large lakes and dozens of rivers in that area having the energy potential of hundreds of megawatts. The coal deposits at Ombilin, Sinamar, and Lumpa contain hundreds of millions of tons of coal. Geothermal resources have been discovered in Solok, on the south side of Kerinci mountain, near Pasaman, and also around Talang and Merapi which can produce dozens and even hundreds of megawatts of electricity. Beside that, in cooperation with the Federal Republic of Germany, the Batan (Indonesia) Company has undertaken a uranium survey in West Sumatra, especially in the regency of Limapuluh Kota, because it is believed that there are resources of this form of energy.

BIOGRAPHIC INFORMATION ON INDONESIAN PERSONALITIES

[Unless otherwise noted, the following information on Indonesian personalities has been extracted from Indonesian language sources published in Jakarta.]

COMMODORE S REKSODIHARDJO--The post of chief of the Office of Hydrography and Oceanography (KAJANHIDROS) on Friday [29 May] was transferred from the incumbent, Commodore D U Martoyo, to his replacement, Commodore S Reksodihardjo, at a cermony in the Office of Hydrography and Oceanography in Navy Headquarters, Jakarta. Commodore Martoyo has been appointed head of the Survey and Mapping Center (KAPUSSURTA) of the Indonesian Armed Forces in Jakarta. Commodore S Redsodihardjo was previously commander of Navy Region 7 in Ujung Pandang [Sulawesi]. As is known, the Office of Hydrography and Oceanography has performed a variety of functions for the armed forces, the Navy, and the Ministry of Defense and Security, as well as in the general, national interest, carrying out surveys and preparing ocean charts through cooperation with friendly countries like ASEAN, Japan, and the United States. It has prepared books, nautical almanacs, and lists of other books on the sea. [Excerpts] [Jakarta HARIAN UMUM AB in Indonesian 4 Jun 81 p 6] 5170

POEDJI KOENTARSO--The office of chief of the Directorate of Multilateral Economic Cooperation (KSEM) has been transferred from Irawan Darsa, the new Indonesian deputy permanent representative in the UN office in Geneva, to Poedji Koentarso. Poedji Koentarso was born in Barut on 28 April 1932. Before his appointment as chief of the Directorate of Multilateral Economic Cooperation, he was chief of the Economic Section of the Indonesian Embassy in London, with the title of Minister Counselor and then of Minister. The transfer of office ceremony took place in the Ministry of Foreign Affairs in Jakarta on Friday [12 June]. [Excerpts] [Jakarta HARIAN UMUM AB in Indonesian 13 Jun 81 p 2] 5170

KUSUMASMORO--The position of chief of the Directorate of Foreign Social and Cultural Affairs of the Ministry of Foreign Affairs has been transferred from Dr Sukadiah Pringgohardjoso to Kusumasmoro on Friday [12 June] at the Ministry of Foreign Affairs in Jakarta. Dr Sukadiah Pringgohardjoso has been appointed Indonesian ambassador to Denmark, her first ambassadorial assignment. Kusumasmoro was born in Semarang on 14 October 1924. Before his new appointment Kusumasmoro was Indonesian ambassador to Argentina, Chile, and Uruguay. After returning to Jakarta he was appointed director for international organizations in the Directorate General for Political

Affairs, immediately prior to his assignment as chief of the Directorate of Foreign Social and Cultural Affairs. [Excerpts] [Jakarta HARIAN UMUM AB in Indonesian 13 Jun 81 p 2] 5170

COMMODORE BASUKI--The post of chief of staff of the Indonesian Fleet, which until now has been temproarily held by Colonel (Navy) Sriwaskito, on 8 June 1981 was transferred to Commodore Basuki in the Gadjah Mada building at the Indonesian Navy Base in Surabaya. Colonel Sriwaskito, beside acting as chief of staff of the Indonesian Fleet, is assistant for operations to the commander of the fleet, while Commodore Basuki, in addition to his new post as chief of staff of the fleet, continues to be commander of the Nusantara Squadron. Commodore Basuki was born in Banyuwangi, East Java. He is a graduate of the Navy Academy (now the Navy Section of AKABRI) in the class of 1958. He has had considerable experience at sea in several types of submarine and has also served in the higher command offices of the Navy. As commander of the Nusantara Squadron since the beginning of 1980 he was assigned to additional duty as commander of Operation Guruh, a special task force operation in East Indonesian waters, which he carried out with great success. [Excerpts] [Jakarta HARIAN UMUM AB in Indonesian 13 Jun 81 p 6] 5170

MAJ GEN R SUKOTJO--Minister of Trade and Cooperatives Radius Prawiro on Monday [8 June] installed Maj Gen R Sukotjo (Ret) in office as inspector general of the Ministry of Trade and Cooperatives. The former commander of Military Region VII/Diponegoro replaced Brig Gen Anumerta Mokhtar Harahap, who died in the United States on 20 March 1981. Sukotjo retired from military service on 31 December 1980. He was born in Purwokerto on 21 December 1925. During his service in the Army he was commander of Military Region IX/Mulawarman, commander of Military Region II/Bukit Barisan, and was commander of Military Region VII/Diponegoro before retiring. [Excerpts] [Jakarta KOMPAS in Indonesian 9 Jul 81 p 12] 5170

HERO U KUNTJORO-JAKTI--Hero U Kuntjoro-Jakti was born in Serang on 3 July 1946. He is a staff instructor in the Faculty of Social Sciences of the University of Indonesia and is a member of the editorial staff of that faculty's publication, JUENAL PENELITIAN SOSIAL. He graduated with a major in political science from the Faculty of Social Sciences of the University of Indonesia (September, 1973), and graduated from the Department of Diplomatic History, Faculty of Law, University of Hiroshima (master's degree in law), March, 1980. [Text] [Jakarta PRISMA in Indonesian No 3, Mar 81, p 111] 5170

M DAWAM RAHARDJO--M Dawam Rahardjo was born in Surakarta (Central Java) in 1942. He is the director of the Association for Economic and Social Research, Education, and Information (LP3ES) in Jakarta. He graduated in 1969 from the Faculty of Economics, Gadjah Mada University. He is active in conducting survey and research projects, including a survey of the rattan industry in Central and South Kalimantan and a feasibility study on wood industrialization in East Kalimantan. He attends seminars within Indonesia and overseas. He has written several books published by the LP3ES, including: "Hasil Penelitian Kerajinan Rakjat Jawa Timur" (Results of Research on East Java Village Industry), "Unit Perencanaan Daerah" (Regional Planning Unit), "Hasil Penelitian Industrial Craft dan Design" (Results of Research on Industrial Craft and Design), "Pesantren dan Pembaharuan: (editor) (Religious Training Centers and Renewal), and "Profil Pesantren" (Profile of a Religious Training Center). [Text] [Jakarta PRISMA in Indonesian No 3, Mar 81, p 111] 5170

SOEHARSONO SAGIR--Soeharsono Sagir was born on 17 January 1934 in Tegal, Central Java. He graduated from the Faculty of Economics of Padjadjaran University in Bandung in 1960. He obtained an Economic Planning Certificate from the Advanced School of Planning and Statistics, Warsaw University, in 1963. He attended the doctoral program at Padjadjaran University, under Dr Sumitro Djojohadikusumo. He is a teacher in the Indonesian Armed Forces Education Institution and is a permanent teacher in the Faculty of Economics of Padjadjaran University, conducting classes in analysis of Indonesian economic policy and monetary and bank economics. He is an assistant at the Bandung Technological Institute and Parahiyangan University in Bandung. He is an economics columnist in several daily newspapers, including PIKIRAN RAKYAT (regional publication) and KOMPAS and SINAR HARAPAN (Jakarta). On numerous occasions he has attended seminars, both within Indonesia as well as abroad, both attending and presenting working papers. He has served as dean of the Faculty of Economics, Padjadjaran University, between 1968 and 1972. [Text] [Jakarta PRISMA in Indonesian No 3, Mar 81, p 111] 5170

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

GANDHI REMARKS REFLECT FOREIGN POLICY DILEMMA

Bombay THE TIMES OF INDIA in English 11 Jul 81 p 8

[Editorial]

[Text]

Much of what Mrs. Gandhi said at her press conference in New Delih on Friday reflects the excruciating dilemma facing the government and the country. On the one hand, New Delhi must strongly oppose, as indeed it has been doing for some time, the Western, principally American, policies which are pushing the sub-continent into a dangerous — and horrendously expensive — arms race. On the other, it has come to depend more and more on Western, again largely American, funds to help finance its mounting oil import bill and keep up the momentum of growth. With its Mirages, the deep-strike capability of Pakistan's air force, as the Prime Minister was at pains to emphasise, already is, and will continue to remain for some years, "three times that of our own". The induction of American F-16 aircraft into the PAF will tilt the balance of air power even more decisively in favour of Islamabad. With so many key industries — fertiliser plants, petro-chemical complexes, nuclear stations and oil installations — sited at vulnerable locations, no government worth its salt in New Delhi can afford to sit back and do nothing to redress the balance. Mrs. Gandhi has expressed scepticism, justified in the immediate context, about the theory of nuclear deterrence. But this can only further impel the government to step up expenditure on conventional weapons even though it needs to conserve every penny for development. The government has already initiated whatever is needed by way of new programmes, policies or priorities to achieve a faster rate of economic growth and ensure a more equitable distribution of its fruits, and Mrs. Gandhi had nothing more to reveal. The fact remains that all this is not enough to bring the goal of self-reliance, let alone self-sufficiency in energy and key commodities, within sight. On its own showing, the government will import substantial quantities of wheat, edible oils and sugar in this year of bumper harvests as part of its strategy to control inflation. And it has asked for the biggest ever loan of four billion dollars from the IMF — on top of its sizable borrowings from the Eurodollar market, the Aid-India Consortium and the oil-rich states — to get over its balance of payments difficulties.

How long can the country rely on external assistance on such a scale? True, the need to secure massive injections

of foreign "aid" would have been even greater but for the energetic steps taken by Mrs. Gandhi and her cabinet colleagues last year to improve the infrastructure. But the signs are that the impetus imparted to the economy in consequence is beginning to wane. Almost all the economic indicators for the last two or three months are pretty depressing. While the government's policies and programmes are reasonably well-conceived, the administration is simply unable to implement them efficiently and in a sustained manner due to either a lack of firm direction from the top or its own incoherence. Ironically, this is happening when Mrs. Gandhi and her party are politically supreme at the Centre and in most of the states. At her first press conference in New Delhi in October, she had left open the possibility of another cabinet reshuffle to get rid of "dead wood" and induct new talent. Ominously, this time she has ruled it out, possibly because there is none.

REPORT ON GANDHI ANSWERS TO NEWSMEN'S QUESTIONS

New Delhi PATRIOT in English 11 Jul 81 pp 1, 7

[Excerpt] The Prime Minister's press conference which lasted 75 minutes, covered a wide variety of subjects such as India's nuclear option, performance of Congress-I Chief Ministers, the role of the Opposition, Mr Y B Chavan's entry into the Congress-I, conversion of Harijans to Islam the Khalistan movement the postponement of the Garhwal parliamentary election and the Government's attitude towards the judiciary and the election Commission.

No Cabinet Expansion

Mrs Gandhi said there was no proposal at present to expand her Cabinet.

She was asked: What is delaying expansion of your Cabinet? Do you propose to do it before the monsoon session of Parliament beginning next month.

Mrs Gandhi: Since there is no proposal, there is no question of delay.

Mrs Gandhi denied that the Government is planning to amend the Constitution to introduce the presidential system of Government in the country.

She said it was not true that the Government had set up a committee to study the various governmental systems.

Mrs Gandhi did not agree with a questioner that she had gone back on her commitment to maintain the basic features of the Constitution.

She said the basic feature was not changed by the constitutional amendment during her emergency rule making India not only a democratic but a socialist and secular republic.

The Prime Minister said that the Centre was not interested in toppling non-Congress-I State Governments, some of which were nearing the end of the five-year period.

Asked at her press conference about statements of some Union Ministers and whether these had her 'blessings', Mrs Gandhi said, "we were not and we are not interested in toppling any Government".

She said what any Union Minister said was not to 'threaten' any non-Congress-I Government but 'merely echoed' what the people there had said, namely, that the law and order situation was very grim.

The Prime Minister referred to political murders in Kerala which, she said, were 'quite frequent'. She said her party was 'not in that battle'. But a number of people were killed. Basically, it was another grouping. "I am told a lot of Marxists are leaving their party and joining this group. This is what the ordinary people say, not the rich or middle class but the poor people who say these things.

If a (Central) Minister goes to a State, he should draw the attention of that Government to expression of the feelings of the people", Mrs Gandhi added.

Mrs Gandhi said States were welcome to attract petro-dollars for investment in development but they must do so in concurrence with the Centre.

She said "we welcome the State Governments' efforts to get petro-dollars from many countries. But the Finance Minister must look into every deal.

"The States should go through the Centre. They can make efforts through the Centre", she said.

Asked if she proposed to change leadership in some States, she said: when a leader (in the State) is changed you will know about it. I do not think one can keep it a secret.'

The Prime Minister did not make any comment on the question if she was satisfied with the performance of some of her Cabinet colleagues.

Assam Issue

Mrs Gandhi was asked about the present performance of the Railway Ministry, as compared to when it was headed by Mr Kamlapati Tripathi. The Prime Minister replied she had not made any comment on the performance of the Railway Ministry even then when Mr Tripathi was the Minister. What she had said was that the railways were in a bad way. It was not easy to bring them on the level of earlier performance.

"I had also said a lot had been done but much remained to be done. I made similar comments about other Ministries. I did not single out any Ministry", she added.

The Prime Minister denied that the public distribution has collapsed with the exit of Mr V C Shikla from the Union Cabinet.

"It is a gigantic problem and we have to proceed as fast as possible. In some places communications are not there, especially during monsoons" she said while replying to a questioner.

The Prime Minsiter was asked to comment on Karnataka Chief Minister Gundu Rao's interview to a weekly criticising some of the Central Ministers.

Mrs Gandhi replied: I believe he has apologised (to the Ministers).

She said she could not say anything at the moment on "the home coming" of Mr Y. B. Chavan. The party leaders had to meet and take a decision. Most of them were out of the country, she added.

Asked if norms were to be set up for admission of those desirous of joining the Congress-I, Mrs Gandhi replied norms were already there but views of local leaders of the party had to be taken into consideration.

Mrs Gandhi said she was not aware as to how her son, Mr Rajiv Gandhi was shaping in politics.

Replying to a question by a foreign correspondent, Mrs Gandhi said he had just been elected to Parliament. He had not even attended Parliament so far.

She remarked "you will all see for yourself his performance."

The Prime Minister said that the atmosphere for settlement of the foreigners problem in Assam was "very much better now than it was at the previous get together."

She said she was taking personal interest in the continuing talks although she was not physically present.

Mrs Gandhi said the Assamese have "genuine problems and we must try to solve them but we must see that the solution is in accordance with the national policy, international obligations and humanitarian considerations.

She said the All-Assam Students Union and the All-Assam Gana Sangram Parishad mostly agreed with Government "on the basic points."

Mrs Gandhi declined to comment on the reported move of Jammu and Kashmir Chief Minister Sheikh Abdullah to remain in office for six years, making use of the six-year term of the State Assembly.

A newsman asked Mrs Gandhi that now she looked at the reported move of Sheikh Abdullah to make use of the provisions enacted during her previous regime for a six-year term, Mrs Gandhi said 'I have no comments to make.'

In reply to another question why displaced persons from Pakistan in the Jammu area of the State were not allowed to vote in the Assembly elections, Mrs Gandhi said "it was a knotty question. I have really no comment to make. We have gone through this question number of times and I have really no answer for this.'

The Prime Minister stressed the need for remaining 'very vigilant' about the flow of foreign funds into the country.

Asked for her comment on the reported use of foreign money for religious conversion, Mrs Gandhi expressed herself strongly against the exploitation of peoples' poverty and hardships for conversion.

Mrs Gandhi said much of the foreign funds from the Arab world were coming into India for educational purposes, repairing or building of mosques. Some funds

were also coming to India from known or unknown sources and it was necessary to know how these funds were being used.

'Nobody will have any objection if anybody changed his religion voluntarily, but what is objectionable is if people's poverty and hardships are exploited for conversion,' she said.

The Prime Minister said that so far Khalistan existed only in Canada and the United States. But this did not mean 'we should lower our guards and vigilance.

Replying to a question, Mrs Gandhi said such movements had to be carefully watched and she was sure that the Sikh community, which had proved its patriotism, valour and deep involvement with development in India, 'will rebuff it.'

Mrs Gandhi had been asked about a statement of the sponsors of the Khalistan movement that they would make an 'important announcement' about a new state on 15 August.

Mrs Gandhi told a questioner that the 'impression' that the Punjab Government was not cooperating with the CBI investigations into the murder of Nirankara chief Baba Gurbachan Singh was 'unfortunate and incorrect.'

She said six persons had already been arrested in connection with the case and further investigations were on.

Such matters, she added, did take a long time in other countries too.

The Prime Minister said that she was against the use of students and teachers in the universities to serve the political interests of others.

Replying to a question, she said she was not aware of any code of conduct for universities but agreed with the questioner that students and teachers should not be used for political purposes.

She said Aligarh University was facing problems like any other university and "I don't think anything new has happened there.'

Replying to a question, she said 'we must see that such things (communalism) disappear from the country altogether. Our sympathies are with those who suffer.'

Mrs Gandhi said the question of communalism was no longer religious and it was more a political and economic matter.

The questioner had sought Mrs Gandhi's comments on what he described as renewed activities of communal and reactionary elements at Aligarh University.

Mrs Gandhi said that the money being spent on the 1982 ninth Asian Games was an investment for the future.

Replying to a question, she said the games were not a 'lop-sided priority' and though the previous estimates had gone up, it was not to the extent made out in newspaper reports.

She said in the present conditions she might have had second thoughts on holding the games, but initially when the country accepted to host the games the budget was well within its capacity.

An experimental beginning in colour television will be made soon, the Prime Minister told the press conference.

Replying to a question, she said TV transmission in black and white would continue. But 'we will make an experimental beginning in colour TV soon.'

Mrs Gandhi said she was deeply distressed over the liquor tragedy in Bangalore and felt that there should have been stricter control over liquor to prevent adulteration.

'My deep sympathies to the families of those who have died,' she said.

Asked whether in view of such tragedies, there would be any change or liberalisation in the prohibition policy, Mrs Gandhi said that many States had relaxed the prohibition policy and made some provision for drinks with very little alcoholic content.

The Prime Minister said that family planning programme was successful to the extent that it prevented 39 million births.

Expressing her concern at the unabated population growth, Mrs Gandhi said though some success had been achieved in the field, still a lot had to be done to bring the population under manageable level.

If population growth went on at the present rate, it would be difficult to provide clothing, shelter and other basic necessities to the people she warned.

She, however, expressed satisfaction that family planning was one issue on which there was a national consensus. Population control movement required active support of all. It was not for the Government alone to solve this problem.

LEFT FRONTS CLASH WITH MS GHANDI

London 8 DAYS in English 1 Aug 81 pp 24-25

[Article by Sumanta Banerjee]

[Text]

AT A TIME when Indira Gandhi's party, the Congress-I (the 'I' stands for Indira) is sweeping its way through the country, the Indian communists constitute the only major opposition force to hold its ground. In Kerala at the southwestern tip, and West Bengal and Tripura in the northeast of the country, the Communist Party governs under a constitution which allows opposition parties limited power.

When by-elections were held recently in a number of parliamentary and state assembly constituencies in India, the Congress-I candidates (including Mrs Gandhi's son, Rajiv) swept the polls everywhere except West Bengal where they were beaten by candidates sponsored by the ruling Left Front government controlled by the CPI(M) — the Communist Party of India (Marxist). Other partners of the coalition are small leftist groups which also claim to be marxists.

Similar leftwing coalitions dominated by the CPI(M) govern Kerala and Tripura. In West Bengal and Tripura, the Left Front has been in power since 1977 (when general elections for the first time brought to power a coalition of non-Congress parties). In Kerala the left gained office in 1980, when elections to the state assembly there were held simultaneously with the parliamentary elections that brought Mrs Gandhi back to power.

There have not been any revolutionary changes in Kerala, West Bengal and Tripura, a fact acknowledged by the leftist ministers. According to West Bengal's chief minister, Jyoti Basu: 'Our measures have given the weaker sections in villages a sense of confidence that they never enjoyed before.' He hastened to add at the same time that there was no immediate solution to the problems of unemployment and electric power shortage that plague the state's social and economic life.

In all three states, the Left Fronts have concentrated on the rural areas — where some 80 per cent of the population live. In Kerala, a land reform act has enabled nearly half a million agricultural labourers to become owners of small plots of land on which they live. Arable land has been distributed among landless peasants and smallholders.

In West Bengal and Tripura, a major step was the registration of 'bargadars' or share-croppers — a class of poor peasants who work on the land of rich farmers. Until recently they had no security of employment, or any right to a share of the crop. The 900,000 sharecroppers registered so far will be legally entitled to retain their tenancy and keep their portion of the produce.

In a move to decentralise power, the West Bengal and Tripura governments

have introduced village self-government. Known as panchayats, these institutions are elected by the villagers, and decide on the local distribution of financial and food aid among agricultural labourers working on development projects. Critics, however, allege that these resources rarely reach the poor and distressed, but are cornered by CPI(M) leaders and activists.

While allegations of corruption cannot be ruled out completely, industrial strife and communal clashes in Kerala, West Bengal and Tripura are far less frequent than elsewhere in India. Since the left parties have considerable influence in the trade unions, they have been able to avert strikes. The number of working hours lost in West Bengal in 1980 in the last seven years has plummeted, a remarkable achievement in a state hitherto notorious for violent industrial relations.

Except in Tripura, where more than 1,200 people were killed in ugly clashes between tribals and non-tribals last year, the Left Front governments in both Kerala and West Bengal have been able to avoid fighting between Hindus and Muslims, or attacks on 'untouchables' (the lower caste people known as Harijans) and linguistic minorities.

The apparent caution of the Left Front governments may be explained by the ability of the New Delhi cabinet to dismiss any state government. India's first communist state administration — the Kerala government of 1957 — was sacked by Nehru after the communists pressed ahead with land and education reform. Congress-I members in the three communist run states are now pressing Mrs Gandhi to dismiss the Left Front governments.

REPORT ON ALL-INDIA SIKH INTELLIGENTSIA PARLEY

Madras THE HINDU in English 12 Jul 81 p 3

[Text] GIVEN the green signal by the Prime Minister, Mrs. Indira Gandhi, and inaugurated by the Union Home Minister, Mr Zail Singh, the All India Sikh intelligentsia convention held in Delhi last Sunday looked more an affair of the Congress (I) than a Government sponsored show. It was not much different from the earlier "all world" and "all India" meetings of Sikhs in the style of deliberations

The one difference was that it was called at short notice and restricted to the intelligentsia — about 200 to 300 persons.

The invitations were issued by Dr Gopal Singh Dardi, Chairman of the high-power panel for minorities and scheduled castes who also delivered the keynote address. Dr Dardi is a Congress (I) leader

The initiative, however, obviously came from Mr Zail Singh who also presided over the convention, not in his capacity as the Union Home Minister but as a Sikh.

Observers' dismay

Observers wondered what the provocation was for calling the convention at such a short notice without forming a preparatory body

In fact there was no debate on any important controversial issue and the condemnation of the concepts of 'Khalistan' and "Sikhs-are-a-nation" was of a distinctly restricted character Most of the resolutions were not much different in their content and tone from those passed at the 'all-world' or 'all-India' conventions held in recent months.

The convention was originally intended to be a part of a Union Home Ministry scheme to counter the slogan of 'Khalistan' This slogan had been raised by a section of extremists belonging to two organisations "Dal Khalsa" and All-India Sikh Students Federation — neither of which had been able to muster much following

The two organisations, however, made their existence felt lately by launching an agitation for a ban on the sale of tobacco in the city of Amritsar which, they demanded, should be declared a 'holy city' for an effective enforcement of this ban This "tobacco war" evoked the sympathy and interest of a significant proportion of the Sikh population The sponsors of this demand simultaneously displayed the 'Khalistan' banners.

These developments are stated to have stirred the Union Home Ministry into action. Earlier, it was believed, Mr. Zail Singh had turned a Nelson's eye to these agitations in his home State, as part of the game of factional animosity between the Union Home Minister and the State Chief Minister No doubt the 'Khalistan' slogan had been causing headache to Mr Darbara Singh

Watch on extremists

According to press reports the Union Home Ministry is keeping a vigilant eye on the activities of some leading Sikh extremists in Punjab and elsewhere and also on movements of Sikh leaders touring regularly or for short periods in some foreign countries

At the Delhi convention Mr Zail Singh said that "a small non-political committee would soon be set up to watch the secessionist tendencies which are raising their ugly head in the country and that the committee would tour the States with a view to educating public opinion on this vital issue concerning the integrity of the country It was, however, not elaborated as to who will set up this committee and when it will start functioning

The Home Minister strongly criticised the Akali Dal and SGPC which, he said, were supporting the "Khalistan" slogan. This served to reveal the one-party character of the convention However, neither of the two Akali Dals has explicitly said anything so far to signify support to the demand for "Khalistan" though both have acclaimed the "Sikhs-are-a-nation" concept.

In his keynote address Dr Gopal Singh asserted that a separate Sikh State would mean the economic downfall of the community which is now enjoying enviable prosperity as part of the democratic polity of this country. But some of his observations endorsed the complaints that the Sikhs were suffering discrimination in various spheres.

Intriguing

An intriguing aspect is that instead of assuaging the feeling of discrimination most of the resolutions passed at the convention were akin to those adopted at Akali conventions and conferences where some extremist elements used to have an effective say No wonder spokesmen of the two Akali Dals have expressed their satisfaction over some of the resolutions adopted at the convention which only endorsed the notable features of the policy and programme of Akali Dals and supported, what they called, some of the just demands which they have been voicing from time to time

Besides the main resolution declaring the Sikhs an integral and inalienable part of Indian polity the convention passed some other resolutions, including the one demanding expeditious transfer of the city of Chandigarh to Punjab without making it contingent on the transfer of Fazilka and Abohar

to Haryana. Another protested against the displacement of Sikh farmers from the Terai region of Uttar Pradesh, which had been developed by them after prodigious efforts over decades since Independence, and the last one demanded declaration of Punjabi as the second language in Delhi, Haryana and Himachal Pradesh.

Invitations had been issued to a large number of Sikh leaders and intellectuals all over the country, including Sant Harchand Singh Longowal, and Mr. J. S. Talwandi, Presidents of the two Akali Dals, Mr. Prakash Singh Badal, former Chief Minister of Punjab ad Mr. G. S. Tohra, President, SGPC None of whom attended.

Among the messages received a significant one was from Mr. Hukam Singh, former Speaker of the Lok Sabha and one-time President of the Akali Dal, which reads as follows: "I am definitely of the opinion that the slogan of Khalistan is dangerous and suicidal for the Sikhs but it cannot be taken in isolation. There are certain factors that are contributing to this frustration and they must be condemned along with it."

FORMER ARMY COMMANDER VIEWS POLITICAL SITUATION

BK251201 Delhi INDIAN EXPRESS in English 18 Jul 81 p 6

[Letter to the editor by retired General K. M. Cariappa, former commander in chief of the Indian Army 1949-1953]

[Text] Sir: It is most distressing to read daily in our newspapers the sad news of burglaries, thefts, murders, dacoities, students everywhere burning houses, cars, shops and furniture of their own universities and colleges. Raping continues, so does police firing all over the country against unruly masses and murdering of important officials of state and civilians. In my humble memory I have never known earlier such things happening in our beloved India. I am nearing 83 years of age. There seems to be, according to press reports, almost complete mass indiscipline everywhere with little or no respect for law and order.

The unfortunate and underprivileged millions of our country face very distressing economic problems--cost of foodstuffs soaring, no roofs to sleep under, education of the children not being properly provided for by the state, insecurity of all kinds etc.

We have today in our country two sets of people who cause all this unhappiness. They are:

1. Some wrong type of politicians--there are many of them who take large sums of money as bribes from industrialists seeking such favours as contracts, etc. They use such money to cause workers to go on strike--kill, destroy public property and so on. We do have some very great politicians, very able administrators.

2. Those with distressing greed for money. People are not all honest in their business dealings. The main aim of some of them is to amass wealth by foul means.

We do not work enough. One has to work for at least 8 hours a day. People spend most of the time in tea breaks, meal breaks and rest. We have not got enough really able leaders in our country. We have far too many holidays excluding Sundays and Saturdays.

I feel the government of today has a very, very big job to handle with all these happenings in our country. Unfortunately, we have not got enough really able administrators.

The whole picture of the country today is very saddening--language problems, communal problems and the continuing sufferings of the most unfortunate harijans--all need immediate attention.

I am not in politics. I am just a simple retired officer of our army. I have always had and will continue to have my deep interest in the welfare of three people I got "wedded" to just before I retired from the army over 28 years ago and these are: A. ex-servicemen and their dependants of our defence services; B. the youth of our country, and C. the people of our country.

In the present circumstances, I strongly feel that the only way to put things on an even keel is to have president's rule, not national government under the president, for at least 5 years with political parties banned. The country's administration could be carried on as before with the governors and heads of various departments such as food, agricultural, medical, education, police and so on. A team of specially selected persons of known ability, honesty and a team of old retired officers--one general, one air chief and one admiral--all to form an advisory council. All political parties should be banned immediately. One or two states whose people are causing local unrest should be handed over to the defence services under martial law, for a year or two at least, until things return to normal in those states, after which these states will return to the president.

Later when the president finds the situation in the country is normal, people are well disciplined with respect for law and order, people work hard to produce the needs of the country in all respects and the internal and external security of our land is assured, he will announce publicly that there will be only three political parties, equivalent of labour, liberal and conservative. There will be no other political parties at all. When elections are being held, if anyone is caught bribing for votes he should be disqualified. After the elections the party that wins will become the government of the country, the second party will be the "opposition" and the third party will be "neutral." The president will then hand over the country to the newly elected government.

Democracy in our country must prevail forever and the people must continue to have the privilege of choosing their government.

In all that I have said above I assure you I have not the slightest personal interest of any kind except my continuing love for our simple millions who deserve a good democratic government.

[Signed] Gen. K. M. Cariappa (retd.)

KERALA APPOINTMENT BRINGS DELHI-STATE CONFRONTATION

Calcutta THE STATESMAN in English 11 Jul 81 p 9

[Text] Trivandrum, July 10.--The appointment of Mr A. V. Varghese as Vice-Chancellor of Kerala University in succession to Mr V. K. Sukumaran Nair, who lays down office on July 15, by the Governor, Mrs Jyothi Venkatachellum, has led to yet another confrontation between the CPI(M)-led Left Democratic Front Government and the Centre.

Although the Governor, in her capacity as Chancellor of the university, is entirely within her rights to choose a candidate from a panel of names put before her, by convention, the State Government is taken into confidence before the announcement is made. Her alleged departure from this practice has been viewed by the ruling front as interference into the State's affairs by the Centre.

The issue was discussed by the Kerala Cabinet on Wednesday when Marxist members expressed concern over the Governor's alleged failure to consult the State Government on such an important appointment.

Mr S. V. Achutanandan, State secretary of the CPI(M), saw behind Mr Varghese's appointment the Centre's "hidden hand" to bypass the Governments of non-Congress (I) ruled States. The Governor's action was described as "an assault on the rights of the State Government."

Mr Varghese, who is now professor of English at Bentley College, Waltham, Massachusetts, had been associated with the Congress party in Kerala before his departure for the USA. In the Kerala Assembly, a Marxist member, Mr M. V. Raghavan, even questioned the nationality of Mr Varghese who continues to retain Indian citizenship even after two decades of residence in the USA.

Mr Achutanandan said in a statement that when the selection committee submitted a panel of names to the Chancellor, the opinion of the State Government was sought before making the final choice. By hastily appointing one from the panel without consulting the Government, the Governor had violated the precedence she herself had followed so far, he said.

Under the Kerala University Act, the Chancellor should nominate a person to the three-member committee to submit a panel of names for the post of Vice-Chancellor. The panel had recommended besides Mr Varghese, Mr Vasu and Mr Kaleeswaran, an IAS officer who is the Vice-Chancellor of the Kerala Agriculture University.

The CPI(M) wanted Mr Vasu to succeed Mr Sukumaran Nair. There is an accepted convention in Kerala that the post of Vice-Chancellor should go by rotation to the major communities. Mr Sukumaran Nair's predecessor was Mr George Jacob, a Christian, of the same community as Mr Varghese. Mr Vasu belongs to the numerically strong backward community of Ezhavas, from whom the Marxist party draws its strength.

Fifty-one-year-old Mr Varghese, who graduated from Travancore University, took his M.A. degree in English from Madras Christian College, and Ph.D. from Denver University, Colorado. He did post-doctoral research at Harvard University before joining Bentley College. He is due to take over as Vice-Chancellor on July 16.

CPI-M INNER PARTY DEBATE REPORTED AT DEAD END

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 7

[Text] Calcutta, July 11.

The CPMs inner-party debate on an immediate tactical issue seems to have reached a dead-end, without a solution in sight, and this prompted the central committee to postpone it to another occasion in the future, allowing time for cooling off of sentiments as well as refreshing the members' thinking.

Many in the party seem to believe that ultimately the issue will have to be clinched at the next party congress, scheduled for February next year. But there are serious doubts about keeping to this schedule because if the West Bengal unit has to fight the next general elections in June-July or earlier in February next year, this timing will be most unsuitable.

The unresolved tactical issue, as is well-known, relates to whether the party's emphasis should be on left unity, as practised i-West Bengal, or left and democratic unity, as underlined by the party's Howrah plenum, relating it to the need for expansion in the Hindi belt. In other words, this concerns the party's attitude towards other opposition organisations like the Congress (U), the Janata, BJP and the Lok Dal.

The Two Views

Exponents of the left and democratic unity idea maintain that only this can facilitate the party's growth in the Hindi belt, and, therefore, the West Bengal unit's emphasis on left unity is anomalous, a wrong implementation of a vital party decision and creates difficulties for the party in other parts of the country.

As the last central committee discussions are said to have brought out, the West Bengal unit is no longer isolated in its view in this regard. It has been getting support from some members from other states. To its critics, its reply broadly is: "Where is your Congress (U) about which you have been creating such a din?"

But what might be irritating the critics more is the West Bengal leadership's attitude, reflected in the argument that the necessity of drawing in democratic elements arises or is felt only where the party is weak.

This, again, has brought to the fore another related controversy over whether the party should seek to exploit its association with allies to strengthen and expand itself or to try and develop laboriously a grassroots organisation and then seek expansion.

Party sources say neither controversy could be resolved at the last five-day central committee session in Calcutta. Attitudes on both remained as sharply divided as ever, which even had led to the exchange of harsh expressions. Hence the need for a cooling off period, and a time for a fresh reappraisal.

As for the West Bengal unit, it was pointed out on its behalf that in course of time, it had been possible for the left front to draw closer the CPI, socialists and the Lok Dal elements.

It was not averse to being conciliatory towards the Congress (U), despite its leadership's role in the 1970-71 attacks on the CPM, but there had been no opportunity so far to get closer on the basis of any common programme or issue.

West Bengal leaders think that by the time the central committee meets next, the position and character of the Congress (U) will get clearer and add more substance to their line of argument.

But one important pointer of the committee's last session was that the party leadership has already initiated a process of re-thinking on the BJP's role and composition and will not rule out common or simultaneous action on specific issues inside and outside the legislature.

WEST BENGAL CPI EXPULSION OF MEMBERS APPROVED

Calcutta THE SUNDAY STATESMAN in English 12 Jul 81 p 3

[Text]

THE West Bengal State Council of the CPI at its meeting in Calcutta on Saturday accepted the recommendation of the party's State executive committee for the expulsion of 15 members, including four members of the State Council, for anti-party activities. These members had organized the West Bengal State Communist Convention in Calcutta on June 20.

A spokesman of the CPI told reporters that so far 10 members of the State Council had been expelled, including the four against whom steps were taken on Saturday. These members were given an opportunity to explain their conduct before the State Council, but they did not do so.

He said that the party's district councils had been instructed to take a lenient view of those misguided members who reformed themselves. They had, however, been asked to take stern disciplinary measures against those members who continued to participate in disruptive activities.

The State Council in another resolution urged the President, Mr Sanjiva Reddy, to cancel his proposed visit to the U.K. on the occasion of the wedding of Prince Charles in protest against the race riot now raging in that country. The Council condemned the Thatcher Government's immigration policy.

CPI-M POLITBURO MEMBER COMMENTS ON GANDHI REMARKS

New Delhi PATRIOT in English 12 Jul 81 p 5

[Text] CPI-M Politburo member P Ramamurti noted on Saturday that the Prime Minister had correctly highlighted the danger to the subcontinent from Pakistan's acquisition of F-16 aircrafts, but 'failed to pinpoint and castigate the real villain--the US imperialism'.

In a statement, Mr Ramamurti said 'verbal protests, however strongly worded, lodged with the US Government is futile'. Instead he underscored the need to rouse the people of India against the US imperialism's menacing challenge to the country's independence, unity and integrity.

But it was his strong belief that this, neither the Prime Minister nor her party is able to do because of her policies if increasing dependence on western aid, chiefly from America, the World Bank, the IMF and other international financial institutions largely financed by the US.'

Mr Ramamurti said Mrs Gandhi's efforts to explain away the Indo-Pak Joint Statement that every country has the right to acquire arms for its defence 'has no meaning whatsoever'. Since, Mr P. V. Narasimha Rao during his visit to Pakistan knew that Islamabad was trying to negotiate the F-16 deal with Washington, he felt 'it was absolutely necessary for our External Affairs Minister to explicitly state, without any ambiguity, that we are firmly and totally opposed to the induction of this offensive weapon into Pakistan.'

DISSIDENCE IN PUNJAB CONGRESS-I REPORTEDLY CONFIRMED

New Delhi PATRIOT in English 12 Jul 81 p 4

[Text] Chandigarh, July 11 (PTI).

Congress-I general secretary Kalpnath Rai said here yesterday that he would submit his report relating to 'important matters' of the party and the Government in Punjab to Prime Minister Indira Gandhi later today.

Several Punjab Cong-I legislators, who have been described as 'dissidents' including some Minister and many party workers met Mr Rai and are understood to have expressed their 'dissatisfaction' with what they called 'slow functioning of the Government and the party' in the State.

Mr Rai at a press conference later refused to disclose what was discussed but said that he would convey their feelings to party president Mrs Indira Gandhi.

Mr Rai appealed to Mr Dev Raj Urs to dissolve the Cong-U as it had become 'irrelevant following the acceptance of Cong-I party and its leader, Mrs Indira Gandhi by the people.'

Addressing the press conference Mr Rai said that he was making this appeal on the eve of the working committee meeting of the Cong-U in Bangalore on Sunday to decide party's future course of action.

Mr Rai said that Mr Urs should dissolve his party 'in the interest of the country' and moreover, the people could not be confused any more.

'Mr Urs himself and the entire rank and file of the Cong-U in their heart of hearts want to join Cong-I but there is slight hesitation on the part of some leaders mainly because of the question of adjustment, he said.

Asked whether Cong-U leaders, including Mr Urs and the workers would be admitted to the Cong-I in case the party (Cong-U) was dissolved, Mr Rai said each case would be decided on merit.

PRADESH CONGRESS-I COMMITTEES TO BE REORGANIZED

New Delhi PATRIOT in English 12 Jul 81 p 5

[Text] Pradesh Congress-I Committees in the Cong-I-ruled States will be re-organised by September or latest by October next, according to AICC-I general secretary Vasantdata Patil.

New PCC-I president will be elected or nominated where the post is held by the Chief Minister, he told newsmen on Saturday.

At present, the Chief Ministers of Punjab and Gujarat are holding dual posts.

The re-organisation of the party's State units is intended to strengthen them and ensure better coordination and harmony between the organisational and Governmental wings. The party High Command is also worried over the factionalism within the party which continues unabated in many States.

Mr Patil, who visited Gujarat, said in reply to a question that except for 'differences of views' among a few individuals in the State, the Cong-I was a well-knit organisation there.

The AICC-I general secretary told newsmen that the question of Mr Y B Chavan's admission to the Cong-I was expected to be discussed at the party's working committee meeting in the last week of this month or during the first week of August.

But the issue of admission of people including former Lok Sabha Speaker Bali Ram Bhagat, Haryana's former Chief Minister Banarsi Das Gupta, Mr K C Pant and Mr S C Shukla will be decided only after consulting the PCC-Is of their respective States.

RAJIV GANDHI MEETING WITH SHEIKH ABDULLAH REPORTED

New Delhi PATRIOT in English 12 Jul 81 p 4

[Text] Srinagar, July 11 (PTI)--Mr Rajiv Gandhi, MP who is here in connection with the two-day meeting of the national executive of the Youth Cong-I, had a meeting this morning with Chief Minister Sheikh Mohammad Abdullah. The meeting lasted an hour.

The meeting took place at the residence of the Chief Minister, shortly before the national executive began its meeting.

It was not immediately known what transpired at the meeting, but a source close to the Chief Minister said the two are believed to have discussed the present state of relations between the Cong-I and the ruling National Conference.

Later addressing a party rally, Mr Rajiv Gandhi announced a new organisational programme for the Cong-I in Jammu and Kashmir with village as the base.

He urged the PCC-I to fix the target of building a network of organisational units, with a minimum of five workers in each village.

The PCC-I, he told the rally, should prepare for the "coming elections" to ensure a massive victory.

The Cong-I workers in the State should take to constructive work and agitate for the peoples grievances without fear, but avoid politics of mud-slinging and leg-pulling, he said.

Mr Gandhi said the Cong-I was for a constructive approach. At the same time it was also fighting for the people's cause.

Our battle will not be fought on the streets, but at the polling booths, he added.

STUDY ON BYELECTION STATISTICS SUMMARIZED

Madras THE HINDU in English 12 Jul 81 p 2

[Text] New Delhi

Some interesting trends are revealed by the comparative study, just made available, of the data of the recent by-elections and the behaviour of these constituencies--six of the Lok Sabha, 23 of State Assemblies--on earlier occasions. Particularly striking is the point that while the total number of voters, as was natural, went up practically in each case, those who turned up at polling booths were fewer, in most cases. This trend is uniform in the case of Lok Sabha seats but mixed in Assembly constituencies except in West Bengal.

The number of votes cast in the four Lok Sabha constituencies in U.P., as also one each in West Bengal and Orissa is less now than in 1980. As regards the Assemblies, there is an even division in two States--in U.P. four constituencies registered an increase in the valid votes polled, four showed a drop and in Bihar, the number was higher in three constituencies and lower in the other three. West Bengal had the distinction of registering an increase in seven out of eight Assembly constituencies. The lone seat in Karnataka, however, attracted fewer voters this time.

Surprisingly, the entry of star candidates in the contest for the Lok Sabha, of Mr. Rajiv Gandhi in Amethi and Begum Abida Ahmed in Bareilly, failed to enthuse voters, as a whole, though the winners romped home with much bigger margins.

In Amethi, for instance, the total electorate increased to 6,79,469 from 6,75,683 last year but those who appeared at the booths totalled 3,07,523 against 3,27,413 last time. That Mr. Rajiv Gandhi polled more votes than his brother, Sanjay Gandhi last time--2,58,884 compared to 1,86,990--is another question.

It was the same story in Bareilly. The electorate increased from 6,14,536 to 6,31,825 but the number of valid votes dropped from 2,68,950 to 2,47,613. Here again, the fact that the Congress (I) wrested the seat from the Janata (S), the party of the former Prime Minister, Mr. Charan Singh, and Begum Ahmed, the present winner polled 1,14,231 votes against 75,448 of the successful contestant last year, Mr. Misar Yar Khan, are different matters.

Here is the comparative data, constituency-wise:

Constituency	Contestants		Electorate		Votes Polled	
	1981	Previous	1981	Previous	1981	Previous
Lok Sabha						
Amethi	14	12	6.79.469	6.75 683	3.07.523	3.27.413
Bareilly	9	20	6 31 825	6 14 536	2.47.613	2.68.950

Midnapore	5	5	1.10.525	95.944	68.665	52.230

General Apathy

Opinions differ on what it all means. Some feel it is due to the general apathy of voters to political processes, which failed to attract them, in their present sullenness over economic condition particularly rising prices and shortages of essential items.

Having seen their hopes dashed because of the broken promises of the rulers, they, so goes this argument, were not keen to associate themselves with elections in a "plague be on both their houses" mood. Others describe it as the normal phenomenon

in by-elections. Because of the limited interest of scattered contests, as against the all-pervading zest during general elections, parties and candidates find it hard to mobilise their support to the full extent.

Exception

The higher turn-out of voters for the Assembly contests in West Bengal--an exception to the general trend--is ascribed to the peculiar situation of the State, particularly the different impact of the Left Front Government. The presence of the Congress (I) in the Opposition camp added a dimension to the campaign which was not there elsewhere.

The margins of the winners in the Lok Sabha contests were bigger now in U.P. but narrower in West Bengal and Orissa. This, say political observers, reflects the state of the Opposition. In U.P. areas, the Opposition is far more fragmented than in the other two cases. Whether this generalisation could be stretched to cover entire States is the subject of hesitant comments. In two Assembly constituencies, one of U.P. and another of Bihar, there is a slight decline in the electorate. This is a freak development and no proper explanation is available. It was, perhaps, because there were far too many errors in the old voters' list and the revision led to pruning.

Or, perhaps, migrant labour was a sizable segment of the electorate which was reduced when workers moved to other areas.

BANKING ORDINANCES ISSUED, BANK RATE RAISED

Calcutta THE SUNDAY STATESMAN in English 12 Jul 81 pp 1, 7

[Text] New Delhi, July 11.--In a fresh bid to curb inflation and stabilize the economy, the President today promulgated two Ordinances, raising the rate of compulsory deposits for the affluent and making bank repayment of deposits through payee accounts obligatory, report PTI and UNI. In a matching move, the Reserve Bank of India today raised the bank rate by one per cent. Today's Ordinances follow last night's announcement of an increase in the prices of petroleum products, and official sources said that more such measures were in the offing.

Today's Ordinances were approved by the Union Cabinet here yesterday. The Finance Minister, Mr R. Venkataraman, flew to Hyderabad, where President Sanjiva Reddy signed the Ordinances.

The Compulsory Deposit scheme (Income-Tax Payers) Amendment Ordinance, while increasing the rates, does not make any change in the existing rates in respect of current incomes up to Rs 50,000.

For incomes in the range of Rs 50,000 to Rs 70,000, the rate of compulsory deposit is up from 12.5% to 15%; and for incomes exceeding Rs 70,000, the rate has been raised to 18% from the existing 15%. The Government believes that this measure will help "restrain conspicuous consumption", the announcement said.

Under the second Ordinance--Income-Tax Amendment Ordinance--banks, companies, cooperative societies and partnership firms will be required to repay deposits made with them by any person through account-payee cheques or account-payee bank drafts, where the deposit with interest is Rs 10,000 or more.

"However, banks, including cooperative banks, will be permitted to repay any deposit made with them by a person who has an account with the bank by crediting to the account of such person", the announcement added. Failure to comply with this requirement will involve imprisonment for a term up to two years and a fine equal to the deposit.

Under the Income-Tax (Amendment) Ordinance, which covers deposits with banks, companies, cooperative societies and partnership firms, the depositor can no longer be "benami", as the Income-Tax authorities will now know to whom the deposit has been repaid. There is no exact information on how much black money is held in benami deposits.

The ordinance does not apply to savings bank or current account deposits, it was officially clarified.

The Finance Ministry announcement said the Ordinances would apply in relation to the assessment years 1982-83 and 1983-84.

The bank rate stands raised from nine per cent to 10%. The new rate comes into effect from the close of business today (July 11), the Reserve Bank of India said in a Press release.

The bank also announced that the second phase of the increase in the case reserve ratio of scheduled commercial banks, originally to be effective from September 11, was now being advanced to August 21.

The statutory liquidity ratio is to be raised from 34% to 35% of total demand, and time liabilities in two phases--34.5%, effective from September 25, 1981, and 35%, effective from October 30, 1981.

The minimum margin against stocks of wheat, paddy/rice, and other foodgrain will be raised with immediate effect by 10 per centage points across the board, with the exception of advance paid to roller flour mills against wheat.

The package of monetary measures announced by the RBI today will reduce the capacity of bank loans to industry and trade by about Rs 880 crores at the beginning of the busy season in November, according to banking circles in Bombay.

The bank rate rise will also hit the borrowers, as the lending rate structure of the commercial banks is linked with the bank rate, barring certain categories of priority sectors. This will augment the earnings of the banks by about Rs 350 crores on an annual basis.

The monetary measures will hit industry and trade by making credit costlier and also reducing its availability, trade circles feel.

Good Response

The Bombay Share Market reacted favourably to today's Ordinance on the package of anti-inflationary steps, as well as to the one per cent hike announced by the RBI.

Though the market remained officially closed during the entire week for completion of outstanding settlement work, share prices had been declining in kerb dealings on the belief that the impending anti-inflationary measures would include dividend curbs.

But the absence of any dividend freeze and other harsh measures in today's announcement generated confidence among share-brokers, though the increase in the bank rate had a restraining influence, brokers said

The president of the Indian Merchants' Chamber, Mrs Sharayu Daftary, said that the RBI's package of monetary measures, including the rise in bank rate, would affect trade and industry by making credit costlier and restricted.

CENSUS FIGURES ON URBAN, RURAL POPULATION RELEASED

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 6

[Text] New Delhi, July 11 (PTI): India continues to be predominantly rural although its urban population increased by more than 49 million during the 1971-81 decade.

The rural-urban distribution of the population obtained from the quick tabulation of provisional totals of the 1981 census shows that 76.27 per cent of the population is rural.

The census commissioner today released figures putting the urban population at 156,188,507. The balance of the total population of 658,140,676 is considered rural.

These figures exclude Assam, where the census has not so far been held, and Jammu and Kashmir, where the census was taken two months after the February-March enumeration in the rest of the nation.

The urban population had grown from 17.62 per cent in 1951, when the first post-independence census was taken, to 18.26 per cent in 1961, 20.22 per cent in 1971 and to 23.73 per cent in 1981.

The urban population was a mere 10.40 per cent in 1911.

Dadra and Nagar Naveli as well as Lakshadweep entered the stream of urbanisation for the first time during the 1971-81 decade.

Maharashtra is the most urbanised state with 35.05 per cent of its population in the urban areas.

Tamil Nadu, Gujarat, Karnataka, Punjab and West Bengal follow in descending order. These states have a higher urban population than the national average of 23.73 per cent.

At the other end, Himachal Pradesh, Dadra and Nagar Haveli and Arunachal Pradesh have more than 90 per cent of their population in rural areas.

Kerala, Meghalaya, Uttar Pradesh, Sikkim, Nagaland, Bihar, Orissa and Tripura have more than 80 per cent rural population.

Nagpur, Lucknow and Jaipur crossed the one million mark at the 1981 census. They join the group of Calcutta, Greater Bombay, Delhi, Madras, Hyderabad, Ahmedabad, Bangalore, Karipur and Pune as big cities or urban agglomerations.

Together the 12 cities and urban agglomerations account for 44.56 per cent of the urban population.

GULF LOSSES PROJECTED FOR INDIA

London 8 DAYS in English 1 Aug 81 pp 36-37

[Article by Sundar Rajan]

[Text]

INDIAN PUBLIC sector construction companies working on projects in several Middle East countries are doing badly because of delays and inefficiency. Engineering Projects India (EPI), which holds responsibility for these projects, has reportedly suffered 'staggering losses'.

According to the *Economic Times*, India's most prestigious financial newspaper, EPI is heading for a total loss of Rupees 600m ($53m) on 11 projects — six in Iraq, three in Kuwait and one each in Abu Dhabi and Jeddah.

'Not a single project — not even the first prestigious Ain Baghaze housing project in Kuwait won in September 1976 — has so far been completed,' the newspaper said. 'The over-run is two to three years. While the loss in construction itself is about IR280m ($25m), the penalties EPI has to pay to the authorities in Kuwait, Iraq, Abu Dhabi and Jeddah for non-performance of contractual obligations on time is estimated to amount to IR320m ($28m). Having failed to put its house in order, EPI today finds itself in the unenvious position of its competitors, mostly giant corporations from Japan and elsewhere based in Jordan, taking advantage of the situation and pricing EPI out.'

It appears that EPI's predicament is not new. Two years ago, the EPI board appointed a committee to investigate the operation of a number of projects in the Middle East. Following on-site studies, the committee presented a report which was extremely critical of the public sector. The Janata Party government of the then prime minister, Morarji Desai, hesitated to publish the report. While some ministers felt that the findings could be used to discredit Indira Gandhi (prime minister when EPI negotiated its major Middle East contracts), Desai reportedly decided that the publicity would only harm India's image abroad. According to press reports, the committee itself advised that the report be suppressed.

While EPI is reluctant to comment on the press reports, the *Economic Times* claims that one of the committee's most startling findings was that 'an investigation into past purchases would reveal a story of corruption and pilferage of large proportions.' The paper's special correspondent also alleges that a brief report, attached as an appendix, informed the government that the money siphoned off from the construction work purchases had found its way into Swiss bank vaults. 'This report,' the correspondent adds, 'was however withdrawn at the instance of the then powers.'

The Gandhi government is apparently planning to make major changes in EPI's operations. It will also negotiate with the Middle East governments concerned to waive or reduce the time-clause penalties. New Delhi considers some of the conditions imposed on EPI too strict. The company will also seek greater control over the labour force, particularly Indian nationals working on the Middle East projects.

Observers feel that EPI's troubles are only a reflection of the domestic problems experienced by the Indian public sector, with excessive bureaucracy as the main reason for poor performance.

DETAILS OF POWER PLANT PLANS, FINANCING TOLD

Calcutta THE STATESMAN in English 11 Jul 81 p 11

[Text] New Delhi, July 10.--The International Development Association, the World Bank's soft loan affiliate, has approved a credit of $400 million for the second stage of the Korba thermal power station in Madhya Pradesh. The first stage, financed by an IDA credit of $200 million approved in April 1978, is presently under construction.

West Germany is co-financing the project to the tune of $150 million.

The project involves construction of three 500 MW turbogenerators, three 1,725 ton-an-hour boilers, auxiliary equipment and related works, and about 1,100 km of 400 kV transmission lines. These additions will bring the power plant to its final installed capacity of 2,100 MW by December, 1988. The first 500 MW unit is expected to be commissioned by December 1, 1986, with the remaining two following at one-year intervals.

The construction will be carried out by the National Thermal Power Corporation over an eight-year period (1982-89) as part of its current power development plan. The bulk of the power generated by the plant will be conveyed to State Electricity Boards in Gujarat, Maharashtra and Madhya Pradesh and to the electricity department of Goa.

The plant will use coal supplied by the nearby Kusmunda II and Gevra mines. The plant's coal requirements are expected to be 7.8 million tons annually. Equipment for coal handling and transportation has been included under the project.

The demand for power in India has consistently been greater than the available capacity. The country is pursuing an ambitious investment programme for the power sector aimed at reducing the gap between power supply and demand. The addition of the project's 1,500 MW by 1988, representing about 13% of the peak demand in the region will help avoid power shortages in the western region towards the end of the decade.

NEGATIVE REACTIONS TO OIL PRICE HIKE REPORTED

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 9

[Text] Calcutta, July 11.

Voicing the West Bengal government's "strongest protest" against a fresh revision of petroleum products prices, the finance minister, Dr. Ashok Mitra, today spoke of organising a nation-wide compaign against the Centre's "anti-people" policies which, in his view, sought to favour a small section but threatened the future of the nation. This would be done within the existing constitutional and legal framework.

Reacting to the Centre's decision in this regard a senior vice-president of the Bharat Chamber of Commerce Mr. C. I. Gandhi, said the decision would have "obvious cascading effects on costs and prices adversely affecting quite a wide range of essential commodities and provide further fillip to the upswing in prices."

Dr. Mitra, on his part, roughly estimated that the Centre's decision would push up prices of petrol, diesel oil, kerosene, gas and fertilisers by ten to 12 per cent and with an overall price increase of three to four per cent. It would widen the states' budgetary deficits, because states like West Bengal would not like to raise the sales tax rates in keeping with the Centre's decision, but at the same time its earnings from small savings would tend to fall. This would be entirely the Centre's responsibility.

He repeated that the state government had been trying to impress at various national forums that prices could not be lowered by raising them. But the Centre, while talking about bringing down prices, was actually pushing them up by its policies. This would raise the cost of living, resulting in pressures for wage compensation which the states, and not the Centre, would have to face. As a result, he felt that the "entire system is getting unmanageable."

Our special correspondent adds from Bhopal: The sudden increase in the price of petroleum products has provoked sharp reaction from almost all opposition parties.

Janata Party leaders, in a joint statement, said that in the past two months the prices of crude and petroleum products had been falling in countries while OPEC countries had decided against any price hike for their exports.

New Delhi (UNI): The upward revision of prices of petroleum products have come under severe criticism from various quarters.

The All-India Trade Union Congress general secretary, Mr. Indrajit Gupta, MP, said the hike would inevitably boost inflation and prices in a chain effect.

Mr. P. Ramamurti, Centre of Indian Trade Unions general secretary, feared that the hike would lead to increase in price of essential commodities also.

DELHI REPORTEDLY PLANS TO TRIPLE CRUDE OIL PRICES

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 1

[Text] New Delhi, July 11:

The Centre is understood to have decided to raise by about 300 per cent the prices of domestic crude oil to make available larger funds at the disposal of the Oil and Natural Gas Commission and Oil India--the two premier agencies engaged in the production and exploration of oil.

The finanacing of higher prices of the domestic crude is expected to be done from the additional revenue that would be generated as a result of a sharp increase in the prices of petroleum products announced yesterday by the government.

The higher prices of petroleum products would fetch to the exchequer over Rs. 1,050 crores in a full year, it is reliably learnt. During the remaining period of the current financial year, the government expects to mop up about Rs 825 crores.

Inquiries from official circles show that the price of indigenous crude is now being uniformly fixed at Rs 1,180 per tonne against the existing average price of about Rs. 400 per tonne.

While fixing the revised uniform price of Rs. 1,180 for both on-shore and off-shore crude, the government has decided to do away with the dual pricing system. At present, on-shore crude is priced at Rs. 324 per tonne and off-shore crude at Rs. 458.

Sources here point out that keeping in view the resources constraint, the government had to resort to jacking up the petroleum products' prices. This will help mop additional resources for financing a significantly higher tempo of exploration activity both on-shore and off-shore. For the step up of crude oil exploration and production programmes, the government had also sought huge financial assistance from the World Bank. Moreover, the ONGC had borrowed money from the international market.

The government has already decided to step up production of indigenous oil because of the mounting burden of oil and petroleum products imports. In the plan document, crude oil production from the offshore areas of Bombay High is

estimated at 51.3 million tonnes during the sixth plan period. The revised estimates of production subsequently compiled by the petroleum ministry have placed the total oil output at 60 million tonnes--nine million tonnes of additional oil resulting in a colossal saving of foreign exchange.

Oil exploration and production programme has assumed added significance in view of huge trade deficit. Higher domestic production of oil can provide some relief to the adverse balance of payment position.

As a result of the various measures already taken by the petroleum ministry to raise domestic production of oil, it would be possible to curtail the import bill for crude and petroleum products next year by about Rs.1,000 crores, cutting the imports from 16 million tonnes of oil and 6.5 million tonnes of products this year to 14 million tonnes of oil and about three million tonnes of products next year.

INCREASE IN PETROLEUM, TRANSPORT PRICES ANNOUNCED

Calcutta THE STATESMAN in English 11 Jul 81 p 1

[Text] New Delhi, July 10.--All petroleum products will cost more from tomorrow (July 11). Besides an increase in the price of petrol, kerosene, diesel and domestic gas, this will mean an increase in the costs of road and air transport. The Government announced late tonight an increase of 53 paise a litre in the price of petrol, 32 paise a litre for high speed diesel and 15 paise for kerosene.

The maximum increase of about Rs 5 is in the case of domestic gas. A 15-kg cylinder in New Delhi will cost Rs 50.55, against Rs 45.54 at present.

Similarly, subject to variations on account of local taxes, petrol in the Capital should cost Rs. 6.07 a litre from tomorrow, against Rs 5.50. Kerosene has gone up from Rs 1.64 a litre to Rs. 1.77 a litre, and diesel Rs 2.67 to Rs 3.02 a litre.

The price of furnace oil has been raised from Rs 2,502.55 a kilolitre to Rs 2,737.55 a kilolitre.

The price of other petroleum products, which have also consequently gone up are being notified separately. The actual price increase will vary from place to place, depending on sales tax, freight charges, etc.

The State Governments and Union Territories have been advised to revise the fare structure of taxis and auto-rickshaws.

The prices of petroleum products were last increased on January 12, when kerosene was made dearer by 11 paise, a gas cylinder cost Rs 5.25 more and petrol, high speed diesel and light diesel 37 paise more per litre.

It is too early to calculate what the latest price hike will fetch the Government, but the last rise yielded the Government about Rs 1,200 crores.

A Government Press Note said that the latest price revision was due to "the steeply rising costs of the greatly expanded oil exploration and development programme, the continuing strain on balance of payments and the need to moderate the growth of demand for petroleum products and to promote their economic and efficient use".

PTI adds: India plans to boost its indigenous production to meet the growing demand and cut down progressively the import of crude oil and petroleum products.

The total imports this year are 15 million tons of crude oil and 6.5 million tons of petroleum products. As the Finance Minister, Mr R. Venkataraman, said recently oil imports alone account for 72% of the total export earnings.

/The price of urea has been increased by Rs 3,50 a ton, with immediate effect./ [in boldface]

A Staff Reporter adds: Describing the increase in the prices of petrol and high speed diesel as a "heavy blow" to transport operators, Mr Kalyan Bhadra, secretary of the Joint Action Committee of the Taxi Operators and president of the Bengal Bus Syndicate, said that a further revision in the fares of both taxis and buses would be unavoidable. Without a revision, it would be impossible to ply taxis and buses in Calcutta and other parts of the State.

Mr Bhadra, who is also the president of the West Bengal Petroleum Dealers Association, felt that the increase was, "without justification", as the tax on petrol in the country was already the highest in the world. He said that he would consult the respective associations of transport operators, before approaching the Government regarding a further increase in the fare structure.

SIXTH PLAN EARMARKS FUNDS FOR FAMILY BIOGAS PLANTS

Bombay THE TIMES OF INDIA in English 11 Jul 81 p 7

[Text] New Delhi, July 10 (PTI).

A sum of Rs. 500 million has been earmarked during the sixth five-year plan for setting up one million family-size biogas plants.

About 75,000 biogas plants are at the moment operating in the country. The government is also planning to set up 100 community-size biogas plants as demonstration units.

Amongst the major sources of alternative energy, biogas is seen by India's energy planners as the most promising at the current level of technological development.

The aim is to help villages become self-reliant in their fuel needs. By reducing the demand for firewood, the biogas programme should also check deforestation and reduce the burning of cowdung.

Subsidy

Biogas is mainly used for cooking but it can also be used for lighting, running diesel engines for irrigation and for generation of electricity. The use of biogas plants in villages, when linked to toilets, can also help in improving sanitary conditions.

Most of the funds allocated by the government will be spent on providing subsidies for the erection of family-size plants and for training people to construct them. Anyone setting up a family-size plant gets a 25 to 50 per cent government subsidy.

Community-size plants will probably be totally subsidised by the government. But even this major programme will tap only a fraction of the country's total biogas potential.

According to the former secretary of the planning commission's working group on energy policy, in India cowdung alone has a potential of 18.75 million family-size biogas plants and 5,60,000 community biogas plants, with a daily capacity of 1.7 and 142 cubic metres of gas respectively.

The one-million target of family-size biogas plants under the sixth five-year plan will, therefore, cover just five per cent of the potential capacity.

There are three major thrusts of biogas research in the country. The first is to design and construct cheaper biogas plants, using local skills and materials. The second is to find new feeds for biogas plants to supplement cowdung. The third is to design and construct community biogas plants to suit even those who do not have cattle.

The most common design in India is the one developed by the Khadi and Village Industries Commission (KVIC). It consists of an underground cement pit covered by a metal gas-holder which floats over the gas produced in the cement pit by the fermentation of the cowdung. The metal drum in the kvic design generally comes from an urban workshop.

The drumless design, known as the Janata model, has been developed by the gobar gas research centre of the Planning Research and Action Division (PRAD) of the government of Uttar Pradesh at Ajitmal. The design is similar to the Chinese biogas plants. In this, the gas holder and the fermentation pit are combined into one brick and cement structure. The advantages of this design are that it is as much as 50 per cent cheaper and it is possible for a trained villager to build the entire plant himself.

But it is not possible to build community-size Janata plants. There are about 72,000 KVIC plants and about 2,500 Janata plants in the country. Technically, the main problem with the KVIC model is the corrosion of the metal drum. In the Janata model, leakage can occur if it is not constructed properly.

The application of science and technology to rural areas body of the Indian Institute of Technology, Bangalore, has modified the KVIC design so that it is possible to get gas within only 35 days of feeding the plant. The KVIC usually takes 55 days. The ITI body has set up two plants on an experimental basis and claims that they are 40 per cent cheaper than the KVIC plant.

The A. M. M. Murugappa Chettiar research centre in Madras is designing a biogas plant in which the gasholder is made of PVC plastic.

The Structural Engineering Research Centre (SERC), Roorkee in Uttar Pradesh, has developed ferro-cement gas-holders made of wire gauze coated with cement.

GUJARAT HARVEST PROSPECTS BRIGHT DESPITE WEATHER

Bombay THE TIMES OF INDIA in English 11 Jul 81 p 6

[Article by T. E. R. Simhan]

[Text] Ahmedabad.

The prospects of a rich kharif crop this year are bright in Gujarat despite a slight delay in the onset of the monsoon.

Rains have been fairly satisfactory and generally widespread all over the state excepting in a few pockets.

Sowing operations have been virtually completed in all the areas receiving good rains, according to Mr. S. N. Joshi, additional director of the state agricultural directorate.

Reports reaching here speak of pre-monsoon sowing of roundnut over 80,000 hectares in Rajkot and Baroda where irrigational facility is available.

The flowering stage has also reached in some areas. In a few pockets of Kutch like Bachau and Lakhpat, however, rains have not been so widespread as to induce farmers to commence sowing in the first round of rain. Meanwhile, according to the latest reports, the second wet spell is on, bringing fresh hopes to the farmer.

Official statistics indicate that gradually both the total cropped area and kharif crop production are on the increase since 1979-80. For instance the total area cropped for kharif foodgrains in 1979-80 was 32.94 lakh hectares which yielded 23.07 lakh tonnes. This rose to 33.95 lakh hectares in 1980-81 with an output of 26.28 lakh tonnes of foodgrains.

The forecast for 1981-82 is 27.20 lakh tonnes of foodgrains over the same acreage as in 1980-81.

The state hopes to reap a bumper groundnut crop in 1981-82 to the tune of 23.00 lakh tonnes, against 16.31 lakh tonnes in 1980-81. This optimism stems from the fact that sanction has been received from the Centre for the Rs. 35-crore project for improving cash crop production over a period of three and a half years in the state.

Gujarat's total agricultural income, from both rabi & kharif, is estimated around Rs. 1,700 crores, the latter contributing nearly two thirds. Kharif crops include, besides the major ones, cotton and groundnut, rice, jowar, bajra, maize, ragi, kodra, small millets and pulses like tur.

Green Picture

Farmers in Baroda, Broach and Kheda have done drilled paddy operation, i.e., paddy not needing transplantation.

On the whole the picture painted by the officials is green with granaries overflowing.

Interestingly, however, despite increased foodgrains output, the state's overall position is one of deficit. Gujarat will still have to depend upon other states for many of its food needs, particularly pulses and wheat.

BIHAR AUTUMN HARVEST MAY EXCEED LAST YEAR'S

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 6

[Article by Janak Singh]

[Text] PATNA.

THANKS to widespread rains especially in areas under paddy and several new incentives given to farmers for using seed and fertilisers, the kharif crop in Bihar is expected to be better than last year.

With the monsoon continuing to be active, the yields of some crops like pulses may even surpass the targets. According to agricultural experts of the state government, rice production may increase from 5,600,000 tonnes last year to 6,140,000 tonnes, pulses from 150,000 tonnes to 200,000 tonnes and of jute from 1,900,000 bales to 10,250,000 bales.

But these bright prospects can be upset by floods if they are of greater intensity than is the case in a normal year.

Due to plentiful rains, paddy transplantation could be started much earlier in some areas. According to reports reaching the state capital, 30 to 35 per cent of paddy transplantation had been completed in the Kosi and Gandak command areas by the end of June.

Besides nature's bounty, additional inputs like distribution of 58,000 quintals of paddy seed against 46,000 quintals last year and 92,000 tonnes of fertilisers against 72,000 tonnes previously are likely to ensure that the size of paddy and other kharif crops this year would be bigger than ever before.

According to a new scheme of incentives launched by the state government last year, farmers are entitled to a subsidy of Rs. 30 per quintal on certified seeds and Rs. 20 per quintal on "truthfully levelled" seed. Power concessions offered to farmers in areas dependent on tubewell irrigation are also likely to improve the size of the crop.

In Bihar, out of net 8,400,000 hectares where rabi and kharif crops are raised, 5,500,000 hectares are under paddy, 850,000 hectares under maize, 300,000 hectares under pulses, 200,000 hectares under oilseeds, 187,00 hectares under jute and mesta, and 140,000 hectares under sugarcane.

While the onset of monsoon rains earlier than usual has benefited most kharif crops, it has had an adverse effect on maize. Due to continuous rain, the maize crop has not been able to grow well.

In certain areas, maize sowing has been delayed by rains. Some experts fear that the maize crop loss may be 15 per cent or more. As such, maize yields may fall below the target of 1,025,000 tonnes for this crop.

FLOOD THREAT

Since maize is both a kharif and a rabi crop in Bihar, better rabi yields, if possible, could make good the poor kharif yields.

According to a crop expert of the agriculture department, the state continued to remain dependent on rain. Of the total area under kharif operations, only 18 per cent has assured irrigation. The rest depends on rain.

The swollen rivers of north Bihar may submerge 800,000 to 900,000 hectares. At least 200,000 hectares where kharif crops are sown remain under water up to September.

Every year, agricultural planners make ambitious proposals to achieve higher targets. Usually, the schemes are considered and approved by the state cabinet. Huge allocations are made for their implementation. The process is repeated year after year.

FOOD DEFICIT

While there has been some improvement, it is not of the scale and order required to make Bihar self-sufficient in foodgrains. Last year, both kharif and rabi crops accounted for 10,600,000 tonnes. This was the highest yield ever attained in the state. Even this was about 2,000,000 tonnes short of the total annual demand of the state.

While there can be many reasons for this, inquiries reveal that an important factor militating against better agricultural growth is the slow pace of agricultural extension operations in the rural areas. A very large number of posts both at junior and senior level remain unfilled.

FARMING NEGLECTED

For the past two years, Bihar has been without a director of agriculture. Sometime ago, due to caste politics, an attempt was made to appoint an agricultural engineer as director of agriculture.

Luckily, the move was given up. Bihar is predominantly an agricultural state. Yet problems of farm and crop husbandry do not receive the attention they deserve.

Bihar is one of the important centres for the production of chemical fertilisers in the country. Yet, the allocation of chemical fertilisers to the state is always short of the demand.

While the bulk of poor farmers with small holdings cannot afford fertilisers to raise production, those who can go in for such inputs are often denied their supply.

KERALA URGES DELHI TO KEEP RICE COMMITMENTS

New Delhi PATRIOT in English 11 Jul 81 p 3

[Text] Trivandrum, July 10

The Kerala Assembly has urged of the Centre to keep its rice supply commitments to the State in order to meet in full the statutory rationing obligation made imperative by the exigencies of price rise and shortage felt during the months.

A non-official resolution that was carried without division today estimated the monthly requirement of rice at 1.94 lakh tonnes on the basis of 12 of ration per head per day as the minimum quantum statutorily accepted against this physical target actually needed the Centre slashed its commitment to 1.35 lakh tonnes but the actual availability from the Food Corporation of India had been much less--65,000 tonnes in May and 84,000 tonnes in June, Minister for Food and Civil Supplies S E Chandrasekharan Nair disclosed while summing up the debate on the resolution.

Opposition benches, particularly Cong-I members, sought to lay the blame on the State Government for the difficultues experienced in ration distribution in many parts of the State and the price spurt for rice in the open market becuase, they argued the public distribution system failed to take advance measures to cope with the situation. Minister Chandrasekharan Nair conceded that the FCI had its own problems in overcoming the frequent bottlenecks in keeping the railway wagons moving.

However, attempt to absolve the Centre of its food supply commitments to Kerala and blame the State for the disruption in ration will only help aggravate the situation, not absolving it, the Minister said.

Mr Nair reminded the Opposition that the State Government had not remained indifferent to the price rise trend in the open market as has been alleged.

The State Civil Supplies Corporation continued to act in vigorous way to effectively counter the price rise not only in rice but in most other essential articles and sell at controlled rates.

SUGAR PRODUCTION THROUGH 15 JUN HIGHER THAN LAST YEAR

Bombay THE TIMES OF INDIA in English 12 Jul 81 p 6

[Text] New Delhi, July 11 (UNI): Sugar production during the first fortnight of June, 1981 was about 4,000 tonnes as against 3,000 tonnes during the corresponding period last year, according to the Indian Sugar Mills' Association.

This brings the total production till June 15 for the season 1980-81 to 50.45 lakh tonnes against 38 lakh tonnes during the corresponding period last season.

The off-take of sugar from factories during the first fortnight of June 1981 was about 2.02 lakh tonnes for internal consumption and nil for export against 1.88 lakh tonnes for internal consumption and nil for export during the same fortnight last season.

The total off-take till June 15 was about 32.50 lakh tonnes for internal consumption and 60,000 tonnes for exports against 38.33 lakh tonnes for internal consumption and 2.3 lakh tonnes exports during the corresponding period last season.

The total closing stock of sugar with the factories as on June 15, 1981, was 22.20 lakh tonnes against 17.10 lakh tonnes on the same date last season.

BRIEFS

ANDHRA PRADESH MINISTER'S DEATH--Hyderabad, July 11 (UNI): The Andhra Pradesh panchayati raj minister, Mr. P. Seshavatharam, died at the Gandhi Hospital here this afternoon. He was admitted to the hospital in a critical condition with abdominal bleeding this morning. Mr. Seshavatharam, 55, is survived by his wife, two sons and two daughters. He had come out of a cabinet meeting yesterday evening complaining of abdominal pain. Mr. Seshavatharam, who belongs to West Godavari district, had participated in the freedom struggle. He was elected to the assembly from Narsapur. He is the second Andhra Pradesh minister to die in office during the last two months, the other being Mr. G. Rajaram, finance minister, who was killed in an accident. [Text] [Bombay THE TIMES OF INDIA in English 12 Jul 81 p 7]

ANDHRA PRADESH MINISTERS RESIGN--Hyderabad, July 11 (UNI): Two Andhra Pradesh ministers, Mr. G. Sriramulu Naidu and Mr. K. E. Krishnamurthy, today resigned from the cabinet following their selection as Congress (I) candidates to contest the chairmanship of zilla parishads of Srikakulam and Kurnool districts. The governor has accepted their resignation. Mr. Sriramulu Naidu was the minister for medium irrigation, while Mr. Krishnamurthy was minister for small-scale industries. [Text] [Bombay THE TIMES OF INDIA in English 12 Jul 81 p 7]

WEST BENGAL FRONT--Lucknow, July 11 (UNI): The socialist leader, Mr. Raj Narain, said today his party would support the CPM-led government in West Bengal and try to foil all attempts of Congress(I) leaders to topple opposition governments in West Bengal and other states. Addressing the first state conference of the Uttar Pradesh Socialist Party, Mr. Raj Narain said he was definitely in favour of unity of the opposition parties on the basis of a common agreed programme. The unity of like-minded opposition parties was necessary for a strong opposition in the country, he added. The formation of a strong opposition party after merging various like-minded political parties to provide a viable national alternative to the Congress(I) would be the second step toward opposition unity, he said. [Text] [Bombay THE TIMES OF INDIA in English 12 Jul 81 p 7]

KHALISTAN CURRENCY--Amritsar, July 11 (UNI)--The National Council of Khalistan will issue Khalistan currency on 22 November, the birthday of Guru Nanak Dev. Council-Secretary-General Balbir Singh Sandhu told newsmen here today the council would also install "Radio Golden Temple" in the Temple premises here by that time. He claimed that despite oppression and repression by the Government, the Khalistan movement was gaining momentum. [Text] [New Delhi PATRIOT in English 12 Jul 81 p 5]

POLITICAL CONFRONTATION IN OCCUPIED KASHMIR--Sialkot, 3 July (NAWA-I-WAQT Correspondent) - In view of the confrontation that is shaping up between the ruling National Conference headed by Shaykh Abdullah, chief minister of Kashmir, and Congress-I, there are strong speculations that the political situation in the state will take a new turn. According to one source, Shaykh Abdullah has summoned his party's assembly members to Srinagar, the capital, for consultation. Reports say that the National Conference has sent clear signals to the opposition parties that it is not afraid of their challenge in the elections, that it has the power of the people's support, and that it is always ready to show its political muscle. According to reports, Congress-I is not popular among the people of occupied Kashmir and it merely wants to create problems for the Abdullah administration by starting some sort of movement against the ruling party. [Text] [Lahore NAWA-I-WAQT in Urdu 4 Jul 81 p 6] 9612

MARITIME AIR WING CHIEF--Bombay, July 10: Air Vice-Marshal Brij Lal Chadha took over command of Headquarters Maritime Air Operations from Group Captain H. S. Goraya, here today. Commissioned in June, 1951 in the flying (navigation) branch, he not only bagged the sword of honour but also the air works and ground subjects trophies. He has had a very distinguished career with varied experience in operations, administrative and training role. He also had a tenure in the UAR on instructional duties. Prior to his present appointment, Air Vice-Marshal Chadha was deputy director-general, National Cadet Corps, New Delhi. [Text] [Bombay THE TIMES OF INDIA in English 11 Jul 81 p 5]

SOLAR CELL MANUFACTURE--Bangalore, July 10. The control equipment division of the Bharat Heavy Electricals Limited (BHEL) will manufacture solar cells for the use of the Indian Space Research Organisation. An agreement to this effect was signed here on Thursday by Prof U. R. Rao, Director, ISRO Satellite Centre, Bangalore, on behalf of the Department of Space and Mr. K. R. Parameswar, Executive Director, BHEL, Bangalore. BHEL, under the agreement, will supply about one-lakh space-qualified solar cells to ISRO during the next five years. These cells will be assembled into panels by ISRO and used on space missions. The Bhabha Atomic Research Centre (BARC) has provided technical know-how to BHEL for the manufacture of solar cells. BARC developed cells were tested and qualified at the ISRO Satellite Centre, Bangalore, earlier and a few of them were successfully flown on Bhaskara and Rohini satellites. BHEL has plans to extend the technology to terrestrial applications, for which potential exists in the country. [Text] [Madras THE HINDU in English 11 Jul 81 p 9]

NAGALAND INSPECTOR GENERAL--Kohima, July 10 (UNI)--Mr V Tripathy, IPS, today took over as Inspector-General of Police, Nagaland. Prior to his appointment here, Mr Tripathy was additional IGP, Orissa. Outgoing I G Siva Swarup will take over his new assignment as Inspector-General of Border Security Force, Jammu and Kashmir. [Text] [New Delhi PATRIOT in English 11 Jul 81 p 3]

TEAM TO UGANDA--Delegation of the Association of Indian is to night Uganda at the invitation of that government Engineering Industry to assess the possibilities of bilateral trade, and investments in that country, according to an AIEI press release. The statement said that possible areas of cooperation could be in the establishment of new textile units, manufacturing and service centres for two-wheeler scooters, battery units, manufacturing and service centres for two-wheeler scooters, battery units, manufacture of steel and PVC pipes for water and sewage and bicycle assembly plants. NATIONAL DEFENSE INSTITUTE HEAD FEELS WORLD WAR III UNLIKELY

Jakarta HARIAN UMUM AB in Indonesian 20 May 81 pp 1, 3

[Article: "Governor LEMHANNAS Sutopo Yuwono: There Will Be No World War III, Only Limited Wars"]

[Excerpts] Governor LEMHANNAS [National Defense Institute] Sutopo Yuwono feels that World War III so often prophesied in relation to the restless world situation recently won't take place. What will occur will be limited regional wars that are determined by and dontrolled by the giant powers. In addition, wars of subversion will continue as can be seen in several areas right now.

Suyono Yuwono said this in a press conference held in connection with the dwi windu [16th] anniversary celebrations of the higher institute of learning.

He said that there is no power in the world in its right mind that wants to see war between the two giant powers, which would mean involving the world in a great disastrous distruction. He feels the possibility of this is very slight.

Suyono Yuwono said that to safeguard the balance, each of the giant powers should see to it that one doesn't become superior to the other. Because if it happened that one were to become superior to the other this would motivate and tempt that one to launch an attack.

In relation to the Indian Ocean region where it appears an arms race is on and where there is the presence of the two giant powers, the ideal would be to create the Indian Ocean as a neutral and peaceful zone. However, if this isn't possible, then there must be a balance between the giant powers in the Indian Ocean.

Touching on Kampuchea, he said it is necessary to find a solution in a reasonably short time. He hopes all parties will be realistic. In the solution to the Kampuchean problem Indonesia can play an important role because of its good relations with Vietnam and also its strong position in ASEAN [Association of South East Asian Nations].

Suyono Yuwono added that an international conference on Kampuchea would not succeed if the USSR andVietnam don't take part.

On the other hand Vietnam and the USSR must also understand the situation realistically, that the Kampuchean problem can't be solved without the agreement of the neighboring ASEAN countries and other countries in the world.

To guard against the danger of the involvement of the two giant powers in ASEAN countries, it is proper for regional defense to be increased. The defense of each ASEAN country and the willingness among ASEAN countries to carry out cooperation would represent a regional defense which would become a shield capable of overcoming every kind of danger from without.

It would seem that threats in the form of open large-scale invasions won't take place. Still what clearly will continue as actual threats are infilfration and subversion which could come from every side. Subversion is not only political but can also be economic, cultural or even in defense and security.

During celebrations of LEMHANNAS's dwi windu anniversary the press asked what successes LEMHANNAS had achieved. In this relation Lt Gen Suyono Yuwono explained that much has been accomplished, including a large number of alumnae scattered all over who have been entrusted with leadership of important sectors. In the field ofconcepts, Suyono Yuwono mentioned the National Defense Doctrine and the archipelago concept which are contained in the GBHN [broad outline of state policy and direction] of 1973 and 1978.

Concerning future plans he said LEMHANNAS will continue to improve the concepts already formulated. It will also formulate concepts for national defense and make proposals as a contribution towards formulating future GBHNs. Other things just as important are national leadership and national management.

In finishing the press conference Lt Gen Suyono Yuwono also answered a question concerning restoration of Indonesian-PRC relations. He said that from a diplomatic standpoint, relations are essential with a country as large and important as PRC. But every country must consider its own national interests in restoring diplomatic relations. If the advantages of opening diplomatic relations with PRC are greater than the disadvantages, then we ought to normalize those relations.

INCREASE IN ECONOMIC GROWTH RATE HELPS NATIONAL BUDGET

Jakarta HARIAN UMUM AB in Indonesian 16 May 81 pp 1, 9

[Article: "Minister of Finance To Plenary DPR: Indonesian Economic Growth Up Seven Percent"]

[Excerpt] The Indonesian economic growth rate for 1980 has reached 7 percent, a figure which exceeds the estimate for Repelita III [Third 5-year development program] which was 6.5 percent. This has produced a 10 percent increase in the APBN [national budget] from 10.556 trillion to 11.720 trillion rupiahs.

In this government announcement presented on 15 May by Minister of Finance Ali Wardhana to the DPR [Parliament] while announcing the changes in the APBN for fiscal 1981, he said this was possible as a result of increased activities in various sectors such as agriculture, industry, construction, trade, mining as well as increased income from exports.

He said that agricultural production of unhulled paddy had increased in 1980 to 20 million tons as compared to 18 million tons in 1979.

Other sectors such as construction, communications, transportation and trade also showed encouraging increases. Also it is estimated that actual income from exports for fiscal 1981 will increase by $22.7 billion, an increase of 27.6 percent over export income for the previous year.

In addition, the occurrence of a surplus in continuing transactions for fiscal 1981 has resulted in an increase in Indonesia's foreign exchange reserves.

At the same time inflation control efforts are being carried on in the country so that the rate in fiscal 1981 was held to 15.9 percent, a rate lower than the previous year. This has resulted in the development of fairly stabile prices for basic needs and export commodities.

With these increases and additions the government estimates that the APBN for fiscal 1981, which was originally estimated at a balanced 10.556 trillion rupiahs, will become 11.720 trillion rupiahs. However of this 11.720 trillion rupiahs, expenses will only total 11.716 trillion rupiahs. So at the end of the fiscal year there will be a surplus of 4.7 billion rupiahs.

On other main points the minister said it is estimated that actual domestic receipts will reach 10.227 trillion rupiahs, an increase of 1.117 trillion rupiahs over that ratified by the DPR.

Routine expenditures will be 5.8 billion rupiahs, an increase of 220.7 billion rupiahs, so government savings to implement development will be 4.427 trillion rupiahs, while the original estimate was only 3.526 trillion rupiahs.

At the same time, actual receipts of foreign aid income will reach 1.493 trillion rupiahs or 7.8 billion rupiahs lower than planned. So the actual development budget income will be 5.9 trillion rupiahs or 1 billion rupiahs more than the routine budget.

According to the government, there will be an increase in routine expenditures due to larger payments of interest and debt installments, increases in subsidies for food and petroleum raw materials and increased costs for the 1982 general election as compared with original estimates. But on the other hand the expenses for the purchase of commodities and employees salaries will actually decrease over what was estimated.

Actual employees expenses will be 2.02 trillion rupiahs or a "little lower than the original budget". This is partially due to thae fact that not all employee positions have been filled and in addition the salaries earmarked for village chiefs and officials who were scheduled to become government employees in fiscal 1981, will only be used in fiscal 1982.

PELITA III TRANSMIGRATION GOAL OF 500,000 FAMILIES WILL BE MET

Jakarta HARIAN UMUM AB in Indonesian 22 May 81 pp 1, 7

[Article: "Department of Nakertrans Should Be More Considerate; Moving of 500,000 Family Units Can Be Reached By End of Pelita III"]

[Excerpt] Minister of Nakertrans [manpower and transmigration] Harun Zain is Optimistic that the moving of 500,000 transmigrant family units can be achieved by the end of Pelita III [third 5-year development plan]. Cooperation between departmental agencies in the Transmigration Implementation Coordination Board (Bakoptrans) is considered satisfactory and running smoothly.

In commenting on the results of the working session of the department of nakertrans held in Jakarta on 18-20 May Minister Harun Zain said that transmigration reporting can now be handled every day through continual monitoring.

"So, the actual movement of people in Aceh, for example, to Cot Girek in Irian Jaya and to other areas can be known quickly," he stressed.

He said his feeling of optimism is based on the carrying out of the movement of people in the past. If 500,000 family units is the figure for 5 years, then the number to be handled each year is 100,000 family units. This means 8,333 family units must be moved each month.

For the March April-May period, 8,500, 8,836 and 5,122 family units were moved. At present in the third year of Pelita III 50 percent of the work has been completed. The remainder will be finished in the 2 1/2 years remaining in Pelita III. Noting the facility he believes the target of 1/2 million family units can be completed within the allotted time.

Answering a reporter's question on the location changes for transmigration areas, he said there are 100 locations that must be moved from jungle areas to more permanent locations.

SOME HASAN TIRO FOLLOWERS RELEASED

Jakarta HARIAN UMUM AB in Indonesian 23 May 81 pp 1, 9

[Article: "Thirty-Three GPLHT Detainees Released"]

[Excerpts] On 18 May the commander of Laksusda [special executive officer-regional level] Aceh Brig Gen R.A. Saleh freed 33 detainees of the Hasan Tiro Terrorist Group (GPLHT). The release of the 33 detainees was based on results of investigations of them during their detention of 2 years to 3 years 1 month.

Before being released they made declarations and oaths to be faithful and loyal to the Pancasila [ideological basis of the country] and the 1945 Indonesian constitution.

In responding to the release of the detainees, Laksusda Aceh said that their release in addition to being based on humanitarian reasons, had also been decided based on their attitudes while being held and investigated.

However, those who have continued to resist, and only a few of these remain, will be pursued and hunted down until they are found whether they are dead or alive.

Laksusda Aceh explained that there are still a number of GPLHT detainees who will be tried in court because their guilt as followers of the GPLHT is very great.

AIRFIELD ON NATUNA ISLAND OFFICIALLY OPENED

Jakarta SINAR HARAPAN in Indonesian 18 May 81 p 12

[Article: "Ranai Airfield Officially Opened"]

[Text] On 16 May Minister of Defense and Security/ Commander of the Indonesian Armed Forces Indonesian Army General M. Jusuf officially opened the Ranai airfield on Natuna Island.

The airfield, which is one of the most northernly located airfields in Indonesia, is very strategic from every viewpoint, both for military needs as well as for the needs of Indonesia's economic development. In his speech Gen M. Jusuf said he considered the construction work on the airfield very difficult because most of the construction equipment and workforce was brought in from outside Natuna Island.

In the past the people of Natuna Island have been dependent on the coming of ships for transportation of the foodstuffs and other necessities needed.

Head of the Ranai airfield construction project Maj EngineerC. Muis explained that following its upgrading, the Ranai airfield has a landing strip 2,250 meters long and 43 meters wide. The 1980-1981 upgrading included completion of the runway, taxi way, apron drainage shelter, work shop and [installation] of visual equipment.

The airfield can be used by all kinds of airplanes owned by the Indonesian government, both civilian and military. Pertamina [National Oil and Natural Gas Co] also lands its regular airplanes at the Ranai airfield to service off-shore drilling programs being conducted by its contractors.

In support of the transmigration program, transport planes carrying transmigrants from their departure areas can land at the airfield. After the official opening Indonesian Airforce planes, OV-10s and A-4 Skyhawks which had taken off from airbases at Pontianak and Madiun landed. Construction of the airfield was planned in 1977 and implementation was speeded up during these last 3 years. Formerly the Ranai airfield was of grass and one third of the strip was covered with water at certain times so it was totally unusable.

INDONESIA WINS TENDER FOR LARGE SAUDI ARABIAN PROJECT

Jakarta HARIAN UMUM AB in Indonesian 19 May 81 p 3

[Article: "Indonesia Wins Tender for Large Project in Saudi Arabia"]

[Excerpt] Indonesia has won the tender for construction of the Raja Azis Military Academy in Saudi Arabia, woth $205 million. Minister of PU [Public Works] Purnomosidi said this during installation ceremonies for commissioners for state owned companies in Jakarta on 18 May.

According to the minister, in addition to the military academy, there are other tenders for Saudi Arabian military projects that have been won, with contracts worth $77 million.

He said that Indonesia can be proud of its victories because in addition to the value of the contracts which are fairly large by present standards, it also means we are able to compete with international contractors.

According to the minister, the Raja Azis Military Academy project is located in the midst of projects by strong Asian contractors such as South Korea, Taiwan and Japan.

The Indonesian contractor that succeeded in getting the contract is the ICCI, a large Indonesian consortium which has 18 contractor members at present.

The ICCI was established some time ago on the initiative of Minister of PU Purnomosidi. At present most of the members of ICCI are state owned companies.

INDONESIA TO PRODUCE CARGO TRANSPORTS, HYDROFOILS

Jakarta HARIAN UMUM AB in Indonesian 22 May 81 pp 1, 3

[Article: "Nurtanio-produced CN-235 Planes To Be Displayed in Paris"]

[Excerpts] Indonesia will introduce the Nurtanio-produced CN-235 airplane to the international world at the "aero salon le Bourger" in Paris in June. This information is from Dr Ing B.J. Habibie.

According to Habibie, Nurtanio is at present making the prototype of the CN-235. But at the same time Cassa of Spain is also making another prototype.

In introducing its prototype Indonesia will be represented by officials from the depearment of communications. Cassa will be represented by officials from there.

He said that to make a series of planes, there must be proper permits gotten beforehand.

According to Habibie, the CN-235 airplane has already been introduced to the international world through magazines.

But at the show it will be officially introduced. At that time we will be prepared to accept orders from all parties.

He told of the desire expressed by Federal Express to purchase CN-235 planes. They need them for cargo transports.

Minister Habibie also explained that in 1983 Indonesia will produce a passenger ship of the hydrofoil type.

This ship which will be similar to one produced by Boeing will be given the name Bima Samudera by the President, Habibie said.

According to plans, the Bima Samudera will carry 297 passengers. It will not use a propeller system but a jet system.

To evaluate the ship, Indonesia has ordered a hydrofoil from Boeing. It is expected the ship will arrive here next February, he added. The hydrofoil of the Boeing type will be produced at the Navy base in Surabaya. Its designed

speed is around 40-45 knots per hour.

Minister Habibie also said that the actual export of Indonesian helicopters to Iraq hasn't taken place.

"There are problems that must be solved and they are a country still at war," He said.

He added that there is no use in using a helicopter without guided missles.

AGRICULTURAL PLANNING COURSE--At 0900 on 11 August 1981, the second agricultural planning study course opened at the Chamka Dong Agricultural Institute. Present were Comrade Mat Ly, vice chairman of the National Assembly and vice minister of agriculture; Comrade Luong Kim Pao, the course supervisor; cadres and employees of various departments of the Ministry of Agriculture; as well as more than 100 trainees. After the flag ceremony and paying respect to the fallen, Comrade Luong Kim Pao addressed the audience on the importance of this agricultural planning study course. After that Comrade Mat Ly gave a speech in which he stressed and highly praised the agricultural planning study course which was very important in building the nation and in rehabilitating the national economy. In conclusion, he emphasized that our entire people, army and all strata of our state power have scored all their great successes by following scientific socialism and Marxism-Leninism. These results were obtained because of our people's understanding and the implementation of the guidelines of the KPRP and our Council of Ministers. At the same time, the firm support and assistance from all friendly socialist countries, especially from Vietnam, Laos and the Soviet Union, has contributed to these achievements. The ceremony successfully ended at 1000 in a sincere and revolutionary atmosphere. [Text] [BK140920 Phnom Penh Domestic Service in Cambodian 0400 GMT 12 Aug 81]

LEGALITY OF WAKHAN TRANSFER TO USSR QUESTIONED

Lahore THE PAKISTAN TIMES in English 30 Jul 81 p 4

[Editorial: "The 'Gift' of Wakhan"]

[Text] According to reports, Babrak Karmal, Kabul's puppet ruler, has handed over to Soviet leader Brezhnev a note formalising the cession of Afghan territory of Wakhan to the Soviet Union. Radio Kabul has been reported as lauding the 'exchange of documents' as the 'historic gift of Babrak Karmal,' an obedient communist, to 'the Soviet bulwark of world communism.' An international frontier, touching the territories of Afghanistan, China and Pakistan, has been modified under duress after a century of international custom. It appears that Babrak Karmal went through a farcical ceremony of a legal hand-over at Moscow's Lenin Museum which now houses a record of documents relating to what is purported to be a long negotiated territorial realignment. The record, needless to say, begins with the first Soviet-supported governments of Nur Mohammad Taraki and Hafizullah Amin, both of them assassinated, and culminates with Babrak Karmal.

What can be the international legal status of this cession of territory? Is the Karmal regime a legal regime? Does it even pretend to function with any semblance of national consensus? Since the arrival of 85,000 Soviet troops in Afghanistan, more than three million Afghans have fled their homes to seek shelter in Iran and Pakistan, upwards of half a million have been killed by the Soviet armies, and from among the remaining population most are engaged in guerilla warfare against the puppet regime in all parts of Afghanistan.

In view of these facts on the ground all international and regional forums, including the U.N. General Assembly and the Non-Aligned Movement, have called on the Soviet Union to withdraw its armies from Afghanistan in order that the Afghan people may choose a sovereign government and re-emerge as a free country in the comity of nations. The Soviet Union, practised in the various modes of annexation illustrated in Eastern Poland, Moldavia and other areas since the Second World War has, it appears, added another trophy to its array of terri-

torial gains. Already in April this year the district of Wakhan, a corridor 341 kilometres long and 40 kilometres wide separating Pakistan and China from the Soviet Union, had physically gone under Soviet administration. All the outlets had been sealed off, the local Afghan administrator driven out and the local population forced to migrate to Pakistan as refugees. This action was preceded by an intense propaganda campaign from Radio Moscow accusing China and Pakistan of operating arms supplies and guerilla bands through a piece of high-altitude territory known to history as the Roof of the World for its extremely difficult access. The net result of the Soviet occupation and administration of Wakhan is that the Soviet Union now abuts on Pakistan and the People's Republic of China. A protective buffer has in effect been eliminated. The present trend in international law goes against revisions of international frontiers under duress because such revisions threaten to expose most national boundaries to negotiation all over the world. Neither the Karmal regime, which takes orders from Soviet generals in Kabul, nor the Soviet Union, which has violated the sovereignty of Afghanistan, are qualified in the eyes of the international community to negotiate the 'gift' of Wakhan as a permanent arrangement.

RAJAI VICTORY HAILED AS TRIUMPH FOR ISLAM

Karachi MORNING NEWS in English 28 Jul 81 p 4

[Editorial: "Fundamentalists' Victory in Iran"]

[Text]

THE election of Prime Minister Mohammad Ali Rajai as the President of Iran is an event of great significance from the Islamic and the political points of view, not only for Iran but also for the Islamic countries and the world at large. Mr Rajai won with a thumping majority of 87 per cent votes cast as against the 75 per cent secured by Mr Banisadr in the first Presidential election in the country. In both the cases, about 14 million votes, out of the 22 million eligible, were cast. Mr Rajai's greater popularity is a good omen for the stability of the country and the future of the Islamic revolution brought about by the Muslims in Iran. It settles finally that fundamentalists drawing inspiration from Islam and the native soil will rule Iran. From now on the so-called modernists, liberals and leftists will have to fight a defensive and a losing battle. Mr Rajai's election as the President is reassertion of the faith of the Iranian Muslims in Ulema as rulers of the country and also a ratification of the policies being followed by them to consolidate the revolution.

The Islamic Revolution in Iran has reaffirmed the eternal truth that Islam is a dynamic and a progressive code of life which has the capacity to inspire even the most suppressed people on earth to topple the most ruthless monarchy of the age. Mr Rajai's victory ensures that none but the Ulema have the power and authority, and confidence of the people, to lead the country. In the last few months of the tenure of the deposed President, the fight between the fundamentalists, consisting of Ulema and their followers and the so-called modernists and liberals, as represented by Mr Banisadr, had come in the open. There were violent street fights in Tehran and

other cities between the supporters of Mr Banisadr and Ulema, in which many people lost their lives. That Mr Banisadr did not in fact belong to the group of the architects of the Islamic revolution, and was not serious about it either, is evident from the fact that after being disowned by Ayatollah Khomeini he was readily owned by the leftist Khalq-i-Mujahideen who saw a chance of distorting the course of the Islamic revolution in Iran under his cover. Ayatollah Khalkhali said in an interview, while passing through Karachi a few months back, that (President) Banisadr was not serious about the Islamic revolution.

In the context of the 73-year-old fight of the Ulema for the restoration of Islamic law in Iran, dating back to 1906, costing much in blood and tears, Mr Banisadr's bid to usurp the arbitership of the nation's destiny from the real architects of the revolution is quite untenable. His attempt to set up a parallel government, his call to boycott the present presidential election and his exhortations to stir up trouble, all point to the fact that he is totally out of tune with the mood of the country and has missed the message of the great revolution. It is surprising that the anti-revolutionary essence in the makeup of Mr Banisadr was totally missed earlier. Iran would have been spared much trouble if Ayatollah Khomeini and other Islamic leaders had thoroughly scrutinised Mr Banisadr's credentials for heading the Government at this crucial period in the history of Iran. And that makes it utmost necessary for them to be vigilant in future. The fight of Iran with the internal and external enemies of Islam has not yet ended and these elements have the whole wide world as their hinterland to draw upon for support and guidance. The Islamic revolution in Iran has yet to be consolidated on so firm a base as to make it safe against all attacks. As the new President of Iran, Mr Rajai will have to shoulder heavy responsibilities at the most critical period in the nation's history. We hope he will act with sagacity and prudence and will see Iran safely out of its present travails.

DISSENSION REPORTED IN AL-ZULFIQAR BASE

GF081205 Karachi DAWN in English 6 Aug 81 pp 1, 3

[Text] Peshwar, 5 Aug--More reports trickling from across the borders regarding incidence of violence at the "al-Zulfiqar" base in Kabul last week reveal intriguing details of internal strife and dissensions among members of the terrorist organization and involvement of Karmal regime.

Some foreigners reaching here from Kabul, quoting diplomatic sources said, the incident on 26 July reportedly resulted in 12 casualties, dead and wounded, as a result of exchange of fire inside the premises which Kabul authorities have provided to "al-Zulfiqar" for use as its base.

According to a police patrol party, a burst of fire was heard first from within the building on the morning of 26 July. It was followed by an exchange of fire which continued for about 15 minutes.

These reports said the Pakistan terrorists residing in the building seem to be divided into two groups, one led by hijackers of PIA Boeing and the other by agents provocateurs being trained by Kabul authorities for subversive activities in Pakistan.

The bone of contention between the two groups has been the distribution and control of funds provided by Kabul authorities and the tussle of control the terrorist organization.

It is believed in Kabul that as a result of an earlier scuffle the two groups again fell out on the day of incidence and resorted to sporadic firing at each other killing and seriously wounding 10.

The group opposing hijackers is reported to have been voicing protest at the discriminatory treatment meted out to them at the base. Several of them showed reluctance to accept orders to go to Pakistan on errands of sabotage and subversion. They have been publicly saying that they were not told at the time of coming to the base that they would be deployed to do this type of work.

Another report from Kabul said the three Afghan guards posed at the entrance of the al-Zulfiqar base were also killed during this firing incident.

On hearing gunfire a crows gathered outside the premises and the guards tried to disperse them. In the confusion which followed, the guards opened fire resulting in some casualties among the crowd. In retaliation shots were fired from among the crowd killing all the three guards, the reports said.

Reports circulating in Kabul further indicate that Kabul authorities have felt pretty embarrassed over growing world revulsion to its act of protection of hijackers. The recent resolution at the Ottawa summit asking Kabul to return hijackers to Pakistan and threatening international action in case of its failure, certainly had its impact on Kabul authorities.

In the recent past Soviet bosses in Kabul have also been showing their growing dissatisfaction over poor performance of the hired Pakistanis and the hijackers. Doubts were also expressed about credentials of a number of these hirelings, and a general feeling was that steps would be taken by Kabul on the instance of Russians to get rid of some of them.

So far the Kabul authorities have remained silent on the incident and tried to hush it up. There has been no Kabul version which strengthens the belief that the Karmal government might have something to do with this incident.--APP.

SAUDI PEACE PLAN EXAMINED

Karachi DAWN in English 10 Aug 81 p 9

[Editorial: "Fahd's Plan"]

[Text]

CROWN Prince Fahd's seven-point plan for a Middle East peace settlement and its categorical rejection by Israel serve to illustrate the moderation and pragmatism of the Arabs on the one hand and the growing intransigence of the Israelis on the other. The plan put forward by the Saudi Arabian leader comes as a major development in the international quest for peace in the Middle East. Until now proposals of this nature have been sponsored by outside Powers and, with the exception of Egypt, no other Arab State has so far shed its ambiguous posture towards the question of Israel's recognition. The Saudi Arabian plan speaks of the recognition of the right of all States in the region to live in peace, which amounts to a conditional de facto recognition of Israel. This could prove to be a major breakthrough in the Middle East stalemate only if Israel were willing to meet the Arabs half way. The plan put forward by Prince Fahd is most realistic and balanced in all respects. Based on various UN resolutions, it is pragmatic in that it does not make excessive demands on any party but is also juristically valid since it conforms to the precepts of international law. Thus, it calls for the Israeli withdrawal from occupied territory and yet guarantees the freedom of worship for all religions in the holy land. It calls for the removal of Jewish settlements from the West Bank, Gaza and the Golan Heights and the establishment of a Palestinian State with the Arab sector of Jerusalem as its capital. But as a transitional measure the plan envisages a UN trusteeship over the West Bank.

The success of Prince Fahd's plan now depends on the response it receives from the other States. The Israeli Government's prompt rejection is not really surprising. Its stand on Jerusalem and the Jewish settlements has been in blatant violation of basic human rights and all norms of international law.

Moreover, given the stepped-up belligerence Israel has of late been displaying, the attack on Iraq's nuclear reactor and the air raids on Beirut being the latest demonstration of Mr Begin's brand of state terrorism, Tel Aviv could have hardly been expected to respond more positively to Prince Fahd's offer. But it is more important that the American Government should grasp the full implications of the Saudi Arabian plan and the potential it holds for bringing peace to the Middle East. Although the Reagan Administration has refused to change its policy vis-a-vis the PLO, it seems to be inclined to show an understanding of the fundamental importance of resolving the Arab-Israeli dispute. But the Camp David process to which the American Government has reverted holds no promise for a permanent settlement in this crisis-ridden region.

The urgent need for a new approach can hardly be overemphasised, and the Saudi plan offers just the opening that can initiate progress towards peace. Mr Philip Habib's success in arranging a cease-fire between the PLO and Israel, however tenuous it might be, speaks of the leverage Washington has with Tel Aviv. It should not be impossible for the US to prevail over its protege to open negotiations on the basis of the Fahd plan, rather than try to resuscitate the Camp David process which can never lead to a settlement of the Palestinian issue.

ITALIAN FIRM OFFERS TECHNOLOGY ON WOOD DEBARKING MACHINERY

Karachi MORNING NEWS in English 6 Aug 81 p 8

[Text] An Italian firm has expressed keen interest in the transfer of know-how for partial total production in Pakistan of their debarking machines, according to the Italian Embassy in Pakistan.

Potential machinery manufacturers in Pakistan have been advised to contact the Italian firm (Mundus-Officina Mecchanica Galliatese Galliate Italy) directly.

The firm has been manufacturing a full range of debarking machines. These machines can debark every type of wood and in different conditions.

During the first five-year cooperation, the sale of the debarkers manufactured in Pakistan will be effected in Pakistan only. After five years, the Pakistani partner can manufacture the whole machine in his country without payment of any royalty.--APP

DEVELOPING COAL PROCESSING INDUSTRY URGED

Karachi DAWN in English 9 Aug 81 p 5

[Article by Mohammad Nasir Khan]

[Text]

COAL is now considered as the main future source of energy supply in Pakistan. At the moment the largest share in the supply of energy is that of oil, the import of which is a very big drain on the country's meagre foreign exchange sources and amounts to over $1.5 billion a year.

Moreover, the oil prices have risen 5 to 6 times since 1973. The reserves of gas, which forms about 42 of the total energy supply, are rapidly depleting. Nuclear power supply is uncertain. Renewable energy sources such as solar, wind, tide and thermal are incapable of meeting more than a small proportion of energy needs and are not yet fully commercially exploited. Only coal is left and it holds the prospect of bearing the main source of energy supply.

Fruitful technology

Coal composed of carbon, hydrogen and oxygen is used for generation of electricity, steam power, for transportation and industrial uses, comfort heating, metallurgical processes, the firing of ceramic products, etc. It is carbonised to become coke, ammonia, coal tar, coal gases and benzol from which a big number of chemicals are derived. Fuel gases are produced by complete gasification of coal.

Carbon products are made by heat treatment. Relatively small amounts of coal are used direct for miscellaneous purposes such as fillers, pigments, foundry facings, and for water filteration. Almost any organic chemical can be produced from the products of coal carbonisation.

Coal produced in Pakistan is lignite to sub-bituminous, showing non-coking or weakly coking properties. These have low content of fixed carbon, high sulphur and ash and low to moderate calorific values.

Major coal fields are located at Pir Ismail Ziarat, Sore Raseg Deghari, Mach, Harvai, Sharigh, Khost and Duki in Baluchistan, Dandot, Ara, Kattia, Chamlol, Pir Jabanian, Makerwal in Punjab, and Metting, Jhimpir and Larkana in Sind. Recoverable reserves are estimated at 430 million tons.

A large quantity of coal reserves has been recently found near Thatta. The work is continuing to determine the size and quantity of this reserve. The present production of coal in Pakistan is estimated at 1.5 million tons a year. The following has been the production of coal during the last six years.

Year	Production
1974-75	1,295,000
1975-76	1,055,000
1976-77	1,400,000
1977-78	1,231,000
1978-79	1,387,000
1979-80	1,569,000

SOURCE: Statistics Division

A small quantity of coal was also imported. However, the import has jumped from 16,000 tons in 1977-78 to 600,000 tons in 1979-80. The import figures are given below:

IMPORTS

	(Tons)
1974-75	17,000
1975-76	13,000
1976-77	23,000
1977-78	16,000
1978-79	—
1979-80	600,000

SOURCE: Statistics Division

The sudden increase in the import may be on account of the Steel Mills.

The major consumption of local coal is in brick kilns. The use of coal for power generation, domestic and other purposes forms only 3 per cent of the total consumption.

According to knowledgeable persons the consumption of coal in Pakistan is higher than the above estimates at about 1.8 million tons in 1979-80. However, the growth rate of about 5 per cent during the last six years is almost negligible as compared to that of other sources of energy in the country. In fact the use of coal as a source of energy has dropped from 5.3 per cent in 1958 to 3.5 per cent in 1979-80 as a result of increased use of oil and gas. It is the third lowest after LPG (0.3 per cent) and nuclear energy (0.2 per cent).

Uses

Although the per capita consumption increased from 0.130 T.O.E. in 1975-76 to 0.157 T.O.E. in 1980-81 or at the rate of 5.5 per cent per annum, it is one of the lowest in the world. The world average is 1.000 T.O.E. To catch up with even some developing countries, we need a tremendous increase in the supply of our energy sources.

The reserves of coal far exceed the known resources of all other mineral fuels. It has again become the cheapest source of heat and power. April from conversion of coal to a clean and economical energy source, improvement in the coal technology has made it possible to make the best use of coal reserves which will now last very much longer due to the use of new coal technology.

The quality of coal has also improved through different processes. There have been some very impressive advances in boiler technology, combustion as well as method of coal and ash handling. It is now possible to operate in excess of 80% thermal efficiency and this makes coal firing both very economical and competitive.

Before use, coal is now graded, cut to different sizes, cleaned, washed and dried. The process of gasification and liquification have also made the use of coal more economical and convenient.

In Pakistan, there was no coal processing industry. A coal briquetting plant was first set up at Quetta to make use of waste or dust coal. Its average annual output is etimated at 10,000 tons a year. Last year a coal washing plant with a capacity of 75,000 tons/year was set up at Sharigh. It will meet a small part of Karachi Steel Mills requirement for coal.

Gasification

Sharigh is the only coal field in Pakistan where medium cooking coal is found. This coal is high in ash and sulphur contents, which make it unsuitable as raw feed in coke making. Therefore mechanical washing is needed before its use in the manufacture of coke. Karachi Steel Mills will blend the local coal with high grade imported coking coal. In this way about Rs. 52.00 million a year in foreign exchange are likely to be saved.

According to coal experts, the future demand for coal on the basis of conventional uses is estimated to increase at 8.15 per cent per annum from 1981 to 1990. This is quite significant when compared to the growth rate of 1.4 per cent during 1971-72 to 1978-79. But the coal must be increasingly used for power generation and processed into synthetic fuels i.e. gas fuels, liquid fuels and feedstock for chemicals and fertilizers.

The commercial production of fuels by gasification of coal is already being done in South Africa and Federal Republic of Germany. It can be started in Pakistan also, particularly underground gasification, by which large coal resources in steeply dipping seams, which are not economically recoverable by conventinal mining, can be used.

Similarly by the direct liquification method, coal can be used as fuel for tomorrow's car and firing boilers.

BRIEFS

FRG DEBT RELIEF--The Federal Republic of Germany is to provide Pakistan with a debt relief equivalent to $58.4 million under an agreement signed in Islamabad this morning. The debt relief related to a period of 18 months from the 15th of January this year to the 14th of July next year. The rescheduled debt will be paid in 20 years including a grace period of 10 years with an interest rate of 2.5 percent per annum. The debt relief has been extended in pursuance of the memorandum of understanding concluded with the aid to Pakistan consortium in Paris on the 14th of January this year. ENVOY TO KENYA--Islamabad, 7 Aug--The Government of Pakistan has announced the appointment of Mr N. A. Ashraf as ambassador of Pakistan to Kenya, says a press note issued by the Ministry of Foreign Affairs here today.--PPI[Text] [GF110543 Karachi DAWN in English 8 Aug 81 p 6 GF]

RELATIONS WITH INDIA--Islamabad, 10 Aug (APP)--The defense minister, Mir Ali Ahmed Talput, said here today that Pakistan was keen to build up its defense capability, but at the same time it wanted to have friendly relations with the neighboring states. Presiding over a special function on "Indian Military Buildup and Pakistan-U.S. Agreement," held at the Pakistan National Center this evening, he maintained it would be a wrong assessment that Pakistan had any aggressive designs in the context of obtaining arms and improving its military capability. He said this was also a fact that Pakistan was not unaware of the regional developments and could not ignore the current state of affairs in the region. The minister said that Pakistan had always made efforts to establish good neighborly relations with India. The minister said the largest steel mill in the country was installed with Soviet help. He maintained that another socialist country, China, had always excellent relations with Pakistan and had been helping this country in the time of need. He said that in the agreement reached with the U.S., there were no preconditions and the sovereignty of Pakistan had been kept in view at every step. [Excerpts] [GF131632 Karachi DAWN in English 11 Aug 81 pp 1, 10]

ILLICIT ARMS HAUL--A big illicit arms haul was made by the Mahmoodabad Police from a two-story house in Manzoor colony, informed sources said last night. According to details available, the illicit arms including Stenguns, revolvers, pistols and cartridges were found concealed in eight boxes. These sources stated that one Nisar Khan and two others have been detained in this connection, adding that the arms were "smuggled" on camel backs from Afghanistan and later shifted to Karachi for disposal. [GF131715 Karachi DAWN in English 10 Aug 81 p 1 GF]

PAKISTANI VISAS--Pakistan has liberalized visa facilities to Indian citizens and according to latest official information available in Islamabad, the Pakistan Embassy in New Delhi is currently issuing nearly 11,000 visas to Indians every month. Officials here said this was threefold increase in a span of about 3 years. Most of the visitors from India are muslims, they said. [Text] [Karachi DAWN in English 12 Aug 81 p 4 GF]

BALUCHISTAN HEALTH FACILITIES--Quetta, Aug 5--The Baluchistan Government is paying full attention to provide better health facilities in the rural areas of the province. For this purpose 32 basic health units and seven rural health centres have been completed during the last financial year at a cost of Rs 8.922 million. Moreover, adequate attention was being paid to the provision of medical facilities in the urban areas of the province. For this purpose more than 200 beds have been added to the different hospitals in the province. The work on the expansion of provincial Civil Hospital, Quetta, has been completed at a cost of about Rs four million. Various maternity and child health centres have been provided commodities worth Rs eight lakh under the World Food Programme in the province. Different hospitals and dispensaries in the province have also been supplied with supplemental equipment worth Rs. five lakh. In order to solve the residential accomodation problem of medical staff working in various parts of the province an amount of Rs 1.4 million has been spent on the construction of houses.--PPI [Text] [Karachi DAWN in English 6 Aug 81 p 6]

TRAFFIC TICKETS IN KARACHI--[Editorial] - Karachi traffic policemen have been given the authority to issue traffic tickets. Only the police sergeants have had this power until now. The situation has created new sources of income for the policemen. They don't bother buses, mini buses, taxis or motor scooters because most of those vehicles belong to members of the police force. To give them a ticket can mean trouble for the ticketing policemen. Instead, the newly-gained authority is being exercised entirely on the owners of private cars and motorcycles. They are threatened with a violation on the slightest excuse and made to pay money. According to reliable sources, the policemen were given ticket-issuing authority in order that they may be compensated for the loss of income on account of the removal of hawkers and vendors from the streets of Karachi. We want to draw the attention of the traffic authorities to this and demand that the situation be corrected. [Text] [Karachi JASARAT in Urdu 2 Jul 81 p 3] 9612

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

BRIEFS

BANGLADESH-PAKISTAN MILITARY TIES--Experts of Pakistan's army, navy and the armed forces have come to Bangladesh to train the Bangladesh armed forces. (The very same people used to be disguised as khan forces before and after the liberation war). After Zia's assassination, an agreement was reached between Bangladesh and Pakistan for providing training to the Bangladesh army in modern warfare, under which Pakistani military experts are to visit Bangladesh in phases. The Indian Government is concerned over Bangladesh's preparedness in connection with Purbasha. Calcutta's spokesmen, however, say that they are keeping watch over the situation. Purbasha and the so-called Farakka problem are being manipulated as an instrument for use in the electoral campaign. On the other hand, opposition parties in Bangladesh are condemning the presence of Pakistani troops in strong words. They say: Hundreds of thousands of people were killed by the Pakistani forces during the liberation war in 1971. The ruling party, by bringing them here again, is insulting the martyrs of the liberation war. Treat Pakistani missions abroad as during the Pakistan days--the Bangladesh Foreign Ministry has issued this directive to the Bangladesh diplomatic missions. Bangladesh Foreign Ministry Circular 34/58F of 10 July, signed by Bangladesh Foreign Secretary Matiur Rahman, says that Bangladesh diplomatic missions should keep in mind the relations which existed between east and west Pakistan during the Pakistan era until 1969 and treat the Pakistani missions accordingly. ROLE OF TAMILS IN SRI LANKA

BK190943 Hong Kong AFP in English 0630 GMT 19 Aug 81

[Text] New Delhi, 19 Aug (AFP)--Prime Minister Indira Gandhi's party newspaper today said that the attacks on the Indian origin Tamil community in Sri Lanka was a backlash of what the more militant among the Tamils, the Liberation Tigers, had done to vitiate the atmosphere.

"However, it would be wrong to entirely blame the Tamil population for the latest spate of violence...the majority Sinhalese have been mounting pressure to weaken the hold of educated and well settled Tamils in government service, education and business," the NATIONAL HERALD said in an editorial.

In 1956, the Tamils constituted 30 percent of the elite Ceylon administration service, while they formed 50 percent of the clerical government staff...by 1970 their share had been reduced to only 5 percent, the paper said.

In the armed forces, their share declined from 40 percent to 1 percent.

"The present government is, however, trying to change the situation. It has recognised Tamil as a national language...The new constitution also showed a degree of accommodation of Tamil interest, but the strong anti-Tamil lobby headed by the Buddhist clergy has continued to hold sway," the paper said.

The pro-Moscow newspaper PATRIOT said that the victims of the present spate of violence, in almost all cases, were the Tamils.

The paper said in an editorial that "several thousands of Tamils have been smoked out of their houses and relieved of their possessions and have been forced to seek refuge in other places."

According to official statistics available here there are over 550,000 stateless Tamils in the island country.

Till July this year 271,000 Tamils have been repatriated to India and 155,000 granted Sri Lankan citizenship under an agreement signed between the two countries in 1964.

It was decided in the agreement that by [word indistinct] cases of all the Tamils will be reviewed and given citizenship or repatriation order as the case might be.

PRESS TREATS PROBLEMS OF HINDU-MUSLIM MARRIAGES

Karachi DAWN in English 15 Jul 81 p 8

[Text] New Delhi, July 14: One aspect of secularism visualised and advocated by a section of Indian society is the promotion of marriages between Hindus and Muslims, particularly between Muslim girls and Hindu boys.

An Urdu daily, Al-Jamiat in its editorial on "Hindu-Muslim Marriages" on July 2, deplored that certain people in India have made inter-religion marriages as a symbol of secularism.

The paper said another contemporary paper has taken to task the entire Muslim community in its editorial "Maltreatment of dead body", of film actress Nargis at the time of her burial. Nargis in her lifetime had married a Hindu.

According to Islam, marriage between a Muslim--whether male or female--with a non-Muslim is forbidden. Al-Jamiat said, adding that the paper taking exception to the so-called maltreatment of the dead body of Nargis had formented communal riots resulting in one death some time past in Delhi when a Muslim, Sikander Bakht, had married a Hindu lady Raj Sharma. At that time the Hindu Mashasabha and Arya Samaj had made miserable the life of Muslims.

The daily Pratap in its editorial "Maltreatment of dead body" had said the brothers of Nargis had become blind at their Islamic frenzy". Nargis had become Hindu and she should have been allowed to live and die and cremated like a Hindu. Brothers of Nagis Dutt were reported to have had removed her "bindi" before her burial, according to her own wish.

The Delhi University students awarded a "national integration trophy" to a Muslim girl who turned Hindu and married a Hindu against the wishes of her family in Delhi last winter.--APP.

FORMER AUSTRALIAN PRIME MINISTER SUPPORTS INDONESIA ON EAST TIMOR

Jakarta KOMPAS in Indonesian 26 May 81 pp 1, 9

[Article: "Former Prime Minister Gough Whitlam:East Timor Clearly Part of Indonesia; In 1983 He Hopes It Will Be Dropped From UN General Assembly Agenda"]

[Text] On 25 May former Australian prime minister Gough Whitlam visited President Suharto at Istana Merdeka and held discussions for around 1 hour. Whitlam, however, was unwilling to explain what he discussed with President Suharto.

Whitlam arrived in Jakarta on 25 May on his return trip to Australia after visiting Africa for several days. "I have just come from Africa where I was guest of the Algerian Institute on International Affairs," he said.

Answering a reporter's question, Whitlam said that there are still problems in Australia as a result of the East Timor issue. This particularly related to the unfortunate incident when five Australian reporters were killed in East Timor 6 years ago. "As a result, Australian reporters, newspapers, radio and television are always putting out information against the Indonesian government," he said.

He added that even though at the beginning this was very worrisome to the Australian government, still in the end it was realized that it would be best to forget the incident. Whitlam said that he hopes that all countries in the world can understand that East Timor has clearly become a part of Indonesia. He said this when asked how much the attitude of Australian reporters has influenced the Australian government policy on friendly relations with Indonesia.

In addition he dosen't see any possibility that the East Timor issue will be discussed at length by the UN General Assembly. He hopes that in a short time, before the 1983 general elections in Australia that the East Timor issue will be dropped from the UN General Assembly's agenda.

After studying the tapes on the vote in the UN General Assembly, in addition to the Kampuchean question, Whitlam said the East Timor issue always appears every year because 2/3 of the African countries oppose Indonesia. Exactly 33 of 50 OAU [Organization of African Unity] members oppose Indonesia, Whitlam said.

"Fretilin propaganda was very effective at that time and at present there are still several African countries that continue holding the same attitudes as before. I

hope that African nations will acknowledge the actual situation as it is now."

Gough Whitlam believes that the greatest factor influencing the attitudes of several African countries is the fact that Fretilin received support from the Frelimo movement in Mozambique before and has the present support of five former Portuguese colonies in Africa. They are in agreement on the matter and have influenced other African countries to oppose Indonesia, Whitlam said.

According to the former Australian prime minister from the Labor Party, African countries who hold such attitudes believe that the Fretilin, like the Frelimo is struggling against Portugal. "But that isn't true," Whitlam said

What is true is that the Fretilin have taken the slogans and cries of the Frelimo. The Frelimo has for years fought in a struggle to drive the Portuguese out of Mozambique. But the Fretilin has never opposed the Portuguese in East Timor, he added.

In the civil war in East Timor, the Fretilin got weapons and ammunition from the Portuguese troops that later supported the Fretilin movement. Later the other group in East Timor came to Indonesia and asked for help. The situation in East Timor hasn't been understood well in Africa as it hasn't been understood in several circles in Australia, Whitlam added.

In Southeast Asia the countries opposing Indonesia on the East Timor question are Vietnam, Laos and PRC. There are also several Caribbean countries [opposed] because of the influence of Cuba, he added.

According to Whitlam, what Indonesia can do about the attitude of several African countries is to initiate contact with Tanzania because President Julius Nyerere is older and senior to the leaders of other African countries. In addition, Madagascar, one of the French speaking countries of Africa, has good relations with Indonesia, Whitlam said.

PROFESSOR HAMKA RESIGNS AS MUI GENERAL CHAIRMAN

Jakarta KOMPAS in Indonesian 23 May 81 pp 1, 12

[Article: "Professor Hamka Resigns As General Chairman of MUI"]

[Excerpts] On Tuesday 19 May 1981 Professor Dr Hamka (73 years old) resigned his position as general chairman of MUI (Indonesian Ulama [Moslem Scholars] Council). The announcement of the resignation was made by Professor Hamka at the daily meeting of the MUI at its new office at Istiqlal mosque in Jakarta on Tuesday 19 May. He sent a letter to Minister of Religion H. Alamsyah Ratuperwiranegara 2 days before this telling of his decision to resign.

Meeting with KOMPAS at his home on the morning of 22 May Hamka who is better known by his name Buya was unwilling to say much. But he did acknowledge that the decision to resign was related to the MUI fatwa [Moslem legal decision] concerning the participation of Moslems in Christmas celebrztions. "I am responsible for the circulation of that fatwa," he said.

On 7 March 1981 the MUI fatwa commission, one of seven commissions in the MUI, published its fatwa that prohibits Moslems from participating in Christmas celebrations. The fatwa was drawn up and decided on by the MUI fatwa commission together with religious experts from Moslem mass organizations and national Moslem institutions.

The fatwa however was only sent out in a limited fashion to ulama councils in the regions but wasn't distributed publically by the MUI. Apparently though it was published by one of the newspapers.

According to a KOMPAS source, the publication caused a reaction from the minister of religion. On 23 April there was a meeting between Minister of Religion H. Alamsyah Ratuperwiranegara and the MUI. At the meeting the minister of religion expressed his displeasure.

On 30 April a decision letter, No 139/1981 was issued by MUI revoking the circulation of the fatwa.

When Buya Hamka was asked about this on 22 May he said that what had been revoked by decision letter No 139/1981 was the circulation of the fatwa. "But the contents of the fatwa itself are still in effect. The legality of the fatwa contents is

totally unaffected by it," Hamka said.

He said that as general chairman of the MUI he had issued the revoking of the circulation of the fatwa. But as a Moslem and as a private citizen he has the right to speak out about the validity of the contents of the fatwa. He made this announcement in his own name and sent it out to various mass media. It was carried by a number of newspapers.

Concerning his resignation, Buya Hamka stressed he doesn't expect the MUI to stop. "There are those that say that the MUI can't go on without Hamka leading it. Don't say that. I don't want to be made into an individual cult. There are many who can replace me," said the famour ulama, literary figure and editor of the Moslem magazine PANJI MASYARAKAT.

"I am not confronting the government. I still support harmony between those having [different] religions, providing each safeguards its own religious tenets," he said.

On 21 May, 2 days after he indicated his resignation, MUI general chairman Hamka sent a letter to Minister of Religion H. Alamsyah Ratuperwiranegara.

The letter was very short, consisting of only three lines. According to a KOMPAS source Hamka restressed in the letter the attitude which he put forth in the meeting between the minister of religion and the MUI on 23 April. At the same time he also announced he had resigned as general chairman of the MUI. According to this source the 23 April meeting was "very heated".

Hamka (Haji Abdul Malik Karim Amrullah) was born in Sungai Batang, a beautiful village on the shore of Lake Maninjau in West Sumatra on 17 February 1908. His father Haji Rasul who was later better known as Dr Haji Abdulkarim Amrullah, was an important ulama in his day, the leader of the Sumatra Thawalib religious training center at Padangpanjang, West Sumatra.

Hamka himself became a Moslem preacher while young and went alone to fulfill his [religious] duty in making the pilgrimage to Mecca at the age of 19. He was introduced to the Moslem political movement by H.O.S.Cokroaminoto, R.M. Surjopranoto, Kibagus Hadikusumo and Haji Fakhruddin in Yogyakarta (1924) along with his brother-in-law Buya A.R. Sutan Mansjur at Pekalongan. When he was 20 (1928) he took part in Muhammadiyah [Moslem political party] congresses. At the same time his first composition, a novel called "Si Sabariah" was published for the first time as a book. At present he has written no less than 113 books.

When the MUI was formed in June 1975, Hamka was chosen as its first general chairman. In the MUI second national conference in Jakarta at the end of May 1980, he was reelected for the 1980-1985 period. By resigning now only 1 year of his second term has been served.

The MUI ruling board for 1980-1985 was led by a general chairman and seven chairmen. Those chairman are K.H.M. Syukri Ghozali, K.H. Hasan Basri, H.Sudirman, K.H.

E.Z. Muttaqien, K.H. Tarmudji, Drs H. Kafrawi MA andH.M. Sudjono. General secretary is H.A. Burhani Tjokrohandoko (director general of Moslem Bimas [section of the religious department handling Moslem affairs] and Haji arrangements. He is aided by three secretaries and three treasurers. There are also 36 members of the MUI ruling board.

In addition there is the advisory council headed by the Indonesian minister of religion and which has 23 members (including the minister of domestic affairs, the minister of education and culture and 21 ulama). MUI patrons are the President and the Vice President of Indonesia.

INDONESIAN GOVERNMENT RECRUITS MILITARY PILOTS

Jakarta KOMPAS in Indonesian 21 May 81 p 12

[Article: "Department of Defense And Security Issues Call For Applicant Pilots, Men And Women"]

[Text] The department of defense and security is giving the opportunity to young men and women who are Indonesian citizens to volunteer to become pilot officers in the Indonesian army, navy, airforce and police with a tenure of 10 years.

To recruit young pilots who have integrity and skill, ABRI [Indonesian armed forces] is using two methods, through education at the Akabri [Indonesian armed forces academy] and through ABRI's pilot officer program on short-term tenure (IDP).

For IDP of 10 years, the Indonesian airforce is in charge of accepting applications during May-July 1981 and has issued a call for Indonesian citizens who are SMA [highschool level] graduates who have majored in natural science or STM [middle level techical school] graduates who majored in engines, electricity and flying, aged between 18-22 to become ABRI pilots.

This registration does not rule out ABRI non-commissioned officers and enlisted men who meet the age requirement of not being over 24 years old.

The acceptance of ABRI pilot officers on IDP is a program of the department of defense and security whose implementation has been turned over to the airforce.

Training will last for 18 months, divided into four stages: basic military training, primary flight training, basic flight training and advanced flight training. After completion of the 18 months, they will be appointed as ABRI pilot officers with the rank of candidate officer (Capa). This will be followed by dimentional training carried out at the educational institutes of the various armed forces or police.

Same As For Akabri

The process of promotion in rank for the ABRI IDP pilot officers later will be the same as for the promotion of other ABRI officers. The rank of Capa to be received after being commissioned will only be held for 2 years, after which they will be promoted to Second lieutenant. So 4 years after beginning training,

graduates of ABRI's IDP pilot officers program will have the same rank as graduates of Akabri who began their training at the same time.

Later when the ABRI IDP pilot officers have completed their IDP enlistment term, they can continue their profession as pilots outside of ABRI.

INDONESIAN NAVAL SHIPYARD UNDERGOES UPGRADING

Jakarta KOMPAS in Indonesian 27 May 81 p 8

[Article: "PAL Upgrades Submarine Docks"]

[Excerpt] The largest government owned shipyard PAL (naval shipyard) Indonesia Ltd at Surabaya is now entering the stage of developing its work facilities to support ship maintenance. Work underway includes the upgrading of submarine docks along with the supply of electrical power, fresh and salt water for the new Indonesian navy submarine which will arrive in Surabaya shortly.

This report was given by PAL Indonesia Ltd's techinal staff officer Navy Lt Col (T) A.M. Sudaryadi to Minister of Research and Technology Professor Dr. B.J. Habibie.

Sudaryadi reported that the department of engines is carrying out upgrading of its engine testing workshop which is being readied to carry out tests on the engines of the new Indonesian navy MTU ships. Meanwhile the department of electronics is building a (new) electro-mechanical workshop, upgrading its sonar, radar workshop and its communication workshop to support maintenance of the principal new navy electronic equipment. At the same time, the department of weaponry is also busy, upgrading its heavy weapons workshop and its torpedo workshop. "All of this is expected to be complete by the end of 1981," said Navy Lt Col Sudaryadi.

Development of work facilities to support construction of new ships, especially fast ships, will consist mainly of an assembly hall, transfer system and a ship hoist. To implement such a large amount of work will involve at least 40 contractors who at the height of the work, will work at the same time with the costs of the work being 18 billion rupiahs. Commander of Surabaya's Ujung base Sudaryadi hopes that the Indonesian navy will allow its workers to work night and day.

Minister of Reaserch and Technology Habibie as general director of PAL Indonesia Ltd said that the shipyards will construct fast ships to be called "Bima Samodra". The ships will be able to carry 300 passengers with plans calling for a speed of 45 knots per hour or 80-85 kilometers per hour. According to Habibie, the ships will be for short distance service, for example Surabaya-Ujungpandang and Surabaya-Kalimantan. License to build the ships was obtained from the Boeing Airplane Co in the U.S.

For transportation of goods, PAL Indonesia Ltd will build motorized sailing ships weighing 1,500dwt and given the name "Maruta Jaya". Because ship construction must go along with the latest technological developments, PAL Ltd as the first naval shipyard must work closely with the Surabaya Institute of Technology and in particular with its department of shipbuilding techniques.

OIL INCOME WILL DECREASE, TIN STRATEGY TO BE DISCUSSED

Jakarta KOMPAS in Indonesian 30 May 81 pp 1, 12

[Article: "Minister Subroto Admits Petroleum Income Will Decrease in First Months After Production Reductions"]

[Excerpts] Income from petroleum will decrease in the first months after production reductions that were decided on by OPEC, according to information given by Minister of Mining Subroto on 29 May at the ASEAN [Association of South East Asian Nations] secretariat general building after he had attended the first plenary session of the 11th conference of ASEAN economic ministers.

The OPEC meeting in Geneva at the beginning of this week agreed that all OPEC members, except Saudi Arabia would reduce oil production by 10 percent of present levels beginning on 1 June. The assembly also fixed the base price for oil at a maximum of $36 a barrel and the meximum price (including premium price) at $41 per barrel. This doesn't include Saudi Arabia whose oil price continues at $32 a barrel.

In the first months of production reductions, the planned income from oil will automatically be affected,"Subroto said. "But in the succeeding months the reductions will in fact make possible for the oil market to become strong again."

At present Indonesia produces 1.64 million barrels a day and almost all of it is sold on long-term contract basis. In those contracts the volume to be delivered and the base price have been determines. This will create problems for Indonesia because of the binding of long-term contracts with Japan and the U.S. who buy most of Indonesia's oil.

Indonesia has agreed to the OPEC production reduction, he said. But how much of the reduction will be implemented will still need to be studied, Subroto added.

Concerning tin, Subroto said that the ASEAN economic ministers had agreed to the recommendation that was drafted by the ASEAN ministerial level conference handling the mining of tin that was held in Kuala Lumpur some time ago.

ASEAN is now attempting to draft a unified strategy in preparation for the International Tin Council (ITC) conference to be held in Geneva 9-26 June. Three ASEAN countries-Indonesia, Malaysia and Thailand-are producers and exporters of tin. The international tin market is weak at present, especially as a result of the intention of the U.S. to release into the market a part of its strategic tin reserves.

Special U.S. representative, Ambassador Michael Smith visited Jakarta, Kuala Lumpur and Bangkok in May to exchange thoughts towards drafting a 6th international tin agreement (ITA) .

At the Geneva conference the main problems will be to determine the amount of the support reserves, methods of payments and the beginning time for supervision of purchases for the tine reserves.

The U.S. as the largest tine consumer wants a support reserve of 70,000 tons to be set up which would be paid for by all members of the ITC that take part in the ITA. But ASEAN opposes this because the funds needed are too large and would be better used for construction. In the end the U.S. has agreed on 50,000 tons.

Concerning financing the reserves there is still a difference of opinion. The U.S. originally wanted 30,000 tons of the support reserve to be paid for by forced contributions from ASEAN members. ASEAN objects, proposing only 20,000 tons. (To purchase 1,000 tons of tin would require around $14.84 million). The remainder would be paid for by the Tin Reserves Management Board, a part of ITC.

A third difference is on the beginning time for supervising the exports of tin purchased for the reserves. The U.S. wants the supervision to begin when the reserves reach 40,000 tons. ASEAN and other producing countries want it to begin at 35,000 tons.

According to Subroto, the U.S. traveling delegation, headed by Ambassador Michael Smith in Jakarta, told Indonesia that the U.S. was prepared to consider ASEAN attitudes and would go to Geneva with an open mind to draft the sections of the 6th ITA.

Vice President Adam Malik has already met with U.S. Vice President George Bush in Washington to deliver our concerns over the delay in making progress in drafting the 6th ITA,"Subroto said. He added that all ASEAN ambassadors in every tine consumer country have already made contacts and held consultations with their respective governments.

INDONESIAN FOOD PRODUCTION EXPECTED HIGHER IN 1981

Jakarta KOMPAS in Indonesian 22 May 81 pp 1, 9

[Article: "It Is Estimated 1981 Rice Production Will Be Higher Than in 1980"]

[Text] It is estimated that the increase in domestic rice production in 1981 will be higher than in 1980. This will be achieved as a result of more intensive efforts to increase rice production both in and outside of Java.

Vice Minister in charge of Food Production Engineer Achmad Affandi said this during a press conference at his residence on 21 May 1981.

But the vice minister was unwilling to estimate what percentage the rice production increase would be in 1981. "Because only 45 percent of the present harvest has been brought in," he said.

Rice production for 1980 reached a record and according to the central bureau of statistics the figure was 19,989 million tons. This production figure was up around 11.67 percent over the rice production figure for 1979.

Vice Minister Affandi didn't explain what he meant by a higher increased production in 1981. If he meant the percentage of increase was larger than 1980, this means it would have to be higher than 11.67 percent. So this would mean that the estimate for 1981 domestic rice production would reach more than 22.32 million tons.

If he meant that the volume of the increase in production will be higher, this means more than 2.09 million tons. So it would be estimated that 1981 domestic rice production would reach 22.07 million tons.

Happy But Difficult

The main goal in increasing domestic food production (rice) is to realize a program of self sufficiency. Even so, it is still difficult to predict when Indonesia will actually reach self sufficiency in food, because increases in foodstuffs, particularly rice, are always accompanied by increases in domestic rice consumption that are difficult to control or guide.

In addition, according to Vice Minister Affandi, efforts to increase domestic rice production have also created a variety of other problems that are rather serious. For example, the use of fertilizers has increased sharply. And to a

large measure this production necessity is still imported. As an example, use of TSP fertilizer and the use of pesticided increased in 1980 by 60 percent and 51 percent respectively over 1979.

Other factors that must be faced as a result of increased rice production are problems of transportation and storage. In fact the Logistics Board is having a time getting on top of the production of foodstuff as the volume continues to swell.

Another thing that must be considered after the production of rice increases to rather high levels in 1980-1981 is how to handle the follow-up so that production doesn't decrease again in the future. He said this can't be handled permanently by the government or by national officials.

Regional governments must prepare to carry this out by themselves so that rice production won't decrease again and in fact will encrease each year. "The principle is that each region must be able to meet its own needs for rice," Vice Minister Affandi said.

According to the minister, after succeeding in increasing rice production, the government is now planning for the next 2-3 years to increase the production of secondary crops. He explained that in the past it has not been possible to increase the production of secondary crops as fast as rice. Still the government has set basic prices to stimulate increased production of secondary crops by farmers.

This, he said, has floundered because one problem hasn't been solved, namely that of storage (preservation) of seeds. Up to now, a technique hasn't been found to store secondary crop seeds in a way that is good, proper and easy. But if secondary crop seeds aren't stored properly, their ability to sprout decreases drastically in a short time (around 2 months).

In addition to the problems of storage and preservation, the problems of packing and transporting of secondary crop seeds hasn't been solved properly. "If the seeds are stored in the city, the result is that transportation to the producing areas is difficult. On the other hand if the storage is carried out around the producing areas the protection factor is difficult to handle," Vice Minister Affandi said.

Even so, during 1981 the government is carrying out special intensive planting of corn on more than 7 million hectares in 9 provinces. The massive planting of quick-maturation soybeans (around 50 days) will be carried out beginning in 1983. At present a pioneer project is underway for producing various kinds of quick-maturation soybean seeds in the Karawant area (West Java) with projected production being around 1.5 tons per hectare. The national average of soybean production has only reached).8 tons per hectare, according toVice Minister Affandi.

FIRST INDONESIAN CONTAINER TERMINAL OPENED AT TANJUNGPRIOK

Jakarta KOMPAS in Indonesian 20 May 81 pp 1, 9

[Article: "First Container Terminal in Indonesia"]

[Excerpts] Plans now call for President Suharto to officially open operations of the first UTC (terminal container unit) in Indonesia on 20 May. The site is located on Pier III East at Tanjungpriok.

Construction of the UTC at Tanjungpriok began early in 1974 through the initiative of three men working together.(These are Haryono Nimpuno as director general of Perla [sea communications], Pongky Supardjo as chief of harbor operations for the third district andJ.E. Habibie as Tanjungpriok port administrator.

The reason why the UTC was constructed at the port of Tanjungpriok is that as the national economic gateway it was greatly conjested at that time. Thousands and even millions of tons of goods were just piled up in any old way all over the place without any supervision.

Haryono Nimpuno who was serving as director general of Perla when the first stakes were placed for construction of the UTC once told KOMPAS that in the next 10 years the world of sea transportation will change from using conventional to container systems.

In 1974 the number of containers handled at the port of Tanjungpriok was only in the hundreds but 7 years later in 1980 that total had increased by several hundred percent, up to 87,110 units. And in 1981 it is certain that the number at a very mimimum will reach 120,000 units.

As a description of the first UTC in Indonesia, the area needed (not including the warehouses and storage areas) will be around six hectares,located at pier III East at Tanjungpriok. This area was swampland before.

The total length of the pier is 920 meters divided into two parts. Some 400 meters will be to load/unload containers while 520 meters will be for conventional loading/unloading. For open storage, especially for containers, an area of 20,000 square meters has been set aside while container freight station warehouses will account for 5,400 square meters. The average depth of the channel is 11.5 meters at low tide.

In the midst of the pier two giant cranes are located, each capable of lifting 50 tons. These giant cranes were made by Sumitomo/Mitsubishi of Japan. The Indonesian government purchased them at a cost of $4.2 million. The dead weight of each crane is 12,000 tons.

The two cranes were pulled by two tugs from the plant in Japan. hey arrived in Indonesia on 10 July 1977 and were immediately set up on the container pier, construction of which had already been completed.

IRANIAN REVOLUTION SEEN ENTERING NEW PHASE

Karachi DAWN in English 5 Aug 81 p 9

[Editorial: "Testing Time for IRP"]

[Text] WITH the appointment of Hojjatol Islam Javad Bahonar, the leader of the Islamic Republican Party, as the new Prime Minister of Iran, the revolution in the country has entered a new phase. Now that the clergy is in full control of the State apparatus and the governmental set-up has been rid of all internal dissent, the people of Iran will understandably expect leadership to achieve positive results in the way of political and economic reconstruction. The process of consolidation of the revolution should have been started over a year ago when the country was supposedly given a political direction with the introduction of the Islamic constitution. But unfortunately the power struggle between the clergy-dominated IRP and the moderate liberal forces led by ex-President Banisadr prevented the Government from taking effective policy decisions even on major issues, let alone matters affecting the day-to-day running of the administration. With the liberals having lost in the power struggle, the IRP is now in a position to assert itself and act effectively in putting its ideas into effect. This capacity it has adequately demonstrated in matters of appointment of office-bearers, a task which had assumed difficult dimensions and had been inordinately delayed last year when Mr Banisadr and the majority party in the Majlis found it almost impossible to agree on a common nominee for any government post. Thus, Iran had no Foreign Minister for a long time since no candidate could win the approval of the competing political forces in power. No longer hampered by such political and constitutional constraints, the clergy has acted decisively even under great pressures. Thus, following Mr Banisadr's dismissal, a triumvirate was immediately set up to assume the duties of the President. Similarly, after the catastrophic blast in the IRP headquarters which resulted in the death of Ayatollah Beheshti, the new IRP chief was appointed within three days.

The Presidential election was held just five weeks after Mr Banisadr's ouster. The new Prime Minister has also been named without delay and a Cabinet is expected to be announced shortly.

The IRP's skill in statecraft will, however, be put to a real test when it comes to coping with issues such as the economy, foreign policy and, above all, law and order. The restoration of political normality is another major challenge the IRP leadership faces today. So far it has resorted to the simplistic method of cracking down hard on its political opponents and dissidents. Summary trials and executions of the kind being carried out in Iran today will only help to drive all opposition underground and make the task of governing the country all the more difficult. It is now evident that there are forces which do not agree with the style and methods of the ruling clerics. These forces, such as the leftists, the ethnic minorities and the modernist moderates played an equally important role in the revolution that brought down the old corrupt order. In many ways these elements have important political affinities with the religious leaders. Many of them, such as

the Mujahideen-i-Khalq and the liberal followers of Banisadr stand for an Islamic order and nearly all of them are anti-imperialist in outlook. But their impact on Iranian politics has been negligible for they stand sharply divided. The ruling party, which is now strongly entrenched in power, should find itself in a position to discard the politics of confrontation and seek to rule by consensus of all the elements which took part in the making of the revolution. Without some degree of tolerance of dissent it will be impossible for the Government to evolve an institutionalised system for the articulation of disparate political opinions and for the resolution of political conflicts. Any further fragmentation of the post-revolution political society risks inviting anarchy.

REPORTER VISITS 'TERRORIST ORGANIZATION' OFFICE

GF171142 Karachi JANG in Urdu 14 Aug 81 p 1

[Excerpts] The terrorists of the al-Zulfiqar Organization are involved in various antinational activities. Reports on them appear occasionally in various foreign newspapers. INDIA TODAY magazine has shed light on the training members of this terrorist organization receive and has also revealed information about their activities.

The al-Zulfiqar Organization has acquired American M-16's, Russian AK-47's, British sten guns and antitank missiles. They have also started collecting donations from sympathetic Pakistanis living overseas.

The magazine has written about the al-Zulfiqar training center. According to its report, near Kabul's fashionable market center of Shahr-e Naw is an exclusive residential area known as Wazir Akbar Khan, where diplomats and UN officials reside. In this area there is a white house situated between two embassies. Its door is painted green, and it has no name plate. Strange persons carrying guns and pistols and wearing cartridge belts come and go through this door. Very few Kabul residents know that this is the al-Zulfiqar office. The office is directed by Murtaza and Shahnawaz Bhutto. [Sons of late Pakistani President Zulfiqar Ali Bhutto]

When INDIA TODAY reporter Ashok Reena arrived at the house, the door was opened by an Afghan, who asked the reporter, "What al-Zulfiqar? Which Bhutto brothers?" Then a glass door opened and a young man armed with a kalashnikov walked out. This was 23-year-old Shahnawaz Bhutto. A few months ago he was wearing a Castro beard, but now he was cleanshaven. Instead of a military uniform, he was wearing a shirt and jeans. Shahnawaz took the reporter to a room and ordered some coffee. On the walls were pictures of two Muslim heads of state and another of a well-known head of a Muslim organization. Whenever people are in the room having a conversation, the radio is turned on full volume. A savage Alsatian dog guards the premises at night.

Ashok Reena talked with his host for 1 hour. Murtaza said the members of his organization are sympathetic toward the Soviet Union and Afghanistan. He said it remains to be seen how long Pakistan can survive under the present conditions.

PAKISTAN'S POPULATION INCREASE, CONTROL DISCUSSED

Lahore VIEWPOINT in English 6 Aug 81 pp 5-6

[T ct] EVEN IF the latest Census presents a correct picture of Pakistan's population increase since 1972, and the estimates are not unduly modest as some observers believe, it provides cause for concern bordering on alarm. The annual growth rate of nearly three per cent—about the largest in today's population-conscious world—has brought our population up to 83.7 million, registering a frightening rise of 18.4 million in the last nine years and 51.2 million (in West Pakistan) since 1947. At the same time, the process of urbanisation continues unchecked. The ratio of urban population has risen to 28 per cent, from 25 per cent in 1972; and many of our bigger towns are bursting at the seams, no longer capable of providing their citizens with such elementary amenities as drinking water, clean air, drainage, adequate housing, schooling or other essential requirements that make life livable in decent comfort. The wide range of socio-economic problems attendant on this uncontrolled and seemingly uncontrollable increase in the country's population will become clearer when the full Census Report has been published and can be examined in detail; but it is perfectly obvious that our planners will have to work harder and think more realistically to be able to cope with the consequences of what may be termed as a chronic population explosion.

The mere fact that Pakistan still has a lower density of population than many other Asian countries, that its land, water and a variety of other rich resources are still not fully utilised, and that its potential for development offers far better opportunities, does not, however, provide cause for any smug satisfaction. These prospects and untapped resources have been with us over the years, but the effort to harness them and acclerate the pace of progress has always been tardy; therefore, population growth has steadily outstripped economic growth. It is true, of course, that by lowering the poverty line substantially and improving living conditions, particularly in regard to education and health, an effective incentive would be provided for voluntary population control, but so far little has been achieved in this direction. As a result, Pakistan remains a full and almost equal partner in the pattern prevailing in the non-oil Third World countries—representing high fertility, low agricultural and industrial progress, and a decreasing per capita GNP. This condemns the peoples of this region to worsening poverty and multiplying disease, pushing larger numbers below the poverty line. Among other reasons, its pauperisation is due to the Third World's inability to force the world to revamp the exploitative world economic order.

While the bigger problems must be re-examined and a new development strategy evolved so that Pakistan can begin to approach its goal of creating a progressive egalitarian society, the problem that needs to be dealt with most urgently is that of controlling its population expansion. Most experts had hoped that the last decade would register an annual population growth nearer to two than three per cent. Among other factors, this indicates a total failure of the population planning effort. Recently, the problem seems to have been moved to a different plane; instead of the population planning programme, which had been in operation for the last two decades or more, a population welfare plan has been launched. The new plan aims at raising the standard of living of the masses, so that the improvement in living standards can—hopefully — help reduce the birth rate from an estimated 41 per thousand to 37.5 per thousand over the three-year plan period. Details of the new plan have not yet been made available, but it is confidently expected that the "core" programme, which will be supplemented by the effort of each provincial government, will help raise the level of "effective knowledge" from 33 per cent to 55 per cent by 1984, and raise the level of current practice from an estimated 12.5 per cent to 25 per cent at the end of three years.

It seems that, dismayed by past failures or because of the administration's inability to deal directly with the problem of birth control, the funds allocated to the task have been diverted to the family welfare plan. Whatever the motivations for the change in the pattern, one would like to hope that it will obtain better results than past efforts in this field. It is true, of course, that population growth is always greater among sections that are illiterate and labour under a greater sense of insecurity; but the problem is becoming increasingly urgent and it is doubtful if a country like Pakistan can wait until poverty and illiteracy have been banished for better results in population management. It is an incontrovertible fact that even among the poorest sections of our people it is increasingly realised that they just cannot afford to raise large families. What they suffer from is lack of access to facilities that would help them to check unwanted births. Therefore, while the welfare plan may well have a long-term utility, if short-term results are to be achieved a realistic population planning programme must be organised to go hand in hand with the welfare programme. Unless this is done, one fears that the welfare programme itself, like many of our other plans, will be swamped by the steady increase in the country's population growth which may give us a population of more than 150 million by the end of this century.

The Afghan Problem

AFTER an inexplicable and unexplained break of almost four months, the U.N. Secretary-General's Special Representative on Afghanistan has resumed his snail-like move towards finding a political solution to the Afghan crisis. Mr. Javier Perez de Cuellar has, of course, had to cope with personal problems, in that he is no longer U.N. Under-Secretary-General for Political Affairs and has been appointed Peru's Ambassador to Brazil; but it was agreed on all sides that he should carry out this important mission even though he no longer holds a U.N. post. Perhaps, the more important reason for the delay was the half-baked EEC proposal for an international conference* on Afghanistan. The U.N. Secretary-General probably considered it polite to give Lord Carrington all the time he needed to play out his hand. Not unexpectedly, the EEC initiative failed to get off the

ground, mainly because of one basic flaw, namely, that it sought to keep the Afghan Government out of the first stage of the negotiations, which were to be conducted among the five permanent Security Council members and three other countries, while in the second stage the Afghan regime was to be invited as one party among "the representatives of Afghanistan." After some initial hesitation, the plan was rejected outright by both Kabul and Moscow whose Foreign Ministers characterised it as being "unrealistic and unacceptable."

Be that as it may, it is most gratifying that another effort is now being made to carry out the mandate given by the U.N. General Assembly, and endorsed by the OIC, for beginning earnest negotiations between Afghanistan, on the one hand, and Pakistan and Iran on the other, under U.N. auspices and in the presence of the Secretary-General or his special envoy, in order to explore the possibility of a political settlement that would bring peace to Afghanistan and pave the way for the withdrawal of Soviet troops. When Mr. Perez de Cuellar made his last trip to the conflict-stricken area, he visited Pakistan and Afghanistan and had detailed discussions with the two Governments. He was, however, unable to make any headway with Iran, not only because the country was, as it still is, engaged in a war with Iraq, but—apart from the fact that it had then not appointed a Foreign Minister—because its Government seemed unwilling to abide by the U.N. and OIC directives and enter into negotiations to settle the dispute arising from the situation in Afghanistan. After his talks in Islamabad and Kabul, the U.N. Representative had expressed confidence about the success of his undertaking because he found the attitude in both capitals to be "helpful and co-operative" although he was, understandably, disappointed over the lack of response from Tehran. At the same time, it was seen that whereas Iran was reluctant to enter into tripartite or any form of negotiations, Pakistan considered itself bound by the relevant resolutions and was unwilling to enter into bilateral talks with Afghanistan. The situation remains unchanged. Since there is no early prospect of the Iranian Government finding the time to give its attention to the Afghan problem, the question of starting tripartite negotiations does not arise. And if Pakistan adheres to its stand of not beginning any talks without Iran, the U.N. mission is likely to be stalled once again.

In the meantime, the situation inside Afghanistan has shown no real change. While the Afghan Government has announced the creation of a Fatherland Front, which is intended to be a first step towards establishment of a Loi Jirga, and it has repeatedly announced a total amnesty intended to induce Afghan refugees to return to their homeland, the fighting continues. Although it is not possible to gauge the extent or the results
the London 'Sunday Times,' by no means sympathetic to the Afghan regime, has in a recent article, authored by a representative who spent a fortnight in Afghanistan, made out that most Western reports, based on diplomatic revelations or travellers' tales, are grossly exaggerated, this does not take away from the urgency of finding an early solution. The Kabul regime's spokesmen have on more than one occasion reiterated their willingness to negotiate with Afghanistan's neighbours within the framework laid down by the United Nations.

What is to be done to overcome this exceedingly complicated and dangerous situation? Obviously, because of the extensive and wide open border between Afghanistan and Pakistan, the interests of these two countries demand that the situation should be normalised

as soon as possible. Therefore, the stalemate created by Iran's refusal to join in any negotiations on the subject of Afghanistan must be broken. And if, towards this end, it is considered necessary to ask for amendments in the relevant U.N. or OIC resolutions, this should be done without further delay. Whether Iran is otherwise too busy or does not attach sufficient importance to the Afghan problem, its unwillingness to act in the matter cannot be allowed to hold up further proceedings in regard to arriving at a political settlement. We would suggest, therefore, that Pakistan should take another initiative on the international level; and if Iran will not give up its present stand, Pakistan should obtain approval for starting bilateral negotiations under U.N. auspices. Pakistan has the biggest stake in settling the Afghan crisis, not only because it bears the heaviest burden in giving aid and succour to the Afghan refugees—whose continued presence is becoming irksome—, but also because normalisation will bring it the highest gains,

FUNDS FOR ECONOMIC UPLIFT IN BALUCHISTAN

Karachi DAWN in English 5 Aug 81 p 4

[Text] QUETTA, Aug 4: The Federal Agencies in Baluchistan are spending Rs. 1000 million on implementation of projects in about 10 sectors of the national economy for creation of infrastructure facilities conducive to economic development.

These include construction of important roads, establishment of grid stations and transmission lines, flood restoration works, supply of natural gas and exploration of mineral resources.

Other main projects include development of fisheries resources and construction of fish harbour at Gwadur, construction of Bolan Medical College at Quetta and setting up a cadet college and textile mills at Mastung.

The emphasis is on the supply of electricity and natural gas to Quetta. WAPDA has been allocated over Rs. 80 million for implementation of diesel generation project and Coal fire mining power plants in Baluchistan besides Rs. 56 million have been allocated to WAPDA for completion of remaining work of Hub Dam including the construction of 37 kilometres long Lasbela Canal to water to over 21,000 acres of lands giving great boost acres of lands giving great boost to agriculture in the area.

Top most attention is being paid to the projects envisaging extension of natural gas to Quetta from the point near Shikarpur in Sind. Three hundred and forty two million rupees have been allocated during the current financial year for implementation of this project.

HEALTH UNITS

The Baluchistan Government is paying full attention to provide better health facilities in the rural areas of the province.

For this purpose 32 basic health units and seven rural health centres have been completed during the last financial year at a cost of Rs. 8.922 million. Moreover, adequate attention was paid towards the development of medical facilities in the urban areas of the province. For this purpose more than 200 beds have been added to the different hospitals in the province.

The work on the expansion of provincial Civil Hospital Quetta has been completed at a cost of about Rs. four million.

Various maternity and child health centres have been provided commodities worth Rs. 8,00,000 under World Food Programme in the province. Different hospitals and dispensaries in the province have also been supplied with supplemental equipment worth Rs. 5,00,000.

In order to solve the residential accommodation problem of medical staff working in various parts of the province an amount of Rs. 1.4 million have been spent for the construction of residential accommodation.—PPL

SPECIFIC PROPOSALS GIVEN FOR REDUCING FRAUD, THEFT IN BANKING INDUSTRY

Lahore CHATAN in Urdu Vol 34, No 19 11 May 81 pp 20-21, 40

[Article: "Need for an Effective Plan of Action"]

[Text] A fugitive, accused of the fraud of 30 million rupees in a Gujrat bank, has been apprehended.

A fraud of 480,000 rupees has been discovered.

There is a fraud of hundreds of thousands of rupees in a bank in Hafiz Abad.

Ever since major newspapers flashed the news of misappropriations to the tune of millions in our national banks, we have come to regard it as a national tragedy. Prior to this, the swindle of jewelry in a Lahore bank is still fresh in the minds of the people, and they are impatiently awaiting the results of the investigation into that incident. News of swindles, thefts and robberies arrives every day from banks in small and large cities.

Earlier, the game that the Finance Corporation played with people's money and their trust resulted in the loss of the lifetime earnings of hundreds of thousands of people.

No effective plan of action has been formulated so far to control the increasing tendency toward fraud and theft in our national financial institutions. Nor has punishment that might serve as an example to others been meted out to the guilty.

Thefts are being committed in a variety of ways these days. For instance, the stealing of money through forged checks has become quite common. People making off with somebody else's remittances or withdrawing somebody else's money through forged signatures has become a common phenomenon. Such episodes are taking place when modern technology, especially computers, is being used to control the activities of banks at various levels. Now the question arises as to why this increasing tendency towards dishonesty, despite heavy expenditure and effort, has not been stemmed.

More than 10 years ago the banking system underwent an unprecedented expansion. Events that unfolded after the nationalization of banks during the Bhutto regime can be summarized as follows:

Prior to the nationalization of banks, the way the Banking Control Department and the Inspection Department of the State Bank controlled the activities of the banks was very effective. Consequently, the banks and their personnel remained on their best behavior and reports of any misdeeds were very rare.

Bhutto wanted to grind his own political ax, but as long as the State Bank of Pakistan existed as an independent institution, he would have been unable to do so. Therefore, he promulgated the Pakistan Banking Notice and organized the Banking Council. The apparent function of the Banking Council was to promote coordination between the State Bank and the national banks, but in effect the activities of the national banks now began to be haphazardly controlled by the State Bank and the Banking Council. The banks now became doubly answerable to both the State Bank and the Banking Council. As a consequcence of this duplicity and two-sided policy, the whole structure suffered disorganization and the administrative control of the State Bank over the national banks began to disintegrate.

During the Bhutto regime, the expansion of banks took place on political grounds. There was such a haphazard opening of branches in every village and hamlet that their administrative efficiency was affected. During this period, many political appointments in the banking system were made on the basis of political recommendations. Consequently, very few able people could enter financial institutions. Because of the increase in the number of branches, many young and inexperienced people were appointed as managers who had overnight fallen victims to greed and luxurious living. Their life beyond their means led them to making money through unfair means.

The interference by the unions has also impaired the banking structure to a great extent. After the nationalization, the spirit of service diminished in the banking industry. Bank employees regard their work as "government work," and being under union protection, they often shirk from work. This is a serious problem, especially since most of the time of the government is spent in dealing with union demands.

Because of a big fraud in the Domestic Finance Corporation, and because justice has not been meted out fully to the culprits, dishonest employees of the banks have been emboldened. Even when the culprits have been apprehended, the government has been slow to hand out justice, and the investigation has not been carried out at all levels, even when initiated by the government.

Absence of the fear of God and an artificial life full of pomp have caused the banks to be confronted with such a situation. Many of our national banks have faced this situation very courageously. Their resources have been greatly affected because of the opening of innumerable branches of foreign banks. In spite of this, our banks are rendering valuable service. But there is an unavoidable need for the eradication of fraud. The matter needs to be considered at the national level soon. The following are some suggestions for the people in power:

To make the organization of the State Bank more effective, the need for the existence of the Pakistan Banking Council should be reviewed. Since it creates a situation of "dual control," we recommend that it be terminated.

To establish a better liaison with the State Bank, the number of members appointed by the State Bank to the boards of the national banks should be increased. This policy, in addition to establishing better relations between the two, will provide better representation of the State Bank in certain branches of the National Bank.

Experience shows that the impartial investigation of its accused personnel cannot be done by the bank itself. Personal likes and dislikes for certain individuals may influence judgment. Union intervention may affect the evidence and influence the witnesses. Therefore, it is advisable to employ the services of former or retired bankers who would report their findings directly to the management of the bank concerned.

As the Banking Judge is appointed to recover bank money, similarly, at every district headquarters, banking courts should be set up. These courts should be manned by former bankers. They would act not only as effective and impartial judges, but their very existence would curb unfair banking practices.

Experience and integrity should be the prerequisite in the appointment of branch managers. A minimum of 10 years experience should be required.

Reputation and family background of the people to be appointed as managers and treasurers should be considered in any case.

The number of branch offices in small communities should be curtailed proportionately.

There should be a constant vigil on bank activities.

For accounts that become dormant for a period of up to 3 months, confirmation should be done on a zonal, regional and circle level. It should not be done at the branch level.

Surprise inspection of the branches before 9 am for cash on hand and mortgage goods in the warehouses should be strictly enforced. Inspectors should be changed periodically.

The appointment of personnel in the external banks by the State Bank may no longer be necessary.

The banking service should be declared an "essential service" according to the martial law and be purged of unionism.

The obtaining of a "No Objection Certificate" from the head office on the part of high-ranking bank officials should be made mandatory for travel abroad.

In addition, we suggest that the decision-makers of the State Bank and the national banks get together and find solutions to the malpractices so that our national banking industry will not suffer.

POSSIBILITIES OF GROWING COTTON IN BALUCHISTAN DISCUSSED

Karachi DAWN in English 11 Aug 81 p 7

[Editorial: "Cotton or Maize?"]

[Text] THE Pakistan Central Cotton Committee is currently looking into the possibilities of growing cotton in Baluchistan, in which both the provincial and central governments are interested. The main reason for this interest is the fact that availability of land for sowing cotton elsewhere is shrinking and, in fact, certain major cotton growing areas have reported that increasing salinity and waterlogging have eroded land under the crop. Attention has, therefore, been turned towards Baluchistan which has an enormous area lying barren — there just isn't any water for agricultural purposes. Even the much-vaunted Hub Dam has been a never ending project. Despite this, the PCCC is already experimenting with different varieties of cotton, presumably in areas where there is a fair prospect of water for cultivation purposes.

Although this concern for the cotton crop is laudable, it does appear to be somewhat at variance with the needs of the province. Baluchistan is a food deficit area, though it produces fruit and vegetables in abundance. In the circumstances it might be more logical to give greater heed to growing more food crops in Baluchistan, rather than cash crops like cotton. Wherever water in sufficient quantities is available the first attempt should be to put in food crops and only after a large quantity in relation to the province's needs is being produced should thought be given to cash crops. In this connection it would be pertinent to point out that food crops most suitable for the Baluchistan environment — those giving maximum output for a given amount of water should be chosen. On the face of it this may appear axiomatic, but unfortunately in practice this is not always the case.

Although only intensive research can determine the best crops for Baluchistan — and other arid areas also incidentally — one crop that has a strong claim is maize. A hardy crop which can withstand a wide range of climates and needs modest quantities of water, it has been for some reason ignored in this country. The fact that people are not fond of maize flour is only part of the reason, for there are several other profitable uses for it. In the first place tastes can be changed, if in no other way than by blending maize and wheat flour in suitable proportions. Apart from consumption in this form maize is also a very useful oilseed, so that increased production can help reduce the edible oil crisis. Then there is always the possibility of export, of course. While examining the question of planting maize over large areas in Baluchistan, its prospects in the rest of the country should also be considered. At the moment NWFP and Punjab grow almost all the maize in the country, with Sind producing some: the total in 1978-79 was about 800,000 tonnes. This can be increased significantly, without disturbing the present crop pattern, by planting on marginal lands or bringing in arid lands such as in Baluchistan under cultivation. NWFP had recently announced the intention of setting up a Maize Board, but what is really needed is an agency of this nature for the entire country, because the food value and commercial importance of this crop and the potential present in the country merits it.

RISE IN POULTRY, MILK, MEAT PRODUCTION

Karachi DAWN in English 11 Aug 81 p 4

[Text] ISLAMABAD, Aug 10: Significant rise has been registered in the production of milk, meat and poultry, it was officially stated here yesterday.

Total milk production in the country has increased from 7.758 million tons in 1972 to 9.014 million tons in 1980 showing an increase of 2.09 per cent which indicates that per capita availability of 90 litres of milk per year in Pakistan is among the highest in the regional countries. By comparison the per capita availability in India is only 39.4 litres per year. The recommended quantity of milk per person per day by WHO/FAO is 250 GMS or 91.25 litres per person per year, and this is close to our present day per capita availability.

MEAT

The meat production has also shown an upward rise to the tune of 5.61 per cent per annum. From 568,000 tons in 1972 it has increased to 823,000 tons in 1980.

The livestock population has shown satisfactory growth in fact sheep and goat production has been of the order of 8.4 per cent and 8.6 per cent per annum respectively. The number of buffaloes has increased from 8.2 million to 11.5 million, cattle from 16.7 million to 15.0 million, sheep from 12.4 million to 26.2 million and goat from 10.0 million to 30.2 million.

There has been a highly dynamic growth in the poultry sector, during the past three years. It has maintained a growth rate of 30 per cent per annum.

Though population growth has outpaced the growth of milk production and that too in urban centres but growth and availability of meat (beef, mutton, poultry) and eggs has been significantly higher than population growth. The distortions in demand and supply are mainly due to the un-organised marketing of livestock products and affluence in certain segments of our society.

The performance of Livestock Research Institute, Bahadurnagar has recently been evaluated in a tripartite review, and has generally been commended for its approach methodology and achievements.

This research station has made an outstanding contribution in the disciplines of selective breeding, and animal nutrition. The work has not remained confined to the institute but has been extended to the field and farmers. The age of maturity of heifers has been reduced from 30 months to 18 months: milk production has been improved by 50 per cent, at institute level and by 100 per cent in the non-descript cattle of farmers.

Various projects under way in various provinces focussing attention on milk and meat production are to accelerate the growth rate, particularly in milk production. It is expected that the per capita availability of milk will improve as these projects/programmes got into full swing.

Besides the Livestock Development Centre, Bahadurnagar, co ordinated national programme for livestock and dairy development, and poultry research institutes at Rawalpindi and Karachi are some of the projects undertaken with assistance from UNDP, in order to further develop livestock and dairy production.

Moreover, milk plants have been established at Lahore and Islamabad with world food programme assistance for the supply of pasteurised milk.

The Asian Development Bank and the World Bank are currently assisting livestock development projects in Baluchistan and the Punjab.—APP

EDITORIAL SCORES EXCESSES FROM CITY GARBAGE TO LIVING STANDARDS

Lahore CHATAN in Urdu 11 May 81 p 5

[Editorial: "Illegal Acquisitions a National Problem"]

[Text] For the last few days, a campaign has been underway in Lahore to end excesses. It was started by the Lahore Municipal Corporation. It is within the authority of the Corporation to stem the excesses but that authority is limited to Lahore. We would like to see a nationwide campaign launched for the purpose. The truth is that law and order and planning are crucial to the meaningful development of a community and a country. Cities, in particular, need law and order and planning, without which progress is meaningless and reforms are fruitless. Plans have been announced by several administrations to make Lahore a beautiful city. But in reality, the ugliness of the city increased. It has spread haphazardly. The sidewalks are turned into inferior bazaars. Wherever they want, people set up ramshackle huts and start a little store; this mars the beauty of the streets and bazaars and obstructs traffic as well. It also adds to city garbage. Mounds of fruit peelings are seen everywhere. We certainly don't mean that people should not pursue a trade to eke out a living. But every trade should be under some regulation. If the entire city is turned into a fruit market and the vendors are allowed to do as they please, the consequences will be more of the same, as can be seen around town. We are not sanguine about the city's campaigns. Periodic campaigns are in themselves an indication that municipal workers have shirked their responsibility. Who doesn't know the stories of the municiapl corporation's excesses or shenanigans? We have chosen this subject for commentary because "excesses" is a national issue and without its proper resolution we cannot be called civilized, let alone Islamic people. Those who use their power unjustly are the ones who engage in excesses. The story of our national woes is in reality the story of these excesses. An ordinance has been issued regarding the efficiency, income and standard of living of the employees--how much string-pulling and bribing influences appointments and promotions. Its purpose is to end excesses. Anybody who owns more than his income allows should be regarded as guilty of excesses.

In our national and social affairs, we see various kinds of excesses and outrages. Those who commit excesses on the footpaths, in the bazaars, on the roads are common people, and about the common man it is an irrefutable fact that he is, by nature, a follower. If he would not see such acts being done at the higher level, he should not dare to do them himself. Anyway, our society these days is rampant with excesses and lawbreaking, and we welcome any effort to check these tendencies.

BRIEFS

GOLD SMUGGLING BID THWARTED--Airport Customs thwarted an attempt to bring into Karachi contraband gold weighing 800 tollas worth about Rs 1.6 million, from Dubai on a PIA flight, on Wednesday evening. No arrest was reported until midnight but some crew members of PIA flight PK-214 Catering staff and Ground engineers of the Airline were stated to be under intensive questioning. Customs were reported to have secured some important documents in this connection. The gold was found in two jackets of 400 tolas each secreted in the plane's toilet cavity meant for disposal of waste papers. According to reports Customs Collector, Muhammad Akbar, had formed a special team to keep a vigil on the incoming flights from Dubai, particularly the PIA flights following a tip-off. Last evening, the Dubai flight arrived but the aircraft was parked near the Engineering Gate and not on Bay No. 11 where it was scheduled to come. This change aroused suspicion and the smugglers smelling the danger of being caught dumped the gold in the toilet seeing some senior Customs officers rushing to the plane. Further investigations are continuing. Incidentally, this is the biggest haul of the year--the last haul of gold being of 380 tolas worth Rs. 6 lakh from an unclaimed baggage destined for Bombay in June last. FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

[Commentary by Sunanda K. Datta-Ray: "Return of the Dragon"]

[17 Jul 81 p 8]

[Text] Bhutan Prepares To Talk to China

SEVEN years after the "coronation" when, to the bewilderment of foreign visitors, King Jigme Singye Wangchuck would not be crowned at all, preferring the more authentic rite of receiving the Shabdung's scarf from the sanctuary in Punakha Dzong, Bhutan clings even more determinedly to ancient values. The 1982-87 Plan reflects the sturdy individualism that has sustained Druk Yul, the dragon kingdom, through the centuries. Last year's exchange of resident ambassadors with Bangladesh, and current preparations for talks with China, with which Bhutan does not now have diplomatic ties, mark the Royal Government's adjustment to contemporary politics.

Lyonpo Dawa Tsering, who fears at 47 that he might be too hoary to remain Foreign Minister of a country guided by zestful youth, informed the Tsongdu (National Assembly) at the end of June "that Bhutan would like to start direct and bilateral negotiations with China to delineate and demarcate the Bhutan-China boundary, and that the status quo on the present traditional border should be maintained until such time as the border negotiations have been concluded". The Druk ambassador to India conveyed the proposal to his Chinese counterpart. Beijing's response is awaited, but Thimphu expects talks within a few months.

It may be significant that the announcement was made just after Mr Narasimha Rao's visit to the Himalayan capital and on the eve of Mr Huang Hua's arrival in New Delhi. The 26-year-old monarch, whose mature grasp of Asian realities impresses more than ever, firmly told me a few days later that talks would only be held with India's full trust and confidence. So close is the bond that His Majesty the Druk Gyalpo apparently could not find any problems to discuss with the External Affairs Minister

BORDER SURVEYS

It is also clear that China and Bhutan have for years been preparing their cases on an uncharted frontier which runs for 200 miles along mountain crests and passes. Thimphu argues that the 1979 alarum was not caused by Chinese soldiers disguised as graziers, as Indian reports suggested at the time, but by Chinese surveyors, some of whom might have carried small arms for protection in wild, uninhabited terrain. Lyonpo Dawa admitted to me in 1974 that Bhutan's Survey Department, then only two years old, was examining claims and historical records; negotiations were even then seen as a practical necessity.

"We, as a small country, can't afford an undemarcated border" explained the king during a recent audience in the throne room of Thimphu's towering Tashicho Dzong. "We must iron out all differences". The Tsongdu began debating the issue five years ago; the initiative was not taken earlier partly because data had to be collected (India's Geological Survey reportedly helped) but mainly because with his innate tact and regard for Indian opinion, King Jigme Singye would not begin discussions until New Delhi's relations with Beijing had improved.

But when the border is determined, the Bhutanese might also have to come to grips with such potentially contentious related issues as the exact nature of historical ties with Tibet, the basis of China's political pretensions, and the legitimacy of physical possession. Clarification of Beijing's views might pave the way for renewed political and commercial contact.

To take the last problem first, the Chinese are said to have built roads and set up military installations in two extensive areas. Traditional grazing along the Chumbi Valley, formerly a Sikkimese possession where yak and cattle follow the pasture, creates friction. Even in the east, a prominent Bhutanese nobleman was not long ago asked to pay tax for grazing in an area now claimed by China. Issue No. 95 of China Pictorial, published in 1958, shows the entire Tashigang region in the east and a substantial slice of territory in the north-east as Chinese. According to an European source, Beijing claims about 300 square miles in north-eastern Bhutan,

and a considerable tract north of the old capital of Punakha.

EIGHT ENCLAVES

There are also the eight Druk enclaves in western Tibet, given by a 17th Century Ladakhi ruler, Sengge Namgyal, to a Bhutanese lama whose prayers are said to have resulted in the birth of a royal heir. Thimphu lost control in 1959 when the last administrator was withdrawn; but the Royal Government can justifiably refuse to transfer de jure sovereignty, which was confirmed by the Fifth and 13th Dalai Lamas, until China evacuates occupied territory and recognizes the traditional border.

The historical connexion was not particularly close or harmonious. Bhutan had no direct relations with China until the 18th Century when Ambans (Residents) were appointed in Lhasa; contact was purely ceremonial even then, and, unlike the Nepalese, the Bhutanese never sent missions that the Chinese might have described as tributary. Neither did the Deb Raja ever use the "seal and hat with false coral button" gratuitously bestowed by the Amban in 1891. When the latter sent Ma Chifu with a peremptory letter nine years later, the envoy was allowed only a few miles into the kingdom, and King Ugyen Wangchuck the first hereditary Druk Gyalpo, and His Majesty's great-grandfather, refused to receive him

Rebuffs did not, however, prevent the Wai-wu-pu (Board of Foreign Affairs) and Prince Ch'ing from claiming suzerainty during 1910-12. They argued that Ambans had always employed the manifesto style in addressing Bhutan, replies allegedly being couched as petitions to the Celestial Throne. The assertion outraged the Viceroy, Lord Hardinge, Sir Edward Grey in London, Sir Charles Bell, the Political Officer in Gangtok, and King Jigme Singye's maternal grandfather, the far-sighted Raja Ugyen Dorji, then Bhutan's Agent in Kalimpong. They rightly pointed out that the question of suzerainty could not possibly arise since Bhutan had never paid tribute to China or Tibet, and that courtesy gifts to the Dalai Lama (or even the Amban) had no political significance.

Central to the controversy was the relationship with Tibet—the basis of all Chinese pretensions in the cis-Himalayan belt—which Lhasa tried to twist in 1947 by cabling New Delhi for the return of a wide swathe of border territory, including Bhutan. Druk Yul cannot deny cultural ties (though Sikkim has always been far closer in dress, food, religious ritual, court ceremonial and matrimonial alliances to the ruling hierarchy in Lhasa) for it is today the lone survivor of a fast disappearing civilization that was deeply influenced by Tibetan forms of worship and living. But the link was ecclesiastical, not temporal. Though Bhutan's Drukpa Kagyupa (Red Hat) religion originated in Tibet's Ralung monastery, the Bhutanese had little reason to love the Gelukpa (Yellow Hat) regime in Lhasa which cruelly persecuted the Red Hat sect and encouraged military adventurism. The gaunt ruins of Drukgyel Dzong (Fort of Victory) stand sentinel about ten miles north of Paro, commanding the disused trade route to Phari, as symbol of Bhutan's repulsion of Tibetan invaders some 330 years ago.

Nevertheless Thimphu was dismayed when Tibet's monasteries were suppressed and lamaist orders dissolved. The tragedy had personal implications for some leading Bhutanese. Responding to the Chinese takeover, the late Longchen Jigme Dorji, the Queen-Mother's brother and a wise statesman, banned trade with Tibet in 1960, thereby closing the traditional outlet for the kingdom's surplus rice, and depriving weavers around Bumthang of wool until Australia stepped in with supplies. He also placed the Bhutanese army at India's disposal in 1962.

This disapprobation may be remembered; though China's present leaders are unlikely to echo the vain grandeur of the Emperor who acknowledged George III's presents in 1798 by noting the English monarch's "humble loyalty to Our Celestial Dynasty", ordering him "to display continued energy and dutiful loyalty so as to deserve Our perpetual favour". On the contrary, Beijing thinks it politic to be conciliatory to the Himalayan kingdoms, and Chou En-lai reportedly offered Bhutan economic aid. He also announced in New Delhi, "We have no claim with regard to Bhutan, nor do we have any dispute with it" adding that there were "no boundary disputes" between China and Sikkim or Bhutan.

CHINESE CLAIMS

But such affirmations are open to more than one interpretation since the Chinese will admit no dispute over what they insist, however wrongly, is theirs. Nor is the assurance easily reconciled with theories of the five affiliated races, blending of five colours (Wu Ts'ai), or of the five fingers of China's Tibetan palm. Some Bhutanese may remember too that one of the Shabdung's Thu (mind) incarnations is a Chinese protege.

The negotiations, on which rest more than just a border alignment, will, therefore, demand both dexterity and circumspection. But it is a popular fallacy abroad that the Bhutanese are innocent of foreign affairs. Apart from having frequently to thwart Lhasa and devious Ambans, Druk Yul has coped with Kamrup and Ahom kings, conquered Cooch Behar, and bargained with Sikkim, Nepal and Ladakh. If Bhutan withdrew into its shell in the last century, that was a strategic retreat dictated by a shrewd assessment of how most effectively to frustrate British machinations. But nothing could have better demonstrated Thimphu's diplomatic finesse, captured in the young king's meticulous choice of words and astute moves, than its masterly handling of a delicate equation with India since 1947, gradually overcoming inherited viceregal attitudes to win full endorsement of Bhutanese sovereignty.

The proposal for talks with China marks a much further stage in that evolution. It indicates the fruition of Bhutanese nationalism, but even more, implies that India has at last shed inhibitions that prevented earlier overtures across the Himalayas.

[18 Jul 81 p 8]

[Text] Challenge for Indian Diplomacy

THE proposal for negotiations with China is not the only indication of Bhutan's surging confidence. Many other signs suggest change once the traveller has been reminded under Phuntsoling's decorative archway, another relic of the coronation that never was, to advance his watch by 34 minutes because Druk Yul now follows a different time.

Bhutanese coins and currency notes are in increasing circulation. Druk Air will fly from Paro to Calcutta, stopping at Bagdogra, by September. The Royal Government expects to take over all telephone exchanges and trunk roads by 1984. Thimphu's royal guest house is like a mini-United Nations. Apart from Australian diplomats from New Delhi and an aid official from Canberra, five International Monetary Fund officials—British, Dutch, Finnish German and Nepalese—are processing the kingdom's application for membership of the World Bank and its agencies. Bhutan will also soon join the FAO and Asian Development Bank. Discussions are in progress with OPEC, the EEC and the Kuwait Fund for Arab Development.

More significant could be the admittedly not very busy Embassy of the People's Republic of Bangladesh on the way to Motithang hill. The exchange of resident envoys—which Thimphu and Dacca see as only a procedural change from the earlier situation when they were represented by missions in New Delhi—was reportedly agreed upon in Havana when King Jigme Singye met Ziaur Rahman. It was not wholly agreeable to India which might explain why the Bangladesh ambassador presented his credentials just six days before Mrs Gandhi was sworn in last year. The Bhutanese insist that the timing was only a coincidence, and that New Delhi's response is now even more friendly and cooperative than before; but the Bhutan-Bangladesh trade agreement, signed last September, had to be twice deferred because of Indian reservations.

TRANSIT RIGHTS

The agreement's provisions are of far less consequence than the fact of its conclusion. But some clauses might still lead to argument. Bangladeshi diplomats candidly admit that it would be unrealistic to invoke notionally reciprocal transit rights through the kingdom to Tibet, while the question of Druk ships using Chittagong or Chalna must now be of only academic interest. But the Royal Government has already notified India of its wish to renegotiate the 1972 trade and transit agreement which lapses next year, and whose restrictive clauses His Majesty dismisses as "a British legacy with no relevance now". The arrangement caused tremendous problems (every consignment for and from Bhutan was delayed and subjected to laborious bureaucratic scrutiny, according to the Foreign Minister) and effectively prevented trade with third countries until generously clarified by Mr Morarji Desai in 1978.

The new system is working satisfactorily, but Thimphu would like further liberalization to earn hard currency from exports. "That is why we are trying to overcome the many many problems of landlocked countries" says the king. A solution lies in transit facilities to Bangladesh, either by barge along the Brahmaputra from Dhubri to Chilmari in Rangpur, or from Phuntsoling by road and rail to Gitaldaha and Mogalhati. It would be self-defeating of India to repeat the obstructive tactics that even now make virtually inoperative the right grudgingly allowed to Nepal to use the railway to Radhikapur

Claims that cannot legally or morally be denied are best conceded with good grace. Unjustified and, in the end, ineffective objections can only strain goodwill. "We would safeguard India's interests, and we know that India sympathizes with our objectives and aspirations" maintains the Druk Gyalpo, acknowledging a continuing close association which, he says, has been reinforced in the last year or two. Several outstanding problems were disposed of during this period. Mrs Gandhi readily agreed to Bhutan's international airline. The Assam and West Bengal borders were demarcated with pillars, and current talks are expected to settle the remaining small strip of Bhutan's frontier with Arunachal Pradesh. India has agreed to accept 1,500 Tibetan refugees, and already taken 749.

Because of this accommodating spirit, King Jigme Singye is able to say that Article 2 of the 1949 treaty (whereby Bhutan agrees to be guided by Indian advice in its external relations) is no longer an issue. New Delhi, apparently, accepts Thimphu's interpretation that advice has to be asked for, and will not be binding even when given. There have already been several instances of differences on foreign policy issues. The Royal Government is also confident that the treaty's negotiation and arbitration provision (Article 9) will ensure that pressure is not applied

TIBETAN BORDER

India obviously feels able to take a more relaxed view of Bhutanese intentions and to reciprocate the kingdom's trust. Hence a quiet withdrawal from the position staked during negotiations with China in 1959 and 1960 when New Delhi insisted that it "clearly had responsibility for the external relations of Bhutan and Sikkim...", that it "had the sole responsibility of representing these two States in matters concerning foreign governments", and that "the boundaries of Sikkim and Bhutan with the Tibet region of China were the legitimate responsibility of the Government of India...". Accompanying maps showed India's international boundary as running north of Sikkim and Bhutan, while Indian descriptions of the frontier (described as "natural, traditional and customary") specifically described Druk Yul's border. "It follows the crest of the Himalayan range which forms the main watershed between the Amo Chu and the waters flowing into Ram Tso, Yu Tso Nyang Chu and Kuru Chu in Tibet and the Paro Chu, Punakha, Thimphu Tongsa and Bumthang rivers in Bhutan"

But India's case was weakened by repeated references to the Royal Government's "requests" to present its claims. If New Delhi did, in fact, enjoy exclusive, or any, responsibility for Bhutan's foreign affairs, it would hardly have needed to stress such authorization. Nor would India have felt it necessary to invoke the

treaty (which does not support the claim) or cite the Tsongdu's resolution against China's cartographical aggression.

Beijing ignored these technical flaws to blandly assert that China's frontiers with Bhutan (and Sikkim) "do not fall within the scope of the Sino-Indian boundary question and are irrelevant to the task of the officials of the two countries". Refusal to even discuss Druk Yul's borders was matched by a marked reticence on physical features. Whereas India supplied profuse details of rivers, peaks, mountain passes, distances and meridian lines on the Bhutan-Tibet alignment, Beijing contented itself with describing the western frontier up to the tri-junction of China, India and Nepal, then skipping the three Himalayan kingdoms to take up the north-eastern alignment from Bhutan's south-eastern tip. The only information the Chinese provided was that "a certain discrepancy" existed "in the sector south of the so-called McMahon Line", adding: "But it has always been tranquil along the border between the two countries (Bhutan and China)".

The point of this note was to indicate China's claims in Arunachal. But since the disputed territory extended into Bhutan, India retorted that "this area had always been part of the Tashigang Dzong of Bhutan and the villages in the area had always considered themselves as part of Bhutan". New Delhi also forcefully demanded that China "restore the rightful authority of the Bhutanese Government over their enclaves" in western Tibet, with irrefutable evidence of Thimphu's sovereign jurisdiction over the eight villages though, paradoxically, India said nothing about Sikkim's rights in the Chumbi Valley and in several other enclaves such as Doptha and Taring.

The Royal Government is perfectly competent to make its own representations over disputed territory. But that it will do so with the benefit of India's advice, assistance and material evidence is a measure of the collaboration that nowadays exists between the two countries. It was not always so, though the Bhutanese make light of earlier misgivings over events in Sikkim between 1973 and 1975. Customs harassment, excise difficulties, ethnic problems with labourers inducted by Indian organizations, or ambassadorial superciliousness. It was a Lok Dal Minister's maladroit interpretation of the treaty that forced His Majesty to suggest revision of Article 2 in 1979. Mrs Gandhi's intemperate remarks that year may also have accounted for the appearance of haste with which Thimphu and Dacca exchanged resident ambassadors.

Such fears have now been dispelled. While the Bhutanese will do nothing to embarrass India, New Delhi acquiesces in Thimphu's direct dealings with Beijing, not because of Chinese rejection of the Indian stand, but because of strengthened certainty in the Himalayan alliance.

FUTURE CHANGES

But India must be prepared for the logical consequences of these developments. Druk Air may one day wish to fly to Dacca or Kathmandu. The National Youth Association's bi-weekly broadcasts will soon lead to a full-fledged Bhutanese radio. An IMF official feels that, as in Nepal, the dragon kingdom will sooner or later have to exclude Indian currency to make its own money viable. It is revealing too that though the quantum of Indian aid rose from Rs 107.2 million to Rs 860.2 million between the first and fourth Five-year Plans it declined as a percentage of total resources from 100 to 78. Apart from a number of international agencies, Australia, Austria, Japan, the Netherlands, Norway and Switzerland are interested in helping Bhutan though, out of deference to the spirit of non-alignment, the kingdom takes nothing from the Super Powers. The first three Plans were wholly drafted by Indian experts; the fourth incorporated some Bhutanese ideas; the fifth is entirely a product of the Druk genius.

Free trade and the open border will be maintained, but restrictions on expatriate labour and entrepreneurs are already being debated. Bhutan is also bound to seek other sales outlets. "We must diversify trade" says the Druk Gyalpo "Otherwise, it becomes a buyer's market". That process cannot be confined to commerce. Independence is never a half-way house; having sponsored Bhutan's debut on the world's stage, India must expect the kingdom to participate, to the moderate extent that its rulers think desirable in the comity of nations. People already refer to that part of Thimphu valley where the Indian Embassy's new building stands as the diplomatic enclave. Other missions, including China's, might follow.

India can profit from this gradual emergence by retaining Bhutanese faith. The test of diplomacy will lie in the understanding and flexibility with which New Delhi meets a challenge from which it need fear nothing so long as India remembers not to equate friendship with dependence.

[20 Jul 81 p 8]

[Text] Economic Progress Without Hurrying

THE Bhutanese dragon might not have thought of spreading its wings if it had not been comfortably established in its own nest. The portly presence of Lyonpo Tamshi Jagar is a symbol of secure continuity. Seven years ago, the Home Minister's days were thought to be numbered because of his orthodoxy. But he is today also Speaker of the Tsongdu over whose deliberations presides His Majesty, sitting crosslegged on a high gilded throne, taking notes and even occasionally intervening in the debate in violation of Westminster's most sacred principles. But, as the Bhutanese will explain, they do not need blindly to obey alien conventions; their parliamentary institutions are developing in cooperation with, not in opposition to, the throne.

Monarchy's personal involvement in public welfare is most evident in drawing up the fifth Five-year Plan. The Druk Gyalpo toured all 18 districts, took part in discussions with district officials and village leaders, listened to complaints and demands, and suggested remedies, says Ugyen Tsering, the Planning Commission's 27-year-old Berkeley-trained under-secretary, who is typical of the kingdom's new generation of idealistic, yet practical, civil servants. "We want people to know exactly what we do and how much we spend" explains the king. Individual plans for each district were drawn up on the basis of these free discussions and departmental recommendations (eight have so far been finalized) to be integrated in a master document "Hundreds of copies of the plans were printed and distributed to villagers so that they can understand every phase and discuss issues" adds King Jigme Singye. Annual seminars to review progress and suggest changes will continue the participative process.

The aim is to decentralize the administration, strengthen district governance, give people a stake in growth, and make the districts self-sustaining. India's legacy of highly centralized planning accentuated disparities in this 18,000-square-mile country of 1.2 million people. The king cites the example of Ha, stronghold of his Dorji ancestors, which would not have developed for another 30 years under conventional planning since a uniform strategy did not make allowance for Ha's high altitude, insufficient crops and unemployment which obliges people to seek jobs in the lush Paro valley dominated by a circular watchtower which houses Bhutan's national museum, the stone Rinpung (Heaps of Jewels) Dzong and, across a medieval bridge, the yellow-roofed confection of the Queen-Mother's Ugyen Pelri Palace.

HIGHER REVENUE

The valley is also the site of the 27-acre Bondey farm, started and run by a dedicated Japanese, which, with its seven sub-centres and 35 employees, now supplies seeds and teaches better cultivation methods to the rest of Bhutan. Visitors are regaled with luscious Japanese peaches, now grown at Bondey.

Both His Majesty and Ugyen Tsering outline the Rs 703 million Plan's objectives in almost identical language. Apart from local self-reliance, through public participation, and decentralisation, it aims at raising revenue from Rs 440 million to Rs 1,160 million through higher excise duties on matches, tea balls and other commodities; royalty on forest produce; mining dolomite (whose yield went up from Rs 1.8 million to Rs 7.9 million in a single year), slate, coal, limestone, gypsum and graphite; encouraging the growth of apples, peaches, plums, strawberries, asparagus, artichokes and cash crops like cardamom (Rs 1,800 per 100 kilogrammes yielding Rs 3,265 million); and a modest industrial base.

But the Royal Government will not consider industries based on imported raw materials or tax incentives. Just as Lyonpo Sangye Penjor, the former ambassador to India who is now Communications Minister, admits that there were a mere 1,700 tourists last year because, anxious to preserve its own traditions, Bhutan insists that only people with a particular interest in Buddhist culture or Himalayan flora and fauna should be allowed to pay $130 a day for package tours (individual tourists are discouraged), so too are possible industrial gains ignored in favour of industries based only on what the kingdom's farms and forests produce.

This is a conscious decision to abjure earnings to protect a unique way of life. Bhutan shudders at the thought of becoming another stop on the hippie's hash trail like Kathmandu. It also refuses to provide a haven for foreign investors whose assembly plants and machine tool factories might bring in money, but will contribute nothing to the Druk spirit. In keeping with this selectivity, Tsering says: "We don't believe in seeking assistance just because it's forthcoming". Experience, expertise and areas of common interest are taken into account. Japan is thought to be good in mechanised farming, Australia helps in animal husbandry, Switzerland and the Netherlands might promote dairy farming, Norway is expected to assist hydro-electricity studies.

DONORS EXAMINED

Australian aid, raised from this month to the equivalent of Rs 5 million, is possibly the most significant since it has provided transport (trucks and a fleet of limousines), included apple cuttings and Jersey cattle for the Samche livestock farm, and revived the woollen industry. Its most ambitious project—a 1,000-ton cold storage in Phuntsoling to encourage agricultural exports to India—is nearing completion, and three other stores are planned for orchard districts. Canberra also provides scholarships and has promised sheep for a farm in the mountain range between Thimphu and Dagana. In addition, Bhutan has received nearly Rs 500 million for specific projects from several international agencies. But donors, like tourists, must satisfy the Royal Government's stringent requirements. Druk Yul will accept the world only on its own terms.

The Plan's two other points—a higher standard of living and reduction of establishment costs—similarly reflect Druk priorities. The former is not easily quantified. Bhutan ranks low in the list of least developed countries of

which there are 30, Asia accounting for nine. It has sent representatives to their meetings in Dacca, New York and Vienna, and is now preparing papers for the Paris conference in September. The per capita income is $100 (Bangladesh's is $90) against $120 for Nepal, $150 for India, and $200 in Pakistan and Sri Lanka. But IMF officials agree that such figures could be misleading for a country that has so few internal and external transactions that it cannot claim an economy in the modern monetary sense. "Income distribution in Bhutan is much more even than in any other country I've visited" says a member of the team. It is a feature of this paradox that though Bhutan has a trade deficit, it does not face any balance of payments problems. On the contrary, Thimphu—which now controls its own foreign exchange and has accounts all over the world—boasts a small dollar reserve.

This is largely the result of India's generous aid which cushions the economy, takes care of capital expenditure (Rs 1,530 million for the Chuka hydroelectricity project, a Rs 150 million cement plant at Penden, the Rs 30 million lift irrigation scheme at Gaylephug, roads and military training) and bridges the gap between exports and imports. The appointment of Dr Topgye, former Secretary-General for Development, as the new ambassador to India suggests the economic content of the connexion. But the country is also self-sufficient in food, and the simple needs of the majority of its inhabitants are easily met from what they grow, make and can afford to buy. The Food Corporation's support prices and preemptive purchases help cultivators.

Establishment costs do not strike the visitor as exorbitant, but His Majesty assures me that the kingdom is burdened with a top-heavy administration. There are about 20,000 Bhutanese officials of all grades and, apparently, an extraordinarily high 40,000 Indian personnel. The bureaucracy cost Rs 640 million during the fourth Plan; this would have increased to Rs 1,440 million during 1982-87 but, says the king, the estimate has been reduced to Rs 1,148.6 million. He insists that expenditure can be pruned by up to another Rs 100 million.

An official, also in his twenties, trained in manpower planning at Wisconsin, is dealing with the problem. He talks of controlling recurring expenditure, cost effective management and better utilization of manpower. His Majesty has set up a Civil Service Commission to investigate possibilities. It is closely related to other strategies for, with the emphasis removed from Tashicho Dzong to the districts, the dzongda (as district officers are called) has assumed tremendous importance. His initiative is responsible for generating enthusiasm, eliciting suggestions and mobilizing voluntary labour.

King Jigme Singye attributes sharp variations in public participation (from 100 per cent to only ten) and differences in self-reliance (less than half the districts are self-sustaining) to the dzongda's personality. Consequent changes are already evident. Seven years ago, they were traditional keepers of His Majesty's forts: dignified elderly gentlemen noted only for their familiarity with Druk conventions and their loyalty to the Wangchuck dynasty. Paro's dzongda, for instance, was a picturesque medieval functionary who had for 30 years been attendant to the late Druk Gyalpo. But the new district administrators are all thrusting young men imbued with modern ideas, taking their cue from a vigorously imaginative king and, therefore, anxious to improve things within the framework of the past.

It was at one time feared that this elevation of local units would transform districts into demand forums. But it soon became clear that Thimphu would help only to the extent that district development committees were prepared to help themselves. Villagers must first ask for a school, for instance, and justify the need with plans; the Royal Government then provides skilled supervision, timber, cement and corrugated sheets, but the villagers themselves have to construct the building.

ETHNIC ISSUES

A tangential benefit is that self-help eliminates expatriate labour. The Nepalese, invariably referred to as Southern Bhutanese, comprise 25 per cent of the population. But illicit immigration from Nepal and West Bengal is a continuing threat, and the Tsongdu is now considering a cut-off year in the mid-fifties. At the same time, a National Social Cultural Promotion Committee ensures that Druk and Nepalese understand each other's cultures, and are fused in a Bhutanese way of life. Om Pradhan, the former Trade and Industry Secretary who now represents Bhutan at the U.N., offers an outstanding instance of integration. There are many others.

Complete assimilation may take as long as total economic independence. Both yield precedence to the strengthening of a distinctive ethos which also determines the judicious circumspection of Bhutan's political emergence. The Druk people are cautious and realistic by nature, made more so by the extraneous circumstances they have to cope with. "We're not in a hurry" says Ugyen Tsering. "We must first make certain what we really want to do"

GANDHI ASSOCIATES WORRIED OVER 'NONPERFORMANCE'

Madras THE HINDU in English 20 Jul 81 p 9

[Article by G. K. Reddy: "Party Leaders Want PM To End Drift"]

[Text]

NEW DELHI, July 19

The top leaders of the Congress (I), who are quite close to the Prime Minister, are troubled by the negative atmosphere prevailing in the country, which is reminiscent of the mid-seventies in many respects.

Though not all of them are privy to Mrs. Gandhi's inner thoughts, they are, nevertheless, well informed enough to share the tormenting thought that, if no timely steps are taken to end the current drift, the Indian polity will start sliding back to the turbulent days of the last decade.

But in drawing the pre-1975 parallel, nobody is implying that the country is heading for another emergency or that the restive ruling party and the refractory opposition are set on a collision course again.

Non-performance: The disconcerting feeling that the present political ferment in the wake of increasing economic distress is bound to lead to widespread public unrest, is making the more sensitive individuals in the ruling hierarchy think seriously of the grave consequences of non-performance.

The reflexes of the Government itself are conditioned by a haunting fear that, despite its best efforts to tackle an admittedly difficult situation, something seems to be going wrong all the time for reasons well beyond its control or comprehension.

This strange psychology of helplessness has been cramping the style of the Government, making those in authority imagine that there is very little they could do to achieve better results in the atmosphere of fatalism.

Abrupt anti-climax: There is also an element of abrupt anti-climax in almost all the actions of the Government. After a high degree of expectation, the Finance Minister has come out with an economic package that has made the hard-pressed public even more sceptical about the Government's will or capacity to cope with inflation.

The credibility of the Government has suffered further because of its totally misleading claims that the prices have indeed come down.

The critics of the government do not expect Mrs. Gandhi to perform any miracles overnight, but they want to be reassured that a conscious effort is being made to tackle the heavy backlog of problems.

They expect her to take suitable steps to improve the quality of her Government by making better use of the available talent, instead of rewarding the undeserving or shielding the corrupt and incompetent who have forfeited public confidence.

The Prime Minister's own party colleagues are not impressed by her claim that the present Central Cabinet is about the best possible team she could get together, since it contains as many as seven former Chief Ministers, conveniently glossing over the fact that none of them had made any mark in he respective State.

The inordinately long time she has been taking in getting rid of the existing Chief Ministers who have become big liabilities to her has not helped to impress her own party that she is determined to set better standards of both probity and performance.

Preoccupation with foreign affairs: The increasing preoccupation with foreign affairs has, no doubt, helped to create an impression of firm and purposeful leadership in dealing with external problems. But is has also diverted attention from the more important domestic tasks like maintenance of law and order, promotion of communal harmony, better economic management and more efficient administration.

The absence of a well-established tradition of internal debate has also tended to deprive the Government of the benefit of informed opinion and constructive criticism.

The fact that almost all the senior Ministers are political lightweights inhibits them from voicing their views with great candour to carry conviction.

The negative atmosphere prevailing in the country is affecting almost every aspect of public life ranging from exercise of power and dispensation of patronage to effective uses of administrative authority and utilisation of the available expertise for achieving better results.

The sad part of it all is that even those in pivotal positions who voice their concern in private about the present state of affairs, are not prepared to talk to Mrs. Gandhi on what could be done to make the Government work better and generate greater confidence.

The few that have felt bold enough to advise her to wield the big broom have not been able to fathom her mind or assess her intentions. And the feeling that nobody really knows what she proposes to do is creating a sort of hiatus at the higher policy-making levels of the Government.

GANDHI WORRIES OVER CONGRESS-I CHIEF MINISTERS TOLD

Calcutta THE STATESMAN in English 17 Jul 81 pp 1, 9

[Text] New Delhi, July 16--No sooner than the ink was dry on the Rajasthan chapter, Chief Ministers of two other States, Karnataka and Orissa, are having trouble with dissidents in their respective State parties, causing them worry. Taking note of the opposition that is growing to the Chief Ministers, the Central leaders have asked them to mend their fences, lest they should go the same way as Mr Jagannath Pahadia.

After being given a warning by Mrs Gandhi and asked to change his ways, the Karnataka Chief Minister, Mr Gundu Rao, returned to Bangalore yesterday. Last evening, a meeting of the Political Affairs Committee of the Union Cabinet was reported to have taken note of a number of complaints made by dissidents against the Haryana Chief Minister, Mr Bhajan Lal, besides paying attention to the Karnataka and Orissa affairs.

Mr Rao would probably have been asked by the party's central leadership, to resign right now for the lapses reported against him. But some good work done by him as Chief Minister has stood him in good stead. Besides, the Central leadership must pick another leader to replace him. There is almost no one in the State Congress(I) Legislature Party who would measure up to the stature of a competent Chief Minister, who could take the party along with him.

It is not yet certain if the Central leadership would like to send someone from the Centre to Karnataka. At the same time, elections to the State Assembly are to be held in July next year and it would be better for the party to go to the polls with a Chief Minister who has a better image. Now, Mr Rao has been cautioned and to express her displeasure at the state of affairs in Karnataka, Mrs Gandhi did not see Mr Rao for a day and kept him waiting in Delhi.

It looks likely that Mr Rao may be asked to drop some of the controversial Ministers from his Cabinet. The central leadership will take stock of the political situation in the State after the current session of the State legislature.

The complaints against Mr Rao are many. His "style of functioning" has annoyed many of his fellow legislators, who would otherwise like to support him. He has apologized to the Prime Minister for the unsavoury comments he had made against a number of Central Ministers at a luncheon meeting with the editor of a Delhi newspaper and made himself thoroughly unpopular with the Ministers at the Centre.

Despite the overwhelming majority the Government enjoys in the Orissa legislature, and behind a quiet exterior, dissident activity against the Chief Minister, Mr J. B. Patnaik, is growing. He has been accused of "destroying the unity" of the party and dealing with the dissidents with "strong-arm" methods.

Seven M.P.s from Orissa had sometime ago submitted a memorandum to the party's central leadership complaining against the "style of functioning" of the Chief Minister. Mr Patnaik reportedly blamed Mr K. C. Lenka, his former Revenue Minister, for instigating, dissident activity against him.

On his persistence, Mrs Gandhi permitted Mr Patnaik to drop Mr Lenka from the Cabinet.

UNI adds: Mr Kanhu Charan Lenka, who was recently dropped by Mr J. B. Patnaik from his council of Ministers, arrived in New Delhi tonight from Bhubaneswar. He told reporters that he would meet Mrs Gandhi, Mr Rajiv Gandhi and other Congress(I) leaders and apprise them of his grievances against Mr Patnaik and his style of functioning.

The Congress(I) central leadership is seriously thinking of changing the present leadership of the Tamil Nadu Congress(I) Committee in a bid to end the factionalism that is crippling the State party unit.

The Congress(I) president, Mrs Gandhi, is said to be on the lookout for a suitable person who will be able to steer clear of the contending groups for supremacy--one led by the TNCC-I president, Mr M. P. Subramaniam, and the other by the AICCI general secretary, Mr G. K. Moopanar.

In view of the imminent change, Mrs Gandhi may not agree to attend the State-level political conference, which has been convened by Mr Subramaniam at Tiruchi in August.

GANDHI ACTIVITIES IN MADHYA PRADESH REPORTED

New Delhi PATRIOT in English 21 Jul 81 pp 1, 7

[Text] Bhopal, July 20 (UNI)--Prime Minister Indira Gandhi tonight said she would undertake the exercise of reviewing the performance of all State Governments, including the non-Congress-I ones.

After a similar exercise undertaken during her one-day visit to Madhya Pradesh today, she would next go to Jammu and Kashmir, Mrs Gandhi told an unscheduled press conference.

Asked if she was satisfied after her first hand review of the work done by the Arjun Singh Government, Mrs Gandhi said there were "certain deficiencies but certainly, something good was also being done."

"It is a time of economic difficulties not only in Madhya Pradesh, but in every State where there was a demand all the time for more funds," she added.

Mrs Gandhi said the current price rise was owing to the global inflation. In India this had hit the poor the most and what the Government had tried to do was to check the inflationary trend. She said the Government had been successful in lowering the rate of inflation.

The Prime Minister said the rise in prices could be checked only with an increase in production.

In this context, she referred to the import of US wheat which was cheap and was needed to build the buffer stock.

She said she was not aware if the wheat was being smuggled out of the country, as alleged by former Prime Minister Morarji Desai. "If at all there was some smuggling, this was a trend which took roots during the Janata rule," she said.

Asked about the progress made in the implementation of the 20-point programme, Mrs Gandhi said parts of it had already been implemented and measures were being taken to implement the other points from time-to-time. The five-point programme, envisaged by the late Sanjay Gandhi were also part of the "Government policy," she added.

Replying to another question, she said all her party's programmes were meant not to strengthen any individual but the party itself which in turn, strengthened the nation.

She admitted that far more had to be done to remove poverty in the country but added "poverty was not like an old shirt that could be discarded at once." There had certainly been some improvement in this direction, as borne out by the fact that even in our own life, the faces of poverty had shown a definite change.

Chavan's Entry

Mrs Gandhi said no decision had yet been taken regarding the admission into her party of former Congress(U) leader Y. B. Chavan and former Madhya Pradesh Chief Minister S. C. Shukla.

The question was not of admitting someone to the Congress-I but of 'bringing them round to the party ideology.'

Mrs Gandhi also made an indirect reference to Mr Chavan and others seeking entry in the Congress-I at a party worker's meeting addressed by her earlier. "They do not want to come because of our growing influence, but because they want our support. They alone will be benefitted and not the Congress-I," she said.

Mrs Gandhi told newsmen that the problem in Britain presently was not of racialism, but that of law and order.

She agreed that the problem started with racialism "but just now it is that law and order problem which is of concern to the white, the brown and the black people there together," she said.

Self-Reliance

Mrs Gandhi said earlier that her Government aimed at bringing about economic self-reliance for every family in the country, adds PTI.

Speaking after laying the foundation-stone of the first phase of the Rs 200 crore Sanjay Gandhi thermal power station project, at Birsinghpur, she said, "This may be a dream, which cannot be realised in a short time but a beginning had been made and the country is inching towards this object."

Mrs Gandhi said some of the major programmes of the country could not be taken up or make any headway due to lack of power generation, conceding the country was backward in power generation, she said, "But now we have given priority to the generation of power," Without it no progress would be made in industrial or agricultural field.

Mrs Gandhi said the country remained backward because it did not catch up with the advantages made by developed countries in science and technology. The country was now trying hard to make up for the delay but it would take some time to reach the heights reached by them.

Mrs Gandhi arrived in Bhopal, this afternoon by an IAF plane after laying the foundation-stone of the first phase of the thermal project which would ultimately have a power generating capacity of 1260 MW in the near future and considerably boost the economic development of the State.

She was accompanied by Union Minister P. C. Sethi and Madhya Pradesh Chief Minister Arjun Singh.

Mrs Gandhi laid here the foundation stone of a Rs three-crore environmental complex under the auspices of the environmental planning and coordination organisation set up by the Government. Speaking on the occasion she stressed the need to educate people on the importance of environmental hygiene and the need for stopping further pollution of the natural resources.

While laying another foundation stone for the Jawaharlal Nehru Bhawan here to house the Associated Journals Limited, she said the country's independence would remain incomplete unless poverty and atrocities on women, Harijans and Adivasis were ended.

Addressing government employees at the secretariat here before attending departmental meetings to review the progress of economic development programme in the State, she said the country got a setback because those who were at the helm of affairs lacked discipline and determination. It was being rectified now, she added.

On the situation in the international arena she told them some powers were trying to push the world towards tensions. It was not good for India in particular as it was on the threshold of economic progress which might be retarded.

CPI MAY BE TRYING TO MEND FENCES WITH GANDHI

Calcutta THE STATESMAN in English 18 Jul 81 p 9

[Text]

NEW DELHI, July 17.—Is the official leadership of the CPI undergoing a process of changing its political line of opposing Mrs Gandhi's Government, adopted by the party congress held in Bhatinda in April 1978?

There are definite indications to support this theory. It is believed that at the next party congress in Varanasi to be held at the end of this year the CPI may revert to the pre-Bhatinda position of supporting Mrs Gandhi.

The gradual shift in the stance follows the intense pressures from supporters of Mr Dange within the party's second rank leadership which is forcing the official leadership to accept a total alignment with Mrs Gandhi and her Government.

The main issue on which the official leadership is made to change the line is the vigorous "anti-USA policies" followed by Mrs Gandhi and her commitment to friendship with Russia and other socialist States and progressive non-aligned countries.

It has so far been difficult for the official leadership to make a sudden volte face. However, the leadership has recognized that though the party's national council, its highest policy-making body, showed unity on expelling Mr S. A. Dange from the party, it is divided on the political line of opposing Mrs Gandhi. The official leadership has been under pressure from the pro-Mrs Gandhi elements to review its line.

This is becoming evident now with the decision of the official leadership here yesterday not to attend the meeting today of all Opposition parties convened by the Janata Party president, Mr Chandra Shekhar, to consider "an entirely new situation created by the alleged large-scale misuse of the official machinery, rigging and violence on the part of the Congress (I) in the recent by-elections".

In a statement issued yesterday the CPI general secretary, Mr C. Rajeswara Rao, said his party would not join a united front of all Opposition parties to oppose Mrs Gandhi and her Government. The party leadership has made a plea that the proposed front comprises communal elements, like the Bharatiya Janata Party.

According to political observers, this is just an excuse. The fact is that the CPI wants to mend its relationship with Mrs Gandhi. This is because the Communist Party of the Soviet Union has reportedly directed the CPI to give up its hostility to Mrs Gandhi and her Government.

The CPI leadership has been reportedly told by the CPSU that Indian Communists should not embarrass Mrs Gandhi's Government by joining hands with Opposition parties.

The CPSU has also reportedly told the CPI that Mrs Gandhi will have no objection to its having united action with the CPI(M) to oppose her policies and programmes. The point the CPSU has emphasized is that any united mass action by the CPI should be strictly limited to Left and democratic forces.

The CPI leadership is, however, reportedly reviewing its friendly relations with the CPI(M) developed in the past two years. The CPI(M)'s line of welcoming the recent visit to India by China's Foreign Minister, Mr Huang Hua, has been not to its liking.

KERALA CHIEF MINISTER REFUTES GANDHI ALLEGATIONS

New Delhi PATRIOT in English 20 Jul 81 p 1

[Text]

TRIVANDRUM, July 18 (UNI)

KERALA Chief Minister E K Nayanar has told Prime Minister Indira Gandhi that her reported observations about the 'politics of murder' in Kerala, if true, are 'ill-founded, highly exaggerated, and do not at all reflect the true state of affairs.'

In a letter to Mrs Gandhi, released to the press today, Mr Nayanar said he was surprised to note that at her press conference in New Delhi on 9 July, Mrs Gandhi had chosen to defend some of the statements made by Union Minister of State for Home Yogendra Makwana about the situation in Kerala.

Referring to Mrs Gandhi's remarks that political murders were quite frequent in Kerala and that 'many of our people are getting killed,' Mr Nayanar said he had made it clear over and over again that 'we are against the politics of murder.

Pointing out that Kerala was a highly politicalised State and that any incident was to be politicalised and played up, he said it was the politics of 'liberation struggle' by the Congress-I which had encouraged certain people to create a 'situation' in the State.

Mr Nayanar said the Prime Minister's public defence of the 'ill-founded utterances' of Central Ministers like Mr Makwana would only encourage them to misuse their positions of power for partisan ends in State politics as well as those sections interested in the politics of toppling.

He, however, thanked the Prime Minister for having made it clear at the press conference that her party was not interested in toppling any State Government.

'The position is fully in keeping with the best traditions of parliamentary democracy and I hope the Congress-I in Kerala will give up its politics of liberation struggle,' he added.

Mr Nayanar also referred to his earlier letter, sent on 6 June, drawing the Prime Minister's attention to some of the statements made by Central Ministers and said it was regrettable that he had not so far received any reply from her.

CPI-ML PEOPLE'S COURT ATTACKS KERALA CORRUPTION

Bombay THE TIMES OF INDIA in English 21 Jul 81 p 7

[Text] Trivandrum, July 20--The people's court of the CPI(M-L) has begun turning its attention to political corruption in Kerala.

The court has found the municipal councillors of Nedumangad in this district guilty of gross corruption. It has, however, not pronounced any punishment yet.

According to leaflets distributed all over the place, the Naxalite court said they must all be given suitable punishment if the people had to be rescued from excessive taxation and corruption.

The people, the court said, were misled into believing that if Nedumangad, which was a panchayat area until recently, was raised to the status of a municipality they would benefit. What they got in return was more taxes and more corruption.

All these so-called village and municipal institutions were nothing more than the regional expressions of a system that involved heinous and cruel exploitation of the people, according to the people's court.

An instance of corruption, according to the court, was that the municipality appropriated money for killing 400 mad dogs which, the court said, were never caught.

The court appealed to the people to resist and defeat the attempt to collect exorbitant taxes.

Until now the people's court had been pronouncing punishment on medical practitioners for alleged corruption by charging excessive consultation fee.

KERALA CONGRESS-U LEADER ISSUES STATEMENT*

Madras THE HINDU in English 21 Jul 81 p 9

[Text]

COCHIN, July 20.

Mr. A. K. Antony, Kerala Pradesh Congress (U) Committee President, has accused the CPI(M) of practising double standards in relation to alliance with progressive democratic forces.

In a lengthy statement issued here on Monday, he said the marxist policy of forming a broad based Left Democratic Front (LDF) in areas where the CPI(M) could not come to power independently and to adopt an attitude of untouchability towards progressive democratic forces in areas where they could rule on their own would no longer sell with the public.

Reply to EMS: Though the statement was in reply to some remarks made by the CPI(M) General Secretary, Mr. E. M. S. Namboodiripad, in Trivandrum on Sunday, Mr. Antony without mentioning names said it was amusing to see top CPI(M) Leaders accusing the Congress (U) for the non-formation of an LDF in West Bengal.

"The Congress (U) workers who are being harassed consistently by the West Bengal Government can never become its flatterers only because of animosity towards the Congress (I), whoever says so", he said.

"We all know for whatever justification the CPI(M) was ready to keep a Congress (I) Government in office in Assam for some days, he added.

No difference of opinion: The KPCC (U) chief made clear that his party had no difference of opinion that each party in the LDF in Kerala should get its due respect.

"But no one need be under the fallacy that with the arrogance that they were the biggest party, they could have unity at the top level with other parties and impose their supremacy throughout the State", he said

It would be helpful for those conscious about the bigness of their party that they had to seek the cooperation of other parties to return to power after 12 years in the "limbo".

Mr. Antony said whenever there had been basic deviation in the LDF administration, the Congress (U) and CPI(M) had publicly pointed them out.

Police associations: The formation of police associations was for realising their just demands, but when they began functioning like trade unions leading to dangerous tendencies destroying discipline in the police force, the Congress (U) objected.

"We were not cornering any party whenever we pointed out the dangerous developments in the law and order sector", he said.

Violence will not be tolerated: Mr. Antony said nobody could tolerate if violent incidents like those in Paravanged, Kanjirapally, Nadapuram, Thiruvambadi and Velliyanad were to be repeated.

"I do not hold the view that our partymen will never do any wrong. Even if our workers indulged in violence, they should not be given Government protection", he said.

Student wings: The Kerala Students' Union, the student wing of the Congress (U) Mr. Antony said had desired to have an agitationless academic year. But in the first week after the educational institutions reopened after the vacation, the Students' Federation, students' wing of the "biggest" party in the Government, gave a call for a strike.

"I cannot agree if someone says that the student organisation of the biggest party can do anything and that not even a reply need be given to the just demands voiced by our student organisation", he said

The KPCC (U) chief said he party had always been trying to have open heated discussions within the LDF forums on all issues. But the should not be construed as a weakness by anyone, he underlined

CITU LEADERS ACCEPT INVITATION FROM PRC

Calcutta THE STATESMAN in English 21 Jul 81 p 9

[Text] At the invitation of the All-China Federation of Trade Unions, three leaders of the Centre of Indian Trade Unions, Mr R. Umanath (Tamil Nadu), Mr C. Kannan (Kerala) and Mr Lakshmi Sen (West Bengal) will leave for China on Tuesday on a two-week goodwill mission.

Though the CPI(M) leaders have recently made some critical reference to some of the policies the Chinese Communist Party, specially China's attack on Vietnam, the relations between the two Communist parties seem to be improving as is indicated by an increasing number of visits by the CPI(M) leaders to China.

Mr Jyoti Basu, Mr Mohammed Ismail and a number of leaders of the undivided Communist Party were part of the first trade union delegation to China to attend the May Day celebration in 1958. After the party split in 1964, there was a long gap till September 1979 when three CPI(M) leaders, Mr P. Ramamurthy, Mr Godavari Purulekar and Mr N. Balananda visited China on their way back from North Korea. Mr Saroj Mukherjee, Editor of the CPI(M) daily, Ganashakti, and his wife, Mrs Kanak Mukherjee, M.P., visited China in May 1980. This was followed by a visit by two Politburo members Mr Basav Punnaiah and Mr Samar Mukherjee, Mr Jyotirmoy Bosu, the CPI(M) M.P., had visited China earlier as a member of the Kotnis Memorial Committee.

To fill a long-felt vacuum a theoretical Bengali periodical will be brought out under the editorship of Mr Promode Dasgupta on August 5. An English version is likely to be published shortly from Delhi. The party's Howrah Plenum had stressed in 1978 the need for strengthening the party's ideological base by publishing theoretical journals.

BJP OFFICIAL CONCERNED OVER ADVANCES TO CPSU

Calcutta THE STATESMAN in English 21 Jul 81 p 11

[Text] New Delhi, July 20--Mr J. P. Mathur, Whip of the BJP parliamentary party, today expressed concern over the keenness of Indian political parties, including the ruling Congress(I), to secure official tie-up with the Soviet Communist Party. "The enlightened public opinion in the country must join hands at this hour to ensure that friendship with the Soviet Union does not become an opportunity to the Communist Party of the USSR for intervention through willing political tools" he said in a statement.

One cannot but recall that in Afghanistan similar political rivalries to graft a Soviet model State led to the events of 1975-79 when step by step the country was swallowed up and Soviet troops were brought in to bolster an obviously unpopular pro-Soviet regime. The situation in India could not be compared to that in Afghanistan mainly because of a plural polity and strong countervailing forces, both political and otherwise, he said.

But the ruling Congress(I) has been depending heavily on the Soviet model of a judiciary subservient to the executive. The attempts made by the ruling party to subvert the political system and its various checks and balances imparted the Congress(I)'s alignment with the Soviet Communist Party a dangerous dimension. The ruling party joining the queue of other parties for Soviet favours provided Moscow with the grand opportunity to intervene in Indian politics in the same manner in which the British trading company did in India in the 18th century, Mr Mathur said.

The report of the Congress(I) seeking political ties with the Soviet Communist Party was further strengthened by the political ties the ruling party had already developed with the Communist parties of North Korea and outer Mongolia and which were sought to be developed with the Communist Party of Japan. Mr Mathur said the Congress(I) had also publicly sought Soviet favours through the Friends of Soviet Union organization recently launched by the Prime Minister herself.

"In normal circumstances, the Congress(I)'s foreign ties might not have received the attention which they must do now. In the present context of Soviet power extending to the borders of the Indian subcontinent, the official Soviet doctrine that "it has the right to intervene in other countries to protect Socialism there," and the global Super Power rivalry, such political ties between the ruling party in India with the CPSU and the attempt to project the Congress(I) as the Communist ally or sister Communist party is pregnant with various consequences" he added.

CONGRESS-U LEADERS SEEK REPLACEMENT FOR CHAVAN

New Delhi PATRIOT in English 21 Jul 81 p 7

[Text] With less than a month left for the monsoon session of Parliament to begin the Cong-U leaders have taken up exercise for finding a leader for their parliamentary party in pace of Mr Y. B. Chavan.

According to the party constitution, the CPP leader is elected by the Parliamentary party. Neither the working committee or the office bearers directly interfere in the procedures.

After Mr Chavan's resignation the total strength of the CPP-U is 28-10 in the Lok Sabha and 18 in the Rajya Sabha. Though Mr Jagjivan Ram is the seniormost leader among the Cong-U members in the Lok Sabha, there seems to be considerable resistance from a big section to make him the leader. They fear that he might also go the Chavan way.

This influential section is considering sponsoring some younger leaders with dynamism for the post. In fact, all but Mr Jagjivan Ram all are rather junior in stature. Of the 10 Lok Sabha members, only one has ministerial back ground. Traditionally, the CPP leader is elected from the Lok Sabha.

It is not known whether Mr Jagjivan Ram is planning to jump into the fray. So far, he has not given out his mind even to his close admirers. He had not even attended the last week's Cong-U working committee meeting at Bangalore. In case he jumps into the fray, this is bound to create lots of problems for the CPP-U.

The Congress-U circles say that a meeting of the CPP-U can be called by Mr Bhola Paswan Shastri a senior leader and leader of the Congress-U in the Rajya Sabha. They however rule out the possibility of the CWC-U discussing the issue--as it is entirely the concern of the CPP-U.

Pawar Nominated

Meanwhile, Cong-U president Devraj Urs on Monday nominated MPCC president Sharad Pawar to the Cong-U working committee. Mr Pawar had so far been a special invitee to the committee.

MIDYEAR REVIEW OF STATE OF NATION

New Delhi MONTHLY COMMENTARY ON INDIAN ECONOMIC CONDITIONS in English Jun 81 pp 9-13

[Commentary: "The State of the Nation: A Mid-year Review"]

[Text]

In the months of June and July 1981 the political and economic environments bear a more bewildering look. Some optimism, freely expressed after the Central Budget has evaporated; even the buoyant stock exchanges have lost their recklessness. The Ordinances issued on July 11 and the hike in the Bank rate to 10 per cent and the trends on both prices and payments present a formidable group of events to evaluate. The major awakening to the dangers of inflation is good so far as it goes, but there is no certainty that the measures proposed will meet the exacting nature of this price problem. For the reduction of deficit financing via the hike in petroleum products might look deflationary but the rise in prices of petroleum products is immediately to create a price rise, which, as past experience in 1980 has shown, is not small once the prices run through to all forms of transport and enter industrial costs. There is now talk of a further hike in air fares. Taxis in some cities stay in suspense if not on strike because the logical rise in taxi fares has not been conceded in full by many State administrations. It is obviously impossible for the rise in petroleum prices to be absorbed by units which, in any case, like the bus operations of State Governments, run generally at a loss. Therefore, the question really is: How much anti-inflation is contained in measures which may help the Budget only by creating the equivalent price rise in advance? The theoretical closing of a budget deficit is the end in view. But the end in view is containment of prices and, for precisely this end, paradoxically, the end is not in view.

This mid-year review, while it should concentrate on the greater crisis in the management of the economy, should also take in the political scene, partly because the burden of price rises will now be exploited politically by Opposition parties. Here the Central Government can certainly claim the support of the people as reflected in the mini-elections held on June 13 and 14. In these mini-elections seven Lok Sabha Constituencies and 23 Assembly Constituencies went to the polls to fill vacancies which had been accumulated over the year. If we ignore the results of the single Constituencies, in two States, of Cuttack and Dharwar which went to Congress (I) candidates, there is the constrasting position of sweeping Congress (I) successes in Uttar Pradesh and sweeping CPM victories in West Bengal. A Special Article in this issue describes the facts and figures in each case, but the central message of the mini-elections should not be lost in a maze of figures. The mood of the electorate might appear ambivalent, by giving mandates to different parties in the Uttar Pradesh and West Bengal. This is a mature verdict since it is wise not to detract the country further by allowing political controversies to expand. It is good that, at least for a year or two, the view that the Congress (I) was losing ground at the Centre or that the West Bengal Government was losing ground in Calcutta and needs replacement should both be disproved. If the undercurrents were in fact in that direction, then these were nowhere seen in these elections. Only a postscript need be added on the dramatic arrival of Rajiv Gandhi on the scene. He is

now obviously a major political force within the country. This is probably not a force very different or separate from the Prime Minister's power. It would appear that Rajiv Gandhi is more at the moment a channel of communication than a decision-making authority on his own, but Time has shown, both in Amethi and elsewhere, that a new political personality has been installed.

In an assessment of the State of the Nation at the present time one should also draw attention to the arrival of the monsoons in July in force adequate to support the view that India will have another good agricultural year. The month of June was, indeed, full of suspense because the rains, after a favourable start in the first week of June, suddenly abated and did not reappear in benevolent form until the fourth week of the month. After the breaking of these abundant rains, there is surprise naturally at the Government's decision announced by the Prime Minister in her Press Conference on July 10 that two million tonnes of wheat were to be imported. In view of our falling foreign exchange balances, this decision is difficult to justify. Even if the figure were 1.5 million tonnes as the reports now suggest, the cost would be Rs. 240 crores and the landed price will be Rs. 160 per quintal as against Government's procurement price of Rs. 130 and private dealer's purchases at about Rs. 150 per quintal. If the rice *kharif* harvest is good or better than last year, stocks of foodgrains would not be below "normal" requirements. Therefore, to make up a failure of procurement of about two million tonnes by imports was an act of haste, apparently in brief that the inflationary spell would now cover foodgrains also. But if foodgrains prices rise, the main reason will be the rise in price of fertilisers and other inputs generated by Government's administered prices on petroleum and feedstocks. It is not the result of a shortage of foodgrains, but of the cost-push inflation initiated by Government's policy of raising all prices which it controls instead of setting its face against all price rises in a drastic and determined manner.

When one looks at the whole situation, there is also cause for concern elsewhere. While domestic political controversies have died down, there are clouds on the horizon as a result of the increased armaments announced in Pakistan and, perhaps an exaggerated view that India must greatly increase her defence expenditure to ensure security against a possible use of these armaments against us. Happily the Chinese Foreign Minister's visit has been favourable as indicated in one of the leading articles which follows. But, all in all, the international situation with our neighbours is more disturbing than it was at the beginning of the year.

A major error in administered prices is to be corrected. A cost-push inflation, where administered prices are setting the pace, cannot be offset by drastic control on money supply or ensuring greater liquidity of the banks and higher interest rates. Indeed, the prospect is that, while reducing credit for industrial production, there will be a reduced cushion for excessive expenditure both by the Government and commercial sectors. It is a unique phenomenon in that, with an adverse balance of trade in 1980-81 of Rs. 5,436 crores—an almost incredible figure for India—we have not been insulated from rises in money supply. This is because Government borrowing and Government deficit financing together have already exceeded this huge adverse balance of trade, and money supply has risen from 17 to 19 per cent already within the year. This underlines the important point that at this point of time Government expenditure both Capital and Revenue are excessive and are fanning the fires of inflation which were lit by high administered prices in 1980 in the first instance. Now raising prices will merely add more fuel to the fire. You cannot control prices by first raising them and keeping expenditure undiminished. The right step is a cut in Government expenditure, perhaps of the order of Rs. 2,000 crores by which Government commercial borrowing has been in excess. Who, except the Prime Minister herself, can subdue this demon in the works?

OPTIMISM OVER NEW INDO-EEC AGREEMENT EXPRESSED

New Delhi MONTHLY COMMENTARY ON INDIAN ECONOMIC CONDITIONS in English Jun 81 pp 10, 11

[Commentary: "India and the EEC"]

[Text]

The new five-year agreement signed on June 23 between India and the European Economic Community marks a further stage in trade and economic co-operation between the two, which began with the earlier agreement of 1973. Even earlier, India had enjoyed a special relationship with individual members of the Community such as Britain by reason of historical links and West Germany because of the aid collaboration given by this country for several of the basic and heavy industrial projects in both the public and private sectors. These links have been maintained and strengthened on the basis of their bilateral interests and understanding of mutual needs. However, the European Economic Community has a distinct structure and interests of its own in the economic sphere the importance of which could not be overlooked by India after Britain's entry into the European Common Market and the old Commonwealth preferences in trade ceased to apply in favour of India's exports to the British market.

India has always had an adverse balance of trade with the West European countries largely because of substantial imports of machinery and capital equipment for development while being unable to export enough of the types of goods required by them. The hope behind the 1973 agreement was that this position would change gradually as India acquired the capacity to export manufactured products to the West while relying increasingly on its indigenously manufactured machiney and capital goods. That hope has not materialised yet and the adverse balance of trade has not only continued but has shown a tendency to increase further in the last two years.

The EEC is India's largest export market taking about 26 per cent of all our exports while providing 31 per cent of India's imports. It is said that India is one of the largest beneficiaries of EEC's Generalised System of Preferences (GSP) which compensates this country for the loss of Commonwealth Preference. Some additional concessions have been offered in periodical reviews of the working of GSP on such products as footwear, sports goods, prawns and shrimps, packaged tea, castor oil and cashew nuts. Viewed in the context and scale of India's export promotion efforts, these may not seem very impressive. Whatever benefits have accrued from these concessions have been overshadowed by the protectionist policies of West European Countries in textiles, leather goods and garments. The tariff reductions agreed to by the EEC under GATT's multilateral trade negotiations apply to about 43 per cent of EEC imports of industrial goods from India which consequently enter free of duty while lower tariffs are charged on the rest of EEC's imports. However, when the total volume of imports is restricted by other measures these percentages by themselves offer only small consolation. This consideration will apply also to the benefits from duty free entry of tropical agricultural products since the quantities are not large.

India's deficit in trade with the EEC which was Rs. 506 crores in 1978-79 and Rs. 483 crores in 1979-80 increased sharply to Rs. 783 crores in the first half of 1980-81. India has been in deficit with West Germany, Britain, France and Belgium but has been earning a moderate surplus with Italy, Denmark and the Netherlands. This has strengthened the impression that India's import liberalisation policies of the last few years had increased EEC exports while the protectionist policies of the latter's member countries has hurt India's exports. It is, however, true that when India's imports are financed by bilateral or multilateral aid, a certain amount of imbalance is bound to arise and should be understood as reasonable. The question is to what extent the restrictive policies of the EEC affect India's trade with its members. The latest agreement provides machinery in the shape of a Joint Commission to promote and keep under review the various forms of co-operation envisaged in the agreement and to provide a forum for consulation on matters of industrial, technical and scientific co-operation and ways of facilitating increased and mutually beneficial investment. It is important that this machinery should be activated without any further delay so that all the differences can be sorted out. With almost stagnant exports and a declining foreign exchange reserves owing to the high cost of oil imports, India cannot afford to take a complacent view of imbalances in trade with any country or area and the severe setback suffered last year in relation to the EEC needs to be checked.

Apart from the latest agreement, the outlook for greater understanding may improve with the progress of the North-South dialogue in the coming months in the various international gatherings beginning with the Ottawa summit of the seven major powers. The Mexico summit in October and the subsequent global negotiations under U.N. auspices are expected to continue this process in which more concessions are expected on trade and aid, judging by the helpful pronouncements of the leaders of the industrial countries. Within the EEC, the advent of M. Mitterrand's socialist government in France may have some influence on the approach of the Community as a whole considering that in the past, French attitudes had been decisive in many matters. There is thus basis for viewing the new Indo-EEC agreement with optimism.

ENCLAVE EXCHANGE WITH BANGLADESH ADVOCATED

New Delhi PATRIOT in English 19 Jul 81 p 4

[Text]

CALCUTTA, July 18.

WEST BENGAL Forward Bloc leader Ashok Ghosh said here today that his party wanted a total exchange of enclaves between India and Bangladesh.

Addressing a press conference here this afternoon, Mr. Ghosh said that there are 131 Indian enclaves in Bangladesh with a total area of 29 square miles and with a population of one lakh people. Bangladesh has 95 enclaves in India including Dahagram and Angarpota, measuring 18 square miles and with a population of 25,000.

The Forward Bloc is also opposed to India giving out Tin Bigha to Bangladesh on long lease. If Tin Bigha is given to Bangladesh on lease, it would mean 30,000 square miles with 31,000 people being cut off completely from the mainland of India. This would mean another Indian enclave in Bangladesh.

Mr Ghosh pointed out that the 1974 agreement between Prime Minister Indira Gandhi and Sheikh Mujibur Rahman in respect of Dahagram, Angarpota and Tinbigha has never been ratified by the Indian Parliament to this day. In Bangladesh it was ratified only by a special committee and not by the country's Parliament.

The Forward Bloc, therefore, would urge the Centre to reconsider the whole issue so that Tinbigha is not given to Bangladesh on lease and Dahagram and Angarpota are returned to India along with other enclaves, in exchange of all Indian enclaves in Bangladesh.

Mr Amar Roy Pradhan M.P. who was also present at the press conference said he submitted on 20 June a note to Mrs Gandhi on the same line of arguments, and that the Prime Minister assured him of her consideration of the case

Mr Kamal Guha, Minister for Agriculture in the West Bengal Government, was also present at the press conference. He said no Bangladesh team could be permitted to proceed to any enclave via Tinbigha. If they wanted, they could process via any recognised check-post, as was the custom "when we have to cross into that territory on occasions."

Mr Guha would submit a detailed memorandum to Minister Jyoti Basu so that the latter could take up the issue with the Prime Minister when the two meet in Delhi on 23 July. Mr Basu would also request the Prime Minister that in such matters the Centre should have discussion with the West Bengal Government.

DELHI MEETING OF OPPOSITION PARTIES REPORTED

New Delhi PATRIOT in English 18 Jul 81 pp 1, 7

[Text]

THE Opposition parties which met on a common platform after a gap of eight months at Mr Chandra Shekhar's invitation set up a joint committee on Friday to prepare a "comprehensive report on electoral reforms."

The report will be discussed at their next meeting in the third week of August.

Mr H N Bahuguna (DSF) and Mr Raj Narain (SP) disfavoured setting up of the committee, and instead suggested that the issue be left to the parliamentary wings of the different opposition parties because it was essentially in Parliament where the reforms could be pressed through.

However, most other parties agreed that a committee should be set up to prepare a report on the subject. It was also agreed that any joint discussion on evolving a strategy for mobilising public opinion for free and fair elections should be put off until the issue was discussed within every party.

A suggestion put forth by BJP's L K Advani and supported by Lok Dal's Biju Patnaik for forming one more committee to work out a joint action or common campaign plan for the broad range of the opposition parties was rejected at the outset because no one else was willing to go that far at the very first meeting. Similar suggestions for broadening the scope of the discussions and action to cover issues beyond electoral reforms were also turned down.

Mr Raj Narain's suggestion supported by Mr Prakash Singh Badal (Akali Dal, for launching an agitation for removal of Mrs Indira Gandhi over the rigging of recent elections and for a gherao of Parliament House on the opening day of the monsoon session also fell through.

The Lok Dal and the CPI-M representatives said that their parties had demanded Mrs Gandhi's resignation in the wake of the Election Commission order on the Garhwal poll and felt that the issue might not yield much fruit, if pressed further. Mr Chandrajit Yadav also did not think the issue justified raising such a demand.

Fourteen parties were invited to the meeting but the CPI refused to attend at the very first because of the invitation extended to the BJP, while the AIADMK did not send any representative. The 12 parties which attended the meeting included the CPI-M the BJP, the Janata Party, the Lok Dal, the Cong-U, the Akali Dal, the National Conference, the Forward Bloc, the RSP, the Democratic Socialist Front, the Janavadi Party and the Socialist Party.

Mr Advani's call for an all-opposition unity against the Government failed to receive any support as most other participants like the CPI-M, the Forward Bloc, the RSP, the DSF and the Janwadi Party insisted that the meeting limit itself to the task set before it; that is, electoral reforms.

Mr Yadav said that this was not the forum at which such a proposal could be discussed because that would involve ideological issues. Mr H N Bahuguna remarked that any attempt to broaden the subject of discussions would bring in ideological nuances and basic political orientations of the different parties present, which was not what was intended in the invitation.

CPI's Absence

Several participants referred to the absence of the CPI and the need for involving it in the discussions. It was agreed that efforts should continue to bring in the CPI also into such discussions.

However, the repeated references to the absence of the CPI seemed to irk Mr Chandra Shekhar for, when Mr Maniram Bagri said at one stage that being a party of struggle the CPI should not have been left out of the meeting, he remarked angrily: "What is the CPI? I invited them. Why did they not come? They should have come. And how are they a party of struggle? Are we not struggling?"

Despite this, Mr Chandra Shekhar himself said afterwards that efforts to bring in the CPI would continue.

The CPI, voicing its opposition to an all-in opposition unity, has, however, said that if it were only a question of electoral reforms it could be taken up at the level of the parliamentary wings of different parties.

Nine-Man Panel

The nine-member panel set up to formulate the electoral reforms draft includes Mr Madhu Limaye (Lok Dal), Mr Chitta Basu (Forward Bloc), Mr L. K. Advani (BJP), Mr P. Ramamurthy (CPI-M), Mr Banarsi Das (Democratic Party), Mr Balwant Singh (Akali Dal), Mr Banka Behari Das (Cong-U) and Mr Chandra Shekhar and Mr Ravindra Varma (chairmen).

The meeting decided that a resolution must be prepared by the Opposition parties on making the elections tamper-proof to be introduced in the next session of Parliament. This will be done after further consultations with the Opposition parties and at the panel.

Mr Chandra Shekhar, who briefed the Press, said that the meeting adopted the first part of his three-page note. As for the second part which deals with the programme for mass mobilisation, several party leaders wanted time to consult their colleagues on details. It was then decided to place before the nine-member panel the views of the respective parties so that it could finalise the programme before the August meeting.

The meeting adopted a joint statement on the 'unprecedented assault on the electoral system in byelections' and called for a 'basic and urgent response' from the people and the political parties.

Welcoming the Chief Election Commissioner's decision ordering a repoll in the Garhwal parliamentary constituency, the statement said: 'The people must assert themselves to thwart a process in which the armed might of police and anti-social groups acting under its protection violates fundamental electoral rights.'

This is the fourth major attempt by the Opposition parties to come closer to fight the ruling party. Soon after the electoral defeat in January, 1980, a meeting of the Opposition parties barring the BJP, was called. But it failed to evolve a

common strategy in the Assembly elections a month later. The Opposition's move for floor cooperation in Parliament also proved a failure, though on some issues they could put up a joint fight. The talks for common candidates in the recent byelections also did not succeed.

The leaders attended the meeting.

Apart from Janta leaders Mr Chandra Shekhar, Madhu Dandavate, Mr Ravindra Varma, Mr Surendra Mohan, Mrs Sarojini Mahishi, others who were present at the meeting were Mr Devraj Urs, Mrs Ambika Soni, Mr Banka Behari Das (Cong-U), Mr L. K. Advani (BJP), Mr Biju Patnaik, Mr Basavapunnaiah, Mr Jaipal Singh (CP-M), Mr Chitta Bose, Mr D.D.S. Shastry (Forward Bloc), Mr Maniram Bagri, Mr Raj Narain, Mr Kalyan Jain, Mr Brij Bhushan Tiwari (Socialist), Mr Prakash Singh Badal, Mr Balwant Singh (Akali), Mr H. N. Bahuguna, Mr Raghunath Reddy, Mr Harikesh Bahadur, Mr Ashfaq Hussain, Mr Neelalohida Dasan (DSFO), Mr Chandrajit Yadav, Banarsi Das, Mr S. A. Hashmi (Janavadi Party), Mr Farooq Abdullah and Mr Mubarak Shah (National Conference).

AIR FORCE PLANNING TO TRAIN MORE PILOTS

New Delhi PATRIOT in English 20 Jul 81 pp 1, 7

[Text]

The Indian Air Force is about to improve its capacity to train a three times larger number of pilots for Indian requirements, and friendly foreign countries.

In a two-phase programme it will increase training facilities at the Air Force Academy at Dundigal near Hyderabad and within the next three years set up another academy in the south to be able to turn out nearly 300 pilots per year over a 20 year span.

An important aspect of the programme is to utilise the demand from self-financing developing countries in Asia and Africa to train their pilots to amortise the expenditure on the new facilities within two years.

It is expected that India can earn nearly Rs 20 crore annually from countries like Zambia, Iraq, Jordan, Kenya, Ghana, Nigeria, Egypt, Malaysia and the UAE.

There has been a sharp increase in requests for training facilities from these countries in the past two years because of the growing awareness of the high standard of professionalism imparted at Indian military training institutions.

Also, developing countries are finding it politically more expedient to have their armed personnel trained in a non-aligned country rather than in one of the developed countries.

At present the IAF trains about four foreign pilots every year as against a demand for about 17 seats. Under the proposed plan it will be able to train about 40 foreign pilots every year.

The IAF has suggested to Government that till it takes a final decision on expansion of training facilities for foreign pilots it should be allowed to increase by 10 per cent the present training capacity to cater to the urgent needs of the foreigners as an interim measure.

Apart from training pilots from countries that pay for the privilege, India also trains pilots from Sri Lanka, Sudan, Mauritius, Indonesia, Tanzania, Afghanistan and Nepal either free of cost or on nominal payment.

India's own requirements for pilots able to fly fighter-bombers, transport aircraft and helicopters is going to increase significantly because of the demands of the IAF, the Indian Navy and the Army.

Simultaneously, Hindustan Aeronautics Ltd will have to improve its output of trainer aircraft like the basic trainer HPT-32 and the Kiran jet trainer.

MANHUNT ON FOR TRIPURA EXTREMIST LEADERS

New Delhi PATRIOT in English 20 Jul 81 p 4

[Text]

AGARTALA, July 19 (UNI).

TRIPURA police are on the look-out for at least seven top extremist leaders of the outlawed Tripura National Volunteers (TNV), who have been eluding the security dragnet since the outbreak of communal disturbances in June last year.

Though official sources deny any fresh large-scale combing operation to flush out the extremists, security forces are keeping a constant vigil, it is learnt.

According to a authoritative sources, hundreds of tribal extremists who fled into the jungles after conducting a series of attacks, including two armed raids on Abagabil are still on the run.

The police raided Larjanmura village in Teliamura, near here, on Friday and arrested a TNV extremist, Ganapati Jamtia alias Ganak, who allegedly had received weapons training in Bangladesh.

He had been reported to be recruiting tribal youths from villages situated on the foothills of the Boromura ranges.

Another prominent tribal extremist, Rabindra Chakma, was apprehended at a village under Manu police station in the north district the same day. A country-made gun was recovered from his possession.

Extremists on the wanted list include 20-year-old Chuni Kolai, suspected to be the second-in-command of the TNV forces, absconding Tripura Upajati Juba Samiti (TUJS) MLA Harinath Debbarma, Khagen Jamatia, Birendra Kolai and Upendra Jamatia.

Intelligence officials are not quite sure about the real intentions of the TNV extremists who are reported to have forged links with Mizo National Front (MNF) rebels and crossed over to Bangladesh for weapons training.

A secret appeal was made recently by a leading TUJS MLA who is now on bail, urging the extremists to surrender to the authorities, but it was turned down. The TUJS had also taken out anticipatory bail on behalf of Mr Harinath Debbarma. The 'Tripura Sena,' its militant organisational wing, has already been disbanded.

The terms of surrender were further spelt out by Mr Bejoy Hrankhal 'commander-in-chief of the TNV,' who stated after his release that he was no longer associated with the extremist organisation he had founded. Mr Hrankhal wanted a peace zone to be declared and a general amnesty announced to enable the extremists to lay down their arms.

WEST BENGAL LAW AND ORDER SITUATION 'SATISFACTORY'

Calcutta THE STATESMAN in English 21 Jul 81 p 1

[Text]

THE law and order situation in West Bengal was found to be satisfactory at the recent meeting of Chief Secretaries held in Delhi to review the situation. The meeting, however noted that there had been an increase in the number of intra-party clashes in the State.

Briefing reporters on the meeting, Mr A. K. Sen, Chief Secretary, West Bengal, said on Monday that compared to other States, there were fewer communal clashes in West Bengal in 1980. Even when such incidents had taken place, they were soon brought under control. Organized violence on Scheduled Castes and Scheduled Tribes was rare. Cases of farmers' agitation were not many in West Bengal compared to other States during the year under review. There had been a few cases of students' agitation but they did not turn violent. Examinations were held more or less peacefully.

Mr Sen said that West Bengal was fifth in the crime position in the all-India context. According to a survey conducted by the Centre, in 1980 there had been 175 crimes per one lakh population in the State. In U.P., it was 187, in Tamil Nadu 184, Maharashtra 278, Delhi (including rural areas) 644, Andhra Pradesh 112, Haryana 134 and Punjab 72. The meeting expressed concern at the increasing number of cases under trial in West Bengal. According to available figures the number of pending cases was 79,800 in 1972. It had gone up to 164,100 in 1980. It was noticed that the figure had gone up since the separation of the judiciary from the executive. The inspection machinery was inadequate. It was accepted at the meeting that executive magistrate should be given powers to try the cases other than those within the Indian Penal Code. If necessary, suitable amendments should be made to the Criminal Procedure Code.

The meeting, Mr Sen said was also concerned at the growing incidence of corruption in the judiciary. It was decided that a separate cell on the lines of vigilance commission should be set up to look into the alleged cases of corruption among members of the judiciary and necessary legislation in this regard should be introduced. On the problem of modernizing police housing schemes, it was decided that the scheme would be Centrally sponsored and the cost would be shared equally by the Centre and the State. Rs 100 crores had been set apart for modernizing the police force under a 10-year programme in a uniform all-India pattern. It was agreed that the laws relating to granting of bail to those who had previous convictions in murder and rape cases should be made more stringent.

FOREIGN AID FOR UTTAR PRADESH POWER PLANTS URGED

Calcutta THE STATESMAN in English 21 Jul 81 p 7

[Text]

LUCKNOW, July 20.—In view of the constraint on resources, the State Government has proposed to the Centre that the power projects in Uttar Pradesh be financed by international institutions. Kuwaiti funds, to the extent of Rs 75 crores, have already been made available to Anpara "A" thermal project. This will also provide an additional 70% to the State resource during the Sixth Plan on a reimbursement basis.

An offer of about Rs 400 crore from Mitsu and Company, Japan to design, erect and commission two units of 500 MW each of Anpara "B" thermal project on a turnkey basis within a period of about four years, along with the development of coal mining facilities to match with commissioning schedule, had already been submitted to the Centre by the State Government. The Department of Economic Affairs, Government of India, it is stated, is prepared to include this project under the yen credit, provided the project is cleared by the Planning Commission and coal linkage is advanced from 1989-90 to 1985-86, which is a possible commissioning period.

Two hydro-electric projects have been proposed for financing under Canadian aid: the Pala Maneri hydro-electric scheme at an estimated cost of Rs 118.44 crores, and the Lohari Nag Pala hydro-electric scheme at an estimated cost of Rs 126.92 crores. Both the projects are located on Bhagirathi river in Uttar Kashi district.

The U.P. State Electricity Board has also proposed financing of some generation projects under World Bank aid.

OVER A DOZEN DIPLOMATIC APPOINTMENTS FINALIZED

Madras THE HINDU in English 21 Jul 81 p 9

[Article by G. K. Reddy]

[Text]

NEW DELHI, July 20.

After a long delay the Government has finalised the appointments of more than a dozen Ambassadors and High Commissioners either to fill the existing vacancies or reassign some of them to new posts, while appointing a number of Joint Secretaries as heads of missions.

The present Ambassador to Egypt, Mr K. P. S. Menon, goes to Japan to fill the 10-month old vacancy caused by the appointment of Mr V. K. Ahuja as envoy to the Soviet Union.

Mr Menon's place in Cairo will be taken by Mr Alfred Gonsalves who has completed his tenure as High Commissioner to Tanzania. He is being replaced by Mr. N. P. Alexander, now Ambassador to Sweden.

The Joint Secretary dealing with external affairs in the Prime Minister's secretariat, Mr K. W. Bakshi, who belongs to the IFS, has been appointed Ambassador to Sweden in place of Mr Alex Inder.

Post in Norway vacant: The post in Norway has fallen vacant fo[illegible]wing the refusal of the former Chief M[illegible]ster of Manipur, Mr Dorendra Sing[illegible], to accept the political appointment. The Government has no[illegible] yet de[illegible]ed whether the vacancy [illegible] by a career officer or [illegible] appointee.

The Joint Secretary [illegible] South-East Asia, Mr R [illegible] been appointed Ambassad[illegible]. The present incumbent [illegible] A. [illegible] L. N. Rangarajan, goes t[illegible] Sudan.

The Joint Secretary [illegible] charge [illegible] northern division dealing [illegible] and Bhutan Mr A. N. Ram[illegible] been posted as envoy to Zamb[illegible] place of Mr Ravi Tandon who died recen[illegible] in a flying accident.

The present Deputy High C[illegible]missioner in London, Dr I. P. Singh, is being transferred as Ambassador to Spain. His place in London will be taken by Mr. P. Johari, the Joint Secretary in the External Affairs Ministry dealing with Pakistan and Afghanistan.

The Ambassador to Argentina, Mr R. K. Anand, is being shifted to Senegal on completion of his tenure. His place in Buenos Aires will be taken by Mr. L. L. Mehrotra, who is Minister (political) in the Embassy in Moscow.

He in turn will be replaced by Mr A. Madhavan, a senior Joint Secretary who was dealing with Western Europe until he proceeded to the Harvard University, last year under a government-sponsored study scheme.

The former director in the China division, Mr V. C. Khanna, has been appointed Ambassador to Cuba in place of Dr. P. M. S. Malik, who goes to Jordan.

A number of other changes will follow shortly to improve the quality of Indian representation in some sensitive countries as and when vacancies occur in the normal course or the need is felt for posting more experienced persons in [illegible] se p[illegible]ces.

Promotions: Th[illegible] latest instalment of ambassadorial [illegible]ntments will also lead to a sen[illegible] promotions in the foreign services to fill the posts of Joint Secretaries that have fallen vacant.

A number of other Joint Secretaries are also due for promotion to grade [illegible] of the foreign service which entitles them to be upgraded as Additional Secretaries as and when vacancies [illegible]our for accommodating them.

The Foreign Secretary, Mr. R. D [illegible] due to retire at the end of Apr[illegible]2. Those in the line of succe[illegible] are Mr M. K. Rasgotra, who [illegible] Am[illegible]ador to France, and Mr. Eric [illegible]es and Mr. Romesh Bhandari, [illegible]ve secretaries in the External [illegible] Ministry at present.

SOCIALISTS, DEMOCRATIC FACTION MERGE WITH DSF

New Delhi PATRIOT in English 19 Jul 81 pp 1, 7

[Text]

THE DEMOCRATIC Socialist Front acquired a broader base on Saturday when the Socialist Party led by Mr Raj Narain, and a faction of the Democratic Party led by Mr Banarsi Das, former UP Chief Minister, merged with it.

In the process, the Democratic Party was vertically split, kicking up a new controversy. Its chairman Chandrajit Yadav denied his party's merger, and threatening Mr Das with expulsion.

The surprise development of merger was announced to newsmen by DSF chairman H N Bahuguna after a meeting of the representatives of the three parties held at Constitution Club. Mr Raj Narain' resided.

The meeting was attended, among others, by Mr Bahuguna himself, Mr Mani Ram Bagri, Mr Bhola Prasad Singh, Mr Banarsi Das, Mrs Tarkeshwari Sinha, Mr Janeshwar Mishra and Mr Harikesh Bahadur.

Mr Bahuguna, who was flanked by Mr Raj Narain, Mr Mani Ram Bagri (both of the erstwhile Socialist Party) and Mr Banarsi Das (Democratic Party), told newsmen that the meeting unanimously set up a three-man committee to decide the issue of party flag, constitution, programme and policy statement.

These would be placed before a joint session of workers of the three parties for ratification. Mr Bahuguna is the convener of the committee which includes Mr Raj Narain and Mr Banarsi Das as members.

POLARISATION PROCESS

Mr Bahuguna said the decision was taken after a discussion on the possibility of reducing the number of fragmented Opposition parties. 'Our effort has been to bring democratic, socialist and secular parties together. Today, we are able to reduce their number from three to one—that is, two less.'

Mr Bahuguna added, 'This is not the destination. It is only a milestone.'

In reply to a question, Mr Bahuguna said 'It is our hope that polarisation of forces would start.'

Asked what would be the DSF's attitude towards the Opposition leaders' meetings to be held in future in continuation of the one held on Friday, Mr Bahuguna said it would not be of non-cooperation. But the DSF would now take its own position.

Mr Banarsi Das told newsmen that he was authorised by the Democratic Party's national council meeting on 6 April to negotiate for the party's merger with like-minded parties. It was only in furtherance of that objective and authorisation that he decided that the DP should merge with the DSF.

Mr Raj Narain said in response to his invitation to the Democratic Party president Chandrajit

BENGAL LEFT FRONT, CPI-M COMMITTEES HOLD MEETINGS

Calcutta THE STATESMAN in English 19 Jul 81 p 3

[Text]

The Left Front Committee, at its meting in Calcutta on Saturday, said that it had sent a telex message to the Prime Minister, requesting her to make arrangements for supplying fuel for bus, taxi and ferry services at the old rates.

On the Tin Bigha issue, Mr Promode Dasgupta, chairman of the Left Front, said that the committee wanted the problems relating to the enclaves in the area to be solved peacefully. Mr Jyoti Basu would talk to the appropriate authorities in Delhi during his coming visit to the capital.

The State Committee of the CPI (M), at its meeting during the day, analysed the reports on the municipal poll and by-elections in the State. Guidelines for running the municipalities were suggested.

Mr Dasgupta said that the CPI (M) had fared well in the elections". Generally speaking, we have polled more votes than we expected". He added that because of the absence of the Congress (I), campaigns for the elections had not been politically intense. The CPI (M)'s performance was better in towns "with a tradition of democratic movement". At other places, independants polled more votes than the CPI(M).

Mr Dasgupta said steps should be taken to ensure people's involvement in municipal affairs. They should be kept informed about the income, expenditure and future planning of the municipalities concerned. Performance of the administration should be reviewed every six months.

The State committee decided to begin a campaign against the Centre, by forming an anti-authoritarian platform. Its main objectives would be to highlight the aberrations of the authoritarian rule in the country. Mr Dasgupta said that the recent rise in the prices of petroleum products and charges for postal services through executive orders indicated the Centre's motive to introduce a Presidential form of Government. He criticized the Centre's move for importing wheat from the USA. All these issues would figure in the proposed campaign against Mrs Gandhi's Government, he added.

SATHE: GOVERNMENT SEEKS OPEN DIALOGUE WITH PRESS

New Delhi PATRIOT in English 19 Jul 81 p 5

[Text]

Information and Broadcasting Minister Vasant Sathe has called for an open dialogue' between the press and the Government to remove any apprehension about the Government's attitude vis-a-vis the press, reports PTI.

Participating in a 'meet the press programme' planned as the first in a new series, telecast by Delhi Doordarshan on Friday night. Mr Sathe said it was high time journalists disabused their minds of any intention on the part of the Government to stifle the freedom of the press.

"Show me a single instance during my one-and-half year in office that I have tried directly or indirectly any arm twisting of any editor', Mr Sathe said.

Those participating in the programme — Mr Khushwant Singh editor Hindustan Times, Mr Inder Malhotra, resident editor Times of India. Mr S Nihal Singh editor, Indian Express, Mr Hari Jai Singh, editor National Herald and Mr Vishwabandhu Gupta, editor 'Tej' — agreed with the Minister.

Mr Sathe joined issue with the editors, who suggested that the exercise Award and 15 per cent exercise duty on newsprint would kill newspapers.

AWARD DEFENDED

Strongly disagreeing with them the Minister remarked that whenever an excise duty was levied on the newspaper industry there was a hue and cry that it would choke the industry. However, he did not see a single newspaper closing down. On the other hand, he said, they had been flourishing.

About Palekar Award, Mr Sathe said the award was given by a tribunal for journalists and non-journalists, who had been denied wage revision for 15 years.

"What do you expect the Government to do, to thwart this award", he asked.

Mr Khushwant Singh and Mr Nihal Singh quoted that Chief Ministers of Karnataka Gundu Rao and that of Maharashtra A R Antulay, as calling journalists 'snakes, scorpians and prostitutes. They also recalled some of Mr Sathe's own remarks, not very complimentary to journalists.

Mr Sathe clarified that remarks of the two Chief Ministers were 'mere generalisation'. The remarks were not directed against the press as a whole. They were drawn out of context.

About his own remarks while addressing a meeting of the Chamber of Commerce in Calcutta, the Minister said he was also quoted out of context. He was talking of the entire value system being on commercial consideration. There was no intention to denigrade journalists.

Mr Sathe pointed out that sometime people in authority were also abused in the press.

ADVERTISEMENT ISSUE

The Minister said the Government had not taken any decision on the 60:40 news and advertisement ratio in the newspapers. The proposal first came up at the newsprint advisory committee and all the members were unanimous in their view that 60:40 news and advertisement ratio should be enforced. This view was also endorsed by the consultative committee of Members of Parliament attached to his Ministry.

He added that while the Government had yet to take a decision on this question, one thing that struck him as valid was the need for definition of news and newspapers.

He said this could be done by the newspapers themselves or jointly by the Government and the press. The Government had a role in this because it supplied the newsprint and registered the newspapers. He did not think that this will impinge on the freedom of the press.

As long as the Government had to supply the newsprint on which it spent Rs 150 crore in foreign exchange, it had to regulate the supply so as to meet the growing demand of the small and medium newspapers, Mr Sathe added.

The Minister agreed with the suggestion that a code of ethics for newspaper was necessary, but this should be evolved and implemented by the newspapers themselves.

The Press Council also felt that it could not enforce any code of ethics because it had no teeth. he said adding just as the newspapers campaigned for unadulterated food and unadulterated liquor the news should also be unadulterated.

If care was taken to verify the facts. there would be no problem, Mr Sathe added.

BJP PRESIDENT HOLDS NEWS CONFERENCE IN MADRAS

Madras THE HINDU in English 18 Jul 81 p 7

[Text]

MADRAS, July 17.

The Bharatiya Janata Party has decided to launch a campaign demanding that American wheat should not be unloaded in India as a protest against the U.S. refusal to supply fuel to the Tarapur plant.

The BJP President, Mr. A. B. Vajpayee, announcing his party's decision at a news conference here today said the campaign would be "no fuel, no food."

The party's decision should not cause a fear among the people. Punjab had a bumper wheat harvest and it could be distributed wherever needed. If there was any short supply of wheat in any part, it was only due to mismanagement.

U.S. arms for Paki: On the arms build-up by Pakistan, he said there was no doubt that cold war was at the door-steps of India following the supply of sophisticated weapons by the U.S. to Pakistan. But he did not see any immediate danger or threat to the country's security.

It would be better if the Prime Minister, Mrs. Gandhi, took into confidence the Opposition leaders and apprised them of the correct situation so that a united effort could be forged to meet any challenge. National security was not the concern of a particular party. All the parties and the people should be on the alert to defend the country.

The BJP leader, however, criticised the Prime Minister's view that the Opposition parties were always for confrontation with the Government. On the other hand, it was the Prime Minister alone who was in confrontation with the Opposition. On all national problems — national security, foreign nationals' issue in Assam, reservation issue — the Opposition cooperated with the Government despite some differences.

Opposing the recent increase in the prices of petrol, furnace oil, cooking gas, kerosene etc., he feared that this step would push up the prices further.

Mr. Vajpayee admitted that political murders had increased in Kerala. But that should not be used as a handle by the Prime Minister to topple the left-front Government in that State.

BIHAR CHIEF MINISTER CITES GOVERNMENT PROGRESS

Calcutta THE STATESMAN in English 22 Jul 81 p 9

[Text]

NEW DELHI, July 21.—The fact that foreign exchange reserves fell by just Rs 511.96 crores in 1980-81 despite the enormous trade gap of Rs 5.535 crores was mainly because of the large in-flow of foreign exchange in 1980 amounting to Rs 4,467.28 crores on account of earnings from "invisibles".

These are earnings on account of remittances from Indians abroad, tourism, shipping, airlines and the like. The bulk of the inflow is thought to be due to remittances from Indians working in West Asia, especially in Iraq.

However, there are signs that such remittances will drop this year. A large number of Indians returned from Iraq and Iran following the outbreak of war between the two countries and many of them made bulk remittances before leaving.

This is borne out by the fact that there was a sharp upsurge in remittances from August to October, 1980, coinciding wih the height of the Iraq-Iran war. As much as Rs 1,931.54 crores came in as remittances during this three month period, or just under half the amount that was received durmg the whole year.

The war is still not over and, although Indian companies have won a number of construction and engineering contracts in Iraq in recent months, the number of Indians in that country working on them has declined sharply. Hence remittances this year are expected to be less.

However, large numbers of Indians are still finding jobs in many countries in the Gulf region both in Indian projects and those won by other countries, in addition to finding employment with local companies. On the other hand, many who have completed their contracts are now returning. Hence the expectation that remittances have passed their peak.

The foreign exchange reserves are now falling faster, partly for this reason, although they are still at the relatively comfortable level of just over Rs 4,000 crores. This is partly because of loans of Rs 812 crores from the International monetary fund last year. Had these loans not come through, the reserves would have dropped in 1980-81 by Rs 1,327.31 crores, a fall of more than Rs 100 crores a month.

The rate of the decline has accelerated since then. In fact, in the first week of June, the reserves fell by a heavy Rs 125.27 crores. Hence the efforts to increase them by external borrowings which are expected to be mainly from the IMF, talks with which have started.

The reserves are needed because of the sharp rise in imports to an estimated Rs 12,000 crores last year. They are bound to increase this year, even though the crude bill is almost constant, because of the decision to import consumer goods like wheat, edible oil and sugar.

FOREIGN EXCHANGE RESERVES LINKED WITH REMITTANCES

Calcutta THE STATESMAN in English 22 Jul 81 p 9

[Text]

PATNA, July 21.—The Bihar Chief Minister, Mr Jagannath Mishra, yesterday claimed that the greatest achievement of the Congress (I) Government during its one-year rule in the State was the restoration of normal conditions in the campuses and the holding of examinations on schedule, reports UNI.

Recounting the various measures taken by the Government, Mr Mishra, in a broadcast over the Patna station of All India Radio, said that another major achievement was the nationalisation of all secondary schools, by which 40,000 teachers had been made Government servants.

Except for the tragic incidents at Biharsharif, complete communal harmony prevailed all over the State. Riot victims were rehabilitated, compensation was paid to the people and the guilty were punished, he added.

The concept of panchayati raj was implemented for the first time in the State on November 14 last year, after legislation was enacted in 1981-82. The dream of Gandhiji and Jawaharlal Nehru (of "gram swaraj") had been realized with the creation of district boards in all the districts.

The poorest people above 60 years of age who own up to one acre in the plains and 2.5 acres in the plateau area have been granted a life-long monthly pension of Rs 30. This will benefit two million people in the State, Mr Mishra said.

A new scheme had been launched under which 50,000 houses would be built for the homeless. While the construction of 7,500 such houses would begin in 1981-82, another 10,000 units were proposed next year.

Mr Mishra said that development plans in the 112 blocks in the tribal region had been accelerated. The Government had taken wide-ranging measures to restore land to the Adivasis. Over Rs 56 crores would be spent on all the tribal plans in the current year.

A Harijan component plan had been launched in areas where the population exceeds over 20%. A sum of Rs 75 crores would be spent on this plan. No major incident of atrocity on Harijans and tribals has taken place during the past year, he claimed.

Incentives had been given to the rural people for irrigation. For farmers owning up to seven acres in the Chhotanagpur region, wells would be dug by the Government free of cost, Mr Mishra said.

BENGAL UNIONISTS SAY CITU AGAINST TU UNIT

Calcutta THE STATESMAN in English 18 Jul 81 p 7

[Text]

LEADERS of the State Committees of four central trade unions—West Bengal Pradesh National Trade Union Congress (U), United Trade Union Congress (Lenin Sarani), Bharatiya Mazdoor Sangh and the Hind Mazdoor Sabha—alleged in Calcutta on Friday that the Centre of Indian Trade Unions was trying to disrupt the unity of the central trade unions in West Bengal by disregarding the joint struggle call given by the National Campaign Committee of the eight central trade unions in Bombay last month to fight the "repressive and anti-labour policies of the Centre."

They said despite CITU being a constituent of the National Campaign Committee and its general secretary, Mr P. Ramamurthy, pleading for unity of the central trade unions at the Bombay convention, the West Bengal leaders of CITU had formed a separate State level campaign committee excluding the BPNTUC (U) and the UTUC (LS) from it. The CITU leaders had reportedly said that since both the unions and the parties to which they were affiliated were critical of the CPI (M)-dominated Government in West Bengal CITU in West Bengal would have no truck with them. The CITU leaders were particularly allergic to the UTUC (LS) with which, they said, CITU would never participate in any joint movement.

The Bombay convention of the eight central trade unions had directed the formation of State Level Campaign Committees for building up a joint movement of the eight central trade unions against the use of the National Security Act and the Essential Service Maintenance Act, the curbing of trade union and democratic rights and the rising prices of essential commodities. The National Campaign Committee of the eight central trade unions will be meeting in Delhi on July 24 to fix the date for a one-day Bharat Bandh and a march by industrial workers to Parliament House.

Mr Sugata Roy, President of WBPNTUC (U) and Mr Fatick Ghosh leader of the UTUC (LS), alleged that the CITU leaders by violating the directives of the Bombay convention formed their own State Level Campaign Committee in which among others the UTUC (Bowbazar), Trade Union Co-ordination Committee and the organizations affiliated to CITU, like the Bengal Provincial Bank Employees Association 12th July Committee and the Coordination Committee of State Government Employees had been included. The State unit of CITU had convened a meeting on June 29 from which the UTUC (LS) and WBPNTUC (U) had been excluded.

The All-India Trade Union Congress, another participant at the Bombay convention, has strongly urged unity of all the central trade unions in the State and expressed its determination to uphold the directive of the Bombay convention. The four trade unions WBPNTUC (U), UTUC (LS), HMS and BMS have already formed a State level campaign committee and have requested CITU and two other left trade unions to join their committee "in the interest of joint struggle" Their leaders said if the three left trade unions did not respond to their request the existence of the two political committees would split the working class in the State.

SINGH OPENS STATE HOME SECRETARIES' CONFERENCE

Calcutta THE STATESMAN in English 18 Jul 81 p 1

[Text]

NEW DELHI, July 17.—The Union Home Minister, Mr Zail Singh, today called upon the States to take immediate steps to strengthen their intelligence machinery to prevent and control communal disturbances, reports UNI. He was opening a two-day conference of State Chief Secretaries, Home Secretaries and Inspectors-General of Police.

The Minister told them to speed up action on a model scheme already sent to them by the Intelligence Bureau.

He made it clear that the Government would come down heavily on any secessionist activity. The unity of the country would be maintained at all costs, he added.

Referring to the incidents of rape in several parts of the country, the Home Minister said the law would be tightened to provide deterrent punishment against such heinous offences.

Mr Singh said the series of communal incidents in U.P. in August and September last year and the recent incidents at Biharsharif and Hyderabad "have underlined the need for constant vigilance".

"The real test of our efficiency would lie in monitoring the situation closely in communally sensitive areas and remove the irritants well in time", he told the police officers and administrators.

The Home Minister said the communal problem could be solved effectively with the coperation of all. He called upon the administration to gear itself up to meet the challenge "and discharge its responsibilities with tact and firmness"

He said the police had to tackle a number of agitations engineered by various interested parties and groups. The available manpower and material resources had to be stretched to the very limit.

Here again "an alert and efficient intelligence set up will help in evolving precautionary and preventive measures to maintain law and order", he said.

Mr Zail Singh said there had been allegations about communal bias on the part of the police and administrative machinery in the control of communal disturbances. "We should take serious and sustained action through proper recruitment and training"

Training programmes should be drawn up to reorient the policeman's attitude to his work and sharpen his ability and in the process improve his image. The uniformed force should be subject to strictest discipline. The administration as a whole should be impartial and fair, he said.

Legal provisions had been made to deal with anti-social elements and other criminals more effectively. But "ultimately more than the laws and statutes, it is your ability to implement the policies and guidelines with determination which will be the decisive factor for the success of our efforts in the maintenance of law and order in the countries." Mr Zail Singh said.

Referring to the Government's commitment to the welfare of the poor, the Home Minister said Central assistance for the State's special component plans for the Scheduled Castes and Tribal sub-plans had been increased.

The Home Minister said peace and harmony were essential for the country's proper functioning of the various sectors of the economy. A great responsibility rested on the administration and police in ensuring this.

He said if the administration "is prompt, purposeful and efficient" the people would respond with greater efforts.

He asked the senior officers to devise ways to deal effectively and expeditiously with the dowry problem.

DESAI ATTRIBUTES COMMUNAL INCIDENTS TO CONGRESS-I

Bombay THE TIMES OF INDIA in English 18 Jul 81 p 12

[Text]

PUNE, July 17.

MR. Morarji Desai has attributed the increasing incidence of communal riots in different parts of the country to the ruling Congress (I) party's policy of appeasing all minorities.

Speaking here to newsmen here today, the former prime minister said that during the Janata regime, the Congress (I) had encouraged agitations by minority communities and the police personnel. This has boomeranged on them, he pointed out.

According to Mr. Desai, there was no evidence to prove the charge that the RSS had a hand in the communal troubles. It appeared that the RSS retaliated whenever their members were attacked.

Commenting on the racial riots in the U.K., Mr. Desai said that the Thatcher government should effectively check the stir launched by Mr. Enoch Powell.

Rampant corruption in every sphere was the cause of the ever increasing prices and the government would never be able to bring them down, he asserted.

Political parties should come together on the basis of a specific programme and make sincere efforts to form a cohesive party. However, care should be taken not to admit persons like Mr. Charan Singh in the new party, Mr. Desai said.

Asked about the possibility of another emergency, Mr. Desai said that no government would be able to declare it again. The moment such a step was taken, the government would collapse in no time, he warned.

He challenged the government to prosecute him and prove the allegations that he was responsible for squandering the country's gold reserves and for depleting its foreign exchange reserves.

Mr. Desai was of the opinion that India could not have friendship with China so long as it occupied Indian territory. However, he did not advocate war with China.

PLANS, PROGRESS IN METALLURGICAL INDUSTRY REPORTED

Madras THE HINDU in English 21 Jul 81 p 9

[Text]

NEW DELHI, July 20.

The Union Minister of Steel and Mines, Mr. Pranab Mukherjee, said here today that the construction of the Visakhapatnam steel plant would begin on scheduled next October.

Talking to newsmen here, he said the first phase of the project, which is being built with Soviet collaboration, would be completed in 48 months.

As of now, the Steel Authority of India Ltd. (SAIL) had been entrusted with the responsibility of building the plant but what its ultimate organisational set-up would be had yet to be decided.

Salem steel plant

Mr. Mukherjee said he was sympathetic to the suggestion for upgrading the Salem project into a full-fledged steel plant from a re-rolling mill.

"The difficulty is that there is no money, but I have noted the suggestion", he said in response to a question.

The Paradip steel project was now under the consideration of a Cabinet committee, which was looking into its various aspects. He did not specify the date by which a decision would be taken.

As for the second alumina project to be built in Visakhapatnam—the first project is coming up in Orissa with French collaboration—Mr. Mukherjee said the Soviet Union had been requested to increase its assistance.

The USSR, he said, had initially offered to meet 15 per cent of the project cost. India had requested it to assume responsibility for the project as a whole. In return it could lift the entire production of the plant.

The question of looking for other sources of finance would arise only after the Soviet Union's reply to the Indian proposal was known.

Steel output better

Mr. Mukherjee said a target of 5.7 million tonnes of saleable steel had been fixed for the SAIL plants for 1981-82. This was one million tonnes more than the 1980-81 output.

The performance of the steel plants had looked up following some improvement in the availability of power and coal. The plants were concentrating on saleable steel and there was a fall in pig iron production. It had been decided to import pig iron to meet the demand.

Mr. Mukherjee regretted the delay in the completion of the expansion projects at Bhilai and Bokaro to four million tonnes but said the fourth blast furnace was expected to go into full production soon. The expansion programme was now expected to be completed by December next year.

The second phase of expansion of the alloy steels plant at Durgapur had been approved. It would involve an outlay of Rs. 80 crores. When it was completed the production of the plant would increase to 2.6 lakh tonnes a year from the present 1.6 lakh tonnes.

Mr. Mukherjee said a fall in the offtake had led to a glut of electrical conductor grade aluminium. Cable manufacturers were not lifting stocks from the aluminium producers as the State Electricity Boards were not placing orders with them for cables and conductors.

The matter was discussed at a recent meeting of the chief executives of State Electricity Boards with the Union Finance Minister, but the aluminium producers had been advised not to slow down production.

As for other non-ferrous metals, the production capacity was not being utilised in full because of power scarcity. The Minerals and Metals Trading Corporation had been advised to make all the needed imports as the international prices were favourable.

BUSINESS GROUP URGES FISCAL POLICY REORIENTATION

Calcutta THE STATESMAN in English 22 Jul 81 p 3

[Text]

In a study of the investment needs of the private-sector during the Sixth Plan period, the Indian Chamber of Commerce has called for a reorientation of the present fiscal and monetary policies to facilitate an increase in investment by the corporate sector and enable the firms to generate internal savings and acquire matching working capital.

The private-sector, the study points out, has been assigned greater responsibility in undertaking industrial development during the Sixth Plan. But it has been facing difficulties in raising resources to finance expansion, new capacity creation and modernization of industry. The investment required by the private-sector will be about Rs 3,000 crores a year during the plan. The current level of investment in the private-sector is only half this amount.

It is apprehended that even this level of investment will get reduced because of the implementation of Chore Committee's recommendations which will lead to diversion of investible funds to meet working capital requirements. Financial needs of the industry are increasing every year because of the continuing inflationary pressure and escalation in the costs of new projects. The capacity to generate internal resources has been reduced in real terms and borrowings from financial institutions have become difficult.

In the context of the tight credit policy leading to the shortage of funds, the Indian Chamber of Commerce has suggested some changes in the Government's monetary policy, if the private corporate sector has to discharge its responsibility of industrial expansion during the Sixth Plan.

It is stated that the Chore Committee's recommendations should not be implemented and the debt equity ration be diluted from 2:1 to 4:1. The chamber has suggested a review of the "restrictive" credit policy announced by the Reserve Bank for the 1981 slack season and also for the fiscal year 1981-82. It also feels that the interest rate, which has been increased steeply, should be brought down to a reasonable level.

The study points out that high tax rates, apart from increasing the cost of projects, leave very little profit for replacement and modernization of plant and machinery and diversification of the corporate activities. It is felt that the overall rate of corporate tax should be brought down from 70% to 50% and that the maximum rate of personal taxation be brought down to 50%. Long term investment in Government securities, shares of new firms and other productive assets should be exempted from income tax and wealth tax. There is also need for a review of the existing provision for grant of a depreciation allowance it is stated.

COMMISSION REPORTS RESULTS OF SIXTH PLAN REVIEW

Bombay THE TIMES OF INDIA in English 20 Jul 81 p 3

[Text]

NEW DELHI, July 19 (PTI):

A REVIEW of the progress in implementing the sixth plan has revealed the attainment of 90 to 95 per cent of the physical targets set for industry and transport during the first year, 1980-81, according to the planning commission.

Being conducted by two members of the planning commission, Mr. Mohammad Fazal (for industry, transport and power) and Dr. M. S. Swaminathan (for agriculture), the review covers both the Central and state sectors of the sixth plan.

The review of the Central sector has been completed but that of the state sector is still in progress. The findings, when available in the next three months, will be placed before the full planning commission.

In the agriculture sector, under review are both immediate and long-range projects and policies.

ECONOMY BUOYANT

The achievement, Mr. Fazal pointed out to PTI, was reflected in the buoyancy in the economy. He underlined what he called the satisfactory growth rate in industrial production.

"This is an extremely gratifying performance, considering that the new government has taken over only last year", he said.

Mr. Fazal, however, admitted that though a 19 per cent increase had been recorded in power generation, there was scope for greater efficiency in project management and project construction.

Only sustained efforts, he said, would help achieve the plan target of generating 19,600 additional Mws.

Some of the problems facing the power industry, came in for review on Friday at the meeting of the state ministers of electricity and chairmen of state electricity boards. The meeting was also attended by the Union finance minister, Mr. R. Venkataraman, Union energy minister, Mr. A. B. A. Ghani Khan Chowdhury and Mr. Fazal.

Stress is understood to have been laid on the state electricity boards recovering outstanding electricity tariff totalling Rs. 290 crores and minimising transmission losses caused by pilferage.

The electricity boards were advised to monitor their performances.

Both Mr. Fazal and Dr. Swaminathan complimented the states for the effective implementation of the plan generally. The plan reviews are attended to by chief ministers themselves, in addition to ministers of finance and planning.

With dry farming techniques becoming available during the last four or five years, the sixth plan has given high priority to dry farming.

The planning commission, Dr. Swaminathan said, had taken up a detailed study, of areas which receive high rainfall during the monsoon and yet are drought-prone. One such study, of Konkan and Sikkim, had just been completed, he said, adding that two more had been begun in Mizoram and Goa. The Himalayan and Western ghat regions, would also be covered by such studies, he said.

The Maharashtra government has appointed a committee headed by the state chief secretary to follow up the study of the Konkan. Some steps have already been taken to give effect to the findings of the study.

COMMERCE MINISTER ANNOUNCES 1981-82 EXPORT TARGET

Calcutta THE STATESMAN in English 21 Jul 81 p 1

[Text]

NEW DELHI, July 20.—Faced with a trade export deficit of over Rs 5,500 crores in 1980-81, the Government has set an overall export target of Rs 8,400 crores for 1981-82 which implies a growth rate of 18% in real terms, taking inflation into account. The Planning Commission has set a growth target of 9%.

Mr Pranab Mukherjee, Minister of Commerce, today outlined a series of measures taken by the Government to achieve the target and set much hope on project exports and the new scheme for 100% export-oriented units.

He told reporters that India had so far won contracts for Rs 4,000 crores worth of projects abroad. Of this, Rs 1,600 crores had been obtained this year. A task force had been set up to suggest ways to improve the performance.

Regarding the scheme for setting up 100% export-oriented schemes, 95 applications had been received and 34 had been approved. Twelve were being examined. The investment involved in the 34 units was estimated at Rs 100 crores. They would annually export Rs 100 crores worth of goods.

Mr Mukherjee agreed that in view of the concessions offered to these 100% export-oriented units, the proposal to set up further free trade zones had become redundant. But he pointed out that the two free-trade zones at Kandla and Santa Cruz had improved their performance last year.

The initial provisional trade figures for 1980-81, which placed exports at Rs 6,578.41 crores and imports at Rs 11,783.29 crores, had now been revised upwards. Imports were estimated at Rs 12,210.16 crores and exports at Rs 6,675.15 crores, giving a trade deficit of Rs 5,535.01 crores. Mr Mukherjee expected a further upward revision and thought that the export target of Rs 7,100 crores set for last year would be achieved.

Nontheless, this meant that exports would show a growth rate of 10% while imports would soar by over 40% at an estimated Rs 12,500 crores. The biggest strain came from the oil import bill which was around Rs 5,200 crores, or almost 73% of total exports. Further burdens had been imposed by imports of items like fertilizer, non-ferrous metails, edible oils and cement.

Certain non-traditional items like engineering goods, basic chemicals, plastics, linoleum, handicrafts and woollen manufactures had done well, registering increases of between 30% and 60%. Agricultural and plantation items like coffee, tobacco, cashew kernels, rice, groundnuts and cotton had also showed appreciable increases while cotton textiles had risen by 18%.

But there had been a setback in the export of items like sugar, leather and leather manufactures, marine products and spices. Jute manufactures had shown a slight decline of 2.5% as a result of competition from Bangladesh and synthetics.

Mr Mukherjee said that the export performance in 1981-82 would depend largely on the trading environment in the world and the state of the domestic economy. There had been a marked slowdown in world trade but the domestic economy was looking up because of infrastructural improvements.

GOVERNMENT AGENCIES' DISPUTE MAY SPOIL WORLD BANK LOAN

Bombay THE TIMES OF INDIA in English 21 Jul 81 p 5

[Text]

NEW DELHI, July 19 (UNI)

THE expected World Bank loan of Rs. 600 crores to the Indian Railways may be delayed or may not materialise because of a row between the Railway Board and the department of electronics over import of equipment for computerised freight operation control.

The two big loans totalling $700 million (Rs. 600 crores) are stated to be in the final stage of negotiations, but the World Bank has set a precondition for granting them. It wants the Railway Board to make a commitment to import and instal computerised operation control system. The government of India should make available the requisite import licence for the same.

While the Railway Board is understood to be in favour of accepting the World Bank's stipulation, the department of electronics insists that the computerised operation system should be developed indigenously.

A great deal of optimism was exuded in the Rail Bhavan last month about securing these big loans. It was given out that a railway technical team would leave for Washington on June 20 and it would be followed in four days by another team, led by railway board chairman, Mr. M. S. Gujral, who might sign the agreement.

However, following this snag, the departure of both the teams to Washington has been postponed indefinitely.

Recently, a meeting of top officials of the Railway Board, the department of electronics and the finance ministry was convened to thrash out the issue. Divergent views are understood to have been expressed by the officials of the Railway Board and the department of electronics on the import of equipment for computerised operation control system.

According to informed sources, the issue is likely to be referred to the cabinet for final decision.

The department feels that the computerised system could be introduced indigenously as a decentralised or distributed system and could be later developed over the years into a system controlled from one point.

On the other hand, the Railway Board has pointed out that nowhere in the world is this system decentralised. "If we start from scratch, it would take us 10 to 12 years to develop it to the requisite level," board sources say.

They also point out that by the turn of the century, the railways are expected to carry nearly 450 million tonnes of freight traffic a year — more than twice the current tonnage. They maintain that even the United Kingdom bought the electronic equipment for this purpose from the US and Canada, who were the first countries to develop the technology, and it took UK seven to eight years to adapt the system to its requirement.

A senior board official told UNI, "We are very clear in our minds that this equipment would have to be imported."

The computerised operation infrastructure system — known as TOPS (Total Operating System)—gives information about the real time on line, enables to track wagons at a particular time and also looks after the maintenance requirements of the rolling stock.

The proposed Rs. 600 crore World Bank loan is to finance a massive programme of modernisation of the rolling stock and route electrification.

The World Bank has already carried out an appraisal of the concerned projects. The appraisal missions of the Bank visited India twice for this purpose in February and April.

The two loans of about $700 million carry soft terms and will be repayable over a period of 40 years. If the loan materialises, it would costitute the largest advanced by the World Bank to the Indian Railways.

NEW HARIJAN CONVERSIONS REPORTED IN PONDICHERRY

New Delhi PATRIOT in English 22 Jul 81 p 8

[Text]

PONDICHERRY, July 21 (PTI)—Ruthless exploitation by the landlords and harassment by society and the administration have forced the 1500 Harijans of Thimmanaikenpalayam village, near here, to seek conversion to Islam, according to their leader.

Their decision to change faith is final and there is no political motive in it Harijan leader C Krishnamurthy told PTI.

Union Territory's Chief Minister D Ramachandran, and his cabinet colleagues had termed reports of the Harijans' decision 'far from the truth' they also suspected political motive in the reports.

The issue had become the subject of much controversy, coming in the wake of the mass conversion of Harijans in Meenakshipuram, Tamilnadu.

Mr Krishnamurthy said the Harijans were all 'oral' tenant cultivators (tenancy based on an Oral Contract and not entered in the village records) and farm labourers Out of their produce, the landlords collected one-third for supply of water to the fields and another one-third as land rent, besides interest at an appalling 120 per cent on loans advanced to the cultivator.

Mr Krishnamurthy said a senior official had had discussions with him, but no settlement was reached. The Harijans wanted assured irrigation for the lland held undr oral lease, non-interference in the house sites allotted to them and protection against ill-treatment by caste Hindus.

Why Islam, the correspondent asked, pointing out that in the last four years. 10 Harijan families had embraced Christianity. "By becoming Christians, we cannot raise our social status. By becoming Muslims we can. he said.

TROUBLES WITH JHARKAND SUPPORTERS ANTICIPATED

Calcutta THE STATESMAN in English 17 Jul 81 p 9

[Text]

DURGAPUR, July 16.—Widespread trouble is apprehended by the district authorities in Bankura during the sowing season because of the agitations launched by the Jharkhand party and the Jharkhand Mukti Morcha. The Government has been asked to send five additional police platoons to ensure peace, according to the district magistrate.

The district authorities have identified more than 150 vulnerable spots. Police force in the areas has already been strengthened.

Efforts are being made to mitigate the problems of the Adivasis who are sworn supporters of the Jharkhand party and the Jharkhand Mukti Morcha. But in most places the two organizations work separately and the relation between them is bitter. The Mukti Morcha is dominated by extremists while the Jharkhand party in the district is mainly controlled by leaders from outside including Dhanbad.

Frequently demontrations are held near Government offices demanding formation of Jharkhand State. They also demand use of Santhali language (Alchiki) in the official records. The district magistrate said the district authority could do little to meet the demands but Government work was hampered in many cases because of the agitations. He said the local leaders could be reasoned with. but those from outside the district were the main threat to peace.

The latest census figure reveals that the percentage of Adivasi population has dwindled in the district. Of the 2.3 million people in the district, about 250,000 are Advasis living in pockets. A suggestion has been forwarded to the State Government to form a new sub-division at Khatra and bifurcate Ranibandh thana for the benefit of the Adivasis who are concentrated in the areas.

For the first time in the State a mobile employment exchange has started working in the Adivasi areas and in five days the exchange has registered the names of about 900 people from Ranibandh. Raipur one, Khatra, Saltora and Simlapal blocks. The mobile exchanges will later renew the employment cards and issue new ones. The district magistrate said some eligible candidates would get employment soon. He added that so far few Adivasi job seekers registered their names with the district employment exchange because of the distance. About Rs 60 lakhs will be spent for development of the Adivasi area this year.

KEY SECTOR PRODUCTION BELOW TARGET IN FIRST QUARTER

Madras THE HINDU in English 18 Jul 81 p 9

[Text]

NEW DELHI, July 17

Despite official claims of all-round improvement in the performance of infrastructure during the current year, production in the key sectors in the first three months has been less than the target, except in power generation, according to figures received by the Finance Ministry.

The official claims of improvement relate to better performance in comparison with 1979-80 and 1980-81.

A Finance Ministry review reveals that Calcutta port's performance has been far better and has made possible a high level of coastal movement of coal in June (about 1.09 lakh tonnes).

More power: Power generation has exceeded the target set for the first quarter of 1981-82, both in thermal and the hydel sectors. The total generation was 339.69 million units a day in April, 329.37 million units in May and 326.13 million units in June.

Though there has been a decline from April to June, the actual performance has been higher (except for June) than the target — 324.67, 319.82 and 326.83 million units.

The Damodar Valley Corporation, for which figures are given separately, generated during the three months 17.14, 16.12 and 14.59 million units a day against the target of 13.50, 13.32 and 13.50 million units. At present DVC's daily generation is around 17 million units.

The performance in power generation during the first quarter of this year has been 13.3 per cent and 19.2 per cent higher than in 1979-80 and 1980-81. Power cuts have been withdrawn in Tamil Nadu and are expected to go in Karnataka. Restrictions, however, continue in Punjab, Haryana, U.P., Rajasthan, M.P. and West Bengal.

The review emphasises that coal stocks at thermal plants in Western and Northern India still need to be built up.

The movement of coal wagons to power houses declined between April and May mainly on account of a strike in the Singareni mines and to some extent by labour absenteeism in the Western and Eastern Coal Fields Ltd.

With the calling off of the strike at Singareni and reduced absenteeism in the other mines, the loading reached an average of 3,900 wagons during the last 10 days of June.

Below target: Coal production during the first quarter was below target. In April it was 91.71 lakh tonnes (target 96.55 lakh tonnes), in May 91.31 lakh tonnes (97.71) and in June 91.79 lakh tonnes (93.74).

The production in the first three months of 1981-82 was 22.7 per cent of the target of 121 million tonnes and remained at the same level as last year.

Railways: The performance of the coal sector had its effect on the showing of the Railways.

The daily loading of wagons, both on the broad gauge and metre gauge, dropped from 30,634 in April to 29,132 in May and rose slightly to 30,125 in June. Of this, the coal movement accounted for 9,951 in April, 9,115 in May and 9,446 in June.

Coal movement to power houses showed a drop from 3,936 wagons in April to 3,585 in May, but rose to 3,708 in June.

The Railways has been asked to step up the daily movement of coal to 10,000 wagons, of which the share of power houses should not be less than 4,100 wagons.

The Finance Ministry has taken note of the fact that coal supply to cement plants continues to be unsatisfactory though plants in South India are now receiving increased supplies from Singareni.

In spite of the fact that the daily rate of wagon loading continues to be at a level below what the Government would like it to be, the current year's performance is better than that of last year by 11.5 per cent.

Ports: As for ports, the congestion at Bombay has shown no improvement. There were 16 vessels waiting for berth on July 4.

The Shipping Ministry has taken steps to restrict priority berthing at Bombay. It has been asked to prepare a paper on the action to be taken to reduce congestion at the port for consideration by the Cabinet committee on infrastructure.

There is no improvement at Haldia, but the Calcutta port has put up a better performance. As a result, coastal movement of coal during June was the highest in the last several months.

Steel: In steel also, the actual performance has been less than the target. For the three months, it has been: saleable steel: April 511,500 tonnes (target 520,800), May 545,500 tonnes (569,500), June 517,000 tonnes (573,700).

Pig iron: April 109,000 tonnes (target 123,000), May 103,800 tonnes (118,000) and June 81,600 tonnes (100,600).

Though production this year has been higher than that during the first quarter of the two previous years by 22.5 per cent and 19 per cent, oven pushings have been short of the target throughout the first quarter. This position is expected to improve by the end of July with the commissioning of additional ovens at Bokaro and Bhilai.

The steel plants, however, have enough stocks of coking coal (about 5.18 lakh tonnes).

CSO: 4220/7342

U.S. PROFITS IN NATION REPORTEDLY INCREASING

New Delhi PATRIOT in English 19 Jul 81 p 5

[Text]

US profits in India have been high, steady and constant over the years. This fact has emerged in the study prepared for this year's meeting of the Indo-US joint business commission (IUJBC) last month, reports CNS.

The study is based on just 30 of the US companies operating in India. Of these 15 are FERA companies. The study covers the period between 1975 and 1980. Some of the salient facts brought out by the study are:

On the sales side turnover of the 30 companies doubled from 710 million dollars in 1975 to 1,427 million dollars in 1980 (16 per cent Engineering and consumer goods enjoyed healthy increases in sales (18.33 per cent and 17 per cent) while pharmaceuticals and chemicals posted 13.6 per cent and 12.6 per cent gains. tyre and rubber companies trailed with 3 per cent.

From sales flow profits. Against the average compound profit growth rate of 15.2 per cent for the group, engineering and consumer products companies earned 20.6 per cent and 17 per cent respectively. Gross profits as a percentage of sales was 23.4 per cent in 1975 but 22.5 per cent in 1980 due to rising costs of materials, equipment, supplies and wages.

In absolute terms, net profit before tax rose from 84.8 million dollars to 137.4 million dollars and net profit after tax 62.2 milliin dollars. This is indicative of higher tax concessions In 1975. engineering and chemical industries contributed more to before-tax profit 62 per cent, while chemicals contributed 39 per cent and engineering 23 per cent. This changed in 1980 with engineering contributed 50 per cent and chemical and allied industries 25.6 per cent.

Out of profits come dividends. Dividends grew at 19 per cent, rising from 16.5 to 30.9 million dollars. Retained earnings increased by 17.8 per cent from 18.4 million dollars to 31.3 million dollars. Average ratio of dividends to after-tax profit was maintained around 50 per cent. The increasing rates of profits allowed companies to perform well in terms of escalating dividends, while still providing a higher quantum of retained earnings. Fiftysix per cent of the companies paid 12 per cent and more in 1980 on par value. Current market values of some shares were ten times the paid-up value.

In contrast to profits and dividends, wages salaries and bonus grew by 12 per cent to 123 million dollars.

In consequence, net worth grew at 12.3 per cent rising from 256 million dollars to 455 million dollars while equity capital increased by 28 per cent from 99.8 million dollars to 172 million dollars. As percentage of net worth equity increased by two points to 45 per cent.

Gross fixed assets grew at 13 per cent, one per cent higher than total assets, indicating that Indo-US joint ventures continued to expand despite restrictions imposed by FERA and that greater investment emphasis was on long-term production resources than on current assets. Gross fixed assets of companies engaged in engineering industries grew at 15 per cent, chemical and allied industries at 12 per cent and pharmaceuticals at eight per cent. Even so, Orville Freeman, chairman of the US section, staunchly holds forth on FERA declaring that FERA should be abolished and that there should be no restrictions on foreign investment. Not that FERA has any biting teeth left!

SIGNIFICANCE OF HUANG HUA'S VISIT DISCUSSED

New Delhi MONTHLY COMMENTARY ON INDIAN ECONOMIC CONDITIONS in English Jun 81 pp 11, 12

[Text]

The Chinese Foreign Minister Mr. Huang Hua's visit to New Delhi after nearly two decades of strained relations between India and China is an event of considerable significance. In recent years, particularly since the rise to power of Mr. Deng Xiaoping and the exchange of ambassadors by the two countries, hopes for a thaw in their relations were strengthened. However, other events intervened to delay the process, such as the abrupt termination of Mr. Atal Bihari Vajpayee's visit when China attacked Vietnam and later when the Indian government under Mrs. Gandhi recognised the Soviet-supported Heng Samarin regime in Kampuchea. It is generally believed that Soviet influence on India's foreign policy would discourage any rapprochment between India and China and in any case no credible solution to the boundary dispute between India and China was in sight during these years. Mr. Morarji Desai as Prime Minister had been categorical in declaring that China should vacate all occupied territory before normalisation could take place. That could hardly be considered a good beginning. The subsequent offer by the present leadership in China of a package deal implying Chinese recognition of the McMohan line in the eastern sector in return for leaving China virtually in control of the areas now held by it in the Western sector (Aksai Chin) was hardly calculated to improve the prospects of a settlement of this dispute.

That in spite of this background, the Chinese authorities showed an interest in opening a dialogue at an early date showed a new flexibility of approach. This was very much in evidence during the talks which, from all accounts, were conducted in a cordial atmosphere. Mr. Huang Hua described the outcome of his visit as a "breakthrough", not in the sense that both sides have made a discovery of a new formula or acceptable basis for an agreement on the border question but in the more restricted sense of having reached an understanding on the modalities of discussion of the respective points of view and on a time-frame for such discussion. India has offered no objection to the Chinese suggestion that pending a settlement, the "two sides should maintain the *status quo* and tranquillity on the border." Mr. Huang Hua has further assured India that China would adopt a "positive attitude" in finding a settlement of the boundary issues and that the two countries could resolve them "on the basis of equality, mutual accommodation and understanding, taking into account the historical background, the present actual situation and the national feelings of the two peoples."

What all these generalities would mean in the actual search for the principles which should serve as guidelines is at present unpredictable. While India is agreeable to making some beginnings in normalisation of relations in several other fields—such as trade, technical
